

UNITED STATES SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549  
FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  
For the fiscal year ended December 31, 2016  
or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934  
For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number 001-11001

**FRONTIER COMMUNICATIONS CORPORATION**  
(Exact name of registrant as specified in its charter)

<u>Delaware</u> (State or other jurisdiction of incorporation or organization)	<u>06-0619596</u> (I.R.S. Employer Identification No.)
<u>401 Merritt 7</u> <u>Norwalk, Connecticut</u> (Address of principal executive offices)	<u>06851</u> (Zip Code)

Registrant's telephone number, including area code: (203) 614-5600

**Securities registered pursuant to Section 12(b) of the Act:**

Title of each class	Name of each exchange on which registered
<u>Common Stock, par value \$0.25 per share</u>	<u>The NASDAQ Stock Market LLC</u>
<u>Series A Participating Preferred Stock Purchase Rights</u>	<u>The NASDAQ Stock Market LLC</u>

**Securities registered pursuant to Section 12(g) of the Act: NONE**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer", "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer  Accelerated Filer  Non-Accelerated Filer  Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value of common stock held by non-affiliates of the registrant on June 30, 2016 was \$5,764,318,000 based on the closing price of \$4.94 per share on such date. The number of shares outstanding of the registrant's common stock as of February 10, 2017 was 1,172,525,000.

**DOCUMENT INCORPORATED BY REFERENCE**

Portions of the Proxy Statement for Frontier's 2017 Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

PART I**Item 1. Business**

Frontier Communications Corporation (Frontier) is a provider of communications services in the United States, with approximately 5.4 million customers, 4.3 million broadband subscribers and 28,300 employees, operating in 29 states. In recent years, Frontier has completed multiple acquisitions. On April 1, 2016, we acquired the wireline operations of Verizon Communications, Inc. in California, Texas and Florida for a purchase price of \$10,540 million in cash and assumed debt.

**Frontier's Service Territories****How We Serve Our Customers**

We conduct business with both residential and business customers.

*Residential.* We provide broadband, video, voice and other services and products to our residential customers. We deliver these services generally over a combination of fiber and copper based networks.

*Business (commercial customers and wholesale carrier customers).*

*Commercial.* We sometimes refer to our commercial customers as SME (small business, medium business and larger enterprise) customers. We provide a broad range of services to our SME customers, including broadband service, Ethernet service, traditional circuit-based services (TDM services) and voice services. We also sell customer premise equipment (CPE) and provide CPE-related maintenance services.

- *Larger Enterprise:* Fortune 1000, multi-location companies, large government entities, large educational institutions, and non-profits.
- *Medium Business:* Single or multi-location companies and mid-sized government entities, educational institutions and non-profits.
- *Small Business:* Mostly single-location businesses, the smaller of which have purchase patterns similar to residential customers.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

*Carrier.* Carrier customers are often referred to as wholesale customers and include national operators such as AT&T and Verizon, Local Exchange Companies that need to access locations within Frontier's footprint, Competitive Local Exchange Companies (CLECs) and wireless carriers. Carrier customers buy both voice and data services.

**Services and Products**

We offer a broad portfolio of communications services for residential and business customers. These services are offered on either a standalone basis or in a bundled package, depending on each customer's needs.

*Data and Internet services.* We offer a comprehensive range of broadband services. The principal residential service we provide is broadband internet service. Commercial services include Ethernet, Dedicated Internet, Multiprotocol Label Switching (MPLS), Time Division Multiplexing (TDM) data transport services and optical transport services. These services are all supported by 24/7 technical support and an advanced network operations center. We also offer wireless broadband services (using unlicensed spectrum) in select markets utilizing networks that we own or operate. In addition, we offer our Frontier Secure suite of products, including computer security, cloud backup and sharing, identity protection and equipment insurance.

*Video services.* We offer video services under the Vantage brand to certain of our customers in portions of Connecticut, South Carolina, Minnesota, and Illinois and under the FiOS® brand in portions of California, Texas, Florida, Indiana, Oregon and Washington. We also offer satellite TV video service to our customers under an agency relationship with DISH® in all of our markets.

*Voice services.* We provide voice services, including data-based VoIP, long distance and voice messaging services, to residential and business customers in our markets. These services are billed monthly in advance. Long distance service to and from points outside our operating properties are provided by interconnection with the facilities of interexchange carriers. Our long distance services are billed in advance for unlimited use service and on a per minute-of-use basis for a fixed number of minutes.

We also offer packages of communications services. These packages permit customers to bundle their products and services, including voice service, video and Internet services, and other product offerings.

*Access services.* We offer a range of access services. Our switched access services allow other carriers to use our facilities to originate and terminate their local and long distance voice traffic. These services are generally offered on a month-to-month basis and the service is billed primarily on a minutes-of-use basis. Switched access charges have been based on access rates filed with the FCC for interstate services and with the respective state regulatory agency for intrastate services. Intercarrier compensation reform has impacted the rates that we may charge for these services. See, "Regulatory Environment" below. Other access services we offer, such as special access, allow other carriers to have a continuous, non-switched connection to customers within our service territory.

*Customer Premise Equipment.* We offer our SME customers third-party communications equipment tailored to their specific business needs by partnering with Mitel, Airbus, Avaya, Hewlett Packard, Adtran and other equipment manufacturers. CPE is typically sold in conjunction with voice, data and Internet services, and may also be sold on a standalone basis.

**Frontier Operating Strategies**

*Grow Broadband and Invest in our Network.* A main component of our strategy is to enable and strengthen the broadband capabilities of our network. We focus on broadband as the core growth component of our service offering, either bundled with our voice and/or video services, or on a standalone basis. We continuously improve our broadband speeds and availability in our markets and view these investments as opportunities to attract and retain a greater number of customers and increase average revenue per residential and business customer. Our capital expenditures include enhancing the existing outside plant by expanding fiber-based infrastructure throughout our network, upgrading network hardware, expanding transport capacity of our middle-mile and data backbone, and growing our video capabilities. We continue to deploy next generation Broadband Remote Access Servers throughout our network to facilitate the expansion of broadband and video service offerings and increase broadband speeds. Similarly, for our commercial customers we are focused on expanding and upgrading our premium Ethernet service offerings across our network.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Improve Customer Experience and Retention.** We provide multiple service and product options in our residential and business offerings to the customer base in each of our markets. We believe this strategy results in a better customer experience and allows us to maximize retention of existing customers and to attract new customers. At December 31, 2016, 63% of our residential broadband customers subscribed to at least one other service offering. Our bundled services include broadband, voice, and video offerings, including simplified messaging services, higher speed products and digital security products. In late 2016, we announced a new organization structure, including separate and specialized consumer and commercial operations which will focus on the differing needs of these customer groups.

**Improve Productivity and Operational Efficiency.** We continuously engage in productivity initiatives with a focus on simplifying our processes, eliminating redundancies and further reducing our cost structure while improving our customer service capabilities. We have achieved significant day one cost savings in the wireline acquisition in California, Texas and Florida in 2016. There are substantial operational cost take-out opportunities that we are aggressively pursuing across all of our properties.

#### Network Architecture and Technology

Our local exchange carrier networks consist of host central office and remote sites, primarily equipped with digital and Internet Protocol switches. The outside plant consists of transport and distribution delivery networks connecting our host central office with remote central offices and ultimately with our customers. We own fiber optic and copper cable, which have been deployed in our networks and are the primary transport technologies between our host and remote central offices and interconnection points with other incumbent carriers.

We have expanded and enhanced our fiber optic and copper transport systems to support increasing customer demand for high bandwidth transport services. We routinely enhance our network and upgraded with the latest Internet Protocol Transport and routing equipment, Reconfigurable Optical Add/Drop Multiplexers (ROADM) transport systems, Very High Bit-Rate Digital Subscriber Line (VDSL) broadband equipment, and VoIP switches. These systems will support advanced services such as Ethernet, Dedicated Internet, Multiprotocol Label Switching (MPLS) transport, and VoIP. The network is designed with redundancy and auto-failover capability on our major circuits.

We connect to the households and business locations in our service territory using a combination of fiber optic and copper technologies. In some cases we provide direct fiber into a residence or a business premises. In other cases a location is served with a hybrid combination of fiber and copper. Residences in our service territory are served by fiber-to-the-home (FTTH) and by fiber-to-the-node (FTTN), meaning fiber carries the traffic to an intermediate location where the signals are converted to copper wire for the final delivery to the household. We provide data, video, and voice services to the customer over both of these architectures.

As of December 31, 2016, our broadband availability to the households throughout Frontier's territories is as follows:

<u>(Downstream speed capability)</u>	Number of Households (in millions)	% of Households with capability
Up to 10 Mbps	13.4	88%
10 Mbps and above	8.9	58%
25 Mbps and above	6.0	39%
50 Mbps and above	4.5	29%
100 Mbps and above	3.8	24%
No broadband capability	1.8	12%
Total Households	15.2	

In certain markets, we have begun to offer residential broadband services with 1 gigabit download speed capabilities.

Rapid and significant changes in technology are occurring in the communications industry. Our success will depend, in part, on our ability to anticipate and adapt to technological changes. We believe that our existing network

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

architecture strategy will enable us to respond to these ongoing technological changes efficiently. In addition, we anticipate reducing costs through the sharing of best practices across operations, centralization or standardization of functions and processes, and deployment of technologies and systems that provide for greater efficiencies and profitability. We will continue to make strategic enhancements to our network, with a focus on higher return investments.

**Competitive Positioning**

Competition for residential customers comes from cable operators, wireless carriers and online video providers, among others.

- *Cable operators:* in a majority of our markets, cable operators offer high speed Internet, video and voice services than we do and compete with us aggressively on speed and price by marketing their offerings with significant promotional period pricing.
- *Wireless carriers:* primarily compete with us for broadband, video, and voice services in our markets by offering increasingly larger data packages to mobile customers. The percentage of homes with a landline telephone has been declining, a trend we expect will continue.
- *Online video providers:* many consumers are opting for internet-delivered video services (Over the Top, or OTT) through providers such as Netflix, Hulu, Amazon, YouTube and DirectTV Now rather than traditional, multi-channel video. In response, we have made investments in our network to deliver OTT video content to consumers who might not opt for traditional video services.

Many residential customers prefer to bundle their voice, data and Internet and video services with a single provider. In areas where we do not directly offer a network based video service, we offer satellite TV video service through DISH. This can impact acquisition of new customers and retention of existing customers, representing a critical factor for the attachment of video, broadband and voice products. As of December 31, 2016 34% of our residential customers subscribed to at least two service offerings, and 19% subscribed to at least three service offerings.

Competition for business customers comes from telecommunications providers, cable operators, CLECs and other enterprises, some of which are substantially larger than us. As compared to our residential customers, these customers often require more sophisticated and more data-centered solutions (e.g., IP PBX, E911 networks, Ethernet, SIP trunking).

In order to remain competitive, we must continue to evolve our product offerings to remain current with the changing needs of the market, to provide strong customer service and support, to invest in our network so we maintain adequate capacity and can deliver new capabilities as needed, and to package our offerings to make them attractive to customers.

**Regulatory Environment**

Some of our operations are subject to regulation by the FCC and various state regulatory agencies, often called public service or utility commissions. We expect federal and state lawmakers, the FCC and the state regulatory agencies to continue to revise the statutes and regulations governing communications services.

**Regulation of our business**

We are subject to federal, state and local regulation and we have various regulatory authorizations for our regulated service offerings. At the federal level, the FCC generally exercises jurisdiction over information services; interstate or international telecommunications services and over facilities to the extent they are used to provide, originate or terminate interstate or international services. State regulatory commissions generally exercise jurisdiction over intrastate telecommunications services and the facilities used to provide, originate or terminate those services. Most of our local exchange companies operate as incumbent carriers in the states in which they operate and are certified in those states to provide local telecommunications services. In addition, local governments often regulate the public rights-of-way necessary to install and operate networks, and may require service providers to obtain licenses or franchises regulating their use of public rights-of-way. Municipalities and other local government agencies also may regulate other limited aspects of our business, by requiring us to obtain cable franchises and construction permits and to abide by applicable building codes.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

Some states regulatory agencies have substantial oversight over incumbent telephone companies, and their interconnection with competitive providers and provision of non-discriminatory network access to certain network elements to them. Under the Federal Telecommunications Act of 1996, state regulatory commissions have jurisdiction to arbitrate and review interconnection disputes and agreements between incumbent telephone companies and competitive local exchange carriers, in accordance with rules set by the FCC. The FCC and state regulatory commissions also impose fees on providers of telecommunications services to support state universal service programs. Many of the states in which we operate require prior approvals or notifications for certain acquisitions and transfers of assets, customers, or ownership of regulated entities.

In addition, in some states we are subject to operating restrictions and minimum service quality standards (the failure to meet such restrictions may result in penalties). We also are required to report certain financial information. At the federal level and in a number of the states in which we operate, we are subject to price cap or incentive regulation plans under which prices for regulated services are capped. Some of these plans have limited terms and, as they expire, we may need to renegotiate with various states. These negotiations could impact rates, service quality and/or infrastructure requirements, which could also impact our earnings and capital expenditures. In other states in which we operate, we are subject to rate of return regulation that limits levels of earnings and returns on investments. Approximately 19% of our total access lines at December 31, 2016 are in state jurisdictions under the rate of return regulatory model. We will continue to advocate for no or reduced regulation with various regulatory agencies in those states. In some of our states, we have already been successful in reducing or eliminating price regulation on end-user services.

**Federal Regulatory Environment**

Frontier, along with all telecommunications providers, is subject to FCC rules governing privacy of specified customer information. Among other things, these rules obligate carriers to implement procedures to: protect specified customer information from inappropriate disclosure; obtain customer permission to use specified information in marketing; authenticate customers before disclosing account information; and annually certify compliance with the FCC's rules. Although most of these regulations are generally consistent with our business plans, they may restrict our flexibility in operating our business.

Some regulations are, or could in the future be, the subject of judicial proceedings, legislative hearings and administrative proposals or challenges that could change the manner in which the entire industry operates. Neither the outcome of any of these developments, nor their potential impact on us, can be predicted at this time. Regulation can change rapidly in the communications industry, and such changes may have an adverse effect on us.

The current status of material regulatory initiatives is as follows:

*Federal High-Cost Subsidies:* The FCC has adopted rules changing the eligibility requirements for federal subsidies offered to wireline carriers providing service to high-cost, low-density markets, as well as the amounts of such subsidies, as follows:

*Connect America Fund (CAF):* On November 18, 2011, the FCC adopted the Universal Service Fund (USF)/Intercarrier Compensation (ICC) Report and Order (the 2011 Order), which changed how federal subsidies are calculated and disbursed, and began the transition of Federal USF (Universal Service Fund), which supported voice services in high-cost areas, to the CAF, which supports broadband deployment in high-cost areas. Frontier received \$133 million from 2012 through 2014 across two rounds of CAF Phase I funding to make broadband available to approximately 194,600 previously unserved or underserved households. We completed deployment of broadband service to the first round of CAF Phase I households in 2015 as required by the FCC rules and will complete the second round of CAF Phase I build by the March 2017 deadline.

On April 29, 2015, the FCC released offers of support to price cap carriers under the CAF Phase II program. The intent of these offers is to provide long-term support for carriers for establishing and providing broadband service with at least 10 Mbps downstream/1 Mbps upstream speeds in high cost unserved or underserved areas. Frontier accepted the CAF Phase II offer in 29 states, including our CTF properties, which provides for \$332 million in annual support, through 2020 and a commitment to make broadband available to approximately 774,000 households. CAF Phase II support is a successor to the approximately \$156 million in annual USF frozen high cost support that Frontier had been receiving prior to the CTF acquisition, and the \$42 million in annual transitional USF frozen high cost support that Verizon had been receiving in California and Texas. In addition to the annual support levels, these amounts also include frozen support phasedown amounts in states where the annual CAF II funding is

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

less than the prior annual frozen high cost support funding. The frozen support phasedown support was \$35 million in 2015 and \$27 million in 2016, and is expected to be \$17 million in 2017 and \$6 million in 2018.

In 2017, the FCC is expected to adopt a competitive bidding process to continue to distribute CAF Phase II funding in those high-cost areas where price cap carriers declined the FCC's offer of support, possibly presenting a new support and deployment opportunity. The FCC's competitive bidding process has not yet been finalized, therefore, Frontier is unable to determine whether it will participate in any competitive bid process at this time.

*Intercarrier Compensation:* In the 2011 Order, the FCC also reformed Intercarrier Compensation, which is the payment framework that governs how carriers compensate each other for the exchange of interstate switched traffic, and began a multi-year transition to the new rates. The 2011 Order provided for the gradual elimination of terminating traffic charges by July 2017 with a related decline in operating expenses. Switched access revenue declined sequentially in the third quarter of 2016, reflecting the rate reductions mandated by the 2011 Order, and we anticipate that we have experienced nearly all of the rate decline related to the 2011 Order. Frontier has been able to recover a significant portion of those lost revenues through end user rates and other replacement support mechanisms, a trend we expect will continue through 2017 and beyond. There are no longer any active Intercarrier Compensation-related challenges to the 2011 Order, and we believe that the 2011 Order provides a stable regulatory framework to facilitate our ongoing focus on the deployment of broadband into our rural markets.

*Special Access:* The FCC also has an ongoing proceeding, which dates back to 2015, to consider whether to make changes to its regulatory regime governing special access services, including whether to mandate lower rates, change standards for deregulation and pricing flexibility, or to require changes to other terms and conditions. In connection with its inquiry into specifically identified special access tariff pricing plans discussed below, on April 28, 2016, the FCC released a Notice of Proposed Rulemaking on special access or "business data" services. It sought comment on proposed changes to the way the FCC regulates traditional special access services based on market competition, and on a proposal to adopt pricing rules for Ethernet services in markets that are found to be "noncompetitive." On October 7, 2016, the FCC released a Fact Sheet detailing former FCC Chairman Wheeler's proposal for addressing special access issues, though this proposal was never adopted. The composition of the FCC has since changed following the Presidential election, and as a result the proceeding remains open and the potential impact to Frontier of this proceeding is unknown.

On April 28, 2016, the FCC completed its inquiry into whether certain terms and conditions contained in specifically identified special access tariff pricing plans offered by four carriers, including Frontier, are just and reasonable. The FCC held that certain of the tariff terms for business data TDM services, specifically DS1s and DS3s, were unreasonable. Specifically, the FCC struck down "excessive" early termination fees and "all-or-nothing" provisions. Frontier has revised its tariffs in accordance with the FCC's Order. The FCC's decision has no retroactive effect, and there has been no material impact to Frontier from it. The FCC deferred the issue of how its ruling will affect customers currently purchasing services from these tariffs to the Notice of Proposed Rulemaking mentioned above.

*Intrastate Services:* Some state regulatory commissions regulate some of the rates ILECs charge for intrastate services, including rates for intrastate access services paid by providers of intrastate long distance services. Some states also have their own open proceedings to address reform to intrastate access charges and other intercarrier compensation and state universal service funds. Although the FCC has pre-empted state jurisdiction on most access charges, some states could consider moving forward with their proceedings. We cannot predict when or how these matters will be decided or the effect on our subsidy or switched access revenues.

*Voice Over Internet Protocol (VoIP):* Regulators at both the federal and state levels continue to address whether VoIP services are subject to the same or different regulatory and intercarrier compensation regimes as traditional voice telephony. The FCC has concluded that VoIP and facilities-based broadband Internet access providers must comply with the Communications Assistance for Law Enforcement Act, a decision that the United States Court of Appeals for the District of Columbia Circuit has upheld. The FCC has also required VoIP providers to provide enhanced 911 emergency calling capabilities. In the 2011 Order, the FCC determined that VoIP-originated traffic terminating on the Public Switched Telephone Network is subject to interstate access rates. Effective December 29, 2011, the 2011 Order required providers to pay interstate access rates for the termination of VoIP toll traffic. On April 25, 2012, the FCC, in an Order on Reconsideration, specified that changes to originating access rates for VoIP traffic would not be implemented until July 2014. The 2011 Order was challenged in court, and the FCC was petitioned to reconsider various aspects. While most challenges have been resolved, on November 18, 2016, the U.S. Court of Appeals for the D.C. Circuit remanded to the FCC AT&T's challenge regarding the ability of competitive carriers to assess VoIP access charges. The net impact of the 2011 Order during the period from July

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

2012 through December 2014 was not significant for Frontier. The net effect of 2011 Order changes to originating access after July 1, 2014 is dependent upon the percentage of VoIP traffic.

Additionally, the 2011 Order requires VoIP providers to pay interstate terminating interconnection charges and requires all carriers terminating traffic to provide appropriate call information, thus prohibiting so-called "phantom traffic." However, the FCC declined to address other VoIP-related issues, and the FCC has stated its intent to address open questions regarding the treatment of VoIP services in its ongoing "IP-Enabled Services Proceeding." Internet telephony may have an advantage in the marketplace over our traditional services if this service remains less regulated.

*Current and potential Internet regulatory obligations:* On June 14, 2016, the United States Court of Appeals for the D.C. Circuit upheld the FCC's 2015 Order in which the FCC asserted jurisdiction over broadband service, utilizing its jurisdictional authority under Title II and Section 706 of the Communications Act of 1996, classified broadband service as a "telecommunications service". The FCC adopted rules to "preserve a Free and Open Internet" (i.e., net neutrality) that impose specific obligations for fixed and mobile providers of broadband Internet access services and specifically prohibit the following: blocking access to legal content, applications, services, or non-harmful devices; impairing or degrading lawful Internet traffic on the basis of content, applications, services, or non-harmful devices; favoring some lawful Internet traffic over other lawful traffic in exchange for consideration; and otherwise unreasonably harming consumers or edge providers. These obligations are largely consistent with the practices Frontier already had in place. The FCC also announced additional transparency requirements, which allow for a "safe harbor" disclosure framework, intended to provide consumers more information about a provider's network management practices, performance, speed, price, and data caps.

Several parties have asked the D.C. Circuit to reconsider its decision and, depending on the outcome, are likely to ask the Supreme Court to review the Order. Frontier continues to comply with the existing regulatory requirements, and it is unclear whether the pending appeal will have any impact on the regulatory structure.

In addition to the net neutrality rules, the FCC on October 27, 2016, relied on its newfound Title II authority to promulgate privacy rules for broadband providers. These rules govern how broadband providers can use sensitive customer information and the steps providers must take to protect that information. Petitions for reconsideration of these rules were due in January 2017, and whether these rules will remain in place is uncertain, particularly due to the change in administration.

**Video programming**

Federal, state and local governments extensively regulate the video services industry. Our FiOS and Vantage video services are subject to, among other things: subscriber privacy regulations; requirements that we carry a local broadcast station or obtain consent to carry a local or distant broadcast station; rules for franchise renewals and transfers; the manner in which program packages are marketed to subscribers; and program access requirements.

We provide video programming in some of our markets in California, Connecticut, Florida, Indiana, Minnesota, North Carolina, Oregon, South Carolina, Texas and Washington pursuant to franchises, permits and similar authorizations issued by state and local franchising authorities. Most franchises are subject to termination proceedings in the event of a material breach. In addition, most franchises require payment of a franchise fee as a requirement to the granting of authority.

Many franchises establish comprehensive facilities and service requirements, as well as specific customer service standards and monetary penalties for non-compliance. In many cases, franchises are terminable if the franchisee fails to comply with material provisions set forth in the franchise agreement governing system operations. We believe that we are in compliance and meeting all material standards and requirements. Franchises are generally granted for fixed terms of at least ten years and must be periodically renewed. Local franchising authorities may resist granting a renewal if either past performance or the prospective operating proposal is considered inadequate.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Environmental regulation**

The local exchange carrier subsidiaries we operate are subject to federal, state and local laws and regulations governing the use, storage, disposal of, and exposure to hazardous materials, the release of pollutants into the environment and the remediation of contamination. As an owner and former owner of property, we are subject to environmental laws that could impose liability for the entire cost of cleanup at contaminated sites, including sites formerly owned by us, regardless of fault or the lawfulness of the activity that resulted in contamination. We believe that our operations are in substantial compliance with applicable environmental laws and regulations.

**Segment information**

We currently operate in only one reportable segment.

**Financial Information about Foreign and Domestic Operations and Export Sales**

We have no foreign operations.

**General**

The dollar amount of our order backlog is not a significant consideration in our business and is not a meaningful metric for us. We have no material contracts or subcontracts that may be subject to renegotiation of profits or termination at the election of the federal government.

**Intellectual Property**

We believe that we have the trademarks, trade names and intellectual property licenses that are necessary for the operation of our business.

**Employees**

As of December 31, 2016, we had approximately 28,300 employees, as compared to approximately 19,200 employees as of December 31, 2015. During 2016, reduction in workforce activities resulted in the severance of approximately 1,950 employees of which approximately 450 employees remained as employees as of December 31, 2016. Approximately 17,900 of our total employees are represented by unions. The number of employees covered by a collective bargaining agreement that expired in 2016, but have been extended and are still effective for 2017, is approximately 600. The number of employees covered by collective bargaining agreements that expire in 2017 is approximately 3,800. We consider our relations with our employees to be good.

**Available Information**

We are subject to the informational requirements of the Securities Exchange Act of 1934 (the Exchange Act). Accordingly, we file periodic reports, proxy statements and other information with the Securities and Exchange Commission (SEC). These reports, proxy statements and other information may be obtained by visiting the Public Reference Room of the SEC at 100 F Street, NE, Washington, D.C. 20549 or by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains an Internet site ([www.sec.gov](http://www.sec.gov)) that contains reports, proxy and information statements and other information regarding Frontier and other issuers that file electronically.

We make available, free of charge on our website, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to these reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as practicable after we electronically file these documents with, or furnish them to, the SEC. These documents may be accessed through our website at [www.frontier.com](http://www.frontier.com) under "Investor Relations." The information posted or linked on our website is not part of this report. We also make our Annual Report available in printed form upon request at no charge.

We also make available on our website, as noted above, or in printed form upon request, free of charge, our Corporate Governance Guidelines, Code of Business Conduct and Ethics, Specific Code of Business Conduct and Ethics Provisions for Certain Officers, and the charters for the Audit, Compensation, and Nominating and Corporate Governance committees of the Board of Directors. Stockholders may request printed copies of these materials by writing to: 401 Merritt 7, Norwalk, Connecticut 06851 Attention: Corporate Secretary.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Forward-Looking Statements**

This Annual Report on Form 10-K contains "forward-looking statements," related to future, not past, events. Forward-looking statements address our expected future business and financial performance and financial condition, and contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," "see," "will," "would," or "target." Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, particular uncertainties that could cause our actual results to be materially different than those expressed in our forward-looking statements include:

- competition from cable, wireless and wireline carriers, satellite, and OTT companies, and the risk that we will not respond on a timely or profitable basis;
- our ability to successfully adjust to changes in the communications industry, including the effects of technological changes and competition on our capital expenditures, products and service offerings;
- our ability to implement successfully our organizational structure changes;
- risks related to the operation of properties acquired from Verizon, including our ability to retain or obtain customers in those markets, our ability to realize anticipated cost savings, and our ability to meet commitments made in connection with the acquisition;
- reductions in revenue from our voice customers that we cannot offset with increases in revenue from broadband and video subscribers and sales of other products and services;
- our ability to maintain relationships with customers, employees or suppliers;
- the impact of regulation and regulatory, investigative and legal proceedings and legal compliance risks;
- continued reductions in switched access revenues as a result of regulation, competition or technology substitutions;
- the effects of changes in the availability of federal and state universal service funding or other subsidies to us and our competitors;
- our ability to effectively manage service quality in our territories and meet mandated service quality metrics;
- our ability to successfully introduce new product offerings;
- the effects of changes in accounting policies or practices, including potential future impairment charges with respect to our intangible assets;
- our ability to effectively manage our operations, operating expenses, capital expenditures, debt service requirements and cash paid for income taxes and liquidity, which may affect payment of dividends on our common and preferred shares;
- the effects of changes in both general and local economic conditions on the markets that we serve;
- the effects of increased medical expenses and pension and postemployment expenses;
- the effects of changes in income tax rates, tax laws, regulations or rulings, or federal or state tax assessments;
- our ability to successfully renegotiate union contracts;
- changes in pension plan assumptions, interest rates, regulatory rules and/or the value of our pension plan assets, which could require us to make increased contributions to the pension plan in 2017 and beyond;
- adverse changes in the credit markets;

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

- adverse changes in the ratings given to our debt securities by nationally accredited ratings organizations;
- the availability and cost of financing in the credit markets;
- covenants in our indentures and credit agreements that may limit our operational and financial flexibility;
- the effects of state regulatory cash management practices that could limit our ability to transfer cash among our subsidiaries or dividend funds up to the parent company;
- the effects of severe weather events or other natural or man-made disasters, which may increase our operating expenses or adversely impact customer revenue; and
- the impact of potential information technology or data security breaches or other disruptions.

Any of the foregoing events, or other events, could cause our results to vary from management's forward-looking statements included in this report. You should consider these important factors, as well as the risks set forth under Item 1A, "Risk Factors," in evaluating any statement in this report or otherwise made by us or on our behalf. We have no obligation to update or revise these forward-looking statements and do not undertake to do so.

Investors should also be aware that while we do, at various times, communicate with securities analysts, it is against our policy to disclose to them selectively any material non-public information or other confidential information. Accordingly, investors should not assume that we agree with any statement or report issued by an analyst, irrespective of the content of the statement or report. To the extent that reports issued by securities analysts contain any projections, forecasts or opinions, such reports are not our responsibility.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Item 1A. Risk Factors**

Before you make an investment decision with respect to any of our securities, you should carefully consider all the information we have included in this Annual Report on Form 10-K and our subsequent periodic filings with the SEC. In particular, you should carefully consider the risk factors described below and the risks and uncertainties related to "Forward-Looking Statements," any of which could materially adversely affect our business, operating results, financial condition and the actual outcome of matters as to which forward-looking statements are made in this annual report. The risks and uncertainties described below are not the only ones facing Frontier. Additional risks and uncertainties that are not presently known to us or that we currently deem immaterial or that are not specific to us, such as general economic conditions, may also adversely affect our business and operations. The following risk factors should be read in conjunction with the balance of this annual report, including the consolidated financial statements and related notes included in this report.

**Risks Related to Our Business**

***We will likely face further reductions in voice customers, switched access minutes of use, long distance revenues and subsidy revenues.***

We have experienced declining voice customers, switched access minutes of use and related revenues, long distance revenues, federal and state subsidies and related revenues because of economic conditions, increasing competition, changing technology and consumer behavior (such as wireless displacement of wireline use, e-mail use, instant messaging and increasing use of VoIP), technology and regulatory constraints, and financial decisions by governmental authorities. We will likely continue to experience further reductions in the future. These factors, among others, are likely to cause our local network service, switched network access, long distance and subsidy revenues to continue to decline, and these factors may cause our cash generated by operations to decrease.

***We face intense competition.***

The communications industry is extremely competitive. Through mergers and various service expansion strategies, service providers are striving to provide integrated solutions both within and across geographic markets. Our competitors include competitive local exchange carriers, internet service providers, wireless companies, OTT, VoIP providers and cable companies, some of which may be subject to less regulation than we are; these entities may provide services competitive with the services that we offer or intend to introduce. We also believe that wireless and cable telephony providers have increased their penetration of various services in our markets. We expect that competition will remain robust. Our revenue and cash flow will be adversely impacted if we cannot reverse our customer losses or continue to provide high-quality services.

We cannot predict which of the many possible future technologies, products or services will be important in order to maintain our competitive position or what expenditures will be required to develop and provide these technologies, products or services. Our ability to compete successfully will depend on the effectiveness of capital expenditure investments in our properties, our marketing efforts, our ability to anticipate and respond to various competitive factors affecting the industry, including a changing regulatory environment that may affect our business and that of our competitors differently, new services that may be introduced, changes in consumer preferences, demographic trends, economic conditions and pricing strategies by competitors. Increasing competition may reduce our revenues and increase our marketing and other costs as well as require us to increase our capital expenditures and thereby decrease our cash flows.

***Some of our competitors have superior resources, which may place us at a cost and price disadvantage.***

Some of our competitors have market presence, engineering, technical, marketing and financial capabilities, substantially greater than ours. In addition, some of these competitors are able to raise capital at a lower cost than we are able to. Consequently, some of these competitors may be able to develop and expand their communications and network infrastructures more quickly, adapt more swiftly to new or emerging technologies and changes in customer requirements, take advantage of acquisition and other opportunities more readily and devote greater resources to the marketing and sale of their products and services than we will be able to. Additionally, the greater brand name recognition of some competitors may require us to price our services at lower levels in order to retain or

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

obtain customers. Finally, the cost advantages and greater financial resources of some of these competitors may give them the ability to reduce their prices for an extended period of time if they so choose. Our business and results of operations may be materially adversely impacted if we are not able to effectively compete.

***We may be unable to stabilize or grow our revenues and cash flows despite the initiatives we have implemented.***

We must produce adequate revenues and cash flows that, when combined with cash on hand and funds available under our revolving credit facility and other financings, will be sufficient to service our debt, fund our capital expenditures, pay our taxes, fund our pension and other employee benefit obligations and pay dividends pursuant to our dividend policy. We have experienced revenue declines in 2016 and 2015 as compared to prior years for our Frontier legacy operations, and our recently acquired operations have also experienced revenue declines. While we have identified potential areas of opportunity and implemented several revenue and cost initiatives, we cannot assure you that these efforts will be successful or that these initiatives will improve our financial position or our results of operations.

***Weak economic conditions may decrease demand for our services or necessitate increased discounts.***

We could be adversely impacted by weak economic conditions or their effects. Downturns in the economy and competition in our markets could cause some of our customers to reduce or eliminate their purchases of our basic and enhanced voice services, broadband and video services and make it difficult for us to obtain new customers or retain existing customers. In addition, if economic conditions are depressed or further deteriorate, our customers may delay or discontinue payment for our services or seek more competitive pricing from other service providers, or we may be required to offer increased discounts in order to retain our customers, which could have a material adverse effect on our business or results of operations.

***Disruption in our networks, infrastructure and information technology may cause us to lose customers and/or incur additional expenses.***

To attract and retain customers, we must provide reliable service. Some of the risks to our networks, infrastructure and information technology include physical damage, security breaches, capacity limitations, power surges or outages, software defects and other disruptions beyond our control, such as natural disasters and acts of terrorism. From time to time in the ordinary course of business, we experience short disruptions in our service due to factors such as cable damage, theft of our equipment, inclement weather and service failures of our third-party service providers. We could experience more significant disruptions in the future. We could also face disruptions due to capacity limitations if changes in our customers' usage patterns for our broadband services result in a significant increase in capacity utilization, such as through increased usage of video or peer-to-peer file sharing applications. Disruptions may cause interruptions in service or reduced capacity for customers, either of which could cause us to lose customers and/or incur additional expenses, and thereby adversely affect our business, revenues and cash flows.

***Our business is sensitive to the creditworthiness of our wholesale customers.***

We have substantial business relationships with other communications carriers for which we provide service. While bankruptcies of these carriers have not had a material adverse effect on our business in recent years, future bankruptcies in the industry could result in the loss of significant customers, as well as cause more price competition and an increased allowance for doubtful accounts receivable. Such bankruptcies may be more likely in the future if economic conditions stagnate. As a result, our revenues and results of operations could be materially and adversely affected.

***A significant portion of our workforce is represented by labor unions.***

As of December 31, 2016, we had approximately 28,300 employees. Approximately 17,900 of our total employees were represented by unions and were subject to collective bargaining agreements. As of December 31, 2016, we had approximately 600 employees covered by a collective bargaining agreement that expired in 2016, but have been extended and are still effective for 2017. Of the union-represented employees as of December 31, 2016, approximately 3,800, or 21%, of the unionized workforce are covered by collective agreements that expire in 2017 and approximately 3,500, or 20%, of the unionized workforce are covered by collective bargaining agreements that expire in 2018.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

We cannot predict the outcome of negotiations of the collective bargaining agreements covering our employees. If we are unable to reach new agreements or renew existing agreements, employees subject to collective bargaining agreements may engage in strikes, work slowdowns or other labor actions, which could materially disrupt our ability to provide services. New labor agreements or the renewal of existing agreements may impose significant new costs on us, which could adversely affect our financial condition and results of operations in the future.

***If we are unable to hire or retain key personnel, we may be unable to operate our business successfully.***

Our success will depend in part upon the continued services of our management. We cannot guarantee that our key personnel will not leave or compete with us. The loss, incapacity or unavailability for any reason of key members of our management team could have a material impact on our business. In addition, our financial results and our ability to compete will suffer if we are unable to attract, integrate or retain other qualified personnel in the future.

***We may be unable to realize the anticipated benefits of recent acquisitions.***

In recent years, we have completed multiple acquisitions. We cannot assure you that we will be able to realize the full benefit of any anticipated growth opportunities or cost synergies from such acquisitions or that these benefits will be realized within the expected time frames.

***We may complete a future significant strategic transaction that may not achieve intended results or could increase the number of our outstanding shares or amount of outstanding debt.***

We continuously evaluate and may in the future enter into additional strategic transactions. Any such transaction could happen at any time, could be material to our business and could take any number of forms, including, for example, an acquisition, merger or a sale of certain of our assets.

Evaluating potential transactions and integrating completed ones may divert the attention of our management from ordinary operating matters. The success of these potential transactions will depend, in part, on our ability to realize the anticipated growth opportunities and cost synergies through the successful integration of the businesses we acquire with our existing business. Even if we are successful in integrating acquired businesses, we cannot assure you that these integrations will result in the realization of the full benefit of any anticipated growth opportunities or cost synergies or that these benefits will be realized within the expected time frames. In addition, acquired businesses may have unanticipated liabilities or contingencies.

If we complete an acquisition, investment or other strategic transaction, we may require additional financing that could result in an increase in the number of our outstanding shares of stock or the aggregate amount and/or cost of our debt, which may result in an adverse impact to our ratings. The number of shares of our stock or the aggregate principal amount of our debt that we may issue may be significant. Moreover, the terms of any debt financing may be expensive or adversely impact our results of operations.

***Negotiations with the providers of content for our video systems may not be successful, potentially resulting in our inability to carry certain programming channels on our FiOS and Vantage video systems, which could result in the loss of subscribers. Alternatively, because of the power of some content providers, we may be forced to pay an increasing amount for some content, resulting in higher expenses and lower profitability.***

We must negotiate with the content owners of the programming that we carry on our multichannel video systems (marketed as FiOS video and Vantage video). These content owners are the exclusive provider of the channels they offer. If we are unable to reach a mutually-agreed contract with a content owner, including pricing and carriage provisions, our existing agreements to carry this content may not be renewed, resulting in the blackout of these channels. The loss of content could result in our loss of customers who place a high value on the particular content that is lost. In addition, many content providers own multiple channels. As a result, we typically have to negotiate the pricing for multiple channels rather than one, and carry and pay for content that customers do not much value, in order to have access to other content that customers value quite highly. Some of our competitors have materially larger scale than we do, and may, as a result, be better positioned than we are in such

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

negotiations. As a result of these factors, the expense of content acquisition may continue to increase, and this could result in higher expenses and lower profitability.

**Risks Related to Liquidity, Financial Resources and Capitalization**

***We expect to make contributions to our pension plan in future years, the amount of which will be impacted by volatility in asset values related to Frontier's pension plan and/or changes in pension plan assumptions.***

Frontier made contributions of \$28 million and \$62 million to its pension plan in 2016 and 2015, respectively, and we expect to continue to make contributions in future years. Volatility in our asset values, liability calculations, or returns may impact the costs of maintaining our pension plan and our future funding requirements. Any future material contribution could have a negative impact on our liquidity by reducing cash flows.

***We currently have a significant amount of indebtedness, including secured indebtedness, and are able to incur substantial additional indebtedness and grant substantial additional liens in the future. Such debt and debt service obligations may adversely affect us.***

We have a significant amount of indebtedness, which amounted to \$18.2 billion outstanding at December 31, 2016, of which \$2.3 billion was secured. We also have access to a \$750 million secured Revolving Credit Facility, which currently is undrawn.

The terms of our indentures and credit facilities allow us to incur substantial additional indebtedness and grant substantial additional liens in the future. In addition, these terms do not prevent us or our restricted subsidiaries from incurring various types of obligations that do not constitute "indebtedness" under these terms.

If we incur any additional indebtedness that ranks equally with our senior notes and debentures, the holders of that new debt will be entitled to share ratably with holders of our senior notes and debentures in any proceeds distributed in connection with any insolvency, liquidation, reorganization, dissolution or other winding up of Frontier. If any such additional indebtedness is secured, it will be effectively senior to our unsecured senior notes and debentures to the extent of the collateral securing such indebtedness. This may have the effect of reducing the probability of payment, or the amount of proceeds paid, to holders of our senior notes and debentures.

In addition, to the extent other new debt is added to our and our subsidiaries' current debt levels, the substantial leverage risks described below would increase.

The potential significant negative consequences on our financial condition and results of operations that could result from our substantial debt include:

- limitations on our ability to obtain additional debt or equity financing on favorable terms or at all;
- instances in which we are unable to comply with the covenants contained in our indentures and credit agreements or to generate cash sufficient to make required debt payments, which circumstances have the potential of accelerating the maturity of some or all of our outstanding indebtedness;
- the allocation of a substantial portion of our cash flow from operations to service our debt, thus reducing the amount of our cash flows available for other purposes, including capital expenditures and dividends that would otherwise improve our competitive position, results of operations or stock price;
- requiring us to issue debt or equity securities or to sell some of our core assets, possibly on unfavorable terms, to meet payment obligations;
- compromising our flexibility to plan for, or react to, competitive challenges in our business and the telecommunications industry; and
- the possibility of our being put at a competitive disadvantage with competitors who, relative to their size, do not have as much debt as we do, and competitors who may be in a more favorable position to access additional capital resources.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

In addition, our senior notes and debentures are rated below "investment grade" by independent rating agencies. This can result in higher borrowing costs for us. We cannot assure you that these rating agencies will not lower our current debt ratings, if in the rating agencies' judgment such an action is appropriate. A lowering of a rating may further increase our future borrowing costs and reduce our access to capital.

***The indentures and agreements governing our debt, including our senior notes and debentures and our credit facilities, contain covenants that impose restrictions on us and certain of our subsidiaries that may affect our ability to operate our business, make payments on our debt, and pay dividends.***

The indentures and agreements governing our existing indebtedness contain covenants that, among other things, limit our ability and the ability of certain of our subsidiaries to:

- incur additional indebtedness, guarantee indebtedness or issue preferred stock;
- create liens;
- enter into mergers or consolidations, or transfer or sell all or substantially all of our assets;
- pay dividends on, or make distributions in respect of, or redeem or repurchase, capital stock, make certain investments or make other restricted payments;
- make certain asset sales;
- enter into agreements that might prevent certain of our subsidiaries from making distributions, loans or advances to us or other subsidiaries; and
- engage in transactions with affiliates.

In addition, our credit facilities require us to comply with additional covenants, including financial ratios. Any future indebtedness may also require us to comply with similar or other covenants. These restrictions on our ability to operate our business could seriously harm our business by, among other things, limiting our ability to take advantage of financings, mergers, acquisitions and other corporate opportunities.

Various risks, uncertainties and events beyond our control could affect our ability to comply with these covenants. Failure to comply with any of the covenants in our existing or future financing indentures and agreements could result in a default under those documents and under other agreements containing cross-default provisions. A default would permit lenders to accelerate the maturity of the debt and to foreclose upon any collateral securing the debt. Under these circumstances, we might not have sufficient funds or other resources to satisfy all of our obligations. In addition, the limitations imposed by indentures and credit agreements on our ability to incur additional debt and to take other actions might significantly impair our ability to obtain other financing.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

***Frontier is primarily a holding company and, as a result, we rely on the receipt of funds from our subsidiaries in order to meet our cash needs and service our indebtedness, including our senior notes and debentures.***

Frontier is primarily a holding company and its principal assets consist of the shares of capital stock or other equity instruments of its subsidiaries. As a holding company, we depend on dividends, distributions and other payments from our subsidiaries to fund our obligations, including those arising under our senior notes and debentures, and meet our cash needs. We cannot assure you that the operating results of our subsidiaries at any given time will be sufficient to make dividends, distributions or other payments to us in order to allow us to make payments on our indebtedness, including our senior notes and debentures. In addition, the payment of these dividends, distributions and other payments, as well as other transfers of assets, between our subsidiaries and from our subsidiaries to us may be subject to legal, regulatory or contractual restrictions. Some state regulators have imposed and others may consider imposing on regulated companies, including us, cash management practices that could limit the ability of such regulated companies to transfer cash between subsidiaries or to the parent company. While none of the existing state regulations materially affects our cash management, any changes to the existing regulations or imposition of new regulations or restrictions may materially adversely affect our ability to transfer cash within our consolidated companies.

***Our senior notes and debentures are structurally subordinated to liabilities of our subsidiaries.***

Our subsidiaries have not guaranteed our senior notes and debentures. As a result, holders of such securities will not have any claim as a creditor against our subsidiaries. Accordingly, all obligations of our subsidiaries (including any liens granted by our subsidiaries on any of their assets to secure any of our obligations) will have to be satisfied before any of the assets of such subsidiaries would be available for distribution, upon a liquidation or otherwise. Although the indentures governing our senior notes and debentures, and our credit agreements, limit the indebtedness our subsidiaries may incur, our subsidiaries are able to incur a substantial amount of additional debt. Additionally, although the indentures and credit agreements limit the liens that may be granted on the assets of our subsidiaries, our subsidiaries are able to grant liens to secure a substantial amount of liabilities, including, without limitation, certain indebtedness under our credit facilities.

***Our senior notes and debentures are unsecured and subordinated to any secured indebtedness.***

Our senior notes and debentures are unsecured and therefore are subordinated to our existing and future secured indebtedness, to the extent of the value of the assets securing such indebtedness. At December 31, 2016, our secured indebtedness consisted of obligations under the 2015 Credit Agreement, the CoBank Credit Agreements, the Revolving Credit Agreement and the Continuing Agreement for Standby Letters of Credit dated February 4, 2008 between Frontier and Deutsche Bank AG New York Branch, each of which is secured equally and ratably by a pledge of all of the outstanding shares of capital stock of Frontier North Inc., a wholly-owned subsidiary. In the event of a bankruptcy or similar proceeding, the assets that serve as collateral for our secured indebtedness will be available to satisfy the obligations under the secured indebtedness before any payments are made on the senior notes and debentures from the proceeds of such assets. The indentures governing our senior notes and debentures permit us, subject to specified limitations, to incur a substantial amount of additional secured debt.

***If the senior notes issued in September 2015 are rated investment grade by at least two of Moody's, S&P or Fitch, many of the covenants will not apply and the holders of the notes will lose the protection of the covenants.***

Each of the supplemental indentures governing our senior notes issued in September 2015 contain certain covenants that will be suspended during any period in which such series of notes are rated investment grade by at least two of Moody's, S&P or Fitch and no default or event of default has occurred and is continuing. Such covenants limit, among other things, our ability to pay distributions, incur debt and enter into certain other transactions. There can be no assurance that any series of notes will ever be rated investment grade, or that if they are rated investment grade, that the series of notes will maintain these ratings. To the extent the covenants are subsequently reinstated, any such actions taken while the covenants were suspended would not result in an event of default under the supplemental indentures governing the applicable series of notes.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

***Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase.***

At December 31, 2016, approximately 12% of our total debt is subject to variable rates of interest. Borrowings under our credit facilities are at variable rates of interest and expose us to interest rate risk. If interest rates were to increase, our debt service obligations on the variable rate indebtedness would increase even though the amount borrowed remained the same, and our net income and cash flows, including cash available for servicing our indebtedness, would correspondingly decrease. In the future, we may enter into interest rate swaps that involve the exchange of floating for fixed rate interest payments in order to reduce interest rate volatility. However, we might not maintain interest rate swaps with respect to all of our variable rate indebtedness, and any swaps we enter into might not fully mitigate our interest rate risk.

***We may not have sufficient funds to repurchase our senior notes upon a change of control triggering event.***

The terms of our senior notes require us to make an offer to repurchase the notes upon the occurrence of a Change of Control and Ratings Decline (as defined in the indentures governing the notes) at a purchase price equal to 101% of the respective principal amounts of the notes plus accrued and unpaid interest to, but not including, the date of the purchase. It is possible that we would not have sufficient funds at the time of such a change of control triggering event to make the required repurchase of the applicable series of notes and would be required to obtain third party financing to do so. We may not be able to obtain this financing on commercially reasonable terms, or on terms acceptable to us, or at all. In addition, the occurrence of certain change of control events may constitute an event of default under the terms of our credit facilities. Such an event of default would entitle the lenders under our credit facilities to, among other things, cause all outstanding debt thereunder to become due and payable.

***We cannot assure that we will be able to continue paying dividends.***

The amount and timing of future dividend payments is subject to applicable law and will be made at the discretion of our Board of Directors based on factors such as cash flow and cash requirements, capital expenditure requirements, financial condition and other factors.

***Our ability to declare and pay dividends on the Series A Preferred Stock may be limited.***

Our declaration and payment of dividends on the Series A Preferred Stock in the future will be determined by our Board of Directors in its sole discretion and will depend on business conditions, our financial condition, earnings and liquidity and other factors. Our ability to declare and pay dividends and make other distributions with respect to our capital stock, including the Series A Preferred Stock, is restricted by the terms of certain of our existing financing arrangements and may be restricted by the terms of financing arrangements that we enter into in the future. In the event that the agreements governing any such indebtedness restrict our ability to declare and pay dividends in cash on the shares of Series A Preferred Stock, we may be unable to declare and pay dividends in cash on the shares of Series A Preferred Stock unless we can repay or refinance the amounts outstanding under such agreements.

In addition, under Delaware law, our Board of Directors may only declare and pay dividends on shares of our capital stock out of our statutory "surplus" (which is the amount equal to total assets minus total liabilities, in each case at fair market value, minus statutory capital), or if there is no such surplus, out of our net profits for the then current and/or immediately preceding fiscal year. Further, even if we are permitted under our contractual obligations and Delaware law to declare and pay cash dividends on the shares of Series A Preferred Stock, we may not have sufficient cash to do so through the mandatory conversion date of June 29, 2018.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

***We have a significant amount of goodwill and other intangible assets on our balance sheet. If our goodwill or other intangible assets become impaired, we may be required to record a non-cash charge to earnings and reduce our stockholders' equity.***

Under generally accepted accounting principles, intangible assets are reviewed for impairment on an annual basis or more frequently whenever events or circumstances indicate that their carrying value may not be recoverable. Frontier monitors relevant circumstances, including general economic conditions, enterprise value EBITDA multiples for other providers of communications services, our overall financial performance, and the market prices for our stock, and the potential impact that changes in such circumstances might have on the valuation of Frontier's goodwill or other intangible assets. If our goodwill or other intangible assets are determined to be impaired in the future, we may be required to record a non-cash charge to earnings during the period in which the impairment is determined, which would reduce our stockholders' equity.

**Risks Related to Regulation*****Changes in federal or state regulations may reduce the switched access charge revenues we receive.***

A portion of Frontier's total revenues (\$170 million, or 2%, in 2016 and \$177 million, or 3%, in 2015) are derived from switched access charges paid by other carriers for services we provide in originating and terminating intrastate and interstate long distance traffic. Frontier expects a portion of our revenues will continue to be derived from switched access charges paid by these carriers for these services. The amount of switched access charge revenues that Frontier will receive for these services is regulated by the FCC and state regulatory agencies and the rate Frontier can charge for terminating switched access is expected to decline in 2017.

In 2011, the FCC adopted the 2011 Order regarding Intercarrier Compensation, which is the payment framework that governs how carriers compensate each other for the exchange of interstate traffic. The 2011 Order began a multi-year transition that moves the rate for terminating traffic to near zero by 2017. Frontier is permitted to recover a significant portion of those revenues through end user rates and other replacement support mechanisms. Additionally, the 2011 Order requires VoIP providers to pay interstate terminating interconnection charges and requires all carriers terminating traffic to provide appropriate call information, thus prohibiting so-called "phantom traffic." The reform of the Universal Service Fund shifts the existing High-Cost portion of the fund from supporting voice services to supporting broadband deployment in high-cost areas. The 2011 Order preempts the states with regard to the regulation of intrastate terminating access rates. The 2011 Order has been challenged in court and the FCC was petitioned to reconsider various aspects of it. The only issue that remains active on appeal is the ability of competitive carriers to assess VoIP access charges.

The FCC also has an ongoing proceeding considering whether to make changes to its regulatory regime governing special access services. When and how these proposed changes will be addressed is unknown and, accordingly, we cannot predict the impact of future changes on our results of operations.

Certain states also have their own open proceedings to address reform to intrastate access charges and other intercarrier compensation and state universal service funds. Although the FCC has pre-empted state jurisdiction on most access charges, many states could consider moving forward with their proceedings. We cannot predict when or how these matters will be decided or the effect on our subsidy or switched access revenues. However, future reductions in our subsidy or switched access revenues may directly affect our profitability and cash flows as those regulatory revenues do not have an equal level of associated variable expenses.

***We are reliant on support funds provided under federal and state laws.***

A portion of Frontier's total revenues (\$626 million, or 7%, in 2016 and \$500 million, or 9%, in 2015) are derived from federal and state subsidies for rural and high-cost support, commonly referred to as USF. The FCC's 2011 Order changed how federal subsidies are calculated and disbursed, with these changes being phased-in beginning in July 2012. These changes transition the USF, which supports voice services in high-cost areas, to the CAF, which supports broadband deployment in high-cost areas.

Future reductions in these subsidies, or in our ability to recover such fees, could have a material adverse effect on our business or results of operations.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

***Frontier and our industry will likely remain highly regulated, and we could incur substantial compliance costs that could constrain our ability to compete in our target markets.***

As an incumbent local exchange carrier, some of the services we offer are subject to significant regulation from federal, state and local authorities. This regulation could impact our ability to change our rates, especially on our basic voice services and our access rates, and could impose substantial compliance costs on us. Regulation could constrain our ability to compete and, in some jurisdictions, may restrict our ability to expand our service offerings. In addition, changes to the regulations that govern our business (including any implementation of the 2011 Order or the 2015 Order) may have an adverse effect on our business by reducing the allowable fees that we may charge, imposing additional compliance costs, reducing the amount of subsidies or otherwise changing the nature of our operations and the competition in our industry. At this time it is unknown how these regulations will affect Frontier's operations or ability to compete in the future. This and other FCC rulemakings and state regulatory proceedings, including those relating to intercarrier compensation, universal service and broadband services, could have a substantial adverse impact on our operations.

In addition, on June 14, 2016, the U.S. Court of Appeals for the D.C. Circuit upheld the FCC's February 26, 2015 order that changed the regulatory classification of broadband service from an "information service" to a "telecommunications service". In the Order, the FCC adopted specific obligations for fixed-mobile providers of broadband Internet access services and specifically prohibited the following: blocking access to legal content, applications, services, or non-harmful devices; impairing or degrading lawful Internet traffic on the basis of content, applications, services, or non-harmful devices; favoring some lawful Internet traffic over other lawful Internet traffic in exchange for consideration; and otherwise unreasonably harming consumers or edge providers, and announced additional transparency requirements intended to provide consumers more information about a providers network management practices, performance, speed and data caps.

Our Internet access offerings could become subject to additional laws and regulations as they are adopted or applied to the Internet. As the significance of the Internet expands, federal, state and local governments may pass laws and adopt rules and regulations, or apply existing laws and regulations to the Internet (including Internet access services), and related matters are under consideration in both federal and state legislative and regulatory bodies. We cannot predict whether the outcome of pending challenges to the FCC's order or future proceedings will prove beneficial or detrimental to our competitive position.

**Risks Related to Technology**

***We may be unable to meet the technological needs or expectations of our customers, and may lose customers as a result.***

The telecommunications industry is subject to significant changes in technology, and replacing or upgrading our infrastructure to keep pace with such technological changes could result in significant capital expenditures. If we do not replace or upgrade technology and equipment as necessary, we may be unable to compete effectively because we will not be able to meet the needs or expectations of our customers.

In addition, enhancements to product offerings and the management of broadband speed and capacity issues may influence our customers to consider other service providers, such as cable operators or wireless providers. We may be unable to attract new or retain existing customers from cable companies due to their deployment of enhanced broadband and VoIP technology. In addition, new capacity services for wireless broadband technologies may permit our competitors to offer broadband data services to our customers throughout most or all of our service areas. Any resulting inability to attract new or retain existing customers could adversely impact our business and results of operations in a material manner.

***Our services could be adversely affected and we may be subject to increased costs and claims in connection with Internet and systems security and malicious practices.***

We use encryption and authentication technology licensed from third parties to provide secure transmission of confidential information, including our business data and customer information. We also rely on employees in our network operations centers, data centers, call centers and retail stores to follow our procedures when handling such information. Any unauthorized access, computer viruses, accidental or intentional release of confidential information or other disruptions could result in increased costs, customer dissatisfaction leading to loss of customers and revenues, and fines and other liabilities.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

In addition, Frontier or Frontier's customers using our network to access the Internet may become victim to malicious and abusive Internet activities, including unsolicited mass advertising ("spam"), peer-to-peer file sharing, distribution of viruses, worms and other destructive or disruptive software. These activities could adversely affect our network, result in excessive call volume at our call centers and damage our or our customers' equipment and data.

Frontier maintains security measures, disaster recovery plans and business continuity plans for its business. However, Frontier's information technology networks and infrastructure may nonetheless be vulnerable to damage, disruptions or shutdowns due to attack by hackers or breaches, employee error or malfeasance, power outages, computer viruses, telecommunication or utility failures, systems failures, natural disasters or other catastrophic events. Any such events could result in legal claims or proceedings, liability or penalties, disruption in operations, misappropriation of sensitive data, damage to Frontier's reputation and costly response measures, which could adversely affect Frontier's business. There can be no assurance that such disruptions or misappropriations and the resulting repercussions will not be material to our results of operations, financial condition or cash flows.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

We own property, which consists primarily of land and buildings, office and warehouse facilities, central office equipment, software, outside plant and related equipment. Outside communications plant includes aerial and underground cable, conduit, poles and wires. Central office equipment includes digital switches and peripheral equipment. As such, our properties do not provide a basis for description by character or location of principal units. All of our property is considered to be in good working condition and suitable for its intended purpose.

Our gross investment in property, by category, as of December 31, 2016, was as follows:

*(\$ in millions)*

Land	\$	235
Buildings and leasehold improvements		2,300
General support		1,495
Central office/electronic circuit equipment		7,683
Poles		995
Cable, fiber and wire		10,267
Conduit		1,611
Other		52
Construction work in progress		903
Total	\$	<u>25,541</u>

**Item 3. Legal Proceedings**

See Note 19 of the Notes to Consolidated Financial Statements included in Part IV of this report.

We are party to various legal proceedings (including individual, class and putative class actions) arising in the normal course of our business covering a wide range of matters and types of claims including, but not limited to, general contracts, billing disputes, rights of access, taxes and surcharges, consumer protection, trademark and patent infringement, employment, regulatory, tort, claims of competitors and disputes with other carriers. Litigation is subject to uncertainty and the outcome of individual matters is not predictable. However, we believe that the ultimate resolution of all such matters, after considering insurance coverage or other indemnities to which we are entitled, will not have a material adverse effect on our financial position, results of operations, or cash flows.

**Item 4. Mine Safety Disclosures**

Not applicable.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## PART II

**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock is currently traded on the NASDAQ Global Select Market under the symbol FTR. The amount and timing of dividends payable on our common stock are within the sole discretion of our Board of Directors. On December 11, 2014, our Board of Directors approved a 5% increase over the 2014 dividend rate in the planned quarterly cash dividend rate, commencing with the dividend for the first quarter of 2015. Dividends on shares of the Series A Preferred Stock are payable on a cumulative basis when, as and if declared by our Board of Directors (or an authorized committee thereof) at an annual rate of 11.125% on the liquidation preference of \$100.00 per share, on the last business day of March, June, September and December of each year, up to the mandatory conversion date of June 29, 2018. Series A Preferred Stock dividends of \$214 million and \$120 million were paid in 2016 and 2015, respectively. Cash dividends paid to common shareholders were \$493 million and \$456 million in 2016 and 2015, respectively. The declaration and payment of future dividends on our common stock is at the discretion of our Board of Directors, and will depend upon many factors, including our financial condition, results of operations, growth prospects, funding requirements, payment of cumulative dividends on Series A Preferred Stock, applicable law, restrictions in agreements governing our indebtedness and other factors our Board of Directors deem relevant.

A portion of the dividends on common stock is classified as total ordinary dividends and represents qualified dividends, and a portion of the dividends is classified as non-dividend distributions and represents a return of capital. For the year ended December 31, 2016, all dividends on common stock were classified as non-dividend distributions and represented a return of capital.

The following table indicates the high and low intra-day sales prices per share of common stock, as reported by the NASDAQ Global Select Market, and sets forth dividends paid per share of common stock during the periods indicated.

	2016			2015		
	High	Low	Dividend	High	Low	Dividend
First Quarter	\$ 5.85	\$ 3.81	\$ 0.105	\$ 8.46	\$ 6.36	\$ 0.105
Second Quarter	\$ 5.75	\$ 4.57	\$ 0.105	\$ 7.50	\$ 4.86	\$ 0.105
Third Quarter	\$ 5.22	\$ 4.07	\$ 0.105	\$ 5.64	\$ 4.19	\$ 0.105
Fourth Quarter	\$ 4.36	\$ 3.10	\$ 0.105	\$ 5.47	\$ 4.44	\$ 0.105

As of February 10, 2017, the approximate number of security holders of record of our common stock was 419,910. This information was obtained from our transfer agent, Computershare Inc.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

STOCKHOLDER RETURN PERFORMANCE GRAPH

The following performance graph compares the cumulative total return of our common stock to the S&P 500 Stock Index and to the S&P Telecommunication Services Index for the five-year period commencing December 31, 2011.

The graph assumes that \$100 was invested on December 31, 2011 in each of our common stock, the S&P 500 Stock Index and the S&P Telecommunication Services Index and that all dividends were reinvested.

Company / Index	Base Period	INDEXED RETURNS				
		12/11	12/12	12/13	12/14	12/15
Frontier Communications Corporation	100	91.18	108.83	166.51	126.17	100.44
S&P 500 Index	100	116.00	153.57	174.60	177.01	198.18
S&P Telecommunication Services	100	118.31	131.88	135.82	140.44	173.42

The foregoing performance graph and related information shall not be deemed "soliciting material" or to be "filed" with the SEC, nor shall such information be incorporated by reference into any future filings under the Securities Act of 1933 or the Securities Exchange Act of 1934, each as amended, except to the extent we specifically incorporate it by reference into such filing.

RECENT SALES OF UNREGISTERED SECURITIES, USE OF PROCEEDS FROM REGISTERED SECURITIES

There were no unregistered sales of equity securities during the fourth quarter of 2016.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average Price Paid per Share
October 1, 2016 to October 31, 2016 Employee Transactions <sup>(1)</sup>	2,070	\$ 4.02
November 1, 2016 to November 30, 2016 Employee Transactions <sup>(1)</sup>	2,389	\$ 3.25
December 1, 2016 to December 31, 2016 Employee Transactions <sup>(1)</sup>	5,205	\$ 3.68
Totals October 1, 2016 to December 31, 2016 Employee Transactions <sup>(1)</sup>	9,664	\$ 3.64

<sup>(1)</sup> Includes restricted shares withheld (under the terms of grants under employee stock compensation plans) to offset minimum tax withholding obligations that occur upon the vesting of restricted shares. Frontier's stock compensation plans provide that the value of shares withheld shall be the average of the high and low price of our common stock on the date the relevant transaction occurs.

- (6) Represents dividends on the 11.125% Mandatory Convertible Preferred Stock, Series A, from the issuance date of June 10, 2015 through December 31, 2015.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations****Introduction****(a) Results of Operations****2016 Compared to 2015**

On April 1, 2016, we completed our acquisition of Verizon's wireline properties in California, Texas, and Florida (the CTF Acquisition). Frontier's scope of operations and balance sheet changed materially as a result of the completion of the CTF Acquisition. Historical financial and operating data presented for Frontier includes the results of the CTF Operations that were acquired in the CTF Acquisition from the date of acquisition on April 1, 2016 and is not indicative of future operating results. The financial discussion below includes a comparative analysis of our results of operations on a historical basis for Frontier operations as of and for the years ended December 31, 2016 and 2015. Unless otherwise noted, the variance explanations discussed below are based upon an analysis of the 2016 financial data for Frontier legacy operations (excluding the CTF Operations) in comparison to 2015.

The sections below include tables that present customer counts, average monthly revenue per customer (ARPC) and residential customer churn which we define as the average of the amount of residential customer deactivations during the month divided by the number of residential customers at the beginning of the month. The following also categorizes revenue into customer revenue (residential and business) and regulatory revenue (switched access and subsidy). The decline in the number of customers was partially offset by increased penetration of additional higher revenue generating products and services sold to both residential and business customers, which has increased our average monthly revenue per customer in 2016 as compared to 2015. Similar to other wireline providers, we have experienced declines in the number of traditional voice customers, switched access minutes of use and rates per switched access minute of use, due to the FCC's intercarrier compensation reform, as a result of competition and the availability of substitutes, a trend which we expect will continue.

Management believes that residential customer counts and average monthly revenue per customer are important factors in evaluating our residential customer trends. Among the key services we provide to residential customers are voice service, data service and video service. We continue to explore the potential to provide additional services to our customer base, with the objective of meeting all of our customers' communications needs.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## 2016 CUSTOMER RELATED METRICS COMPARED TO 2015

	As of or for the year ended December 31,		
	2016	% Increase (Decrease)	2015
<b>Customers (in thousands)</b>	5,383 <sup>(1)</sup>	58 %	3,413
<b>Residential customer metrics:</b>			
Customers (in thousands)	4,891 <sup>(2)</sup>	57 %	3,124
Average monthly residential revenue per customer	\$ 77.47	21 %	\$ 63.93
Customer monthly churn	1.98%	9 %	1.82%
<b>Business customer metrics:</b>			
Customers (in thousands)	502 <sup>(2)</sup>	74 %	289
Average monthly business revenue per customer	\$ 673.72	(2)%	\$ 690.88
Broadband subscribers (in thousands)	4,271 <sup>(2)</sup>	73 %	2,462
Video subscribers (in thousands)	1,419 <sup>(2)</sup>	156 %	554
Switched access minutes of use (in thousands)	19,450	27 %	15,327
Employees	28,332	48 %	19,160

<sup>(1)</sup>2,283,000 residential customers, 250,000 business customers and 2,533,000 total customers were acquired at the time of the April 2016 CTF Acquisition.

<sup>(2)</sup>2,052,000 broadband subscribers and 1,165,000 video subscribers were acquired at the time of the April 2016 CTF Acquisition.

Customer Trends

We provide service and product options in our residential and business offerings to the customer base in each of our markets which results in a better customer experience that allows us to maximize retention of existing customers and attract new customers. As of December 31, 2016, 63% of our residential broadband customers were subscribed to at least one other service offering.

During 2016, we gained approximately 2.0 million customers, net, as compared to a loss of 96,000 customers, net, in 2015. Although we added approximately 2.5 million customers in 2016 following the CTF Acquisition, we lost a net of approximately 553,000 customers across all of our markets. These customer losses were more heavily weighted in the newly acquired CTF markets due to transition disruptions following the acquisition, resulting in higher than normal customer churn, as well as the suspension of collection activities prior to and after the closing of the CTF Acquisition, and the suspension of marketing efforts for a period of time following the acquisition. These actions resulted in fewer additions than would otherwise have been achieved. Higher than normal customer losses are expected to continue into 2017 as collections efforts are caught-up for delinquent accounts and marketing efforts ramp up.

We had approximately 4.9 million and 3.1 million total residential customers as of December 31, 2016 and 2015, respectively. Although we added approximately 2.3 million total residential customers attributable to the CTF Acquisition in 2016, we lost approximately 516,000 residential customers, net, during 2016, composed of losses in both our legacy markets and in the CTF markets, principally driven by declines in voice customers. Our residential customer monthly churn was 1.98% for 2016. Average monthly residential revenue per customer (residential ARPC) increased \$13.54, or 21%, to \$77.47 during 2016 as compared to 2015. The overall increase in residential ARPC is a result of higher video revenue from our CTF Operations and improvements in data services revenue for our legacy operations, partially offset by lower voice services revenue. We expect to improve our video and data subscriber trends for our Frontier legacy and CTF operations. We anticipate continuing declines in voice services revenue as fewer residential customers subscribe to landline voice services. Frontier expects continuing increases in data services revenue, primarily driven by increased broadband subscribers, and continuing declines in voice services revenue.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

We had approximately 0.5 million and 0.3 million total business customers as of December 31, 2016 and 2015, respectively. Although we added 250,000 total business customers attributable to the CTF Acquisition in 2016, we lost approximately 38,000 business customers, net in 2016, composed of losses in both our legacy markets and in the CTF markets. Average monthly business revenue per customer (business ARPC) decreased \$17.16, or 2%, to \$673.72 during 2016 as compared to 2015. The business ARPC decrease is primarily attributable to our CTF markets having lower ARPC per SME (small business, medium business and larger enterprise customers) customer and proportionally fewer wholesale customers relative to total business customers as compared to our legacy markets. Frontier expects the declines in voice services revenue and wireless backhaul revenues from business customers to continue in 2017, mitigated, in part, by increases in data services revenue. We have seen modest increases in our revenues from small/medium/enterprise (SME) customers throughout 2016, and our Ethernet product revenues from our SME and carrier customers has grown by 8% for the Frontier legacy operations during 2016.

At December 31, 2016, we had approximately 1.8 million more broadband subscribers than we did at December 31, 2015. We added 2,052,000 subscribers as part of the CTF Acquisition; however, we lost approximately 243,000 net subscribers, primarily due to fewer gross activations and higher customer churn. At December 31, 2016, 57% of our consolidated residential broadband customers subscribed to speeds in excess of our 6 Mbps basic speed tier, up from 29% at December 31, 2015.

We offer video services under the Vantage brand to our customers in Connecticut, South Carolina, Minnesota, and Illinois and under the FiOS® brand in California, Texas, and Florida (and on a limited basis in Indiana, Oregon and Washington). We also offer satellite TV video service to our customers under an agency relationship with DISH® in all of our markets. During the year, we added 1,165,000 video subscribers in the CTF Acquisition. For the full year, we lost approximately 300,000 net video subscribers across all markets. At December 31, 2016, we had 1.14 million linear video subscribers that are served with FiOS or Vantage video service. In addition to our linear video subscribers, we have 274,000 DISH satellite video customers.

## 2016 REVENUE COMPARED TO 2015

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## REVENUE

We generate revenues primarily through either a monthly recurring fee or a fee based on usage, and revenue recognition is not dependent upon significant judgments by management, with the exception of a determination of a provision for uncollectible amounts.

Consolidated total revenue for 2016 increased \$3,320 million to \$8,896 million as compared to 2015. Excluding additional revenue of \$3,622 million in 2016 attributable to CTF operations, our revenue for 2016 decreased \$302 million, or 5%, as compared to 2015. This decline in 2016 is primarily the result of decreases in voice services revenues and lower switched and nonswitched access revenue, partially offset by an increase in data services revenue, each as described in more detail below.

Customer revenue for the year ended December 31, 2016 increased \$3,200 million to \$8,099 million as compared to 2015. Excluding additional customer revenue of \$3,447 million attributable to the CTF Operations, our customer revenue for 2016 decreased \$247 million, or 5%, as compared to 2015.

Consolidated residential customer revenue for the year ended December 31, 2016 increased \$1,951 million, or 80%, as compared to 2015. Consolidated residential customer revenue for the year ended December 31, 2016 included \$2,092 million of revenue attributable to the CTF Operations. Residential customer revenues for our legacy operations for the year ended December 31, 2016 decreased \$141 million, or 6%, compared to 2015, primarily as a result of decreases in voice services revenue, partially offset by increases in data services revenue. Similar to other wireline providers, we have experienced declines in the number of traditional voice customers and switched access minutes of use as a result of competition and the availability of substitutes, a trend we expect to continue. The consolidated monthly average revenue per customer (ARPC) for our residential customers increased 21% for the year ended December 31, 2016 as compared to 2015. The overall increase in residential ARPC is a result of higher video revenue from our CTF Operations and improvements in data services revenue for our legacy operations, partially offset by lower voice services revenue.

