**Attachment — Additional Questions for the Record**

**The Honorable Anna G. Eshoo**

In your previous testimony you highlighted two primary reasons why the Internet has yet to match the power of broadcasting: 1) the lack of home broadband access for many Americans and, 2) a plethora of online news sources that simply mirror traditional media sources.

1. How can Congress and/or the FCC address these challenges?
  
2. Do you envision a day when the Internet will rival traditional bastions of 20th century media as a primary source for local news, public information and weather?