Consolidated business customer revenue for 2016 increased \$1,249 million, or 51%, as compared to 2015. Consolidated business customer revenue for 2016 included \$1,355 million of revenue attributable to the CTF Operations. Business customer revenue for our legacy operations declined \$106 million, or 4%, as compared to 2015, principally as a result of decreases in our voice services revenue and wireless backhaul revenue. The consolidated ARPC for our business customers decreased 2%, for the year ended December 31, 2016 as compared with 2015. The business ARPC decrease is primarily attributable to our CTF markets having lower ARPC per SME (small business, medium business and larger enterprise customers) customer and proportionally fewer wholesale customers relative to total business customers as compared to our legacy markets.

Consolidated switched access and subsidy revenue of \$797 million represented 9% of our revenues for 2016. Switched access revenue was \$170 million in 2016, or 2% of our revenues, down from \$177 million, or 3% of our revenues, in 2015. The Report and Order released by the FCC on November 18, 2011 (the 2011 Order) provided for the gradual elimination of terminating traffic charges by 2017 with a related decline in operating expenses. Switched access revenue declined sequentially in the third quarter of 2016, reflecting the rate reductions mandated by the 2011 Order, and we anticipate that we have experienced nearly all of the rate decline related to the 2011 Order. We have been able to recover a significant portion of these lost revenues through end user rates and other replacement support mechanisms, a trend we expect will continue throughout 2017. We expect declining revenue trends in switched access revenue to continue in 2017 in our legacy operations. Subsidy revenue, including CAF Phase II subsidies, was \$626 million in 2016, or 7% of our revenues, which increased from \$500 million, or 9% of our revenues, in 2015.

**We categorize our products, services and other revenues among the following five categories:**

Voice Services

Voice services include traditional local and long distance wireline services, data-based Voice over Internet Protocol (VoIP) services, as well as voice messaging services offered to our residential and business customers. Voice services also include the long distance voice origination and termination services that we provide to our business customers and other carriers.

Voice services revenue for 2016 decreased as compared with 2015, primarily due to the continued loss of voice customers and, to a lesser extent, decreases in individual feature packages, as well as long distance revenue among those customers that do not have a bundled long distance plan, partially offset by increased local voice charges to residential and business end users.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

Data and Internet Services

Data and Internet services include broadband services for residential and business customers. We provide data transmission services to high volume business customers and other carriers with dedicated high capacity circuits ("nonswitched access") including services to wireless providers ("wireless backhaul"). In addition, we offer our Frontier Secure suite of products, including computer security, cloud backup and sharing, identity protection and equipment insurance. Frontier Secure also provides technical support services for businesses.

Data and Internet services revenue for 2016 decreased as compared with 2015. Data services revenues for 2016 increased \$45 million, or 3%, primarily due to higher Frontier Secure revenues. Nonswitched access revenues decreased \$55 million, or 6%, primarily due to lower monthly recurring revenues for wireless backhaul and other carrier services. We expect wireless data usage to continue to increase, which may drive the need for additional wireless backhaul capacity. Despite the need for additional capacity, in the near term, we anticipate that our overall wireless backhaul revenues (which comprise approximately 3% of our total revenues) will continue to be subject to decline in 2017, as our carrier customers migrate to Ethernet solutions at lower price points or migrate to our competitors.

Video Services

Video services include revenues generated from services provided directly to residential customers through the FIOS video and Vantage video brands, and through DISH satellite TV services.

Video services for 2016 decreased primarily due to a decrease in the total number of video subscribers.

Other

Other customer revenue includes sales of customer premise equipment to our business customers and directory services, less our provision for bad debts.

Other revenues for 2016 decreased primarily due to lower directory services revenue.

Switched Access and Subsidy

Switched access and subsidy revenues include revenues derived from allowing other carriers to use our network to originate and/or terminate their local and long distance voice traffic ("switched access"). These services are primarily billed on a minutes-of-use basis applying tariffed rates filed with the FCC or state agencies. We also receive cost subsidies from state and federal authorities, including the Connect America Fund.

Switched access and subsidy revenue for 2016 decreased as compared to 2015. Subsidy revenues decreased \$16 million, or 3% in 2016, primarily attributable to the one-time true-up payments and phasedown support recognized in 2015 in connection with the CAF Phase II program. Switched access revenue decreased \$39 million, or 22%, in 2016 primarily due to the impact of the decline in minutes of use related to access line losses and the displacement of minutes of use by wireless and other communications services, combined with the lower rates enacted by the FCC's intercarrier compensation.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## 2016 OPERATING EXPENSES COMPARED TO 2015

## NETWORK ACCESS EXPENSE

(\$ in millions)	For the Year Ended December 31.					
			2016		2015	
	Consolidated Amount	CTF Operations	Frontier Legacy (excluding CTF Operations)		Amount	
			Amount	\$ Increase (Decrease)		
Network access expenses	\$ 1,470	\$ 852	\$ 618	\$ (22)	(3) %	\$ 640

Network access expenses include access charges and other third-party costs directly attributable to connecting customer locations to our network and video content costs. Such access charges and other third-party costs exclude network related expenses, depreciation and amortization, and employee related expenses.

Network access expenses for 2016 decreased in our legacy markets, primarily due to lower long distance costs and video content costs as a result of a decline in video customers, partially offset by increases in customer premise equipment costs, pole and conduit rental expense, and Frontier Secure costs.

## NETWORK RELATED EXPENSES

(\$ in millions)	For the Year Ended December 31.					
			2016		2015	
	Consolidated Amount	CTF Operations	Frontier Legacy (excluding CTF Operations)		Amount	
			Amount	\$ Increase (Decrease)		
Network related expenses	\$ 1,887	\$ 623	\$ 1,264	\$ (23)	(2) %	\$ 1,287

Network related expenses include expenses associated with the delivery of services to customers and the operation and maintenance of our network, such as facility rent, utilities, maintenance and other costs, as well as salaries, wages and related benefits associated with personnel who are responsible for the delivery of services, operation and maintenance of our network.

Network related expenses for 2016 decreased due to lower compensation costs, primarily related to decreased employee headcount, and certain benefits, including incentive compensation, pension and OPEB expense (as discussed below), and a reduction in rental costs for vehicles under operating leases that were modified during 2016, resulting in the classification as capital leases.

## SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

(\$ in millions)	For the Year Ended December 31.					
			2016		2015	
	Consolidated Amount	CTF Operations	Frontier Legacy (excluding CTF Operations)		Amount	
			Amount	\$ Increase (Decrease)		
Selling, general and administrative expenses	\$ 2,093	\$ 731	\$ 1,362	\$ 16	1 %	\$ 1,346

Selling, general and administrative expenses (SG&A expenses) include the salaries, wages and related benefits and the related costs of corporate and sales personnel, travel, insurance, non-network related rent, advertising and other administrative expenses.

SG&A expenses for 2016 increased due to higher costs for compensation, primarily related to increased employee headcount due to additional services provided by Frontier Secure, and certain benefits, including pension and OPEB expense (as discussed below), partially offset by lower incentive compensation for the year.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Pension and OPEB Costs**

Frontier allocates Pension and OPEB costs to network related expenses and SG&A expenses. Total consolidated pension and OPEB costs, excluding special termination benefits of \$26 million in 2016, for the years ended December 31, 2016 and 2015 were as follows:

(\$ in millions)	For the year ended December 31,	
	2016	2015
Total pension/OPEB expense	\$ 129	\$ 95
Less: capitalized into capital expenditures	(25)	(20)
Net pension/OPEB costs	\$ 104	\$ 75

**DEPRECIATION AND AMORTIZATION**

(\$ in millions)	For the year ended December 31,					
	Consolidated Amount	CTF Operations	2016		2015 Amount	
			Frontier Legacy (excluding CTF Operations) Amount	\$ Increase (Decrease)		% Increase (Decrease)
Depreciation expense	\$ 1,388	\$ 439	\$ 949	\$ (34)	(3) %	\$ 983
Amortization expense	643	361	282	(55)	(16) %	337
	\$ 2,031	\$ 800	\$ 1,231	\$ (89)	(7) %	\$ 1,320

Depreciation and amortization expense for 2016 decreased primarily due to the accelerated method of amortization related to the customer base that was acquired in our 2010 Acquisition with Verizon and in the Connecticut Acquisition, combined with changes in the remaining useful lives of certain plant assets and a lower net asset base.

**RESTRUCTURING COSTS AND OTHER CHARGES**

(\$ in millions)	For the year ended December 31,					
	Consolidated Amount	CTF Operations	2016		2015 Amount	
			Frontier Legacy (excluding CTF Operations) Amount	\$ Increase (Decrease)		% Increase (Decrease)
Restructuring costs and other charges	\$ 91	\$ 34	\$ 57	\$ 55	NM %	\$ 2

NM – Not Meaningful

Restructuring costs and other charges increased in 2016 compared to 2015 primarily due to a reduction in the workforce of approximately 1,950 employees resulting in an increase in severance and related expenses of \$30 million and pension/OPEB special termination benefit enhancements of \$25 million.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## 2015 Compared to 2014

On October 24, 2014, Frontier completed the Connecticut Acquisition. The financial discussion below includes a comparative analysis of our results of operations on a historical basis for our Frontier operations as of and for the years ended December 31, 2015 and 2014. Unless otherwise noted, the variance explanations discussed below are based upon an analysis of the 2015 financial data for Frontier legacy operations (excluding the Connecticut Operations) in comparison to 2014 financial data for Frontier legacy operations (excluding the Connecticut Operations).

## 2015 CUSTOMER RELATED METRICS COMPARED TO 2014

	As of or for the year ended December 31,		
	2015	% Increase (Decrease)	2014
Customers (in thousands)	3,413	(3)%	3,510 <sup>(1)</sup>
<b>Residential customer metrics:</b>			
Customers (in thousands)	3,124	(3)%	3,205 <sup>(1)</sup>
Average monthly residential revenue per customer	\$ 63.93	5 %	\$ 61.11
Customer monthly churn	1.82%	5 %	1.73%
<b>Business customer metrics:</b>			
Customers (in thousands)	289	(5)%	305 <sup>(1)</sup>
Average monthly business revenue per customer	\$ 690.88	4 %	\$ 661.15
Broadband subscribers (in thousands)	2,462	4 %	2,360 <sup>(2)</sup>
Video subscribers (in thousands)	554	(5)%	582 <sup>(2)</sup>
Switched access minutes of use (in thousands)	15,327	1 %	15,193
Employees	19,160	10 %	17,354

<sup>(1)</sup>468,000 residential customers, 49,000 business customers and 517,000 total customers were acquired at the time of the October 2014 Connecticut Acquisition.

<sup>(2)</sup>385,000 broadband subscribers and 192,000 video subscribers were acquired at the time of the October 2014 Connecticut Acquisition.

Customer Trends

During 2015, we lost 96,000 customers, net, compared to a gain of 435,000 customers, net, in 2014. Although we added 517,000 customers in 2014 following the Connecticut Acquisition, we lost 82,000 customers, net, in 2014 across all of our markets.

We had approximately 3.1 million and 3.2 million total residential customers as of December 31, 2015 and 2014, respectively. Although we added 468,000 total residential customers attributable to the Connecticut Acquisition in 2014, we lost approximately 81,000 and 67,000 residential customers, net during 2015 and 2014, respectively, composed of losses in both our legacy markets and in the Connecticut markets, principally driven by declines in voice customers. Our residential customer monthly churn was 1.82% and 1.73% for 2015 and 2014, respectively. Residential ARPC increased \$2.82, or 5%, to \$63.93 during 2015 as compared to 2014. The overall increase in residential ARPC is due to a higher percentage of Frontier's residential customers who subscribe to our broadband services, the increase in our Frontier TV and FiOS-branded video customers, which is primarily attributable to our Connecticut Operations, and the increase in customers subscribed to multiple services.

We had approximately 0.3 million total business customers as of December 31, 2015 and 2014. Although we added 49,000 total business customers attributable to the Connecticut Acquisition in 2014, we lost approximately 16,000 and 15,000 business customers, net, during 2015 and 2014, respectively. Business ARPC increased \$29.73, or 4%, to \$690.88 during 2015 as compared to 2014. The overall increase in business ARPC is primarily due to declining customer counts for our small business customers that carry a lower ARPC.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

During 2015, Frontier added approximately 102,000 net broadband subscribers. During 2014, Frontier added approximately 493,000 (including 385,000 from the Connecticut Acquisition) net broadband subscribers. As of December 31, 2015, approximately 64% of our residential broadband customers subscribed to a bundle of services. As of December 31, 2015, we were able to offer broadband to approximately 7.9 million households, or 93% of the 8.5 million households in our markets. The increase in broadband subscribers contributed to our improved data services revenue performance. At December 31, 2015, 29% of our residential broadband customers subscribed to speeds in excess of our 6 Mbps basic speed tier, up from 24% at December 31, 2014. We offer FiOS-branded video services in three states, Frontier TV-branded video services in Connecticut and satellite video services through DISH throughout our territories. We lost 28,000 video subscribers, net during 2015 primarily due to the loss of DISH subscribers. At December 31, 2015, we had 554,000 video customers.

## 2015 REVENUE COMPARED TO 2014

	For the Year Ended December 31,											
	2015				2014							
	Consolidated		Connecticut		Frontier Legacy (excluding Connecticut Operations)		Consolidated		Connecticut		Frontier Legacy (excluding Connecticut Operations)	
(\$ in millions)	Amount	Operations	Amount	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount	Operations	Amount	Amount	\$ Increase (Decrease)	% Increase (Decrease)

Total revenue	\$ 5,576	\$ 1,049	\$ 4,527	\$ (29)	(1)%	\$ 4,772	\$ 216	\$ 4,556				

## REVENUE

Consolidated total revenue for 2015 increased \$804 million to \$5,576 million as compared to 2014. Excluding revenues attributable to the Connecticut operations, our total revenue for 2015 decreased \$29 million, or 1%, as compared to 2014. This decline in 2015 is primarily the result of decreases in voice services revenues and lower switched and nonswitched access revenue, partially offset by an increase in data services revenue and subsidy revenue, each as described in more detail below.

Consolidated residential customer revenue for 2015 included \$531 million of revenue attributable to the Connecticut operations. Consolidated residential customer revenue for our Frontier legacy operations declined \$75 million, or

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

4%, as compared with 2014, primarily as a result of decreases in voice services revenue, partially offset by increases in data services revenue.

Consolidated business customer revenue for 2015 included \$475 million of revenue attributable to the Connecticut operations. Consolidated business customer revenue for our Frontier legacy operations declined \$78 million, or 4%, as compared with 2014, principally as a result of decreases in our voice services revenue and wireless backhaul revenue.

Consolidated switched access and subsidy revenue of \$677 million represented 12% of our revenues for 2015. Switched access revenue was \$177 million in 2015, or 3% of our revenues, down from \$201 million, or 4% of our revenues, in 2014. Subsidy revenue was \$500 million in 2015, or 9% of our revenues, which increased from \$319 million, or 7% of our revenues, in 2014.

Voice Services

Voice services revenues for 2015 decreased as compared with 2014, primarily due to \$180 million, or 12%, in lower local and enhanced services revenue. This decrease is primarily due to the continued loss of voice customers and, to a lesser extent, decreases in individual features packages, partially offset by increased local voice charges to residential and business end users. Long distance services revenue decreased \$28 million, or 8%, primarily due to a 10% decrease in minutes of use driven by fewer customers, partially offset by increased cost recovery surcharge rates.

Data and Internet Services

Data and Internet services revenues for 2015 increased as compared with 2014. Nonswitched access revenues decreased \$68 million, or 8%, primarily due to lower monthly recurring revenues for wireless backhaul and other carrier service revenues. These decreases were more than offset by increases in data services revenues of \$121 million, or 12%, primarily due to a 4% increase in the total number of broadband subscribers and higher Frontier Secure revenues.

Video Services

Video services revenue for 2015 remained the same as compared to 2014.

Other

Other revenues for 2015 remained relatively flat primarily due to changes in our provision for bad debts and increased customer premise equipment revenues, offset by lower directory services revenues.

Switched Access and Subsidy

Switched access and subsidy revenue for 2015 increased as compared to 2014. Subsidy revenues increased \$164 million, or 52% in 2015, primarily due to the additional CAF Phase II funding, which increased support by more than \$159 million in 2015. Switched access revenue decreased \$40 million, or 21%, in 2015 primarily due to the impact of a decline in minutes of use related to access line losses and the displacement of minutes of use by wireless and other communications services combined with the lower rates enacted by the FCC's intercarrier compensation reform in July 2013.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## 2015 OPERATING EXPENSES COMPARED TO 2014

## NETWORK ACCESS EXPENSE

	For the Year Ended December 31,							
	2015					2014		
	Consolidated	Connecticut	Frontier Legacy (excluding Connecticut Operations)			Consolidated	Connecticut	Frontier Legacy (excluding Connecticut Operations)
(\$ in millions)	Amount	Operations	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount	Operations	Amount
Network access expenses	\$ 640	\$ 220	\$ 420	\$ (6)	(1)%	\$ 465	\$ 39	\$ 426

Network access expenses for 2015 decreased, primarily due to lower long distance costs as a result of decreased minutes of use and lower pole rental costs, partially offset by an increase in network access expenses related to higher broadband subscriber counts and costs for providing new circuits to our markets.

## NETWORK RELATED EXPENSES

	For the Year Ended December 31,							
	2015					2014		
	Consolidated	Connecticut	Frontier Legacy (excluding Connecticut Operations)			Consolidated	Connecticut	Frontier Legacy (excluding Connecticut Operations)
(\$ in millions)	Amount	Operations	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount	Operations	Amount
Network related expenses	\$ 1,287	\$ 182	\$ 1,105	\$ 38	4%	\$ 1,118	\$ 51	\$ 1,067

Network related expenses for 2015 increased due to higher costs for compensation, primarily due to storm-related costs, and certain benefits, including pension and OPEB expense (as discussed below), and increased fleet and facilities costs, partially offset by reduced installation and repair costs.

## SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

	For the Year Ended December 31,							
	2015					2014		
	Consolidated	Connecticut	Frontier Legacy (excluding Connecticut Operations)			Consolidated	Connecticut	Frontier Legacy (excluding Connecticut Operations)
(\$ in millions)	Amount	Operations	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount	Operations	Amount
Selling, general and administrative expenses	\$ 1,346	\$ 246	\$ 1,100	\$ 44	4%	\$ 1,056	\$ 30	\$ 1,056

SG&A expenses for 2015 increased due to higher costs for compensation, primarily related to increased employee headcount due to additional services provided by Frontier Secure, and certain benefits, including pension and OPEB expense (as discussed above), partially offset by lower litigation and facilities costs.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Pension and OPEB Costs**

Frontier allocates Pension and OPEB costs to network related expenses and SG&A expenses. Total consolidated pension and OPEB costs for the years ended December 31, 2015 and 2014 were as follows:

(\$ in millions)	For the year ended December 31,	
	2015	2014
Total pension/OPEB expense	\$ 95	\$ 74
Less: capitalized into capital expenditures	(20)	(15)
Net pension/OPEB costs	\$ 75	\$ 59

**DEPRECIATION AND AMORTIZATION**

(\$ in millions)	For the Year Ended December 31,							
	2015				2014			
	Consolidated Amount	Connecticut Operations	Frontier Legacy (excluding Connecticut Operations)		Consolidated Amount	Connecticut Operations	Frontier Legacy (excluding Connecticut Operations)	
		Amount	\$ Increase (Decrease)	% Increase (Decrease)			Amount	
Depreciation expense	\$ 983	\$ 204	\$ 779	\$ (18)	(2) %	\$ 835	\$ 38	\$ 797
Amortization expense	337	97	240	(44)	(15) %	304	20	284
	\$ 1,320	\$ 301	\$ 1,019	\$ (62)	(6) %	\$ 1,139	\$ 58	\$ 1,081

Depreciation and amortization expense for 2015 decreased primarily due to the accelerated method of amortization related to the customer base that was acquired in the 2010 Acquisition with Verizon, changes in the remaining useful lives of certain plant assets and a lower net asset base.

**ACQUISITION AND INTEGRATION COSTS**

(\$ in millions)	For the year ended December 31,						
	2016			2015			2014
	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount
CTF Acquisition	\$ 435	\$ 239	122 %	\$ 196	\$ 196	100 %	\$ -
Connecticut Acquisition	1	(39)	(98) %	40	(102)	(72) %	142
Total acquisition and integration costs	\$ 436	\$ 200	85 %	\$ 236	\$ 94	66 %	\$ 142

Acquisition costs include legal, financial advisory, accounting, regulatory and other related costs. Integration costs include expenses that are incremental and directly related to the acquisition, and were incurred to integrate the network and information technology platforms and to enable other integration initiatives.

We invested \$142 million and \$129 million in capital expenditures related to the CTF Acquisition during the years ended December 31, 2016 and 2015, respectively.

We also invested \$24 million and \$116 million in capital expenditures related to the Connecticut Acquisition during the years ended December 31, 2015 and 2014, respectively.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

## OTHER NON-OPERATING INCOME AND EXPENSE

(\$ in millions)	For the Year Ended December 31,						
	2016			2015			2014
	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount	\$ Increase (Decrease)	% Increase (Decrease)	Amount
Investment and other income, net	\$ 20	\$ 13	186 %	\$ 7	\$ (32)	(82) %	\$ 39
Interest expense	\$ 1,531	\$ 418	38 %	\$ 1,113	\$ 417	60 %	\$ 696
Income tax expense (benefit)	\$ (250)	\$ (85)	52 %	\$ (165)	\$ (195)	NM %	\$ 30

NM – Not Meaningful

**Investment and Other Income, Net**

Investment and other income, net for 2016 increased \$13 million for a gain on expiration/settlement of customer advances combined with higher interest and dividend income of \$6 million, primarily due to interest earned on restricted cash during the first quarter of 2016, partially offset by a decrease of \$7 million due to a loss on debt exchanges.

Investment and other income, net for 2015 decreased due to a \$25 million gain on the sale of our minority interest in a wireless partnership and a \$12 million gain on the sale of an intangible asset in 2014, partially offset by higher interest and dividend income of \$5 million in 2015.

**Interest expense**

Interest expense for 2016 increased, primarily due to additional interest of \$755 million in 2016 on the \$6 billion senior notes offering and the \$1,625 million term loan facility related to the CTF Acquisition. We incurred commitment fees of \$10 million and \$184 million for the Verizon Bridge Facility (as defined below) related to the CTF Acquisition during 2016 and 2015, respectively. Our composite average borrowing rate as of December 31, 2016 and 2015 was 8.55% and 8.99%, respectively.

Interest expense for 2015 increased primarily due to interest on the \$6.6 billion senior notes offering completed in September 2015, as well as \$184 million in commitment fees for the Verizon Bridge Facility (as defined below) related to the CTF Acquisition as compared to the commitment fees of \$23 million on the bridge loan facility related to the Connecticut Acquisition during 2014. We also incurred additional interest in 2015 on the \$1,900 million debt financing related to the Connecticut Acquisition.

**Income tax expense (benefit)**

Income tax benefit for 2016 increased compared to 2015, primarily due to the increase in pretax loss. The effective tax rate on our pretax loss for 2016 was 40.2% as compared with 45.8% for 2015. Income taxes for 2016 include the impact of \$36 million of tax benefits resulting primarily from the adjustment of deferred tax balances due to the CTF Acquisition in 2016.

Income tax expense (benefit) for 2015 was an income tax benefit of \$165 million compared to income tax expense of \$30 million for 2014. The change in income tax expense (benefit) was primarily due to the change from pretax income to pretax loss. Our effective tax rate was 45.8% for 2015 compared with 18.7% for 2014. Income taxes for 2015 include the impact of a \$3 million benefit arising from the adjustment of deferred tax balances and a \$5 million benefit from the federal research and development credit.

We received \$120 million in tax refunds in 2016 as compared to net cash taxes paid of \$28 million and \$70 million in 2015 and 2014, respectively.

**Net income (loss) attributable to Frontier common shareholders**

Net income (loss) attributable to Frontier common shareholders for 2016 was a net loss of \$587 million, or \$0.51 per share, as compared to a net loss of \$316 million, or \$0.29 per share, in 2015 and net income of \$133 million, or \$0.13 per share, in 2014.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**(b) Liquidity and Capital Resources****Analysis of Cash Flows**

As of December 31, 2016, we had cash and cash equivalents aggregating \$522 million. Our primary source of funds during 2016 was restricted and unrestricted cash, additional borrowings, along with cash generated from operations. In 2016, we used cash flow from operations, restricted cash, and cash on hand to principally fund all of our cash investing and financing activities, primarily the CTF Acquisition, capital expenditures, dividends, and debt repayments. On April 1, 2016, we used the restricted cash obtained from net proceeds of the September 2015 senior notes offering and June 2015 equity offerings, along with additional borrowings and cash on hand, to finance the CTF Acquisition.

At December 31, 2016, we had a working capital deficit of \$788 million, including \$363 million of long-term debt due within one year, as compared to a working capital surplus of \$8,238 million at December 31, 2015. The decline in working capital is primarily due to a reduction in restricted cash and unrestricted cash and cash equivalents of \$8,858 million, primarily related to funding the CTF Acquisition, and an increase in current liabilities of \$551 million.

**Cash Flows provided by Operating Activities**

Cash flows provided by operating activities increased \$365 million, or 28%, to \$1,666 million in 2016 as compared to 2015. The increase was primarily the result of the addition of our CTF operations, partially offset by unfavorable changes in working capital along with higher interest expense and acquisition and integration costs.

We received \$120 million in tax refunds in 2016 as compared to net cash taxes paid of \$28 million and \$70 million in 2015 and 2014, respectively.

In connection with the CTF Acquisition, Frontier recognized acquisition and integration costs of \$436 million during 2016 compared to \$196 million during 2015. Interest expense of \$755 million was incurred during 2016 related to the September 2015 debt offering and the 2015 Credit Agreement (as defined below) compared to \$189 million in interest expense during 2015. Additionally, Frontier incurred \$10 million of interest expense related to the Verizon Bridge Facility in 2016 compared to \$184 million during 2015.

In connection with the Connecticut Acquisition, Frontier recognized \$40 million and \$142 million of acquisition and integration costs incurred in 2015 and 2014, respectively, and \$23 million of interest expense in 2014, in connection with the bridge loan facility related to the Connecticut Acquisition.

**Cash Flows used by Investing Activities****Capital Expenditures**

In 2016, 2015 and 2014, our capital expenditures were, respectively, \$1,401 million, \$863 million and \$688 million (including \$142 million, \$153 million and \$116 million of integration-related capital expenditures in 2016, 2015 and 2014, respectively, associated with the CTF Acquisition and the Connecticut Acquisition). Frontier received a total of \$133 million during the 2012-2014 period from the Connect America Fund (CAF) Phase I Program to support broadband deployment in unserved and underserved high-cost areas. In addition to the capital expenditures mentioned above, network expansion funded by the previously received CAF Phase I funds amounted to \$22 million and \$56 million in 2015 and 2014, respectively. Capital expenditures related to CAF Phase II are included in our reported amounts for capital expenditures. We anticipate capital expenditures for business operations to be approximately \$1.00 billion to \$1.25 billion in 2017, as compared to \$1,259 million in 2016.

**CTF Acquisition**

On April 1, 2016, Frontier acquired the wireline operations of Verizon in California, Texas and Florida for a purchase price of \$10,540 million in cash and assumed debt (the CTF Acquisition), pursuant to the February 5, 2015 Securities Purchase Agreement, as amended. In addition, Frontier and Verizon settled the working capital and net debt adjustments with \$15 million paid to Frontier in October 2016.

**Connecticut Acquisition**

On October 24, 2014, Frontier acquired the wireline properties of AT&T in Connecticut. After including the working capital adjustment payment of \$18 million, the total purchase price for the Connecticut Acquisition was \$2,018 million.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

Cash Flows used by and provided from Financing ActivitiesDebt Financings

Refer to the below discussion under Capital Resources – Term Loan Facilities.

Financing the CTF Acquisition

On September 25, 2015, Frontier completed a private offering of \$6,600 million aggregate principal amount of senior unsecured notes, as follows: \$1,000 million of 8.875% Senior Notes due 2020; \$2,000 million of 10.50% Senior Notes due 2022; and \$3,600 million of 11.00% Senior Notes due 2025. Each was issued at a price equal to 100% of its principal amount. Frontier used the net proceeds from the offering (after deducting underwriting fees) to finance a portion of the cash consideration paid in connection with the CTF Acquisition and to pay related fees and expenses. The net proceeds of the debt offering of \$6,485 million were included in "Restricted cash" in the consolidated balance sheet as of December 31, 2015. In April 2016, we completed an exchange offer of registered senior notes for the privately placed senior notes.

Financing the Connecticut Acquisition

On September 17, 2014, Frontier completed a registered debt offering of \$775 million aggregate principal amount of 6.25% Senior Notes due 2021 and \$775 million aggregate principal amount of 6.875% Senior Notes due 2025. We received net proceeds, after deducting underwriting fees, of \$1,519 million from the offering. Frontier used the net proceeds from the offering of the notes, together with borrowings of \$350 million under the 2014 CoBank Credit Agreement, as defined below, and cash on hand to finance the Connecticut Acquisition, which closed on October 24, 2014.

During 2015 and 2014, we also entered into secured financings totaling \$3 million and \$11 million, respectively, with four year terms and no stated interest rate for certain equipment purchases.

Debt Reduction

During 2016, 2015 and 2014, we retired an aggregate principal amount of \$453 million, \$298 million and \$260 million, respectively, of debt consisting of \$23 million, \$295 million and \$257 million, respectively, of senior unsecured debt and \$1 million during 2015 and 2014, of rural utilities service loan contracts. Additionally, we retired \$430 million, \$3 million and \$2 million of secured debt during 2016, 2015 and 2014, respectively.

Additionally, during 2016 we completed non-cash debt exchanges including related accrued interest, of \$397 million of our 8.25% Notes due April 2017 for approximately \$147 million of our 8.50% Notes due April 2020, \$66 million of our 8.875% Notes due September 2020 and \$188 million of our 10.50% Notes due September 2022. A pre-tax loss of approximately \$7 million was recognized and included in "Investment and other income, net" in our consolidated statement of operations for the year ended December 31, 2016.

Subject to limitations contained in our indentures and credit facilities, we may from time to time make repurchases of our debt in the open market, through tender offers, by exercising rights to call or in privately negotiated transactions. We may also refinance existing debt or exchange existing debt for newly issued debt obligations.

Common Stock Offering

On June 10, 2015, we completed a registered offering of 150,000,000 shares of our common stock, par value \$0.25 per share, at an offering price of \$5 per share. On June 24, 2015, Frontier issued an additional 15,000,000 shares of common stock in connection with the over-allotment option that was exercised in full by the underwriters. Aggregate net proceeds were approximately \$799 million after deducting commissions and expenses. We used the net proceeds from this offering to fund a portion of the acquisition price of the CTF Acquisition and for related fees and expenses.

Mandatory Convertible Preferred Stock (Series A) Offering

On June 10, 2015, we also completed a registered offering of 17,500,000 shares of our 11.125% Mandatory Convertible Preferred Stock, Series A, par value \$0.01 per share (the "Series A Preferred Stock"), at an offering price of \$100 per share. On June 24, 2015, Frontier issued an additional 1,750,000 shares of Series A Preferred Stock in connection with the over-allotment option that was exercised in full by the underwriters. Aggregate net proceeds of the offering were \$1,866 million after deducting commissions and expenses. We used the net proceeds from this offering to fund a portion of the acquisition price of the CTF Acquisition and for related fees and expenses.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Capital Resources**

We believe our operating cash flows, existing cash balances, existing revolving credit facility and access to the capital markets, as necessary, will be adequate to finance our working capital requirements, fund capital expenditures, make required debt interest and principal payments, pay taxes, pay dividends to our stockholders, and support our short-term and long-term operating strategies for the next twelve months. A number of factors, including but not limited to, losses of customers, pricing pressure from increased competition, lower subsidy and switched access revenues, and the impact of economic conditions may negatively affect our cash generated from operations. As of December 31, 2016, we had \$363 million and \$733 million of debt maturing in 2017 and 2018, respectively.

**Bridge Facilities**

On February 5, 2015, we entered into a commitment for a bridge loan facility (the Verizon Bridge Facility) and recognized related interest expense of \$10 million and \$184 million for the years ended December 31, 2016 and 2015, respectively. The Verizon Bridge Facility terminated in accordance with its terms on September 25, 2015.

On December 16, 2013, we signed a commitment letter for a bridge loan facility (the Connecticut Bridge Facility) to finance the Connecticut Acquisition and recognized interest expense related to this commitment of \$23 million during the year ended December 31, 2014. The Connecticut Bridge Facility terminated in accordance with its terms on September 17, 2014.

**Term Loan Facilities**

Borrowings under each of Frontier's term loan credit agreements are secured by a pledge of the stock of Frontier North Inc., a wholly owned subsidiary, primarily representing Frontier operations in Illinois, Indiana, Michigan, Ohio, and Wisconsin.

On August 12, 2015, Frontier entered into a credit agreement with JPMorgan Chase Bank, N.A., as administrative agent, and the lenders party thereto, for a \$1,500 million senior secured delayed-draw term loan facility (the 2015 Credit Agreement). Frontier exercised its right under the 2015 Credit Agreement to obtain additional commitments and increased the size of the facility to \$1,625 million. On April 1, 2016, in connection with the closing of the CTF Acquisition, Frontier drew \$1,550 million under that facility, with the additional \$75 million drawn subsequently. The final maturity date is March 31, 2021. Repayment of the outstanding principal balance will be made in quarterly installments, initially in the amount of \$20 million per installment, which commenced on June 30, 2016. The quarterly installments will increase to \$41 million, beginning with the 13th quarterly installment. The remaining outstanding principal balance will be repaid on the final maturity date. Borrowings under the term loan will bear interest based on margins over the Base Rate (as defined in the 2015 Credit Agreement) or LIBOR, at the election of Frontier. Interest rate margins under the facility (ranging from 0.75% to 1.75% for Base Rate borrowings and 1.75% to 2.75% for LIBOR borrowings) are subject to adjustment based on Frontier's Total Leverage Ratio (as defined in the 2015 Credit Agreement).

Frontier has a credit agreement with CoBank, ACB, as administrative agent, lead arranger and a lender, and the other lenders party thereto, for a \$350 million senior unsecured term loan facility (the 2014 CoBank Credit Agreement). The facility was drawn upon closing of the Connecticut Acquisition with proceeds used to partially finance the acquisition. The maturity date is October 24, 2019. Repayment of the outstanding principal balance will be made in quarterly installments of \$9 million, which commenced on March 31, 2015 with the remaining outstanding principal balance to be repaid on the maturity date. Borrowings under the 2014 CoBank Credit Agreement will bear interest based on the margins over the Base Rate (as defined in the 2014 CoBank Credit Agreement) or LIBOR, at the election of Frontier. Interest rate margins under the facility (ranging from 0.875% to 2.875% for Base Rate borrowings and 1.875% to 3.875% for LIBOR borrowings) are subject to adjustments based on our Total Leverage Ratio, as such term is defined in the 2014 CoBank Credit Agreement. The interest rate on this facility at December 31, 2016 was LIBOR plus 3.375%.

Frontier has two senior secured credit agreements with CoBank, ACB, as administrative agent, lead arranger and a lender, and the other lenders party thereto: the first, for a \$350 million senior term loan facility drawn in 2014 (the 2014 CoBank Credit Agreement), matures on October 24, 2019, and the second, for a \$315 million senior term loan facility drawn in October 2016 (the 2016 CoBank Credit Agreement), matures on October 12, 2021. We refer to the 2014 CoBank Credit Agreement and the 2016 CoBank Credit Agreement collectively as the CoBank Credit Agreements.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

Repayment of the outstanding principal balance under each of the CoBank Credit Agreements is being made in quarterly installments (\$9 million, with respect to the 2014 CoBank Credit Agreement, and \$8 million, with respect to the 2016 CoBank Credit Agreement), in each case with the remaining outstanding principal balance to be repaid on the applicable maturity date. Borrowings under each of the CoBank Credit Agreements bear interest based on the margins over the Base Rate (as defined in the applicable CoBank Credit Agreement) or LIBOR, at the election of Frontier. Interest rate margins under the facilities (ranging from 0.875% to 2.875% for Base Rate borrowings and 1.875% to 3.875% for LIBOR borrowings) are subject to adjustments based on our Total Leverage Ratio, as such term is defined in the applicable CoBank Credit Agreement. The interest rate on these facilities at December 31, 2016 was LIBOR plus 3.375%.

**Revolving Credit Facility**

Borrowings under Frontier's Revolving Credit Agreement are secured by a pledge of the stock of Frontier North Inc.

Frontier has a revolving credit agreement with JPMorgan Chase Bank, N.A., as administrative agent, the lenders party thereto and the other parties named therein (the Revolving Credit Agreement), for a \$750 million revolving credit facility (the Revolving Credit Facility) with a scheduled termination date of May 31, 2018. As of December 31, 2016, the Revolving Credit Facility was fully available and no borrowings had been made thereunder. Associated commitment fees under the Revolving Credit Facility will vary from time to time depending on our debt rating (as defined in the Revolving Credit Agreement) and were 0.45% per annum as of December 31, 2016. During the term of the Revolving Credit Facility, Frontier may borrow, repay and reborrow funds, and may obtain letters of credit, subject to customary borrowing conditions. Loans under the Revolving Credit Facility will bear interest based on the alternate base rate or the adjusted LIBO Rate (each as determined in the Revolving Credit Agreement), at our election, plus a margin based on our debt rating (ranging from 0.50% to 1.50% for alternate base rate borrowings and 1.50% to 2.50% for adjusted LIBO Rate borrowings). The interest rate on this facility would have been the alternate base rate plus 1.50% or the adjusted LIBO Rate plus 2.50%, respectively, as of December 31, 2016. Letters of credit issued under the Revolving Credit Facility will also be subject to fees that vary depending on our debt rating. The Revolving Credit Facility is available for general corporate purposes but may not be used to fund dividend payments.

On February 27, 2017, Frontier amended and restated its April 2011 term loan and its revolving credit facility, combining them into a single credit agreement and unifying the covenants. The amended and restated credit agreement provides Frontier with more flexible terms, increases the revolving credit facility to \$850 million and extends the maturity of the revolving credit facility from 2018 to 2022. The determination of interest rates remains unchanged. The most significant change in the covenants is an increase of the maximum Leverage Ratio (as defined) to 5.25 to 1.0 initially, migrating to 5.0 to 1.0 beginning in the second quarter of 2018, 4.75 to 1.0 in the second quarter of 2019, and 4.5 to 1.0 in the second quarter of 2020. In addition, under the amended and restated credit agreement, Frontier will be expanding the security package to include pledges of the equity interests in certain Frontier subsidiaries and guaranties by certain Frontier subsidiaries.

**Letters of Credit Facility**

Frontier has a Continuing Agreement for Standby Letters of Credit with Deutsche Bank AG New York Branch (the LC Agreement). As of December 31, 2016, \$105 million of undrawn Standby Letters of Credit had been issued under the LC Agreement. Borrowings under the LC Agreement are secured by a pledge of Frontier North Inc.

**Covenants**

The terms and conditions contained in our indentures, the CoBank Credit Agreements, the 2015 Credit Agreement and the Revolving Credit Agreement include the timely payment of principal and interest when due, the maintenance of our corporate existence, keeping proper books and records in accordance with GAAP, restrictions on the incurrence of liens on our assets securing indebtedness and our subsidiaries' assets, restrictions on the incurrence of indebtedness by our subsidiaries and restrictions on asset sales and transfers, mergers and other changes in corporate control subject to important qualifications and exceptions. We would be restricted from declaring dividends by the CoBank Credit Agreements, the 2015 Credit Agreement and the Revolving Credit Agreement if an event of default occurred and was continuing at the time or would result from the dividend declaration. In addition, under the Certificate of Designations of our 11.125% Mandatory Convertible Preferred Stock, Series A, we would be restricted from paying dividends on our common stock if we failed to declare and pay dividends on our Series A Preferred Stock.

The CoBank Credit Agreements, the 2015 Credit Agreement, and the Revolving Credit Agreement each contain a maximum leverage ratio covenant. Under those covenants, we are required to maintain a ratio of (i) total

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

indebtedness minus cash and cash equivalents in excess of \$50 million to (ii) consolidated adjusted EBITDA (as each such term is defined in the agreements) over the last four quarters not to exceed 4.50 to 1.

Indentures for our senior unsecured debt obligations limit our ability to create liens on our assets securing indebtedness and our subsidiaries' assets or merge or consolidate with other companies, our subsidiaries' ability to borrow funds and to engage in change of control transactions, subject to important exceptions and qualifications. The indentures for our 8.875% Senior Notes due 2020, our 10.50% Senior Notes due 2022, and our 11.00% Senior Notes due 2025 contain covenants that are customary for similarly rated issuers. Among other things, these covenants limit our ability to incur additional indebtedness if our leverage ratio exceeds 4.5 to 1 (as defined in the indentures), limits liens and subsidiary debt to 1.25 times EBITDA (as defined in the indentures), limits cumulative restricted payments, including dividends, to cumulative EBITDA less 1.4 times cumulative interest expense (as defined in the indentures), if our leverage ratio does not exceed 4 to 1, and limits cumulative restricted payments, including dividends, to a lesser amount during periods, if any, in which our leverage ratio exceeds 4 to 1, and restricts our ability to divest substantially all of the assets of Frontier.

As of December 31, 2016, we were in compliance with all of our indenture and credit facility covenants.

**Dividends**

We intend to continue to pay regular quarterly dividends on our common and preferred stock. Our ability to fund a regular quarterly dividend will be impacted by our ability to generate cash from operations. Holders of the Series A Preferred Stock are entitled to receive cumulative dividends at an annual rate of 11.125% of the initial liquidation preference of \$100 per share, or \$11.125 per year per share. Series A Preferred Stock dividends of \$214 million and \$120 million were paid during 2016 and 2015, respectively.

The declaration and payment of future dividends on our common stock is at the discretion of our Board of Directors, and will depend upon many factors, including our financial condition, results of operations, growth prospects, funding requirements, payment of cumulative dividends on Series A Preferred Stock, applicable law, restrictions in agreements governing our indebtedness and other factors our Board of Directors deem relevant.

**Off-Balance Sheet Arrangements**

We do not maintain any off-balance sheet arrangements, transactions, obligations or other relationships with unconsolidated entities that would be expected to have a material current or future effect upon our financial statements.

**Future Contractual Obligations and Commitments**

A summary of our future contractual obligations and commercial commitments as of December 31, 2016 is as follows:

(\$ in millions)	Total	Payments due by period					Thereafter
		2017	2018	2019	2020	2021	
Long-term debt obligations, excluding interest	\$ 18,178	\$ 363	\$ 733	\$ 818	\$ 2,429	\$ 2,554	\$ 11,281
Interest on long-term debt	11,263	1,533	1,527	1,465	1,378	1,146	4,214
Operating lease obligations	247	91	18	18	23	21	76
Capital lease obligations	147	39	37	26	15	9	21
Financing lease obligations	105	9	9	9	9	9	60
Purchase obligations	108	42	41	7	6	2	10
Liability for uncertain tax positions	17	8	3	3	3	-	-
Total	\$ 30,085	\$ 2,085	\$ 2,368	\$ 2,346	\$ 3,863	\$ 3,741	\$ 15,662

During 2016, we increased our outstanding performance letters of credit from \$50 million to \$125 million at December 31, 2016.

On April 29, 2015, the FCC released its right of first refusal offer of support to price cap carriers under the CAF Phase II program, which is intended to provide long-term support for broadband in high-cost unserved or underserved areas. In June 2015, Frontier accepted the CAF Phase II offer, which provides for \$332 million in annual support, including \$49 million in annual support related to the properties acquired in the CTF Acquisition,

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

through 2020 to make available 10 Mbps downstream/1 Mbps upstream broadband service to approximately 774,000 households across certain of the 29 states where we now operate.

To the extent we do not enable the required number of households with 10 Mbps downstream/1 Mbps upstream broadband service by the end of the CAF Phase II term, we will be required to return a portion of the funds previously received.

**Critical Accounting Policies and Estimates**

The preparation of our financial statements requires management to make estimates and assumptions. There are inherent uncertainties with respect to such estimates and assumptions; accordingly, it is possible that actual results could differ from those estimates and changes to estimates could occur in the near term. The estimates which require the most significant judgment are listed below.

These critical accounting estimates have been reviewed with our independent registered public accounting firm and with the Audit Committee of our Board of Directors. For a discussion of these and other accounting policies, see Note 1 of the Notes to Consolidated Financial Statements.

**Allowance for Doubtful Accounts**

We maintain an allowance for doubtful accounts based on our estimate of our ability to collect accounts receivable. Our estimates are based on assumptions and other considerations, including payment history, customer financial performance, carrier billing disputes and aging analysis. Our estimation process includes general and specific reserves and varies by customer category. In 2016 and 2015, we had no "critical estimates" related to bankruptcies of communications companies or any other significant customers. See Notes 1 and 4 of the Notes to Consolidated Financial Statements for additional discussion.

**Indefinite-lived Intangibles**

Our indefinite-lived intangibles consist of goodwill and trade name, which were generated as a result of business combinations. We test for impairment of these assets annually as of December 31, or more frequently, whenever events occur or facts and circumstances change that would more likely than not reduce the fair value of an operating segment below its carrying amount. Events that might indicate impairment include, but are not limited to, strategic decisions made in response to economic and competitive conditions, the impact of the economic environment on our customer base, material negative changes in relationships with significant customers, and/or a significant decline in our stock price for a sustained period.

We perform the two-step goodwill impairment test to identify potential goodwill impairment and measure the amount of a goodwill impairment loss to be recognized, if any. The first step in the goodwill impairment test compares the carrying value of net assets of the operating segment to its fair value. If the fair value exceeds the carrying value, no further testing is required. However, if the fair value is less than the carrying value, an indication of impairment exists and a second step is performed. These tests are performed at the reporting unit level, which at December 31, 2016, was our seven regional operating segments. In early 2017, we will evaluate changes to the management reporting that our chief operating decision makers review from this regional construct to a functional construct including consumer, commercial, operations and engineering, which may lead to different operating segments.

We use a market multiples approach to determine fair value. Marketplace company comparisons and analyst reports have historically supported a range of fair values of multiples between 5.0x and 7.9x annualized EBITDA. For the purpose of the goodwill impairment test we define 2016 EBITDA as operating income, net of acquisition and integration costs, non-cash pension and OPEB costs, and restructuring costs and other charges, plus depreciation and amortization. We estimated the enterprise fair value using a multiple of 5.8x EBITDA. Once determined, this estimate of enterprise fair value is then allocated to the operating segments based upon each unit's relative share of consolidated EBITDA. The result of this first step indicated that fair values of each operating segment exceed their carrying values. As a result, the second step of the goodwill impairment test was not required. As an additional step to corroborate the results of the first step of the impairment test, we complete a reconciliation of our market capitalization and overall enterprise value to the fair value of all of our operating segments.

The enterprise fair value is sensitive to the amount of EBITDA generated by Frontier and the EBITDA multiple used in the calculation. Significant changes in the assumptions or estimates used in our impairment analyses, such as a reduction in profitability and/or cash flows, could result in a non-cash goodwill and indefinite-lived intangible asset impairment charge and materially affect our operating results. If the assumptions for either of our EBITDA or EBITDA multiple were to decrease by 10% there would be an indication of impairment. Declines in our stock price

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

could also affect the reconciliation of our market capitalization and overall enterprise value to the fair value of all of our operating segments and indicate impairment. For more information on goodwill, see Note 6 of the Notes to Consolidated Financial Statements.

*Depreciation and Amortization*

The calculation of depreciation and amortization expense is based upon the estimated useful lives of the underlying property, plant and equipment and identifiable finite-lived intangible assets. Depreciation expense is principally based on the composite group method for substantially all of our property, plant and equipment assets. The estimates for remaining lives of the various asset categories are determined annually, based on an independent study. Among other considerations, these studies include models that consider actual usage, replacement history and assumptions about technology evolution for each category of asset. The latest study was completed in the fourth quarter of 2016 and did not result in any significant changes in remaining lives for any of our asset categories. A one year decrease in the estimated useful lives of our property, plant and equipment would result in an increase of approximately \$157 million to depreciation expense.

Our finite-lived intangibles consist principally of customer base; \$2,428 million from the 2010 Acquisition, \$570 million from the Connecticut Acquisition and \$2,090 million from the recently completed CTF Acquisition. These customer bases are being amortized on an accelerated method because this method most closely resembles the projected underlying revenue streams. In assigning lives, which range from between eight and 12 years, a separate evaluation and determination is made for residential and business customers.

See Notes 5 and 6 of the Notes to Consolidated Financial Statements for additional discussion.

*Asset Impairments*

We review long-lived assets to be held and used, including customer lists and long-lived assets to be disposed of for impairment at least annually or whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is measured by comparing the carrying amount of the asset to the estimated fair value, which is based on the future undiscounted net cash flows expected to be generated by the asset. Recoverability of assets held for sale is measured by comparing the carrying amount of the assets to their estimated fair market value. If any assets are considered to be impaired, the impairment is measured by the amount by which the carrying amount of the assets exceeds the estimated fair value. Also, we periodically reassess the useful lives of our tangible and intangible assets to determine whether any changes are required.

*Pension and Other Postretirement Benefits*

We sponsor a defined benefit pension plan covering a significant number of our current and former employees as well as other postretirement benefit plans that provide medical, dental, life insurance and other benefits for covered retired employees and their beneficiaries and covered dependents. As of December 31, 2016, the unfunded benefit obligation for these plans recorded on our consolidated balance sheet was \$1,625 million. During 2016, we contributed \$28 million to these plans and recorded \$155 million of expense before capitalization, including \$26 million of special termination benefits. Pension and other postretirement benefit costs and obligations are dependent upon various actuarial assumptions, the most significant of which are the discount rate and the expected long-term rate of return on plan assets.

Our discount rate assumption is determined annually with assistance from our actuaries based on the pattern of expected future benefit payments and the prevailing rates available on long-term, high quality corporate bonds with durations approximate to that of our benefit obligation. As of December 31, 2016 and 2015, we utilized an estimation technique that is based upon a settlement model (Bond:Link) that permits us to closely match cash flows to the expected payments to participants. This rate can change from year-to-year based on market conditions that affect corporate bond yields.

We are utilizing a discount rate of 4.10% as of December 31, 2016 for our qualified pension plan, compared to rates of 4.50% and 4.10% in 2015 and 2014, respectively. The discount rate for postretirement plans as of December 31, 2016 was a range of 4.10% to 4.30% compared to a range of 4.50% to 4.70% in 2015 and 4.10% to 4.20% in 2014.

In the following table, we show the estimated sensitivity of our pension and other postretirement benefit plan liabilities to a 25 basis point change in the discount rate as of December 31, 2016:

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

<i>(\$ in millions)</i>	Increase in Discount Rate of 25 bps	Decrease in Discount Rate of 25 bps
Pension plans		
Projected benefit obligation	\$ (81)	\$ 84
Other postretirement plans		
Accumulated postretirement benefit obligation	\$ (33)	\$ 34

In developing the expected long-term rate of return assumption, we considered published surveys of expected market returns, 10 and 20 year actual returns of various major indices, and our own historical 5 year, 10 year and 20 year investment returns. The expected long-term rate of return on plan assets is based on an asset allocation assumption of 40% in long-duration fixed income securities, and 60% in equity securities and other investments. We review our asset allocation at least annually and make changes when considered appropriate. Our asset return assumption is made at the beginning of our fiscal year. In 2016, 2015 and 2014, our expected long-term rate of return on plan assets was 7.50%, 7.75% and 7.75%, respectively. Our actual return on plan assets in 2016 was 10.39%. For 2017, we will assume a rate of return of 7.50%. Our pension plan assets are valued at fair value as of the measurement date.

For additional information regarding our pension and other postretirement benefits see Note 17 to the Notes to Consolidated Financial Statements.

**Income Taxes**

We file a consolidated federal income tax return. We utilize the asset and liability method of accounting for income taxes. Under the asset and liability method, deferred income taxes are recorded for the tax effect of temporary differences between the financial statement basis and the tax basis of assets and liabilities using tax rates expected to be in effect when the temporary differences are expected to reverse. Actual income taxes could vary from these estimates due to future changes in governing law or review by taxing authorities.

We use a "more likely than not" threshold to the recognition and derecognition of uncertain tax positions either taken or expected to be taken in Frontier's income tax returns. The total amount of our gross tax liability for tax positions that may not be sustained under a "more likely than not" threshold amounts to \$17 million as of December 31, 2016 including interest of \$1 million. For additional information regarding our accounting for income taxes see Note 12 of the Notes to Consolidated Financial Statements.

**Business Combinations**

We allocate the total cost of an acquisition to the underlying net assets based on their respective estimated fair values. As part of this allocation process, we identify and attribute values and estimated lives to the intangible assets acquired. These determinations involve significant estimates and assumptions about several highly subjective variables, including future cash flows, discount rates, and asset lives. There are also different valuation models for each component, the selection of which requires considerable judgment. Our estimates and assumptions may be based, in part, on the availability of listed market prices or other transparent market data. These determinations will affect the amount of amortization expense recognized in future periods. We base our fair value estimates on assumptions we believe are reasonable, but recognize that the assumptions are inherently uncertain. Depending on the size of the purchase price of a particular acquisition and the mix of intangible assets acquired, the purchase price allocation could be materially impacted by applying a different set of assumptions and estimates. Frontier allocated \$9,871 million and \$2,018 million in total consideration to the "fair market value" of the assets and liabilities acquired in the CTF Acquisition and the Connecticut Acquisition, respectively. The estimates of the fair values assigned to property, plant and equipment, customer list and goodwill, are more fully described in Note 3 of the Notes to Consolidated Financial Statements.

**Recent Accounting Pronouncements**

See Note 2 of the Notes to Consolidated Financial Statements included in Part IV of this report for additional information related to recent accounting pronouncements.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Item 7A. Quantitative and Qualitative Disclosures about Market Risk**

We are exposed to market risk in the normal course of our business operations due to ongoing investing and funding activities, including those associated with our pension plan assets. Market risk refers to the potential change in fair value of a financial instrument as a result of fluctuations in interest rates and equity prices. We do not hold or issue derivative instruments, derivative commodity instruments or other financial instruments for trading purposes. As a result, we do not undertake any specific actions to cover our exposure to market risks, and we are not party to any market risk management agreements other than in the normal course of business. Our primary market risk exposures from interest rate risk and equity price risk are as follows:

**Interest Rate Exposure**

Our exposure to market risk for changes in interest rates relates primarily to the interest-bearing portion of our pension investment portfolio and the related actuarial liability for pension obligations, as well as our floating rate indebtedness. As of December 31, 2016, 88% of our long-term debt had fixed interest rates. We had no interest rate swap agreements related to our fixed rate debt in effect at December 31, 2016 and 2015. We believe that our currently outstanding obligation exposure to interest rate changes is minimal.

Our objectives in managing our interest rate risk are to limit the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, only \$2,151 million of our outstanding borrowings at December 31, 2016 have floating interest rates. Our undrawn \$750 million revolving credit facility has interest rates that float with the LIBO Rate, as defined. Consequently, we have limited material future earnings or cash flow exposures from changes in interest rates on our debt. An adverse change in interest rates would increase the amount that we pay on our variable rate obligations and could result in fluctuations in the fair value of our fixed rate obligations. Based upon our overall interest rate exposure at December 31, 2016, a near-term change in interest rates would not materially affect our consolidated financial position, results of operations or cash flows.

At December 31, 2016, the fair value of our long-term debt was estimated to be approximately \$17.5 billion, based on prevailing interest rates, our overall weighted average borrowing rate of 8.55% and our overall weighted average maturity of approximately eight years. As of December 31, 2016, there has been no significant change in the weighted average maturity applicable to our obligations since December 31, 2015.

**Equity Price Exposure**

Our exposure to market risks for changes in equity security prices as of December 31, 2016 is limited to our pension plan assets. We have no other security investments of any significant amount.

Our pension plan assets increased from \$1,572 million at December 31, 2015 to \$2,766 million at December 31, 2016, an increase of \$1,194 million, or 76%. This increase was a result of cash transfers and accounts receivable from Verizon and the Verizon pension plan trusts of \$1,125 million related to the CTF Acquisition, positive investment returns of \$195 million, net of investment management and administrative fees, and contributions of \$28 million, partially offset by benefit payments of \$154 million.

**Item 8. Financial Statements and Supplementary Data**

The following documents are filed as part of this Report:

1. Financial Statements - See Index on page F-1.
2. Supplementary Data - Quarterly Financial Data is included in the Financial Statements (see 1. above).

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures****(i) Evaluation of Disclosure Controls and Procedures**

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, regarding the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based upon this evaluation, our principal executive officer and principal financial officer concluded, as of the end of the period covered by this report, December 31, 2016, that our disclosure controls and procedures were effective.

**(ii) Internal Control Over Financial Reporting****(a) Management's annual report on internal control over financial reporting**

Our management report on internal control over financial reporting appears on page F-2.

**(b) Report of registered public accounting firm**

The report of KPMG LLP, our independent registered public accounting firm, on internal control over financial reporting appears on page F-4.

**(c) Changes in internal control over financial reporting**

We reviewed our internal control over financial reporting at December 31, 2016. There have been no changes in our internal control over financial reporting identified in an evaluation thereof that occurred during the last fiscal quarter of 2016 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Item 9B. Other Information**

None.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

**PART III****Item 10. Directors, Executive Officers and Corporate Governance**

Certain of the information required by this Item is incorporated by reference from our definitive proxy statement for the 2017 Annual Meeting of Stockholders to be filed with the SEC pursuant to Regulation 14A within 120 days after December 31, 2016.

**Executive Officers of the Registrant**

Our Executive Officers as of February 10, 2017 were:

<u>Name</u>	<u>Age</u>	<u>Current Position and Officer</u>
Kenneth A. Arndt	52	Executive Vice President, Commercial Sales Operations
Donald Daniels	49	Senior Vice President and Controller
Steve Gable	43	Executive Vice President and Chief Technology Officer
John J. Lass	60	Executive Vice President, Customer Operations
R. Perley McBride	51	Executive Vice President and Chief Financial Officer
Daniel J. McCarthy	52	President and Chief Executive Officer and a Director
Cecilia K. McKenney	54	Executive Vice President and Chief Customer Officer
Mark D. Nielsen	52	Executive Vice President and Chief Legal Officer
Tim Travaille	59	Executive Vice President, Operational Transformation
Kathleen Weslock	61	Executive Vice President and Chief People Officer

There is no family relationship between the directors or executive officers. The term of office of each of the foregoing officers of Frontier is annual and will continue until a successor (if any) has been elected and qualified.

KENNETH A. ARNDT has been with Frontier since 2003 and was appointed Executive Vice President, Commercial Sales Operations, in December 2016. Mr. Arndt previously had oversight of Frontier's operations in Connecticut, New York, Ohio, Pennsylvania and West Virginia. Before joining Frontier, Mr. Arndt served as Vice President of Marketing for Lucent Technologies and Vice President of Sales and Marketing for Commonwealth Telephone Company in Pennsylvania.

DONALD DANIELS joined Frontier in July 2014 as Senior Vice President and Controller. From October 2002 to July 2014 he held various positions with JetBlue Airways Corporation, including Corporate Controller, Chief Accounting Officer, Vice President and Controller, Assistant Controller, and Director of Financial Reporting. Prior to that Mr. Daniels held various positions of increasing responsibility at Delta Air Lines and Deloitte and Touche, LLP. Mr. Daniels is a veteran of the United States Army and a certified public accountant.

STEVE GABLE became Executive Vice President and Chief Technology Officer of Frontier in April 2015. He joined Frontier in November 2012 as Senior Vice President and Chief Information Officer. Prior to Frontier, Mr. Gable was Executive Vice President/CTO of Tribune Company while also serving as President of Tribune Digital. Before Tribune, Mr. Gable served as Vice President of Technology for Clear Channel Radio.

JOHN J. LASS has been with Frontier since 1980 and was appointed Executive Vice President, Customer Operations, in November 2016. Previously, Mr. Lass was Executive Vice President, Field Operations. He has also served as President of Frontier's Central Region (comprising Illinois, Indiana, Iowa, Michigan, Minnesota and Nebraska), Vice President of Revenue Assurance and as Regional Operations Vice President at Frontier, Vice President and General Manager of Citizens Utilities Vermont Electric Division, and has held operations positions in New York and the Midwest with Frontier, GTE and Contel.

R. PERLEY MCBRIDE became Chief Financial Officer and Executive Vice President of Frontier on November 4, 2016. Prior to joining Frontier, Mr. McBride was the Chief Financial Officer of Cable & Wireless Communications Plc until its May 2016 acquisition by Liberty Global plc. Previously, Mr. McBride served as Chief Financial Officer at Leap Wireless International from December 2012 through May 2014 and was part of the Executive team that led the business through its acquisition by AT&T Inc. Prior to Leap Wireless, he served as Executive Vice President of Finance at The Weather Company, owner of The Weather Channel among other assets, between 2010 and 2012. He also served in several senior financial management roles at Frontier between 1999 and 2010, and also between 1994 and 1997.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

DANIEL J. MCCARTHY has been with Frontier since December 1990 and is the President and Chief Executive Officer. Prior to becoming President and Chief Executive Officer in April 2015, Mr. McCarthy held other positions of responsibility at Frontier, including President and Chief Operating Officer, from April 2012 to April 2015, Executive Vice President and Chief Operating Officer, from January 2006 to April 2012, and Senior Vice President, Field Operations, from December 2004 to December 2005. Mr. McCarthy serves as a Trustee of Sacred Heart University in Fairfield, Connecticut, and of Foundations in Education for the Diocese of Bridgeport, Connecticut. He is a member of the Board of Directors of the Western Connecticut Health Network, the Board of Directors of the Business Council of Fairfield County, and a member of the Business Roundtable. He is also a director of Constellation Brands, Inc.

CECILIA K. MCKENNEY has been with Frontier since February 2006. She is currently Executive Vice President and Chief Customer Officer. Before this, she was Executive Vice President, Frontier Secure and Administration. Previously, she was Executive Vice President, Human Resources and Sales Operations from May 2012 to January 2013, Executive Vice President, Human Resources and Call Center Sales & Service from February 2008 to May 2012 and Senior Vice President, Human Resources from February 2006 to February 2008. Prior to joining Frontier, she was Group Vice President, Headquarters Human Resources, of The Pepsi Bottling Group (PBG) from 2004 to 2005. Previously at PBG Ms. McKenney was Vice President, Headquarters Human Resources from 2000 to 2004.

MARK D. NIELSEN joined Frontier in March 2014 and is Executive Vice President and Chief Legal Officer. Prior to joining Frontier, he was Associate General Counsel and Chief Compliance Officer for Praxair Inc. and Vice President and Assistant General Counsel of Raytheon Company. Before that, Mr. Nielsen served as Chief Legal Counsel, and then Chief of Staff, to Massachusetts Governor Mitt Romney from 2004 to 2007.

TIM TRAVAILLE has been with Frontier since 2010 and is Executive Vice President, Operational Transformation. Previously, he held other positions at Frontier, including Senior Vice President of Integration, Chief Information Officer and General Manager for Frontier in Washington State.

KATHLEEN WESLOCK joined Frontier as Executive Vice President and Chief People Officer in July 2015. Previously, she had worked as Senior Vice President/Chief Human Resources Officer at Cisco Systems, Inc. and Senior Vice President, Chief Human Resources Officer & Internal Communications, at SunGard Data Systems. She has also worked as Director of Human Resources, Financial Advisory Services, at Deloitte and Director of Global Human Resources at the global law firm Shearman & Sterling.

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

PART IV**Item 15. Exhibits and Financial Statement Schedules**

List of Documents Filed as a Part of This Report:

## (1) Index to Consolidated Financial Statements:

Reports of Independent Registered Public Accounting Firm

Consolidated Balance Sheets as of December 31, 2016 and 2015

Consolidated Statements of Operations for the years ended December 31, 2016, 2015 and 2014

Consolidated Statements of Comprehensive Loss for the years ended December 31, 2016, 2015 and 2014

Consolidated Statements of Equity for the years ended December 31, 2016, 2015 and 2014

Consolidated Statements of Cash Flows for the years ended December 31, 2016, 2015 and 2014

Notes to Consolidated Financial Statements

All other schedules have been omitted because the required information is included in the consolidated financial statements or the notes thereto, or is not applicable or not required.

## (2) Index to Exhibits:

All documents referenced below were filed pursuant to the Securities Exchange Act of 1934 by Frontier, file number 001-11001, unless otherwise indicated.

<u>Exhibit No.</u>	<u>Description</u>
2.1	Stock Purchase Agreement, dated as of December 16, 2013, by and between AT&T Inc. and Frontier (filed as Exhibit 2.1 to Frontier's Current Report on Form 8-K filed on December 17, 2013).*
2.2	Securities Purchase Agreement, dated as of February 5, 2015, by and between Verizon Communications Inc. and Frontier (filed as Exhibit 2.1 to Frontier's Current Report on Form 8-K filed on February 5, 2015).*
3.1	Restated Certificate of Incorporation (filed as Exhibit 3.200.1 to Frontier's Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2000).*
3.2	Certificate of Amendment of Restated Certificate of Incorporation, effective July 31, 2008 (filed as Exhibit 3.1 to Frontier's Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2008).*
3.3	Certificate of Amendment of Restated Certificate of Incorporation, effective June 28, 2010 (filed as Exhibit 99.2 to Frontier's Current Report on Form 8-K filed July 1, 2010).*
3.4	By-laws, as amended February 6, 2009 (filed as Exhibit 99.1 to Frontier's Current Report on Form 8-K filed on February 6, 2009).*
3.5	Certificate of Designations of 11.125% Mandatory Convertible Preferred Stock, Series A (filed as Exhibit 3.5 to the Current Report on Form 8-K filed on June 10, 2015).*
4.1	Indenture of Securities, dated as of August 15, 1991, between Frontier and JPMorgan Chase Bank, N.A. (as successor to Chemical Bank), as Trustee (the "August 1991 Indenture") (filed as Exhibit 4.100.1 to Frontier's Quarterly Report on Form 10-Q for the fiscal quarter ended September 30, 1991).*
4.2	Fourth Supplemental Indenture to the August 1991 Indenture, dated October 1, 1994, between Frontier and JPMorgan Chase Bank, N.A. (as successor to Chemical Bank), as Trustee, with respect to 7.68% Debentures due 2034 (filed as Exhibit 4.100.7 to Frontier's Current Report on Form 8-K filed on January 3, 1995).*
4.3	Fifth Supplemental Indenture to the August 1991 Indenture, dated as of June 15, 1995, between Frontier and JPMorgan Chase Bank, N.A. (as successor to Chemical Bank), as Trustee, with respect to 7.45% Debentures due 2035 (filed as Exhibit 4.100.8 to Frontier's Current Report on Form 8-K filed on March 29, 1996 (the "March 29, 1996 8-K")).*
4.4	Sixth Supplemental Indenture to the August 1991 Indenture, dated as of October 15, 1995, between Frontier and JPMorgan Chase Bank, N.A. (as successor to Chemical Bank), as Trustee, with respect to 7% Debentures due 2025 (filed as Exhibit 4.100.9 to the March 29, 1996 8-K).*

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

- 4.5 Seventh Supplemental Indenture to the August 1991 Indenture, dated as of June 1, 1996, between Frontier and JPMorgan Chase Bank, N.A. (as successor to Chemical Bank), as Trustee, with respect to 6.8% Debentures due 2026 (filed as Exhibit 4.100.11 to Frontier's Annual Report on Form 10-K for the year ended December 31, 1996 (the "1996 10-K")).\*
- 4.6 Eighth Supplemental Indenture to the August 1991 Indenture, dated as of December 1, 1996, between Frontier and JPMorgan Chase Bank, N.A. (as successor to Chemical Bank), as Trustee, with respect to 7.05% Debentures due 2046 (filed as Exhibit 4.100.12 to the 1996 10-K).\*
- 4.7 Indenture, dated as of August 16, 2001, between Frontier and JPMorgan Chase Bank, N.A. (as successor to The Chase Manhattan Bank), as Trustee, with respect to 9% Senior Notes due 2031 (including the form of note attached thereto) (filed as Exhibit 4.1 of Frontier's Current Report on Form 8-K filed on August 22, 2001).\*
- 4.8 Indenture, dated as of December 22, 2006, between Frontier and The Bank of New York, as Trustee, with respect to 7.875% Senior Notes due 2027 (including the form of note attached thereto) (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on December 29, 2006).\*
- 4.9 Indenture dated as of March 23, 2007 by and between Frontier and The Bank of New York with respect to the 7.125% Senior Notes due 2019 (including the form of such note attached thereto) (filed as Exhibit 4.2 to the March 27, 2007 8-K).\*
- 4.10 Indenture dated as of April 9, 2009, between Frontier and The Bank of New York Mellon, as Trustee (the "April 2009 Indenture") (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on April 9, 2009 (the "April 9, 2009 8-K")).\*
- 4.11 Second Supplemental Indenture to the April 2009 Indenture, dated as of October 1, 2009, between Frontier and The Bank of New York Mellon, as Trustee, with respect to 8.125% Senior Notes due 2018 (including the form of note attached thereto) (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on October 1, 2009).\*
- 4.12 Third Supplemental Indenture to the April 2009 Indenture, dated as of May 22, 2012, between Frontier and The Bank of New York Mellon, as Trustee, with respect to 9.25% Senior Notes due 2021 (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on May 22, 2012 (the "May 22, 2012 8-K")).\*
- 4.13 Form of Senior Note due 2021 (filed as Exhibit 4.2 to the May 22, 2012 8-K).\*
- 4.14 Fourth Supplemental Indenture to the April 2009 Indenture, dated as of August 15, 2012, between Frontier and The Bank of New York Mellon, as Trustee, with respect to 7.125% Senior Notes due 2023 (the "Fourth Supplement to April 2010 Indenture") (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on August 15, 2012 (the "August 15, 2012 8-K")).\*
- 4.15 Form of Senior Note due 2023 (filed as Exhibit 4.2 to the August 15, 2012 8-K).\*
- 4.16 First Amendment to the Fourth Supplement to April 2009 Indenture, dated as of October 1, 2012, between Frontier and The Bank of New York Mellon, as Trustee, with respect to 7.125% Senior Notes due 2023 (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on October 1, 2012).\*
- 4.17 Fifth Supplemental Indenture to the April 2009 Indenture, dated as of April 10, 2013, between Frontier and The Bank of New York Mellon, as Trustee, with respect to 7.625% Senior Notes due 2024 (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on April 10, 2013 (the "April 10, 2013 8-K")).\*
- 4.18 Sixth Supplemental Indenture to the April 2009 Indenture, dated as of September 17, 2014, between Frontier Communications Corporation and The Bank of New York Mellon, as Trustee (including the form of 6.250% Senior Notes due 2021) (filed as Exhibit 4.1 to Frontier's Current Report on Form 8-K filed on September 17, 2014 (the "September 17, 2014 8-K")).\*
- 4.19 Seventh Supplemental Indenture to the April 2009 Indenture, dated as of September 17, 2014, between Frontier Communications Corporation and The Bank of New York Mellon, as Trustee, with respect to 6.875% Senior Notes due 2025 (including the form of notes attached thereto) (filed as Exhibit 4.2 to the September 17, 2014 8-K).\*
- 4.20 Form of Senior Note due 2024 (filed as Exhibit 4.2 to the April 10, 2013 8-K).\*
- 4.21 Indenture, dated as of April 12, 2010 (the "April 2010 Indenture"), as amended, between New Communications Holdings Inc. ("Spinco") and The Bank of New York Mellon, as Trustee (including the forms of notes attached thereto) (filed as Exhibit 4.22 to Spinco's Registration Statement on Form 10 filed on April 20, 2010 (File No. 000-53950) (the "Spinco Form 10")).\*
- 4.22 First Supplemental Indenture to the April 2010 Indenture, dated as of July 1, 2010, between Frontier and The Bank of New York Mellon, as Trustee, with respect to 7.875% Senior Notes due 2015, 8.25% Senior Notes due 2017, 8.5% Senior Notes due 2020, and 8.75% Senior Notes due 2022 (filed as Exhibit 4.2 to Frontier's Registration Statement on Form S-4 filed on July 2, 2010 (File No. 333-167962)).\*
- 4.23 Indenture, dated as of January 1, 1994, between Frontier North Inc. (formerly GTE North Incorporated) and Bank of New York Mellon (as successor to The First National Bank of Chicago), as Trustee (the "Frontier North Indenture") (filed as Exhibit 4.1 to Frontier's Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2010).\*

## FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES

- 4.24 First Supplemental Indenture to the Frontier North Indenture, dated as of May 1, 1996, between Frontier North Inc. (formerly GTE North Incorporated) and Bank of New York Mellon (as successor to The First National Bank of Chicago), as Trustee (filed as Exhibit 4.2 to Frontier's Quarterly Report on Form 10-Q for the fiscal quarter ended June 30, 2010).\*
- 4.25 Form of Debenture under the Frontier North Indenture (filed as Exhibit 4.24 to Frontier's Annual Report on Form 10-K for the year ended December 31, 2011 (the "2011 10-K")).\*
- 4.26 Base Indenture, dated as of September 25, 2015 (the "2015 Base Indenture"), between Frontier Communications Corporation and The Bank of New York Mellon, as trustee (filed as Exhibit 4.1 to Frontier's Quarterly Report on Form 10-Q for the fiscal quarter ended September 30, 2015 (the "September 30, 2015 10-Q")).\*
- 4.27 First Supplemental Indenture to the 2015 Base Indenture, dated as of September 25, 2015, between Frontier Communications Corporation and The Bank of New York Mellon, as trustee, with respect to 8.875% Senior Notes due 2020 (including the forms of notes attached thereto) (filed as Exhibit 4.2 to the September 30, 2015 10-Q).\*
- 4.28 Second Supplemental Indenture to the 2015 Base Indenture, dated as of September 25, 2015, between Frontier Communications Corporation and The Bank of New York Mellon, as trustee, with respect to 10.500% Senior Notes due 2022 (including the forms of notes attached thereto) (filed as Exhibit 4.3 to the September 30, 2015 10-Q).\*

**Management's Report On Internal Control Over Financial Reporting**

The Board of Directors and Shareholders  
Frontier Communications Corporation:

The management of Frontier Communications Corporation and subsidiaries is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f).

Under the supervision and with the participation of our management, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2016.

Our independent registered public accounting firm, KPMG LLP, has audited the consolidated financial statements included in this report and, as part of their audit, has issued their report, included herein, on the effectiveness of our internal control over financial reporting.

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Stockholders  
Frontier Communications Corporation:

We have audited the accompanying consolidated balance sheets of Frontier Communications Corporation and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive loss, equity and cash flows for each of the years in the three-year period ended December 31, 2016. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Frontier Communications Corporation and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Frontier Communications Corporation and subsidiaries internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2017 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Stockholders  
Frontier Communications Corporation:

We have audited Frontier Communications Corporation and subsidiaries' internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Frontier Communications Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report On Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Frontier Communications Corporation and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in Internal Control – Integrated Framework (2013) issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Frontier Communications Corporation and subsidiaries as of December 31, 2016 and 2015, and the related consolidated statements of operations, comprehensive loss, equity and cash flows for each of the years in the three-year period ended December 31, 2016, and our report dated February 28, 2017 expressed an unqualified opinion on those consolidated financial statements.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements(1) Description of Business and Summary of Significant Accounting Policies:(a) Description of Business:

Frontier Communications Corporation (Frontier) is the fourth largest Incumbent Local Exchange Carrier (ILEC) in the United States, with approximately 5.4 million customers, 4.3 million broadband subscribers and 28,300 employees, operating in 29 states. Frontier was incorporated in 1935, originally under the name of Citizens Utilities Company and was known as Citizens Communications Company until July 31, 2008. Frontier and its subsidiaries are referred to as "we," "us," "our," "Frontier," or the "Company" in this report.

Effective April 1, 2016, Frontier's scope of operations and balance sheet changed materially as a result of the completion of the CTF Acquisition, as described in Note 3 - Acquisitions. Historical financial data presented for Frontier is not indicative of the future financial position or operating results for Frontier, and includes the results of the CTF Operations, as defined in Note 3 - Acquisitions, from the date of acquisition on April 1, 2016.

(b) Basis of Presentation and Use of Estimates:

Our consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). Certain reclassifications of amounts previously reported have been made to conform to the current presentation. All significant intercompany balances and transactions have been eliminated in consolidation.

For our financial statements as of and for the period ended December 31, 2016, we evaluated subsequent events and transactions for potential recognition or disclosure through the date that we filed this Form 10-K with the Securities and Exchange Commission (SEC).

The preparation of our financial statements in conformity with GAAP requires management to make estimates and assumptions that affect (i) the reported amounts of assets and liabilities at the date of the financial statements, (ii) the disclosure of contingent assets and liabilities, and (iii) the reported amounts of revenue and expenses during the reporting period. Actual results may differ from those estimates. Estimates and judgments are used when accounting for the allowance for doubtful accounts, asset impairments, indefinite-lived intangibles, depreciation and amortization, income taxes, business combinations, and pension and other postretirement benefits, among others.

(c) Cash Equivalents:

We consider all highly liquid investments with an original maturity of three months or less to be cash equivalents.

(d) Revenue Recognition:

Revenue is recognized when services are provided or when products are delivered to customers. Revenue that is billed in advance includes monthly recurring network access services (including data services), special access services and monthly recurring voice, video and related charges. The unearned portion of these fees is initially deferred as a component of "Advanced billings" on our consolidated balance sheet and recognized as revenue over the period that the services are provided. Revenue that is billed in arrears includes non-recurring network access services (including data services), switched access services and non-recurring voice and video services. The earned but unbilled portion of these fees is recognized as revenue in our consolidated statements of operations and accrued in "Accounts Receivable" on our consolidated balance sheet in the period that the services are provided. Excise taxes are recognized as a liability when billed. Installation fees and their related direct and incremental costs are initially deferred and recognized as revenue and expense over the average term of a customer relationship. We recognize as current period expense the portion of installation costs that exceeds installation fee revenue.

We maintain an allowance for doubtful accounts based on an estimate of our ability to collect accounts receivable. At December 31, 2016, our accounts receivable balances, including balances for delinquent accounts, were higher than usual as a result of planned delays in collection efforts for certain new customers acquired in the CTF Acquisition. These payment delays are customary for us after large acquisitions in order

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

to allow for resolution of any service or billing issues for new customers. Our allowance for doubtful accounts was adjusted to reflect our best estimate of collectability.

Frontier collects various taxes from its customers and subsequently remits these taxes to governmental authorities. Substantially all of these taxes are recorded through the consolidated balance sheet and presented on a net basis in our consolidated statements of operations. We also collect Universal Service Fund (USF) surcharges from customers (primarily federal USF) that we have recorded on a gross basis in our consolidated statements of operations and included within "Revenue" and "Network related expenses" of \$217 million, \$151 million and \$125 million for the years ended December 31, 2016, 2015 and 2014, respectively.

In 2015 we accepted the FCC's Connect America Fund (CAF) Phase II offer of support, which is a successor to and augments the USF frozen high cost support that we had been receiving pursuant to a 2011 FCC order. Upon completion of the CTF Acquisition, Frontier assumed the CAF Phase II support and related obligations that Verizon had previously accepted with regard to California and Texas. CAF Phase II funding is a program intended to subsidize the high cost of establishing and delivering communications services to certain unserved or underserved areas. We are recognizing these subsidies into revenue on a straight line basis, which is consistent with how the costs related to these subsidies are being and are expected to be incurred. CAF Phase II is a multi-year program which requires us to deploy broadband to a specified number of households in each of the states where funding was accepted. Failure to meet our deployment obligations at the end of the program in 2020 will result in a return of a portion of the funding received. We regularly evaluate our ability to meet our broadband deployment obligations and adjust revenue accordingly.

We categorize our products, services and other revenues among the following five categories:

- *Voice services* include traditional local and long distance wireline services, Voice over Internet Protocol (VoIP) services, as well as a number of unified messaging services offered to our residential and business customers. Voice services also include the long distance voice origination and termination services that we provide to our business customers and other carriers;
- *Data and Internet services* include broadband services for residential and business customers. We provide data transmission services to high volume business customers and other carriers with dedicated high capacity circuits ("nonswitched access") including services to wireless providers ("wireless backhaul");
- *Video services* include revenues generated from services provided directly to residential customers through the FiOS® and Vantage video brands, and through DISH® satellite TV services;
- *Other customer revenue* includes sales of customer premise equipment to our business customers and directory services, less our provision for bad debts; and
- *Switched Access and Subsidy* revenues include revenues derived from allowing other carriers to use our network to originate and/or terminate their local and long distance voice traffic ("switched access"). These services are primarily billed on a minutes-of-use basis applying tariffed rates filed with the FCC or state agencies. We also receive cost subsidies from state and federal authorities, including the Connect America Fund Phase II.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The following table provides a summary of revenues from external customers by the categories of Frontier's products and services:

(\$ in millions)	For the year ended December 31,		
	2016	2015	2014
Voice services	\$ 2,866	\$ 2,022	\$ 1,951
Data and Internet services	3,693	2,337	1,948
Video services	1,244	285	134
Other	276	255	220
Customer revenue	8,099	4,899	4,253
Switched access and subsidy	797	677	519
Total revenue	\$ 8,896	\$ 5,576	\$ 4,772

(e) Property, Plant and Equipment:

Property, plant and equipment are stated at original cost, including capitalized interest, or fair market value as of the date of acquisition for acquired properties. Maintenance and repairs are charged to operating expenses as incurred. The gross book value of routine property, plant and equipment retirements is charged against accumulated depreciation.

(f) Goodwill and Other Intangibles:

Goodwill represents the excess of purchase price over the fair value of identifiable tangible and intangible net assets acquired. We undertake studies to determine the fair values of assets and liabilities acquired and allocate purchase prices to assets and liabilities, including property, plant and equipment, goodwill and other identifiable intangibles. We examine the carrying value of our goodwill and trade name annually as of December 31, or more frequently, as circumstances warrant, to determine whether there are any impairment losses. We test for goodwill impairment at the "operating segment" level, as that term is defined in GAAP. During the second quarter of 2016, Frontier reorganized into seven regional operating segments, which are aggregated into one reportable segment. In conjunction with the reorganization of our operating segments, effective with the second quarter of 2016, we reassigned goodwill to our regional operating segments (reporting units) using a relative fair value allocation approach.

Frontier amortizes finite-lived intangible assets over their estimated useful lives on the accelerated method of sum of the years digits. We review such intangible assets at least annually as of December 31 to assess whether any potential impairment exists and whether factors exist that would necessitate a change in useful life and a different amortization period.

(g) Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of:

We review long-lived assets to be held and used, including customer lists, and long-lived assets to be disposed of for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is measured by comparing the carrying amount of the asset to the future undiscounted net cash flows expected to be generated by the asset. Recoverability of assets held for sale is measured by comparing the carrying amount of the assets to their estimated fair market value. If any assets are considered to be impaired, the impairment is measured by the amount by which the carrying amount of the assets exceeds the estimated fair value. Also, we periodically reassess the useful lives of our tangible and intangible assets to determine whether any changes are required.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

(h) Income Taxes and Deferred Income Taxes:

We file a consolidated federal income tax return. We utilize the asset and liability method of accounting for income taxes. Under the asset and liability method, deferred income taxes are recorded for the tax effect of temporary differences between the financial statement basis and the tax basis of assets and liabilities using tax rates expected to be in effect when the temporary differences are expected to reverse.

(i) Stock Plans:

We have various stock-based compensation plans. Awards under these plans are granted to eligible employees and directors. Awards may be made in the form of incentive stock options, non-qualified stock options, stock appreciation rights, restricted stock, restricted stock units or other stock-based awards, including awards with performance, market and time-vesting conditions. Our general policy is to issue shares from treasury upon the grant of restricted shares, earning of performance shares and the exercise of options.

The compensation cost recognized is based on awards ultimately expected to vest. GAAP requires forfeitures to be estimated and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

(j) Net Income (Loss) Per Share Attributable to Frontier Common Shareholders:

Basic net income (loss) per common share is computed using the weighted average number of common shares outstanding during the period being reported on, excluding unvested restricted stock awards. The impact of dividends paid on unvested restricted stock awards have been deducted in the determination of basic and diluted net income (loss) per share attributable to Frontier common shareholders. Except when the effect would be antidilutive, diluted net income per common share reflects the dilutive effect of certain common stock equivalents, as described further in Note 13 – Net Income (Loss) Per Common Share.

(2) Recent Accounting Pronouncements:***Recently Adopted Accounting Pronouncements******Business Combinations – Measurement Period Adjustments***

In September 2015, the FASB issued ASU No. 2015-16, "Business Combinations – Simplifying the Accounting for Measurement Period Adjustments." This ASU requires that an acquirer recognizes adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments in this Update require that the acquirer record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendments in this Update require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. The new guidance was effective for Frontier on January 1, 2016 and has been applied to the measurement period adjustments related to our CTF Acquisition during 2016.

***Employee Benefit Plans***

In July 2015, the FASB issued ASU No. 2015-12, "Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), and Health and Welfare Benefit Plans (Topic 965)": There are three parts to the ASU that aim to simplify the accounting and presentation of plan accounting. Part I of this ASU requires fully benefit-responsive investment contracts to be measured at contract value instead of the current fair value measurement. Part II of this ASU requires investments (both participant-directed and nonparticipant-directed investments) of employee benefit plans be grouped only by general type, eliminating the need to disaggregate the investments in multiple ways. Part III of this ASU provides a similar measurement date practical expedient for employee benefit plans as available in ASU No. 2015-04, "Compensation – Retirement Benefits (Topic 715)," which allows employers to measure defined benefit plan assets on a month-end date that is nearest to the year's fiscal year-end when the fiscal period does not coincide with a month-end. Parts I and II of the new guidance should be applied on a retrospective basis. Part III of the new guidance

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

should be applied on a prospective basis. The new guidance was effective for Frontier on January 1, 2016 and Frontier has applied the new guidance in its reporting for defined benefit plans completed in 2016.

**Cash Flows -- Classification of Certain Cash Receipts and Cash Payments**

In August 2016, the FASB issued ASU No. 2016-15, "Statement of Cash Flows -- Classification of Certain Cash Receipts and Cash Payments." This ASU addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice. The amendments in this ASU provide guidance on the following cash flow issues: 1) debt prepayment or debt extinguishment costs; 2) settlement of zero-coupon debt instruments; 3) contingent consideration payments made after a business combination; 4) proceeds from the settlement of insurance claims; 5) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies; 6) distributions received from equity method investees; 7) beneficial interests in securitization transactions; and 8) separately identifiable cash flows and application of the predominance principle. The new guidance was early adopted by Frontier in 2016 and Frontier has retrospectively applied the new guidance in our Statement of Cash Flows for 2014, 2015, and 2016.

**Statement of Cash Flows -- Restricted Cash**

In November 2016, the FASB issued ASU No. 2016-18, "Statement of Cash Flows -- Restricted Cash Flows." This ASU requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The amendments in this Update do not provide a definition of restricted cash or restricted cash equivalents. The new guidance was early adopted by Frontier in 2016 and Frontier has retrospectively applied the new guidance in our Statement of Cash Flows for 2014, 2015, and 2016.

**Recent Accounting Pronouncements Not Yet Adopted**

**Revenue Recognition**

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, "Revenue from Contracts with Customers." This standard, along with its related amendments, requires companies to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which Frontier expects to be entitled in exchange for those goods or services. This new standard is effective for annual and interim reporting periods beginning after December 15, 2017. Companies are also permitted to voluntarily adopt the new standard as of the original effective date that was for annual reporting periods beginning after December 15, 2016, however, Frontier does not intend to early adopt. Companies are permitted to either apply the requirements retrospectively to all prior periods presented, or apply the requirements in the year of adoption, through a cumulative adjustment. Frontier has not yet selected a transition method and is currently evaluating the guidance and developing an implementation plan.

**Leases**

In February 2016, the FASB issued ASU No. 2016 - 02, "Leases (Topic 842)." This standard establishes the principles to report transparent and economically neutral information about the assets and liabilities that arise from leases. Upon implementation, lessees will need to recognize almost all leases on their balance sheet as a right-of-use asset and a lease liability. It will be critical to identify leases embedded in a contract to avoid misstating the lessee's balance sheet. For income statement purposes, the FASB retained a dual model, requiring leases to be classified as either operating or finance. Classification will be based on criteria that are largely similar to those applied in current lease accounting, but without explicit bright lines. Lessor accounting is similar to the current model, but updated to align with certain changes to the lessee model and the new revenue recognition standard. Existing sale-leaseback guidance, including guidance for real estate, is replaced with a new model applicable to both lessees and lessors. The new guidance is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. Frontier is currently evaluating the impact of adopting the new standard, but has not yet determined the impact of adoption on its consolidated financial statements.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial StatementsCompensation – Stock Compensation

In March 2016, the FASB issued ASU No. 2016-09, "Improvements to Employee Share-Based Payment Accounting," to amend ASC Topic 718, "Compensation – Stock Compensation." The ASU is part of the FASB's ongoing simplification initiative, which is designed to reduce cost and complexity while maintaining or improving the usefulness of the information provided to the users of financial statements. The proposed simplifications address a variety of areas for public entities, including the following: 1) accounting for income taxes, 2) classification of excess tax benefits on the statement of cash flows, 3) forfeitures, 4) minimum statutory tax withholding requirements, 5) classifications of employee taxes paid on the statement of cash flows when an employer withholds shares for tax withholding purposes, and 6) classification of awards with repurchase features. The new guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Frontier has determined that the impact of adoption is immaterial to its consolidated financial statements.

Intangibles – Goodwill

In January 2017, the FASB issued ASU No. 2017-04, "Simplifying the Test for Goodwill Impairment." This standard was established to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. Under the amendments in this Update, an entity should perform its annual, or interim, goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount. An entity should recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. Additionally, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss, if applicable. The Board also eliminated the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. Therefore, the same impairment assessment applies to all reporting units. An entity is required to disclose the amount of goodwill allocated to each reporting unit with a zero or negative carrying amount of net assets. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. The new guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. Frontier is currently evaluating the impact of adopting the new standard and has not yet determined the impact of adoption on its consolidated financial statements.

(3) Acquisitions:The CTF Acquisition

On April 1, 2016, Frontier acquired the wireline operations of Verizon Communications, Inc. in California, Texas and Florida for a purchase price of \$10,540 million in cash and assumed debt (the CTF Acquisition), pursuant to the February 5, 2015 Securities Purchase Agreement, as amended. In addition, Frontier and Verizon settled the working capital and net debt adjustments with \$15 million paid to Frontier in October 2016. As a result of the CTF Acquisition, Frontier now operates these former Verizon properties, which included approximately 2.5 million total customers, 2.1 million broadband subscribers, and 1.2 million FiOS video subscribers as of April 1, 2016 (the CTF Operations).

Our consolidated statement of operations for the year ended December 31, 2016 includes \$3,622 million of revenue and \$582 million of operating income related to the nine months of operating results of the CTF Operations since April 1, 2016.

The allocation of the purchase price presented below, which is preliminary and subject to change, represents the effect of recording the estimates of the fair value of assets acquired and liabilities assumed as of the date of the CTF Acquisition, based on the total transaction cash consideration of \$9,886 million at December 31, 2016, as adjusted for the \$15 million settlement payment discussed above. These current estimates will be revised in future periods for information that is currently not available to us, primarily related to certain legal and tax accruals and contingencies; accounts receivable; property, plant and equipment; customer base and

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

other intangibles; deferred income tax assets and liabilities; pension assets and liabilities, as well as other assumed postretirement benefit obligations, pending completion of actuarial studies and the related transfer of pension assets. The revisions may affect the presentation of our consolidated financial results. Any changes to the initial estimates of the fair value of the assets and liabilities will be recorded as adjustments to those assets and liabilities and residual amounts will be allocated to goodwill.

*(\$ in millions)*

Current assets	\$	350
Property, plant & equipment		6,236
Goodwill		2,508
Other intangibles - primarily customer base		2,152
Current liabilities		(518)
Long-term debt		(544)
Other liabilities		(323)
Total net assets acquired	\$	<u>9,871</u>

The total consideration exceeded the net estimated fair value of the assets acquired and liabilities assumed by \$2,508 million, which we recognized as goodwill. This goodwill is attributable to strategic benefits, including enhanced financial and operational scale, market diversification and leveraged combined networks that we expect to realize. This amount of goodwill associated with the CTF Acquisition will be deductible for income tax purposes.

The Securities Purchase Agreement provides for a post-closing adjustment for both pension liabilities and pension assets. Frontier and Verizon have not finalized the results of these calculations. Such calculations will be completed in accordance with the terms of the Securities Purchase Agreement.

The following unaudited pro forma financial information presents the combined results of operations of Frontier and the CTF Operations as if the CTF Acquisition had occurred as of January 1, 2015. The pro forma information is not necessarily indicative of what the financial position or results of operations actually would have been had the CTF Acquisition been completed as of January 1, 2015. In addition, the unaudited pro forma financial information is not indicative of, nor does it purport to project, the future financial position or operating results of Frontier. The unaudited pro forma financial information excludes acquisition and integration costs and does not give effect to any estimated and potential cost savings or other operating efficiencies that may result from the CTF Acquisition.

<i>(\$ in millions, except per share amounts)</i>	(Unaudited)			
	For the year ended December 31,			
	2016		2015	
Revenue	\$	10,255	\$	11,157
Operating income	\$	1,433	\$	1,529
Net loss attributable to Frontier common shareholders	\$	262	\$	(192)
Basic and diluted net loss per share attributable to Frontier common shareholders	\$	(0.23)	\$	(0.17)

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

During 2015, we completed our financing activities associated with the CTF Acquisition, which included: 1) a private debt offering of \$6,600 million of unsecured senior notes in September 2015, 2) the 2015 Credit Agreement (as defined below) for a senior secured delayed-draw term loan facility in August 2015 and 3) a registered offering of \$2,750 million of preferred and common stock in June 2015. Net proceeds from these debt and equity offerings together with the proceeds received from the delayed draw term loan facility and cash on hand were used to fund the CTF Acquisition and pay related fees and expenses.

The Connecticut Acquisition

On October 24, 2014, Frontier acquired the wireline properties of AT&T Inc. (AT&T) in Connecticut (the Connecticut Acquisition) for a purchase price of \$2,018 million in cash, pursuant to the stock purchase agreement dated December 16, 2013, as amended. Following the Connecticut Acquisition, Frontier now owns and operates the wireline business and fiber optic network servicing residential, commercial and wholesale customers in Connecticut. Frontier also acquired the AT&T U-verse® video (Vantage) and DISH® satellite TV customers in Connecticut. See Note 7 for further discussion related to financing the Connecticut Acquisition.

Our consolidated statements of operations for the years ended December 31, 2015 and 2014 include \$1,049 million and \$216 million of revenue, respectively, and \$100 million and \$38 million of operating income, respectively, related to the results of the Connecticut operations.

The final allocation of the purchase price presented below represents the effect of recording the fair value of assets acquired, liabilities assumed and related deferred income taxes as of the date of the Connecticut Acquisition, based on the total transaction consideration of \$2,018 million.

(\$ in millions)

Current assets	\$	69
Property, plant & equipment		1,459
Goodwill		815
Other intangibles - customer base		570
Current liabilities		(94)
Deferred income taxes		(576)
Other liabilities		(225)
Total net assets acquired	\$	<u>2,018</u>

The total consideration exceeded the net estimated fair value of the assets acquired and liabilities assumed by \$815 million, which we recognized as goodwill. This goodwill is attributable to strategic benefits, including enhanced financial and operational scale, market diversification and leveraged combined networks that we expect to realize. Of this amount, goodwill associated with the Connecticut Acquisition of \$75 million is deductible for income tax purposes.

The following unaudited pro forma financial information presents the combined results of operations of Frontier and the Connecticut operations as if the Connecticut Acquisition had occurred as of January 1, 2014. The pro forma information is not necessarily indicative of what the financial position or results of operations actually would have been had the Connecticut Acquisition been completed as of January 1, 2014. In addition, the unaudited pro forma financial information is not indicative of, nor does it purport to project, the future financial position or operating results of Frontier. The unaudited pro forma financial information excludes acquisition and integration costs and does not give effect to any estimated and potential cost savings or other operating efficiencies that may result from the Connecticut Acquisition.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

<i>(\$ in millions, except per share amounts)</i>	(Unaudited) For the year ended December 31,	
	2014	
Revenue	\$	5,775
Operating income	\$	985
Net income attributable to Frontier common shareholders	\$	191
Basic and diluted net income per share attributable to Frontier common shareholders	\$	0.19

**Acquisition and Integration Costs**

Acquisition costs include legal, financial advisory, accounting, regulatory and other related costs. Integration costs include expenses that are incremental and directly related to the acquisition, and were incurred to integrate the network and information technology platforms and to enable other integration initiatives.

Frontier incurred operating expenses related to the CTF Acquisition and the Connecticut Acquisition, as follows:

<i>(\$ in millions)</i>	For the Year Ended		
	2016	2015	2014
Acquisition costs:			
CTF Acquisition	\$ 23	\$ 44	\$ -
Connecticut Acquisition	-	1	15
	23	45	15
Integration costs:			
CTF Acquisition	412	152	-
Connecticut Acquisition	1	39	127
	413	191	127
Total acquisition and integration costs	\$ 436	\$ 236	\$ 142

We also invested \$142 million and \$129 million in capital expenditures related to the CTF Acquisition during the years ended December 31, 2016 and 2015, respectively. In connection with the Connecticut Acquisition, Frontier invested \$24 million and \$116 million in capital expenditures during the years ended December 31, 2015 and 2014, respectively.

**FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES**

An analysis of the activity in the allowance for doubtful accounts for the years ended December 31, 2016, 2015 and 2014 is as follows:

<i>(\$ in millions)</i>	Balance at beginning of Period	Charged to Other Revenue	Charged (Credited) to Switched and Nonswitched Revenue and Other Accounts	Write-offs, net of Recoveries	Balance at end of Period
2014	\$ 71	\$ 61	\$ -	\$ (60)	\$ 72
2015	\$ 72	\$ 67	\$ (17)	\$ (65)	\$ 57
2016	\$ 57	\$ 164	\$ 15	\$ (105)	\$ 131

We maintain an allowance for doubtful accounts based on our estimate of our ability to collect accounts receivable. The provision for uncollectible amounts was \$179 million, \$50 million, and \$61 million for the years ended December 31, 2016, 2015 and 2014, respectively. Our allowance for doubtful accounts declined in 2015, primarily as a result of the resolution of a principal carrier dispute. Our allowance for doubtful accounts increased in 2016 primarily as a result of the customer account balances related to the CTF Operations subsequent to the CTF Acquisition.

**(5) Property, Plant and Equipment:**

Property, plant and equipment, net at December 31, 2016 and 2015 are as follows:

<i>(\$ in millions)</i>	Estimated Useful Lives	2016	2015
Land	N/A	\$ 235	\$ 151
Buildings and leasehold improvements	41 years	2,300	1,327
General support	5 to 17 years	1,495	1,146
Central office/electronic circuit equipment	5 to 18 years	7,683	6,244
Poles	30 years	995	712
Cable, fiber and wire	15 to 25 years	10,267	7,280
Conduit	55 years	1,611	515
Other	12 to 25 years	52	47
Construction work in progress		903	379
Property, plant and equipment		<u>25,541</u>	<u>17,801</u>
Less: Accumulated depreciation		<u>(10,639)</u>	<u>(9,308)</u>
Property, plant and equipment, net		<u>\$ 14,902</u>	<u>\$ 8,493</u>

Property, plant, and equipment includes approximately \$154 million and \$43 million of fixed assets recognized under capital leases as of December 31, 2016 and 2015, respectively.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Depreciation expense is principally based on the composite group method. Depreciation expense was as follows:

(\$ in millions)	For the Year Ended		
	2016	2015	2014
Depreciation expense	\$ 1,388	\$ 983	\$ 835

We adopted new estimated remaining useful lives for certain plant assets as of October 1, 2016, as a result of an annual independent study of the estimated remaining useful lives of our plant assets, with an insignificant impact to depreciation expense. In addition, the estimated useful lives for assets acquired in the CTF Acquisition were adopted for such assets based on a similar study performed as of October 1, 2015 and were effective April 1, 2016

(6) Goodwill and Other Intangibles:

The activity in our goodwill from January 1, 2015 through December 31, 2016 is as follows:

(\$ in millions)	Goodwill	
Balance at January 1, 2015	\$	7,205
Connecticut Acquisition Adjustment		(53)
Other Acquisition		14
Balance at December 31, 2015		7,166
CTF Acquisition (Note 3)		2,508
Balance at December 31, 2016	\$	9,674

The components of other intangibles at December 31, 2016 and 2015 are as follows:

(\$ in millions)	2016			2015		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Other Intangibles:						
Customer base	\$ 5,088	\$ (2,604)	\$ 2,484	\$ 2,998	\$ (1,977)	\$ 1,021
Trade name	122	-	122	122	-	122
Royalty agreement	72	(16)	56	-	-	-
Total other intangibles	\$ 5,282	\$ (2,620)	\$ 2,662	\$ 3,120	\$ (1,977)	\$ 1,143

Amortization expense was as follows:

(\$ in millions)	For the Year Ended		
	2016	2015	2014
Amortization expense	\$ 643	\$ 337	\$ 304

Amortization expense primarily represents the amortization of our customer base acquired as a result of the CTF Acquisition, the Connecticut Acquisition and the acquisition of certain Verizon properties in 2010 with each based on a useful life of 8 to 12 years on an accelerated method. The approximate weighted average remaining life of our customer base is 7 years and for our royalty agreement is 4 years. Amortization expense

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

based on our current estimate of useful lives, is estimated to be approximately \$663 million in 2017, \$552 million in 2018, \$439 million in 2019, \$342 million in 2020, and \$251 million in 2021.

(7) Long-Term Debt:

The activity in our long-term debt from January 1, 2016 to December 31, 2016 is summarized as follows.

(\$ in millions)	Year ended December 31, 2016					December 31, 2016	Interest Rate at December 31, 2016*
	January 1, 2016	Payments and Retirements	New Borrowings	Debt Assumed	Reclassifications		
Senior & Subsidiary							
Unsecured Debt	\$ 16,055	\$ (419)	\$ 401	\$ 500	\$ (637)	\$ 15,900	9.18%
Senior Secured Debt	-	(426)	1,940	-	637	2,151	3.88%
Secured Subsidiary Debt	-	-	-	100	-	100	8.50%

<sup>(a)</sup> Represents borrowings under the 2011 CoBank Credit Agreement, as defined below, that became secured as of April 1, 2016.

<sup>(b)</sup> Represents borrowings under the 2014 CoBank Credit Agreement, as defined below, that became secured as of April 1, 2016.

<sup>(c)</sup> Represents borrowings under the 2015 Credit Agreement, as defined below.

<sup>(d)</sup> Represents borrowings under the 2016 CoBank Credit Agreement, as defined below.

<sup>(e)</sup> Interest rate represents a weighted average of the stated interest rates of multiple issuances.

During 2016, we completed non-cash debt exchanges including related accrued interest, of \$397 million of our 8.25% Notes due April 2017 for approximately \$147 million of our 8.50% Notes due April 2020, \$66 million of our 8.875% Notes due September 2020, and \$188 million of our 10.50% Notes due September 2022. A pretax loss of approximately \$7 million was recognized and included in "Investment and other income, net" in our consolidated statement of operations for the year ended December 31, 2016.

On September 25, 2015, Frontier completed a private offering of \$6,600 million aggregate principal amount of unsecured Senior Notes, as follows: \$1,000 million of 8.875% Senior Notes due 2020; \$2,000 million of 10.50%

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Senior Notes due 2022; and \$3,600 million of 11.00% Senior Notes due 2025. Each was issued at a price equal to 100% of its principal amount. Frontier used the net proceeds from the offering (after deducting underwriting fees) to finance a portion of the cash consideration paid in connection with the CTF Acquisition and to pay related fees and expenses. The net proceeds of the debt offering of \$6,485 million were included in "Restricted cash" in the consolidated balance sheet as of December 31, 2015. In June 2016, we completed an exchange offer of registered senior notes for the privately placed senior notes.

On August 12, 2015, Frontier entered into a credit agreement with JPMorgan Chase Bank, N.A., as administrative agent, and the lenders party thereto, for a \$1,500 million senior secured delayed-draw term loan facility (the 2015 Credit Agreement). Frontier exercised its right under the 2015 Credit Agreement to obtain additional commitments and increased the size of the facility to \$1,625 million. On April 1, 2016, in connection with the closing of the CTF Acquisition, Frontier drew \$1,550 million under that facility, with the additional \$75 million drawn subsequently. The final maturity date is March 31, 2021. Repayment of the outstanding principal balance will be made in quarterly installments, initially in the amount of \$20 million per installment, which commenced on June 30, 2016. The quarterly installments will increase to \$41 million, beginning with the 13th quarterly installment. The remaining outstanding principal balance will be repaid on the final maturity date. Borrowings under the term loan will bear interest based on margins over the Base Rate (as defined in the 2015 Credit Agreement) or LIBOR, at the election of Frontier. Interest rate margins under the facility (ranging from 0.75% to 1.75% for Base Rate borrowings and 1.75% to 2.75% for LIBOR borrowings) are subject to adjustment based on Frontier's Total Leverage Ratio (as defined in the 2015 Credit Agreement). Borrowings under the 2015 Credit Agreement are secured by a pledge of the stock of Frontier North Inc., a wholly owned subsidiary, primarily representing Frontier operations in the states of Illinois, Indiana, Michigan, Ohio and Wisconsin.

Upon completion of the CTF Acquisition on April 1, 2016, we assumed additional debt of \$600 million, including \$200 million aggregate principal amount of 6.75% Senior Notes due May 15, 2027, \$300 million aggregate principal amount of 6.86% Senior Notes due February 1, 2028 and \$100 million aggregate principal amount of 8.50% Senior Notes due November 15, 2031.

On February 5, 2015, we entered into a commitment for a bridge loan facility (the Verizon Bridge Facility) and recognized related interest expense of \$10 million and \$184 million for the years ended December 31, 2016 and 2015, respectively. The accrued liabilities related to the Verizon Bridge Facility of \$184 million were paid after the closing of the CTF Acquisition and were included in "Other current liabilities" in the consolidated balance sheet as of December 31, 2015. The Verizon Bridge Facility terminated, in accordance with its terms, on September 25, 2015.

Frontier has a credit agreement with CoBank, ACB, as administrative agent, lead arranger and a lender, and the other lenders party thereto, for a \$350 million senior unsecured term loan facility (the 2014 CoBank Credit Agreement). The facility was drawn upon closing of the Connecticut Acquisition with proceeds used to partially finance the acquisition. The maturity date is October 24, 2019. Repayment of the outstanding principal balance will be made in quarterly installments of \$9 million, which commenced on March 31, 2015 with the remaining outstanding principal balance to be repaid on the maturity date. Borrowings under the 2014 CoBank Credit Agreement will bear interest based on the margins over the Base Rate (as defined in the 2014 CoBank Credit Agreement) or LIBOR, at the election of Frontier. Interest rate margins under the facility (ranging from 0.875% to 2.875% for Base Rate borrowings and 1.875% to 3.875% for LIBOR borrowings) are subject to adjustments based on our Total Leverage Ratio, as such term is defined in the 2014 CoBank Credit Agreement. The interest rate on this facility at December 31, 2016 was LIBOR plus 3.375%.

Frontier has two senior secured credit agreements with CoBank, ACB, as administrative agent, lead arranger and a lender, and the other lenders party thereto: the first, drawn in 2011 (the 2011 CoBank Credit Agreement), was refinanced in October 2016 with a similar facility for \$315 million, maturing on October 12, 2021 (the 2016 CoBank Credit Agreement), and the second, drawn in 2014 (the 2014 CoBank Credit Agreement), matures on October 24, 2019. We refer to the 2011 CoBank Credit Agreement, the 2014 CoBank Credit Agreement and the 2016 CoBank Credit Agreement collectively as the CoBank Credit Agreements. Borrowings under the CoBank Credit Agreements are secured by a pledge of the stock of Frontier North, Inc.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Repayment of the outstanding principal balance for the 2016 CoBank Credit Agreement is being made in quarterly installments of approximately \$8 million which began on December 31, 2016. Any remaining outstanding principal balance will be repaid on the final maturity date. Borrowings under the term loan will bear interest based on margins over the Base Rate (as defined in the 2016 CoBank Credit Agreement) or LIBOR, at the election of Frontier. Interest rate margins under the facility (ranging from 0.875% to 2.875% for Base Rate borrowings and 1.875% to 3.875% for LIBOR borrowings) are subject to adjustment based on Frontier's Total Leverage Ratio (as defined in the 2016 CoBank Credit Agreement). The term loan under the 2016 CoBank Credit Agreement is secured by a pledge of the stock of Frontier North Inc.

Frontier has a revolving credit agreement with JPMorgan Chase Bank, N.A., as administrative agent, the lenders party thereto and the other parties named therein (the Revolving Credit Agreement), for a \$750 million revolving credit facility (the Revolving Credit Facility) with a scheduled termination date of May 31, 2018. As of December 31, 2016, the Revolving Credit Facility was fully available and no borrowings had been made thereunder. Associated commitment fees under the Revolving Credit Facility will vary from time to time depending on our debt rating (as defined in the Revolving Credit Agreement) and were 0.45% per annum as of December 31, 2016. During the term of the Revolving Credit Facility, Frontier may borrow, repay and reborrow funds, and may obtain letters of credit, subject to customary borrowing conditions. Loans under the Revolving Credit Facility will bear interest based on the alternate base rate or the adjusted LIBO Rate (each as determined in the Revolving Credit Agreement), at our election, plus a margin based on our debt rating (ranging from 0.50% to 1.50% for alternate base rate borrowings and 1.50% to 2.50% for adjusted LIBO Rate borrowings). The interest rate on this facility would have been the alternate base rate plus 1.50% or the adjusted LIBO Rate plus 2.50%, respectively, as of December 31, 2016. Letters of credit issued under the Revolving Credit Facility will also be subject to fees that vary depending on our debt rating. The Revolving Credit Facility is available for general corporate purposes but may not be used to fund dividend payments.

On February 27, 2017, Frontier amended and restated its April 2021 term loan and its revolving credit facility, combining them into a single credit agreement and unifying the covenants. The amended and restated credit agreement provides Frontier with more flexible terms, increases the revolving credit facility to \$850 million and extends the maturity of the revolving credit facility from 2018 to 2022. The determination of interest rates remains unchanged. The most significant change in the covenants is an increase of the maximum Leverage Ratio (as defined) to 5.25 to 1.0 initially, migrating to 5.0 to 1.0 beginning in the second quarter of 2018, 4.75 to 1.0 in the second quarter of 2019, and 4.5 to 1.0 in the second quarter of 2020. In addition, under the amended and restated credit agreement, Frontier will be expanding the security package to include pledges of the equity interests in certain Frontier subsidiaries and guaranties by certain Frontier subsidiaries.

Upon the drawdown of the term loan under the 2015 Credit Agreement in connection with the closing of the CTF Acquisition, borrowings under the 2014 CoBank Credit Agreement, the 2011 CoBank Credit Agreement and the Revolving Credit Facility became secured debt. These borrowings are secured, equally and ratably with borrowings under the 2015 Credit Agreement, by a pledge of the stock of Frontier North Inc., a wholly owned subsidiary.

On September 17, 2014, Frontier completed a registered debt offering of \$775 million aggregate principal amount of 6.250% senior unsecured notes due 2021, and \$775 million aggregate principal amount of 6.875% senior unsecured notes due 2025. We received net proceeds, after deducting underwriting fees, of \$1,519 million from the offering. Frontier used the net proceeds from the offering of the notes, together with borrowings under the 2014 CoBank Credit Agreement, as defined above, and cash on hand, to finance the Connecticut Acquisition, which closed on October 24, 2014. See Note 3 for further discussion of the Connecticut Acquisition.

During 2015 and 2014, we also entered into secured financings totaling \$3 million and \$11 million, respectively, with four year terms and no stated interest rate for certain equipment purchases.

As of December 31, 2016, we were in compliance with all of our debt and credit facility covenants.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Our scheduled principal payments are as follows as of December 31, 2016:

<u>(\$ in millions)</u>	<u>Principal Payments</u>	
2017	\$	363
2018	\$	733
2019	\$	818
2020	\$	2,429
2021	\$	2,554
Thereafter	\$	11,281

Other Obligations

During 2016, Frontier contributed a real estate property with a fair value of \$15 million for the purpose of funding a portion of its contribution obligations to its qualified defined benefit pension plan. The pension plan obtained independent appraisals of the property and, based on these appraisals, the pension plan recorded the contribution at its fair value of \$15 million. Frontier has entered into a lease for the contributed property with initial terms of 15 years at a combined aggregate annual rent of approximately \$2 million. The property is managed on behalf of the pension plan by an independent fiduciary, and the terms of the lease were negotiated with the fiduciary on an arm's-length basis.

The contribution and leaseback of the property was treated as a financing transaction and, accordingly, Frontier continues to depreciate the carrying value of the property in its financial statements and no gain or loss was recognized. An obligation of \$15 million was recorded in our consolidated balance sheet within "Other liabilities" and the liability is reduced annually by a portion of the lease payments made to the pension plan.

During 2016, Frontier modified certain operating leases for vehicles which resulted in the classification as capital leases. These agreements have lease terms of 1 to 7 years. These capital lease obligations are included in our consolidated balance sheet within "Other liabilities" and "Other current liabilities".

In 2012, Frontier entered into a sale and leaseback arrangement for a facility in Everett, Washington and entered into a capital lease for the use of fiber in the state of Minnesota. These agreements have lease terms of 12 and 23 years, respectively. These capital lease obligations are included in our consolidated balance sheet within "Other liabilities" and "Other current liabilities."

Future minimum payments for finance lease obligations and capital lease obligations as of December 31, 2016 are as follows:

<u>(\$ in millions)</u>	<u>Finance Lease Obligations</u>		<u>Capital Lease Obligations</u>	
Year ending December 31:				
2017	\$	9	\$	39
2018		9		37
2019		9		26
2020		9		15
2021		9		9
Thereafter		60		21
Total future payments		105		147
Less: Amounts representing interest		(57)		(18)
Present value of minimum lease payments	\$	48	\$	129

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

**(8) Restructuring Costs**

As of December 31, 2016, restructuring related liabilities of \$47 million pertaining to employee separation charges are included in "Other current liabilities" in our consolidated balance sheet.

During 2016, restructuring costs and other charges, primarily consisting of severance and other employee-related costs of \$65 million, and pension/OPEB benefit enhancements of \$26 million, totaling \$91 million in connection with workforce reductions, are included in "Restructuring costs and other charges" in our consolidated statement of operations for the year ended December 31, 2016.

The following is a summary of the changes in the liabilities established for restructuring programs at December 31, 2016:

*(\$ in millions)*

	Restructuring Liability	
Balance, January 1, 2016	\$	1
Severance costs		65
Cash payments during the period		(19)
Balance, December 31, 2016	\$	47

**(9) Investment and Other Income, Net:**

The components of investment and other income, net for the years ended December 31, 2016, 2015 and 2014 are as follows:

*(\$ in millions)*

	2016		2015		2014	
Interest and dividend income	\$	13	\$	7	\$	2
Loss on debt exchanges		(7)		-		-
Gain on sale of Fairmount Cellular LLC		-		-		25
Gain on sale of 700 MHz spectrum		-		-		12
Gain on expiration/settlement of customer advances		13		-		-
All other, net		1		-		-
Total investment and other income, net	\$	20	\$	7	\$	39

During 2016 and 2015, we received \$13 million and \$7 million, respectively, in interest and dividend income, primarily due to interest earned on restricted cash.

During 2016, we recognized income of \$13 million in connection with certain retained liabilities that have terminated, associated with customer advances for construction from our disposed water properties.

During 2014, we sold assets that were unrelated to Frontier's operations and recognized a gain of \$25 million associated with the sale of our interest in Fairmount Cellular LLC and recognized a gain of \$12 million related to the sale of our 700 MHz spectrum.

**(10) Capital Stock:**

We are authorized to issue up to 1,750,000,000 shares of common stock and 50,000,000 shares of preferred stock. The amount and timing of dividends payable on common and preferred stock are, subject to applicable law, within the sole discretion of our Board of Directors.

**Common Stock Offering**

On June 10, 2015, we completed a registered offering of 150,000,000 shares of our common stock, par value \$0.25 per share, at an offering price of \$5 per share. On June 24, 2015, Frontier issued an additional 15,000,000 shares of common stock in connection with the over-allotment option that was exercised in full by the underwriters. Aggregate net proceeds were approximately \$799 million after deducting commissions and

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

estimated expenses. We used the net proceeds from this offering to fund a portion of the acquisition price of the CTF Acquisition and related fees and expenses.

Mandatory Convertible Preferred Stock (Series A) Offering

On June 10, 2015, we also completed a registered offering of 17,500,000 shares of our 11.125% Mandatory Convertible Preferred Stock, Series A, par value \$0.01 per share (the "Series A Preferred Stock"), at an offering price of \$100 per share. On June 24, 2015, Frontier issued an additional 1,750,000 shares of Series A Preferred Stock in connection with the over-allotment option that was exercised in full by the underwriters. Aggregate net proceeds of the offering were \$1,866 million after deducting commissions and estimated expenses. We used the net proceeds from this offering to fund a portion of the acquisition price of the CTF Acquisition and related fees and expenses.

Unless converted earlier, each share of the Series A Preferred Stock will automatically convert on June 29, 2018 into common stock, (between 17.0213 and 20.0000 shares) depending on the applicable market value of our common stock, subject to anti-dilution adjustments. Subject to certain restrictions, at any time prior to June 29, 2018, holders of the Series A Preferred Stock may elect to convert all or a portion of their shares into common stock at the minimum conversion rate then in effect.

Dividends on shares of the Series A Preferred Stock are payable on a cumulative basis when, as and if declared by our Board of Directors (or an authorized committee thereof) at an annual rate of 11.125% on the liquidation preference of \$100.00 per share, on the last business day of March, June, September and December of each year, commencing on September 30, 2015 to, and including, the mandatory conversion date. Series A Preferred Stock dividends of \$214 million and \$120 million were paid in 2016 and 2015, respectively.

Pursuant to the terms of the CTF Acquisition, \$1,955 million of the \$2,665 million in net proceeds from the equity offerings were deposited into escrow and were included in "Restricted cash" in the consolidated balance sheet as of December 31, 2015. Upon closing of the CTF Acquisition, the funds were released and used to fund a portion of the purchase price.

(11) Stock Plans:

At December 31, 2016, we had six stock-based compensation plans under which grants were made and awards remained outstanding. No further awards may be granted under five of the plans: the 1996 Equity Incentive Plan (the 1996 EIP), the Amended and Restated 2000 Equity Incentive Plan (the 2000 EIP), the 2009 Equity Incentive Plan (the 2009 EIP), the Non-Employee Directors' Deferred Fee Equity Plan (the Deferred Fee Plan), and the Non-Employee Directors' Equity Incentive Plan (the Directors' Equity Plan and together with the Deferred Fee Plan, the Director Plans). At December 31, 2016, there were 20,000,000 shares authorized for grant and 7,324,000 shares available for grant under the 2013 Equity Incentive Plan (the 2013 EIP and together with the 1996 EIP, the 2000 EIP and the 2009 EIP, the EIPs). Our general policy is to issue shares from treasury upon the grant of restricted shares and the exercise of options.

1996, 2000, 2009 and 2013 Equity Incentive Plans

Since the expiration dates of the 1996 EIP, the 2000 EIP and the 2009 EIP on May 22, 2006, May 14, 2009 and May 8, 2013, respectively, no awards have been or may be granted under the 1996 EIP, the 2000 EIP and the 2009 EIP. Under the 2013 EIP, awards of our common stock may be granted to eligible employees in the form of incentive stock options, non-qualified stock options, SARs, restricted stock, performance shares or other stock-based awards. As discussed under the Non-Employee Directors' Compensation Plans below, prior to May 25, 2006 non-employee directors received an award of stock options under the 2000 EIP upon commencement of service. No awards may be granted more than 10 years after the effective date (May 8, 2013) of the 2013 EIP plan. The exercise price of stock options and SARs under the EIPs generally are equal to or greater than the fair market value of the underlying common stock on the date of grant. Stock options are not ordinarily exercisable on the date of grant but vest over a period of time (generally four years). Under the terms of the EIPs, subsequent stock dividends and stock splits have the effect of increasing the option shares outstanding, which correspondingly decrease the average exercise price of outstanding options.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial StatementsPerformance Shares

On February 15, 2012, Frontier's Compensation Committee, in consultation with the other non-management directors of Frontier's Board of Directors and the Committee's independent executive compensation consultant, adopted the Frontier Long-Term Incentive Plan (the LTIP). LTIP awards are granted in the form of performance shares. The LTIP is currently offered under Frontier's 2009 EIP and 2013 EIP, and participants consist of senior vice presidents and above. The LTIP awards have performance, market and time-vesting conditions.

Beginning in 2012, during the first 90 days of a three-year performance period (a Measurement Period), a target number of performance shares are awarded to each LTIP participant with respect to the Measurement Period. The performance metrics under the LTIP are (1) annual targets for operating cash flow based on a goal set during the first 90 days of each year in the three-year Measurement Period and (2) an overall performance "modifier" set during the first 90 days of the Measurement Period, based on Frontier's total return to stockholders (i.e., Total Shareholder Return or TSR) relative to the Integrated Telecommunications Services Group (GICS Code 50101020) for the three-year Measurement Period. Operating cash flow performance is determined at the end of each year and the annual results will be averaged at the end of the three-year Measurement Period to determine the preliminary number of shares earned under the LTIP award. The TSR performance measure is then applied to decrease or increase payouts based on Frontier's three year relative TSR performance. LTIP awards, to the extent earned, will be paid out in the form of common stock shortly following the end of the three-year Measurement Period.

On February 17, 2014, the Compensation Committee granted approximately 1,028,000 performance shares under the LTIP and set the operating cash flow performance goal for 2014, which applies to the first year in the 2014-2016 Measurement Period, the second year of the 2013-2015 Measurement Period and the third year of the 2012-2014 Measurement Period. On February 25, 2015, the Compensation Committee granted approximately 665,000 performance shares under the LTIP and set the operating cash flow performance goal for 2015, which applies to the first year in the 2015-2017 measurement period, the second year of the 2014-2016 measurement period and the third year of the 2013-2015 measurement period. On February 11, 2016, the Compensation Committee granted approximately 1,669,000 performance shares under the LTIP and set the operating cash flow performance goal for 2016, which applies to the first year in the 2016-2018 measurement period, the second year of the 2015-2017 measurement period and the third year of the 2014-2016 measurement period. The number of shares of common stock earned at the end of each three-year Measurement Period may be more or less than the number of target performance shares granted as a result of operating cash flow and TSR performance. An executive must maintain a satisfactory performance rating during the Measurement Period and must be employed by Frontier at the end of the three-year Measurement Period in order for the award to vest. The Compensation Committee will determine the number of shares earned for each three year Measurement Period in February of the year following the end of the Measurement Period.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The following summary presents information regarding LTIP target performance shares as of December 31, 2016 and changes during the three years then ended with regard to LTIP shares awarded under the 2009 EIP and the 2013 EIP:

	Number of Shares (in thousands)
Balance at January 1, 2014	1,749
LTIP target performance shares granted	1,037
LTIP target performance shares forfeited	(104)
Balance at December 31, 2014	2,682
LTIP target performance shares granted	738
LTIP target performance shares earned	(743)
LTIP target performance shares forfeited	(152)
Balance at December 31, 2015	2,525
LTIP target performance shares granted	1,669
LTIP target performance shares earned	(887)
LTIP target performance shares forfeited	(448)
Balance at December 31, 2016	2,859

For purposes of determining compensation expense, the fair value of each performance share is measured at the end of each reporting period and, therefore, will fluctuate based on the price of Frontier common stock as well as performance relative to the targets. Frontier recognized an expense, included in "Selling, general, and administrative expenses" of \$6 million, \$7 million, and \$4 million during 2016, 2015 and 2014, respectively, for the LTIP.

Restricted Stock

The following summary presents information regarding unvested restricted stock as of December 31, 2016 and changes during the three years then ended with regard to restricted stock under the 2009 EIP and the 2013 EIP:

	Number of Shares (in thousands)	Weighted Average Grant Date Fair Value (per share)	Aggregate Fair Value (in millions)
Balance at January 1, 2014	6,234	\$ 4.80	\$ 29
Restricted stock granted	4,314	\$ 4.91	\$ 29
Restricted stock vested	(2,372)	\$ 5.22	\$ 16
Restricted stock forfeited	(369)	\$ 4.55	
Balance at December 31, 2014	7,807	\$ 4.75	\$ 52
Restricted stock granted	2,815	\$ 7.92	\$ 13
Restricted stock vested	(3,215)	\$ 4.89	\$ 15
Restricted stock forfeited	(359)	\$ 5.10	
Balance at December 31, 2015	7,048	\$ 5.93	\$ 33
Restricted stock granted	5,936	\$ 4.36	\$ 20
Restricted stock vested	(3,720)	\$ 5.26	\$ 13
Restricted stock forfeited	(908)	\$ 5.11	
Balance at December 31, 2016	8,356	\$ 5.20	\$ 28

For purposes of determining compensation expense, the fair value of each restricted stock grant is estimated based on the average of the high and low market price of a share of our common stock on the date of grant. Total remaining unrecognized compensation cost associated with unvested restricted stock awards that is deferred at December 31, 2016 was \$26 million and the weighted average vesting period over which this cost is expected to be recognized is approximately 1.3 years.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

We have granted restricted stock awards to employees in the form of our common stock. None of the restricted stock awards may be sold, assigned, pledged or otherwise transferred, voluntarily or involuntarily, by the employees until the restrictions lapse, subject to limited exceptions. The restrictions are time-based. Compensation expense, recognized in "Selling, general and administrative expenses", of \$18 million, \$20 million and \$16 million, for the years ended December 31, 2016, 2015 and 2014, respectively, has been recorded in connection with these grants.

Stock Options

The number of options exercisable under the EIPs at December 31, 2016, 2015 and 2014 were 40,000, 50,000 and 83,000, with a weighted average exercise price of \$8.81, \$13.40, and \$13.23, respectively. No stock options were granted or exercised during 2016, 2015 or 2014. There is no remaining unrecognized compensation cost associated with stock options at December 31, 2016.

Non-Employee Directors' Compensation Plans

As of October 1, 2013, stock units are credited to the director's account in an amount that is determined as follows: the total cash value of the fees payable to the director is divided by the closing price of Frontier common stock on the grant date of the units. Units are credited to the director's account quarterly. Directors must also elect to convert the units to either common stock (convertible on a one-to-one basis) or cash upon retirement or death.

Dividends are paid on stock units held by directors at the same rate and at the same time as we pay dividends on shares of our common stock. Dividends on stock units are paid in the form of additional stock units.

There were 10 directors participating in the Director Plans during all or part of 2016. The total plan units earned were 444,277, 334,188, and 237,607 in 2016, 2015 and 2014, respectively.

To the extent directors elect to receive the distribution of their stock unit account in cash, they are considered liability-based awards. To the extent directors elect to receive the distribution of their stock unit accounts in common stock, they are considered equity-based awards. Compensation expense for stock units that are considered equity-based awards is based on the market value of our common stock at the date of grant. Compensation expense for stock units that are considered liability-based awards is based on the market value of our common stock at the end of each period.

In connection with the Director Plans, there were no compensation costs associated with the issuance of stock units in 2016, (\$1) million in 2015, and \$4 million in 2014. Cash compensation associated with the Director Plans was \$1 million in 2016, 2015 and 2014, respectively. These costs are recognized in "Selling, general and administrative expenses".

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

(12) Income Taxes:

The following is a reconciliation of the provision for income taxes computed at the federal statutory rate to income taxes computed at the effective rates for the years ended December 31, 2016, 2015 and 2014:

	2016	2015	2014
Consolidated tax provision at federal statutory rate	35.0 %	35.0 %	35.0 %
State income tax provisions, net of federal income tax benefit	(0.1)	8.7	1.6
Tax reserve adjustment	0.6	(0.3)	6.9
Domestic production activities deduction	(1.9)	-	(8.7)
Changes in certain deferred tax balances	5.8	0.8	(14.1)
Federal research and development credit	1.0	1.5	(3.3)
Non-deductible transaction costs	-	0.4	1.0
All other, net	(0.2)	(0.3)	0.3
Effective tax rate	40.2 %	45.8 %	18.7 %

Income taxes for 2016 include the impact of \$36 million of tax benefits resulting primarily from the adjustment of deferred tax balances due to the CTF Acquisition, the impact of \$6 million in benefits from the Federal research and development credits, along with a \$12 million reversal of benefits related to the domestic production activities deduction.

Income taxes for 2015 include the impact of a \$3 million benefit arising from the adjustment of deferred tax balances and a \$5 million benefit from the federal research and development credit.

Income taxes for 2014 include the impact of a \$23 million benefit from the reduction in deferred tax liabilities arising primarily from the inclusion of the Connecticut operations in the state unitary filings, a \$14 million benefit from the domestic production activities deduction and a \$5 million benefit from federal research and development credits, partially offset by the impact of a charge of \$11 million resulting from an increase in tax reserves and a charge of \$2 million resulting from non-deductible transaction costs.

As a result of the retrospective implementation of Accounting Standards Update No. 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes*, Frontier offset all deferred tax liabilities and assets, as well as any related valuation allowance, and is presenting them as a single non-current amount within Deferred income taxes in the consolidated balance sheet as of December 31, 2016 and 2015.

Amounts pertaining to income tax related accounts of \$55 million and \$50 million are included in "Income taxes and other current assets" in the consolidated balance sheets as of December 31, 2016 and 2015, respectively.

In 2016, we received federal and state income tax refunds totaling \$120 million.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The components of the net deferred income tax liability (asset) at December 31 are as follows:

<i>(\$ in millions)</i>	2016	2015
<b><u>Deferred income tax liabilities:</u></b>		
Property, plant and equipment basis differences	\$ 2,751	\$ 2,401
Intangibles	878	960
Deferred revenue/expense	14	-
Other, net	12	15
	<u>\$ 3,655</u>	<u>\$ 3,376</u>
<b><u>Deferred income tax assets:</u></b>		
Pension liability	273	222
Tax operating loss carryforward	687	295
Employee benefits	255	262
Accrued expenses	44	50
Lease obligations	75	-
Tax credit	30	-
Allowance for doubtful accounts	44	10
Other, net	2	48
	<u>1,410</u>	<u>887</u>
Less: Valuation allowance	<u>(271)</u>	<u>(177)</u>
Net deferred income tax asset	<u>1,139</u>	<u>710</u>
Net deferred income tax liability	<u>\$ 2,516</u>	<u>\$ 2,666</u>

Our federal net operating loss carryforward as of December 31, 2016 is estimated at \$1.0 billion. The federal loss carryforward will expire in 2036, unless otherwise used.

Our state tax operating loss carryforward as of December 31, 2016 is estimated at \$6.7 billion. A portion of our state loss carryforward will continue to expire annually through 2036, unless otherwise used.

Our federal research and development credit and alternative minimum tax credit as of December 31, 2016 is estimated at \$13 million and \$4 million, respectively. The federal research and development credit will expire between 2034 and 2036, unless otherwise used.

Our various state credits as of December 31, 2016 are estimated at \$19 million. The state credits will expire between 2018 and 2021, unless otherwise used.

As of December 31, 2016, Frontier has a valuation allowance of \$271 million to reduce deferred tax assets to an amount more likely than not to be realized. This valuation allowance is related to state net operating losses and state tax credits. In evaluating Frontier's ability to realize its deferred tax assets, management considers whether it is more likely than not that some or all of the deferred tax assets will not be realized. Management also considered the projected reversal of deferred tax liabilities and projected future taxable income in making this assessment. Based upon this assessment, management believes it is more likely than not Frontier will realize the benefits of these deductible differences, net of valuation allowance. There was a valuation allowance of \$177 million recorded as of December 31, 2015.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The provision (benefit) for federal and state income taxes, as well as the taxes charged or credited to equity of Frontier, includes amounts both payable currently and deferred for payment in future periods as indicated below:

<i>(\$ in millions)</i>	<u>2016</u>	<u>2015</u>	<u>2014</u>
Income tax expense (benefit):			
Current:			
Federal	\$ (52)	\$ 8	\$ 98
State	7	(6)	10
Total Current	<u>(45)</u>	<u>2</u>	<u>108</u>
Deferred:			
Federal	(145)	(126)	(34)
State	(60)	(41)	(44)
Total Deferred	<u>(205)</u>	<u>(167)</u>	<u>(78)</u>
Total income tax expense (benefit)	<u>(250)</u>	<u>(165)</u>	<u>30</u>
Income taxes charged (credited) to equity of Frontier:			
Utilization of the benefits arising from restricted stock	(5)	-	-
Deferred income taxes (benefits) arising from the recognition of additional pension/OPEB liability	<u>(21)</u>	<u>36</u>	<u>(90)</u>
Total income taxes charged (credited) to equity of Frontier	<u>(26)</u>	<u>36</u>	<u>(90)</u>
Total income taxes	<u>\$ (276)</u>	<u>\$ (129)</u>	<u>\$ (60)</u>

U.S. GAAP requires applying a "more likely than not" threshold to the recognition and derecognition of uncertain tax positions either taken or expected to be taken in Frontier's income tax returns. The total amount of our gross tax liability for tax positions that may not be sustained under a "more likely than not" threshold amounts to \$17 million as of December 31, 2016 including interest of \$1 million. The amount of our uncertain tax positions, for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase or decrease during the next twelve months, and which would affect our effective tax rate, is \$8 million as of December 31, 2016.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Frontier's policy regarding the classification of interest and penalties is to include these amounts as a component of income tax expense. This treatment of interest and penalties is consistent with prior periods. We are subject to income tax examinations generally for the years 2012 forward for federal and 2008 forward for state filing jurisdictions. We also maintain uncertain tax positions in various state jurisdictions.

The following table sets forth the changes in Frontier's balance of unrecognized tax benefits for the years ended December 31, 2016 and 2015:

<i>(\$ in millions)</i>	2016	2015
Unrecognized tax benefits - beginning of year	\$ 19	\$ 19
Gross increases - prior year tax positions	3	-
Gross increases - current year tax positions	3	2
Gross decreases - FIN 48 liability release	(9)	-
Gross decreases - expired statute of limitations	-	(2)
Unrecognized tax benefits - end of year	<u>\$ 16</u>	<u>\$ 19</u>

The amounts above exclude \$1 million of accrued interest as of December 31, 2016 and 2015, respectively, that we have recorded and would be payable should Frontier's tax positions not be sustained.

**(13) Net Income (Loss) Per Common Share:**

The reconciliation of the net income (loss) per common share calculation for the years ended December 31, 2016, 2015 and 2014 is as follows:

<i>(\$ in millions and shares in thousands, except per share amounts)</i>	2016	2015	2014
<u>Net income (loss) used for basic and diluted earnings (loss) per share:</u>			
Net income (loss) attributable to Frontier common shareholders	\$ (587)	\$ (316)	\$ 133
Less: Dividends paid on unvested restricted stock awards	(3)	(3)	(3)
Total basic and diluted net income (loss) attributable to Frontier common shareholders	<u>\$ (590)</u>	<u>\$ (319)</u>	<u>\$ 130</u>
<u>Basic earnings (loss) per share:</u>			
Total weighted average shares and unvested restricted stock awards outstanding - basic	1,172,131	1,091,798	1,001,812
Less: Weighted average unvested restricted stock awards	(8,032)	(7,192)	(7,394)
Total weighted average shares outstanding - basic	<u>1,164,099</u>	<u>1,084,606</u>	<u>994,418</u>
Basic net income (loss) per share attributable to Frontier common shareholders	<u>\$ (0.51)</u>	<u>\$ (0.29)</u>	<u>\$ 0.13</u>
<u>Diluted earnings (loss) per share:</u>			
Total weighted average shares outstanding - basic	1,164,099	1,084,606	994,418
Effect of dilutive shares	-	-	3,744
Total weighted average shares outstanding - diluted	<u>1,164,099</u>	<u>1,084,606</u>	<u>998,162</u>
Diluted net income (loss) per share attributable to Frontier common shareholders	<u>\$ (0.51)</u>	<u>\$ (0.29)</u>	<u>\$ 0.13</u>

In calculating diluted net loss per common share for the years ended December 31, 2016 and 2015, the effect of all common stock equivalents is excluded from the computation as the effect would be antidilutive.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements.

Stock Options

For the years ended December 31, 2016, 2015 and 2014, options to purchase 40,000, 50,000 and 83,000 shares, respectively, issuable under employee compensation plans were excluded from the computation of diluted earnings (loss) per share (EPS) for those periods because the exercise prices were greater than the average market price of our common stock and, therefore, the effect would be antidilutive.

Stock Units

At December 31, 2016, 2015 and 2014, we had 1,881,460, 1,437,183 and 1,102,995 stock units, respectively, issued under the Director Plans and the 2013 EIP. These securities have not been included in the diluted income per share of common stock calculation because their inclusion would have an antidilutive effect.

Mandatory Convertible Preferred Stock

The impact of the common share equivalents associated with the 19,250,000 shares of Series A Preferred stock described above were not included in the calculation of diluted EPS as of December 31, 2016 and 2015, as their impact was antidilutive.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

**(14) Comprehensive Income (Loss):**

Comprehensive income (loss) consists of net income (loss) and other gains and losses affecting shareholders' investment and pension/postretirement benefit (OPEB) liabilities that, under GAAP, are excluded from net income/(loss).

The components of accumulated other comprehensive loss, net of tax at December 31, 2016, 2015 and 2014, and changes for the years then ended, are as follows:

(\$ in millions)	Pension Costs	OPEB Costs	Deferred taxes on pension and OPEB costs	Total
Balance at January 1, 2014	\$ (412)	\$ (5)	\$ 156	\$ (261)
Other comprehensive income (loss) before reclassifications	(140)	(113)	98	(155)
Amounts reclassified from accumulated other comprehensive income (loss)	20	(1)	(7)	12
Net current-period other comprehensive income (loss)	(120)	(114)	91	(143)
Balance at December 31, 2014	(532)	(118)	247	(404)
Other comprehensive income (loss) before reclassifications	(81)	136	(24)	31
Amounts reclassified from accumulated other comprehensive income (loss)	29	3	(12)	20
Net current-period other comprehensive income (loss)	(52)	139	(36)	51
Balance at December 31, 2015	(584)	20	211	(353)
Other comprehensive income (loss) before reclassifications	(103)	17	32	(54)
Amounts reclassified from accumulated other comprehensive income (loss)	40	(8)	(12)	20
Net current-period other comprehensive income (loss)	(63)	9	20	(34)
Balance at December 31, 2016	\$ (647)	\$ 29	\$ 231	\$ (387)

As a result of the CTF Acquisition, the Frontier Communications Pension Plan (the Plan) was remeasured. This remeasurement resulted in a decrease in the discount rate from 4.50% at December 31, 2015 to 4.00% at the date of the CTF Acquisition. This change in the discount rate resulted in a remeasurement charge to Other comprehensive income (loss) of \$105 million during 2016.

**FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES**  
Notes to Consolidated Financial Statements

The significant items reclassified from each component of accumulated other comprehensive loss for the years ended December 31, 2016, 2015 and 2014 are as follows:

(\$ in millions) Details about Accumulated Other Comprehensive Loss Components	Amount Reclassified from Accumulated Other Comprehensive Loss <sup>(a)</sup>			Affected Line Item in the Statement Where Net Income (Loss) is Presented
	2016	2015	2014	
<b>Amortization of Pension Cost Items <sup>(b)</sup></b>				
Actuarial gains (losses)	\$ (40)	\$ (29)	\$ (20)	
Tax impact	(40)	(29)	(20)	Income (loss) before income taxes
	15	11	7	Income tax (expense) benefit
	\$ (25)	\$ (18)	\$ (13)	Net income (loss)
<b>Amortization of OPEB Cost Items <sup>(b)</sup></b>				
Prior-service costs	\$ 9	\$ 5	\$ 4	
Actuarial gains (losses)	(1)	(8)	(3)	Income (loss) before income taxes
Tax impact	8	(3)	1	Income tax (expense) benefit
	(3)	1	-	Net income (loss)
	\$ 5	\$ (2)	\$ 1	

(a) Amounts in parentheses indicate losses.

(b) These accumulated other comprehensive loss components are included in the computation of net periodic pension and OPEB costs (see Note 17 - Retirement Plans for additional details).

**(15) Segment Information:**

We operate in one reportable segment. Frontier provides both regulated and unregulated voice, data and video services to residential, business and wholesale customers and is typically the incumbent voice services provider in its service areas.

We have utilized the aggregation criteria to combine our seven regional operating segments because all of these regional operations share similar characteristics, in that they provide the same products and services to similar customers using comparable technologies in all of the states in which we operate. The regulatory structure is generally similar.

**(16) Quarterly Financial Data (Unaudited):**

(\$ in millions, except per share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Total Year
<b>2016</b>					
Revenue	\$ 1,355	\$ 2,608	\$ 2,524	\$ 2,409	\$ 8,896
Operating income	58	311	264	255	888
Net loss attributable to Frontier common shareholders	(240)	(80)	(134)	(133)	(587)
Basic net loss per share attributable to Frontier common shareholders	\$ (0.21)	\$ (0.07)	\$ (0.12)	\$ (0.12)	\$ (0.51)
<b>2015</b>					
Revenue	\$ 1,371	\$ 1,368	\$ 1,424	\$ 1,413	\$ 5,576
Operating income	163	193	207	182	745

Basic net loss per share attributable to Frontier common shareholders	\$ (0.05)	\$ (0.03)	\$ (0.07)	\$ (0.14)	\$ (0.29)

The quarterly net income (loss) per share amounts are rounded to the nearest cent. Annual net income (loss) per share may vary depending on the effect of such rounding. The change in revenue, operating income, net

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

income (loss) and net income (loss) per share during the second quarter of 2016 and each subsequent quarter of 2016 reflects the additional results of the CTF operations related to the CTF Acquisition, as described further in Note 3.

We recognized \$11 million (\$7 million or \$0.01 per share after tax) and \$80 million (\$52 million or \$0.04 per share after tax) of restructuring costs and other charges during the third and fourth quarters of 2016, respectively.

We recognized \$1 million of restructuring costs and other charges during each of the third and fourth quarters of 2015.

We recognized \$138 million (\$85 million or \$0.07 per share after tax), \$127 million (\$76 million or \$0.07 per share after tax), \$122 million (\$74 million or \$0.06 per share after tax) and \$49 million (\$48 million or \$0.04 per share after tax) of acquisition and integration costs during the first, second, third and fourth quarters of 2016, respectively.

We recognized \$57 million (\$35 million or \$0.04 per share after tax), \$35 million (\$23 million or \$0.02 per share after tax), \$58 million (\$27 million or \$0.02 per share after tax) and \$86 million (\$47 million or \$0.04 per share after tax) of acquisition and integration costs during the first, second, third and fourth quarters of 2015, respectively.

(17) Retirement Plans:

We sponsor a noncontributory defined benefit pension plan covering a significant number of our former and current employees and other postretirement benefit plans that provide medical, dental, life insurance and other benefits for covered retired employees and their beneficiaries and covered dependents. The pension plan and postretirement benefit plans are closed to the majority of our newly hired employees. The benefits are based on years of service and final average pay or career average pay. Contributions are made in amounts sufficient to meet ERISA funding requirements while considering tax deductibility. Plan assets are invested in a diversified portfolio of equity and fixed-income securities and alternative investments.

The accounting results for pension and other postretirement benefit costs and obligations are dependent upon various actuarial assumptions applied in the determination of such amounts. These actuarial assumptions include the following: discount rates, expected long-term rate of return on plan assets, future compensation increases, employee turnover, healthcare cost trend rates, expected retirement age, optional form of benefit and mortality. We review these assumptions for changes annually with our independent actuaries. We consider our discount rate and expected long-term rate of return on plan assets to be our most critical assumptions.

The discount rate is used to value, on a present value basis, our pension and other postretirement benefit obligations as of the balance sheet date. The same rate is also used in the interest cost component of the pension and postretirement benefit cost determination for the following year. The measurement date used in the selection of our discount rate is the balance sheet date. Our discount rate assumption is determined annually with assistance from our independent actuaries based on the pattern of expected future benefit payments and the prevailing rates available on long-term, high quality corporate bonds that approximate the benefit obligation.

As of December 31, 2016, 2015 and 2014, we utilized an estimation technique that is based upon a settlement model (Bond:Link) that permits us to closely match cash flows to the expected payments to participants. This rate can change from year-to-year based on market conditions that affect corporate bond yields.

As a result of the technique described above, Frontier is utilizing a discount rate of 4.10% as of December 31, 2016 for its qualified pension plan, compared to rates of 4.50% and 4.10% in 2015 and 2014, respectively. The discount rate for postretirement plans as of December 31, 2016 was a range of 4.10% to 4.30% compared to a range of 4.50% to 4.70% in 2015 and 4.10% to 4.20% in 2014.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

As a result of the CTF Acquisition, the Frontier Communications Pension Plan (the Plan) was remeasured. This remeasurement resulted in a decrease in the discount rate from 4.50% at December 31, 2015 to 4.00% at the date of the CTF Acquisition. This change in the discount rate resulted in a remeasurement charge to other comprehensive income (loss) of \$105 million during 2016.

The expected long-term rate of return on plan assets is applied in the determination of periodic pension and postretirement benefit cost as a reduction in the computation of the expense. In developing the expected long-term rate of return assumption, we considered published surveys of expected market returns, 10 and 20 year actual returns of various major indices, and our own historical 5 year, 10 year and 20 year investment returns. The expected long-term rate of return on plan assets is based on an asset allocation assumption of 40% in long-duration fixed income securities, and 60% in equity securities and other investments. We review our asset allocation at least annually and make changes when considered appropriate. Our pension asset investment allocation decisions are made by the Retirement Investment & Administration Committee (RIAC), a committee comprised of members of management, pursuant to a delegation of authority by the Retirement Plan Committee of the Board of Directors. The RIAC is responsible for reporting its actions to the Retirement Plan Committee. Asset allocation decisions take into account expected market return assumptions of various asset classes as well as expected pension benefit payment streams. When analyzing anticipated benefit payments, management considers both the absolute amount of the payments as well as the timing of such payments. In 2016, 2015 and 2014, our expected long-term rate of return on plan assets was 7.50%, 7.75%, and 7.75%, respectively. For 2017, we will assume a rate of return of 7.50%. Our pension plan assets are valued at fair value as of the measurement date. The measurement date used to determine pension and other postretirement benefit measures for the pension plan and the postretirement benefit plan is December 31.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Pension Benefits

The following tables set forth the pension plan's projected benefit obligations, fair values of plan assets and the pension benefit liability recognized on our consolidated balance sheets as of December 31, 2016 and 2015 and the components of total pension benefit cost for the years ended December 31, 2016, 2015 and 2014:

<i>(\$ in millions)</i>	2016	2015
<u>Change in projected benefit obligation (PBO)</u>		
PBO at beginning of year	\$ 2,142	\$ 2,210
Service cost	88	55
Interest cost	122	88
Actuarial (gain)/loss	137	(88)
Benefits paid	(155)	(128)
Connecticut Acquisition transfer	-	5
CTF Acquisition PBO	1,108	-
Special termination benefits	23	-
PBO at end of year	<u>\$ 3,465</u>	<u>\$ 2,142</u>
<u>Change in plan assets</u>		
Fair value of plan assets at beginning of year	\$ 1,572	\$ 1,673
Fair value of plan assets for the CTF operations as of acquisition date	1,120	-
Fair value of plan assets for the Connecticut Operations as of acquisition date	-	5
Actual return on plan assets	201	(40)
Employer contributions	28	62
Benefits paid	(155)	(128)
Fair value of plan assets at end of year	<u>\$ 2,766</u>	<u>\$ 1,572</u>
Funded status	<u>\$ (699)</u>	<u>\$ (570)</u>
<u>Amounts recognized in the consolidated balance sheet</u>		
Pension and other postretirement benefits - current	\$ -	\$ (9)
Pension and other postretirement benefits - noncurrent	<u>\$ (699)</u>	<u>\$ (561)</u>
Accumulated other comprehensive loss	<u>\$ 647</u>	<u>\$ 584</u>

In connection with the completion of the CTF Acquisition, certain employees were transferred to the Frontier Communications Pension Plan (the Plan) effective April 1, 2016. Assets of \$1,108 million related to the CTF Acquisition were transferred from Verizon and the Verizon pension plan trusts during 2016.

<i>(\$ in millions)</i>	2016	2015	2014
<u>Components of total pension benefit cost</u>			
Service cost	\$ 88	\$ 55	\$ 42
Interest cost on projected benefit obligation	122	88	80
Expected return on plan assets	(168)	(129)	(99)
Amortization of unrecognized loss	40	29	20
Net periodic pension benefit cost	<u>82</u>	<u>43</u>	<u>43</u>
Special termination benefits	23	-	-
Total pension benefit cost	<u>\$ 105</u>	<u>\$ 43</u>	<u>\$ 43</u>

The expected amortization of unrecognized loss in 2017 is \$35 million.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

We capitalized \$25 million, \$20 million and \$15 million of pension and OPEB expense into the cost of our capital expenditures during the years ended December 31, 2016, 2015 and 2014, respectively, as the costs relate to our engineering and plant construction activities

The plan's weighted average asset allocations at December 31, 2016 and 2015 by asset category are as follows:

<u>Asset category:</u>	<u>2016</u>	<u>2015</u>
Equity securities	50 %	47 %
Debt securities	38 %	46 %
Alternative investments	11 %	6 %
Cash and other	1 %	1 %
Total	<u>100 %</u>	<u>100 %</u>

The plan's expected benefit payments over the next 10 years are as follows

<u>(\$ in millions)</u>	<u>Amount</u>
2017	\$ 375
2018	308
2019	293
2020	281
2021	271
2022-2026	<u>1,224</u>
Total	<u>\$ 2,752</u>

We made total contributions to our pension plan of \$28 million during 2016 consisting of cash payments of \$13 million and the contribution of real property with a fair value of \$15 million, as described below.

See Note 7 for further discussion of a Frontier contribution of real estate property in 2016 with an aggregate fair value of \$15 million for the purpose of funding a portion of its contribution obligations to the Plan.

We made total cash contributions to our pension plan during 2015 and 2014 of \$62 million and \$83 million, respectively.

The accumulated benefit obligation for the plan was \$3,363 million and \$2,048 million at December 31, 2016 and 2015, respectively.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Assumptions used in the computation of annual pension costs and valuation of the year-end obligations were as follows:

	2016	2015	2014
Discount rate - used at year end to value obligation	4.10 %	4.50 %	4.10 %
Discount rate - used to compute annual cost	4.50 %	4.10 %	4.90 %
Expected long-term rate of return on plan assets	7.50 %	7.75 %	7.75 %
Rate of increase in compensation levels	2.50 %	2.50 %	2.50 %

Postretirement Benefits Other Than Pensions—"OPEB"

The following tables set forth the OPEB plans' benefit obligations, fair values of plan assets and the postretirement benefit liability recognized on our consolidated balance sheets as of December 31, 2016 and 2015 and the components of total postretirement benefit cost for the years ended December 31, 2016, 2015 and 2014.

<u>(\$ in millions)</u>	2016	2015
<u>Change in benefit obligation</u>		
Benefit obligation at beginning of year	\$ 626	\$ 727
CTF Acquisition PBO	276	-
Service cost	19	19
Interest cost	37	30
Plan participants' contributions	5	5
Actuarial (gain)/loss	(18)	(115)
Benefits paid	(23)	(25)
Connecticut Acquisition transfer	-	5
Plan change	-	(20)
Special termination benefits	3	-
Benefit obligation at end of year	<u>\$ 925</u>	<u>\$ 626</u>
<u>Change in plan assets</u>		
Fair value of plan assets at beginning of year	\$ -	\$ -
Plan participants' contributions	5	5
Employer contribution	18	20
Benefits paid	(23)	(25)
Fair value of plan assets at end of year	<u>\$ -</u>	<u>\$ -</u>
Funded status	<u>\$ (925)</u>	<u>\$ (626)</u>
<u>Amounts recognized in the consolidated balance sheet</u>		
Pension and other postretirement benefits - current	<u>\$ (23)</u>	<u>\$ (24)</u>
Pension and other postretirement benefits - noncurrent	<u>\$ (902)</u>	<u>\$ (602)</u>
Accumulated other comprehensive (gain) loss	<u>\$ (29)</u>	<u>\$ (20)</u>

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

<u>(\$ in millions)</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
<u>Components of total postretirement benefit cost:</u>			
Service cost	\$ 19	\$ 19	\$ 11
Interest cost on projected benefit obligation	37	30	22
Amortization of prior service cost / (credit)	(9)	(5)	(4)
Amortization of unrecognized loss	1	8	3
Net periodic postretirement benefit cost	48	52	32
Special termination benefits	3	-	-
Total postretirement benefit cost	<u>\$ 51</u>	<u>\$ 52</u>	<u>\$ 32</u>

The expected amortization of prior service credit in 2017 is \$9 million and the expected amortization of unrecognized loss in 2017 is \$0.

Assumptions used in the computation of annual OPEB costs and valuation of the year-end OPEB obligations were as follows:

	<u>2016</u>	<u>2015</u>	<u>2014</u>
Discount rate - used at year end to value obligation	4.10% - 4.30%	4.50% - 4.70%	4.10% - 4.20%
Discount rate - used to compute annual cost	4.50% - 4.70%	4.10% - 4.20%	4.90% - 5.20%

The OPEB plan's expected benefit payments over the next 10 years are as follows:

<u>(\$ in millions)</u>	<u>Gross Benefit</u>	<u>Medicare Part D Subsidy</u>	<u>Total</u>
2017	\$ 24	-	\$ 24
2018	30	-	30
2019	38	-	38
2020	44	-	44
2021	49	-	49
2022-2026	298	1	299
Total	<u>\$ 483</u>	<u>\$ 1</u>	<u>\$ 484</u>

For purposes of measuring year-end benefit obligations, we used, depending on medical plan coverage for different retiree groups, a 7.00% annual rate of increase in the per-capita cost of covered medical benefits, gradually decreasing to 5.00% in the year 2024 and remaining at that level thereafter. The effect of a 1% increase in the assumed medical cost trend rates for each future year on the aggregate of the service and interest cost components of the total postretirement benefit cost would be \$1 million and the effect on the accumulated postretirement benefit obligation for health benefits would be \$20 million. The effect of a 1% decrease in the assumed medical cost trend rates for each future year on the aggregate of the service and interest cost components of the total postretirement benefit cost would be \$(1) million and the effect on the accumulated postretirement benefit obligation for health benefits would be \$(19) million.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The amounts in accumulated other comprehensive (gain) loss that have not yet been recognized as components of net periodic benefit cost at December 31, 2016 and 2015 are as follows:

(\$ in millions)	Pension Plan		OPEB	
	2016	2015	2016	2015
Net actuarial loss	\$ 647	\$ 584	\$ 1	\$ 20
Prior service cost/(credit)	-	-	(30)	(40)
Total	\$ 647	\$ 584	\$ (29)	\$ (20)

The amounts recognized as a component of accumulated other comprehensive loss for the years ended December 31, 2016 and 2015 are as follows:

(\$ in millions)	Pension Plan		OPEB	
	2016	2015	2016	2015
Accumulated other comprehensive (gain) loss at beginning of year	\$ 584	\$ 532	\$ (20)	\$ 119
Net actuarial gain (loss) recognized during year	(40)	(29)	(1)	(8)
Prior service (cost) credit recognized during year	-	-	9	5
Net actuarial loss (gain) occurring during year	103	81	(17)	(136)
Net amount recognized in comprehensive income (loss) for the year	63	52	(9)	(139)
Accumulated other comprehensive (gain) loss at end of year	\$ 647	\$ 584	\$ (29)	\$ (20)

#### 401(k) Savings Plans

We sponsor employee retirement savings plans under section 401(k) of the Internal Revenue Code. The plans cover substantially all full-time employees. Under certain plans, we provide matching contributions. Employer contributions were \$48 million, \$28 million and \$21 million for 2016, 2015 and 2014, respectively.

#### (18) Fair Value of Financial Instruments:

Fair value is defined under GAAP as the exit price associated with the sale of an asset or transfer of a liability in an orderly transaction between market participants at the measurement date. Valuation techniques used to measure fair value under GAAP must maximize the use of observable inputs and minimize the use of unobservable inputs. In addition, GAAP establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value.

The three input levels in the hierarchy of fair value measurements are defined by the FASB generally as follows:

Input Level	Description of Input
Level 1	Observable inputs such as quoted prices in active markets for identical assets.
Level 2	Inputs other than quoted prices in active markets that are either directly or indirectly observable.
Level 3	Unobservable inputs in which little or no market data exists

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The following tables represent Frontier's pension plan assets measured at fair value on a recurring basis as of December 31, 2016 and 2015.

(\$ in millions)	Fair Value Measurements at December 31, 2016			
	Total	Level 1	Level 2	Level 3

Notes to Consolidated Financial Statements

The following table provides further information regarding the redemption of the Plan's Level 3 investments as of December 31, 2016:

<i>(\$ in millions)</i>	<u>Fair Value</u>	<u>Redemption Frequency</u>	<u>Redemption Notice Period</u>	<u>Liquidation Period</u>
Interest in Limited Partnerships and Limited Liability Companies				
MS IFHF SVP LP Cayman <sup>(a)</sup>	\$ 1	Through liquidation of underlying investments	None	4 years
MS IFHF SVP LP Alpha <sup>(a)</sup>	1	Through liquidation of underlying investments	None	4 years
RII World Timberfund, LLC <sup>(b)</sup>	6	Through liquidation of underlying investments	None	10 years
426 E Casino Road, LLC <sup>(c)</sup>	15	Through liquidation of underlying investments	None	NA
100 Comm Drive, LLC <sup>(c)</sup>	9	Through liquidation of underlying investments	None	NA
100 CTE Drive, LLC <sup>(c)</sup>	13	Through liquidation of underlying investments	None	NA
6430 Oakbrook Parkway, LLC <sup>(c)</sup>	25	Through liquidation of underlying investments	None	NA
8001 West Jefferson, LLC <sup>(c)</sup>	26	Through liquidation of underlying investments	None	NA
1500 MacCorkle Ave SE, LLC <sup>(c)</sup>	14	Through liquidation of underlying investments	None	NA
400 S. Pike Road West, LLC <sup>(c)</sup>	1	Through liquidation of underlying investments	None	NA
601 N US 131, LLC <sup>(c)</sup>	1	Through liquidation of underlying investments	None	NA
9260 E. Stockton Blvd., LLC <sup>(c)</sup>	6	Through liquidation of underlying investments	None	NA
Total Interest in Limited Partnerships and Limited Liability Companies	<u>\$ 118</u>			

(a) The partnerships' investment objective is to seek capital appreciation principally through investing in investment funds managed by third party investment managers who employ a variety of alternative investment strategies. These instruments are subject to certain withdrawal restrictions. The Plan is in the process of liquidating its interest in the partnerships and distributions are expected to be made over the next four years.

(b) The fund's objective is to realize substantial long-term capital appreciation by investing in timberland properties primarily in South America and Australia. This investment is subject to certain withdrawal restrictions.

(c) The entity invests in commercial real estate properties that are leased to Frontier. The leases are triple net, whereby Frontier is responsible for all expenses, including but not limited to, insurance, repairs and maintenance and payment of property taxes.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

The following table represents the Plan's Level 3 financial instruments for its interest in certain limited partnerships and limited liability companies, which all use the direct capitalization valuation technique to measure the fair value of those financial instruments as of December 31, 2016, and the significant unobservable inputs and ranges of values for those inputs:

Instrument	Property	Fair Value	Capitalization Rate
Interest in Limited Partnerships and Limited Companies	426 E. Casino Road, LLC	\$ 15	7.00%
	100 Comm Drive, LLC	\$ 9	7.75%
	100 CTE Drive, LLC	\$ 13	9.00%
	6430 Oakbrook Parkway, LLC	\$ 25	7.75%
	8001 West Jefferson, LLC	\$ 26	8.50%
	1500 MacCorkle Ave SE, LLC	\$ 14	8.25%
	400 S. Pike Road West, LLC	\$ 1	8.50%
	601 N US 131, LLC	\$ 1	9.50%
	9260 E. Stockton Blvd., LLC	\$ 6	7.50%

The following table summarizes the carrying amounts and estimated fair values for long-term debt at December 31, 2016 and 2015. For the other financial instruments including cash, accounts receivable, restricted cash, long-term debt due within one year, accounts payable and other current liabilities, the carrying amounts approximate fair value due to the relatively short maturities of those instruments.

<u>(\$ in millions)</u>	2016		2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt	\$ 17,560	\$ 17,539	\$ 15,508	\$ 14,767

The fair value of our long-term debt is estimated based upon quoted market prices at the reporting date for those financial instruments.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements**(19) Commitments and Contingencies:**

Although from time to time we make short-term purchasing commitments to vendors with respect to capital expenditures, we generally do not enter into firm, written contracts for such activities.

In June 2015, Frontier accepted the Federal Communications Commission's (FCC) offer of support to price cap carriers under the Connect America Fund (CAF) Phase II program, which is intended to provide long-term support for broadband in high cost unserved or underserved areas. This program provides \$332 million in annual support, including \$49 million in annual support related to the properties acquired in the CTF Acquisition, through 2020 to make available 10 Mbps downstream/1 Mbps upstream broadband service to approximately 774,000 households across certain of the 29 states where we now operate. To the extent we do not enable the required number of households with 10 Mbps downstream/1 Mbps upstream broadband service by the end of the CAF Phase II term, we will be required to return a portion of the funds previously received.

On April 28, 2016, the FCC completed its inquiry into whether certain terms and conditions contained in specifically identified special access tariff pricing plans offered by four carriers, including Frontier, are just and reasonable. The FCC held that certain of the tariff terms for business data TDM services, specifically DS1s and DS3s, were unreasonable. Specifically, the FCC struck down "excessive" early termination fees and "all-or-nothing" provisions. Frontier has revised its tariffs in accordance with the FCC's Order. The FCC's decision has no retroactive effect, and we anticipate no material impact to Frontier from it.

The FCC deferred the issue of how its ruling will affect customers currently purchasing services from these tariffs to a Notice of Proposed Rulemaking. It is seeking comment on proposed changes to the way the FCC regulates traditional special access services and on a proposal to adopt pricing rules for Ethernet services in markets that are found to be "noncompetitive." The potential impact to Frontier of this proceeding is unknown, though any pending initiative could adversely affect our operations or financial results.

We are party to various legal proceedings (including individual, class and putative class actions) arising in the normal course of our business covering a wide range of matters and types of claims including, but not limited to, general contracts, billing disputes, rights of access, taxes and surcharges, consumer protection, trademark and patent infringement, employment, regulatory, tort, claims of competitors and disputes with other carriers.

In October 2013, the California Attorney General's Office notified certain Verizon companies, including one of the subsidiaries that we acquired in the CTF Acquisition, of potential violations of California state hazardous waste statutes primarily arising from the disposal of electronic components, batteries and aerosol cans at certain California facilities. We are cooperating with this investigation. While penalties relating to the alleged violations could exceed \$100,000, we do not expect that any penalties ultimately incurred will be material.

We accrue an expense for pending litigation when we determine that an unfavorable outcome is probable and the amount of the loss can be reasonably estimated. Legal defense costs are expensed as incurred. None of our existing accruals for pending matters, after considering insurance coverage, is material. We monitor our pending litigation for the purpose of adjusting our accruals and revising our disclosures accordingly, when required. Litigation is, however, subject to uncertainty, and the outcome of any particular matter is not predictable. We will vigorously defend our interests in pending litigation, and as of this date, we believe that the ultimate resolution of all such matters, after considering insurance coverage or other indemnities to which we are entitled, will not have a material adverse effect on our consolidated financial position, results of operations, or our cash flows.

We conduct certain of our operations in leased premises and also lease certain equipment and other assets pursuant to operating leases. The lease arrangements have terms ranging from 1 to 99 years and several contain rent escalation clauses providing for increases in monthly rent at specific intervals. When rent escalation clauses exist, we record annual rental expense based on the total expected rent payments on a straight-line basis over the lease term. Certain leases also have renewal options. Renewal options that are reasonably assured are included in determining the lease term.

FRONTIER COMMUNICATIONS CORPORATION AND SUBSIDIARIES  
Notes to Consolidated Financial Statements

Future minimum rental commitments for all long-term noncancelable operating leases as of December 31, 2016 are as follows:

<u>(\$ in millions)</u>	<u>Operating Leases</u>	
Year ending December 31:		
2017	\$	91
2018		18
2019		18
2020		23
2021		21
Thereafter		76
Total minimum lease payments	<u>\$</u>	<u>247</u>

Total rental expense included in our consolidated statements of operations for the years ended December 31, 2016, 2015 and 2014 was \$137 million, \$119 million and \$100 million, respectively.

We are party to contracts with several unrelated long distance carriers. The contracts provide fees based on traffic they carry for us subject to minimum monthly fees.

At December 31, 2016, the estimated future payments for obligations under our noncancelable long distance contracts and service agreements are as follows:

<u>(\$ in millions)</u>	<u>Amount</u>	
Year ending December 31:		
2017	\$	42
2018		41
2019		7
2020		6
2021		2
Thereafter		10
Total	<u>\$</u>	<u>108</u>

At December 31, 2016, we have outstanding performance letters of credit as follows:

<u>(\$ in millions)</u>	<u>Amount</u>	
CNA Financial Corporation (CNA)	\$	49
AIG Insurance		75
All other		1
Total	<u>\$</u>	<u>125</u>

CNA serves as our agent with respect to general liability claims (auto, workers compensation and other insured perils of Frontier). As our agent, they administer all claims and make payments for claims on our behalf. We reimburse CNA for such services upon presentation of their invoice. To serve as our agent and make payments on our behalf, CNA requires that we establish a letter of credit in their favor. CNA could potentially draw against this letter of credit if we failed to reimburse CNA in accordance with the terms of our agreement. The amount of the letter of credit is reviewed annually and adjusted based on claims history.

None of the above letters of credit restrict our cash balances.

This Annual Report on Form 10-K is for the year ended December 31, 2016. Any statement contained in a prior periodic report shall be deemed to be modified or superseded for purposes of this Annual Report to the extent that a statement herein modifies or supersedes such statement. The Securities and Exchange Commission ("SEC") allows us to "incorporate by reference" information that we file with them, which means that we can disclose important information by referring you directly to those documents. Information incorporated by reference is considered to be part of this Annual Report.

Mediacom Broadband LLC is a Delaware limited liability company and a wholly-owned subsidiary of Mediacom Communications Corporation, a Delaware corporation. Mediacom Broadband Corporation is a Delaware corporation and a wholly-owned subsidiary of Mediacom Broadband LLC. Mediacom Broadband Corporation was formed for the sole purpose of acting as co-issuer with Mediacom Broadband LLC of debt securities and does not conduct operations of its own.

References in this Annual Report to "we," "us," or "our" are to Mediacom Broadband LLC and its direct and indirect subsidiaries (including Mediacom Broadband Corporation), unless the context specifies or requires otherwise. References in this Annual Report to "Mediacom" or "MCC" are to Mediacom Communications Corporation.

### **Cautionary Statement Regarding Forward-Looking Statements**

You should carefully review the information contained in this Annual Report and in other reports or documents that we file from time to time with the SEC.

In this Annual Report, we state our beliefs of future events and of our future financial performance. In some cases, you can identify those so-called "forward-looking statements" by words such as "anticipates," "believes," "continue," "could," "estimates," "expects," "intends," "may," "plans," "potential," "predicts," "should" or "will," or the negative of those and other comparable words. These forward-looking statements are not guarantees of future performance or results, and are subject to risks and uncertainties that could cause actual results to differ materially from historical results or those we anticipate as a result of various factors, many of which are beyond our control. Factors that may cause such differences to occur include, but are not limited to:

- increased levels of competition from direct broadcast satellite operators, local phone companies, other cable providers, wireless communications companies, providers of over-the-top video, and other services that compete for our customers;
- lower demand for our services from existing and potential residential and business customers due to increased competition, weakened economic conditions or other factors;
- our ability to contain the continued increases in video programming costs, or to raise video rates to offset, in whole or in part, the effects of such costs, including retransmission consent fees;
- an acceleration in bandwidth consumption by high-speed data customers at rates greater than current expectations, which could require unplanned network investments and meaningfully increase our capital expenditures;
- our ability to continue to grow our business services customer base, and associated revenues, which has continued to make increasing contributions to our results of operations;
- our ability to realize the anticipated benefits from the major initiatives under MCC's plan for approximately \$1 billion in total capital expenditures during the three years ending December 31, 2018, as further described in this Annual Report;
- our ability to successfully adopt new technologies and introduce new products and services, or enhance existing ones, to meet customer demands and preferences;
- our ability to secure hardware, software and operational support for the delivery of products and services to consumers;
- disruptions or failures of our network and information systems, including those caused by "cyber-attacks," natural disasters or other events outside our control;
- our reliance on certain intellectual property rights, and not infringing on the intellectual property rights of others;
- our ability to generate sufficient cash flows from operations to meet our debt service obligations;
- our ability to refinance future debt maturities on favorable terms, if at all;
- changes in assumptions underlying our critical accounting policies;
- changes in legislative and regulatory matters that may cause us to incur additional costs and expenses; and
- other risks and uncertainties discussed in this Annual Report for the year ended December 31, 2016 and other reports or documents that we file from time to time with the SEC.

Statements included in this Annual Report are based upon information known to us as of the date that this Annual Report is filed with the SEC, and we assume no obligation to update or alter our forward-looking statements made in this Annual Report, whether as a result of new information, future events or otherwise, except as required by applicable federal securities laws.

**Table of Contents****PART I****ITEM 1. BUSINESS****Mediacom Communications Corporation**

We are a wholly-owned subsidiary of Mediacom Communications Corporation (“Mediacom” or “MCC”). MCC is the fifth largest cable operator in the U.S., serving almost 1.4 million residential and business customer relationships in smaller markets primarily in the Midwest and Southeast. MCC offers a wide array of information, communications and entertainment services to households and businesses, including video, high-speed data (“HSD”), phone, and home security and automation. Through Mediacom Business, MCC provides scalable broadband communications solutions to commercial and public sector customers of all sizes, and sells advertising and production services under the OnMedia brand.

MCC’s cable systems are owned and operated through our operating subsidiaries and those of Mediacom LLC, another wholly-owned subsidiary of MCC. As of December 31, 2016, MCC’s cable systems passed an estimated 2.8 million homes and served approximately 828,000 video customers, 1,156,000 HSD customers and 479,000 phone customers, aggregating 2.5 million primary service units (“PSUs”).

MCC is a privately-owned company. An entity wholly-owned by Rocco B. Commisso and related parties is the sole shareholder of MCC, a C corporation. Mr. Commisso is MCC’s founder, Chairman and Chief Executive Officer. MCC manages us pursuant to management agreements with our operating subsidiaries. See Note 9 in our Notes to Consolidated Financial Statements.

**Mediacom Broadband LLC**

We are a holding company and do not have any operations or hold any assets other than our investments in our operating subsidiaries. As of December 31, 2016, our cable systems passed an estimated 1.5 million homes and served approximately 463,000 video customers, 643,000 HSD customers and 264,000 phone customers, aggregating 1.4 million PSUs. As of the same date, our cable systems served 754,000 residential and business customer relationships.

Our phone number is (845) 443-2600 and our principal executive offices are located at 1 Mediacom Way, Mediacom Park, New York, 10918. Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to such reports filed with or furnished to the SEC under sections 13(a) or 15(d) of the Securities Exchange Act of 1934 are made available free of charge on MCC’s website ([www.mediacomcc.com](http://www.mediacomcc.com)) as soon as reasonably practicable after such reports are electronically filed with or furnished to the SEC. The information posted on MCC’s website is not incorporated into our SEC filings.

**Recent Developments***MCC’s Capital Plan*

In 2016, MCC announced a plan for approximately \$1 billion of total capital expenditures to be made by us and Mediacom LLC during the three years ending December 2018 (“MCC’s Capital Plan”). Among the planned initiatives under MCC’s Capital Plan include:

- “Project Gigabit,” a wide-scale deployment of next-generation DOCSIS 3.1 technology that allows the provisioning of 1 gigabit per second (“Gbps”) HSD service to substantially all of MCC’s homes passed;
- “Project Open Road,” which will connect over 70,000 new commercial locations that contain multiple potential customers in an effort to continue to grow business services revenues at an accelerated rate;
- Residential line extensions resulting in at least 50,000 additional homes passed; and
- Development of community Wi-Fi access points throughout high-traffic commercial and public areas.

During the year ended December 31, 2016, MCC made an aggregate \$335.2 million of capital expenditures, of which \$179.9 million was invested by us. We expect similar levels of capital investments by us and MCC over each of the next two years, with our portion of the initiatives outlined above approximating a level that is commensurate with our capital expenditures as a percentage of MCC’s total capital expenditures. We have already made meaningful progress under MCC’s Capital Plan, including the recent announcement that MCC has become the first major U.S. cable company to have fully installed the necessary equipment to transition to the DOCSIS 3.1 platform. We believe these initiatives will allow us to continue to improve our competitive position for both residential and business services customers in our markets, with additional future revenue and cash flow growth driven by incremental gains in market share than we would have experienced otherwise.

## Table of Contents

### **Description of Our Business**

The following table provides an overview of selected operating data for our cable systems as of December 31:

	<u>2016</u>	<u>2015</u>	<u>2014</u>	<u>2013</u>	<u>2012</u>
Estimated homes passed (1)	1,504,000	1,496,000	1,499,000	1,495,000	1,493,000
<i>Video</i>					
Video customers (2)	463,000	480,000	500,000	528,000	558,000
Video penetration (3)	30.8%	32.1%	33.4%	35.3%	37.4%
<i>High Speed Data</i>					
HSD customers (4)	643,000	605,000	564,000	534,000	505,000
HSD penetration (5)	42.8%	40.4%	37.6%	35.7%	33.8%
<i>Phone</i>					
Phone customers (6)	264,000	239,000	218,000	207,000	190,000
Phone penetration (7)	17.6%	16.0%	14.5%	13.8%	12.7%
<i>Primary Service Units (PSUs)</i>					
PSUs (8)	1,370,000	1,324,000	1,282,000	1,269,000	1,253,000
PSU penetration (9)	91.1%	88.5%	85.5%	84.9%	83.9%
<i>Customer Relationships</i>					
Customer relationships (10)	754,000	732,000	710,000	710,000	708,000

- (1) Estimated homes passed represent the number of single residence homes, apartments and condominium units that we can connect to our distribution system without further extending the transmission lines, based on best available information.
- (2) Represents customers receiving video service. Business services video customers that are billed on a bulk basis are converted into equivalent video customers by dividing their associated revenues by the applicable full-price residential video rate, which is generally consistent with the methodology used in determining payments made to programmers. Video customers include connections to schools, libraries, local government offices and employee households that may not be charged for basic or expanded video service, but may be charged for higher tier video, HSD, phone or other services. Our methodology of calculating the number of video customers may not be identical to those used by other companies offering similar services.
- (3) Represents video customers as a percentage of estimated homes passed.
- (4) Represents customers receiving HSD service. Small- to medium-sized business HSD customers are converted to equivalent HSD customers by dividing their associated revenues by the applicable full-price residential HSD rate. Medium- to large-sized business customers who take our enterprise network services are not counted as HSD customers. Our methodology of calculating HSD customers may not be identical to those used by other companies offering similar services.
- (5) Represents HSD customers as a percentage of estimated homes passed.
- (6) Represents customers receiving phone service. Small- to medium-sized business phone customers are converted to equivalent phone customers by dividing their associated revenues by the applicable full-price residential phone rate. Customers who take our IP-enabled voice trunk service are not counted as phone customers. Our methodology of calculating phone customers may not be identical to those used by other companies offering similar services.
- (7) Represents phone customers as a percentage of estimated homes passed.
- (8) Represents the sum of video, HSD and phone customers.
- (9) Represents PSUs as a percentage of our estimated homes passed.
- (10) Represents the total number of residential and business customers that receive at least one service, without regard to the amount of or which service(s) customers purchase.

### **Services**

We offer video, HSD and phone services individually and in bundled packages to residential and small- to medium-sized business ("SMB") customers over our hybrid fiber and coaxial cable ("HFC") network, and provide fiber-based network and transport services to medium- and large-sized businesses, governments and educational institutions. We also sell advertising to local, regional and national advertisers on television and digital platforms, and offer home security and automation services to residential customers.

## Table of Contents

Our services are typically offered on a subscription basis, with installation fees, monthly rates and related charges associated with the services, equipment and features customers choose. We generally offer discounted packages for new customers, and for those who take multiple services. Customers are typically billed in advance on a monthly basis, and additional charges may apply for installation and other one-time items. Residential customers are generally not subject to minimum-term contracts, while substantially all of our business services customers are under contracts that typically have 3 to 7 year terms.

### **Our Service Areas**

Approximately 75% of our homes passed are in the top 110 television markets in the United States, or designated market areas (“DMAs”), substantially all of which rank between the 65<sup>th</sup> and 110<sup>th</sup> largest.

Our largest markets are:

- Des Moines and Cedar Rapids, Iowa;
- The Quad Cities area in Illinois and Iowa, comprising Bettendorf, Davenport, East Moline, Moline and Rock Island;
- Springfield, Jefferson City and Columbia, Missouri; and
- Columbus, Albany and Valdosta, Georgia.

### **Residential Services**

We market our residential services individually and in bundled packages, with discounts generally available for the subscription to bundled packages or other combinations of services. As of December 31, 2016, approximately 57% of our residential customers took two or more of our services, including about 25% that took all three.

#### *Video*

We offer a wide variety of video services, with multiple packages, tiers and equipment options to appeal to a variety of customer preferences and demographics. Residential video customers are charged a monthly fee that varies depending on the level of video service and equipment taken, with additional revenues generated from one-time installation expenses, video-on-demand (“VOD”) fees and other ancillary purchases.

Our residential video customers receive, at a minimum, a limited basic tier that includes local broadcast stations and public, government and leased access channels, with additional packages and tiers available that include national cable networks and regional sports networks, foreign-language and international programming, digital music channels and other specialty programming. Video customers may also subscribe to premium network programming from HBO, Showtime, Starz and Cinemax that provides commercial-free original programming, movies, live and taped sporting events and concerts, and other special events. We have recently introduced “skinny bundles” as a value proposition to video customers that do not require certain national and regional sports networks, but seek a lower cost option that offers most of the non-sports content in our most popular video packages. Most of our video programming, including many titles in our VOD library, is available in a high-definition (“HD”) format that offers a higher resolution picture, improved audio quality and a wide-screen format.

Our VOD service provides video customers access to over 27,000 titles, including a wide selection of movies, national broadcast and cable network shows, music videos, and locally produced events. Most of our VOD content carries no additional charge when customers take a content package that includes the affiliated content. Special event programs, including live concerts, sporting events, and first-run movies are also available on a pay-per-view basis. Our digital video recorder (“DVR”) service allows customers to record and store content to view at their convenience, along with the ability to pause and rewind live programming.

Our video service generally requires the use of a digital set-top box (“set-top”), which typically provides an interactive, on-screen program guide and access to our VOD library. A rapidly increasing number of our video customers take our next-generation Internet Protocol (“IP”) set-top that offers a cloud-based, graphically-rich TiVo guide with integrated access and search functionality to certain Internet-based, or “over-the-top,” (“OTT”) video services such as Netflix, Hulu, and YouTube, along with a multi-room DVR service and the ability to download certain content to personal devices. In 2017, we plan to introduce a new, lower-cost, IP set-top that offers the TiVo guide and OTT video services, but without the required equipment for DVR service.

## Table of Contents

We also enable video customers to watch certain programming on personal devices connected to the Internet connection, whether in or outside their home, which we refer to as "TV Everywhere." Our video customers currently have access to online content for up to 76 channels, and we plan to further expand our "TV Everywhere" line-up in 2017. Our video customers that take a set-top with the TiVo guide may also remotely view programming listings and schedule and manage DVR recordings remotely through our mobile apps and online portal.

### *HSD*

We offer high-speed Internet access to suit the requirements of our HSD customers, with minimum downstream speeds of 60 megabits per second ("Mbps"), and packages available that provide downstream speeds up to 200 Mbps. Through Project Gigabit, we have installed the necessary equipment to transition substantially all our homes passed to the DOCSIS 3.1 platform, which will allow us to introduce packages offering speeds of up to 1 Gbps across most of our markets in 2017. We will also deploy community Wi-Fi access points throughout high-traffic commercial and public areas in our markets, which we believe will add additional value for our HSD customers.

Our residential HSD customers are charged a monthly fee that varies depending on the speeds and usage allowance associated with their level of HSD service. Our residential HSD service requires a modem, which most of our customers lease from us for a monthly fee. We also offer wireless gateways that combine a modem with a wireless router and phone adapter for an additional monthly fee, which ensures the performance of multiple personal devices used at the same time.

### *Phone*

Our residential phone customers enjoy unlimited nationwide calling and other popular features, including Caller ID, call waiting, call forwarding, three-way calling and, for those who also take our video service, the ability to receive Caller ID information on the customer's television. Residential phone customers are charged a monthly fee, with voicemail services, directory assistance and international calling plans made available for an additional fee. Our residential phone service requires equipment that is either included in the wireless gateway taken by many customers that take both HSD and phone service, or is typically leased by our customers for a monthly fee.

### **Business Services**

Mediacom Business provides SMB customers video, HSD and phone services similar to those offered to our residential customers, along with a multi-line phone service, music services and other features. We also furnish custom fiber solutions, with transmission speeds up to 10 Gbps, for medium- and large-sized businesses and institutions, with IP-enabled trunk-based voice services, and point-to-point, multi-point wide area, and local area network solution. We also supply high-capacity fiber transport and dedicated Internet access to national and regional carriers to support cell tower backhaul, Ethernet and regional transport. Our initiation of "Project Open Road" will extend our network to tens of thousands of new commercial locations that contain multiple businesses, in an effort to sustain or accelerate our rate of growth in business services revenues.

### **Advertising**

We sell advertising and production services to local, regional and national customers under our OnMedia brand. As part of the programming agreements with national cable networks, we generally receive an allocation of scheduled advertising time, typically two minutes per hour, and insert commercials during this allotted time. Our local sales team generally sells the placement of advertising and, in certain markets, we have entered into agreements with other cable operators in the same DMA where we sell advertising on behalf of these other operators, or vice versa, facilitating customers' ability to purchase local advertising in multiple markets. We also sell digital ad placement and other media services as an extension of our advertising business.

### **Marketing and Sales**

We employ a wide range of sales channels to reach current and potential customers, including outbound telemarketing, direct mail, in-bound customer care centers, retail locations, door-to-door field technician sales, and an e-commerce site. Customers are directed to our inbound call centers or website through various forms of advertising, including television advertising on our own cable systems. Mediacom Business has a dedicated sales force and outbound telemarketing, and we have several relationships with third-party agents who sell our services. Xtream is our marketing brand for bundled packages that include video with DVR service and set-tops with the TiVo guide, HSD with a wireless gateway, and phone service. We believe the simplified pricing and value proposition of our Xtream bundles has positively influenced the market's perception of our products and services, and has driven higher levels of sales activity.

## Table of Contents

### **Customer Care**

We continue to make investments that improve the reliability and quality of our services to enhance our customers' experience. Our field operations team focuses on providing a quality experience during installation and service calls, with the goal of resolving any technical issues on the first attempt. We offer 30 minute arrival windows and evening and weekend availability for installation and service calls to provide more convenient scheduling for our customers. Field activity is scheduled and routed seamlessly with remote dispatching and workflow management and GPS systems that facilitate on-time arrival for customer appointments. Our technicians are equipped with diagnostic and monitoring tools that determine the quality of service at the customer's home in real-time.

Our customer care group has multiple contact centers with dedicated customer service, sales, and technical support representatives available at all times, and our virtual contact center allows us to manage resources efficiently and effectively function as a single, unified call center. Our website and mobile applications allow customers to manage their billing account, utilize self-help tools and schedule appointments. Customers who are seeking to speak to an agent for further assistance may use the "call back" feature where our technical staff will call the customer when available, eliminating the need for excessive wait times. We maintain a strong presence on many social networking websites and message boards, including Facebook and Twitter, allowing us the ability to be more proactive in customer service, along with providing customers another point of contact.

### **Technology**

Our services are delivered through a fiber-rich, technologically-advanced, route-diverse network that consists of a national backbone; large-scale, centralized platforms; regional networks and headends; neighborhood nodes; and last-mile connectivity to customer homes or businesses. We utilize an IP ring architecture that minimizes service outages through its redundant design, and our network operations center supports and continuously monitors our network. We believe our network infrastructure provides several advantages over most of our competitors, including significantly more bandwidth capacity, greater reliability and higher quality of service.

Our national backbone is connected to leading carriers, with a presence in several major carrier hotels, and allows us to introduce new services across all our markets and realize greater economic efficiencies and scale. Our national backbone connects centralized platforms that control video content delivery, HSD and phone services, provisioning, customer care and email, and provides access to several aggregation and exchange points in our regional networks to ensure network redundancy and enhanced quality of service.

The last-mile connectivity is delivered through our HFC network, transporting content via laser-fed fiber-optic cable by regional networks and headends to local nodes, and by coaxial cable from these nodes to our customers. We have installed back-up power supplies that are intended to allow our services to continue to be available in the event of a commercial power outage. For certain business customers that have high-capacity requirements, we extend fiber-optic cable from the node site directly to the customer's premise.

HSD customers have consumed rapidly increasing amounts of bandwidth over the last several years, largely driven by increased usage of OTT video, and we expect this trend to continue. To provide additional network capacity to facilitate meaningful bandwidth consumption increases, we have deployed multiple tools to recapture bandwidth and optimize our network to allow for faster HSD speeds and greater levels of capacity. In substantially all of our markets, we have converted video service to an "all-digital" delivery platform, freeing up spectrum that was previously used to deliver analog video signals that require more capacity. We have installed the necessary equipment to transition to the DOCSIS 3.1 platform in substantially all of our markets, which allows us to use our existing network capacity in a more efficient manner. These bandwidth reclamation and optimization efforts have enabled continuing increases in the speeds and usage allowances in our HSD service packages, and we will further increase our maximum speeds to 1 Gbps in many of our markets in 2017.

### **Community Relations**

We are dedicated to fostering strong relations with the communities we serve and believe our local involvement strengthens the awareness and favorable perception of our brand. We support local charities and community causes with scholarships, events and campaigns to raise funds and supplies for persons in need, and in-kind donations that include production services and free airtime on cable networks. As of December 31, 2016, we provided free video service to over 1,700 schools and free HSD service to over 200 schools, and also provided free video service to over 1,600 government buildings, libraries and not-for-profit hospitals, nearly 200 of which also receive free HSD service.

## Table of Contents

### Franchises

As of December 31, 2016, we served 501 communities under non-exclusive franchises granted to us by local or state governmental authorities. Many of the provisions of local franchises are subject to federal regulation under the Communications Act of 1934, as amended (the "Cable Act"). Our franchises typically impose numerous conditions, including requirements around construction of the cable network in certain of the franchise areas; customer service requirements; the broad categories of programming required; the provision of free service to schools and other public institutions; and the provision and funding of public access channels. Many of the provisions of local franchises are subject to a fee based on gross revenues of specified cable services that we typically pass through directly to the customer. The Cable Act prohibits such franchise fees from exceeding 5%.

We believe that we have satisfactory relationships with our franchising communities, and have never had a franchise revoked, or had a community refuse to consent to a franchise transfer to us. The Cable Act provides comprehensive renewal procedures, which require that an incumbent franchisee's renewal application be assessed on its own merits and not as part of a comparative process with competing applications. For more information around our franchises, see "Legislation and Regulation – *State and Local Regulation – Franchise Matters.*"

### Sources of Supply

#### *Programming*

The programming content carried by our cable systems is generally obtained pursuant to fixed-term contracts with suppliers whose compensation is typically based on a fixed monthly fee per video customer, subject to contractual escalations. Most of our contracts are entered into directly with the programmers, but we also secure content through a programming cooperative in certain cases where we receive more favorable pricing or terms than are available to us independently. In general, we attempt to secure longer-term programming contracts, ranging from three to eight years. We also have various retransmission consent agreements that permit us to retransmit the signals of local broadcast television stations. Under FCC rules, local broadcast stations must elect, on a three-year cycle, either "must-carry" rights or "retransmission consent," where we are not allowed to carry the station's signals without its permission. Retransmission consent is generally conditioned upon our payment of cash fees and/or our carriage of one or more of their affiliated stations or programming networks.

Programming expenses have historically been our largest single expense item, and these costs have historically increased substantially more than the inflation rate on a per-unit basis, particularly for sports programming and retransmission consent. Consolidation among media companies and independent broadcast station groups has been significant over the past several years, and may further continue. As a result of such consolidation, many popular cable networks are owned by large media conglomerates, and many local broadcast stations are owned by large independent television broadcast groups that own, control or represent a significant number of local broadcast stations across the country and, in some cases, multiple stations in the same market.

Moreover, many of those powerful owners of programming require us to purchase their content in bundles and dictate how we offer them to our customers. Consequently, we have little or no ability to individually or selectively negotiate for networks or broadcast stations, to forego purchasing networks or stations that generate low customer interest, to offer sports programming services, such as ESPN and regional sports networks, on one or more separate tiers, or to offer networks or stations on an a la carte basis to give our customers more choice and potentially lower their costs. In many instances, such programmers have created additional networks and migrated popular programming, particularly sports programming, to these new networks, which has contributed to the increases in our programming costs. Additionally, we believe certain programmers may also demand higher fees from us in an effort to partially offset declines in their advertising revenue as more advertisers allocate a greater portion of their spending to Internet advertising. All of these practices increase our programming expense, and while such growth in programming expenses can be offset, in whole or in part, by rate increases to our video customers, our video gross margins will continue to decline if they cannot be fully offset.

#### *HSD Service*

We deliver HSD service through route-diverse fiber networks that are owned by us or leased from third parties and through backbone networks that are operated by third parties. We pay fees for leased circuits based on the amount of capacity and for Internet connectivity based on the amount of HSD traffic over the provider's network.

#### *Phone Service*

Our phone service is delivered through a Voice over Internet Protocol ("VoIP") platform over a route-diverse infrastructure. We source certain services from outside parties to support our phone service, the most significant of which are long-distance services from a

number of Tier 1 carriers, E911 database management, and leased circuits from incumbent local exchange carriers (“ILECs”).

## Table of Contents

### *Set-Tops, Programming Guides, Cable Modems and Network Equipment*

We purchase set-tops from a limited number of suppliers, principally Arris Group Inc., and lease these devices to customers on a monthly basis. We provide our customers with set-top program guides from TiVo Inc. and Rovi Corporation. We mainly purchase cable modems from Hitron Technologies and Technicolor SA, and routers, switches and other network equipment from Cisco Systems, Casa Technology Systems and Huawei Technologies Co. Ltd.

### **Competition**

We face competition for residential and business customers from a wide range of communication, entertainment and information services. Our residential video, HSD and phone services have historically faced, and continue to face, intense competition from existing providers in the areas of price, product offerings and service reliability. Rapid technological advances and changes in consumer behavior and demands have led to an increasing number of companies that offer new products and services that compete with ours, including OTT video and wireless Internet and phone services. Our business services generally compete with existing providers who may have a stronger foothold and customer penetration in our markets, and we continue to face a number of challengers for advertising sales.

Many of our current and potential future competitors have strong brand name recognition and significant financial resources, which may allow them to react to technological developments or changes in consumer behavior quicker than us. Recent consolidation has resulted in certain competitors becoming larger and offering additional services. AT&T's acquisition of DirecTV in 2015 enhanced their ability to offer bundled wireline and wireless services, and facilitated their recent launch of "DirecTV Now," an OTT video service that competes with ours. In 2016, AT&T announced a proposed merger with Time Warner Inc. which, if completed, would integrate a variety of video content with its established distribution platforms. Further consolidation may occur in the future, which may further pressure our competitive position.

### *Video*

#### *Direct Broadcast Satellite ("DBS") Providers*

We face our most significant competition for video customers from DBS providers, principally DirecTV, which is owned by AT&T, and DISH Network, whom offer satellite-delivered video packages and collectively have over 33 million video customers throughout the U.S., based on publicly filed information. These DBS providers offer similar video packages to ours, including certain features we may not provide including ad-skipping functionality and exclusive content such as DirecTV's agreement with the National Football League. DBS providers also have certain other advantages over us, including a national brand and marketing platform, and greater operational efficiencies resulting from their ability to avoid certain expenses which we incur, principally franchise fees and property taxes. We believe aggressive promotional pricing and advanced customer equipment offered by these DBS providers have contributed to our historical video customer losses.

#### *Phone Companies*

Certain phone companies have built fiber-based networks that allow them to offer video service, which is then bundled with Internet, phone and, in some cases, wireless, services. As of December 31, 2016, approximately 5% and 4% of our homes passed faced wireline video competition from AT&T U-Verse and CenturyLink Prism, respectively, based on internal estimates. The video services offered by these phone companies are substantially similar to ours. In markets where phone companies do not offer wireline video service, they have typically bundled their Internet and/or phone services with a DBS video service.

#### *Other Overbuilders*

We compete with other operators known as "overbuilders" that operate under non-exclusive franchises granted by local authorities and offer video service to markets representing approximately 24% (excluding the phone companies noted above) of our homes passed. The level of competition provided by these overbuilders varies, depending on the quality of their network and services offered, but they generally market bundled packages similar to ours. Some of these competitors, including municipally-owned entities, may be granted franchises on more favorable terms than ours, or enjoy other advantages, such as exemptions from property taxes or regulatory requirements, and pole rental charges, to which we are subject. We believe there has been limited expansion of such entities in our markets in the past several years.

## Table of Contents

### *OTT Video*

Our video service faces increasing competition from a variety of OTT video providers that offer streaming and downloading of video content over the Internet, often available for a monthly subscription priced meaningfully lower than our video service, or free of charge. These services have become increasingly accessible as technological advances have facilitated the ability of consumers to watch OTT video on their television and a variety of platforms and devices. The quality and amount of content offered by these providers continues to improve, and some OTT video services, including Netflix, Hulu and Amazon Prime Video have also recently introduced high-quality original content that is exclusive to their respective service. OTT video packages have also been recently made available, or will soon become available including DISH's SlingTV, DirecTV Now, YouTube TV and Hulu that replicate the linear video experience and provide additional competition to our video service. Additionally, certain content providers, including HBO, Showtime and CBS, have begun selling their programming direct to consumers over the Internet, bypassing distribution by a traditional video provider and additional content providers have announced intentions to do so in 2017 and beyond.

If OTT video providers continue to add popular content, including services that offer linear video, substitution of our video services may accelerate. Additionally, because OTT video is very popular with younger demographics, there may be an increasing substitution of traditional video if newly formed households were more likely to choose one or several OTT video services as their only video provider. However, we believe most OTT video services are used to supplement traditional video, and we have facilitated their usage by integrating many third-party video services on our next-generation set-top. While increasing use of OTT video services may lead to lower demand for our VOD and, to a lesser extent, video service in general, we expect the associated bandwidth requirements will result in greater HSD customer growth and retention given our competitive position.

### *Other*

We also face competition for our video service from over-the-air broadcast television, of which the extent of such competition for our video service is dependent on the quality and quantity of broadcast signals available through an "off-air" antenna.

## **HSD**

### *Phone Companies*

Our HSD service faces its most significant competition from local phone companies, including CenturyLink, AT&T and Windstream, that generally offer digital subscriber line ("DSL") Internet service, which is limited by technical constraints to maximum speeds considerably slower than ours. These phone companies generally market their DSL service at a lower price than our HSD service, but in certain markets where they have upgraded portions of their network to allow for faster speeds, their higher-speed DSL tiers were typically available at similar or higher prices than ours.

Some phone companies have upgraded portions of their network to a fiber-to-the-node ("FTTN") system that allows for Internet speeds comparable to our 60 Mbps service or fiber-to-the-home ("FTTH") systems, which are capable of providing Internet speeds as fast as our highest speeds. AT&T and CenturyLink have upgraded their networks to FTTN delivery systems in several of our markets, and AT&T has committed to deploying FTTH service to 12.5 million nation-wide locations within four years of their 2016 acquisition of DirecTV. We do not compete with FTTH services in a meaningful number of our markets. We generally believe our markets have been a lower priority for these phone companies, given the higher costs associated with building out such fiber networks in lower density markets such as ours, as compared to larger metropolitan markets. However, we may face greater competition for HSD customers if these companies were to continue, or accelerate, the deployment of fiber in markets which we compete.

### *Wireless Providers*

We also face competition from wireless providers such as AT&T, Verizon Wireless, T-Mobile and Sprint that offer third and fourth generation, or "3G" and "4G," wireless Internet service. While certain households or individuals with minimal bandwidth requirements may fully substitute their wireline Internet service for a wireless one, we do not believe that wireless Internet service offers a full replacement to our HSD service given higher data usage costs, slower speeds and lower reliability. However, the level of competition provided by wireless Internet services may increase in the future with the deployment of fifth generation, or "5G" technology and the recent introduction of packages with unlimited bandwidth consumption.

### *Other*

Our HSD service also faces limited competition from other providers, including many of the overbuilders noted above, and certain municipalities and commercial entities that have built fiber networks and offer Internet service that competes with ours. In a limited

## **Table of Contents**

number of markets outside our service area, Google has launched a FTTH service, and has announced plans to expand to additional markets. Some local governments in our footprint are considering or actively pursuing the subsidized build out of additional fiber and/or Wi-Fi networks. Our HSD service also faces competition from certain commercial venues, such as retail shopping areas, restaurants and airports that offer Wi-Fi Internet service, sometimes free of charge. If any of these providers were to significantly expand services in our markets, we would face additional competitive pressures.

### ***Phone***

Our phone service faces its most significant competition from the phone companies noted above that offer wireline phone service that is substantially similar to ours and, increasingly, from the wireless providers noted above. As households continue to utilize cell phones as their only phone service, the number of customers taking a wireline phone service has meaningfully declined, a trend we believe will continue.

Our phone service also competes with providers of IP-based phone services such as Vonage, Skype and magicJack, and from other forms of communication such as text and video messaging.

### ***Business Services***

Our business services primarily compete for SMB customers with local phone companies, many of which have had a historical advantage given long-term relationships with such customers, a nation-wide footprint that allows them to more effectively serve multiple locations, and existing networks built in certain commercial areas that we do not currently serve. However, in recent years, we have aggressively marketed our business services and expanded our network into additional commercial areas, which have led to significant customer and revenue increases associated with business services, which we expect to continue.

Our cell tower backhaul and enterprise-level services also face competition from these local phone companies as well as other carriers, including metro and regional fiber-based carriers.

### ***Advertising***

We compete for the sale of advertising against a wide variety of media outlets, including local broadcast stations, national broadcast networks, national and regional programming networks, local radio broadcast stations, local and regional newspapers, magazines and Internet sites. Competition has increased and will likely continue to increase as digital and other new formats for advertising seek to attract the same advertisers.

### ***Other Competition***

We also face competition for all of our services with all other sources of leisure, news, information and entertainment, including movies, sporting or other live events, radio broadcasts, home video services, console games, print media and the Internet. There can be no assurance that these or other existing, proposed, or as yet undeveloped technologies will not become dominant in the future and render our products and services less profitable or even obsolete.

### **Employees**

As of December 31, 2016, we had 2,445 employees. None of our employees are organized under, or covered by, a collective bargaining agreement. We consider our relations with our employees to be satisfactory.

## Table of Contents

### **Legislation and Regulation**

#### *General*

Federal, state and local laws regulate the development and operation of cable systems and, to varying degrees, the services we offer. Significant legal requirements imposed on us because of our status as a cable operator, or by virtue of the services we offer, are described below.

Many of our operations are regulated to a varying degree under different provisions of federal law, principally Title I (information services), Title II (telecommunications services) and Title VI (cable services) of the Communications Act of 1934, as amended (“Communications Act”).

#### *Recent Significant FCC Activity*

##### *HSD Regulatory Reclassification and Network Neutrality*

In 2015, the FCC adopted its Open Internet Order changing the historical classification of HSD Services, commonly referred to as broadband Internet access services (“BIAS”), from lightly regulated Title I information services to telecommunications services subject to regulation under Title II of the Communications Act. Although the FCC acted to forebear enforcement of many of Title II’s provisions, the FCC may rescind any or all such forbearance at will. With the Republicans in charge of both houses of Congress and the White House, reports have circulated that legislation may be introduced to undo in whole or in part the effect of the 2015 Order. We cannot predict if such changes will be adopted or what the impact of those changes may be.

The Open Internet Order established three “bright line rules” that restrict blocking of content, throttling of speed and paid prioritization of traffic (giving certain traffic priority in return for consideration). More generally, a provider of BIAS also cannot unreasonably interfere with or unreasonably disadvantage: (i) consumers’ ability to select, access or use lawful content, applications, services or devices; or (ii) edge providers’ ability to make lawful content, applications, services or devices available to consumers. To determine what conduct is “reasonable” or “unreasonable,” the FCC will resolve complaints on a case-by-case basis. Until complaints are filed and resolved, the scope of permitted conduct is not known and this creates regulatory uncertainty.

The Open Internet Order mandates additional consumer disclosures regarding promotional rates, fees, surcharges and data caps or allowances, and packet loss measures. Network management practices must continue to be disclosed with the added requirement of disclosure if a network practice is likely to significantly affect an end user’s use of the service. The Open Internet Order distinguishes so-called “legitimate network management” practices from other business practices. Our interconnections with other networks in order to exchange broadband traffic are now subject to FCC regulation. These arrangements will be regulated on a case-by-case basis if and as complaints are filed. Until complaints against ISPs are filed and resolved, it is difficult to determine the standards that distinguish permitted from proscribed conduct and, therefore, the potential impact upon our existing interconnection arrangements or future needs.

On October 27, 2016, the FCC adopted new privacy and data security requirements for BIAS providers pursuant to its Title II authority. These include specific disclosures and the timing of such disclosures, enhanced choice by subscribers over the use of sensitive data and data breach notification requirements. On March 1, 2017, the FCC stayed the effective date of the new rules to allow time to work with the Federal Trade Commission to create a comprehensive and consistent framework with respect to online privacy. We cannot predict if or when new rules will be issued or what effect they will have, if any, on our business.

We provide HSD services to business customers. On April 28, 2016, the FCC adopted a Tariff Investigation Order and Further Notice of Proposed Rulemaking that sought, among other things, to impose price caps on the provision of business data services. In late January 2017, a proposed order was removed from the FCC’s list on items on circulation, meaning that it could no longer be voted upon. It is unclear whether the proposed order will be reinstated, the new FCC Chairman would propose an alternative order or no order would be issued at all.

##### *Preemption of State Restriction of Municipal-Based Broadband Systems*

In a limited number of our markets, our products and services face competition from municipally owned electric utilities that have constructed telecommunications systems. Certain of the states in which we operate have adopted laws that impose conditions upon the conduct of a telecommunications business by local municipalities. For example, some states may require voter approval and prohibit cross-subsidization of the telecommunications business by electric, gas and water utility customers. In 2015, the FCC adopted a Memorandum Opinion and Order preempting certain state laws imposing restrictions or conditions upon the ability of municipal

utilities in North Carolina and Tennessee to offer or expand broadband service. However, on August 10, 2016, the United States Court of Appeals for the Sixth Circuit struck down the FCC's ban and the FCC did not to appeal.

## Table of Contents

### *Federal Telecommunications Act Rewrite*

Members of Congress have discussed undertaking a rewrite of the telecommunications laws that is necessary to develop laws that can be applied on a technology- and platform-neutral basis. Currently, each technology, regardless of whether it offers a similar service, e.g., multichannel video programming, broadband access or phone service, is regulated in a silo subject to a different regulatory regime. Such treatment often disadvantages one technology compared to others. We cannot predict whether such a rewrite and/or network neutrality legislation to establish a statutory framework to replace the Open Internet Order will occur. Any changes in regulation that would result from a rewrite could affect all of our products and services, the outcome of which, if any, cannot be predicted.

### *Privacy and Data Security*

How we collect, use, disclose and retain personally identifiable information and other sensitive information about our customers and what we do in the event of a data security breach is governed by federal and state laws. In addition, many states in which we operate have also enacted customer privacy statutes, including obligations to notify customers when certain customer information is accessed or believed to have been accessed without authorization. These state provisions are in some cases more restrictive than those in federal law.

The Cable Act imposes a number of restrictions on the manner in which cable operators can collect, disclose and retain data about individual system customers and requires cable operators to take actions to prevent unauthorized access to such information. The statute also requires that the system operator periodically provide all customers with written information about its policies, including the types of information collected; the use of such information; the nature, frequency and purpose of any disclosures; the period of retention; the times and places where a customer may have access to such information; the limitations placed on the cable operator by the Cable Act; and a customer's enforcement rights. In the event that a cable operator is found to have violated the customer privacy provisions of the Cable Act, it could be required to pay damages, attorneys' fees and other costs. Certain of these Cable Act requirements have been modified by more recent federal laws. Other federal laws currently impact the circumstances and the manner in which we disclose certain customer information and future federal legislation may further impact our obligations.

As more fully discussed in the *Recent Significant FCC Activity – HSD Regulatory Reclassification and Network Neutrality* section above, our HSD Service has become subject to new requirements, some of which have and others which are scheduled to take effect, regarding the collection, use and disclosure of certain customer, usage and network information.

In addition to any privacy laws that may apply to our provision of VoIP services, we must comply with additional privacy provisions contained in the FCC's CPNI regulations related to certain telephone customer records. In addition to employee training programs and other operating and disciplinary procedures, the CPNI rules require establishment of customer authentication and password protections, limit the means that we may use for such authentication, and provide customer approval prior to certain types of uses or disclosures of CPNI.

### *Pole Attachment Regulation*

The Cable Act requires certain public utilities, including all local telephone companies and electric utilities, except those owned by municipalities and co-operatives, to provide cable operators and telecommunications carriers with nondiscriminatory access to poles, ducts, conduits and rights-of-way at just and reasonable rates. This right of access is beneficial to us. Federal law also requires the FCC to regulate the rates, terms and conditions imposed by such public utilities for cable systems' use of utility pole and conduit space unless state authorities have demonstrated to the FCC that they adequately regulate pole attachment rates, as is the case in certain states in which we operate. In the absence of state regulation, the FCC will regulate pole attachment rates, terms and conditions only in response to a formal complaint. The FCC established a rate formula which governs the maximum rate certain utilities may charge for attachments to their poles and conduit by companies providing telecommunications services, including cable operators.

In 2011, the FCC adopted an Order modifying the pole attachment rules to promote broadband deployment. Previously, poles subject to the FCC attachment rules used a formula that resulted in lower rates for cable attachments and higher rates for telecommunication services attachments. The FCC had previously ruled that the provision of Internet services would not, in and of itself, trigger use of this new formula and the U.S. Supreme Court affirmed this decision.

Pursuant to the FCC's 2011 Order, the telecommunications attachment rate formula would yield results that would approximate the attachment rates for cable television operators. On November 17, 2015, the FCC adopted an Order on Reconsideration that revised the FCC's pole attachment rate formula to lessen the disparity between the cable and telecommunications rates that arose under certain

factual scenarios. As a result, in almost all circumstances the cable and telecommunications rates now approximate each other. Thus, even though it remains unclear whether the reclassification of broadband service as a telecommunications service pursuant to the Open

## Table of Contents

Internet Order discussed more fully in *Recent Significant FCC Activity – HSD Regulatory Reclassification and Network Neutrality* above, will impact our ability to continue to seek attachment rates computed as a cable operator as opposed to as a telecommunications provider, the practical effect of that distinction has been virtually eliminated. However, to the extent the FCC's action lowers the pole attachment costs of our competitors, that could adversely impact us.

### *Universal Service Fund*

In recent years, the FCC has adopted a series of reforms to the Universal Service Fund ("USF") support mechanism to help to make broadband available to areas that do not have or would not have broadband service. In addition, the FCC has expanded the types of services that must contribute to the USF. Since 2006, VoIP providers must contribute to the USF, and the FCC has a pending rulemaking that, if adopted, could impose fees on currently non-assessable services such as broadband Internet access.

Any increased costs resulting from having to contribute to USF, however, would increase our cost of service to consumers and that could adversely affect our business. We cannot predict how these various changes either may add costs or burdens to our existing VoIP and broadband services or how they may potentially benefit those who provide competing services.

### *Cable System Operations and Video Services*

#### *Federal Regulation*

Title VI of the Communications Act, referred to as the Cable Act, establishes the principal federal regulatory framework for our operation of cable systems and for the provision of our video services. The Cable Act allocates primary responsibility for enforcing the federal policies among the FCC and state and local governmental authorities.

#### *Content Regulations*

##### *Must Carry and Retransmission Consent*

The FCC's regulations require local commercial television broadcast stations to elect once every three years whether to require a cable system to carry the primary signal of their stations, subject to certain exceptions, commonly called must-carry, or to negotiate the terms by which the cable system may carry the station on its cable systems, commonly called retransmission consent. The most recent elections took effect through December 31, 2017. Through January 1, 2020, Congress bars broadcasters from entering into exclusive retransmission consent agreements. Congress also requires all parties to negotiate retransmission consent agreements in good faith.

The Satellite Television Extension and Localism Act Reauthorization Act ("STELAR") prohibits stations not under common ownership from engaging in joint negotiations with multichannel video programming distributors ("MVPDs") and restricting broadcasters from generally limiting carriage of stations that are significantly viewed or otherwise entitled to carriage, and eliminating the restriction on removing or repositioning stations during certain periods of time when network ratings are assessed, known as "sweeps." Pursuant to STELAR, in 2015 the FCC issued a Notice of Proposed Rulemaking ("NPRM") to review the "totality of the circumstances" test applied, in part, to determine whether parties have attempted to negotiate retransmission consent in good faith and whether certain other actions should evidence bad faith. We cannot predict whether the FCC will modify its rules or the impact of any such modifications. If the FCC fails to modify its rules, such action could be seen as an endorsement of current broadcaster negotiating tactics that often introduce challenges to the negotiation of retransmission consent agreements.

In 2014, the FCC issued an NPRM revisiting the definition of an MVPD, whether it should be technology-neutral to allow inclusion of certain Internet-delivered video services, the impact of such change on various industry players and consumers, and how to ensure any change promotes competition and broadband adoption. We cannot predict when, or if, the FCC will implement any new rules or change existing rules or the impact that any new rules or legislation may have on our business. Any new rules or legislation that would strengthen the relative negotiating position of broadcasters or the competitive position of Internet-delivered video service providers could have an adverse effect on our business.

We carry both must-carry broadcast stations and broadcast stations that have granted retransmission consent. A significant number of local broadcast stations carried by our cable systems have elected to negotiate for retransmission consent, and we have entered into retransmission consent agreements with substantially all of them. Retransmission consent agreements representing approximately 37% of our video customers receiving local broadcast stations will expire and require renegotiation prior to January 1, 2018.

## Table of Contents

### *Syndicated Exclusivity/Network Non-duplication/Sports Blackout*

Pursuant to FCC regulations, under certain circumstances, broadcasters can bar us from carrying certain network and syndicated programming. In 2014, the FCC issued a Further NPRM to expand the record on whether it should eliminate the ability of broadcasters to impose such restrictions on us.

### *Other Content Regulations*

On February 18, 2016, the FCC issued an order reapportioning the responsibilities regarding closed captioning quality, between video programming distributors ("VPDs") and video programming owners and producers. Initially, the burden had ultimately been borne by VPDs. Moreover, the FCC also adopted a burden-shifting model for investigation of complaints that can, in certain instances, shift the investigatory obligations to the owners or producers.

Pursuant to the Twenty-First Century Communications and Video Accessibility Act of 2010, the FCC has adopted rules that, among other things, impose certain accessibility requirements on navigation devices and digital apparatus that utilize encryption or other forms of conditional access to display video programming. Such devices must make on-screen text menus and guides for the display or selection of MVPD programming audibly accessible and make video programming accessible to individuals who are blind or visually impaired. These rules also require MVPDs to not rely solely on voice controls to activate closed captioning, establish customer notification requirements on manufacturers to publicize the availability of audible on-screen program guides, established information and documentation that must be made available to persons with disabilities and specified customer service training requirement topics for MVPDs.

### *Use of Our Cable Systems by the Government and Unrelated Third Parties*

The Cable Act allows local franchising authorities and unrelated third parties to obtain access to a portion of our cable systems' channel capacity for their own use through channels set aside for PEG programming and requires most cable operators to designate a significant portion of its activated channel capacity for commercial leased access by third parties to provide programming that may compete with services offered by the cable operator.

### *Cable Equipment*

The Cable Act and FCC regulations gave consumers the right to purchase set-top converters from third parties as long as the equipment does not harm the network, does not interfere with services purchased by other customers and is not used to receive unauthorized services. In 2016, the FCC adopted an NPRM and Memorandum Opinion and Order that removed the ban on the integration of security and non-security function in set-tops and proposed new rules aimed at increasing the availability of navigation devices or apps that have the functional equivalency of set-tops from providers unaffiliated with an MVPD. To accomplish this, the FCC proposed rules requiring MVPDs to split their signal into three core information streams: (i) *Service discovery*: information about what programming is available to the consumer, such as the channel listing and video-on-demand lineup, and what is on those channels; (ii) *Entitlements*: information about what a device is allowed to do with content, such as recording; and (iii) *Content delivery*: the video programming itself. The FCC declined to establish standards, instead recommending that they be established by an unnamed independent open standards body. It remains unclear whether these rules, if adopted, would interfere with contractual security requirements of programming networks, impair subscriber privacy, impair or duplicate an MVPD's ability to capture and use viewing information or otherwise adversely impact the subscriber experience. In late January 2017, a proposed order was removed from the FCC's list of items on circulation, meaning that it could no longer be voted upon. It is unclear whether the proposed order will be reinstated, the new FCC Chairman would propose an alternative order or no order would be issued at all. Should these or similar rules ultimately be enacted, we cannot predict what reengineering of our systems would be required, if any, or the cost of implementing and providing such split streams of information. We also cannot predict whether a subscriber's use of such alternative device or app would impair our accessibility to or the value of viewing information.

### *Multiple Dwelling Unit Building Wiring*

The FCC has adopted cable inside wiring rules to provide a more specific procedure for the disposition of residential home wiring and internal building wiring that belongs to an incumbent cable operator that is forced by the building owner to terminate its cable services in a building with multiple dwelling units. The FCC has issued rules voiding existing, and prohibiting future, exclusive service contracts for services to multiple dwelling unit or other residential developments, however, the FCC has affirmed the permissibility of bulk rate agreements and exclusive marketing agreements. Our inability to secure such express rights in the future may adversely affect our business to customers residing in multiple dwelling unit buildings and certain other residential developments.

## Table of Contents

### *Copyright*

Our cable systems typically include in their channel line-ups local and distant television and radio broadcast signals, which are protected by the copyright laws. We generally do not obtain a license to use this programming directly from the owners of the copyrights associated with this programming, but instead comply with an alternative federal compulsory copyright licensing process. In exchange for filing certain reports and contributing a percentage of our revenues to a federal copyright royalty pool, we obtain blanket permission to retransmit the copyrighted material carried on these broadcast signals. The nature and amount of future copyright payments for broadcast signal carriage cannot be predicted at this time.

DBS providers, to become more competitive with cable operators, operate under a similar statutory compulsory license that unlike that of cable operators, has a fixed term. In 2014, Congress extended the satellite compulsory license through 2019. As part of that legislation, Congress required the United States Government Accountability Office (“GAO”) to conduct another study regarding carriage and copyright issues relating to broadcast programming and the impact of the current regulatory regime on consumers. Pursuant to an earlier mandate, in 2011, GAO issued a report to Congress that found that the impact of a phase-out of the compulsory copyright licenses would have an uncertain impact on the market and regulatory environment. In part, the scheme (i.e., direct licensing, collective licensing or sublicensing) that would replace the compulsory licenses would impact the outcome. Additionally, in 2008 and 2011 the Copyright Office issued reports to Congress recommending phasing out the distant signal compulsory license. We cannot predict whether Congress will eliminate the cable compulsory license, or what scheme would replace it, if any; however, any loss of the current compulsory license could increase our costs.

### *State and Local Regulation*

#### *Franchise Matters*

Our cable systems use local streets and rights-of-way. Consequently, we must comply with state and local regulation, which is typically imposed through the franchising process. We have non-exclusive franchises granted by municipal, state or other local government entities for virtually every community in which we operate that authorize us to construct, operate and maintain our cable systems. Our franchises generally are granted for fixed terms and in many cases are terminable if we fail to comply with material provisions. The terms and conditions of our franchises vary materially from jurisdiction to jurisdiction. Each franchise granted by a municipal or local governmental entity generally contains provisions governing:

- franchise fees;
- franchise term;
- system construction and maintenance obligations;
- system channel capacity;
- design and technical performance;
- customer service standards;
- sale or transfer of the franchise; and
- territory of the franchise.

Although franchising matters have traditionally been regulated at the local level through a franchise agreement and/or a local ordinance, many states now allow or require cable service providers to bypass the local process and obtain franchise agreements or equivalent authorizations directly from state government. Many of the states in which we operate, including Illinois, Iowa, Missouri and Wisconsin make state-issued franchises available, which typically contain less restrictive provisions than those issued by municipal or other local government entities. State-issued franchises in many states generally allow local telephone companies or others to deliver services in competition with our cable service without obtaining equivalent local franchises. In states where available, we are generally able to obtain state-issued franchises upon expiration of our existing franchises. Our business may be adversely affected to the extent that our competitors are able to operate under franchises that are more favorable than our existing local franchises. While most franchising matters are dealt with at the state and/or local level, the Cable Act provides oversight and guidelines to govern our relationship with local franchising authorities whether they are at the state, county or municipal level.

## Table of Contents

### *HSD Service*

#### *Federal Regulation and Network Neutrality*

For a complete discussion of the federal regulatory status and network neutrality requirements, see *Recent Significant FCC Activity – HSD Regulatory Reclassification and Network Neutrality*.

#### *Digital Millennium Copyright Act*

We regularly receive notices of claimed infringements by our HSD service users. The owners of copyrights have been active in seeking to prevent use of the Internet to violate their rights. In many cases, their claims of infringement are based on the acts of customers of an Internet service provider — for example, a customer's use of an Internet service or the resources it provides to post, download or disseminate copyrighted music, movies, software or other content without the consent of the copyright owner or to seek to profit from the use of the goodwill associated with another person's trademark. In some cases, copyright and trademark owners have sought to recover damages from the Internet service provider, as well as or instead of the customer. The law relating to the potential liability of Internet service providers in these circumstances is unsettled. In 1996, Congress adopted the Digital Millennium Copyright Act, which is intended to grant ISPs protection against certain claims of copyright infringement resulting from the actions of customers, provided that the ISP complies with certain requirements.

#### *International Law*

Our HSD service enables individuals to access the Internet and to exchange information, generate content, conduct business and engage in various online activities on an international basis. The law relating to the liability of providers of these online services for activities of their users is currently unsettled both within the United States and abroad. Potentially, third parties could seek to hold us liable for the actions and omissions of our HSD customers, such as defamation, negligence, copyright or trademark infringement, fraud or other theories based on the nature and content of information that our customers use our service to post, download or distribute. We also could be subject to similar claims based on the content of other websites to which we provide links or third-party products, services or content that we may offer through our Internet service. Due to the global nature of the Web, it is possible that the governments of other states and foreign countries might attempt to regulate its transmissions or prosecute us for violations of their laws.

#### *State and Local Regulation and Competition*

Our HSD services provided over our cable systems have not generally subject to regulation by state or local jurisdictions. We cannot predict whether or not our HSD services will become subject to increased state regulation as a result of the Open Internet Order as more fully discussed in the *Recent Significant FCC Activity — HSD Regulatory Reclassification and Network Neutrality* section, above, or if they are, the impact that such regulation would have on our business.

### *Voice-over-Internet Protocol Phone Service*

#### *Federal Law*

The 1996 amendments to the Cable Act created a more favorable regulatory environment for cable operators to enter the phone business. Most major cable operators now offer voice-over-Internet protocol ("VoIP") phone service as a competitive alternative to traditional circuit-switched telephone service. Various states, including states where we operate, considered or attempted differing regulatory treatment, ranging from minimal or no regulation to heavily-regulated common carrier status. As part of the proceeding to determine any appropriate regulatory obligations for VoIP phone service, the FCC decided that alternative voice technologies, like certain types of VoIP phone service, should be regulated only at the federal level, rather than by individual states. Many implementation details remain unresolved, and there are substantial regulatory changes being considered that could either benefit or harm VoIP phone service as a business operation.

#### *Federal Regulatory Obligations*

The FCC has applied some traditional landline telephone provider regulations to VoIP services. In addition to certain USF obligations as discussed in *Recent Significant FCC Activity — HSD Regulatory Reclassification and Network Neutrality* section, above, the FCC also has extended other regulations and reporting requirements to VoIP providers, including E-911, CPNI, local number portability, disability access, Form 477 (subscriber information) reporting obligations, international service revenue reporting and outage

reporting. In 2010, the FCC issued an NOI and an NPRM that would transition high-cost program funds from analog phone service to the provision of broadband services.

**Table of Contents***State and Local Regulation*

Although our entities that provide VoIP phone service services are certificated as competitive local exchange carriers in most of the states in which they operate, they generally provide few, if any, services in that capacity. Rather, we provide VoIP services that are not generally subject to regulation by state or local jurisdictions. The FCC has preempted some state commission regulation of VoIP services, but has stated that its preemption does not extend to state consumer protection requirements. Some states continue to attempt to impose obligations on VoIP service providers, including state universal service fund payment obligations.

## Table of Contents

### ITEM1A. RISK FACTORS

#### Risks Related to our Operations

*We face intense competition that could adversely affect our business, financial condition and results of operations.*

We face significant competition for our products and services from a growing number of competitors that offer a wide range of communication, entertainment and information services. Many of our competitors have, compared to us, greater financial resources, more favorable brand recognition, fewer regulatory burdens and long-standing relationships with regulatory authorities and customers. Technological advances and changes in consumer behavior and demands have led to an increasing number of companies that offer new products and services that compete with ours, including “over-the-top” (“OTT”) video, and wireless Internet and phone services.

We face significant competition for video service from:

- DBS providers, principally DirecTV and DISH, that compete for video customers with satellite-delivered video packages throughout our footprint;
- Phone companies, principally AT&T and CenturyLink, that offer a wireline video service substantially similar to ours in markets representing approximately 9% of our homes passed;
- Other overbuilders offering a similar video service to ours in markets representing about 24% of our homes passed; and
- OTT video providers that are offering increasingly comprehensive video content, including high-quality exclusive content and linear video programming packages.

Our HSD service faces its most meaningful competition from:

- Phone companies, including CenturyLink, AT&T and Windstream, that primarily offer DSL Internet service that is typically limited to speeds considerably slower than ours. These phone companies have also upgraded limited portions of their networks to a FTTN or FTTH delivery system that allows for speeds comparable to our HSD service;
- Wireless providers, including AT&T, Verizon Wireless, T-Mobile and Sprint, that offer “3G” and “4G” wireless Internet service that may fully suffice for certain consumers with lower bandwidth requirements, and may offer greater levels of competition in the future with the deployment of “5G” technology and packages with unlimited bandwidth consumption; and
- Other providers of Internet access, including other overbuilders, municipalities and commercial entities that have built, or are considering building, fiber and/or Wi-Fi networks that may compete with our HSD service;

Other services we provide also face significant competition:

- Our phone service primarily competes with the phone companies noted above that offer substantially similar services to ours throughout our footprint, with the wireless providers that serve to deliver a form of “wireline substitution”, and with providers of IP-based phone services and other forms of communication including text and video messaging;
- We generally compete for business services customers with phone companies and, for our cell tower backhaul and enterprise level services, with other competitors, including metro and regional fiber-based carriers;
- We compete for advertising sales with a wide variety of media outlets, which will likely remain increasingly competitive as digital and other new formats of advertising seek to attract the same advertisers.

Although we have generally eliminated or reduced tactical discounts for customers that do not take bundled services, in order to attract new customers and maintain our existing customer base, we continue to make certain promotional offers that include short-term discounted service or equipment rates, which may result in lower revenues and greater marketing expenses. Customers who take these discounted bundled services may not remain customers following the end of the promotional period, which could adversely affect our business, financial condition and results of operations.

For additional information regarding our competitors, see “Business Description – Competition.”

*Continued increases in video programming expenses may drive the pricing of our video services to levels that customers deem unaffordable, which could have an adverse effect on our business, financial condition and results of operations.*

Video programming expenses have historically been, and we expect will continue to be, our largest single expense item and, in recent years, have reflected substantial per-unit percentage increases. The rate of increase in such expenses has been well in excess of the inflation rate and increase in U.S. wages, primarily caused by higher per unit rates for national and regional sports and other popular cable networks and rapidly rising retransmission consent fees imposed by local broadcast stations.

## Table of Contents

We believe these expenses will continue to grow at a significant rate because of the demands of large media conglomerates or other owners of most of the popular cable networks and major market local broadcast stations, and large independent television broadcast groups, who own, control or otherwise represent a significant number of local broadcast stations across the country and, in some cases, own or control multiple stations in the same market. Consolidation among these independent broadcast station groups has been significant over the past several years, and given recent proposed and completed transactions in the broadcast marketplace, the pace of consolidation has accelerated. As a result, the independent broadcast groups have become much larger based on the number of stations that they own in our markets. This will strengthen their position by allowing them to negotiate on behalf of a larger amount of local stations at one time.

Moreover, many of those powerful owners of programming require us to purchase their content in bundles and dictate how we offer them to our video customers, and impose economic penalties if we fail to comply. Consequently, we have little or no ability to individually or selectively negotiate for networks or local broadcast stations, to forego purchasing networks or local broadcast stations that generate low subscriber interest, to offer sports programming services, such as ESPN and regional sports networks, on one or more separate tiers, or to offer networks or stations on an a la carte basis to give our customers more choice and potentially lower their costs. In many instances, programmers have created additional networks and migrated popular programming, particularly sports programming, to these new networks that contributed to the increases in our programming costs. Additionally, we believe certain programmers may also demand higher fees from us in an effort to partially offset declines in their advertising revenue as more advertisers allocate a greater portion of their spending to Internet advertising. These practices, along with costs associated with offering the same programming on additional outlets including online and VOD platforms, increase our programming expense. Because of the leverage these large programming companies have over us, we also are obligated to carry additional programming that we would otherwise not offer, which increases our programming expense and lowers our capacity to introduce other new products and services.

If we are unable to successfully negotiate new agreements with these programmers before our current agreements expire, the programmers could require us to cease carrying their signals, possibly for an indefinite period, which may result in a loss of video customers and advertising revenue. On certain occasions in the past, negotiations have led to disputes with programmers that have resulted in temporary periods where we were not carrying a particular broadcast network or programming service or services, which increases the risk of customer dissatisfaction and the loss of customers. Because of the leverage these large programming companies have over us, we also may be obligated to carry additional programming that we would otherwise not offer, which may increase our programming expenses and lower our capacity to introduce other new products or services. We may also selectively choose not to renew our agreements with certain content providers if we believe it is uneconomical to do so, which could result in a loss of video customers and advertising revenues. In addition, if our HSD customers are unable to access desirable content online because content providers block or limit access by our customers if we do not carry their video programming, we may have difficulty retaining certain HSD customers.

While we attempt to offset such growth in programming expenses by customer rate increases, including the direct pass-through of increases in retransmission consent and regional sports network fees, our video gross margins will likely continue to decline given the outsized increases to our programming costs we expect in the future. If increases in our programming costs were to drive the pricing of our video services to levels that are deemed unaffordable, our customers may no longer purchase our video services and instead rely on over-the-air viewing or use an OTT video service, which could have an adverse effect on our business, financial condition and results of operations.

### *Weak economic conditions may adversely impact our business, financial condition and results of operations.*

Most of our revenues are sourced from consumers whose spending behavior is impacted by prevailing economic conditions. Weak job and business creation, occupied housing levels, personal income growth and consumer confidence can adversely impact demand for our services, and may cause increased cancellations by our customers or lead to unfavorable changes in the mix of products taken. The expanded availability of free or lower cost services that may compete with ours, including OTT video and wireless Internet available in certain commercial or public locations, may further pressure our customer retention. Weak economic conditions also may decrease advertising demand and negatively impact our advertising revenues.

Because our video service is an established and highly penetrated business, our ability to gain new video customers depends, in part, on growth in occupied housing in our service areas, which is influenced by both local and national economic conditions. If the number of occupied homes in our service areas were to decline or not grow at all, our ability to attract and retain new video customers may be negatively impacted, and could adversely impact our business, financial condition and results of operations.

## Table of Contents

*An acceleration in bandwidth consumption by HSD customers greater than current expectations could require unplanned network investments and meaningfully increase our capital expenditures.*

The level of bandwidth consumption by our HSD customers has grown at sizeable rates for the past several years as usage of many Internet-based services, particularly OTT video, has rapidly increased. If bandwidth consumption were to accelerate greater than current expectations, we may need to make unplanned network investments and meaningfully increase our capital expenditures to expand the bandwidth capacity of our systems and ensure the quality of service provided to our HSD customers. Our ability to develop, implement and refine business models that respond to changing consumer bandwidth usage and demands efficiently could be restricted by regulatory and legislative efforts to impose so-called “net neutrality” requirements on Internet providers. See “Business — Legislation and Regulation — General — Recent Significant FCC Activity.”

*We face risks as we attempt to continue to grow our business services customer base and associated revenues.*

Business services customers, and associated revenues, have made increasing contributions to our results of operations in the last several years, and we may encounter challenges as we attempt to further expand the delivery of HSD and phone to small- and medium-sized businesses, and data networking and fiber connectivity to medium- and large-sized businesses and wireless carriers’ cellular towers. We expect to continue to commit significant investments on technology, equipment and personnel focused on our business services, including the 2016 introduction of “Project Open Road” where we plan to extend our network to numerous locations that contain multiple potential business customers. If we are unable to sufficiently build the necessary infrastructure and internal support functions to scale and expand our customer base, the potential growth of business services would be limited. In many cases, business service customers have service level agreements that require us to provide higher standards of service and reliability. If we are unable to meet these service level requirements, or more broadly, the expectations of SMB and enterprise customers, or we fail to properly scale and support these activities, our results of operations may be adversely affected.

*We may not realize the expected benefits of the major initiatives under MCC’s Capital Plan*

We believe the major initiatives under MCC’s Capital Plan will improve our competitive position and provide additional opportunities to grow our customer base and associated revenues than we would have experienced otherwise. If we were to face greater levels of competition that impaired our ability to gain incremental market share or anticipated revenues, or higher than expected capital expenditures as we deploy such initiatives, we may not fully realize the expected benefits under MCC’s Capital Plan.

*If we are unable to keep pace with rapid technological developments and respond effectively to changes in consumer behavior and demand, our business, financial condition and results of operations may be adversely affected.*

We operate in a rapidly changing environment and our success depends, in part, on our ability to maintain or improve our competitive position by acquiring, developing, adopting and exploiting new and existing technologies to add introduce new products and services, or enhance existing ones. Continued development of newer technologies and services and rapidly evolving consumer preferences will likely continue to drive expansion of the products and services offered by our existing competitors and increase the number of competitors that we face. Next-generation technology has allowed for linear OTT video services that may suffice as a full replacement for our video service, and may allow wireless Internet providers to offer a service based on “5G” technology that may adequately serve as a full replacement for our HSD service. If our competitors were to introduce new or products and services that we do not currently offer, or enhanced versions of existing products and services that consumers find more compelling than ours, we may be required to deploy greater levels of marketing expenditures and capital investments to maintain our competitive position. We may also recognize lower revenues if such new products and services require us to offer certain of our existing services at a lower or no cost to our customers. Such changes could cause our business, financial condition and results of operation may be adversely affected.

To keep pace with future developments, we must choose third-party suppliers whose technologies or equipment are more effective, cost-efficient and attractive to customers than those offered by our competitors. We rely on third-party providers to make available to us new, cost-effective set-tops and programming guides that allow us to offer our video customers an enhanced user experience. If our vendors were unable to provide set-tops and programming guides that our customers prefer in a timely manner, compared to those offered by our competitors, we may experience greater video customer losses, and our business, financial condition and results of operation may be adversely affected.

*We depend on network and information systems and other technologies to operate our businesses. A disruption or failure in such networks, systems or technologies resulting from “cyber-attacks,” natural disasters or other events outside our control have a material adverse effect on our business, financial condition and results of operations.*

Because of the importance of network and information systems and other technologies to our business, disruptions or failures caused by “cyber-attacks” such as computer hacking, computer viruses, denial of service attacks, worms or other disruptive software could have a devastating impact on our business. Both unsuccessful and successful “cyber-attacks” on companies have continued to increase in frequency, scope and potential harm in recent years. Because the techniques used in such attacks have become more sophisticated and change frequently, we may be unable to anticipate these techniques or implement adequate preventative measures. Such “cyber-attacks” may result in misappropriation, misuse, leakage, falsification and accidental release or loss of information maintained in our information technology system and networks, including customer, personnel and vendor data. We could also be subject to employee error or malfeasance, or other disruptions.

## Table of Contents

As a result of the increasing awareness concerning the importance of safeguarding personal information and the potential misuse of such information, businesses such as ours that handle a large amount of personal customer data are subject to legislation that has been adopted or is being considered regarding the protection, privacy and security of personal information and information-related risks. We may also provide certain customer and employee information to third parties in connection with our business. While we obtain assurance such data will be protected by these third-parties, they are potentially vulnerable to the same threats noted above. If such risks were to materialize, we may be subject to significant costs and expenses, or damage to our reputation and credibility, which could adversely affect our business, financial condition, and results of operations.

Our network and information systems are also vulnerable to damage resulting from power outages, natural disasters, terrorist attacks and other material events that are outside our control. Any such event may degrade or disrupt our service, lead to excessive volume at our call centers, and damage our plant, equipment, data and reputation. While we generally implement redundant systems to allow our network to continue to function in an outage, these measures may be ineffective in certain events. We are unable to predict the impact of such events, and any resulting customer or revenue losses, or increases in costs and expenses or capital expenditures, could have a material adverse effect on our business, financial condition, and results of operations.

We are unable to predict the impact of such events, and any resulting customer or revenue losses, or increases in costs and expenses or capital expenditures, could have a material adverse effect on our business, financial condition, and results of operations.

*We may be unable to secure necessary hardware, software, telecommunications components and their operational support, and the related product development, which may impair our ability to provision and service our customers and to compete effectively.*

Third-party firms supply most of the components used in delivering our products and services, including set-tops and VOD equipment; interactive programming guides; cable modems; routers and other switching equipment; provisioning and other software; network connections for our phone services; fiber-optic cable and construction services for expansion and upgrades of our network; and our customer billing platform. Some of these companies may have negotiating leverage over us because they are the sole supplier of certain products and services, or because there may be a long lead time and/or significant expense required to transition to another provider. We also rely on these third-party firms to develop next-generation technology so that we may stay competitive with the latest products and services, and such reliance may result in less product innovation or higher costs than we would experience with multiple suppliers. In many cases, these hardware, software and operational support vendors and service providers have, either through contract or as a result of intellectual property rights, a position of some exclusivity, and our operations depend on a successful relationship with these companies.

Any delays or disruptions in the relationship as a result of contractual disagreements, operational or financial failures on the part of the suppliers, or other adverse events affecting these suppliers could negatively affect our ability to effectively provision and service our customers. We may face significant lapses in service and costs to upgrade our networks to allow them to operate with alternate equipment if such events were to occur, which would negatively affect our business, financial condition and results of operations.

*Our business depends on certain intellectual property rights and on not infringing on the intellectual property rights of others.*

We rely on our copyrights, trademarks and trade secrets, as well as licenses and other agreements with our vendors and other parties, to use our technologies, conduct our operations and sell our products and services. Third-party firms have in the past, and may in the future, assert claims or initiate litigation related to patent, copyright, trademark, and other intellectual property rights to technologies and related standards that are relevant to us. These assertions have increased over time as a result of our growth and the general increase in the pace of patent claims assertions, particularly in the United States. Recently, the number of intellectual property infringement claims has been increasing in the communications and entertainment fields, and from time to time, we have been party to litigation alleging that certain of our services or technologies infringe upon the intellectual property rights of others. Because of the large number of patents in the networking field, the secrecy of some pending patents and the rapid rate of issuance of new patents, it is not economically practical or, in some cases, possible to determine in advance whether a product or any of its components infringes or will infringe on the patent rights of others. Asserted claims and/or initiated litigation can include claims against us or our manufacturers, suppliers, or customers, alleging infringement of their proprietary rights with respect to our existing or future products and/or services or components of those products and/or services. Regardless of the merit of these claims, they can be time-consuming to defend; result in costly litigation and diversion of technical and management personnel; and require us to develop a non-infringing technology or enter into license agreements. There can be no assurance that licenses will be available on acceptable terms and conditions, if at all, or that any indemnification by our suppliers will be adequate to cover our costs if a claim were brought directly against us or our customers. Furthermore, because of the potential for high monetary awards that are not predictable, it is not unusual to find even arguably unmeritorious claims settled for significant amounts.

## Table of Contents

If any infringement or other intellectual property claim made against us by any third-party is successful, if we are required to indemnify a customer with respect to a claim against the customer, or if we fail to develop non-infringing technology or license the proprietary rights on commercially reasonable terms and conditions, our business, results of operations, and financial condition could be adversely affected.

### *The loss of key personnel could have a material adverse effect on our business.*

Our success is substantially dependent upon the retention of, and the continued performance by, MCC's key personnel, including Rocco B. Comisso, MCC's Chairman and Chief Executive Officer. If any of MCC's key personnel cease to participate in our business and operations, it could have an adverse effect on our business, financial condition and results of operations.

## **Risks Related to our Financial Condition**

### *We have a significant amount of debt, and the associated interest and principal payments could limit our operational flexibility and have an adverse effect on our business, financial condition, liquidity, and results of operations.*

As of December 31, 2016, our total debt was \$1.628 billion. Given our substantial debt, we are highly leveraged and will continue to be so. Our debt obligations require us to use a large portion of our cash flows from operations to pay interest and principal payments on such debt, resulting in less cash available to finance our operations, capital expenditures and other activities.

Our significant amount of debt and associated debt service requirements could have adverse consequences, such as:

- limiting our ability to obtain future financing to refinance our existing indebtedness on terms acceptable to us or at all;
- exposing us to greater interest expense as a result of having to refinance existing debt on less favorable terms than we currently experience, or due to higher market interest rates on 32% of our debt that is exposed to variable rates;
- limiting our ability to react to changes in our business, which may place us at a competitive disadvantage compared to competitors with less debt and stronger liquidity positions;
- restricting us from making necessary capital expenditures or from pursuing strategic acquisitions, or causing us to make divestitures of strategic or non-strategic assets; and
- increasing our vulnerability to adverse economic, industry and competitive conditions.

If we are unable to obtain financing on acceptable terms, or at all, to refinance our debt as it comes due, we would need to take other actions, including selling assets or seeking strategic investments from third parties, potentially on unfavorable terms, and deferring capital expenditures or other discretionary uses of cash. Such potential asset sales or third-party investments could adversely affect our results of operations, liquidity and financial condition, and any significant reduction in capital expenditures could affect our ability to compete effectively. If such measures were to become necessary, there can be no assurance that we would be able to sell assets or raise strategic investment capital sufficient enough to meet our scheduled debt maturities as they come due.

### *The financial markets are subject to volatility and disruptions, which may adversely affect our access to, or the cost of, new capital or our ability to refinance our scheduled debt maturities and other obligations as they come due.*

Volatility and disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation of financial institutions, reduced alternatives or failures of significant financial institutions could adversely affect our access to the liquidity needed for our businesses. Such disruptions could require us to take measures to conserve cash until the markets stabilize or until alternative credit arrangements or other funding for our business needs can be arranged.

Our access to funds under our revolving credit commitments is dependent on the ability of the financial institutions that are parties to those facilities to meet their funding commitments. Those financial institutions may not be able to meet their funding commitments if they experience shortages of capital and liquidity or if they experience excessive volumes of borrowing requests within a short period of time. Moreover, the obligations of the financial institutions under our revolving credit commitments are several and not joint and, as a result, a funding default by one or more institutions does not need to be made up by the others.

### *We are a holding company, and if our operating subsidiaries are unable to make funds available to us, we may not be able to fund our indebtedness and other obligations.*

We are a holding company, and do not have any operations or hold any assets other than our investments in, and our advances to, our operating subsidiaries. Our operating subsidiaries conduct all of our consolidated operations and own substantially all of our consolidated assets. Our operating subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to make funds available to us.

## Table of Contents

The only source of cash that we have to fund our senior notes (including, without limitation, the payment of interest on, and the repayment of, principal) is the cash that our operating subsidiaries generate from operations or borrow under their bank credit facility (the "credit facility"). The ability of our operating subsidiaries to make funds available to us will depend upon their results and applicable laws and contractual restrictions, including the covenants set forth in the credit agreement governing the credit facility (the "credit agreement"). If our operating subsidiaries were unable to make funds available to us, then we may not be able to make payments of principal or interest due under our senior notes. If such an event occurred, we may be required to adopt one or more alternatives, such as refinancing our senior notes or the outstanding debt of our operating subsidiaries at or before maturity, or raising additional capital through debt or equity issuance, or both. If we were not able to successfully accomplish those tasks, then we may have to take other actions, including selling assets or seeking strategic investments from third parties, potentially on unfavorable terms, and deferring capital expenditures or other discretionary uses of cash.

There can be no assurance that any of the foregoing actions would be successful. Any inability to meet our debt service obligations or refinance our indebtedness would materially adversely affect our business, financial condition and results of operations.

*A default under our credit agreement or indentures could result in an acceleration of our indebtedness and other material adverse effects.*

As of December 31, 2016, the principal financial covenants of the credit agreement required our operating subsidiaries to maintain a total leverage ratio (as defined in the credit agreement) of no more than 5.0 to 1.0 and an interest coverage ratio (as defined in the credit agreement) of no less than 2.0 to 1.0. The credit agreement also contains various other covenants that, among other things, impose certain limitations on mergers and acquisitions, consolidations and sales of certain assets, liens, restricted payments and certain transactions with affiliates. See Note 6 in our Notes to Consolidated Financial Statements.

As of December 31, 2016, the principal financial covenant of the indentures governing our senior notes (the "indentures") was a limitation on the incurrence of additional indebtedness based upon a maximum debt to operating cash flow ratio (as defined in the indenture) of 8.5 to 1.0. The indentures also contain various other covenants, though they are generally less restrictive than those found in our credit facility. See Note 6 in our Notes to Consolidated Financial Statements.

The breach of any of the covenants under the credit agreement or indentures could cause a default, which may result in the associated indebtedness becoming immediately due and payable. If this were to occur, we would be unable to adequately finance our operations. The membership interests of our operating subsidiaries are pledged as collateral under our credit facility. A default under our credit agreement could result in a foreclosure by the lenders on the membership interests pledged under that facility. Because we are dependent upon our operating subsidiaries for all of our cash flows, a foreclosure would have a material adverse effect on our business, financial condition, liquidity, and results of operations.

In the event of a liquidation or reorganization of any of our subsidiaries, the creditors of any of such subsidiaries, including trade creditors, would be entitled to a claim on the assets of such subsidiaries prior to any claims of the stockholders of any such subsidiaries, and those creditors are likely to be paid in full before any distribution is made to such stockholders. To the extent that we, or any of our direct or indirect subsidiaries, are a creditor of another of our subsidiaries, the claims of such creditor could be subordinated to any security interest in the assets of such subsidiary and/or any indebtedness of such subsidiary senior to that held by such creditor.

*A lowering or cessation of the ratings assigned to our debt securities by ratings agencies may increase our future borrowing costs and reduce our access to capital.*

Our future access to the debt markets and the terms and conditions we receive are influenced by our debt ratings. MCC's corporate credit ratings are Ba3 with a positive outlook by Moody's, and BB with a stable outlook by Standard and Poor's ("S&P"). Our senior unsecured ratings are B2 with a positive outlook by Moody's, and B+ with a stable outlook by S&P. There can be no assurance that Moody's or S&P will maintain their ratings on MCC and us. A negative change to these credit ratings could result in higher interest rates on future debt issuance than we currently experience, or adversely impact our ability to raise additional funds.

## Table of Contents

### ***Impairment of our goodwill and other intangible assets could cause significant losses.***

As of December 31, 2016, we had approximately \$1.4 billion of unamortized intangible assets, including franchise rights of \$1.2 billion and goodwill of \$0.2 billion on our consolidated balance sheets. These intangible assets represented approximately 60% of our total assets.

Accounting Standards Codification (“ASC”) No. 350 — *Intangibles — Goodwill and Other* (“ASC 350”) requires that goodwill and other intangible assets deemed to have indefinite useful lives, such as cable franchise rights, cease to be amortized. ASC 350 also requires that goodwill and certain intangible assets be tested at least annually for impairment. If we find that the carrying value of goodwill or cable franchise rights exceeds its fair value, we will reduce the carrying value of the goodwill or intangible asset to the fair value, and will recognize an impairment loss in our results of operations. See “Management’s Discussion and Analysis — Critical Accounting Policies — *Valuation and Impairment Testing of Indefinite-lived Intangibles*” and Note 2 in our Notes to Consolidated Financial Statements.

### **Risks Related to Legislative and Regulatory Matters**

#### ***Changes in government regulation could adversely impact our business.***

The cable industry is subject to extensive legislation and regulation at the federal and local levels and, in some instances, at the state level. Additionally, our HSD and phone services are also subject to regulation, and additional regulation is under consideration. Aspects of such regulation are currently the subject of judicial and administrative proceedings, legislative and administrative proposals, and lobbying efforts by us and our competitors. Legislation is reportedly under consideration that could entirely rewrite our principal regulatory statute, and the FCC and/or Congress may attempt to change the classification of or change the way that our video and/or HSD services are regulated and/or change the framework under which broadcast signals are carried, remove the copyright compulsory license and change the rights and obligations of our competitors. We expect that court actions and regulatory proceedings will continue to refine our rights and obligations under applicable federal, state and local laws. The results of current or future judicial and administrative proceedings and legislative activities cannot be predicted. Modifications to existing requirements or imposition of new requirements or limitations could have an adverse impact on our business including those described below. See “Business — Legislation and Regulation.”

#### ***Recent FCC action and possible court proceedings and legislation could adversely affect our HSD service.***

Reclassification of the regulatory status of HSD service to a telecommunications service under Title II of the Communications Act may significantly impact how we provide and charge for our HSD service and operate our network by imposing significant regulations on us and introducing regulatory uncertainty due to lack of clarity of new regulations. The FCC could choose to impose this regulation in a way that adversely affects our business by imposing new regulatory burdens and limiting our business and customer relationships. The regulatory scheme introduced in the FCC’s Open Internet Order relies heavily on forbearance of many types of Title II regulations, however, the FCC could at any time in the future choose to forgo forbearance and impose significant new regulations of our HSD service. As only one example, the FCC has decided to forebear from applying its extensive authority to regulate prices under Title II, and if it decided to end that forbearance, our results of operations could suffer. Even if the FCC continues to forebear from applying certain provisions of Title II, our business, financial condition and results of operations could be adversely impacted by the provisions that it does intend to apply. In addition, the uncertainty created by the fact that the impact of the new rules cannot yet be determined and the fact that the FCC could end forbearance in the future may impede our ability to obtain financing for our business or increase the cost of that financing. See “Business — Legislation and Regulation — *General — Recent Significant FCC Activity — HSD Regulatory Reclassification and Network Neutrality*,” “Business — Legislation and Regulation — *General — Privacy and Data Security*,” “Business — Legislation and Regulation — *General — Pole Attachment Regulation*,” “Business — Legislation and Regulation — *General — Universal Service Fund*” and “Business — Legislation and Regulation — *HSD Service — State and Local Regulation and Competition*.”

#### ***Government financing of broadband providers in our service areas could adversely impact our business.***

Possible changes to how USF monies are distributed may provide funding and subsidies to those who either compete with us or seek to compete with us and therefore put us at a competitive disadvantage. Moreover, if the FCC chooses to impose USF fees on broadband services, bundled services or VoIP services that could increase the cost of our services and harm our ability to compete. See “Business — Legislation and Regulation — *General — Universal Service Fund*” and “Business — Legislation and Regulation — *Voice-over-Internet-Protocol Phone Service — Federal Regulatory Obligations*.”

## Table of Contents

### ***Changes in the definition of an MVPD may make programming available to Internet providers of video services.***

If the FCC changes the definition of an MVPD to include those distributors of multiple channels of video programming over the Internet that do not own physical distribution facilities, competitors and potential competitors may have access to certain traditional cable programming under the FCC's program access rules. If Internet-based providers have greater access to programming of value to our customers and can offer service at a lower price because they are not facilities-based, that could hurt our business, financial condition and results of operations. See "Business – Legislation and Regulation – *Cable System Operations and Video Services – Access to Certain Programming.*"

### ***Opening our services to third-party navigation devices or apps, requiring downloadable security and limiting how much we charge for leased navigation devices may adversely impact our provision of services, raise our costs and decrease our revenues.***

If the FCC changes its regulations to require that we reengineer our systems to permit subscribers to use third-party devices and/or apps in place of our leased set-tops, that could impair the subscriber experience potentially causing a loss of subscribers, raise our costs, decrease our revenues from leased set-tops, cause early retirement of set-tops, increase liability arising from security vulnerabilities created by either the mandatory structure to allow third-party navigation devices or by the devices or apps themselves and could devalue viewing information by either limiting our access to it or by allowing third-parties to capture and use such data for their own gain. If rules are adopted requiring the usage of downloadable security configurations from a third-party trust authority, the risk of security breaches to our system may increase and the protection of the content that we provide as part of our cable service may be compromised, which in turn could increase our exposure to legal actions by affected third parties, such as the content owners. Any rules that would limit how much we charge for leased navigation devices could adversely impact our revenue stream or our ability to price such devices competitively. See "Business — Legislation and Regulation — *Cable System Operations and Video Services — Cable Equipment.*"

### ***Denials of franchise renewals or continued absence of franchise parity can adversely impact our business.***

Where state-issued franchises are not available, local franchising authorities may demand concessions, or other commitments, as a condition to renewal, and these concessions or other commitments could be costly. Although the Cable Act affords certain protections, there is no assurance that we will not be compelled to meet such demands in order to obtain renewals.

Our cable systems are operated under non-exclusive franchises. We believe that, as of December 31, 2016, various entities are currently offering video service, through wireline distribution networks, to about 33% of our estimated homes passed. Because of the FCC's actions to speed issuance of local competitive franchises and because many states in which we operate cable systems have adopted, and other states may adopt, legislation to allow others, including local telephone companies, to deliver services in competition with our cable service without obtaining equivalent local franchises, we may face not only increasing competition but we may be at a competitive disadvantage due to lack of regulatory parity. Any of these factors could adversely affect our business. See "Business — Legislation and Regulation — *Cable System Operations and Video Services — State and Local Regulation — Franchise Matters.*"

### ***Our phone service may become subject to additional regulation.***

The regulatory treatment of phone services that we and other providers offer remains uncertain. The FCC, Congress, the courts and the states continue to look at issues surrounding the provision of VoIP, including whether this service is properly classified as either a telecommunications service or an information service. Any changes to existing law as it applies to VoIP or any determination that results in greater or different regulatory obligations than competing services would result in increased costs, lower revenues or an impeded ability to effectively compete or otherwise adversely affect our ability to successfully conduct our phone business. See "Business — Legislation and Regulation — *Voice-over-Internet-Protocol Phone Service — Federal Law.*"

### ***Changes in pole attachment regulations or actions by pole owners could significantly increase our pole attachment costs.***

Our cable facilities are often attached to, or use, public utility poles, ducts or conduits. Although changes in 2011 to the FCC's long-standing pole attachment rate formulas and attachment requirements may be beneficial to us, the effective and significant lowering of the rate attachment costs to our telecommunications competitors through the FCC's 2015 Open Internet Order coupled with increasing their ease of attachment may significantly benefit those that provide services that compete with ours. Our business, financial condition and results of operations could suffer a material adverse impact from changes that make it both easier and less costly for those who compete with us to attach to poles. See "Business — Legislation and Regulation — *General — Pole Attachment Regulation.*"

## Table of Contents

### *Changes in compulsory copyright regulations could significantly increase our license fees.*

If Congress either eliminates the current cable compulsory license or enacts the proposed revisions to the Copyright Act, the elimination could impose increased costs and transactional burdens or the revisions could impose oversight and conditions that could adversely affect our business. Additionally, the Copyright Office's implementation of any such legislative changes could impose requirements on us or permit overly intrusive access to financial and operational records. Any future decision by Congress to eliminate the cable compulsory license, which would require us to obtain copyright licensing of all broadcast material at the source, would impose significant administrative burdens and additional costs that could adversely affect our business. See "Business — Legislation and Regulation — *Cable System Operations and Video Services — Federal Regulation — Copyright.*"

### **Risks Related to MCC's Chairman and Chief Executive Officer's Controlling Position**

*MCC's Chairman and Chief Executive Officer has the ability to control all major corporate decisions, and a sale of his ownership interest could result in a change of control that would have unpredictable effects.*

An entity wholly-owned by Rocco B. Commisso and related parties is the sole shareholder of MCC. Mr. Commisso is MCC's founder, Chairman and Chief Executive Officer. Our debt arrangements provide that a default may result upon certain change of control events, including if Mr. Commisso were to sell a significant stake in us or MCC to a third party. Our debt agreements provide, however, that a change of control will not be deemed to have occurred so long as MCC continues to be our manager and/or Mr. Commisso continues to be MCC's, or our, Chairman or Chief Executive Officer.

A change in control could result in a default under our debt arrangements, which require us to offer to repurchase our senior notes at 101% of their principal amount, trigger a variety of federal, state and local regulatory consent requirements and potentially limit MCC's further utilization of net operating losses for income tax purposes. Any of the foregoing results could adversely affect our results of operations and financial condition.

### **ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

### **ITEM 2. PROPERTIES**

Our principal physical assets consist of fiber-optic networks, including signal receiving, encoding and decoding devices, headend facilities and distribution systems and equipment at, or near, customers' homes. The signal receiving apparatus typically includes a tower, antenna, ancillary electronic equipment and earth stations for reception of satellite signals. Headend facilities are located near the receiving devices. Our distribution system consists primarily of coaxial and fiber-optic cables and related electronic equipment. Customer premise equipment consists of set-top devices, cable modems and related equipment. Our distribution systems and related equipment generally are attached to utility poles under pole rental agreements with local public utilities, although in some areas the distribution cable is buried in underground ducts or trenches. The physical components of the cable systems require maintenance and periodic upgrading to improve performance and capacity. In addition, we maintain a network operations center with equipment necessary to monitor and manage the status of our network.

We own and lease the real property housing our regional call centers, business offices and warehouses throughout our operating regions. Our headend facilities, signal reception sites and microwave facilities are located on owned and leased parcels of land, and we generally own the towers on which certain of our equipment is located. We own most of our service vehicles. We believe that our properties, both owned and leased, are in good condition and are suitable and adequate for our operations.

### **ITEM 3. LEGAL PROCEEDINGS**

We are involved in various legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position, results of operations, cash flows or business.

**Table of Contents**

**ITEM 4. *MINE SAFETY DISCLOSURES***

Not applicable.

**PART II**

**ITEM 5. *MARKET FOR REGISTRANTS' COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES***

There is no public trading market for our equity, all of which is held by MCC.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

In the table below, we provide selected historical consolidated statement of operations data, cash flow data and other data for the years ended December 31, 2012 through 2016 and balance sheet data and operating data as of December 31, 2012 through 2016, which are derived from our consolidated financial statements (except other data and operating data). Dollars are in thousands, except operating data. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations."

**Table of Contents**

- (1) "OIBDA" is not a financial measure calculated in accordance with generally accepted accounting principles ("GAAP") in the United States. We define OIBDA as operating income before depreciation and amortization. OIBDA has inherent limitations as discussed below.

OIBDA is one of the primary measures used by management to evaluate our performance and to forecast future results. We believe OIBDA is useful for investors because it enables them to assess our performance in a manner similar to the methods used by management, and provides a measure that can be used to analyze value and compare the companies in the cable industry. A limitation of OIBDA, however, is that it excludes depreciation and amortization, which represents the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in our business. Management uses a separate process to budget, measure and evaluate capital expenditures. In addition, OIBDA may not be comparable to similarly titled measures used by other companies, which may have different depreciation and amortization policies.

OIBDA should not be regarded as an alternative to operating income or net income as an indicator of operating performance, or to the statement of cash flows as a measure of liquidity, nor should it be considered in isolation or as a substitute for financial measures prepared in accordance with GAAP. We believe that operating income is the most directly comparable GAAP financial measure to OIBDA.

The following represents a reconciliation of OIBDA to operating income, which is the most directly comparable GAAP measure (dollars in thousands):

	Year Ended December 31,				
	2016	2015	2014	2013	2012
OIBDA	\$ 399,364	\$ 379,467	\$ 369,699	\$ 351,390	\$ 345,434
Depreciation and amortization	<u>(147,114)</u>	<u>(144,220)</u>	<u>(153,478)</u>	<u>(156,397)</u>	<u>(151,240)</u>
Operating income	<u>\$ 252,250</u>	<u>\$ 235,247</u>	<u>\$ 216,221</u>	<u>\$ 194,993</u>	<u>\$ 194,194</u>

- (2) Represents OIBDA as a percentage of revenues. See Note 1 above.
- (3) Represents the number of single residence homes, apartments and condominium units that we can connect to our distribution system without further extending the transmission lines, based on best available information.
- (4) Represents customers receiving video service. Business services video customers that are billed on a bulk basis are converted into equivalent video customers by dividing their associated revenues by the applicable full-price residential video rate, which is generally consistent with the methodology used in determining payments made to programmers. Video customers include connections to schools, libraries, local government offices and employee households that may not be charged for basic or expanded video service, but may be charged for higher tier video, HSD, phone or other services. Our methodology of calculating the number of video customers may not be identical to those used by other companies offering similar services.
- (5) Represents customers receiving HSD service. Small- to medium-sized business HSD customers are converted to equivalent HSD customers by dividing their associated revenues by the applicable full-price residential HSD rate. Medium- to large-sized business customers who take our enterprise network services are not counted as HSD customers. Our methodology of calculating HSD customers may not be identical to those used by other companies offering similar services.
- (6) Represents customers receiving phone service. Small- to medium-sized business phone customers are converted to equivalent phone customers by dividing their associated revenues by the applicable full-price residential phone rate. Customers who take our IP-enabled voice trunk service are not counted as phone customers. Our methodology of calculating phone customers may not be identical to those used by other companies offering similar services.
- (7) Represents the sum of video, HSD and phone customers.
- (8) Represents the total number of residential and business customers that receive at least one service, without regard to which service(s) customers purchase.

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Reference is made to the "Risk Factors" in Item 1A for a discussion of important factors that could cause actual results to differ from expectations and any of our forward-looking statements contained herein. The following discussion should be read in conjunction with our audited consolidated financial statements as of, and for the years ended, December 31, 2016, 2015 and 2014.

**Overview**

We are a wholly-owned subsidiary of Mediacom Communications Corporation ("MCC"), the nation's fifth largest cable company based on the number of customers who purchase one or more video services, or video customers. As of December 31, 2016, we served approximately 463,000 video customers, 643,000 high-speed data ("HSD") customers and 264,000 phone customers, aggregating 1.37 million primary service units ("PSUs"). As of the same date, we served 754,000 residential and business customer relationships.

We offer video, HSD and phone services individually and in bundled packages to residential and small- to medium-sized business ("SMB") customers over our hybrid fiber and coaxial cable ("HFC") network, and provide fiber-based network and transport services to medium- and large-sized businesses, governments and educational institutions. We also sell advertising to local, regional and national advertisers on television and digital platforms, and offer home security and automation services to residential customers. Our services are typically offered on a subscription basis, with installation fees, monthly rates and related charges associated with the services, equipment and features customers choose. We offer discounted packages for new customers and those who take multiple services, and our Xstream marketing brand offers bundled packages that include video with digital video recorder ("DVR") service and set-tops with the TiVo guide, HSD with a wireless gateway, and phone service. We believe the simplified pricing and value proposition of our Xstream bundles has positively influenced the market's perception of our products and services, and has driven higher levels of sales activity.

Over the past several years, revenues from residential services have increased mainly due to residential HSD customer growth. We expect to continue to grow revenues from residential services through HSD customer growth and increased revenue per customer relationship as more customers take faster HSD tiers and advanced video services, including our next-generation set-top and DVR service. Our business services revenues have grown at a meaningfully faster rate than our residential revenues as we have rapidly expanded our SMB and, to a lesser extent, enterprise customer base. In an effort to sustain or accelerate our rate of growth in business services revenues, we have recently commenced "Project Open Road," where we plan to extend our network to a meaningful number of new commercial locations that contain multiple businesses that represent potential customers.

Our residential video service principally competes with direct broadcast satellite ("DBS") providers that offer video programming substantially similar to ours. Over the past several years, we have experienced meaningful video customer losses, as DBS competitors have deployed aggressive marketing campaigns, including deeply discounted promotional packages, more advanced customer premise equipment and exclusive sports programming. We have placed a greater emphasis on higher quality residential customer relationships, as we have generally eliminated or reduced tactical discounts for customers not likely to purchase two or more services or to stay with us for an extended period, which may further contribute to video customer declines. To appeal to such higher-quality residential consumers, we have deployed a next-generation Internet Protocol ("IP") set-top that offers a cloud-based, graphically-rich TiVo guide with access and integrated search functionality to certain third-party Internet-based video applications ("video apps"), such as Netflix, Hulu, and YouTube, along with a multi-room DVR service and the ability to download certain content to personal devices. In 2017, we also plan to introduce a new, lower-cost, IP set-top that offers the TiVo guide and video apps, but without the required equipment for DVR service. We believe our video strategy has enabled us to reduce the rate of video customer losses and regain market share of new video connects. If we are unsuccessful with this strategy and cannot offset video customer losses through higher average unit pricing and greater penetration of our advanced video services, we may experience future declines in annual video revenues.

Our residential HSD service competes primarily with digital subscriber line ("DSL") services offered by local phone companies, and we have continued to grow our HSD customer base over the last several years. We believe our HSD service is generally superior to DSL offerings in our service areas as our minimum downstream speed of 60 megabits per second ("Mbps") is faster than the highest speed offered by substantially all our DSL competition. As consumers' bandwidth requirements have dramatically risen in recent years, we have dedicated increasing levels of capital expenditures to allow for faster speeds and greater levels of consumption. Through "Project Gigabit," we have installed the necessary equipment to transition substantially all our homes passed to the DOCSIS 3.1 platform, which will allow us to introduce packages offering speeds of up to 1 gigabit per second ("Gbps") across most of our markets in 2017. We expect to continue to grow HSD revenues as we further take market share and our HSD customers choose higher speed tiers.

Our residential phone service mainly competes with substantially comparable phone services offered by local phone companies and cellular phone services offered by national wireless providers. We believe we will continue to grow residential phone customers, but may experience modest declines in phone revenues due to unit pricing pressure.

## Table of Contents

Our business services primarily compete for SMB customers with local phone companies, many of which have had a historical advantage given long-term relationships with such customers, a nation-wide footprint that allows them to more effectively serve multiple locations, and existing networks built in certain commercial areas that we do not currently serve. Our cell tower backhaul and enterprise-level services also face competition from these local phone companies as well as other carriers, including metro and regional fiber-based carriers. In recent years, we have aggressively marketed our business services and expanded our network into additional commercial areas, which has allowed us to gain meaningful market share and led to strong growth rates of business services revenues in the past several years, which we believe will continue.

We compete for advertising revenues principally against local broadcast stations, national cable and broadcast networks, radio, newspapers, magazines, outdoor display and Internet companies. Competition will likely elevate as new formats for advertising are introduced into our markets.

Historically, video programming has been our single largest expense, and we have experienced substantial increases in programming costs per video customer, particularly for sports and local broadcast programming, well in excess of the inflation rate or the change in the consumer price index. We believe these expenses will continue to grow at a high single- to low double-digit rate because of the demands of large media conglomerates or other owners of most of the popular cable networks and major market local broadcast stations, and of large independent television broadcast groups, who own or control a significant number of local broadcast stations across the country and, in some cases, own, control or otherwise represent multiple stations in the same market. Moreover, many of those powerful owners of programming require us to purchase their networks and stations in bundles and effectively dictate how we offer them to our customers, given the contractual economic penalties if we fail to comply. Consequently, we have little or no ability to individually or selectively negotiate for networks or stations, to forego purchasing networks or stations that generate low customer interest, to offer sports programming services, such as ESPN and regional sports networks, on one or more separate tiers, or to offer networks or stations on an a la carte basis to give our customers more choice and potentially lower their costs. In many instances, such programmers have created additional networks and migrated popular programming, particularly sports programming, to these new networks, which has contributed to the increases in our programming costs. Additionally, we believe certain programmers may also demand higher fees from us in an effort to partially offset declines in their advertising revenue as more advertisers allocate a greater portion of their spending to Internet advertising. While such growth in programming expenses can be offset, in whole or in part, by rate increases, we expect our video gross margins will continue to decline if increases in programming costs outpace any growth in video revenues.

## **Recent Developments**

### *MCC's Capital Plan*

In 2016, MCC announced a plan for approximately \$1 billion of total capital expenditures to be made by us and Mediacom LLC during the three years ending December 2018 ("MCC's Capital Plan"). Among the planned initiatives under MCC's Capital Plan include:

- "Project Gigabit," a wide-scale deployment of next-generation DOCSIS 3.1 technology that allows the provisioning of 1 Gbps HSD service to substantially all of MCC's homes passed;
- "Project Open Road," which will connect over 70,000 new commercial locations that contain multiple potential customers in an effort to continue to grow business services revenues at an accelerated rate;
- Residential line extensions resulting in at least 50,000 additional homes passed; and
- Development of community Wi-Fi access points throughout high-traffic commercial and public areas.

During the year ended December 31, 2016, MCC made an aggregate \$335.2 million of capital expenditures, of which \$179.9 million was invested by us. We expect similar levels of capital investments by us and MCC over each of the next two years, with our portion of the initiatives outlined above approximating a level that is commensurate with our capital expenditures as a percentage of MCC's total capital expenditures. We have already made meaningful progress under MCC's Capital Plan, including the recent announcement that MCC has become the first major U.S. cable company to have fully installed the necessary equipment to transition to the DOCSIS 3.1 platform. We believe these initiatives will allow us to continue to improve our competitive position for both residential and business services customers in our markets, with additional future revenue and cash flow growth driven by incremental gains in market share than we would have experienced otherwise.

## Table of Contents

### Revenues

#### *Video*

Video revenues primarily represent monthly subscription fees charged to residential customers, which vary according to the level of service, the type and amount of equipment taken, and revenue from the sale of VOD content and pay-per-view events. Video revenues also include installation, reconnection and wire maintenance fees, franchise and late payment fees, and other ancillary revenues.

#### *HSD*

HSD revenues primarily represent monthly subscription fees charged to residential customers, which vary according to the level of service and type of equipment taken.

#### *Phone*

Phone revenues primarily represent monthly subscription and equipment fees charged to residential customers for our phone service.

#### *Business Services*

Business services revenues primarily represent monthly fees charged to SMBs for video, HSD and phone services, which vary according to the level of service taken, and fees charged to large businesses, including revenues from cell tower backhaul and enterprise class services.

#### *Advertising*

Advertising revenues primarily represent revenues received from selling advertising time we receive under programming license agreements to local, regional and national advertisers for the placement of commercials on channels offered on our video services.

### Costs and Expenses

#### *Service Costs*

Service costs consist of the costs related to providing and maintaining services to our customers. Significant service costs comprise: video programming; HSD service, including bandwidth connectivity; phone service, including leased circuits and long distance; our enterprise networks business, including leased access; technical personnel who maintain the cable network, perform customer installation activities and provide customer support; network operations center; utilities, including pole rental; and field operations, including outside contractors, vehicle fuel and maintenance and leased fiber for regional connectivity.

Video programming costs, which are generally paid on a per-video customer basis, have historically represented our single largest expense. In recent years, we have experienced substantial increases in the per-unit cost of programming, which we believe will continue to grow due to the increasing contractual rates and retransmission consent fees demanded by large programmers and independent broadcasters. Our HSD costs fluctuate depending on customers' bandwidth consumption and customer growth. Phone service costs are mainly determined by network configuration, customers' long distance usage and net termination payments to other carriers. Our other service costs generally rise as a result of customer growth and inflationary cost increases for personnel, outside vendors and other expenses. Personnel and related support costs may increase as the percentage of expenses that we capitalize declines due to lower levels of new service installations. We anticipate that service costs, with the exception of programming expenses, will remain fairly consistent as a percentage of our revenues.

#### *Selling, General and Administrative Expenses*

Significant selling, general and administrative expenses comprise: call center, customer service, marketing, business services, support and administrative personnel; franchise fees and other taxes; bad debt; billing; marketing; advertising; and general office administration. These expenses generally rise due to customer growth and inflationary cost increases for personnel, outside vendors and other expenses. We anticipate that selling, general and administrative expenses will remain fairly consistent as a percentage of our revenues.

## Table of Contents

Service costs and selling, general and administrative expenses exclude depreciation and amortization, which we present separately.

### *Management Fee Expense*

Management fee expense reflects compensation paid to MCC for the performance of services it provides our operating subsidiaries in accordance with management agreements between MCC and our operating subsidiaries.

### *Capital Expenditures*

Capital expenditures are categorized in accordance with the National Cable and Telecommunications Association ("NCTA") disclosure guidelines, which are intended to provide more consistency in the reporting of capital expenditures among peer companies in the cable industry. These disclosure guidelines are not required under GAAP, nor do they impact our accounting for capital expenditures under GAAP. Our capital expenditures comprise:

- Customer premise equipment, which include equipment and labor costs incurred in the purchase and installation of equipment that resides at a residential or commercial customer's premise;
- Enterprise networks, which include costs associated with furnishing custom fiber solutions for medium- to large-sized business customers, including for cell tower backhaul;
- Scalable infrastructure, which include costs incurred in the purchase and installation of equipment at our facilities associated with network-wide distribution of services;
- Line extensions, which include costs associated with the extension of our network into new service areas;
- Upgrade / rebuild, which include costs to modify or replace existing components of our network; and
- Support capital, which include vehicles and all other capital purchases required to support our customers and general business operations.

### **Use of Non-GAAP Financial Measures**

"OIBDA" is not a financial measure calculated in accordance with generally accepted accounting principles ("GAAP") in the United States. We define OIBDA as operating income before depreciation and amortization. OIBDA has inherent limitations as discussed below.

OIBDA is one of the primary measures used by management to evaluate our performance and to forecast future results. We believe OIBDA is useful for investors because it enables them to assess our performance in a manner similar to the methods used by management, and provides a measure that can be used to analyze our value and evaluate our performance compared to other companies in the cable industry. A limitation of OIBDA, however, is that it excludes depreciation and amortization, which represents the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in our business. Management uses a separate process to budget, measure and evaluate capital expenditures. In addition, OIBDA may not be comparable to similarly titled measures used by other companies, which may have different depreciation and amortization policies.

OIBDA should not be regarded as an alternative to operating income or net income as an indicator of operating performance, or to the statement of cash flows as a measure of liquidity, nor should it be considered in isolation or as a substitute for financial measures prepared in accordance with GAAP. We believe that operating income is the most directly comparable GAAP financial measure to OIBDA.

Table of Contents*Year Ended December 31, 2016 Compared to Year Ended December 31, 2015 Compared to Year Ended December 31, 2014*

The table below sets forth our consolidated statements of operations and OIBDA for the years ended December 31, 2016, 2015 and 2014 (dollars in thousands and percentage changes that are not meaningful are marked NM):

	Year Ended December 31,			% Change	% Change
	2016	2015	2014	2015 to 2016	2014 to 2015
Revenues	\$ 1,033,239	\$ 982,362	\$ 948,447	5.2%	3.6%
Costs and expenses:					
Service costs (exclusive of depreciation and amortization)	419,406	401,751	381,014	4.4%	5.4%
Selling, general and administrative expenses	193,669	182,144	180,084	6.3%	1.1%
Management fee expense	20,800	19,000	17,650	9.5%	7.6%
Depreciation and amortization	147,114	144,220	153,478	2.0%	(6.0%)
Operating income	252,250	235,247	216,221	7.2%	8.8%
Interest expense, net	(78,725)	(94,668)	(100,436)	(16.8%)	(5.7%)
Gain on derivatives, net	1,203	9,173	23,226	NM	NM
Loss on early extinguishment of debt	(1,156)	(4,382)	(300)	NM	NM
Other expense, net	(1,686)	(1,377)	(1,262)	22.4%	9.1%
Net income	\$ 171,886	\$ 143,993	\$ 137,449	19.4%	4.8%
OIBDA	\$ 399,364	\$ 379,467	\$ 369,699	5.2%	2.6%

The table below represents a reconciliation of OIBDA to operating income, which we believe is the most directly comparable GAAP measure (dollars in thousands):

	Year Ended December 31,			% Change	% Change
	2016	2015	2014	2015 to 2016	2014 to 2015
OIBDA	\$ 399,364	\$ 379,467	\$ 369,699	5.2%	2.6%
Depreciation and amortization	(147,114)	(144,220)	(153,478)	2.0%	(6.0%)
Operating income	\$ 252,250	\$ 235,247	\$ 216,221	7.2%	8.8%

Table of Contents*Revenues*

The tables below set forth revenue and selected customer and average monthly revenue statistics as of, and for the years ended, December 31, 2016, 2015 and 2014 (dollars in thousands, except per unit data):

	Year Ended December 31,			% Change 2015 to 2016	% Change 2014 to 2015
	2016	2015	2014		
Video	\$ 450,658	\$451,446	\$449,038	(0.2%)	0.5%
HSD	331,778	295,049	265,685	12.4%	11.1%
Phone	57,999	60,087	63,111	(3.5%)	(4.8%)
Business services	141,054	128,684	115,348	9.6%	11.6%
Advertising	51,750	47,096	55,265	9.9%	(14.8%)
Total	<u>\$1,033,239</u>	<u>\$982,362</u>	<u>\$948,447</u>	<u>5.2%</u>	<u>3.6%</u>

	Year Ended December 31,			% Change 2015 to 2016	% Change 2014 to 2015
	2016	2015	2014		
Video customers	463,000	480,000	500,000	(3.5%)	(4.0%)
HSD customers	643,000	605,000	564,000	6.3%	7.3%
Phone customers	264,000	239,000	218,000	10.5%	9.6%
Primary service units (PSUs)	<u>1,370,000</u>	<u>1,324,000</u>	<u>1,282,000</u>	<u>3.5%</u>	<u>3.3%</u>
Customer relationships	754,000	732,000	710,000	3.0%	3.1%
Average total monthly revenue per customer relationship (1)	\$ 115.89	\$ 113.54	\$ 111.32	2.1%	2.0%

(1) Represents average total monthly revenues for the year divided by average customer relationships for the year.

Revenues increased 5.2% for year ended December 31, 2016, due to greater HSD and, to a much lesser extent, business services and advertising revenues, slightly offset by declines in phone and, to a lesser extent, video revenues.

Revenues increased 3.6% for the year ended December 31, 2015, due to greater HSD and, to a lesser extent, business services and video revenues, offset in part by declines in advertising and, to a lesser extent, phone revenues.

*Video*

Video revenues declined 0.2% for the year ended December 31, 2016, mainly due to a lower residential video customer base compared to the prior year, mostly offset by rate adjustments associated with the pass-through of higher programming costs for retransmission consent fees and, to a much lesser extent, for regional sports networks and more customers taking our advanced video services.

Video revenues increased 0.5% for the year ended December 31, 2015, largely due to rate adjustments associated with the pass-through of higher programming costs for retransmission consent fees and, to a lesser extent, for regional sports networks, mostly offset by a lower residential video customer base compared to the prior year.

We lost 17,000, 20,000 and 28,000 video customers during the years ended December 31, 2016, 2015 and 2014, respectively. As of December 31, 2016, we served 463,000 video customers, or 30.8% of our estimated homes passed, and 42.0% of our residential video customers took our DVR service, which represents a large component of revenues from advanced video services.

*HSD*

HSD revenues grew 12.4% and 11.1% for the years ended December 31, 2016 and 2015, respectively, primarily due to more customers paying higher rates for faster speed tiers and a greater residential HSD customer base compared to the prior years.

We gained 38,000, 41,000 and 30,000 HSD customers during the years ended December 31, 2016, 2015 and 2014, respectively. As of December 31, 2016, we served 643,000 HSD customers, or 42.8% of our estimated homes passed, and 49.3% of our residential HSD customers took our wireless home gateway service.

## Table of Contents

### *Phone*

Phone revenues decreased 3.5% and 4.8% for the years ended December 31, 2016 and 2015, respectively, principally due to higher levels of discounted pricing, offset in part by a greater residential phone customer base compared to the prior years.

We gained 25,000, 21,000 and 11,000 phone customers during the years ended December 31, 2016, 2015 and 2014, respectively. As of December 31, 2016, we served 264,000 phone customers, or 17.6% of our estimated homes passed.

### *Business Services*

Business services revenues rose 9.6% and 11.6% for the years ended December 31, 2016 and 2015, respectively, mainly due to a greater SMB customer base compared to the prior years.

### *Advertising*

Advertising revenues grew 9.9% for the year ended December 31, 2016, predominantly due to higher levels of political advertising compared to the prior year. Advertising revenues fell 14.8% for the year ended December 31, 2015, substantially due to lower levels of political advertising compared to the prior year.

### *Costs and Expenses*

#### *Service Costs*

Service costs increased 4.4% and 5.4% for the years ended December 31, 2016 and 2015, respectively, primarily due to greater video programming charges and, to a lesser extent, for the year ended December 31, 2016, employee costs. Programming costs grew 4.4% and 7.8% for the years ended December 31, 2016 and 2015, respectively, principally due to higher fees associated with the renewal of programming contracts and contractual increases under agreements with certain local broadcast stations and cable networks, offset in part by a lower video customer base compared to the prior years. Employee costs were 6.0% higher for the year ended December 31, 2016, largely due to increased technical, maintenance and other operating employee staff and compensation levels.

Service costs as a percentage of revenues were 40.6%, 40.9% and 40.2% for the years ended December 31, 2016, 2015 and 2014, respectively.

#### *Selling, General and Administrative Expenses*

Selling, general and administrative expenses increased 6.3% for the year ended December 31, 2016, largely as a result of greater marketing, employee and, to a lesser extent, bad debt and advertising expenses. Marketing expenses rose 11.3%, principally due to expenses related to marketing of our Xstream bundled services and, to a lesser extent, the marketing of our business services and a greater use of third-party sales services. Employee expenses increased 3.6%, mainly due to greater customer service and other administrative employee staff and compensation levels. Bad debt grew 14.0%, substantially due to the aging of business customer accounts. Advertising expenses rose 16.5%, predominantly due to new promotional activity for our advertising sales group.

Selling, general and administrative expenses increased 1.1% for the year ended December 31, 2015, largely as a result of greater marketing costs, offset in part by lower bad debt and administrative expenses. Marketing costs grew 11.7%, principally due to expenses related to the marketing of our Xstream bundled services, the marketing of our business services and greater use of third-party sales services. Bad debt declined 8.0%, substantially due to a lower number of written off accounts. Administrative expenses fell 20.8%, mainly as a result of lower customer service software expenses and a decline in legal and other professional fees.

Selling, general and administrative expenses as a percentage of revenues were 18.7%, 18.5% and 19.0% for the years ended December 31, 2016, 2015 and 2014, respectively.

#### *Management Fee Expense*

Management fee expense grew 9.5% and 7.6% for the years ended December 31, 2016 and 2015, respectively, reflecting higher fees charged by MCC. Management fee expense as a percentage of revenues were 2.0%, 1.9% and 1.9% for the years ended December 31, 2016, 2015 and 2014, respectively.

## Table of Contents

### *Depreciation and Amortization*

Depreciation and amortization was 2.0% higher for the year ended December 31, 2016, as greater depreciation of investments in customer premise equipment, HSD bandwidth expansion and business support were offset in part by long-lived network assets having been fully depreciated in the prior year.

Depreciation and amortization was 6.0% lower for the year ended December 31, 2015, mainly due to long-lived networks assets having been fully depreciated in the prior year, offset in part by greater depreciation of investments in customer premise equipment, HSD bandwidth expansion and business support.

### *Operating Income*

Operating income rose 7.2% and 8.8% for the years ended December 31, 2016 and 2015, respectively, as the increase in revenues was offset in part by higher service costs and selling, general and administrative expenses.

### *Interest Expense, Net*

Interest expense, net, fell 16.8% and 5.7% for the years ended December 31, 2016 and 2015, respectively, due to lower average borrowing costs as a result of recent favorable financing transactions and, for the year ended December 31, 2016, lower average outstanding indebtedness.

### *Gain on Derivatives, Net*

As a result of changes to the mark-to-market valuation of our interest rate exchange agreements, we recorded net gains on derivatives of \$1.2 million, \$9.2 million and \$23.2 million for the years ended December 31, 2016, 2015 and 2014, respectively. See Notes 4 and 6 in our Notes to Consolidated Financial Statements.

### *Loss on Early Extinguishment of Debt*

Loss on early extinguishment of debt totaled \$1.2 million, \$4.4 million and \$0.3 million for the years ended December 31, 2016, 2015 and 2014, respectively, which represented the write-off of unamortized financing costs as a result of the repayment of certain previously existing term loans under our bank credit facility.

### *Other Expense, Net*

Other expense, net, was \$1.7 million for the year ended December 31, 2016, representing \$1.5 million of revolving credit commitment fees and \$0.2 million of other net fees, \$1.4 million for the year ended December 31, 2015, representing \$1.2 million of revolving credit commitment fees and \$0.2 million of other net fees, and \$1.3 million for the year ended December 31, 2014, representing \$1.4 million of revolving credit commitment fees, partly offset by \$0.1 million of other net income.

### *Net Income*

As a result of the factors described above, we recognized net income of \$171.9 million, \$144.0 million and \$137.4 million for the years ended December 31, 2016, 2015 and 2014, respectively.

### *OIBDA*

OIBDA grew 5.2% and 2.6% for the years ended December 31, 2016 and 2015, respectively, primarily due to the increase in revenues, offset in part by higher service costs and selling, general and administrative expenses.

### **Liquidity and Capital Resources**

Our net cash flows provided by operating activities are primarily used to fund investments to enhance the capacity and reliability of our network and further expand our products and services, and make scheduled and voluntary repayments of our indebtedness and periodic distributions to MCC. As of December 31, 2016, our near-term liquidity requirements included term loan principal repayments of \$16.6 million over the next twelve months. As of the same date, our sources of liquidity included \$14.2 million of cash and

\$246.2 million of unused and available commitments under our \$368.5 million revolving credit facility, after giving effect to \$112.6 million of outstanding loans and \$9.7 million of letters of credit issued to various parties as collateral.

## Table of Contents

We believe that we will be able to continue to meet our current and long-term liquidity and capital requirements, including fixed charges, through existing cash, internally generated cash flows from operating activities, cash available to us under our revolver credit commitments and our ability to obtain future financing. If we are unable to obtain sufficient future financing on acceptable terms, or at all, we may need to take other actions to conserve or raise capital that we would not take otherwise. However, we have accessed the debt markets for significant amounts of capital in the past, and expect to continue to be able to access these markets in the future as necessary.

### *Net Cash Flows Provided by Operating Activities*

Net cash flows provided by operating activities were \$336.0 million for the year ended December 31, 2016, primarily due to OIBDA of \$399.4 million and the \$11.5 million net change in our operating assets and liabilities, offset in part by interest expense of \$78.7 million. The net change in our operating assets and liabilities was primarily due to increases in accounts payable, accrued expenses, and other current liabilities of \$5.9 million and in accounts payable to affiliates of \$4.1 million, a decrease in accounts receivable, net, of \$2.0 million and an increase in deferred revenue of \$2.0 million, offset in part by an increase in prepaid expenses and other assets of \$2.4 million.

Net cash flows provided by operating activities were \$297.2 million for the year ended December 31, 2015, primarily due to OIBDA of \$379.5 million and the \$6.9 million net change in our operating assets and liabilities, offset in part by interest expense of \$94.7 million. The net change in our operating assets and liabilities was primarily due to increases in accounts payable, accrued expenses, and other current liabilities of \$10.2 million, in accounts payable to affiliates of \$9.2 million and in deferred revenue of \$1.7 million, offset in part by increases in accounts receivable, net, of \$10.6 million and in prepaid expenses and other assets of \$4.3 million.

### *Net Cash Flows Used in Investing Activities*

Capital expenditures continue to be our primary use of capital resources and generally comprise substantially all of our net cash flows used in investing activities.

Net cash flows used in investing activities were \$183.3 million for the year ended December 31, 2016, substantially comprising \$179.7 million of capital expenditures and a net change in accrued property, plant, and equipment of \$3.8 million.

Net cash flows used in investing activities were \$148.3 million for the year ended December 31, 2015, substantially comprising \$151.2 million of capital expenditures and \$1.6 million associated with the acquisition of other intangible assets, slightly offset by a net change in accrued property, plant and equipment of \$4.9 million.

### *Capital Expenditures*

The table below sets forth our capital expenditures (dollars in thousands):

	Year Ended December 31,			\$ Change 2015 to 2016	\$ Change 2014 to 2015
	2016	2015	2014		
Customer premise equipment	\$ 75,033	\$ 80,885	\$ 62,746	\$ (5,852)	\$ 18,139
Enterprise networks	10,367	9,209	11,621	1,158	(2,412)
Scalable infrastructure	41,688	21,277	28,621	20,411	(7,344)
Line extensions	15,141	6,351	6,155	8,790	196
Upgrade / rebuild	23,610	20,306	16,074	3,304	4,232
Support capital	13,857	13,176	12,058	681	1,118
Total capital expenditures	<u>\$179,696</u>	<u>\$151,204</u>	<u>\$137,275</u>	<u>\$ 28,492</u>	<u>\$ 13,929</u>

Capital expenditures for the year ended December 31, 2016, increased \$28.5 million, largely reflecting greater investments in scalable infrastructure, mainly next-generation HSD network equipment for Project Gigabit, and, to a lesser extent, the expansion of our network, largely for Project Open Road, offset in part by lower spending on customer premise equipment, primarily for our next-generation set-top.

Capital expenditures for the year ended December 31, 2015, increased \$13.9 million, largely reflecting greater investments in customer premise equipment, mainly our next-generation set-top and, to a lesser extent, the expansion of our fiber network, offset by lower

spending on scalable infrastructure, largely for local HSD bandwidth management and, to a lesser extent, enterprise networks, primarily for fiber connectivity to cell towers.

## Table of Contents

### *Net Cash Flows Used in Financing Activities*

Net cash flows used in financing activities were \$149.0 million for the year ended December 31, 2016, comprising \$201.8 million of net repayments under the credit facility, \$18.0 million of dividend payments on preferred members' interest and \$7.0 million of capital distributions to our parent, MCC, offset in part by \$75.0 million of capital contributions from our parent, MCC, and \$2.8 million of other financing activities.

Net cash flows used in financing activities were \$148.0 million for the year ended December 31, 2015, substantially comprising \$127.3 million of net repayments under the credit facility, \$18.0 million of dividend payments on preferred members' interest and \$2.3 million of financing costs.

### **Capital Structure**

As of December 31, 2016, our total indebtedness was \$1.628 billion, of which approximately 68% was at fixed interest rates or had interest rate exchange agreements that fixed the variable portion of debt. During the year ended December 31, 2016, we paid cash interest of \$76.7 million, net of capitalized interest.

### *2016 Financing Activity*

On May 19, 2016, we repaid the entire \$245.6 million balance of Term Loan I under our bank credit facility, funded by borrowings of \$170.6 million under our revolving credit commitments and \$75.0 million of capital contributions from our parent, MCC.

### *Bank Credit Facility*

As of December 31, 2016, we maintained a \$1.384 billion credit facility, comprising \$1,015.4 million of term loans with maturities ranging from January 2021 to June 2021, and \$368.5 million of revolving credit commitments, which are scheduled to expire in October 2019. As of the same date, we had \$246.2 million of unused lines under our revolving credit commitments, all of which were available to be borrowed and used for general corporate purposes, after taking into account \$112.6 million of outstanding loans and \$9.7 million of letters of credit issued thereunder to various parties as collateral.

The credit facility is collateralized by our ownership interests in our operating subsidiaries, and is guaranteed by us on a limited recourse basis to the extent of such ownership interests. The credit agreement governing the credit facility (the "credit agreement") requires us to maintain a total leverage ratio (as defined in the credit agreement) of no more than 5.0 to 1.0 and an interest coverage ratio (as defined in the credit agreement) of no less than 2.0 to 1.0. For all periods through December 31, 2016, our operating subsidiaries were in compliance with all covenants under the credit agreement including, as of the same date, a total leverage ratio of 2.5 to 1.0 and an interest coverage ratio of 4.4 to 1.0. We do not believe that our operating subsidiaries will have any difficulty complying with any of the covenants under the credit agreement in the near future.

### *Interest Rate Swaps*

We have entered into several interest rate exchange agreements (which we refer to as "interest rate swaps") with various banks to fix the variable rate on a portion of our borrowings under the credit facility to reduce the potential volatility in our interest expense that may result from changes in market interest rates. As December 31, 2016, we had interest rate swaps that fixed the variable portion of \$600 million of borrowings at a rate of 1.5%, all of which are scheduled to expire during December 2018.

As of December 31, 2016, the weighted average rate on outstanding borrowings under the credit facility, including the effects of our interest rate swaps, was 3.5%.

### *Senior Notes*

As of December 31, 2016, we had \$500.0 million of outstanding senior notes, comprising \$200.0 million of 5 1/2% senior notes due April 2021 and \$300.0 million of 6 3/8% senior notes due April 2023.

Our senior notes are unsecured obligations, and the indentures governing our senior notes (the "indentures") limit the incurrence of additional indebtedness based upon a maximum debt to operating cash flow ratio (as defined in the indentures) of 8.5 to 1.0. For all

## Table of Contents

periods through December 31, 2016, we were in compliance with covenants under the indentures including, as of the same date, a debt to operating cash flow ratio of 3.8 to 1.0. We do not believe that we will have any difficulty complying with any of the covenants under the indentures in the near future.

### *Debt Ratings*

MCC's corporate credit ratings are Ba3 by Moody's, with a positive outlook, and BB by Standard and Poor's ("S&P"), with a stable outlook, and our unsecured ratings are B2 by Moody's, with a positive outlook, and B+ by S&P, with a stable outlook.

There can be no assurance that Moody's or S&P will maintain their ratings on MCC and us. A negative change to these credit ratings could result in higher interest rates on future debt issuance than we currently experience, or adversely impact our ability to raise additional funds. There are no covenants, events of default, borrowing conditions or other terms in the credit agreement or indentures that are based on changes in our credit rating assigned by any rating agency.

### **Contractual Obligations and Commercial Commitments**

The following table summarizes our contractual obligations and commercial commitments, and the effects they are expected to have on our liquidity and cash flow, for the five years subsequent to December 31, 2016 and thereafter (dollars in thousands)\*:

	Scheduled <u>Debt Maturities</u>	Operating <u>Leases</u>	Interest Expense <u>(1)</u>	Purchase <u>Obligations (2)</u>	<u>Total</u>
January 1, 2017 to December 31, 2017	\$ 16,575	\$ 2,055	\$ 69,822	\$ 27,621	\$ 116,073
January 1, 2018 to December 31, 2019	145,725	2,504	134,336	—	282,565
January 1, 2020 to December 31, 2021	1,165,700	1,473	90,854	—	1,258,027
Thereafter	300,000	1,618	23,906	—	325,524
Total cash obligations	<u>\$ 1,628,000</u>	<u>\$ 7,650</u>	<u>\$ 318,918</u>	<u>\$ 27,621</u>	<u>\$ 1,982,189</u>

\* Refer to Note 6 and Note 11 in our Notes to Consolidated Financial Statements for a discussion of our long-term debt and of our operating leases and other commitments and contingencies, respectively.

- (1) Interest payments on floating rate debt and interest rate swaps are estimated using amounts outstanding as of December 31, 2016 and the average interest rates applicable under such debt obligations. Interest expense amounts are net of amounts capitalized.
- (2) We have contracts with programmers who provide video programming services to our customers. Our contracts typically provide that we have an obligation to purchase video programming for our customers as long as we deliver cable services to such customers. We have no obligation to purchase these services if we are not providing cable services, except when we do not have the right to cancel the underlying contract or for contracts with a guaranteed minimum commitment. There are no programming service amounts included in our purchase obligations. We also maintain other service agreements with various vendors that contain future contractual commitments.

### **Critical Accounting Policies**

The preparation of our financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Periodically, we evaluate our estimates, including those related to doubtful accounts, long-lived assets, capitalized costs and accruals. We base our estimates on historical experience and on various other assumptions that we believe are reasonable. Actual results may differ from these estimates under different assumptions or conditions. We believe that the application of the critical accounting policies discussed below requires significant judgments and estimates on the part of management. For a summary of our accounting policies, see Note 2 in our Notes to Consolidated Financial Statements.

### *Property, Plant and Equipment*

We capitalize the costs of new construction and replacement of our cable transmission and distribution facilities and new service installation in accordance with Accounting Standards Codification ("ASC") No. 922 — *Entertainment — Cable Television*. Costs associated with subsequent installations of additional services not previously installed at a customer's dwelling are capitalized to the extent such costs are incremental and directly attributable to the installation of such additional services. Capitalized costs include all direct labor and materials as well as certain indirect costs. Capitalized costs are recorded as additions to property, plant and equipment

and depreciated over the average life of the related assets. We use standard costing models, developed from actual historical costs and relevant operational data, to determine our capitalized amounts. These models include labor rates, overhead rates and standard time

## Table of Contents

inputs to perform various installation and construction activities. The development of these standards involves significant judgment by management, especially in the development of standards for our newer, advanced products and services in which historical data is limited. Changes to the estimates or assumptions used in establishing these standards could be material. We perform periodic evaluations of the estimates used to determine the amount of costs that are capitalized. Any changes to these estimates, which may be significant, are applied in the period in which the evaluations were completed.

### *Valuation and Impairment Testing of Indefinite-lived Intangibles*

As of December 31, 2016, we had approximately \$1.4 billion of unamortized intangible assets, including franchise rights of \$1.2 billion and goodwill of \$0.2 billion on our consolidated balance sheets. Franchise rights are our largest asset and, together with goodwill, represent approximately 60% of our total assets as of the same date.

Our cable systems operate under non-exclusive cable franchises, or franchise rights, granted by state and local governmental authorities for varying lengths of time. We acquired these cable franchises through acquisitions of cable systems and were accounted for using the purchase method of accounting. As of December 31, 2016, we held 501 franchises in areas located throughout the United States. The value of a franchise is derived from the economic benefits we receive from the right to solicit new customers and to market new products and services, such as digital video, HSD and phone, in a specific market territory. We concluded that our franchise rights have an indefinite useful life since, among other things, there are no legal, regulatory, contractual, competitive, economic or other factors limiting the period over which these franchise rights contribute to our revenues and cash flows. Goodwill is the excess of the acquisition cost of an acquired entity over the fair value of the identifiable net assets acquired. In accordance with ASC No. 350 — *Intangibles — Goodwill and Other* (“ASC 350”), we do not amortize franchise rights and goodwill. Instead, such assets are tested annually for impairment or more frequently if impairment indicators arise.

We follow the provisions of ASC 350 to test our goodwill and franchise rights for impairment. We assess the fair values of our reporting unit using the Excess Earnings Method of the Income Approach as our discounted cash flow (“DCF”) methodology, under which the fair value of cable franchise rights are determined in a direct manner. We employ the Multi-Period Excess Earnings Method to calculate the fair values of our cable franchise rights, using unobservable inputs (Level 3). This assessment involves significant judgment, including certain assumptions and estimates that determine future cash flow expectations and other future benefits, which are consistent with the expectations of buyers and sellers of cable systems in determining fair value. These assumptions and estimates include discount rates, estimated growth rates, terminal growth rates, revenues per customer, market penetration as a percentage of homes passed and operating margin. We also consider market transactions, market valuations, research analyst estimates and other valuations using multiples of operating income before depreciation and amortization to confirm the reasonableness of fair values determined by the DCF methodology. We also employ the Greenfield model to corroborate the fair values of our cable franchise rights determined under the In-use Excess Earnings DCF methodology. Significant impairment in value resulting in impairment charges may result if the estimates and assumptions used in the fair value determination change in the future. Such impairments, if recognized, could potentially be material.

Based on the guidance outlined in ASC 350, we have determined that the unit of accounting, or reporting unit, for testing goodwill and franchise rights is Mediacom Broadband. Comprising cable system clusters across several states, Mediacom Broadband is at the financial reporting level that is managed and reviewed by the corporate office (i.e., chief operating decision maker) including our determination as to how we allocate capital resources and utilize the assets. The reporting unit level also reflects the level at which the purchase method of accounting for our acquisitions was originally recorded.

In accordance with ASC 350, we are required to determine goodwill impairment using a two-step process. The first step compares the fair value of a reporting unit with our carrying amount, including goodwill. If the fair value of the reporting unit exceeds our carrying amount, goodwill of the reporting unit is considered not impaired and the second step is unnecessary. If the carrying amount of a reporting unit exceeds our fair value, the second step is performed to measure the amount of impairment loss, if any. The second step compares the implied fair value of the reporting unit's goodwill, calculated using the residual method, with the carrying amount of that goodwill. If the carrying amount of the goodwill exceeds the implied fair value, the excess is recognized as an impairment loss.

The impairment test for our franchise rights and other intangible assets not subject to amortization consists of a comparison of the fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, the excess is recognized as an impairment loss.

Since our adoption of ASC 350 in 2002, we have not recorded any impairments as a result of our impairment testing. We completed our most recent impairment test as of October 1, 2016, which reflected no impairment of our franchise rights, goodwill or other intangible assets.

**Table of Contents**

For illustrative purposes, if there were a hypothetical decline of 15% in the fair values determined for cable franchise rights, goodwill and other finite-lived intangible assets at our reporting unit, no impairment loss would result as of our impairment testing date of October 1, 2016.

We could record impairments in the future if there are changes in the long-term fundamentals of our business, in general market conditions or in the regulatory landscape that could prevent us from recovering the carrying value of our long-lived intangible assets. The economic conditions affecting the U.S. economy, and how that may impact the fundamentals of our business, may have a negative impact on the fair values of the assets in our reporting unit.

In accordance with Accounting Standards Update No. 2010-28 — *When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (a consensus of the FASB Emerging Issues Task Force)*, as of October 1, 2016 and 2015, we have evaluated whether there are any adverse qualitative factors surrounding our Mediacom Broadband reporting unit indicating that a goodwill impairment may exist. We do not believe that it is “more likely than not” that a goodwill impairment exists. As such, we have not performed Step 2 of the goodwill impairment test. As of both December 31, 2016 and 2015, the Mediacom Broadband reporting unit had a positive carrying amount.

**Recent Accounting Pronouncements**

See Note 2 in our Notes to the Consolidated Financial Statements.

**Inflation and Changing Prices**

Our costs and expenses are subject to inflation and price fluctuations. Such changes in costs and expenses can generally be passed through to customers. Programming costs have historically increased at rates in excess of inflation and are expected to continue to do so. We believe that under the FCC’s existing cable rate regulations we may increase rates for cable services to more than cover any increases in programming. However, competitive conditions and other factors in the marketplace may limit our ability to increase our rates.

Table of Contents**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

In the normal course of business, we use interest rate exchange agreements (which we refer to as "interest rate swaps") with counterparty banks to fix the variable rate on a portion of our borrowings under our credit facility. As of December 31, 2016, we had current interest rate swaps with various banks pursuant to which the interest rate on \$600 million of variable rate debt was fixed at a rate of 1.5%, all of which were scheduled to expire during December 2018. The fixed rates of our interest rate swaps are offset against the applicable variable rate to determine the related interest expense.

Under the terms of our interest rate swaps, we are exposed to credit risk in the event of nonperformance by our counterparties; however, we do not anticipate such nonperformance. As of December 31, 2016, based on their mark-to-market valuation, we would have paid approximately \$0.7 million, if we terminated these interest rate swaps. Our interest rate swaps and debt arrangements do not contain credit rating triggers that could affect our liquidity.

The table below provides the scheduled maturity and estimated fair value of our debt as of December 31, 2016 (dollars in thousands):

**Table of Contents****Report of Independent Registered Public Accounting Firm**

To the Member of Mediacom Broadband LLC:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Mediacom Broadband LLC and its subsidiaries at December 31, 2016 and December 31, 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States) and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Table of Contents**MEDIACOM BROADBAND LLC AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****1. ORGANIZATION**

Mediacom Broadband LLC ("Mediacom Broadband" and collectively with its subsidiaries, "we," "our" or "us") is a Delaware limited liability company wholly-owned by Mediacom Communications Corporation ("MCC"). MCC is involved in the acquisition and operation of cable systems serving smaller cities and towns in the United States, and its cable systems are owned and operated through our operating subsidiaries and those of Mediacom LLC, a New York limited liability company wholly-owned by MCC. As limited liability companies, we and Mediacom LLC are not subject to income taxes and, as such, are included in the consolidated federal and state income tax returns of MCC, a C corporation.

Our principal operating subsidiaries conduct all of our consolidated operations and own substantially all of our consolidated assets. Our operating subsidiaries are separate and distinct legal entities and have no obligation, contingent or otherwise, to make funds available to us.

We rely on our parent, MCC, for various services such as corporate and administrative support. Our financial position, results of operations and cash flows could differ from those that would have resulted had we operated autonomously or as an entity independent of MCC. See Notes 8 and 9.

Mediacom Broadband Corporation, a Delaware corporation wholly-owned by us, co-issued, jointly and severally with us, public debt securities. Mediacom Broadband Corporation has no operations, revenues or cash flows and has no assets, liabilities or stockholders' equity on its balance sheet, other than a one-hundred dollar receivable from an affiliate and the same dollar amount of common stock. Therefore, separate financial statements have not been presented for this entity.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES***Basis of Preparation of Consolidated Financial Statements*

The consolidated financial statements include the accounts of us and our subsidiaries. All significant intercompany transactions and balances have been eliminated. Comprehensive income is equal to net income for all periods presented. The preparation of the consolidated financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The accounting estimates that require management's most difficult and subjective judgments include: assessment and valuation of intangibles, accounts receivable allowance, useful lives of property, plant and equipment and capitalized labor. Actual results could differ from those and other estimates.

*Reclassifications*

Certain reclassifications have been made to prior year amounts to conform to the current year presentation.

*Revenue Recognition*

Video, high speed data ("HSD"), phone and business services revenues are recognized when the services are provided to our customers. We generally bill customers in advance for the services and equipment they have chosen to use and record such amounts as deferred revenue until the services are provided and the equipment is used. Credit risk is managed by disconnecting services to customers who are deemed to be delinquent. Installation revenues are recognized as customer connections are completed because installation revenues are less than direct installation costs. Advertising sales are recognized in the period that the advertisements are exhibited. Deposits and up-front fees collected from customers are recognized as deferred revenue until the earnings process is complete. Under the terms of our franchise agreements, we are required to pay local franchising authorities up to 5% of our gross revenues derived from providing video service. We normally pass these fees through to our customers. Because franchise fees are our obligation, we present them on a gross basis with a corresponding expense. Franchise fees reported on a gross basis amounted to approximately \$22.7 million, \$22.1 million, and \$21.7 million for the years ended December 31, 2016, 2015 and 2014, respectively. Franchise fees are reported in video revenue and included in selling, general and administrative expenses.

## Table of Contents

### *Allowance for Doubtful Accounts*

The allowance for doubtful accounts represents our best estimate of probable losses in the accounts receivable balance. The allowance is based on the number of days outstanding, customer balances, recoveries, historical experience and other currently available information.

### *Concentration of Credit Risk*

Our accounts receivable are comprised of amounts due from customers in varying regions throughout the United States. Concentration of credit risk with respect to these receivables is limited due to the large number of customers comprising our customer base and their geographic dispersion. We invest our cash with high quality financial institutions.

### *Property, Plant and Equipment*

Property, plant and equipment are recorded at cost. Additions to property, plant and equipment generally include material, labor and indirect costs. Depreciation is calculated on a straight-line basis over the following useful lives:

Buildings	40 years
Leasehold improvements	Lesser of: life of respective lease or life of asset
Cable systems, equipment and customer devices	5-20 years
Vehicles	4-5 years
Furniture, fixtures, and office equipment	5 years

We capitalize improvements that extend asset lives and expense repairs and maintenance as incurred. At the time of retirements, write-offs, sales or other dispositions of property, the original cost and related accumulated depreciation are removed from the respective accounts and any resulting gains or losses are included in depreciation and amortization expense in the consolidated statement of operations.

We capitalize the costs associated with the construction of cable transmission and distribution facilities, new customer installations and indirect costs associated with our phone service. Costs include direct labor and material, as well as certain indirect costs including capitalized interest. We perform periodic evaluations of the estimates used to determine the amount and extent that such costs are capitalized. Any changes to these estimates, which may be significant, are applied in the period in which the evaluations were completed. The costs of disconnecting service at a customer's dwelling or reconnecting to a previously installed dwelling are charged as expense in the period incurred. Costs associated with subsequent installations of additional services not previously installed at a customer's dwelling are capitalized to the extent such costs are incremental and directly attributable to the installation of such additional services. See Note 3.

### *Capitalized Software Costs*

We account for internal-use software development and related costs in accordance with Accounting Standards Codification ("ASC") 350-40-*Intangibles-Goodwill and Other: Internal-Use Software*. Software development and other related costs consist of external and internal costs incurred in the application development stage to purchase and implement associated software. Costs incurred in the development of application and infrastructure of the software is capitalized and will be amortized over our respective estimated useful life of 5 years. During the years ended December 31, 2016 and 2015, we wrote off approximately \$3.3 million (\$2.8 million of which were fully amortized) and \$5.3 million (\$4.5 million of which was fully amortized), respectively, of software development costs. Capitalized software had a net book value of \$0.2 million and \$0.7 million as of December 31, 2016 and 2015, respectively.

### *Marketing and Promotional Costs*

Marketing and promotional costs are expensed as incurred and were \$35.7 million, \$31.9 million and \$24.3 million for the years ended December 31, 2016, 2015 and 2014, respectively.

### *Intangible Assets*

Our cable systems operate under non-exclusive cable franchises, or franchise rights, granted by state and local governmental authorities for varying lengths of time. We acquired these cable franchises through acquisitions of cable systems and were accounted

for using the purchase method of accounting. As of December 31, 2016, we held 501 franchises in areas located throughout the United States. The value of a franchise is derived from the economic benefits we receive from the right to solicit new customers and to market

## Table of Contents

our products and services, including video, HSD and phone, in a specific market territory. We concluded that our franchise rights have an indefinite useful life since, among other things, there are no legal, regulatory, contractual, competitive, economic or other factors limiting the period over which these franchise rights contribute to our revenues and cash flows. Goodwill is the excess of the acquisition cost of an acquired entity over the fair value of the identifiable net assets acquired. In accordance with ASC 350 — *Intangibles – Goodwill and Other* (“ASC 350”), we do not amortize franchise rights and goodwill. Instead, such assets are tested annually for impairment or more frequently if impairment indicators arise.

We follow the provisions of ASC 350 to test our goodwill and franchise rights for impairment. We assess the fair values of our reporting unit using the Excess Earnings Method of the Income Approach as our discounted cash flow (“DCF”) methodology, under which the fair value of cable franchise rights are determined in a direct manner. We employ the Multi-Period Excess Earnings Method to calculate the fair values of our cable franchise rights, using unobservable inputs (Level 3). This assessment involves significant judgment, including certain assumptions and estimates that determine future cash flow expectations and other future benefits, which are consistent with the expectations of buyers and sellers of cable systems in determining fair value. These assumptions and estimates include discount rates, estimated growth rates, terminal growth rates, comparable company data, revenues per customer, market penetration as a percentage of homes passed and operating margin. We also consider market transactions, market valuations, research analyst estimates and other valuations using multiples of operating income before depreciation and amortization to confirm the reasonableness of fair values determined by the DCF methodology. We also employ the Greenfield model to corroborate the fair values of our cable franchise rights determined under the In-use Excess Earnings DCF methodology. Significant impairment in value resulting in impairment charges may result if the estimates and assumptions used in the fair value determination change in the future. Such impairments, if recognized, could potentially be material.

Based on the guidance outlined in ASC 350, we have determined that the unit of accounting or reporting unit, for testing goodwill and franchise rights is Mediacom Broadband. Comprising cable system clusters across several states, Mediacom Broadband is at the financial reporting level that is managed and reviewed by the corporate office (i.e., chief operating decision maker) including our determination as to how we allocate capital resources and utilize the assets. The reporting unit level also reflects the level at which the purchase method of accounting for our acquisitions was originally recorded.

In accordance with ASC 350, we are required to determine goodwill impairment using a two-step process. The first step compares the fair value of a reporting unit with our carrying amount, including goodwill. If the fair value of the reporting unit exceeds our carrying amount, goodwill of the reporting unit is considered not impaired and the second step is unnecessary. If the carrying amount of a reporting unit exceeds our fair value, the second step is performed to measure the amount of impairment loss, if any. The second step compares the implied fair value of the reporting unit’s goodwill, calculated using the residual method, with the carrying amount of that goodwill. If the carrying amount of the goodwill exceeds the implied fair value, the excess is recognized as an impairment loss.

The impairment test for our franchise rights and other intangible assets not subject to amortization consists of a comparison of the fair value of the intangible asset with its carrying value. If the carrying value of the intangible asset exceeds its fair value, the excess is recognized as an impairment loss.

Since our adoption of ASC 350 in 2002, we have not recorded any impairments as a result of our impairment testing. We completed our most recent impairment test as of October 1, 2016, which reflected no impairment of our franchise rights, goodwill or other intangible assets.

We could record impairments in the future if there are changes in the long-term fundamentals of our business, in general market conditions or in the regulatory landscape that could prevent us from recovering the carrying value of our long-lived intangible assets. The economic conditions affecting the U.S. economy, and how that may impact the fundamentals of our business, may have a negative impact on the fair values of the assets in our reporting unit.

In accordance with Accounting Standards Update No. 2010-28 — *When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (a consensus of the FASB Emerging Issues Task Force)*, as of October 1, 2016 and 2015, we have evaluated whether there are any adverse qualitative factors surrounding our Mediacom Broadband reporting unit indicating that a goodwill impairment may exist. We do not believe that it is “more likely than not” that a goodwill impairment exists. As such, we have not performed Step 2 of the goodwill impairment test. As of both December 31, 2016 and 2015, the Mediacom Broadband reporting unit had a positive carrying amount.

## Table of Contents

The following table details changes in the carrying value of goodwill for the years ended December 31, 2016 and 2015 (dollars in thousands):

Balance - December 31, 2014	\$195,945
Acquisitions	—
Dispositions	—
Balance - December 31, 2015	<u>\$195,945</u>
Acquisitions	—
Dispositions	—
Balance - December 31, 2016	<u><u>\$195,945</u></u>

### *Segment Reporting*

ASC 280 — *Segment Reporting* (“ASC 280”) requires the disclosure of factors used to identify an enterprise’s reportable segments. Our operations are organized and managed on the basis of cable system clusters within our service area. Each cable system cluster derives revenues from the delivery of similar products and services to a customer base that is also similar. Each cable system cluster deploys similar technology to deliver our products and services, operates within a similar regulatory environment and has similar economic characteristics. We evaluated the criteria for aggregation under ASC 280 and believe that we meet each of the respective criteria set forth and accordingly, have identified broadband services as our one reportable segment.

### *Accounting for Derivative Instruments*

We account for derivative instruments in accordance with ASC 815 — *Derivatives and Hedging*. These pronouncements require that all derivative instruments be recognized on the balance sheet at fair value. We enter into interest rate exchange agreements to fix the interest rate on a portion of our variable interest rate debt to reduce the potential volatility in our interest expense that would otherwise result from changes in market interest rates. Our derivative instruments are recorded at fair value and are included in other current assets, other assets and other liabilities of our consolidated balance sheet. Our accounting policies for these instruments are based on whether they meet our criteria for designation as hedging transactions, which include the instrument’s effectiveness, risk reduction and, in most cases, a one-to-one matching of the derivative instrument to our underlying transaction. Gains and losses from changes in fair values of derivatives that are not designated as hedges for accounting purposes are recognized in the consolidated statement of operations. We have no derivative financial instruments designated as hedges. Therefore, changes in fair value for the respective periods were recognized in the consolidated statement of operations.

### *Accounting for Asset Retirement*

We adopted ASC 410 — *Asset Retirement Obligations* (“ASC 410”), on January 1, 2003. ASC 410 addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. We reviewed our asset retirement obligations to determine the fair value of such liabilities and if a reasonable estimate of fair value could be made. This entailed the review of leases covering tangible long-lived assets as well as our rights-of-way under franchise agreements. Certain of our franchise agreements and leases contain provisions that require restoration or removal of equipment if the franchises or leases are not renewed. Based on historical experience, we expect to renew our franchise or lease agreements. In the unlikely event that any franchise or lease agreement is not expected to be renewed, we would record an estimated liability. However, in determining the fair value of our asset retirement obligation under our franchise agreements, consideration will be given to the Cable Communications Policy Act of 1984, which generally entitles the cable operator to the “fair market value” for the cable system covered by a franchise, if renewal is denied and the franchising authority acquires ownership of the cable system or effects a transfer of the cable system to another person. Changes in these assumptions based on future information could result in adjustments to estimated liabilities.

Upon adoption of ASC 410, we determined that in certain instances, we are obligated by contractual terms or regulatory requirements to remove facilities or perform other remediation activities upon the retirement of our assets. We initially recorded a \$1.8 million asset in property, plant and equipment and a corresponding liability of \$1.8 million. As of both December 31, 2016 and 2015, the corresponding asset, net of accumulated amortization, was \$0.

## Table of Contents

### *Accounting for Long-Lived Assets*

In accordance with ASC 360 — *Property, Plant and Equipment*, we periodically evaluate the recoverability and estimated lives of our long-lived assets, including property and equipment and intangible assets subject to amortization, whenever events or changes in circumstances indicate that the carrying amount may not be recoverable or the useful life has changed. The measurement for such impairment loss is based on the fair value of the asset, typically based upon the future cash flows discounted at a rate commensurate with the risk involved. Unless presented separately, the loss is included as a component of either depreciation expense or amortization expense, as appropriate.

### *Programming Costs*

We have various fixed-term carriage contracts to obtain programming for our cable systems from content suppliers whose compensation is generally based on a fixed monthly fee per video customer. These programming contracts are subject to negotiated renewal. Programming costs are recognized when we distribute the related programming. These programming costs are usually payable each month based on calculations performed by us and are subject to adjustments based on the results of periodic audits by the content suppliers. Historically, such audit adjustments have been immaterial to our total programming costs. Financial incentives, when received, are deferred within non-current liabilities in our consolidated balance sheets and recognized as a reduction of programming costs (which are a component of service costs in the consolidated statement of operations) over the carriage term of the programming contract.

### *Recent Accounting Pronouncements*

In May 2014, the FASB issued ASU No. 2014-09 (“ASU 2014-09”) – *Revenue from Contracts with Customers*. The guidance states that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity should also disclose sufficient information to enable users of financial statements to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. This guidance supersedes most industry-specific guidance, including Statement of Financial Accounting Standards No. 51 – *Financial Reporting by Cable Television Companies*. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Based on a preliminary assessment of certain revenue transactions performed to date, we expect that the new guidance will impact the timing of the recognition of installation revenue and commission expenses. Under the new guidance, these amounts will be recognized as revenue and expenses, respectively, over a period of time instead of immediately, as is being done under current practice. Installation revenues and commission expenses recorded in 2016 are each less than 2% of total revenues recorded in the same period. We are currently in the process of evaluating which method of transition will be utilized at adoption. We continue to assess all of the potential impacts that the adoption of ASU 2014-09 will have on our consolidated financial statements, including the development of new accounting policies, procedures and internal controls associated with the adoption of the standard.

In August 2014, the FASB issued new guidance that requires management to assess the Company’s ability to continue as a going concern and to provide related disclosures in certain circumstances. This guidance is effective for interim and fiscal years ending after December 15, 2016, with early adoption permitted. This guidance did not have a material impact on our financial position, operations or cash flows.

In April 2015 (as amended in August 2015), the FASB issued ASU No. 2015-03 (and ASU 2015-15) – *Interest—Imputation of Interest (Subtopic 835-30) Simplifying the Presentation of Debt Issuance Costs* (“ASU 2015-03”). The purpose of this guidance is to simplify the presentation of debt issuance costs and requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. For public business entities, the amendments in this update are effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. An entity should apply the new guidance on a retrospective basis, wherein the balance sheet of each individual period presented should be adjusted to reflect the period-specific effects of applying the new guidance. We adopted ASU 2015-03 and ASU 2015-15 as of January 1, 2016 and implemented retrospectively as of December 31, 2015. We reclassified \$14.4 million of deferred financing costs from other assets, net to long-term debt, net (less current portion) as of December 31, 2016 in accordance with such guidance. We reclassified \$20.2 million of deferred financing costs from other assets, net to long-term debt, net (less current portion) as of December 31, 2015 in accordance with such guidance. See Note 6.

In April 2015, the FASB issued ASU 2015-05 – *Intangibles—Goodwill and Other—Internal-Use Software* (Subtopic 350-40) (“ASU 2015-05”). The objective of ASU 2015-05 is to address the concerns of stakeholders that the lack of guidance about a customer’s

accounting for fees in a cloud computing arrangement leads to unnecessary cost and complexity when evaluating the accounting for those fees, as well as some diversity in practice. The amendments in ASU 2015-05 will help entities evaluate the accounting for fees

## Table of Contents

paid by a customer in a cloud computing arrangement by providing guidance as to whether an arrangement includes the sale or license of software. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service, and other similar hosting arrangements. This guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. We adopted this new guidance as of January 1, 2016 and determined that there was not a material impact to our operations.

In February 2016, the FASB issued ASU 2016-02 - *Leases* (Topic 842) ("ASU 2016-02"). The objective of ASU 2016-02 is to address the concerns to increase the transparency around lease obligations. To address these concerns, previously unrecorded off-balance sheet obligations will now be brought more prominently to light by presenting lease liabilities on the face of the balance sheet. Accompanied by enhanced qualitative and quantitative disclosures in the notes to the financial statements, financial statement users will be able to more accurately compare information from one company to another. This guidance is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2018. We have not completed our evaluation of this new guidance.

In August 2016, the FASB issued ASU 2016-15 - *Statement of Cash Flows* - Clarification of Certain Cash Receipts and Cash Payments. ("ASU 2016-15"). Stakeholders indicated that there is diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows under Topic 230, *Statement of Cash Flows*, and other topics. ASU 2016-15 addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice. The amendments in ASU 2016-15 are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. We do not expect ASU 2016-15 will have a material impact on financial position, operations or cash flows upon adoption.

### 3. PROPERTY, PLANT AND EQUIPMENT

As of December 31, 2016 and 2015, property, plant and equipment consisted of (dollars in thousands):

	<u>December 31, 2016</u>	<u>December 31, 2015</u>
Cable systems, equipment and customer devices	\$ 2,314,715	\$ 2,250,245
Vehicles	42,334	41,924
Buildings and leasehold improvements	36,708	35,870
Furniture, fixtures and office equipment	34,092	37,128
Land and land improvements	7,841	7,908
Property, plant and equipment, gross	<u>\$ 2,435,690</u>	<u>\$ 2,373,075</u>
Accumulated depreciation	<u>(1,619,301)</u>	<u>(1,589,422)</u>
Property, plant and equipment, net	<u>\$ 816,389</u>	<u>\$ 783,653</u>

Depreciation expense related to fixed assets for the years ended December 31, 2016, 2015 and 2014 was \$147.0 million, \$143.7 million and \$153.5 million, respectively. As of each of December 31, 2016 and 2015, we had no property under capitalized leases. We incurred gross interest costs of \$80.9 million, \$95.7 million and \$101.7 million for the years ended December 31, 2016, 2015 and 2014, respectively, of which \$1.3 million, \$1.0 million and \$1.3 million were capitalized during the years ended December 31, 2016, 2015 and 2014, respectively. See Note 2.

Table of Contents**4. FAIR VALUE**

The tables below set forth our financial assets and liabilities measured at fair value on a recurring basis using a market-based approach. Our financial assets and liabilities, all of which represent interest rate exchange agreements (which we refer to as “interest rate swaps”) have been categorized according to the three-level fair value hierarchy established by ASC 820 – *Fair Value Measurement* – (“ASC 820”), which prioritizes the inputs used in measuring fair value, as follows (dollars in thousands):

- Level 1 — Quoted market prices in active markets for identical assets or liabilities.
- Level 2 — Observable market based inputs or unobservable inputs that are corroborated by market data.
- Level 3 — Unobservable inputs that are not corroborated by market data.

	Fair Value as of December 31, 2016			
	Level 1	Level 2	Level 3	Total
<b>Assets</b>				
Interest rate exchange agreements	\$ —	\$1,089	\$ —	\$1,089
<b>Liabilities</b>				
Interest rate exchange agreements	\$ —	\$1,763	\$ —	\$1,763
	Fair Value as of December 31, 2015			
	Level 1	Level 2	Level 3	Total
<b>Assets</b>				
Interest rate exchange agreements	\$ —	\$1,818	\$ —	\$1,818
<b>Liabilities</b>				
Interest rate exchange agreements	\$ —	\$3,695	\$ —	\$3,695

The fair value of our interest rate swaps represents the estimated amount that we would receive or pay to terminate such agreements, taking into account projected interest rates, based on quoted London Interbank Offered Rate (“LIBOR”) futures and the remaining time to maturity. While our interest rate swaps are subject to contractual terms that provide for the net settlement of transactions with counterparties, we do not offset assets and liabilities under these agreements for financial statement presentation purposes, and assets and liabilities are reported on a gross basis.

As of December 31, 2016, we recorded a long-term asset of \$1.1 million, a current liability in accounts payable, accrued expenses and other current liabilities of \$1.8 million and no current asset or long-term liability. As of December 31, 2015, we recorded a long-term asset of \$1.8 million, a current liability in accounts payable, accrued expenses and other current liabilities of \$3.7 million and no current asset or long-term liability.

As a result of the changes in the mark-to-market valuations on our interest rate swaps, we recorded net gains on derivatives of \$1.2 million, \$9.2 million and \$23.2 million for the years ended December 31, 2016, 2015 and 2014, respectively.

Table of Contents**5. ACCOUNTS PAYABLE, ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES**

Accounts payable, accrued expenses and other current liabilities consisted of the following as of December 31, 2016 and 2015 (dollars in thousands):

	<u>December 31,</u> <u>2016</u>	<u>December 31,</u> <u>2015</u>
Accounts payable - trade	\$ 42,094	\$ 36,788
Accrued programming costs	25,856	26,347
Accrued taxes and fees	17,212	16,720
Advance customer payments	13,902	13,274
Accrued payroll and benefits	13,795	13,308
Accrued interest	10,080	12,457
Bank overdrafts (1)	7,387	4,617
Accrued service costs	6,810	7,871
Accrued administrative costs	5,381	3,435
Accrued property, plant and equipment	4,950	8,791
Accrued marketing costs	3,193	2,184
Liabilities under interest rate exchange agreements	1,763	3,695
Accrued telecommunications costs	878	986
Other accrued expenses	1,517	1,456
Accounts payable, accrued expenses and other current liabilities	<u>\$ 154,818</u>	<u>\$ 151,929</u>

- (1) Bank overdrafts represented outstanding checks in excess of funds on deposit at our disbursement accounts. We transfer funds from our depository accounts to our disbursement accounts upon daily notification of checks presented for payment. Changes in bank overdrafts are reported in "other financing activities" in our Consolidated Statement of Cash Flows.

**6. DEBT**

As of December 31, 2016 and 2015, our outstanding debt consisted of (dollars in thousands):

	<u>December 31,</u> <u>2016</u>	<u>December 31,</u> <u>2015</u>
Bank credit facility	\$ 1,128,000	\$ 1,329,750
5 1/2% senior notes due 2021	200,000	200,000
6 3/8% senior notes due 2023	300,000	300,000
Total debt	\$ 1,628,000	\$ 1,829,750
Less: current portion	16,575	19,075
Total long-term debt, gross (less current portion)	\$ 1,611,425	\$ 1,810,675
Less: deferred financing costs, net	14,350	20,232
Total long-term debt, net (less current portion)	<u>\$ 1,597,075</u>	<u>\$ 1,790,443</u>

***Bank Credit Facility***

As of December 31, 2016, we maintained a \$1.384 billion bank credit facility (the "credit facility"), comprising:

- \$368.5 million of revolving credit commitments, which expire on October 10, 2019;
- \$143.9 million of outstanding borrowings under Term Loan A, which mature on January 15, 2021;
- \$579.0 million of outstanding borrowings under Term Loan H, which mature on January 29, 2021; and
- \$292.5 million of outstanding borrowings under Term Loan J, which mature on June 30, 2021.

## Table of Contents

The credit facility is collateralized by our ownership interests in our operating subsidiaries and is guaranteed by us on a limited recourse basis to the extent of such ownership interests. As of December 31, 2016, we had the ability to repay all outstanding debt under the credit facility at par value any time prior to maturity. As of December 31, 2016, the credit agreement governing the credit facility (the "credit agreement") required our operating subsidiaries to maintain a total leverage ratio (as defined in the credit agreement) of no more than 5.0 to 1.0 and an interest coverage ratio (as defined in the credit agreement) of no less than 2.0 to 1.0. For all periods through December 31, 2016, our operating subsidiaries were in compliance with all covenants under the credit agreement.

### *Revolving Credit Commitments*

On October 10, 2014, we terminated our existing revolving credit commitments and, on the same date, entered into an incremental facility agreement that provided for \$216.0 million of new revolving credit commitments, which are scheduled to expire on October 10, 2019. On December 9, 2014, August 12, 2015 and November 23, 2015, we entered into incremental facility agreements that provided for an additional \$40.0 million, \$25.0 million and \$87.5 million of revolving credit commitments, respectively.

Borrowings under our revolving credit commitments bear interest at a floating rate or rates equal to, at our discretion, LIBOR plus a margin ranging from 2.00% to 2.75%, or the Prime Rate plus a margin ranging from 1.00% to 1.75%. Commitment fees on the unused portion of our revolving credit commitments are payable at a rate of 0.50% or 0.63%. The applicable margin and commitment fees charged are determined by certain financial ratios pursuant to the credit agreement.

As of December 31, 2016, we had \$246.2 million of unused revolving credit commitments, all of which were available to be borrowed and used for general corporate purposes, after giving effect to \$112.6 million of outstanding loans and \$9.7 million of letters of credit issued to various parties as collateral.

### *Term Loan A*

On December 17, 2015, we entered into an incremental facility agreement that provided for a new term loan in the original principal amount of \$151.5 million ("Term Loan A"). Term Loan A matures on January 15, 2021 and, since March 31, 2016, has been subject to quarterly principal payments of \$1.9 million, representing 1.25% of the original principal amount, with a final payment at maturity of \$113.6 million, representing 75.00% of the original principal amount.

Borrowings under Term Loan A bear interest at a floating rate or rates equal to, at our discretion, LIBOR plus a margin ranging from 2.25% to 3.50%, or the Prime Rate plus a margin ranging from 1.25% to 2.50%. The applicable margin and commitment fees charged are determined by certain financial ratios pursuant to the credit agreement.

### *Term Loan H*

On May 29, 2013, we entered into an incremental facility agreement that provided for a new term loan in the original principal amount of \$600.0 million ("Term Loan H"). Term Loan H matures on January 29, 2021 and, since September 30, 2013, has been subject to quarterly principal payments of \$1.5 million, representing 0.25% of the original principal amount, with a final payment at maturity of \$555.0 million, representing 92.5% of the original principal amount.

Borrowings under Term Loan H bear interest at a floating rate or rates equal to, at our discretion, LIBOR plus a margin of 2.50% (subject to a minimum LIBOR of 0.75%), or the Prime Rate plus a margin of 1.50% (subject to a minimum Prime Rate of 1.75%).

### *Term Loan J*

On June 20, 2014, we entered into an amended and restated credit agreement that, among other things, provided for a new term loan in the original principal amount \$300.0 million ("Term Loan J"). Term Loan J matures on June 30, 2021 and, since September 30, 2014, has been subject to quarterly principal payments of \$0.8 million, representing 0.25% of the original principal amount, with a final payment at maturity of \$279.8 million, representing 93.25% of the original principal amount.

Borrowings under Term Loan J bear interest at a floating rate or rates equal to, at our discretion, LIBOR plus a margin of 2.75% or 3.00% (subject to a minimum LIBOR of 0.75%), or the Prime Rate plus a margin of 1.75% or 2.00% (subject to a minimum Prime Rate of 1.75%). The applicable margin charged is determined by certain financial ratios pursuant to the credit agreement.

## Table of Contents

### *Interest Rate Swaps*

We have entered into several interest rate exchange agreements (which we refer to as “interest rate swaps”) with various banks to fix the variable rate on a portion of our borrowings under the credit facility to reduce the potential volatility in our interest expense that may result from changes in market interest rates. Our interest rate swaps have not been designated as hedges for accounting purposes, and have been accounted for on a mark-to-market basis as of, and for the years ended, December 31, 2016, 2015 and 2014. As of December 31, 2016, we had current interest rate swaps that fixed the variable portion of \$600 million of borrowings at a rate of 1.5%, all of which are scheduled to expire during December 2018.

As of December 31, 2016, the weighted average interest rate on outstanding borrowings under the credit facility, including the effect of our interest rate swaps, was 3.5%.

### *Senior Notes*

As of December 31, 2016, we had \$500.0 million of outstanding senior notes, comprising \$200.0 million of 5 ½% senior notes due April 2021 (the “5 ½% Notes”), and \$300.0 million of 6 ¾% senior notes due April 2023 (the “6 ¾% Notes”).

Our senior notes are unsecured obligations and, as of December 31, 2016, the indentures governing our senior notes (the “indentures”) limits the incurrence of additional indebtedness based upon a maximum debt to operating cash flow ratio (as defined in the indentures) of 8.5 to 1.0. For all periods through December 31, 2016, we were in compliance with all of the covenants under the indentures.

#### *5 ½% Notes*

On March 17, 2014, we issued the 5 ½% Notes in the aggregate principal amount of \$200.0 million. Net proceeds from the 5 ½% Notes funded a partial repayment of certain previously existing term loans.

As a percentage of par value, the 5 ½% Notes are redeemable at 102.750% commencing April 15, 2017, 101.375% commencing April 15, 2018 and at par value commencing April 15, 2019.

#### *6 ¾% Notes*

On August 28, 2012, we issued the 6 ¾% Notes in the aggregate principal amount of \$300.0 million. Net proceeds from the 6 ¾% Notes were used to fund, in part, the redemption of certain previously existing senior notes.

As a percentage of par value, the 6 ¾% Notes are redeemable at 103.188% commencing April 1, 2018, 102.125% commencing April 1, 2019, 101.063% commencing April 1, 2020 and at par value commencing April 1, 2021.

### *Loss on Early Extinguishment of Debt*

Loss on early extinguishment of debt totaled \$1.2 million, \$4.4 million and \$0.3 million for the years ended December 31, 2016, 2015 and 2014, respectively, which represented the write-off of unamortized deferred financing costs as a result of the repayment of certain previously existing term loans under the credit facility.

### *Deferred Financing Costs*

We adopted ASU 2015-03 and ASU 2015-15 as of January 1, 2016, and implemented retrospectively as of December 31, 2015. In accordance with such guidance, we reclassified \$14.4 million and \$20.2 million of deferred financing costs from other assets, net to long-term debt, net (less current portion) as of December 31, 2016 and 2015, respectively.

### *Debt Ratings*

MCC’s corporate credit ratings are currently Ba3 by Moody’s, with a positive outlook, and BB by Standard and Poor’s (“S&P”), with a stable outlook, and our senior unsecured ratings are currently B2 by Moody’s, with a positive outlook, and B+ by S&P, with a stable outlook. There are no covenants, events of default, borrowing conditions or other terms in the credit agreement or indentures that are based on changes in our credit rating assigned by any rating agency.

## Table of Contents

### *Fair Value and Debt Maturities*

The fair values of our senior notes and outstanding debt under the credit facility (which were calculated based upon market prices of such issuances in an active market when available) were as follows as of December 31, 2016 and 2015 (dollars in thousands):

	December 31,	
	2016	2015
5 1/2% senior notes due 2021	\$ 205,500	\$ 191,500
6 3/8% senior notes due 2023	316,500	291,750
Total senior notes	<u>\$ 522,000</u>	<u>\$ 483,250</u>
Bank credit facility	<u>\$1,135,633</u>	<u>\$1,317,990</u>

The scheduled maturities of all debt outstanding as of December 31, 2016 are as follows (dollars in thousands):

	Bank Credit Facility		Senior Notes	Total
	Revolving Credit	Term Loans		
January 1, 2017 to December 31, 2017	\$ —	\$ 16,575	\$ —	\$ 16,575
January 1, 2018 to December 31, 2018	—	16,575	—	16,575
January 1, 2019 to December 31, 2019	112,575	16,575	—	129,150
January 1, 2020 to December 31, 2020	—	16,575	—	16,575
January 1, 2021 to December 31, 2021	—	949,125	200,000	1,149,125
Thereafter	—	—	300,000	300,000
Total	<u>\$ 112,575</u>	<u>\$1,015,425</u>	<u>\$500,000</u>	<u>\$1,628,000</u>

## 7. PREFERRED MEMBERS' INTEREST

In July 2001, we received a \$150.0 million preferred membership investment ("PMI") from the operating subsidiaries of Mediacom LLC, which has a 12% annual dividend, payable quarterly in cash. We may voluntarily repay the PMI at any time at par, and the operating subsidiaries of Mediacom LLC have the option to call for the redemption of the PMI upon the repayment of all of our outstanding senior notes. We paid \$18.0 million in cash dividends on the PMI during each of the years ended December 31, 2016, 2015, and 2014.

## 8. MEMBER'S EQUITY

As a wholly-owned subsidiary of MCC, our business affairs, including our financing decisions, are directed by MCC. See Note 9.

Capital contributions from parent and capital distributions to parent are reported on a gross basis in the Consolidated Statements of Changes in Member's Equity and the Consolidated Statements of Cash Flows. We received capital contributions from parent of \$75.0 million for the year ended December 31, 2016, and no capital contributions from parent during each of the years ended December 31, 2015 and 2014. We made capital distributions to parent in cash of \$7.0 million, \$0 and \$163.3 million during the years ended December 31, 2016, 2015 and 2014, respectively.

## 9. RELATED PARTY TRANSACTIONS

### Management Agreements

MCC manages us pursuant to management agreements with our operating subsidiaries. Under such agreements, MCC has full and exclusive authority to manage our day to day operations and conduct our business. We remain responsible for all expenses and liabilities relating to the construction, development, operation, maintenance, repair, and ownership of our systems.

As compensation for the performance of its services, subject to certain restrictions, MCC is entitled under each management agreement to receive management fees in an amount not to exceed 4.0% of the annual gross operating revenues of our operating subsidiaries. MCC is also entitled to the reimbursement of all expenses necessarily incurred in its capacity as manager. MCC charged us management fees of \$20.8 million, \$19.0 million and \$17.7 million during the years ended December 31, 2016, 2015 and 2014, respectively.

Mediacom LLC is a preferred equity investor in us. See Note 7.

## Table of Contents

### **10. EMPLOYEE BENEFIT PLANS**

Substantially all our employees are eligible to participate in MCC's defined contribution plan pursuant to the Internal Revenue Code Section 401(k) ("MCC's Plan"). Under MCC's Plan, eligible employees may contribute a portion of their current pretax compensation (as defined by MCC's Plan). MCC's Plan permits, but does not require, matching contributions and non-matching (profit sharing) contributions to be made by us up to a maximum dollar amount or maximum percentage of participant contributions, as determined annually by us. We presently match 50% on the first 6% of employee contributions. Our contributions under MCC's Plan totaled \$1.2 million, \$1.3 million and \$1.3 million for the years ended December 31, 2016, 2015 and 2014, respectively, which were recorded in service costs and selling, general and administrative expenses.

### **11. COMMITMENTS AND CONTINGENCIES**

#### *Leases*

Under various lease and rental agreements for offices, warehouses and computer terminals, we had rental expense of \$4.1 million, \$4.0 million and \$5.0 million for the years ended December 31, 2016, 2015 and 2014, respectively. Future minimum annual rental payments as of December 31, 2016 are as follows (dollars in thousands):

January 1, 2017 to December 31, 2017	\$2,055
January 1, 2018 to December 31, 2018	1,427
January 1, 2019 to December 31, 2019	1,077
January 1, 2020 to December 31, 2020	805
January 1, 2021 to December 31, 2021	668
Thereafter	<u>1,618</u>
Total	<u>\$7,650</u>

#### *Other Obligations*

In addition, we rent utility poles in our operations generally under short-term arrangements, but we expect these arrangements to recur. Total rental expense for utility poles was approximately \$4.2 million, \$4.3 million and \$4.2 million for the years ended December 31, 2016, 2015 and 2014, respectively.

#### *Letters of Credit*

As of December 31, 2016, \$9.7 million of letters of credit were issued to various parties to secure our performance relating to insurance and franchise requirements. The fair value of such letters of credit was approximately book value.

#### *Legal Proceedings*

We are involved in various legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position, results of operations, cash flows or business.

## Table of Contents

### **ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

### **ITEM 9A. CONTROLS AND PROCEDURES**

#### **Mediacom Broadband LLC**

Under the supervision and with the participation of the management of Mediacom Broadband LLC, including Mediacom Broadband LLC's Chief Executive Officer and Chief Financial Officer, Mediacom Broadband LLC evaluated the effectiveness of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon such evaluation, Mediacom Broadband LLC's Chief Executive Officer and Chief Financial Officer concluded that Mediacom Broadband LLC's disclosure controls and procedures were effective as of December 31, 2016.

There has not been any change in Mediacom Broadband LLC's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the year ended December 31, 2016 that has materially affected, or is reasonably likely to materially affect, Mediacom Broadband LLC's internal control over financial reporting.

#### ***Management's Report on Internal Control Over Financial Reporting***

Management of Mediacom Broadband LLC is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act as a process designed by, or under the supervision of Mediacom Broadband LLC's principal executive and principal financial officers and effected by Mediacom Broadband LLC's manager, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of Mediacom Broadband LLC;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of Mediacom Broadband LLC are being made only in accordance with authorizations of the management of Mediacom Broadband LLC; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Mediacom Broadband LLC's assets that could have a material effect on the financial statements.

Because of Mediacom Broadband LLC's inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Mediacom Broadband LLC's internal control over financial reporting as of December 31, 2016. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013 framework). Based on this assessment, management determined that, as of December 31, 2016, Mediacom Broadband LLC's internal control over financial reporting was effective.

This annual report does not include an attestation report of Mediacom Broadband LLC's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by Mediacom Broadband LLC's registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit Mediacom Broadband LLC to provide only management's report in this Annual Report.

#### **Mediacom Broadband Corporation**

Under the supervision and with the participation of the management of Mediacom Broadband Corporation ("Mediacom Broadband"), including Mediacom Broadband's Chief Executive Officer and Chief Financial Officer, Mediacom Broadband evaluated the effectiveness of Mediacom Broadband's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon such evaluation, Mediacom

Broadband's Chief Executive Officer and Chief Financial Officer concluded that Mediacom Broadband's disclosure controls and procedures were effective as of December 31, 2016.

## Table of Contents

There has not been any change in Mediacom Broadband's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the year ended December 31, 2016 that has materially affected, or is reasonably likely to materially affect, Mediacom Broadband's internal control over financial reporting.

### *Management's Report on Internal Control Over Financial Reporting*

Management of Mediacom Broadband is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act as a process designed by, or under the supervision of Mediacom Broadband's principal executive and principal financial officers and effected by Mediacom Broadband's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of Mediacom Broadband;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of Mediacom Broadband are being made only in accordance with authorizations of management and directors of Mediacom Broadband; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Mediacom Broadband's assets that could have a material effect on the financial statements.

Because of Mediacom Broadband's inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Mediacom Broadband's internal control over financial reporting as of December 31, 2016. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013 framework). Based on this assessment, management determined that, as of December 31, 2016, Mediacom Broadband's internal control over financial reporting was effective.

This annual report does not include an attestation report of Mediacom Broadband's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by Mediacom Broadband's registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit Mediacom Broadband to provide only management's report in this annual report.

## **ITEM 9B. OTHER INFORMATION**

None.

Table of Contents**PART III****ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

MCC is our sole voting member and serves as manager of our operating subsidiaries. The Directors and Executive Officers for MCC, Mediacom Broadband LLC ("MBLLC") and Mediacom Broadband Corporation ("MBC") are indicated below:

<u>Name</u>	<u>Age</u>	<u>Position</u>
Rocco B. Commisso	67	Chairman, Chief Executive Officer and Director of MCC and MBC; Chief Executive Officer of MBLLC
Mark E. Stephan	60	Executive Vice President, Chief Financial Officer and Director of MCC; Executive Vice President and Chief Financial Officer of MBLLC and MBC
John G. Pascarelli	55	Executive Vice President, Operations of MCC, MBLLC and MBC
Italia Commisso Weinand	63	Executive Vice President, Programming and Human Resources and Director of MCC; Executive Vice President, Programming and Human Resources of MBLLC
Joseph E. Young	68	Senior Vice President, General Counsel and Secretary of MCC, MBLLC and MBC
Brian M. Walsh	51	Senior Vice President, Corporate Controller of MCC and MBLLC
Tapan Dandnaik	43	Senior Vice President, Customer Service and Financial Operations of MCC
Thomas J. Larsen	44	Senior Vice President, Government and Public Relations of MCC
Peter Lyons	47	Senior Vice President, Information Technology of MCC
David McNaughton	55	Senior Vice President, Marketing and Consumer Services of MCC
Ed Pardini	59	Senior Vice President, Field Operations of MCC
Dan Templin	53	Senior Vice President, Mediacom Business of MCC
JR Walden	45	Senior Vice President, Technology of MCC, CTO

*Rocco B. Commisso* has 38 years of experience with the cable industry, and has served as MCC's Chairman and Chief Executive Officer, and our Chief Executive Officer since founding our predecessor company in July 1995. From 1986 to 1995, he served as Executive Vice President, Chief Financial Officer and a director of Cablevision Industries Corporation. Prior to that time, Mr. Commisso served as Senior Vice President of Royal Bank of Canada's affiliate in the United States from 1981, where he founded and directed a specialized lending group to media and communications companies. Mr. Commisso began his association with the cable industry in 1978 at The Chase Manhattan Bank, where he managed the bank's lending activities to communications firms including the cable industry. Mr. Commisso serves on the board of directors of the National Cable & Telecommunications Association, C-SPAN and Cable Television Laboratories, Inc. He was inducted into the 2007 Broadcasting & Cable Hall of Fame. Mr. Commisso holds a Bachelor of Science in Industrial Engineering and a Master of Business Administration from Columbia University.

*Mark E. Stephan* has 30 years of experience with the cable industry, and has served as MCC's, and our Executive Vice President and Chief Financial Officer since July 2005. Prior to that time, he was Executive Vice President, Chief Financial Officer and Treasurer since November 2003 and MCC's Senior Vice President, Chief Financial Officer and Treasurer since the commencement of MCC's operations in March 1996. Before joining MCC, Mr. Stephan served as Vice President, Finance for Cablevision Industries from July 1993. Prior to that time, Mr. Stephan served as Manager of the telecommunications and media lending group of Royal Bank of Canada. Mr. Stephan has been a director of MCC since May 2011 and was previously a director of MCC from March 2000 to March 2011.

*John G. Pascarelli* has 35 years of experience in the cable industry, and has served as MCC's Executive Vice President, Operations since November 2003. Prior to that time, he was MCC's Senior Vice President, Marketing and Consumer Services from June 2000 and MCC's Vice President of Marketing from March 1998. Before joining MCC, Mr. Pascarelli served as Vice President, Marketing for Helicon Communications Corporation from January 1996 to February 1998 and as Corporate Director of Marketing for Cablevision Industries from 1988 to 1995. Prior to that time, Mr. Pascarelli served in various marketing and system management capacities for Continental Cablevision, Inc., Cablevision Systems and Storer Communications.

*Italia Commisso Weinand* has 40 years of experience in the cable industry, and serves on MCC's board, and is the Executive Vice President of Programming and Human Resources since May 2012. Prior to that time, she was MCC's Senior Vice President of Programming and Human Resources since February 1998 and MCC's Vice President of Operations since April 1996. Before joining MCC, Ms. Weinand served as Regional Manager for Comcast Corporation from July 1985. Prior to that time, Ms. Weinand held various management positions with Time Warner, Inc., Times Mirror Cable and Tele-Communications, Inc. For the past seven years she has been named among the "Most Powerful Women in Cable" by CableFax Magazine and presently serves on the Board of The Cable Center, the Emma Bowen Foundation and CTAM Educational Foundation Board. Ms. Weinand was inducted in 2004 into the

Wonder Women and into the 2014 Broadcasting & Cable Hall of Fame. Ms. Weinand is the sister of Mr. Commisso. Ms. Weinand has been a director of MCC since May 2011.

## Table of Contents

*Joseph E. Young* has 34 years of experience with the cable industry, and has served as Senior Vice President, General Counsel since November 2001. Prior to that time, Mr. Young served as Executive Vice President, Legal and Business Affairs, for LinkShare Corporation, an Internet-based provider of marketing services, from September 1999 to October 2001. Prior to that time, he practiced corporate law with Baker & Botts, LLP from January 1996 to September 1999. Previously, Mr. Young was a partner with the Law Offices of Jerome H. Kern and a partner with Shea & Gould.

*Brian M. Walsh* has 29 years of experience in the cable industry, and has served as MCC's Senior Vice President and Corporate Controller since February 2005. Prior to that time, he was MCC's Senior Vice President, Financial Operations from November 2003, MCC's Vice President, Finance and Assistant to the Chairman from November 2001, MCC's Vice President and Corporate Controller from February 1998 and MCC's Director of Accounting from November 1996. Before joining MCC in April 1996, Mr. Walsh held various management positions with Cablevision Industries from 1988 to 1995.

*Tapan Dandnaik* has 16 years of experience in the cable industry, and has served as MCC's Senior Vice President, Customer Service & Financial Operations since July 2008. In 2013, he also assumed responsibilities for our centralized field support operations. Prior to that time, he was MCC's Group Vice President, Financial Operations since July 2007 and MCC's Vice President, Financial Operations since May 2005. Before joining MCC, Mr. Dandnaik served as Director of Corporate Initiatives, Manager of Corporate Finance and as a Financial Analyst for RCN from July 2000 to April 2005. Prior to that time, Mr. Dandnaik served as a Product Engineer for Ingersoll-Rand in India. Mr. Dandnaik was the recipient of the National Cable & Telecommunication Association's Vanguard Award for Young Leadership in 2012 and serves on The Cable Center Customer Care Committee.

*Thomas J. Larsen* has 16 years of experience in the cable industry, and has served as MCC's Senior Vice President, Government and Public Relations since July 2015. Prior to that time, he was MCC's Group Vice President, Legal and Public Affairs since July 2010 and MCC's Vice President, Legal and Public Affairs since August 2006. Prior to joining MCC, Mr. Larsen worked as Vice President, Law and Public Policy for Adelphia Communications Corporation's Western Region. He serves on the board of directors of the American Cable Association

*Peter Lyons* has 10 years of experience in the cable industry, and has served as MCC's Senior Vice President, Information Technology since July 2015. Prior to that time, he was MCC's Group Vice President, Information Technology from July 2010, MCC's Vice President, Information Technology since March 2007. Before joining MCC in 2007, Mr. Lyons held various senior technology leadership positions at The College Board and Video Update and has 21 years of experience in education and retail businesses.

*David McNaughton* has 29 years of experience in the telecommunications industry, and has served as MCC's Senior Vice President, Marketing and Sales since May 2011. Before joining MCC, Mr. McNaughton served as Chief Marketing Officer for Ntelos Wireless, a Virginia-based regional wireless carrier from 2009 and Senior Vice President and General Manager at Cincinnati Bell from 2007, responsible for wireless, landline and DSL services. Prior to that time, he served as Senior Vice President, Acquisition Marketing at DirecTV, Vice President, Customer Lifecycle and Retention at Nextel Communications, and various executive positions at AirTouch Cellular and Andersen Consulting.

*Ed Pardini* has 34 years of experience in the cable industry, and has served as MCC's Senior Vice President of the Field Operations Group since May 2012. Prior to that time, he was Senior Vice President, Divisional Operations for the North Central Division from April 2006. Before joining MCC, Mr. Pardini served as an operating executive in several markets with Comcast since 1989, concluding his final assignment as a Senior Regional Vice President for Philadelphia and eastern Pennsylvania. Prior to that time, Mr. Pardini served in various financial management positions with Greater Media Cable and Viacom Cable.

*Dan Templin* has 25 years of experience in the cable and broadband industries, and has served as MCC's Senior Vice President, Mediacom Business and President of MCC's CLEC entities since April 2011. His responsibilities for Mediacom Business include SMB and Enterprise network services and also the OnMedia advertising sales unit. Prior to that time, he was MCC's Group Vice President, Strategic Marketing and Product Development since May 2008. Before joining MCC, Mr. Templin served in a number of senior operations, product and marketing roles with Susquehanna Communications, Comcast and Jones Intercable.

*JR Walden* has 21 years of experience in the cable industry, and 23 years of experience in Internet and Telecommunications technology. He has served as MCC's Senior Vice President, Technology since February 2008. Prior to that time, he was MCC's Group Vice President, IP Services from July 2004, MCC's Vice President, IP Services from July 2003, MCC's Senior Director of IP Services from June 2002 and MCC's IP Services Director from October 1998. Before joining MCC in 1998, Mr. Walden worked in the defense research industry holding various positions with the Department of Defense, Comarco and Science Applications International Corporation.

## Table of Contents

Our manager has adopted a code of ethics applicable to all of our employees, including our chief executive officer, chief financial officer and chief accounting officer. This code of ethics was filed as an exhibit to our Annual Report on Form 10-K for the year ended December 31, 2003.

### **ITEM 11. EXECUTIVE COMPENSATION**

The executive officers and directors of MCC are compensated exclusively by MCC and do not receive any separate compensation from Mediacom Broadband LLC or Mediacom Broadband Corporation. MCC acts as manager of our operating subsidiaries and in return receives management fees from each of such subsidiaries.

### **ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

Mediacom Broadband Corporation is a wholly-owned subsidiary of Mediacom Broadband LLC. MCC is the sole voting member of Mediacom Broadband. The address of MCC is 1 Mediacom Way, Mediacom Park, New York 10918.

### **ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS**

#### **Management Agreements**

Pursuant to management agreements between MCC and our operating subsidiaries, MCC is entitled to receive annual management fees in amounts not to exceed 4.0% of gross operating revenues, and MCC shall be responsible for, among other things, the compensation (including benefits) of MCC's executive management. For the year ended December 31, 2016, MCC charged us \$20.8 million of such management fees, approximately 2.0% of gross operating revenues.

#### **Other Relationships**

In July 2001, we received a \$150 million preferred membership interest from Mediacom LLC, a wholly owned subsidiary of MCC. The preferred membership interest has a 12% annual dividend, payable quarterly in cash. For the year ended December 31, 2016, we paid an aggregate of \$18 million in cash dividends on the preferred membership interest.

### **ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES**

Our allocated portion of fees from MCC for professional services provided by our independent auditor in each of the last two fiscal years, in each of the following categories are as follows (dollars in thousands):

	<u>Year Ended</u> <u>December 31,</u>	
	<u>2016</u>	<u>2015</u>
Audit fees	\$400	\$400
Audit-related fees	—	4
Tax fees	—	—
All other fees	<u>1</u>	<u>1</u>
Total	<u>\$401</u>	<u>\$405</u>

Audit fees include fees associated with the annual audit, the reviews of our quarterly reports on Form 10-Q and annual reports on Form 10-K. Audit-related fees include fees associated with the audit of an employee benefit plan and transaction reviews.

Table of Contents**PART IV****ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES****(a) Financial Statements**

**SPRINT CORPORATION**  
**SECURITIES AND EXCHANGE COMMISSION**  
**ANNUAL REPORT ON FORM 10-K**  
**PART I**

**Item 1. Business**  
**FORMATION**

Sprint Corporation, incorporated in 2012 under the laws of Delaware, is a holding company, with operations conducted by its subsidiaries. Our common stock trades on the New York Stock Exchange (NYSE) under the symbol "S."

On July 10, 2013, SoftBank Corp., which subsequently changed its name to SoftBank Group Corp., and certain of its wholly-owned subsidiaries (together, "SoftBank") completed the merger (SoftBank Merger) with Sprint Nextel Corporation (Sprint Nextel) as contemplated by the Agreement and Plan of Merger, dated as of October 15, 2012 (as amended, the Merger Agreement) and the Bond Purchase Agreement, dated as of October 15, 2012 (as amended, the Bond Agreement). As a result of the SoftBank Merger, Starburst II, Inc. (Starburst II) became the parent company of Sprint Nextel. Immediately thereafter, Starburst II changed its name to Sprint Corporation and Sprint Nextel changed its name to Sprint Communications, Inc. (Sprint Communications). As a result of the completion of the SoftBank Merger in which SoftBank acquired an approximate 78% interest in Sprint Corporation, and subsequent open market stock purchases, SoftBank owned approximately 83% of the outstanding common stock of Sprint Corporation as of March 31, 2017.

**OVERVIEW**

Sprint Corporation and its subsidiaries is a communications company offering a comprehensive range of wireless and wireline communications products and services that are designed to meet the needs of consumers, businesses, government subscribers and resellers. Unless the context otherwise requires, references to "Sprint," "we," "us," "our" and the "Company" mean Sprint Corporation and its consolidated subsidiaries for all periods presented and references to "Sprint Communications" are to Sprint Communications, Inc. and its consolidated subsidiaries. We are a large wireless communications company in the United States, as well as a provider of wireline services. Our services are provided through our ownership of extensive wireless networks, an all-digital global wireline network and a Tier 1 Internet backbone.

We offer wireless and wireline services to subscribers in all 50 states, Puerto Rico, and the U.S. Virgin Islands under the Sprint corporate brand, which includes our retail brands of Sprint®, Boost Mobile®, Virgin Mobile®, and Assurance Wireless® on our wireless networks utilizing various technologies including third generation (3G) code division multiple access (CDMA), and fourth generation (4G) services utilizing Long Term Evolution (LTE). We utilize these networks to offer our wireless subscribers differentiated products and services through the use of a single network or a combination of these networks.

**Our Business Segments**

We operate two reportable segments: Wireless and Wireline. For additional information regarding our segments, see "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and also refer to the Notes to the Consolidated Financial Statements.

*Wireless*

We offer wireless services on a postpaid and prepaid payment basis to retail subscribers and also on a wholesale basis, which represents the sale of wireless services that utilize the Sprint network but are sold under the wholesaler's brand.

*Postpaid*

In our postpaid portfolio, we offer several price plans for both consumer and business subscribers. Many of our price plans include unlimited talk, text and data or allow subscribers to purchase monthly data allowances. We also offer family plans that include multiple lines of service under one account. We currently offer these plans with subsidy, installment billing or leasing programs. The subsidy program requires a service contract and allows for a subscriber to purchase a handset at a discount for a new line of service. Our installment billing program does not require a service contract and offers service plans at lower monthly rates compared to subsidy plans, but requires the subscriber to pay full or near full price for the handset over monthly installments. Our leasing program also does not require a service contract, provides for service plans at lower monthly rates compared to subsidy plans and allows qualified subscribers to lease a device and make payments for use of the

Table of Contents

device over the term of the lease. At the end of the lease term, the subscriber can either turn in the device, continue leasing the device or purchase the device. The terms of our installment billing and lease contracts require that customers maintain service otherwise the balance of the note is due or they are in default under their lease respectively. See "Item 1A. Risk Factors—Subscribers who purchase a device on a financing basis are no longer required to sign a fixed-term service contract, which could result in higher churn, and higher bad debt expense" and "—Because we lease devices to subscribers, our device leasing program exposes us to risks, including those related to the actual residual value realized on returned devices, higher churn and increased losses on devices."

*Prepaid*

Our prepaid portfolio currently includes multiple brands, each designed to appeal to specific subscriber uses and demographics. Sprint prepaid primarily serves as a complementary offer to our Sprint postpaid offer for those subscribers who want plans that are affordable, simple and flexible without a long-term commitment. Boost Mobile primarily serves subscribers that are looking for value without data limits. Virgin Mobile primarily serves subscribers that are looking to optimize spend but need solutions that offer control, flexibility and connectivity through various plans with high speed data options. Virgin Mobile is also designated as a Lifeline-only Eligible Telecommunications Carrier in certain states and provides service for the Lifeline program under our Assurance Wireless brand. Assurance Wireless provides eligible subscribers who meet income requirements or are receiving government assistance with a free wireless phone, 350 free local and long distance voice minutes each month and unlimited free texts under the Lifeline Program. The Lifeline Program requires applicants to meet certain eligibility requirements and existing subscribers must recertify as to those requirements annually.

*Wholesale*

We have focused our wholesale business on enabling our diverse network of customers to successfully grow their business by providing them with an array of network, product and device solutions. This allows our customers to customize this full suite of value-added solutions to meet the growing demands of their businesses. As part of these growing demands, some of our wholesale mobile virtual network operators (MVNO) are also selling prepaid services under the Lifeline program.

We continue to support the open development of applications, content, and devices on the Sprint platform. In addition, we enable a variety of business and consumer third-party relationships through our portfolio of machine-to-machine solutions, which we offer on a retail postpaid and wholesale basis. Our machine-to-machine solutions portfolio provides a secure, real-time and reliable wireless two-way data connection across a broad range of connected devices.

**Services and Products***Data & Voice Services*

Wireless data communications services are provided throughout the U.S. and include mobile productivity applications, such as Internet access, messaging and email services; wireless photo and video offerings; location-based capabilities, including asset and fleet management, dispatch services and navigation tools; and mobile entertainment applications, including the ability to listen to satellite radio, download and listen to music, and play games. Wireless voice communications services provided throughout the U.S. include basic local and long-distance wireless voice services, as well as voicemail, call waiting, three-way calling, caller identification, directory assistance and call forwarding. We also provide voice and data services in numerous countries outside of the U.S. through roaming arrangements. We offer customized design, development, implementation and support for wireless services provided to large companies and government agencies.

*Products*

Our services are provided using a broad array of devices, applications and services that run on these devices to meet the growing needs of subscriber mobility. Our device portfolio includes many cutting edge handsets from various original equipment manufacturers as well as hotspots, which allow the connection of multiple Wi-Fi enabled devices to the Sprint platform and embedded tablets and laptop devices. Prior to commencing our installment billing and leasing programs, we historically sold devices at prices below our cost in response to competition to attract new subscribers and as retention inducements for existing subscribers. Subscribers also have the option to purchase eligible devices through our installment billing program, or to lease eligible devices through our leasing program. In addition, we sell accessories, such as carrying cases, hands-free devices and other items to subscribers, and we sell devices and accessories to agents and other third-party distributors for resale.

Table of Contents**Wireless Network Technologies**

We deliver wireless services to subscribers primarily through our Sprint platform network. Our Sprint platform uses primarily 3G CDMA and 4G LTE wireless technologies. Our 3G CDMA wireless technology uses a digital spread-spectrum technique that allows a large number of users to access the band by assigning a code to all voice and data bits, sending a scrambled transmission of the encoded bits over the air and reassembling the voice and data into its original format. Our 4G LTE wireless data communications technology utilizes an all-internet protocol (IP) network to deliver high-speed data communications. We provide nationwide service through a combination of operating our own network in both major and smaller U.S. metropolitan areas and rural connecting routes, affiliations under commercial arrangements with third-party affiliates and roaming on other providers' networks.

**Sales, Marketing and Customer Care**

We focus the marketing and sales of wireless services on targeted groups of retail subscribers: individual consumers, businesses and government.

We use a variety of sales channels to attract new subscribers of wireless services, including:

- direct sales representatives whose efforts are focused on marketing and selling wireless services;
- retail outlets, owned and operated by us, that focus on sales to the small business and consumer markets;
- indirect sales agents and third-party retailers that primarily consist of local and national non-affiliated dealers and independent contractors that market and sell services to businesses and the consumer market, and are generally paid through commissions; and
- subscriber-convenient channels, including Internet sales and telesales.

We market our postpaid services under the Sprint brand. We market our prepaid services under the Sprint, Boost Mobile, Virgin Mobile, and Assurance Wireless brands as a means to provide value-driven prepaid service plans. Our wholesale customers are resellers of our wireless services rather than end-use subscribers and market their products and services using their own brands.

Although we market our services using traditional print, digital and television advertising, we also provide exposure to our brand names and wireless services through various sponsorships. The goal of these marketing initiatives is to increase brand awareness and sales.

Our customer care organization works to improve our subscribers' experience, with the goal of retaining subscribers of our wireless services and growing their long-term relationships with Sprint. Customer service call centers receive and resolve inquiries from subscribers and proactively address subscriber needs.

**Competition**

We believe that the market for wireless services has been and will continue to be characterized by competition on the basis of price, the types of services and devices offered and quality of service. We compete with a number of wireless carriers, including three other national wireless companies: AT&T, Verizon Wireless and T-Mobile. Our prepaid services compete with a number of carriers and resellers, which offers competitively-priced calling plans that include unlimited local calling. AT&T, T-Mobile and Verizon Wireless offer competitive prepaid services and wholesale services to resellers. Competition may intensify as a result of mergers and acquisitions, as new firms enter the market, and as a result of the introduction of other technologies, the availability of additional commercial spectrum bands, such as the 600 megahertz (MHz) band, the AWS-3 band and the AWS-4 band, and the potential introduction of new services using unlicensed spectrum. Wholesale services and products also contribute to increased competition. In some instances, resellers that use our network and offer similar services compete against our offerings. The wireless industry also faces competition from other communications, cable and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. For example, Comcast and Charter recently announced a cooperation agreement with respect to their wireless businesses, and Microsoft, Google, Apple and others are offering alternative means for making wireless voice calls that, in certain cases, can be used in lieu of the wireless provider's voice or text services, as well as alternative means of accessing video content.

Most markets in which we operate have high rates of penetration for wireless services, thereby limiting the growth of subscribers of wireless services. In addition to attracting new subscribers, particularly in less saturated growth markets such as those with non-traditional data demands, it has become increasingly important to retain existing subscribers as the wireless market has matured. Wireless carriers also try to appeal to subscribers by offering certain devices at prices lower than their acquisition cost, which we refer to as our traditional subsidy program. We may offer higher cost devices at greater discounts than our competitors, with the expectation that the loss incurred on the cost of the device will be offset by future service

## Table of Contents

revenue. Wireless carriers now also offer plans that allow subscribers to purchase a device at or near full retail price or lease a device in exchange for lower monthly service fees, early upgrade options, or both. AT&T, Verizon Wireless and T-Mobile also offer programs that include an option to purchase a device using an installment billing program. Our installment billing and device leasing programs do not require a service contract, provide for service plans at lower monthly rates compared to the traditional subsidy program and allow qualified subscribers to either purchase a device by paying monthly installments generally over 24 months or lease a device and make payments for the use of the device over the term of the lease. At the end of the lease term, the subscriber has the option to turn in their device, continue leasing their device, or purchase the device. See "Item 1A. Risk Factors—If we are not able to retain and attract profitable wireless subscribers, our financial performance will be impaired" and "—Because we lease devices to subscribers, our device leasing program exposes us to risks including those related to the actual residual value realized on returned devices, higher churn and increased losses on devices" and "—Subscribers who purchase a device on a financing basis are not required to sign a fixed-term service contract, which could result in higher churn, and higher bad debt expense."

### *Wireline*

We provide a broad suite of wireline voice and data communication services to other communications companies and targeted business subscribers. In addition, our Wireline segment provides voice, data and IP communication services to our Wireless segment. We provide long distance services and operate all-digital global long distance and Tier 1 IP networks.

#### **Services and Products**

Our services and products include domestic and international data communications using various protocols such as multiprotocol label switching technologies (MPLS), IP, managed network services, Voice over Internet Protocol (VoIP), Session Initiated Protocol (SIP) and traditional voice services. Our IP services can also be combined with wireless services. Such services include our Sprint Mobile Integration service, which enables a wireless handset to operate as part of a subscriber's wireline voice network, and our DataLink<sup>SM</sup> service, which uses our wireless networks to connect a subscriber location into their primarily wireline wide-area IP/MPLS data network, making it easier for businesses to adapt their network to changing business requirements. In addition to providing services to our business customers, the wireline network is carrying increasing amounts of voice and data traffic for our Wireless segment as a result of growing usage by our wireless subscribers.

We continue to assess the portfolio of services provided by our Wireline business and are focusing our efforts on IP-based data services and de-emphasizing stand-alone voice services and non-IP-based data services. However, we continue to provide stand-alone voice services primarily to business subscribers. Our Wireline segment markets and sells its services primarily through direct sales representatives.

#### **Competition**

Our Wireline segment competes with AT&T, Verizon Communications, CenturyLink, other major local incumbent operating companies and cable operators, as well as a host of smaller competitors in the provision of wireline services. Over the past few years, our voice services have experienced an industry-wide trend of lower revenue from lower prices and increased competition from other wireline and wireless communications companies, as well as cable multiple system operators, Internet service providers, and other general contracting IT companies.

Some competitors are targeting the high-end data market and are offering deeply discounted rates in exchange for high-volume traffic as they attempt to utilize excess capacity in their networks. In addition, we face increasing competition from other wireless and IP-based service providers. Many carriers, including cable companies, are competing in the residential and small business markets by offering bundled packages of both voice and data services. Competition in wireline services is based on price and pricing plans, the types of services offered, customer service and communications quality, reliability and availability. Our ability to compete successfully will depend on our ability to anticipate and respond to various competitive factors affecting the industry, including new services that may be introduced, changes in consumer preferences, demographic trends, economic conditions and pricing strategies. See "Item 1A. Risk Factors—Competition, industry consolidation, and technological changes in the market for wireless services could negatively affect our operations, resulting in adverse effects on our revenues, cash flows, growth, and profitability."

### **Legislative and Regulatory Developments**

#### *Overview*

Communications services are subject to regulation at the federal level by the Federal Communications Commission (FCC) and in certain states by public utilities commissions (PUCs). Since the SoftBank Merger, we have been subject to regulatory conditions imposed by the Committee on Foreign Investment in the United States (CFIUS) pursuant to a National

## Table of Contents

Security Agreement (NSA) among SoftBank, Sprint, the Department of Justice, the Department of Homeland Security and the Department of Defense (the latter three collectively, the USG Parties). Other federal agencies, such as the Federal Trade Commission (FTC) and Consumer Financial Protection Bureau (CFPB), have also asserted jurisdiction over our business.

The following is a summary of the regulatory environment in which we operate and does not describe all present and proposed federal, state and local legislation and regulations affecting the communications industry. Some legislation and regulations are the subject of judicial proceedings, legislative hearings and administrative proceedings that could change the way our industry operates. We cannot predict the outcome of any of these matters or their potential impact on our business. See "Item 1A. Risk Factors—Government regulation could adversely affect our prospects and results of operations; the federal and state regulatory commissions may adopt new regulations or take other actions that could adversely affect our business prospects, future growth or results of operations."

### ***Regulation and Wireless Operations***

The FCC regulates the licensing, construction, operation, acquisition and sale of our wireless operations and wireless spectrum holdings. FCC requirements impose operating and other restrictions on our wireless operations that increase our costs. The FCC does not currently regulate rates for services offered by commercial mobile radio service (CMRS) providers, and states are legally preempted from regulating such rates and entry into any market, although states may regulate other terms and conditions. The Communications Act of 1934 (Communications Act) and FCC rules also require the FCC's prior approval of the assignment or transfer of control of an FCC license, although the FCC's rules permit spectrum lease arrangements for a range of wireless radio service licenses, including our licenses, with FCC oversight. Approval from the FTC and the Department of Justice, as well as state or local regulatory authorities, also may be required if we sell or acquire spectrum interests. The FCC sets rules, regulations and policies to, among other things:

- grant and renew licenses in the 800 MHz, 1.9 gigahertz (GHz) and 2.5 GHz bands;
- rule on assignments and transfers of control of FCC licenses, and leases covering our use of FCC licenses held by other persons and organizations;
- govern the interconnection of our networks with other wireless and wireline carriers;
- establish access and universal service funding provisions;
- impose rules related to unauthorized use of and access to subscriber information;
- impose fines and forfeitures for violations of FCC rules;
- regulate the technical standards governing wireless services; and
- impose other obligations that it determines to be in the public interest.

We hold 800 MHz, 1.9 GHz and 2.5 GHz FCC licenses authorizing the use of radio frequency spectrum to deploy our wireless services. We also hold FCC point-to-point microwave licenses that enable us to provide backhaul for our wireless network.

#### **800 MHz License Conditions**

Spectrum in our 800 MHz band originally was licensed in small groups of channels, therefore, we hold thousands of these licenses, which together allow us to provide coverage across much of the continental U.S. Our 800 MHz licenses are subject to requirements that we meet population coverage benchmarks tied to the initial license grant dates. To date, we have met all of the construction requirements applicable to these licenses, except in the case of licenses that are not material to our business. Our 800 MHz licenses have ten-year terms, at the end of which each license is subject to renewal requirements that are similar to those for our 1.9 GHz licenses described below.

#### **1.9 GHz PCS License Conditions**

All PCS licenses are granted for ten-year terms. For purposes of issuing PCS licenses, the FCC utilizes major trading areas (MTAs) and basic trading areas (BTAs) with several BTAs making up each MTA. Each license is subject to build-out requirements, which we have met in all of our MTA and BTA markets.

If applicable build-out conditions are met, these licenses may be renewed for additional ten-year terms. Renewal applications are not subject to auctions. If a renewal application is challenged, the FCC grants a preference commonly referred to as a license renewal expectancy to the applicant if the applicant can demonstrate that it has provided "substantial service" during the past license term and has substantially complied with applicable FCC rules and policies and the Communications Act.

Table of Contents**2.5 GHz License Conditions**

We hold licenses for or lease spectrum located within the 2496 to 2690 MHz band, commonly referred to as the 2.5 GHz band, which is designated for the Broadband Radio Service (BRS) and the Educational Broadband Service (EBS). Most BRS and EBS licenses are allocated to specific, relatively small geographic service areas. Other BRS licenses provide for one of 493 separate BTAs. Under current FCC rules, we can access BRS spectrum either through outright ownership of a BRS license issued by the FCC or through a leasing arrangement with a BRS license holder. The FCC rules generally limit eligibility to hold EBS licenses to accredited educational institutions and certain governmental, religious and nonprofit entities, but permit those license holders to lease up to 95% of their capacity for non-educational purposes. Therefore, we primarily access EBS spectrum through long-term leasing arrangements with EBS license holders. Our EBS spectrum leases typically have an initial term equal to the remaining term of the EBS license, with an option to renew the lease for additional terms, for a total lease term of up to 30 years. Our leases are generally transferable, assuming we obtain required governmental approvals. Achieving optimal broadband network speeds, capacity and coverage using 2.5 GHz spectrum relies in significant part on operationalizing a complex mixture of BRS and EBS spectrum licenses and leases in the desired service areas, which is subject to the EBS licensing limitations described above and the technical limitations of the frequencies in the 2.5 GHz range.

**Spectrum Reconfiguration Obligations**

In 2004, the FCC adopted a Report and Order that included new rules regarding interference in the 800 MHz band and a comprehensive plan to reconfigure the 800 MHz band. The Report and Order provides for the exchange of a portion of our 800 MHz FCC spectrum licenses, and requires us to fund the cost incurred by public safety systems and other incumbent licensees to reconfigure the 800 MHz spectrum band. Also, in exchange, we received licenses for 10 MHz of nationwide spectrum in the 1.9 GHz band.

The minimum cash obligation is \$2.8 billion under the Report and Order. We are, however, obligated to pay the full amount of the costs relating to the reconfiguration plan, even if those costs exceed \$2.8 billion. As required under the terms of the Report and Order, a letter of credit has been secured to provide assurance that funds will be available to pay the relocation costs of the incumbent users of the 800 MHz spectrum. The letter of credit was initially \$2.5 billion, but has been reduced during the course of the proceeding to \$165 million as of March 31, 2017. Since the inception of the program, we have incurred payments of approximately \$3.5 billion directly attributable to our performance under the Report and Order. When incurred, substantially all costs are accounted for as additions to FCC licenses with the remainder as property, plant and equipment. Although costs incurred through March 31, 2017 have exceeded \$2.8 billion, not all of those costs have been reviewed and accepted as eligible by the FCC's transition administrator.

Completion of the 800 MHz band reconfiguration was initially required by June 26, 2008 and public safety reconfiguration is complete across the country with the exception of the States of Arizona, California, Texas and New Mexico. The FCC continues to grant the remaining 800 MHz public safety licensees additional time to complete their band reconfigurations which, in turn, delays our access to our 800 MHz replacement channels in these areas, which are all along the U.S. - Mexico border. In the non-border impacted areas where band reconfiguration is complete, Sprint has received its replacement spectrum in the 800 MHz band and Sprint is deploying 3G CDMA and 4G LTE on this spectrum in combination with its spectrum in the 1.9 GHz and 2.5 GHz bands.

**911 Services**

Pursuant to FCC rules, CMRS providers, including us, are required to provide enhanced 911 (E911) services that deliver the location of the cell site from which a 911 call is being made or the location of the subscriber's handset using latitude and longitude, depending upon the capabilities of the requesting public safety answering point (PSAP). The FCC has also imposed enhanced location accuracy standards for the provision of wireless 911 services indoors and these requirements impose additional costs on Sprint. CMRS providers are also now required to provide text-to-911 services upon request by a capable PSAP.

**Cybersecurity**

Cybersecurity continues to receive attention at federal, state and local government levels. Congress has passed and continues to consider various forms of cybersecurity legislation to increase the security and resiliency of the nation's digital infrastructure and several federal agencies are examining cybersecurity matters. Legislation or regulation imposing new obligations related to cybersecurity may impose additional costs on Sprint. See "Item 1A. Risk Factors—Our reputation and business may be harmed and we may be subject to legal claims if there is a loss, disclosure, misappropriation of, unauthorized access to, or other security breach of our proprietary or sensitive information."

Table of Contents**National Security Agreement**

As a precondition to CFIUS approval of the SoftBank Merger, the USG Parties required that SoftBank and Sprint enter into the NSA, under which SoftBank and Sprint have agreed to implement certain measures to protect national security, certain of which may materially and adversely affect our operating results due to the increased cost of compliance with security measures, and limits over our control of certain U.S. facilities, contracts, personnel, vendor selection and operations. If we fail to comply with our obligations under the NSA, our ability to operate our business may be adversely affected. See "Item 1A. Risk Factors—Regulatory authorities have imposed measures to protect national security and classified projects as well as other conditions that could have an adverse effect on Sprint."

**State and Local Regulation**

While the Communications Act generally preempts state and local governments from regulating entry of, or the rates charged by, wireless carriers, certain state PUCs and local governments regulate infrastructure siting, customer billing, termination of service arrangements, advertising, certification of operation, use of handsets when driving, service quality, sales practices, management of customer call records and protected information and many other areas. Also, state attorneys general may bring lawsuits related to the sales practices and services of wireless carriers. Varying practices among the states may make it more difficult for us to implement national sales and marketing programs. States also may impose their own universal service support requirements on wireless and other communications carriers, similar to the contribution requirements that have been established by the FCC, and some states are requiring wireless carriers to help fund additional programs, including the implementation of E911 and the provision of intrastate relay services for consumers who are hearing impaired. We anticipate that these trends will continue to require us to devote legal and other resources to work with the states to respond to their concerns while attempting to minimize any new regulation and enforcement actions that could increase our costs of doing business.

**Regulation and Wireline Operations****Competitive Local Service**

The Telecommunications Act of 1996 (Telecom Act), which was the first comprehensive update of the Communications Act, was designed to promote competition, and it eliminated legal and regulatory barriers for entry into local and long distance communications markets. It also required incumbent local exchange carriers (ILECs) to allow resale of specified local services at wholesale rates, negotiate interconnection agreements, provide nondiscriminatory access to certain unbundled network elements and allow co-location of interconnection equipment by competitors. The rules implementing the Telecom Act continue to be interpreted by the courts, state PUCs and the FCC, and Congress is considering possible changes to the Telecom Act. Further restrictions on the pro-competition aspects of the Telecom Act could adversely affect Sprint's operations.

**International Regulation**

The wireline services we provide outside the U.S. are subject to the regulatory jurisdiction of foreign governments and international bodies. In general, we are required to obtain licenses to provide wireline services and comply with certain government requirements.

**Other Regulations****Network Neutrality**

On February 26, 2015, the FCC issued an order reclassifying broadband Internet access service as a telecommunications service subject to Title II of the Communications Act and promulgated new net neutrality rules applicable to both mobile and fixed service providers. The rules prohibit: (1) blocking of lawful content, applications, services and non-harmful devices; (2) impairing or degrading Internet traffic on the basis of content, application, or service, or use of a non-harmful device; and (3) prioritization or favoring of some network traffic over other traffic either in exchange for consideration (monetary or otherwise) from a third party, or to benefit an affiliated entity. All of these prohibitions are subject to a "reasonable network management" exception. The rules also include a "transparency" rule that requires us to disclose information about our commercial terms, performance characteristics, and network practices. In addition, the order established a future conduct rule, to be applied on a case by case basis, prohibiting broadband Internet access providers from unreasonably interfering with or disadvantaging end users' ability to use the Internet to access lawful content, applications, service, or devices of their choice, or edge providers' ability to make such content applications, services, or devices available to end users. FCC Chairman Pai recently announced his intention to initiate a proceeding to reconsider the application of

Table of Contents

these rules to broadband Internet access services. Depending upon the interpretation and application of these rules, we may incur additional costs or be limited in the services we can provide.

**Truth in Billing and Consumer Protection**

The FCC's Truth in Billing rules require both wireline and wireless telecommunications carriers, such as us, to provide full and fair disclosure of all charges on their bills, including brief, clear, and non-misleading plain language descriptions of the services provided. In addition, the FCC regularly opens proceedings or conducts investigations to address consumer protection issues (i.e., cramming). Depending upon FCC or individual state proceedings in these areas, our billing and customer service costs could increase.

**Access Charges**

ILECs and competitive local exchange carriers (CLECs) impose access charges for the origination and termination of calls upon wireless and long distance carriers, including our Wireless and Wireline segments. In addition, ILECs and CLECs charge other carriers special access charges for access to dedicated facilities that are paid by both our Wireless and Wireline segments. These fees and charges are a significant cost for our Wireless and Wireline segments and continue to be the subject of interpretation and litigation.

The FCC also recently concluded a proceeding to consider whether special access pricing rules need to be changed, and whether the terms and conditions governing the provision of special access are just and reasonable. The resulting order largely deregulates the business data services or special access market, including both Ethernet and TDM services. These actions may increase Sprint's costs of providing service as they are implemented.

**Universal Service**

Communications carriers contribute to and receive support from various Universal Service Funds (USF) established by the FCC and many states. The federal USF program funds services provided in high-cost areas, reduced-rate services to low-income consumers, and discounted communications and Internet services for schools, libraries and rural health care facilities. Similarly, many states have established their own USFs to which we contribute. The FCC has considered changing its USF contribution methodology, which could impact the amount of our assessments.

The Lifeline program is included within the USFs. Virgin Mobile was designated as a Lifeline-only Eligible Telecom Carrier (ETC) in 42 jurisdictions as of March 31, 2017, and provides service under our Assurance Wireless brand. As a Lifeline provider, Assurance Wireless receives support from the USF. Changes in the Lifeline program, including adoption of minimum service standards and the phase-out of Lifeline support for standalone voice service, and enforcement actions by the FCC and other regulatory/legislative bodies could negatively impact growth in the Assurance Wireless and wholesale subscriber base and/or the profitability of the Assurance Wireless and wholesale business overall. The decline in standalone voice support, which is expected to begin in December 2019 and will decline annually for all existing subscribers through December 2021, may be offset by the expansion of the Lifeline program to include support for broadband service.

**Electronic Surveillance Obligations**

The Communications Assistance for Law Enforcement Act (CALEA) requires telecommunications carriers in the United States, including us, to modify equipment, facilities and services to allow for authorized electronic surveillance based on either industry or FCC standards. Our CALEA obligations have been extended to data and VoIP networks, and we comply with these requirements. Certain laws and regulations require that we assist various government agencies with electronic surveillance of communications and provide records concerning those communications. We do not disclose customer information to the government or assist government agencies in electronic surveillance unless we have been provided a lawful request for such information. If our obligations under these laws and regulations were to change or were to become the focus of any inquiry or investigation, it could require us to incur additional costs and expenses, which could adversely affect our financial condition or results of operation. Certain non-U.S. laws and regulations also require that we comply with requirements to assist non-U.S. government agencies with electronic surveillance of communications and provide records concerning those communications.

**Environmental Compliance**

Our environmental compliance and remediation obligations relate primarily to the operation of standby power generators, batteries and fuel storage for our telecommunications equipment. These obligations require compliance with storage and related standards, obtaining of permits and occasional remediation. Although we cannot assess with certainty the impact of any future compliance and remediation obligations, we do not believe that any such expenditures will adversely affect our financial condition or results of operations.

Table of Contents**Patents, Trademarks and Licenses**

We own numerous patents, patent applications, service marks, trademarks and other intellectual property in the U.S. and other countries, including "Sprint<sup>®</sup>," "Boost Mobile<sup>®</sup>," and "Assurance Wireless<sup>®</sup>." Our services often use the intellectual property of others, such as licensed software, and we often license copyrights, patents and trademarks of others, like "Virgin Mobile." In total, these licenses and our copyrights, patents, trademarks and service marks are of material importance to our business. Generally, our trademarks and service marks endure and are enforceable so long as they continue to be used. Our patents and licensed patents have remaining terms of up to 10 years. We occasionally license our intellectual property to others, including licenses to others to use the "Sprint" trademark.

We have received claims in the past, and may in the future receive claims, that we, or third parties from whom we license or purchase goods or services, have infringed on the intellectual property of others. These claims can be time-consuming and costly to defend, and divert management resources. If these claims are successful, we could be forced to pay significant damages or stop selling certain products or services or stop using certain trademarks. We, or third parties from whom we license or purchase goods or services, also could enter into licenses with unfavorable terms, including royalty payments, which could adversely affect our business.

**Access to Public Filings and Board Committee Charters**

Important information is routinely posted on our website at [www.sprint.com](http://www.sprint.com). Public access is provided to our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed with or furnished to the SEC under the Exchange Act. These documents may be accessed free of charge on our website at the following address: <http://www.sprint.com/investors>. These documents are available as soon as reasonably practicable after filing with the SEC and may also be found at the SEC's website at [www.sec.gov](http://www.sec.gov). Information contained on or accessible through our website or the SEC's website is not part of this annual report on Form 10-K.

Our Code of Ethics, the Sprint Code of Conduct (Code of Conduct), our Corporate Governance Guidelines and the charters of the following committees of our board of directors: the Audit Committee, the Compensation Committee, the Finance Committee, and the Nominating and Corporate Governance Committee may be accessed free of charge on our website at the following address: [www.sprint.com/governance](http://www.sprint.com/governance). Copies of any of these documents can be obtained free of charge by writing to: Sprint Shareholder Relations, 6200 Sprint Parkway, Mailstop KSOPHF0302-3B679, Overland Park, Kansas 66251 or by email at [shareholder.relations@sprint.com](mailto:shareholder.relations@sprint.com). If a provision of the Code of Conduct required under the NYSE corporate governance standards is materially modified, or if a waiver of the Code of Conduct is granted to a director or executive officer, a notice of such action will be posted on our website at the following address: [www.sprint.com/governance](http://www.sprint.com/governance). Only the Audit Committee may consider a waiver of the Code of Conduct for an executive officer or director.

**Employee Relations**

As of March 31, 2017, we had approximately 28,000 employees.

**Executive Officers of the Registrant**

The following people were serving as our executive officers as of May 26, 2017. These executive officers were elected to serve until their successors have been elected. There is no familial relationship between any of our executive officers and directors.

Name	Business Experience	Current Position Held Since	Age
Marcelo Claure	President and Chief Executive Officer. Mr. Claure was named President and CEO, effective August 11, 2014, and has served on the Sprint board of directors since January 2014. Prior to this, he was CEO of Brightstar, a company he founded in 1997 and grew from a small Miami-based distributor of mobile devices into a global business with more than \$10 billion in gross revenue for the year ended 2013. Mr. Claure serves as vice chairman of the board of directors of CTIA-The Wireless Association. He also is a member of the board of directors of My Brother's Keeper Alliance.	2014	46

Table of Contents

Name	Business Experience	Current Position Held Since	Age
Tarek Robbiati	Chief Financial Officer. Mr. Robbiati was appointed Chief Financial Officer in August 2015. From January 2013 until August 2015, Mr. Robbiati served as Chief Executive Officer and Managing Director of FlexiGroup Limited in Australia, where he oversaw all segments of the company and reported to the board of directors. From December 2009 until December 2012, Mr. Robbiati was Group Managing Director and Regional President of Telstra International Group, where he oversaw all operating and financial aspects of the telecommunications company. From December 2009 until December 2012, Mr. Robbiati was Executive Chairman of Hong Kong CSL Limited ("CSL"), a subsidiary of Telstra Corporation Limited, and from July 2007 until May 2010, Mr. Robbiati served as the Chief Executive Officer of CSL, during which time he spearheaded and implemented transformation strategies and strengthened CSL's position as a Market Leader in Hong Kong.	2015	51
Guenther Ottendorfer	Chief Operating Officer, Technology. Mr. Ottendorfer was appointed Chief Operating Officer, Technology in August 2015. He is responsible for overseeing Sprint's network, technology, product development, and IT organizations, including related strategy, network operations and performance, as well as partnerships with network, technology and IT vendors. From September 2013 until April 2015, he served as Group CTO at Telekom Austria Group, where he was responsible for driving major wireless expansion, convergence and network function virtualization projects across the countries of the group. From January 2011 until July 2013, Mr. Ottendorfer served as Managing Director - Networks at Optus Singtel, Australia's second largest telecommunications provider with over 11 million customers in cable, fixed, mobile and satellite networks, where he was responsible for the day-to-day running of all Optus networks.	2015	48
Nestor Cano	Chief Operating Officer. Mr. Cano was appointed Chief Operating Officer effective February 2, 2017. Mr. Cano is responsible for delivering operational excellence, driving further expense reductions, and strengthening systems and processes across the business. From June 2007 until January 2017 Mr. Cano served as President, Europe of Tech Data Corporation, which is one of the world's largest wholesale distributors of technology products. Mr. Cano also held other senior executive roles at Tech Data Corporation, where he helped fix management processes and controls to drive the best-ever profits in the Tech Data Corporation's European operations.	2017	53
Kevin Crull	President, Omnichannel Sales. Mr. Crull was appointed President, Omnichannel Sales in November 2016, and previously served as both President of the Central and Northeast regions and Chief Marketing Officer since his arrival at Sprint in May 2015. Mr. Crull is responsible for Direct Sales, Indirect Sales and Digital Sales/Marketing, Postpaid Distribution, Omnichannel Operations, Omnichannel Customer Experience and Customer Management. From October 2010 until April 2015, Mr. Crull served as the Chief Operating Officer and then President of Bell Media, Canada's largest media and broadcasting company.	2016	52
Roger Sole	Chief Marketing Officer. Mr. Sole was appointed Chief Marketing Officer in January 2016. From May 2015 until December 2015, Mr. Sole served as Senior Vice President of Marketing, Innovation, and Hispanic Market. From August 2011 until May 2015, Mr. Sole served as the Chief Marketing Officer of TIM Brasil. Under his leadership, TIM Brasil, Telecom Italia's mobile carrier in Brazil, emerged as one of that country's fastest growing mobile operators by introducing new offers and services and providing innovative ways for customers to get new smartphones. Mr. Sole helped grow TIM Brasil to become the top seller of smartphones in Brazil with a 40% market share and nearly 75 million customers.	2016	43

Name	Business Experience	Current Position Held Since	Age
Dow Draper	President - Sprint Prepaid Group. Mr. Draper was appointed President - Sprint Prepaid Group in October 2016. Since his arrival at Sprint in September 2013, Mr. Draper served as President - Global Wholesale and Prepaid Services and in May 2016, Mr. Draper was temporarily appointed as CEO of Virgin Mobile USA returning to his current role as President - Sprint Prepaid Group in October 2016. Mr. Draper manages the sales and marketing for Sprint's prepaid brands, Virgin Mobile USA, Boost Mobile and Assurance Wireless. From 2009 through September 2013, he was Senior Vice President and General Manager of Retail for CLEAR, the retail brand of Clearwire Corporation, where he oversaw the brand's sales, marketing, customer care and product development. Before joining Clearwire Corporation, Mr. Draper held various roles at Alltel Wireless, including senior vice president of Voice & Data Solutions and senior vice president of Financial Planning and Analysis. He has also held various roles at Western Wireless and McKinsey & Company.	2016	47
Yuriko Ishihara	Chief Strategy Officer. Ms. Ishihara was appointed to her position in April 2017. In this role, she oversees various strategic, regulatory, and operational matters and provides advice to senior management on various matters. Prior to joining Sprint, Ms. Ishihara served as GM, Global Business (Sprint) at SoftBank Group Corp. from July 2015 to April 2017, Vice President of SoftBank Mobile from June 2013 until April 2017, and GM - Corporate Planning at SoftBank Mobile from January 2003 until May 2013.	2017	53
Jorge Gracia	Senior Vice President, General Counsel and Chief Ethics Officer. Mr. Gracia was appointed to his position in January 2016. He oversees all strategic, transactional, dispute, and preventative legal and government affairs matters, provides advice to the board and senior management on various matters, and has responsibility for ethics training and legal compliance. Mr. Gracia has over 25 years of experience in international corporate law, most recently with Samsung Electronics America, Inc., where he served as Senior Vice President and General Counsel from October 2013 until December 2015. Mr. Gracia previously spent 17 years at Alcatel-Lucent, where he held a series of positions, each with increasing responsibility. Mr. Gracia last served as Deputy General Counsel - Global Commercial Law, a role in which he led an international team of approximately 200 professionals supporting all commercial matters, including serving as general counsel for global sales and marketing, the team responsible for worldwide revenue-generating activities.	2016	51
Paul Schieber, Jr.	Controller. Mr. Schieber was appointed Controller in December 2013. Mr. Schieber previously served in various positions at Sprint since 1991. Most recently, he served as Vice President, Access and Roaming Planning, where he was responsible for managing Sprint's roaming costs as well as its wireless and wireline access costs. Prior to that, Mr. Schieber held various leadership roles in Sprint's Finance organization including heading Sprint's internal audit function as well as serving in various Vice President - Finance roles. He was also a director in Sprint's Tax department and a director on its Mergers and Acquisitions team. Before joining Sprint, Mr. Schieber was a senior manager with the public accounting firm Ernst & Young, where he worked as an auditor and a tax consultant. In addition, he served as corporate controller for a small publicly held company.	2013	59

Table of Contents**Item 1A. Risk Factors**

In addition to the other information contained in this annual report on Form 10-K, the following risk factors should be considered carefully in evaluating us. Our business, financial condition, liquidity or results of operations could be materially adversely affected by any of these risks.

***If we are not able to retain and attract profitable wireless subscribers, our financial performance will be impaired.***

Our success is based on our ability to retain current subscribers and attract new subscribers. If we are unable to attract and retain profitable wireless subscribers, our financial performance will be impaired, and we could fail to meet our financial obligations. From January 1, 2008 through March 31, 2017, we have experienced an aggregate net decrease of approximately 11.0 million subscribers in our total retail postpaid subscriber base (excluding the impact of our acquisitions).

Our ability to retain our existing subscribers, to compete successfully for new subscribers, and reduce our churn rate depends on, among other things:

- our ability to anticipate and respond to various competitive factors, including our successful execution of marketing and sales strategies; the acceptance of our value proposition; service delivery and customer care activities, including new account set up and billing; and execution under credit and collection policies;
- actual or perceived quality and coverage of our network;
- public perception about our brands;
- our ability to anticipate, develop, and deploy new or enhanced technologies, products, and services that are attractive to existing or potential subscribers;
- our ability to continue to access spectrum and acquire additional spectrum capacity; and
- our ability to maintain our current MVNO relationships and to enter into new MVNO arrangements.

Our ability to retain subscribers may be negatively affected by industry trends related to subscriber contracts. Recently, we have seen aggressive customer acquisition efforts by our competitors. For example, most service providers, including us, are offering wireless service plans without any long-term commitment. Furthermore, some service providers are reimbursing contract termination fees, including paying off the outstanding balance on devices, incurred by new customers in connection with such customers terminating service with their current wireless service providers. Our competitors' aggressive customer contract terms, such as those described above, could negatively affect our ability to retain subscribers and could lead to an increase in our churn rates if we are not successful in providing an attractive product, price, and service mix, which could adversely affect our operating results.

We expect to continue to incur expenses such as the reimbursement of subscriber termination fees, and other subscriber acquisition and retention expenses, to attract and retain subscribers, but there can be no assurance that our efforts will generate new subscribers or result in a lower churn rate. Subscriber losses and a high churn rate could adversely affect our business, financial condition, and results of operations because they result in lost revenues and cash flow.

Moreover, we and our competitors continue to gain a greater proportion of new subscribers from each other's existing subscriber bases rather than from first-time purchasers. To the extent we cannot compete effectively for new subscribers or if we attract more subscribers that are not creditworthy, our revenues and results of operations could be adversely affected.

***The success of our network improvements will depend on the timing, extent, and cost of implementation; access to spectrum; the performance of third-parties and related parties; upgrade requirements; and the availability and reliability of the various technologies required to provide such modernization.***

We must continually invest in our wireless network, including expanding our network capacity and coverage through macro sites and small cells, in order to improve our wireless services and remain competitive. The development and deployment of new technologies and services requires us to anticipate the changing demands of our customers and to respond accordingly, which we may not be able to do in a timely or efficient manner.

Improvements in our service depend on many factors, including our ability to predict and adapt to future changes in technologies, changes in consumer demands, changes in pricing and service offerings by our competitors, and continued access to and deployment of adequate spectrum, including any leased spectrum. If we are unable to access spectrum to increase capacity or to deploy the services subscribers desire on a timely basis or at acceptable costs while maintaining network quality levels, our ability to attract and retain subscribers could be adversely affected, which would negatively impact our operating results.

Table of Contents

If we fail to provide a competitive network, our ability to provide wireless services to our subscribers, to attract and retain subscribers, and to maintain and grow our subscriber revenues could be adversely affected. For example, achieving optimal broadband network speeds, capacity, and coverage using 2.5 GHz spectrum relies in significant part on operationalizing a complex mixture of BRS and EBS spectrum licenses and leases in the desired service areas. We primarily access EBS spectrum through long-term leasing arrangements with EBS license holders. The EBS is subject to licensing limitations and the technical limitations of the frequencies in the 2.5 GHz range. See "Item 1. Business-Legislative and Regulatory Developments-Regulation and Wireless Operations-2.5 GHz License Conditions." If we are unable to operationalize this mixture of licenses and leases, our targeted network modernization goals could be adversely affected.

Using new and sophisticated technologies on a very large scale entails risks. For example, deployment of new technologies from time to time has adversely affected, and in the future may adversely affect, the performance of existing services on our network and result in increased churn or failure to attract wireless subscribers. Should implementation of our modernized network, which also includes expanding our network through densification using both macro sites and small cells, fail, be delayed or result in incurring costs in excess of expected amounts, our margins could be adversely affected and such effects could be material. Should the delivery of services expected to be deployed on our modernized network be delayed due to technological constraints or changes, performance of third-party suppliers, regulatory restrictions, including zoning and leasing restrictions, or permit issues, subscriber dissatisfaction, or other reasons, the cost of providing such services could become higher than expected, ultimately increasing our cost to subscribers and resulting in decreases in net subscribers or our margins, or both, which would adversely affect our revenues, profitability, and cash flow from operations.

*Our high debt levels and restrictive debt covenants could negatively impact our ability to access future financing at attractive rates or at all, which could limit our operating flexibility and ability to repay our outstanding debt as it matures.*

As of March 31, 2017, our consolidated principal amount of indebtedness was \$40.8 billion, and we had \$1.8 billion of undrawn borrowing capacity under the secured revolving bank credit facility. Our high debt levels and debt service requirements are significant in relation to our revenues and cash flow, which may reduce our ability to respond to competition and economic trends in our industry or in the economy generally. Our high debt levels and debt service requirements may also limit our financing options as a result of the restrictions placed on certain of our assets in our recent financing transactions. In addition, certain agreements governing our indebtedness impose operating restrictions on us, subject to exceptions, including our ability to:

- pay dividends;
- create liens on our assets;
- receive dividend or other payments from certain of our subsidiaries;
- enter into transactions with affiliates; and
- engage in certain asset sale or business combination transactions.

Our secured revolving bank credit facility and other financing facilities also require that we maintain certain financial ratios, including a leverage ratio, which could limit our ability to incur additional debt. Our failure to comply with our debt covenants would trigger defaults under those obligations, which could result in the maturities of those debt obligations being accelerated and could in turn result in cross defaults with other debt obligations. If we are forced to refinance our debt obligations prior to maturity on terms that are less favorable or if we were to experience difficulty in refinancing the debt prior to maturity, our results of operations or financial condition could be materially harmed. In addition, our recent asset-backed financings could subject us to an increased risk of loss of assets secured under those facilities. We continue to expect to rely on asset-backed financings as a source of funds, however, there can be no assurance that we will be able to continue to do so. For instance, although we have leveraged certain of our spectrum assets as collateral in an asset-backed financing transaction, certain limitations such as our leasing arrangements on 2.5 GHz spectrum may significantly reduce our ability to further leverage our spectrum. Limitations on our ability to obtain suitable financing when needed, or at all, or a failure to execute on our cost-reduction initiatives, could result in an inability to continue to expand our business, timely execute network modernization plans, and meet competitive challenges.

*Subscribers who purchase a device on a financing basis are not required to sign a fixed-term service contract, which could result in higher churn and higher bad debt expense.*

Our service plans allow certain subscribers to purchase or finance the use of an eligible device under an installment or lease contract payable generally over a period of up to 24 months. Subscribers who take advantage of these plans are not required to sign a fixed-term service contract to obtain postpaid service; rather, their service is provided on a month-to-month basis with no early termination fee. These service plans may not meet our subscribers' or potential

Table of Contents

subscribers' needs, expectations, or demands. In addition, subscribers on these plans can discontinue their service at any time without penalty, other than the obligation of any residual commitment they may have for unpaid service or for amounts due under the installment contract for the device. We could experience a higher churn rate than we expect due to the ability of subscribers to more easily change service providers, which could adversely affect our results of operations. Our operational and financial performance may be adversely affected if we are unable to grow our customer base and achieve the customer penetration levels that we anticipate with this business model.

Because our lease and installment billing contracts permit customers to pay for devices over time, we maintain a certain level of debt to support our investment in these contracts. We fund our customer device financing activities through a combination of cash on hand and proceeds from monetizing customer receivables and leased devices.

In addition, subscribers who have financed their devices through installment billing plans have the option to pay for their devices in installments generally over a period of up to 24 months. This program subjects us to increased risks relating to consumer credit issues, which could result in increased costs, including increases to our bad debt expense and write-offs of installment billing receivables. These arrangements may be particularly sensitive to changes in general economic conditions, and any declines in the credit quality of our subscriber base could have a material adverse effect on our financial position and results of operations.

*Because we lease devices to subscribers, our device leasing program exposes us to risks, including those related to the actual residual value realized on returned devices, higher churn and increased losses on devices.*

We also lease devices to certain of our subscribers. Our financial condition and results of operations depend, in part, on our ability to appropriately assess the credit risk of our lease subscribers and the ability of our lease subscribers to perform under our device leases. In addition to monthly lease payments, we expect to realize economic benefit from the estimated residual value of a leased device, which is the estimated value of a leased device at the time of the expiration of the lease term. Changes in residual value assumptions made at lease inception would affect the amount of depreciation expense and the net amount of equipment under operating leases. If estimated residual values, in the aggregate, significantly decline due to economic factors, obsolescence, or other circumstances, we may not realize such residual value, which could have a material adverse effect on our financial position and results of operations. We may also suffer negative consequences including increased costs and increased losses on devices as a result of a lease subscriber default, the related termination of a lease, and the attempted repossession of the device, including failure of a lease subscriber to return a leased device at the end of the lease. Sustained failure of subscribers to return leased devices could also negatively impact our ability to obtain financing based on leased devices in the future. In addition, subscribers who lease a device are not required to sign a fixed-term service contract, which could result in higher churn, and increased losses on devices.

*Adverse economic conditions may negatively impact our business and financial performance, as well as our access to financing on acceptable terms or at all.*

Our business and financial performance are sensitive to changes in macro-economic conditions, including changes in interest rates, consumer credit conditions, consumer debt levels, consumer confidence, inflation rates (or concerns about deflation), unemployment rates, energy costs, and other factors. Concerns about these and other factors may contribute to market volatility and economic uncertainty.

Market turbulence and weak economic conditions may materially adversely affect our business and financial performance in a number of ways. Our services are available to a broad customer base, a significant portion of which may be more vulnerable to weak economic conditions. We may have greater difficulty in gaining new subscribers within this segment and existing subscribers may be more likely to terminate service due to an inability to pay.

We will need to reduce costs and raise additional capital in the future to provide us with sufficient capital resources and liquidity to meet our commitments and execute our business strategy. Our ability to raise additional capital will depend on, among other things, conditions in the capital markets at that time, which are outside of our control, and our financial performance. Instability in the global financial markets has resulted in periodic volatility in the credit, equity, and fixed income markets. This volatility could limit our access to the credit markets, leading to higher borrowing costs or, in some cases, the inability to obtain financing on terms that are acceptable to us, or at all.

Weak economic conditions and credit conditions may also adversely impact various third parties on which we rely, some of which have filed for or may be considering bankruptcy, experiencing cash flow or liquidity problems, or are unable to obtain credit such that they may no longer be able to operate. Any of these could adversely impact our ability to distribute, market, or sell our products and services.

Table of Contents

***Government regulation could adversely affect our prospects and results of operations; federal and state regulatory commissions may adopt new regulations or take other actions that could adversely affect our business prospects, future growth, or results of operations.***

The FCC, FTC, CFPB, and other federal, state and local, as well as international, governmental authorities assert jurisdiction over our business and could adopt regulations or take other actions that would adversely affect our business prospects or results of operations.

The licensing, construction, operation, sale and interconnection arrangements of wireless telecommunications systems are regulated by the FCC and, depending on the jurisdiction, international, state and local regulatory agencies. In particular, the FCC imposes significant regulation on licensees of wireless spectrum with respect to how radio spectrum is used by licensees, the nature of the services that licensees may offer and how the services may be offered, and resolution of issues of interference between spectrum bands. The FCC grants wireless licenses for terms of generally ten years that are subject to renewal and revocation. There is no guarantee that our licenses will be renewed. Failure to comply with the FCC requirements applicable to a given license could result in revocation of that license and, depending on the nature of the non-compliance, other Sprint licenses.

The FCC uses its transactional "spectrum screen" to identify prospective wireless transactions that may require additional competitive scrutiny. If a proposed transaction would exceed the spectrum screen threshold, the FCC undertakes a more detailed analysis of relevant market conditions in the impacted geographic areas to determine whether the transaction would reduce competition without offsetting public benefits. The screen includes substantial portions of the 2.5 GHz band previously excluded from the screen and that are licensed or leased to Sprint in numerous markets. As a result, future Sprint spectrum acquisitions may exceed the spectrum screen trigger for additional FCC review. Such additional review could extend the duration of the regulatory review process and there can be no assurance that such transactions will ultimately be completed in whole or in part.

Over the past few years, the FCC and other federal and state agencies have engaged in increased regulatory and enforcement activity as well as investigations of the industry generally. Enforcement activities or investigations could make it more difficult and expensive to operate our business, and could increase the costs of our wireless operations. In addition, we may offer products that include highly regulated financial services, which subject us to additional state and federal regulations. The costs to comply with such regulations and failure to remain compliant with such regulations could adversely affect our results of operations.

Degradation in network performance caused by compliance with government regulation, loss of spectrum, or additional rules associated with the use of spectrum in any market could result in an inability to attract new subscribers or higher subscriber churn in that market, which could adversely affect our revenues and results of operations. Furthermore, additional costs or fees imposed by governmental regulation could adversely affect our revenues, future growth, and results of operations.

The Company recruits professionals, including senior management, on a global basis to work in the U.S. and, therefore, must comply with the U.S. immigration and work permit/visa laws and regulations. An inability to obtain sufficient work permits/visas due to the impact of these regulations, including any changes to immigration and work permit/visa regulations in the U.S., could have a material adverse effect on the Company's business, results of operations and financial condition.

***Competition, industry consolidation, effectiveness of our cost optimization efforts, and technological changes in the market for wireless services could negatively affect our operations, resulting in adverse effects on our revenues, cash flows, growth, and profitability.***

We compete with a number of other wireless service providers in each of the markets in which we provide wireless services. Competition is expected to continue to increase as additional spectrum, including the recent auction of 600 MHz spectrum, is made available for commercial wireless services, and we have experienced and expect to continue to experience an increased customer demand for data usage on our network. Competition in pricing, service, and product offerings may adversely impact subscriber retention and our ability to attract new subscribers. A decline in the average revenue per subscriber coupled with a decline in the number of subscribers would negatively impact our revenues, cash flows, and profitability. In addition, consolidation by our competitors and roaming partners could lead to fewer companies controlling access to network infrastructure, enabling our competitors to control usage and rates, which could negatively affect our revenues and profitability.

Table of Contents

We are executing on a multi-year plan to transform the way we do business and to lower our cost structure. If we are unable to achieve our cost optimization goals and to maintain process and system changes resulting from cost optimization objectives already established, our profitability could be negatively affected.

The wireless industry also faces competition from other communications, cable, and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. Further, some of our current competitors now provide content services in addition to voice and broadband services, and consumers are increasingly accessing video content from alternative sources via Internet-based providers and applications, all of which create increased competition in this area.

The wireless communications industry continues to experience significant technological change, including improvements in the capacity, quality, and types of technology. These developments cause uncertainty about future subscriber demand for our wireless services and the prices that we will be able to charge for these services. As services, technology, and devices evolve, we also expect continued pressure on voice, text, and other service revenues. Rapid changes in technology may lead to the development of wireless communications technologies, products, or alternative services that are superior to our technologies, products, or services, or that consumers prefer over ours. In addition, technological advances have caused long distance, local, wireless, video, and Internet services to become more integrated, which has contributed to increased competition, new competitors, new products, and the expansion of services offered by our competitors in each of these markets. If we are unable to meet future advances in competing technologies on a timely basis, or at an acceptable cost, we may not be able to compete effectively and could lose subscribers to our competitors.

*The trading price of our common stock has been, and may continue to be, volatile and may not reflect our actual operations and performance.*

Market and industry factors may adversely impact the market price of our common stock, regardless of our actual operations and performance. Stock price volatility and sustained decreases in our share price could subject our stockholders to losses and may adversely impact our ability to issue equity. The trading price of our common stock has been, and may continue to be, subject to fluctuations in response to various factors, some of which are beyond our control, including, but not limited to:

- market and pricing risks due to concentrated ownership of our stock;
- the ability to raise additional capital through the issuance of additional debt or equity or otherwise, including the cost and availability or perceived availability of additional capital;
- announcements by us or our competitors or market speculation of acquisitions, spectrum acquisitions, new products, technologies, significant contracts, commercial relationships, or capital commitments;
- the performance of SoftBank and SoftBank's ordinary shares or speculation about the possibility of future actions SoftBank may take in connection with us;
- disruption to our operations or those of other companies critical to our network operations;
- our ability to develop and market new and enhanced technologies, products and services on a timely and cost-effective basis, including any network improvement efforts;
- recommendations by securities analysts or changes in their estimates concerning us;
- changes in the ratings of our debt by rating agencies;
- litigation;
- changes in governmental actions, regulations, or approvals; and
- perceptions of general market conditions in the technology and communications industries, the U.S. economy, and global market conditions.

*We have entered into, or may enter into, agreements with various parties for certain business operations. Any difficulties experienced by us in these arrangements could result in additional expense, loss of subscribers and revenue, interruption of our services, or a failure or delay in the roll-out of new technology.*

We have entered into, and may in the future enter into, agreements with various third parties for the day-to-day execution of services, provisioning, maintenance, modernization, and densification of our wireless and wireline networks, including the permitting, building, installation, and ownership of certain portions of our new network densification; leases and subleases for space on communications towers; the development and maintenance of certain systems necessary for the operation of our business; customer service, related support to our wireless subscribers, outsourcing aspects of our wireline

Table of Contents

network and back office functions; and to provide network equipment, handsets, devices, and other equipment. For example, we depend heavily on local access facilities obtained from ILECs to serve our data and voice subscribers, and payments to ILECs for these facilities are a significant cost of service for both our Wireless and Wireline segments. We also expect our dependence on key suppliers to continue as more advanced technologies are developed, which may lead to additional significant costs. If our key vendors fail to meet their contractual obligations or experience financial difficulty, or if we fail to adequately diversify our reliance among vendors, we may experience disruptions to our business operations or incur significant costs implementing alternative arrangements.

***The products and services utilized by us and our suppliers and service providers may infringe on intellectual property rights owned by others.***

Some of our products and services use intellectual property that we own. We also purchase products from suppliers, including device suppliers, and outsource services to service providers, including billing and customer care functions, that incorporate or utilize intellectual property. We and some of our suppliers and service providers have received, and may receive in the future, assertions and claims from third parties that the products or software utilized by us or our suppliers and service providers infringe on the patents or other intellectual property rights of these third parties. These claims could require us or an infringing supplier or service provider to cease certain activities or to cease selling the relevant products and services. These claims can be time-consuming and costly to defend and divert management resources. If these claims are successful, we could be forced to pay significant damages or stop selling certain products or services or stop using certain trademarks, which could adversely affect our results of operations.

***Negative outcomes of legal proceedings may adversely affect our business and financial condition.***

We are regularly involved in a number of legal proceedings before various state and federal courts, the FCC, the FTC, the CFPB, and other federal, state, and local regulatory agencies. These proceedings may be complicated, costly, and disruptive to our business operations. We may incur significant expenses in defending these matters and may be required to pay significant fines, awards, or settlements. In addition, litigation or other proceedings could result in restrictions on our current or future manner of doing business. Any of these potential outcomes, such as judgments, awards, settlements, or orders could have a material adverse effect on our business, financial condition, operating results, or ability to do business.

***Our reputation and business may be harmed and we may be subject to legal claims if there is a loss, disclosure, misappropriation of, unauthorized access to, or other security breach of our proprietary or sensitive information.***

Our information technology and other systems—including those of our third-party service providers—that maintain and transmit our proprietary information and our subscribers' information, including credit card information, location data, or other personal information may be compromised by a malicious third-party penetration of our network security or impacted by advertent or inadvertent actions or inactions by our employees and agents. As a result, our subscribers' information may be lost, disclosed, accessed, used, corrupted, destroyed, or taken without the subscribers' consent. Cyber attacks, such as the use of malware, computer viruses, denial of service attacks, or other means for disruption or unauthorized access, have increased in frequency, scope, and potential harm in recent years. We also purchase equipment and software from third parties that could contain software defects, Trojan horses, malware, or other means by which third parties could access our network or the information stored or transmitted on such network or equipment.

While to date we have not been subject to cyber attacks or other cyber incidents that, individually or in the aggregate, have been material to our operations or financial condition, the preventive actions we take to reduce the risk of cyber incidents and protect our information technology and networks may be insufficient to repel a cyber attack in the future. In addition, the costs of such preventative actions may be significant, which may adversely affect our results of operations. Any major compromise of our data or network security, failure to prevent or mitigate a loss of our services or network, our proprietary information, or our subscribers' information, and delays in detecting any such compromise or loss, could disrupt our operations, impact our reputation and subscribers' willingness to purchase our service, and subject us to significant additional expenses. Such expenses could include incentives offered to existing subscribers and other business relationships in order to retain their business, increased expenditures on cyber security measures and the use of alternate resources, lost revenues from business interruption, and litigation, which could be material. Furthermore, the potential costs associated with any such cyber attacks could be greater than the insurance coverage we maintain.

In addition to cyber attacks, major equipment failures, natural disasters, including severe weather, terrorist acts or other disruptions that affect our wireline and wireless networks, including transport facilities, communications switches, routers, microwave links, cell sites, or other equipment or third-party owned local and long-distance networks on which we rely, could disrupt our operations, require significant resources to remedy, result in a loss of subscribers or impair our ability

Table of Contents

to attract new subscribers, which in turn could have a material adverse effect on our business, results of operations and financial condition.

*If we are unable to improve our results of operations and as we continue to modernize our networks, we may be required to recognize an impairment of our long-lived assets, goodwill, or other indefinite-lived intangible assets, which could have a material adverse effect on our financial position and results of operations.*

As a result of the SoftBank Merger, Sprint recognized goodwill at its acquisition-date estimate of fair value of approximately \$6.6 billion, which has been entirely allocated to the wireless segment. Since goodwill was reflected at its estimate of fair value, there was no excess fair value over book value as of the date of the close of the SoftBank Merger. Additionally, we recorded \$14.6 billion and \$41.7 billion of long-lived assets and indefinite-lived intangible assets, respectively, as of the close of the SoftBank Merger. We evaluate the carrying value of our indefinite-lived assets, including goodwill, at least annually or more frequently whenever events or changes in circumstances indicate that the asset may be impaired, or in the case of goodwill, that the fair value of the reporting unit is below its carrying amount. During the year ended March 31, 2015, we recorded an impairment loss of \$1.9 billion and \$233 million for the Sprint trade name and Wireline long-lived assets, respectively. Continued, sustained declines in the Company's operating results, number of wireless subscribers, future forecasted cash flows, growth rates and other assumptions, as well as significant, sustained declines in the Company's stock price and related market capitalization could impact the underlying key assumptions and our estimated fair values, potentially leading to a future material impairment of long-lived assets, goodwill, or other indefinite-lived assets, which could adversely affect our financial position and results of operations. In addition, as we continue to refine our network strategy, management may conclude, in future periods, that certain equipment assets in use will not be utilized as long as originally intended, which could result in an acceleration of depreciation expense. Moreover, certain equipment assets may never be deployed or redeployed, in which case cash and/or non-cash charges that could be material to our consolidated financial statements would be recognized.

*Any acquisitions, strategic investments, or mergers may subject us to significant risks, any of which may harm our business.*

As part of our long-term strategy, we regularly evaluate potential acquisitions, strategic investments, and mergers, and we actively engage in discussions with potential counterparties. Over time, we may acquire, make investments in, or merge with companies that complement or expand our business. Some of these potential transactions could be significant relative to the size of our business and operations. Any such acquisitions would involve a number of risks and present financial, managerial and operational challenges, including:

- diversion of management attention from running our existing business;
- possible material weaknesses in internal control over financial reporting;
- increased costs to integrate the networks, spectrum, technology, personnel, subscriber base, and business practices of the company involved in the acquisition, strategic investment, or merger with our business;
- potential exposure to material liabilities not discovered in the due diligence process or as a result of any litigation arising in connection with such transactions;
- significant transaction expenses in connection with any such transaction, whether consummated or not;
- risks related to our ability to obtain any required regulatory approvals necessary to consummate any such transaction;
- acquisition financing may not be available on reasonable terms or at all and any such financing could significantly increase our outstanding indebtedness or otherwise affect our capital structure or credit ratings; and
- any acquired or merged business, technology, service, or product may significantly under-perform relative to our expectations, and we may not achieve the benefits we expect from our transaction, which could, among other things, also result in a write-down of goodwill and other intangible assets associated with such transaction.

For any or all of these reasons, our pursuit of an acquisition, investment, or merger may cause our actual results to differ materially from those anticipated.

Table of Contents**Controlled Company Risks**

***As long as SoftBank controls us, other holders of our common stock will have limited ability to influence matters requiring stockholder approval and SoftBank's interest may conflict with ours and our other stockholders.***

As of March 31, 2017, SoftBank beneficially owned approximately 83% of the outstanding common stock of Sprint. As a result, until such time as SoftBank and its controlled affiliates hold shares representing less than a majority of the votes entitled to be cast by the holders of our outstanding common stock at a stockholder meeting, SoftBank generally will have the ability to control the outcome of any matter submitted for the vote of our stockholders, except in certain circumstances set forth in our certificate of incorporation or bylaws.

So long as SoftBank and its controlled affiliates hold shares of our common stock representing at least a majority of the votes entitled to be cast by the holders of our common stock at a stockholder meeting, SoftBank will be able to freely nominate and elect all the members of our board of directors, subject only to a requirement that a certain number of directors qualify as "Independent Directors," as such term is defined in the NYSE listing rules and applicable laws. The directors elected by SoftBank will have the authority to make decisions affecting the capital structure of the Company, including the issuance of additional equity, the incurrence of additional indebtedness, the implementation of stock repurchase programs, and the declaration of dividends.

The interests of SoftBank may not coincide with the interests of our other stockholders or with holders of our indebtedness. SoftBank's ability, subject to the limitations in our certificate of incorporation and bylaws, to control all matters submitted to our stockholders for approval limits the ability of other stockholders to influence corporate matters and, as a result, we may take actions that our stockholders or holders of our indebtedness do not view as beneficial. As a result, the market price of our common stock or terms upon which we issue indebtedness could be adversely affected. In addition, the existence of a controlling stockholder may have the effect of making it more difficult for a third-party to acquire, or discouraging a third-party from seeking to acquire, the Company. A third-party would be required to negotiate any such transaction with SoftBank, and the interests of SoftBank with respect to such transaction may be different from the interests of our other stockholders or with holders of our indebtedness. In addition, the performance of SoftBank and SoftBank's ordinary shares or speculation about the possibility of future actions SoftBank may take in connection with us may adversely affect our share price or the trading price of our debt securities.

Subject to limitations in our certificate of incorporation that limit SoftBank's ability to engage in certain competing businesses in the U.S. or take advantage of certain corporate opportunities, SoftBank is not restricted from competing with us or otherwise taking for itself or its other affiliates certain corporate opportunities that may be attractive to the Company.

***SoftBank's ability to control our board of directors may make it difficult for us to recruit independent directors.***

For so long as SoftBank and its controlled affiliates hold shares of our common stock representing at least a majority of the votes entitled to be cast by the holders of our common stock at a stockholders' meeting, SoftBank will be able to elect all of the members of our board of directors. Further, the interests of SoftBank and our other stockholders may diverge. Under these circumstances, persons who might otherwise accept an invitation to join our board of directors may decline.

***Any inability to resolve favorably any disputes that may arise between the Company and SoftBank or its affiliates may adversely affect our business.***

Disputes may arise between SoftBank or its affiliates and the Company in a number of areas, including:

- business combinations involving the Company;
- sales or dispositions by SoftBank of all or any portion of its ownership interest in us;
- the nature, quality and pricing of services SoftBank or its affiliates may agree to provide to the Company;
- arrangements with third parties that are exclusionary to SoftBank or its affiliates or the Company; and
- business opportunities that may be attractive to both SoftBank or its affiliates and the Company.

We may not be able to resolve any potential conflicts, and even if we do, the resolution may be less favorable than if we were dealing with an unaffiliated party.

Table of Contents

*We are a "controlled company" within the meaning of the NYSE rules and, as a result, rely on exemptions from certain corporate governance requirements that provide protection to stockholders of companies that are not "controlled companies."*

SoftBank owns more than 50% of the total voting power of our common shares and, accordingly, we have elected to be treated as a "controlled company" under the NYSE corporate governance standards. As a controlled company, we are exempt under the NYSE standards from the obligation to comply with certain NYSE corporate governance requirements, including the requirements that:

- a majority of our board of directors consists of independent directors;
- we have a corporate governance and nominating committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities;
- we have a compensation committee that is composed entirely of independent directors with a written charter addressing the committee's purpose and responsibilities; and
- an annual performance evaluation of the nominating and governance committee and compensation committee be performed.

As a result of our use of the "controlled company" exemptions, holders of our common stock and debt securities may not have the same protection afforded to stockholders of companies that are subject to all of the NYSE corporate governance requirements.

*Regulatory authorities have imposed measures to protect national security and classified projects as well as other conditions that could have an adverse effect on Sprint.*

As a precondition to approval of the SoftBank Merger, certain U.S. government agencies required that SoftBank and Sprint enter into certain agreements, including the NSA, under which SoftBank and Sprint have agreed to implement certain measures to protect national security, certain of which may materially and adversely affect our operating results due to increasing the cost of compliance with security measures, and limiting our control over certain U.S. facilities, contracts, personnel, vendor selection, and operations. If we fail to comply with our obligations under the NSA or other agreements, our ability to operate our business may be adversely effected.

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

Our corporate headquarters are located in Overland Park, Kansas and consist of approximately 3,853,000 square feet. Our gross property, plant and equipment at March 31, 2017 totaled \$33.7 billion, as follows:

	<b>March 31, 2017</b>
	<i>(in billions)</i>
Wireless	\$ 30.4
Wireline	1.3
Corporate and other	2.0
Total	<u>\$ 33.7</u>

Properties utilized by our Wireless segment generally consist of either leased or owned assets in the following categories: switching equipment, radio frequency equipment, cell site towers and related leasehold improvements, site development costs, network software, leased devices, internal-use software, retail fixtures and retail leasehold improvements.

Properties utilized by our Wireline segment generally consist of either leased or owned assets in the following categories: digital fiber optic cable, transport facilities, transmission-related equipment and network buildings.

Table of Contents**Item 3. Legal Proceedings**

In March 2009, a stockholder brought suit, *Bennett v. Sprint Nextel Corp.*, in the U.S. District Court for the District of Kansas, alleging that Sprint Communications and three of its former officers violated Section 10(b) of the Exchange Act and Rule 10b-5 by failing adequately to disclose certain alleged operational difficulties subsequent to the Sprint-Nextel merger, and by purportedly issuing false and misleading statements regarding the write-down of goodwill. The district court granted final approval of a settlement in August 2015, which did not have a material impact to our financial statements. Five stockholder derivative suits related to this 2009 stockholder suit were filed against Sprint Communications and certain of its present and/or former officers and directors. The first, *Murphy v. Forsee*, was filed in state court in Kansas on April 8, 2009, was removed to federal court, and was stayed by the court pending resolution of the motion to dismiss the *Bennett* case; the second, *Randolph v. Forsee*, was filed on July 15, 2010 in state court in Kansas, was removed to federal court, and was remanded back to state court; the third, *Ross-Williams v. Bennett, et al.*, was filed in state court in Kansas on February 1, 2011; the fourth, *Price v. Forsee, et al.*, was filed in state court in Kansas on April 15, 2011; and the fifth, *Hartleib v. Forsee, et al.*, was filed in federal court in Kansas on July 14, 2011. These cases were essentially stayed while the *Bennett* case was pending, and we have reached an agreement in principle to settle the matters, by agreeing to some governance provisions and by paying plaintiffs' attorneys fees in an immaterial amount. The court approved the settlement but reduced the plaintiffs' attorneys fees; the attorneys fees issue is on appeal.

Sprint Communications, Inc. is also a defendant in a complaint filed by several stockholders of Clearwire Corporation (Clearwire), asserting claims for breach of fiduciary duty by Sprint Communications, and related claims and otherwise challenging the Clearwire acquisition. *ACP Master, LTD, et al. v. Sprint Nextel Corp., et al.*, was filed April 26, 2013 in Chancery Court in Delaware. Plaintiffs in the *ACP Master, LTD* suit have also filed suit requesting an appraisal of the fair value of their Clearwire stock. Trial of those cases took place in October and November 2016; the parties have submitted their post-trial briefing, and oral argument was held on April 25, 2017. We are awaiting decision. We do not expect the resolution of these matters to have a material adverse effect on our financial position or results of operations.

Various other suits, inquiries, proceedings, and claims, either asserted or unasserted, including purported class actions typical for a large business enterprise and intellectual property matters, are possible or pending against us. If our interpretation of certain laws or regulations, including those related to various federal or state matters such as sales, use or property taxes, or other charges were found to be mistaken, it could result in payments by us. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial position or results of operations.

**Item 4. Mine Safety Disclosures**

None.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Common Share Data**

The common stock of Sprint Corporation is traded under the stock symbol "S" on the NYSE. We currently have no non-voting common stock outstanding. The high and low common stock prices, as reported on the NYSE composite, were as follows:

	Year Ended March 31, 2017		Year Ended March 31, 2016	
	High	Low	High	Low
<b>Common stock market price</b>				
First quarter	\$ 4.56	\$ 3.30	\$ 5.39	\$ 4.41
Second quarter	7.03	4.36	5.29	3.10
Third quarter	8.98	5.83	5.12	3.50
Fourth quarter	9.65	8.13	4.19	2.18

**Number of Stockholders of Record**

As of May 22, 2017, we had approximately 28,000 common stock record holders.

**Dividends**

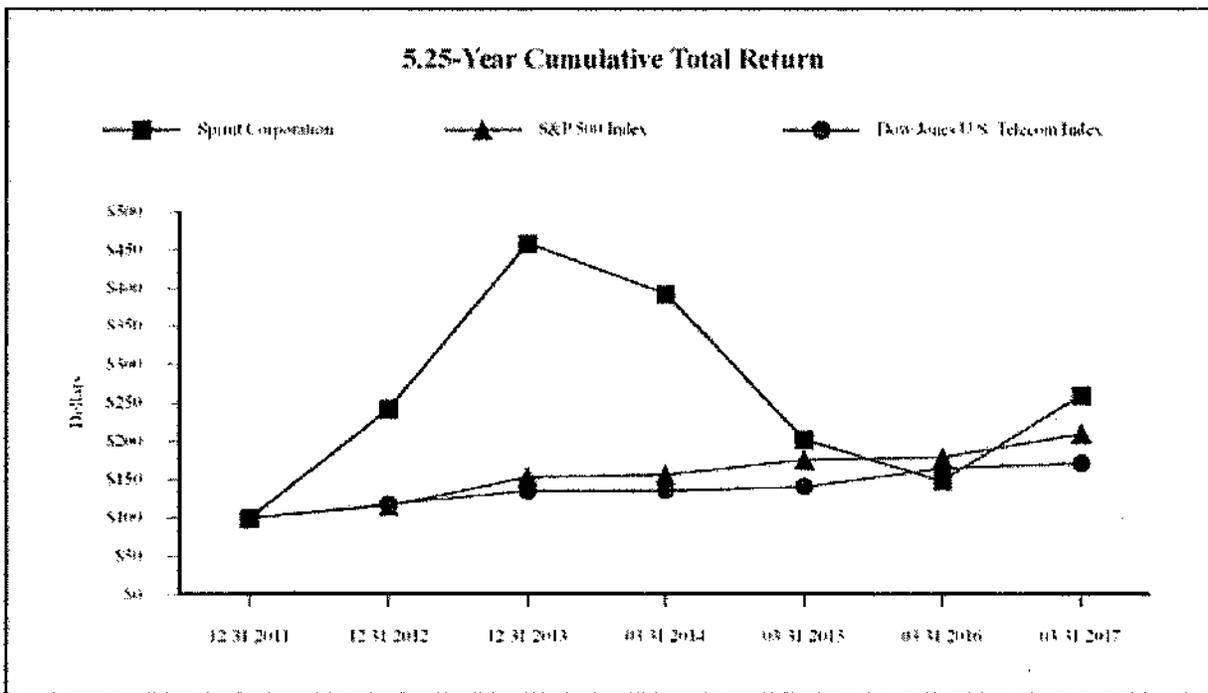

We did not declare any dividends on our common stock for all periods presented in the consolidated financial statements. We are currently restricted from paying cash dividends by the terms of our secured revolving bank credit facility as described under "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources."

**Issuer Purchases of Equity Securities**

None.

Table of Contents**Performance Graph**

The graph below compares the cumulative total shareholder return for the Company's common stock with the S&P<sup>®</sup> 500 Stock Index and the Dow Jones U.S. Telecommunications Index for the two fiscal years ended December 31, 2012 and 2013, the three-month transition period ended March 31, 2014 and the fiscal years ended March 31, 2015, 2016 and 2017. Because Sprint Corporation common stock did not commence trading until after the SoftBank Merger, the graph below reflects the cumulative total shareholder return on the Series 1 common stock of Sprint Communications, Inc., our predecessor, through July 10, 2013 and, thereafter, reflects the total shareholder return on the common stock of Sprint Corporation. The graph assumes an initial investment of \$100 on December 31, 2011 and, if any, the reinvestment of all dividends.

Value of \$100 Invested on December 31, 2011

	12/31/2011	12/31/2012	12/31/2013	3/31/2014	3/31/2015	3/31/2016	3/31/2017
Sprint Corporation	\$ 100.00	\$ 242.31	\$ 459.40	\$ 392.74	\$ 202.56	\$ 148.72	\$ 260.95
S&P 500 Index	\$ 100.00	\$ 116.00	\$ 153.58	\$ 156.35	\$ 176.26	\$ 179.40	\$ 210.21
Dow Jones U.S. Telecom Index	\$ 100.00	\$ 118.48	\$ 135.22	\$ 135.71	\$ 141.25	\$ 165.43	\$ 172.10

Table of Contents**Item 6. Selected Financial Data**

The Company's selected financial data presented below distinguishes between the predecessor period (Predecessor) relating to Sprint Communications (formerly known as Sprint Nextel Corporation) for periods prior to the SoftBank Merger and the successor period (Successor) relating to Sprint Corporation, formerly known as Starburst II, for periods subsequent to the incorporation of Starburst II on October 5, 2012. The Successor financial information represents the activity and accounts of Sprint Corporation, which includes the activity and accounts of Starburst II prior to the close of the SoftBank Merger on July 10, 2013 and Sprint Communications, inclusive of the consolidation of Clearwire Corporation, prospectively following completion of the SoftBank Merger, beginning on July 11, 2013. The accounts and operating activity of Starburst II prior to the close of the SoftBank Merger primarily related to merger expenses that were incurred in connection with the SoftBank Merger (recognized in selling, general and administrative expense) and interest related to the \$3.1 billion convertible bond Sprint Communications, Inc. issued to Starburst II. The Predecessor financial information represents the historical basis of presentation for Sprint Communications for all periods prior to the SoftBank Merger.

The selected financial data presented below is not comparable for all periods presented primarily as a result of transactions such as the SoftBank Merger and acquisitions of Clearwire and certain assets of United States Cellular Corporation in 2013. All acquired companies' results of operations subsequent to their acquisition dates are included in our consolidated financial statements.

	Successor							Predecessor		
	Year Ended March 31,			Three Months Ended March 31,		Year Ended December 31,		191 Days Ended July 10,	Three Months Ended March 31,	Year Ended December 31,
	2017	2016	2015	2014	2013	2013	2012	2013	2013	2012
	<i>(in millions, except per share amounts)</i>									
<b>Results of Operations</b>										
Service revenue	\$ 25,368	\$ 27,174	\$ 29,542	\$ 7,876	\$ —	\$ 15,094	\$ —	\$ 16,895	\$ 7,980	\$ 32,097
Equipment revenue	7,979	5,006	4,990	999	—	1,797	—	1,707	813	3,248
Net operating revenues	33,347	32,180	34,532	8,875	—	16,891	—	18,602	8,793	35,345

Table of Contents**Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*****OVERVIEW****Business Overview**

Sprint is a communications company offering a comprehensive range of wireless and wireline communications products and services that are designed to meet the needs of individual consumers, businesses, government subscribers, and resellers. Unless the context otherwise requires, references to "Sprint," "we," "us," "our" and the "Company" mean Sprint Corporation and its consolidated subsidiaries for all periods presented, and references to "Sprint Communications" are to Sprint Communications, Inc. and its consolidated subsidiaries.

Wireless segment earnings represented almost all of our total consolidated segment earnings for the year ended March 31, 2017. Within the Wireless segment, postpaid wireless service revenue represents the most significant contributor to earnings, and is driven by the number of postpaid subscribers to our services, as well as the average revenue per user (ARPU).

***Strategies and Key Priorities***

Our business strategy is to be responsive to changing customer mobility demands of existing and potential customers, and to expand our business into new areas of customer value and economic opportunity through innovation and differentiation. To help lay the foundation for these future growth opportunities, our strategy revolves around targeted investment, in the following key priority areas:

- Unlock the value of our substantial spectrum holdings by densifying and optimizing our network to provide customers with the best experience;
- Achieve our cost reduction goals by significantly transforming our business;
- Deliver an attractive value proposition and substantially enhance our distribution through use of innovative models;
- Create an alternative financial structure that leverages our assets to fuel our growth and maximize stockholder value;
- Attract and retain world-class talent and establish strategic partnerships to create the optimal, engaged, and winning team; and
- Deliver an exceptional wireless experience so customers stay longer, buy more, and tell their friends.

To provide a network that delivers the consistent reliability, capacity and speed that customers demand, we expect to continue to optimize our 3G data network and invest in LTE deployment across all of our spectrum bands. We also expect to deploy new technologies that will help strengthen our competitive position, including the expected use of High Performance User Equipment, the Magic Box which is an LTE booster, Voice over LTE, more extensive use of Wi-Fi and the use of small cells to further densify our network.

To achieve a more competitive cost position, we have established an Office of Cost Management with responsibility for identifying, operationalizing, and monitoring sustained improvements in operating costs and efficiencies. Also, we have deployed new cost management and planning tools across the entire organization to more effectively monitor expenditures.

We are focused on attracting and retaining subscribers by improving our sales and marketing initiatives. We have demonstrated our value proposition through our evolving price plans, promotions, and payment programs and have deployed new local marketing and civic engagement initiatives in key markets.

Our current strategy also includes transactions that continue to leverage our assets such as the Accounts Receivable Facility, the Handset Sale-Leaseback transactions, the Network Equipment Sale-Leaseback and the Spectrum Financing transaction. Each of these transactions are described in more detail in "Liquidity and Capital Resources."

We have recruited leaders in our industry from around the globe and employ an organizational focus to ensure Sprint has a work environment employees recommend.

To deliver a simplified and improved customer experience, we are focusing on key subscriber touch points, pursuing process improvements and deploying platforms to simplify and enhance the interactions between us and our customers. In addition, we have established a customer experience team to support our focus on net promoter score as an important key measure of customer satisfaction.

Table of Contents**Network**

We continue to increase coverage and capacity by densifying and optimizing our existing network. Densification, which includes increasing the number of small cells and antennas, is intended to enhance coverage and capacity across the network. We expect the densification efforts to cost significantly less than our historical macro cell site builds (*i.e.*, adding traditional cell towers). We are also deploying new technologies, such as carrier aggregation, which allows us to move more data at faster speeds over the same spectrum. Additionally, our introduction of tri-band devices, which support each of our spectrum bands, allows us to manage and operate our network more efficiently and at a lower cost. We have continued to see positive results from these infrastructure upgrades in key U.S. markets.

The 2.5 GHz spectrum band carries the highest percentage of Sprint's LTE data traffic. We have significant additional capacity to grow the use of our 2.5 GHz spectrum holdings into the future. Sprint believes it is well-positioned with spectrum holdings of more than 160 MHz of 2.5 GHz spectrum in the top 100 markets in the U.S.

Overall, our densification and optimization efforts are expected to continue to enhance the customer experience by adding data capacity, increasing the wireless data speeds available to our customers, and improving network performance for both voice and data services. While circumstances may change in the future, we believe that our substantial spectrum holdings are sufficient to allow us to continue to provide consistent network reliability, capacity, and speed, as well as to provide current and future customers a highly competitive wireless experience. As we continue to refine our network strategy and evaluate other potential network initiatives, we may incur future material charges associated with lease and access exit costs, loss from asset dispositions or accelerated depreciation, among others.

**Shentel Transaction**

On August 10, 2015, Shenandoah Telecommunications Company (Shentel) entered into a definitive agreement to acquire one of our wholesale partners, NTELOS Holdings Corp (nTelos). In connection with this definitive agreement, we entered into a series of agreements with Shentel to, among other things, acquire certain assets such as spectrum, terminate our existing wholesale arrangement with nTelos, and amend our existing affiliate agreement with Shentel to primarily include the subscribers formerly under the wholesale arrangement with nTelos. The agreements also expanded the area in which Shentel provides wireless service to Sprint customers and provided for more favorable economic terms. In April 2016, we received regulatory approval and the transaction closed in May 2016. The total consideration for this transaction included \$181 million, on a net present value basis, of notes payable to Shentel. Sprint will satisfy its obligations under the notes payable over an expected term of five to six years. FCC licenses acquired from Shentel had a total value of \$85 million. \$96 million of the total purchase was recorded in "Other, net" in the consolidated statements of operations as a contract termination in the quarter ended June 30, 2016, which related to the termination of our pre-existing wholesale arrangement with nTelos.

**RESULTS OF OPERATIONS****Consolidated Results of Operations**

The following table provides an overview of the consolidated results of operations.

	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Wireless segment earnings	\$ 9,814	\$ 8,051	\$ 5,894
Wireline segment earnings	119	92	113
Corporate, other and eliminations	1	3	(7)
Consolidated segment earnings	9,934	8,146	6,000
Depreciation	(7,098)	(5,794)	(3,797)
Amortization	(1,052)	(1,294)	(1,552)
Impairments	—	—	(2,133)
Other, net <sup>(1)</sup>	(20)	(748)	(413)
Operating income (loss)	1,764	310	(1,895)
Interest expense	(2,495)	(2,182)	(2,051)
Other (expense) income, net	(40)	18	27
Income tax (expense) benefit	(435)	(141)	574
Net loss	<u>\$ (1,206)</u>	<u>\$ (1,995)</u>	<u>\$ (3,345)</u>

(1) Other, net for the years ended March 31, 2017 and 2016 excludes \$481 million and \$321 million of losses, respectively, related to losses on disposal of property, plant and equipment which is included in Wireless segment earnings.

Table of Contents***Depreciation Expense***

Depreciation expense increased \$1.3 billion, or 23%, in the year ended March 31, 2017 compared to the same period in 2016 and increased \$2.0 billion, or 53%, in the year ended March 31, 2016 compared to same period in 2015 primarily due to increased depreciation on leased devices as a result of the continued growth of the device leasing program that was introduced in September 2014. In addition, depreciation expense increased in the year ended March 31, 2016 compared to the same period in 2015 due to network asset additions, partially offset by a decrease due to assets being retired or fully depreciated. Depreciation expense incurred on all leased devices for the years ended March 31, 2017, 2016, and 2015 was \$3.1 billion, \$1.8 billion, and \$206 million, respectively.

***Amortization Expense***

Amortization expense decreased \$242 million, or 19%, in the year ended March 31, 2017 compared to the same period in 2016 and decreased \$258 million, or 17%, in the year ended March 31, 2016 compared to the same period in 2015 primarily due to customer relationship intangible assets that are amortized using the sum-of-the-months'-digits method, which results in higher amortization rates in early periods that decline over time.

***Impairments***

During the year ended March 31, 2015, we determined that recoverability of the carrying amount of the Sprint trade name should be evaluated for impairment due to changes in circumstances surrounding our Wireless reporting unit. As a result, we recorded an impairment loss of \$1.9 billion, which is included in "Impairments" in our consolidated statements of operations. During the year ended March 31, 2015, we also tested the recoverability of the Wireline asset group, which consists primarily of property, plant and equipment, due to continued declines in our Wireline segment earnings and our forecast that projected continued losses in future periods. As a result, we recorded an impairment loss of \$233 million to reduce the carrying value of Wireline's property, plant and equipment to its estimated fair value, which is included in "Impairments" in our consolidated statements of operations.

***Other, net***

The following table provides additional information regarding items included in "Other, net."

	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Severance and exit costs	\$ (66)	\$ (409)	\$ (304)
Litigation and other contingencies	(140)	(193)	(91)
Loss on disposal of property, plant and equipment	(28)	(166)	—
Contract terminations	(140)	—	—
Gains from asset dispositions and exchanges	354	—	—
Revision to estimate of a previously recorded reserve	—	20	41
Partial pension settlement	—	—	(59)
Total expense	<u>\$ (20)</u>	<u>\$ (748)</u>	<u>\$ (413)</u>

Other, net represented an expense of \$20 million in the year ended March 31, 2017. We recognized severance and exit costs of \$66 million. In addition, we recognized a \$140 million charge for a state tax matter combined with legal reserves related to other pending legal suits and proceedings, a \$354 million non-cash gain as a result of spectrum license exchanges with other carriers, and a \$28 million loss on disposal of property, plant and equipment primarily related to cell site construction costs that are no longer recoverable as a result of changes in our network plans. We also recognized \$140 million of contract terminations that were primarily related to the termination of our pre-existing wholesale arrangement with nTelos as a result of the Shentel transaction combined with the costs related to the termination of our relationship with General Wireless Operations Inc. (Radio Shack).

Other, net reflected an expense of \$748 million in the year ended March 31, 2016. We recognized litigation expense of \$193 million for ongoing legal matters. In addition, we recognized severance and exit costs which included \$216 million of severance primarily associated with reductions in work force and \$195 million of lease and access exit costs primarily associated with tower and cell site leases and backhaul access contracts for which we will no longer be receiving any economic benefit, of which \$2 million was recognized as "Cost of services" in the consolidated statements of operations. We also recorded \$166 million of loss on disposal of property, plant and equipment primarily related to cell site construction

Table of Contents

costs and other network costs that are no longer recoverable as a result of changes in the Company's network plans. In addition, we revised our estimate of a previously recorded reserve, resulting in approximately \$20 million of income.

Other, net reflected an expense of \$413 million in the in the year ended March 31, 2015. Severance and exit costs included \$253 million of severance primarily associated with reductions in work force and \$13 million of lease exit costs primarily associated with tower and cell sites as well as facility closures. In addition, we recognized \$38 million of costs during the period related to payments that will continue to be made under our backhaul access contracts for which we will no longer be receiving any economic benefit. Litigation of \$91 million represented legal reserves for various pending legal suits and proceedings. Partial pension settlement was the result of the Company's Board of Directors approving a plan amendment to the Sprint Retirement Pension Plan (Plan) to offer certain terminated participants, who had not begun to receive Plan benefits, the opportunity to voluntarily elect to receive their benefits as an immediate lump sum distribution. The lump sum distribution created a settlement event that resulted in a \$59 million charge. In addition, we revised our estimate of a previously recorded reserve, resulting in income of approximately \$41 million.

***Interest Expense***

Interest expense increased \$313 million, or 14%, in the year ended March 31, 2017 compared to the same period in 2016 primarily due to interest associated with the Network Equipment Sale-Leaseback, the Handset Sale-Leaseback Tranche 2, the unsecured financing facility and the Spectrum Financing transaction. Interest expense increased \$131 million, or 6%, in the year ended March 31, 2016 compared to same period in 2015 primarily due to interest associated with \$1.5 billion aggregate principal amount of notes issued in February 2015. The effective interest rate, which includes capitalized interest, on the weighted average long-term debt balance of \$37.9 billion, \$33.8 billion and \$32.5 billion was 6.7 % in the year ended March 31, 2017, and 6.5% for years ended March 31, 2016 and 2015, respectively. See "Liquidity and Capital Resources" for more information on the Company's financing activities.

***Other (Expense) Income, Net***

"Other (expense) income, net" represented an expense of \$40 million in the year ended March 31, 2017, and income of \$18 million and \$27 million in the years ended March 31, 2016 and 2015, respectively. The expense in the year ended March 31, 2017 was primarily due to recognizing the remaining debt finance costs of \$74 million associated with the terminated unsecured financing facility, partially offset by interest income of \$59 million which was primarily related to increased short-term investments.

***Income Tax Expense***

The income tax expense of \$435 million and \$141 million, and the benefit of \$574 million for the years ended March 31, 2017, 2016 and 2015, respectively, represented consolidated effective tax rates of approximately (56)%, (8)%, and 15%, respectively. The income tax expense for the year ended March 31, 2017 was primarily attributable to taxable temporary differences from the tax amortization of FCC licenses and tax expense of \$136 million on pre-tax gains from spectrum license exchanges which increased our deferred tax liability on FCC licenses temporary differences. In addition, income tax expense included an expense of \$89 million to increase our state income tax valuation allowance as a result of a shift in operations among wholly-owned subsidiaries and an organizational restructuring that occurred during the year. The income tax expense for the year ended March 31, 2016 was primarily attributable to tax expense resulting from taxable temporary differences from the tax amortization of FCC licenses, partially offset by tax benefits from the reversal of state income tax valuation allowance on deferred tax assets and changes in state income tax laws enacted during the year. The income tax benefit for the year ended March 31, 2015 was primarily attributable to recognition of a tax benefit on the \$1.9 billion Sprint trade name impairment loss, partially offset by tax expense on taxable temporary differences from the tax amortization of FCC licenses for income tax purposes.

**Segment Earnings - Wireless**

Wireless segment earnings are a function of wireless service revenue, the sale of wireless devices (handsets and tablets), broadband devices, connected devices and accessories, leasing wireless devices, in addition to costs to acquire subscribers and network and interconnection costs to serve those subscribers, as well as other Wireless segment operating expenses. The costs to acquire our subscribers include the cost at which we sell our devices, as well as the marketing and sales costs incurred to attract those subscribers. Network costs primarily represent switch and cell site costs, backhaul costs, and interconnection costs, which generally consist of per-minute usage fees and roaming fees paid to other carriers. The remaining costs associated with operating the Wireless segment include the costs to operate our customer care organization and administrative support. Wireless service revenue, costs to acquire subscribers, and variable network and interconnection

Table of Contents

costs fluctuate with the changes in our subscriber base and their related usage, but some cost elements do not fluctuate in the short-term with these changes.

As shown by the table above under "Consolidated Results of Operations," Wireless segment earnings represented almost all of our total consolidated segment earnings for the years ended March 31, 2017, 2016, and 2015. Within the Wireless segment, postpaid wireless services represent the most significant contributors to earnings, and is driven by the number of postpaid subscribers to our services, as well as ARPU. The wireless industry is subject to competition to retain and acquire subscribers of wireless services. Almost all markets in which we operate have high rates of penetration for wireless services.

***Device Financing Programs***

In September 2013, we introduced an installment billing program that allows subscribers to purchase a device by paying monthly installments generally over 24 months. In September 2014, we introduced a leasing program, whereby qualified subscribers can lease a device for a contractual period of time.

Under the installment billing program, we recognize a majority of the revenue associated with future expected installment payments at the time of sale of the device. As compared to our traditional subsidy program, this results in better alignment of the equipment revenue with the cost of the device. The impact to Wireless earnings from the sale of devices under our installment billing program is neutral except for the impact from promotional offers and the time value of money element related to the imputed interest on the installment receivable.

Under the leasing program, qualified subscribers can lease a device for a contractual period of time. At the end of the lease term, the subscriber has the option to turn in their device, continue leasing their device, or purchase the device. As of March 31, 2017, substantially all of our device leases were classified as operating leases. As a result, at lease inception, the devices are reclassified from inventory to property, plant and equipment when leased through Sprint's direct channels. For leases in the indirect channel, we purchase the devices at lease inception from the dealer, which is then capitalized to property, plant and equipment. While a majority of the revenue associated with installment sales is recognized at the time of sale along with the related cost of products, lease revenue is recorded monthly over the term of the lease and the cost of the device is depreciated to its estimated residual value generally over the lease term. During the years ended March 31, 2017, 2016 and 2015, we leased devices through our Sprint direct channels totaling \$2.9 billion, \$3.2 billion and \$1.2 billion, respectively. These devices were reclassified from inventory to property, plant and equipment and, as such, the cost of the device was not recorded as cost of products compared to when purchased under the installment billing or traditional subsidy program, which resulted in a significant positive impact to Wireless segment earnings. Depreciation expense incurred on all leased devices for the years ended March 31, 2017, 2016 and 2015 was \$3.1 billion, \$1.8 billion and \$206 million, respectively. If the mix of leased devices continues to increase, we expect this positive impact on the financial results of Wireless segment earnings to continue and depreciation expense to increase. However, this benefit to Wireless segment earnings was partially offset by the Handset Sale-Leaseback Tranche 1 (Tranche 1) transaction that was consummated in November 2015 whereby we sold and subsequently leased back certain devices leased to our customers (see *Handset Sale-Leaseback Tranche 1* in "Liquidity and Capital Resources" for further details). As a result, the cost to us of the devices sold to Mobile Leasing Solutions, LLC (MLS) was no longer recorded as depreciation expense, but rather recognized as rent expense within "Cost of products" in the consolidated statements of operations during the leaseback periods until Tranche 1 was terminated in conjunction with the repurchase of devices in December 2016.

Our device leasing and installment billing programs require a greater use of operating cash flows in the earlier part of the device contracts as our subscribers will generally pay less upfront than a traditional subsidy program. The Accounts Receivable Facility and the Handset Sale-Leaseback transactions discussed in "Liquidity and Capital Resources" were designed to mitigate the significant use of cash from purchasing devices from original equipment manufacturers (OEMs) to fulfill our installment billing and leasing programs.

***Wireless Segment Earnings Trends***

Sprint offers lower monthly service fees without a traditional contract as an incentive to attract subscribers to certain of our service plans. These lower rates for service are available whether the subscriber brings their own handset, pays the full or near full retail price of the handset, purchases the handset under our installment billing program, or leases their handset through our leasing program. As our base of subscribers shifts away from our traditional subsidy program to lower-priced service plans associated with device financing options, we expect our postpaid ARPU to continue to decline due to lower service revenue. However, we expect higher equipment revenue associated with the installment billing and leasing programs to substantially offset these declines. Since inception, the combination of lower priced plans and our installment

Table of Contents

billing and leasing programs have been accretive to Wireless segment earnings. We expect that trend to continue with the magnitude of the impact depending on subscriber adoption rates.

We began to experience net losses of postpaid handset subscribers in mid-2013. Since the release of our new price plans, results have shown improvement in trends of handset subscribers; however, there can be no assurance that this trend will continue. We have taken initiatives to provide the best value in wireless service while continuing to enhance our network performance, coverage and capacity in order to attract and retain valuable handset subscribers. In addition, we are evaluating our cost model to operationalize a more effective cost structure.

The following table provides an overview of the results of operations of our Wireless segment.

	Year Ended March 31,		
	2017	2016	2015
<b>Wireless Segment Earnings</b>	<i>(in millions)</i>		
Postpaid	\$ 18,677	\$ 19,463	\$ 21,181
Prepaid	4,438	4,986	4,905
Other <sup>(1)</sup>	—	178	458
Retail service revenue	23,115	24,627	26,544
Wholesale, affiliate and other	693	744	793
Total service revenue	23,808	25,371	27,337
Cost of services (exclusive of depreciation and amortization)	(6,674)	(8,069)	(7,945)
Service gross margin	17,134	17,302	19,392
Service gross margin percentage	72%	68%	71%
Equipment revenue	7,979	5,006	4,990
Cost of products (exclusive of depreciation and amortization)	(7,077)	(5,795)	(9,309)
Selling, general and administrative expense	(7,741)	(8,141)	(9,179)
Loss on disposal of property, plant and equipment	(481)	(321)	—
Wireless segment earnings	\$ 9,814	\$ 8,051	\$ 5,894

(1) Represents service revenue primarily related to the acquisition of Clearwire on July 9, 2013.

**Service Revenue**

Our Wireless segment generates service revenue from the sale of wireless services and the sale of wholesale and other services. Service revenue consists of fixed monthly recurring charges, variable usage charges and miscellaneous fees such as activation fees, directory assistance, roaming, equipment protection, late payment and early termination charges, and certain regulatory related fees, net of service credits.

The ability of our Wireless segment to generate service revenue is primarily a function of:

- revenue generated from each subscriber, which in turn is a function of the types and amount of services utilized by each subscriber and the rates charged for those services; and
- the number of subscribers that we serve, which in turn is a function of our ability to retain existing subscribers and acquire new subscribers.

Retail comprises those subscribers to whom Sprint directly provides wireless services, whether those services are provided on a postpaid or a prepaid basis. We also categorize our retail subscribers as prime and subprime based upon subscriber credit profiles. We use proprietary scoring systems that measure the credit quality of our subscribers using several factors, such as credit bureau information, subscriber credit risk scores and service plan characteristics. Payment history is subsequently monitored to further evaluate subscriber credit profiles. Wholesale and affiliates are those subscribers who are served through MVNO and affiliate relationships and other arrangements. Under the MVNO relationships, wireless services are sold by Sprint to other companies that resell those services to subscribers.

Effective January 1, 2017, we entered into a new Master Services Agreement with a vendor to provide post-sale device support services (including device insurance) to subscribers. Under the new agreement, the vendor bears the risk of loss with regards to claims and related costs, which Sprint will no longer incur. Sprint will remit premiums to the vendor who will pay Sprint a monthly recurring commission per subscriber for the duration of the agreement. Additionally, under the terms of the new agreement, the vendor will be the primary obligor in the agreement with the subscriber and, as such, revenue will be accounted for and presented on a net basis, whereas historically the amounts were presented on a gross basis. The change is expected to result in reductions in service revenue of approximately \$700 million in fiscal year 2017. Because

Table of Contents

the vendor, not Sprint, will be fulfilling the services, we expect the reductions in service revenue to be more than offset by greater reductions in cost of services expense.

Year Ended March 31, 2017 compared to Year Ended March 31, 2016

Retail service revenue decreased \$1.5 billion, or 6%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to a lower average revenue per postpaid subscriber driven by an increase in subscribers on lower price plans, combined with a decrease in average prepaid subscribers driven by higher churn and the impact of the shutdown of the Clearwire WiMAX network on March 31, 2016. The decrease was partially offset by an increase in average postpaid subscribers.

Wholesale, affiliate and other revenues decreased \$51 million, or 7%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to a decline in Lifeline and postpaid and prepaid resellers due to competitive pressures combined with the impact of the shutdown of the Clearwire WiMAX network, partially offset by growth in connected devices and an increase in imputed interest associated with installment billing on handsets. Approximately 67% of our total wholesale and affiliate subscribers represent connected devices. These devices generate revenue from usage which varies depending on the solution being utilized.

Year Ended March 31, 2016 compared to Year Ended March 31, 2015

Retail service revenue decreased \$1.9 billion, or 7%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to a lower average revenue per subscriber driven by growth in both postpaid subscribers on our new plans and tablet sales. The decrease was partially offset by an increase in average postpaid subscribers mostly due to improved churn.

Wholesale, affiliate and other revenues decreased \$49 million, or 6%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to a decline in prepaid resellers and the impact of the shutdown of the Clearwire WiMAX network, partially offset by growth in postpaid resellers and connected devices. Approximately 64% of our total wholesale and affiliate subscribers represent connected devices. These devices generate revenue from usage which varies depending on the solution being utilized.

Average Monthly Service Revenue per Subscriber and Subscriber Trends

The table below summarizes average number of retail subscribers. Additional information about the number of subscribers, net additions (losses) to subscribers, and average rates of monthly postpaid and prepaid subscriber churn for each quarter since the quarter ended March 31, 2014 may be found in the tables on the following pages.

	Year Ended March 31,		
	2017	2016	2015
	<i>(subscribers in thousands)</i>		
Average postpaid subscribers	31,272	30,561	30,068
Average prepaid subscribers	13,204	15,200	15,401
Average retail subscribers	44,476	45,761	45,469

The table below summarizes ARPU. Additional information about ARPU for each quarter since the quarter ended March 31, 2014 may be found in the tables on the following pages.

	Year Ended March 31,		
	2017	2016	2015
ARPU <sup>(1)</sup>			
Postpaid	\$ 49.77	\$ 53.30	\$ 59.32
Prepaid	\$ 28.01	\$ 27.85	\$ 27.81
Average retail	\$ 43.31	\$ 44.85	\$ 48.65

(1) ARPU is calculated by dividing service revenue by the sum of the monthly average number of subscribers in the applicable service category. Changes in average monthly service revenue reflect subscribers for either the postpaid or prepaid service category who change rate plans, the level of voice and data usage, the amount of service credits which are offered to subscribers, plus the net effect of average monthly revenue generated by new subscribers and deactivating subscribers.

Table of ContentsYear Ended March 31, 2017 compared to Year Ended March 31, 2016

Postpaid ARPU for the year ended March 31, 2017 decreased compared to the year ended March 31, 2016 primarily due to the impact of subscriber migration to our service plans associated with device financing options, resulting in lower service fees. We expect Sprint platform postpaid ARPU to continue to decline during fiscal year 2017 as a result of lower service fees associated with our price plans offered in conjunction with device financing options as well as lower device insurance program revenues resulting from entering into a new Master Services Agreement with a vendor to provide post-sale device support services to subscribers. However, as a result of our installment billing and leasing programs, we expect increasing equipment revenues to more than offset these declines. Prepaid ARPU for the year ended March 31, 2017 increased compared to the year ended March 31, 2016 primarily due to the removal of approximately 1.2 million low-engagement prepaid customers from our base as a result of aligning our churn and retention rules across our prepaid brands, excluding Assurance Wireless, late in the three-month period ended December 31, 2016 (See "Subscriber Results" below for more details). With this action, average prepaid subscribers decreased, however prepaid revenue was not proportionally impacted.

Year Ended March 31, 2016 compared to Year Ended March 31, 2015

Postpaid ARPU for the year ended March 31, 2016 decreased compared to the year ended March 31, 2015 primarily due to the impact of subscriber migration to many of our new service plans, resulting in lower service fees, combined with ongoing growth in sales of tablets, which carry a lower revenue per subscriber. Prepaid ARPU for the year ended March 31, 2016 increased compared to the year ended March 31, 2015 primarily due to an increase in average Boost Mobile subscribers which carry a higher ARPU as compared to other prepaid brands, partially offset by the revenue impact of subscribers choosing lower priced plans in both the Boost Mobile and Virgin Mobile brands due to increased competition combined with a decrease in average Virgin Mobile subscribers.

Table of Contents

The following table shows (a) net additions (losses) of wireless subscribers, (b) our total subscribers, and (c) end of period connected device subscribers as of the end of each quarterly period beginning with the quarter ended March 31, 2014.

- (1) A subscriber is defined as an individual line of service associated with each device activated by a customer. Subscribers that transfer from their original service category classification to another platform, or another service line within the same platform, are reflected as a net loss to the original service category and a net addition to their new service category. There is no net effect for such subscriber changes to the total wireless net additions (losses) or end of period subscribers.
- (2) Sprint platform refers to the Sprint network that supports the wireless service we provide through our multiple brands.
- (3) As part of the Shentel transaction, 186,000 and 92,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates. An additional 270,000 of nTelos' subscribers are now part of our affiliate relationship with Shentel and are being reported in wholesale and affiliate subscribers during the quarter ended June 30, 2016.
- (4) End of period connected devices are included in retail postpaid or wholesale and affiliates end of period subscriber totals for all periods presented.
- (5) During the three-month period ended December 31, 2016, the Company aligned all prepaid brands, excluding Assurance Wireless but including prepaid affiliate subscribers, under one churn and retention program. As a result of this change, end of period prepaid and affiliate subscribers as of December 31, 2016 were reduced by 1,234,000 and 21,000, respectively. See "Subscriber Results" below for more information.
- (6) Subscribers through some of our MVNO relationships have inactivity either in voice usage or primarily as a result of the nature of the device, where activity only occurs when data retrieval is initiated by the end-user and may occur infrequently. Although we continue to provide these subscribers access to our network through our MVNO relationships, approximately 2,054,000 subscribers at March 31, 2017 through these MVNO relationships have been inactive for at least six months, with no associated revenue during the six-month period ended March 31, 2017.
- (7) End of period transactions subscribers reflected postpaid, prepaid and wholesale subscribers acquired as a result of the acquisition of Clearwire. We had no remaining transaction subscribers primarily due to the shutdown of the WiMAX network on March 31, 2016.

The following table shows our average rates of monthly postpaid and prepaid subscriber churn as of the end of each quarterly period beginning with the quarter ended March 31, 2014.

	March 31, 2014	June 30, 2014	Sept 30, 2014	Dec 31, 2014	March 31, 2015	June 30, 2015	Sept 30, 2015	Dec 31, 2015	March 31, 2016	June 30, 2016	Sept 30, 2016	Dec 31, 2016	March 31, 2017
<b>Monthly subscriber churn rate<sup>(1)</sup></b>													
<b>Sprint platform:</b>													
Postpaid	2.11%	2.05%	2.18%	2.30%	1.84%	1.56%	1.54%	1.62%	1.72%	1.56%	1.52%	1.67%	1.75%
Prepaid <sup>(2)</sup>	4.33%	4.44%	3.76%	3.94%	3.84%	5.08%	5.06%	5.82%	5.65%	5.55%	5.63%	5.80%	4.99%
<b>Transactions<sup>(3)</sup>:</b>													
Postpaid	5.48%	4.15%	4.66%	4.09%	3.87%	6.07%	8.55%	NM	NM	NM	NM	NM	NM
Prepaid	5.11%	6.28%	5.70%	4.95%	3.77%	7.23%	8.51%	NM	NM	NM	NM	NM	NM
Total retail postpaid	2.18%	2.09%	2.22%	2.33%	1.87%	1.61%	1.61%	1.87%	1.72%	1.56%	1.52%	1.67%	1.75%
Total retail prepaid	4.35%	4.50%	3.81%	3.97%	3.84%	5.13%	5.12%	6.29%	5.65%	5.55%	5.63%	5.80%	4.99%

- (1) Churn is calculated by dividing net subscriber deactivations for the quarter by the sum of the average number of subscribers for each month in the quarter. For postpaid accounts comprising multiple subscribers, such as family plans and enterprise accounts, net deactivations are defined as deactivations in excess of subscriber activations in a particular account within 30 days. Postpaid and Prepaid churn consist of both voluntary churn, where the subscriber makes his or her own determination to cease being a subscriber, and involuntary churn, where the subscriber's service is terminated due to a lack of payment or other reasons.
- (2) In the quarter ended June 30, 2015, the Company revised its prepaid subscriber reporting to remove one of its rules that matches customers who disconnect and then re-engage within a specified period of time. This enhancement, which we believe represents a more precise churn calculation, had no impact on net additions, but did result in reporting higher deactivations and higher gross additions in the quarter. Without this revision, Sprint platform prepaid churn in the quarter would have been 4.33% and relatively flat compared to the same period in 2014. End of period prepaid subscribers and net prepaid subscriber additions for all periods presented were not impacted by the change.
- (3) Subscriber churn related to the acquisition of Clearwire.

Table of Contents

The following table shows our postpaid and prepaid ARPU as of the end of each quarterly period beginning with the quarter ended March 31, 2014.

	March 31, 2014	June 30, 2014	Sept 30, 2014	Dec 31, 2014	March 31, 2015	June 30, 2015	Sept 30, 2015	Dec 31, 2015	March 31, 2016	June 30, 2016	Sept 30, 2016	Dec 31, 2016	March 31, 2017

(1) Subscriber ARPU related to the acquisition of Clearwire.

Table of Contents**Subscriber Results***Sprint Platform Subscribers*

**Retail Postpaid** — During the year ended March 31, 2017, net postpaid subscriber additions were 811,000 compared to net additions of 1,245,000 and net losses of 212,000 in the years ended March 31, 2016 and 2015, respectively, inclusive of tablet net losses of 281,000, net additions of 545,000 and 1,334,000, respectively, which generally have a significantly lower ARPU as compared to other wireless subscribers. The primary driver for the net additions in the years ended March 31, 2017 and 2016 was our pricing plan promotions launched during the year combined with improvement in churn as subscribers benefit from the improved network quality. The primary driver for the net losses in the year ended March 31, 2015 was an increase in churn, primarily due to increased competition and network-related churn impacted by our network modernization program. Aggressive marketing efforts by other wireless carriers, including price reductions, to incent subscribers to switch carriers also negatively impact churn, which has a negative effect on earnings.

**Retail Prepaid** — During the year ended March 31, 2017, we lost 1,079,000 net prepaid subscribers compared to losing 1,309,000 and adding 449,000 net prepaid subscribers in the years ended March 31, 2016 and 2015, respectively. The net losses in the year ended March 31, 2017 were primarily due to subscriber losses across all prepaid brands due to continued competition in the market. The net losses in the year ended March 31, 2016 were primarily due to subscriber losses in the Virgin Mobile prepaid brand primarily due to increasing competition. Net additions in the year ended March 31, 2015 were primarily due to subscriber growth in our Boost Mobile brand as a result of new promotions in our indirect channels, partially offset by subscriber losses in the Virgin Mobile prepaid brands primarily due to continued competition.

Historically, prepaid subscribers were generally deactivated between 60 and 150 days from the later of the date of initial activation or replenishment; however, prior to account deactivation, targeted retention programs can be offered to qualifying subscribers to maintain ongoing service by providing up to an additional 150 days to make a replenishment. At September 30, 2016, each of our prepaid brands had different churn rules and retention programs. As a part of our ongoing efforts to simplify and drive consistency across our prepaid business, as well as tighten the customer engagement criteria, we have aligned all prepaid brands, excluding Assurance Wireless, under one churn and retention program as of December 31, 2016. Therefore, all prepaid and prepaid affiliate subscribers, excluding Assurance Wireless, are now deactivated 60 days from the later of the date of initial activation or the most recent replenishment date. As a result of these changes, we have approximately 1.2 million fewer prepaid subscribers and 21,000 fewer prepaid affiliate subscribers in the base as of December 31, 2016. However, because we have deactivated customers with no engagement, we do not expect a material impact to future prepaid revenue. If these changes had been implemented for our prepaid subscriber base at the beginning of the December 31, 2016 quarter rather than the end, and thus been in effect for the entire three-month period, we estimate churn would have been 5.84% versus 5.80% and ARPU would have been \$30.11 versus \$27.61.

**Wholesale and Affiliate Subscribers** — Wholesale and affiliate subscribers represent customers that are served on our networks through companies that resell our wireless services to their subscribers, customers residing in affiliate territories and connected devices that utilize our network. Of the 16.1 million Sprint Platform subscribers included in wholesale and affiliates, approximately 67% represent connected devices. Wholesale and affiliate subscriber net additions were 2,149,000 during the year ended March 31, 2017, compared to 2,733,000 and 2,349,000 during the years ended March 31, 2016 and 2015, respectively, inclusive of net additions of connected devices totaling 2,305,000, 2,743,000 and 1,950,000, respectively. The driver for net additions in the years ended March 31, 2017, 2016 and 2015 is primarily attributable to growth in connected devices.

*Transactions Subscribers*

As part of the acquisition of Clearwire in July 2013, we acquired 788,000 postpaid subscribers (exclusive of Sprint platform wholesale subscribers acquired through our MVNO relationship with Clearwire that were transferred to postpaid subscribers within Transactions), 721,000 prepaid subscribers, and 93,000 wholesale subscribers. We have no remaining transaction subscribers primarily due to the shutdown of the WiMAX network on March 31, 2016.

*Cost of Services*

Cost of services consists primarily of:

- costs to operate and maintain our networks, including direct switch and cell site costs, such as rent, utilities, maintenance, labor costs associated with network employees, and spectrum frequency leasing costs;
- fixed and variable interconnection costs, the fixed component of which consists of monthly flat-rate fees for facilities leased from local exchange carriers and other providers based on the number of cell sites and

Table of Contents

switches in service in a particular period and the related equipment installed at each site, and the variable component of which generally consists of per-minute use fees charged by wireline providers for calls terminating on their networks, which fluctuate in relation to the level and duration of those terminating calls;

- long distance costs paid to the Wireline segment;
- costs to service and repair devices;
- regulatory fees;
- roaming fees paid to other carriers; and
- fixed and variable costs relating to payments to third parties for the subscriber use of their proprietary data applications, such as messaging, music and cloud services and connected vehicle fees.

Year Ended March 31, 2017 compared to Year Ended March 31, 2016

Cost of services decreased \$1.4 billion, or 17%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to decreases in network costs such as rent, utilities, backhaul and labor associated with our network improvements and the shutdown of the WiMAX network on March 31, 2016, combined with decreases in roaming and interconnection costs primarily due to lower rates.

Year Ended March 31, 2016 compared to Year Ended March 31, 2015

Cost of services increased \$124 million, or 2%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to increased service and repair costs as a result of higher costs per unit of new and used devices. These increases were partially offset by decreases in roaming costs primarily due to lower rates.

***Equipment Revenue and Cost of Products***

We recognize equipment revenue and corresponding costs of devices when title and risk of loss passes to the indirect dealer or end-use subscriber, assuming all other revenue recognition criteria are met. Our devices are sold under the subsidy program and the installment billing program. Under the subsidy program, we offer certain incentives to retain and acquire subscribers such as new devices at discounted prices. The cost of these incentives is recorded as a reduction to equipment revenue upon activation of the device with a service contract. Under the installment billing program, the device is generally sold at or near full retail price and we recognize most of the future expected installment payments at the time of sale of the device.

Cost of products includes equipment costs (primarily devices and accessories), order fulfillment related expenses, and write-downs of device and accessory inventory related to shrinkage and obsolescence. Additionally, cost of products is reduced by any rebates that are earned from the equipment manufacturers. Cost of products in excess of the net revenue generated from equipment sales is referred to in the industry as equipment net subsidy. As subscribers migrate from acquiring devices through our subsidy program to installment billing or choose to lease under our leasing program, equipment net subsidy continues to decline. We also make incentive payments to certain indirect dealers who purchase devices directly from OEMs or other device distributors. Those payments are recognized as selling, general and administrative expenses when the device is activated with a Sprint service plan because Sprint does not recognize any equipment revenue or cost of products for those transactions. (See *Selling, General and Administrative Expense* below.)

The net impact to equipment revenue and cost of products from the sale of devices under our installment billing program is relatively neutral except for the impact from promotional offers and the time value of money element related to the imputed interest on the installment receivables. Under the leasing program, lease revenue is recorded over the term of the lease. The cost of the leased device is depreciated to its estimated residual value generally over the lease term. During the years ended March 31, 2017, 2016 and 2015, we leased devices through our Sprint direct channels totaling \$2.9 billion, \$3.2 billion and \$1.2 billion, respectively, which were reclassified from inventory to property, plant and equipment and, as such, the cost of the device was not recorded as cost of products compared to when purchased under the installment billing or traditional subsidy programs.

Year Ended March 31, 2017 compared to Year Ended March 31, 2016

Equipment revenue increased \$3.0 billion, or 59%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to higher revenue from the leasing program as more subscribers are choosing to lease their device, combined with an increase in the installment billing mix of sales, and an increase in the volume of used postpaid devices sold to third parties. Cost of products increased \$1.3 billion, or 22%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to an increase in the volume of used devices sold to third parties, combined with an increase in the installment billing mix of sales, partially offset by a decrease in prepaid devices sold.

Table of ContentsYear Ended March 31, 2016 compared to Year Ended March 31, 2015

Equipment revenue increased \$16 million, or remained relatively flat, and cost of products decreased \$3.5 billion, or 38%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to a higher average sales price per postpaid handset sold, partially offset by a decrease in postpaid handsets sold as a result of Brightstar Corp. (Brightstar) purchasing inventory from the OEMs to sell directly to our indirect dealers and more subscribers choosing to lease devices instead of purchasing them, combined with lower average sales price per prepaid handset sold. Cost of products also decreased due to a decrease in postpaid handsets sold as a result of Brightstar purchasing inventory from the OEMs to sell directly to our indirect dealers and subscribers choosing to lease devices instead of purchasing them.

*Selling, General and Administrative Expense*

Sales and marketing costs primarily consist of subscriber acquisition costs, including commissions paid to our indirect dealers, third-party distributors and retail sales force for new device activations and upgrades, residual payments to our indirect dealers, commission payments made to OEMs or other device distributors for direct source handsets, payroll and facilities costs associated with our retail sales force, marketing employees, advertising, media programs and sponsorships, including costs related to branding. General and administrative expenses primarily consist of costs for billing, customer care and information technology operations, bad debt expense and administrative support activities, including collections, legal, finance, human resources, corporate communications, and strategic planning.

Year Ended March 31, 2017 and Year Ended March 31, 2016

Sales and marketing expense decreased \$110 million, or 2%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to lower overall marketing spend as a result of cost reduction initiatives.

General and administrative costs decreased \$290 million, or 9%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to lower customer care and billing costs as a result of cost reduction initiatives, partially offset by higher bad debt expense. Bad debt expense increased \$109 million, or 24%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily related to increased installment billing accounts with higher reserve rates, partially offset by lower service revenue bad debt resulting from an improved aging and lower reserve rates. We reassess our allowance for doubtful accounts quarterly.

Year Ended March 31, 2016 and Year Ended March 31, 2015

Sales and marketing expense decreased \$272 million, or 5%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to lower media spend and a decrease in payments to OEMs for direct source handsets as a result of lower volume of device sales, partially offset by higher retail labor costs.

General and administrative costs for the year ended March 31, 2016 decreased \$766 million, or 20%, compared to the year ended March 31, 2015 primarily due to a decrease in bad debt expense combined with declines in other general and administrative expenses due to reduced headcount and other cost-savings initiatives. Bad debt expense decreased \$446 million, or 50%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily related to an improved aging as a result of customer credit profile improvement and fewer accounts written off due to improvements in churn, partially offset by a higher average balance of accounts written off.

*Loss on Disposal of Property, Plant and Equipment*

For the years ended March 31, 2017 and 2016, loss on disposal of property, plant and equipment, net of recoveries, of \$481 million and \$256 million, respectively, resulted from the write-off of leased devices associated with lease cancellations prior to their scheduled customer lease terms where customers did not return the devices to us. If customers continue to not return devices, we may have material losses in future periods. Similar charges are and have been incurred for devices sold under our subsidy program as equipment net subsidy. In addition, for the year ended March 31, 2016, \$65 million in net losses was recognized upon the sale of devices to MLS under the Tranche 1 transaction, which represented the difference between the fair value and net book value of the devices sold.

**Segment Earnings - Wireline**

We provide a broad suite of wireline voice and data communications services to other communications companies and targeted business subscribers. In addition, we provide voice, data and IP communication services to our Wireless segment. We provide long distance services and operate all-digital global long distance and Tier 1 IP networks. Our services and products include domestic and international data communications using various protocols such as multiprotocol label switching technologies (MPLS), IP, managed network services, Voice over Internet Protocol (VoIP), Session Initiated Protocol (SIP), and traditional voice services. Our IP services can also be combined with wireless services. Such services

Table of Contents

include our Sprint Mobile Integration service, which enables a wireless handset to operate as part of a subscriber's wireline voice network, and our DataLink<sup>SM</sup> service, which uses our wireless networks to connect a subscriber location into their primarily wireline wide-area IP/MPLS data network, making it easy for businesses to adapt their network to changing business requirements. In addition to providing services to our business customers, the wireline network is carrying increasing amounts of voice and data traffic for our Wireless segment as a result of growing usage by our wireless subscribers.

We continue to assess the portfolio of services provided by our Wireline business and are focusing our efforts on IP-based data services and de-emphasizing stand-alone voice services and non-IP-based data services. However, we continue to provide stand-alone voice services primarily to business customers. Our Wireline segment markets and sells its services primarily through direct sales representatives.

Wireline segment earnings are primarily a function of wireline service revenue, network and interconnection costs, and other Wireline segment operating expenses. Network costs primarily represent special access costs and interconnection costs, which generally consist of domestic and international per-minute usage fees paid to other carriers. The remaining costs associated with operating the Wireline segment include the costs to operate our customer care and billing organizations in addition to administrative support. Wireline service revenue and variable network and interconnection costs fluctuate with the changes in our customer base and their related usage, but some cost elements do not fluctuate in the short-term with the changes in our customer usage. Our wireline services provided to our Wireless segment are generally accounted for based on market rates, which we believe approximate fair value. The Company generally re-establishes these rates at the beginning of each fiscal year. Over the past several years, there has been an industry wide trend of lower rates due to increased competition from other wireline and wireless communications companies as well as cable and Internet service providers. Declines in wireline segment earnings related to intercompany pricing rates do not affect our consolidated results of operations as our Wireless segment benefits from an equivalent reduction in cost of service.

The following table provides an overview of the results of operations of our Wireline segment.

<u>Wireline Segment Earnings</u>	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Voice	\$ 649	\$ 840	\$ 1,174
Data	166	171	213
Internet	1,147	1,284	1,353
Other	81	87	74
Total net service revenue	2,043	2,382	2,814
Cost of services	(1,686)	(1,962)	(2,338)
Service gross margin	357	420	476
Service gross margin percentage	17%	18%	17%
Selling, general and administrative expense	(238)	(328)	(363)
Wireline segment earnings	\$ 119	\$ 92	\$ 113

**Wireline Revenue**Year Ended March 31, 2017 compared to Year Ended March 31, 2016*Voice Revenues*

Voice revenues for the year ended March 31, 2017 decreased \$191 million, or 23%, compared to the year ended March 31, 2016. The decrease was primarily driven by lower volume and overall rate declines due to lower international hubbing volumes as the Company continues to de-emphasize voice services, combined with the decline in prices for the sale of services to our Wireless segment. Voice revenues generated from the sale of services to our Wireless segment represented 38% of total voice revenues for the year ended March 31, 2017 compared to 39% in the year ended March 31, 2016.

*Data Revenues*

Data revenues reflect sales of data services, primarily Private Line and managed network services bundled with non-IP-based data access. Data revenues decreased \$5 million, or 3%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 as a result of customer churn, primarily related to Private Line. Data revenues generated from the provision of services to the Wireless segment represented 54% of total data revenue for each of the year ended March 31, 2017 compared to 40% in the year ended March 31, 2016.

Table of Contents*Internet Revenue*

IP-based data services revenue reflects sales of Internet services, including MPLS, VoIP, SIP, and managed services bundled with IP-based data access. IP-based data services decreased \$137 million, or 11%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to fewer IP customers. In addition, revenue was also impacted by a decline in prices for the sale of services to our Wireless segment. Sale of services to our Wireless segment represented 14% of total Internet revenues for the year ended March 31, 2017 compared to 15% in the year ended March 31, 2016.

*Other Revenues*

Other revenues, which primarily consist of sales of customer premises equipment, decreased \$6 million, or 7%, for the year ended March 31, 2017 compared to the year ended March 31, 2016.

*Year Ended March 31, 2016 compared to Year Ended March 31, 2015**Voice Revenues*

Voice revenues for the year ended March 31, 2016 decreased \$334 million, or 28%, compared to the year ended March 31, 2015. The decrease was primarily driven by lower volume and overall rate declines due to lower international hubbing volumes, combined with the decline in prices for the sale of services to our Wireless segment. Voice revenues generated from the sale of services to our Wireless segment represented 39% of total voice revenues for the year ended March 31, 2016 compared to 31% in the year ended March 31, 2015.

*Data Revenues*

Data revenues reflect sales of data services, primarily Private Line and managed network services bundled with non-IP-based data access. Data revenues decreased \$42 million, or 20%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 as a result of customer churn, primarily related to Private Line. Data revenues generated from the provision of services to the Wireless segment represented 40% of total data revenue for the year ended March 31, 2016 compared to 41% in the year ended March 31, 2015.

*Internet Revenue*

IP-based data services revenue reflects sales of Internet services, including MPLS, VoIP, SIP, and managed services bundled with IP-based data access. IP-based data services decreased \$69 million, or 5%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to fewer IP customers. In addition, revenue was also impacted by a decline in the price of services sold to our Wireless segment. Sale of services to our Wireless segment represented 15% of total Internet revenues for the year ended March 31, 2016 compared to 12% in the year ended March 31, 2015.

*Other Revenues*

Other revenues, which primarily consist of sales of customer premises equipment, increased \$13 million, or 18%, for the year ended March 31, 2016 compared to the year ended March 31, 2015.

*Costs of Services*

Costs of services include access costs paid to local phone companies, other domestic service providers and foreign phone companies to complete calls made by our domestic subscribers, costs to operate and maintain our networks, and costs of customer premise equipment.

*Year Ended March 31, 2017 compared to Year Ended March 31, 2016*

Costs of services decreased \$276 million, or 14%, for the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to lower international voice volume and rates, combined with lower access expense as the result of savings initiatives and declining voice and IP rate and volumes. Service gross margin percentage decreased from 18% in the year ended March 31, 2016 to 17% in the year ended March 31, 2017.

*Year Ended March 31, 2016 compared to Year Ended March 31, 2015*

Costs of services increased \$376 million, or 16%, for the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to international voice volume and rates, combined with lower access expense as the result of savings initiatives and declining voice and IP rate and volumes. Service gross margin percentage increased from 17% in the year ended March 31, 2015 to 18% in the year ended March 31, 2016.

Table of Contents***Selling, General and Administrative Expense******Year Ended March 31, 2017 compared to Year Ended March 31, 2016***

Selling, general and administrative expense decreased \$90 million, or 27%, in the year ended March 31, 2017 compared to the year ended March 31, 2016 primarily due to a decrease in shared administrative and employee-related costs required to support the Wireline segment as a result of the decline in revenue. Total selling, general and administrative expense as a percentage of net services revenue was 12% in the year ended March 31, 2017 compared to 14% in the year ended March 31, 2016.

***Year Ended March 31, 2016 compared to Year Ended March 31, 2015***

Selling, general and administrative expense decreased \$35 million, or 10%, in the year ended March 31, 2016 compared to the year ended March 31, 2015 primarily due to a decrease in shared administrative and employee-related costs required to support the Wireline segment as a result of the decline in revenue. Total selling, general and administrative expense as a percentage of net services revenue was 14% in the year ended March 31, 2016 compared to 13% in the year ended March 31, 2015.

**LIQUIDITY AND CAPITAL RESOURCES****Cash Flow**

	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Net cash provided by operating activities	\$ 4,168	\$ 3,897	\$ 2,450
Net cash used in investing activities	\$ (9,225)	\$ (5,735)	\$ (4,714)
Net cash provided by financing activities	\$ 5,286	\$ 469	\$ 1,304

***Operating Activities***

Net cash provided by operating activities of \$4.2 billion in the year ended March 31, 2017 increased \$271 million from the same period in 2016. This increase was primarily due to lower vendor and labor-related payments of \$1.6 billion, which were primarily due to reduced operating costs resulting from the Company's ongoing cost reduction initiatives, partially offset by \$1.1 billion of decreased cash received from customers primarily due to lower net advances on our Accounts Receivable Facility (Receivables Facility) prior to the February 2017 amendment, as described below in *Accounts Receivable Facility*. Also, during the year ended March 31, 2017, we had increased interest payments of \$254 million primarily due to the Network Equipment Sale-Leaseback, the unsecured financing facility, the Spectrum Financing transaction and the Receivables Facility.

Net cash provided by operating activities of \$3.9 billion in the year ended March 31, 2016 increased \$1.4 billion from the same period in 2015. This increase was due to lower vendor and labor-related payments of \$2.2 billion, which were primarily due to reduced operating costs, partially offset by reduced cash received from customers of \$669 million. The reduction in cash received from customers was driven by the \$2.4 billion decrease in net operating revenues primarily due to lower average revenue per subscriber, which was offset by the \$1.5 billion increase in operating cash flows resulting from the net changes in accounts and notes receivables and DPP during the year ended March 31, 2016 compared to the same period in 2015. In addition, we had increased interest payments of \$125 million primarily associated with \$1.5 billion aggregate principal amount of notes issued in February 2015.

***Investing Activities***

Net cash used in investing activities in the year ended March 31, 2017 increased by \$3.5 billion compared to the same period in 2016 primarily due to increased net purchases of short-term investments of \$5.6 billion. This increase was offset by decreased network and other capital expenditures of approximately \$2.7 billion and decreased purchases of \$844 million of leased devices from indirect dealers. The decreased purchases of leased devices from indirect dealers was partially offset by \$477 million of repurchased devices due to the termination of the Handset Sale-Leaseback Tranche 1.

Net cash used in investing activities in the year ended March 31, 2016 increased by approximately \$1.0 billion compared to the same period in 2015 primarily due to increased purchases of \$1.7 billion of leased devices from indirect dealers and decreased net proceeds from sales and maturities of short-term investments of \$2.7 billion. These increases were partially offset by \$1.1 billion of proceeds from MLS under the Handset Sale-Leaseback Tranche 1 transaction, \$1.8 billion in decreased purchases of short-term investments and decreased network and other capital expenditures of \$742 million.

Table of Contents***Financing Activities***

Net cash provided by financing activities was \$5.3 billion during the year ended March 31, 2017, which was primarily due to cash receipts of \$2.2 billion, \$1.1 billion, \$3.5 billion and \$4.0 billion from the Network Equipment Sale-Leaseback, Handset Sale-Leaseback Tranche 2, Spectrum Financing and the secured term loan, respectively. These receipts were partially offset by repayments of \$654 million, \$375 million, \$300 million and \$416 million for the Handset Sale-Leaseback Tranche 2, secured equipment credit facilities, Network Equipment Sale-Leaseback and Receivables Facility, respectively. We also retired \$2.0 billion in principal amount of Sprint Communications, Inc. 6% senior notes due 2016, \$1.0 billion in principal amount of Sprint Communications, Inc. 9.125% senior notes due 2017, \$300 million principal amount of Clearwire Communications LLC 14.75% secured notes due 2016, and repaid \$250 million of the EDC credit facility. In addition, we paid a total of \$358 million in debt finance costs for the unsecured financing facility, Network Equipment Sale-Leaseback, Spectrum Financing transaction, the secured term loan and secured revolving bank credit facility.

Net cash provided by financing activities was \$469 million during the year ended March 31, 2016, which was primarily due to sales of future lease receivables through our accounts receivables facility of \$600 million and draws of \$208 million, \$266 million and \$32 million on our Finnvera plc (Finnvera), K-sure and Delcredere | Ducroire (D/D) secured equipment credit facilities, respectively and a \$250 million draw on the Export Development Canada (EDC) credit facility. These draws were partially offset by repayments related to our secured equipment credit facilities of \$315 million, capital lease repayments of \$84 million, and a \$500 million repayment of the EDC credit facility.

Net cash provided by financing activities was \$1.3 billion during the year ended March 31, 2015, which was primarily due to the February 24, 2015 issuance of \$1.5 billion aggregate principal amount of 7.625% notes due 2025. In addition, we amended our unsecured Export Development Canada (EDC) agreement to, among other things, add an additional tranche totaling \$300 million due 2019, which was fully drawn as of March 31, 2015. These were partially offset by principal payments on the iPCS, Inc. Second Lien Secured Floating Rate Notes due 2014 of approximately \$181 million and scheduled principal payments on our secured equipment credit facilities of approximately \$282 million.

***Working Capital***

We had working capital of \$1.7 billion as of March 31, 2017 and negative working capital of \$5.1 billion as of March 31, 2016. The change in working capital was primarily the result of \$5.3 billion of net cash provided by financing activities as described above. In addition, the February 2017 amendment to the Receivables Facility, as described below in *Accounts Receivable Facility*, resulted in the derecognition of the DPP which caused a \$1.2 billion net increase to working capital. The remaining balance was due to changes to other working capital items.

**Long-Term Debt, Other Funding Sources and Scheduled Maturities**

Our device leasing and installment billing programs require a greater use of operating cash flows in the earlier part of the device contracts as our subscribers will generally pay less upfront than a traditional subsidy program. The Accounts Receivable Facility and the Handset Sale-Leaseback transactions described below were designed in large part to mitigate the significant use of cash from purchasing devices from OEMs to fulfill our installment billing and leasing programs.

***Accounts Receivable Facility******Transaction overview***

Our Receivables Facility provides us the opportunity to sell certain wireless service receivables, installment receivables, and future amounts due from customers who lease certain devices from us to unaffiliated third parties (the Purchasers). The maximum funding limit under the Receivables Facility is \$4.3 billion. While we have the right to decide how much cash to receive from each sale, the maximum amount of cash available to us varies based on a number of factors and currently represents approximately 50% of the total amount of the eligible receivables sold to the Purchasers. As of March 31, 2017, the total amount available to be drawn was \$826 million. The Receivables Facility was amended in November 2016 to, among other things, reallocate the Purchasers' commitments between wireless service, installment and future lease receivables to 33%, 39% and 28%, respectively. The amendment was in response to changing trends in the financing methods selected by customers. In February 2017, the Receivables Facility was amended to extend the maturity date to November 2018. Additionally, Sprint gained effective control over the receivables transferred to the Purchasers by obtaining the right under certain circumstances, to repurchase them. Subsequent to the February 2017 amendment, all proceeds received from the Purchasers in exchange for the transfer of our wireless service and installment receivables are recorded as borrowings and all cash inflows and outflows under the Receivables Facility are reported as financing activities in the consolidated statements of cash flows. As a result of the amendment, there was a non-cash derecognition of the DPP asset totaling \$1.5 billion, along with corresponding increases to "Accounts and notes receivable, net" of \$2.6 billion, "Other

Table of Contents

assets" of \$563 million and "Long-term debt, financing and capital lease obligations" of \$1.7 billion. During the year ended March 31, 2017 and subsequent to the February 2017 amendment, we elected to receive \$100 million of cash and also remitted \$161 million of funds to the Purchasers because the amount of cash proceeds received by us under the facility exceeded the maximum funding limit, which were reported as financing activities in the consolidated statements of cash flows.

Prior to the February 2017 amendment, wireless service and installment receivables sold to the Purchasers were treated as a sale of financial assets and we derecognized these receivables, as well as the related allowances, and recognized the net proceeds received in cash provided by operating activities in the consolidated statements of cash flows. The total proceeds from the sale of these receivables were comprised of a combination of cash and a DPP. The DPP was realized by us upon either the ultimate collection of the underlying receivables sold to the Purchasers or upon Sprint's election to receive additional advances in cash from the Purchasers subject to the total availability under the Receivables Facility. The fees associated with these sales were recognized in "Selling, general and administrative" in the consolidated statements of operations through the date of the February 2017 amendment. Subsequent to the February 2017 amendment, the sale of wireless service and installment receivables are reported as financings, which is consistent with our historical treatment for the sale of future lease receivables, and the associated fees are recognized as "Interest expense" in the consolidated statements of operations.

*Transaction Structure*

Sprint contributes certain wireless service, installment and future lease receivables as well as the associated leased devices to Sprint's wholly-owned consolidated bankruptcy-remote special purpose entities (SPEs). At Sprint's direction, the SPEs have sold, and will continue to sell, wireless service, installment and future lease receivables to Purchasers or to a bank agent on behalf of the Purchasers. Leased devices will remain with the SPEs, once sales are initiated, and continue to be depreciated over their estimated useful life. At March 31, 2017, wireless service and installment receivables contributed to the SPEs and included in "Accounts and notes receivable, net" in the consolidated balance sheets were \$2.9 billion and the long-term portion of installment receivables included in "Other assets" in the consolidated balance sheets was \$569 million. As of March 31, 2017, the net book value of devices contributed to the SPEs was approximately \$3.1 billion.

Each SPE is a separate legal entity with its own separate creditors who will be entitled, prior to and upon the liquidation of the SPE, to be satisfied out of the SPE's assets prior to any assets in the SPE becoming available to Sprint. Accordingly, the assets of the SPE are not available to pay creditors of Sprint or any of its affiliates (other than any other SPE), although collections from these receivables in excess of amounts required to repay the advances, yield and fees of the Purchasers and other creditors of the SPEs may be remitted to Sprint during and after the term of the Receivables Facility.

Sales of eligible receivables by the SPEs generally occur daily and are settled on a monthly basis. Sprint pays a fee for the drawn and undrawn portions of the Receivables Facility. A subsidiary of Sprint services the receivables in exchange for a monthly servicing fee, and Sprint guarantees the performance of the servicing obligations under the Receivables Facility.

*DPP*

Prior to the February 2017 amendment, the DPP was classified as a trading security within "Prepaid expenses and other current assets" in the consolidated balance sheets and was recorded at its estimated fair value. Subsequent to the February 2017 amendment, the Receivables Facility is accounted for as a financing and therefore the DPP is no longer recorded as a separate asset. The DPP related to our wireless service and installment receivables was \$1.2 billion as of March 31, 2016. The fair value of the DPP was estimated using a discounted cash flow model, which relies principally on unobservable inputs such as the nature and credit class of the sold receivables and subscriber payment history, and, for installment receivables sold, the estimated timing of upgrades and upgrade payment amounts for those with upgrade options. Changes in the fair value of the DPP did not have a material impact on our consolidated statements of operations for the years ended March 31, 2017 and 2016.

During the year ended March 31, 2017, prior to the February 2017 amendment, we remitted \$270 million of funds to the Purchasers because the amount of cash proceeds received by us under the facility exceeded the maximum funding limit, which increased the total amount of the DPP due to Sprint. We also elected to receive \$625 million of cash, which decreased the total amount of the DPP due to Sprint. In addition, during the year ended March 31, 2017, prior to the February 2017 amendment, sales of new receivables exceeded cash collections on previously sold receivables such that the DPP increased by \$644 million.

Table of Contents***Handset Sale-Leasebacks***

In December 2015 and May 2016, we sold certain iPhone® devices being leased by our customers to MLS, a company formed by a group of equity investors, including SoftBank Group Corp. (SoftBank), and then subsequently leased the devices back. Under the agreements, Sprint generally maintains the customer leases, continues to collect and record lease revenue from the customer and remits monthly rental payments to MLS during the leaseback periods.

Under the agreements, Sprint contributed the devices and the associated customer leases to wholly-owned consolidated bankruptcy-remote special purpose entities of Sprint (SPE Lessees). The SPE Lessees then sold the devices and transferred certain specified customer lease end rights and obligations, such as the right to receive the proceeds from customers who elect to purchase the device at the end of the customer lease term, to MLS in exchange for a combination of cash and DPP. Settlement for the DPP occurs near the end of the agreement and can be reduced to the extent that MLS experiences a loss on the device (either not returned or sold at an amount less than the expected residual value of the device), but only to the extent of the device's DPP balance. In the event that MLS sells the devices returned from our customers at a price greater than the expected device residual value, Sprint has the potential to share some of the excess proceeds.

The SPE Lessees retain all rights to the underlying customer leases, such as the right to receive the rental payments during the device leaseback period, other than the aforementioned certain specified customer lease end rights. Each SPE Lessee is a separate legal entity with its own separate creditors who will be entitled, prior to and upon the liquidation of the SPE Lessee, to be satisfied out of the SPE Lessee's assets prior to any assets in the SPE Lessee becoming available to Sprint. Accordingly, the assets of the SPE Lessee are not available to pay creditors of Sprint or any of its affiliates. The SPE Lessees are obligated to pay the full monthly rental payments under each device lease to MLS regardless of whether our customers make lease payments on the devices leased to them or whether the customer lease is canceled. Sprint has guaranteed to MLS the performance of the agreements and undertakings of the SPE Lessees under the transaction documents.

***Handset Sale-Leaseback Tranche 1 (Tranche 1)***

In December 2015, Sprint transferred devices with a net book value of approximately \$1.3 billion to MLS in exchange for proceeds totaling \$1.1 billion and a DPP of \$126 million. We recorded the sale, removed the device from our balance sheet, and classified the leasebacks as operating leases. The difference between the fair value and the net book value of the devices sold was recognized as a loss on disposal of property, plant and equipment in the amount of \$65 million and was included in "Other, net" in the consolidated statements of operations for the year ended March 31, 2016. The cash proceeds received in the transaction were reflected as cash provided by investing activities in the consolidated statements of cash flows and payments made to MLS under the leaseback are reflected as "Cost of products" in the consolidated statements of operations. Rent expense related to MLS totaled \$494 million and \$277 million during the years ended March 31, 2017 and 2016, respectively, and is reflected within cash flows from operations. In December 2016, Sprint terminated Tranche 1 by repurchasing the devices and related customer lease end rights and obligations from MLS for consideration of \$375 million of net cash payments and the DPP of \$126 million. As a result of the transaction, Sprint recorded \$477 million of property, plant and equipment, \$16 million of other assets, and was released from certain liabilities. Additionally, the leaseback was canceled and there will be no future rental payments owed to MLS related to Tranche 1. The impact to the consolidated statements of operations as a result of the termination was immaterial.

***Handset Sale-Leaseback Tranche 2 (Tranche 2)***

In May 2016, Sprint transferred devices with a net book value of approximately \$1.3 billion to MLS in exchange for cash proceeds totaling \$1.1 billion and a DPP of \$186 million. Unlike Tranche 1, Tranche 2 was accounted for as a financing. Accordingly, the devices remain in "Property, plant and equipment, net" in the consolidated balance sheets and we continue to depreciate the assets to their estimated residual values over the respective customer lease terms. At March 31, 2017, the net book value of devices transferred to MLS was approximately \$575 million.

The proceeds received are reflected as cash provided by financing activities in the consolidated statements of cash flows and payments made to MLS will be reflected as principal repayments and interest expense. We have elected to account for the financing obligation at fair value. Accordingly, changes in the fair value of the financing obligation are recognized in "Other (expense) income, net" in the consolidated statements of operations over the course of the arrangement.

Tranche 2 primarily includes devices from our iPhone Forever Program, whereas these devices were specifically excluded from Tranche 1. The iPhone Forever Program provides our leasing customers the ability to upgrade their devices and to enter into a new lease agreement, subject to certain conditions, upon Apple's release of a next generation device. Upon a customer exercising their iPhone Forever upgrade right, Sprint has the option to terminate the existing leaseback by immediately remitting all unpaid device leaseback payments and returning the device to MLS. Alternatively, Sprint has the option to transfer the title in the new device to MLS in exchange for the title in the original device (Exchange Option). If

Table of Contents

Sprint elects the Exchange Option, we are required to continue to pay existing device leaseback rental related to the original device, among other requirements.

To address the introduction of the upgrade feature into the sale-leaseback structure, among other factors, numerous contractual terms from Tranche 1 were modified, which shifted certain risks of ownership in the devices away from MLS to Sprint and resulted in Tranche 2 being accounted for as a financing. For instance, the device leaseback periods are generally longer in Tranche 2 as compared to Tranche 1, and the resulting amounts committed to be paid by the Company represent the initial proceeds received from MLS plus interest. This mitigates MLS's exposure to certain risks for non-returned and damaged devices, as well as to declines in device residual values.

***Network Equipment Sale-Leaseback***

In April 2016, Sprint sold and leased back certain network equipment to unrelated bankruptcy-remote special purpose entities (collectively, "Network LeaseCo"). The network equipment was used as collateral to raise approximately \$2.2 billion in borrowings from external investors, including SoftBank. Sprint's payments to Network LeaseCo during the leaseback period are used by Network LeaseCo to service debt.

Network LeaseCo is a variable interest entity for which Sprint is the primary beneficiary. As a result, Sprint is required to consolidate Network LeaseCo and our consolidated financial statements include Network LeaseCo's debt and the related financing cash inflows. The network assets included in the transaction, which had a net book value of approximately \$3.0 billion and consisted primarily of equipment located at cell towers, remain on Sprint's consolidated financial statements and continue to be depreciated over their respective estimated useful lives. At March 31, 2017, these network assets had a net book value of approximately \$2.4 billion.

The proceeds received were reflected as cash provided by financing activities in the consolidated statements of cash flows and payments made by Network LeaseCo are reflected as principal repayments and interest expense over the respective terms. Sprint has the option to purchase the equipment at the end of the leaseback term for a nominal amount. All intercompany transactions between Network LeaseCo and Sprint are eliminated in our consolidated financial statements. Principal and interest payments on the borrowings from the external investors will be repaid in staggered, unequal payments through January 2018. The first principal payment of \$300 million was made in March 2017 with the remaining \$1.9 billion of principal payments due in fiscal year 2017.

***Spectrum Financing***

In October 2016, Sprint transferred certain directly held and third-party leased spectrum licenses (collectively, "Spectrum Portfolio") to wholly-owned bankruptcy-remote special purpose entities (collectively, "Spectrum Financing SPEs"). The Spectrum Portfolio, which represents approximately 14% of Sprint's total spectrum holdings on a MHz-pops basis, was used as collateral to raise an initial \$3.5 billion in senior secured notes at 3.36% per annum from external investors under a \$7.0 billion program. Sprint can utilize this financing structure to potentially raise up to an additional \$3.5 billion subject to certain conditions. The notes will be repaid over a five-year term, with interest-only payments over the first four quarters and amortizing quarterly principal payments thereafter commencing in December 2017 through September 2021.

Sprint Communications, Inc. simultaneously entered into a long-term lease with the Spectrum Financing SPEs for the ongoing use of the Spectrum Portfolio. Sprint Communications, Inc. is required to make monthly lease payments to the Spectrum Financing SPEs at a market rate. Those lease payments are sufficient to service the senior secured notes. As the Spectrum Financing SPEs are wholly-owned Sprint subsidiaries, these entities are consolidated and all intercompany activity has been eliminated.

***Credit Facilities******Secured Term Loan and Revolving Bank Credit Facility***

On February 3, 2017, we entered into a new credit agreement for \$6.0 billion, consisting of a \$4.0 billion, seven-year secured term loan that matures in February 2024 and a \$2.0 billion secured revolving bank credit facility that expires in February 2021. The bank credit facility requires a ratio (Leverage Ratio) of total indebtedness to trailing four quarters earnings before interest, taxes, depreciation and amortization and other non-recurring items, as defined by the bank credit facility (adjusted EBITDA), not to exceed 6.0 to 1.0 through the quarter ending December 31, 2017. After December 31, 2017, the Leverage Ratio declines on a scheduled basis until the ratio becomes fixed at 3.5 to 1.0 for the fiscal quarter ended March 31, 2020 and each fiscal quarter ending thereafter through expiration of the facility. The term loan has an interest rate equal to LIBOR plus 250 basis points and the secured revolving bank credit facility has an interest rate equal to LIBOR plus a spread that varies depending on the Leverage Ratio. The secured revolving bank credit facility replaced the \$3.3 billion unsecured revolving bank credit facility that was due to expire in February 2018.

Table of Contents*Export Development Canada (EDC) agreement*

On February 3, 2017, we amended the EDC agreement to provide for security and covenant terms similar to our secured term loan and revolving bank credit facility. However, under the terms of the EDC agreement, repayments of outstanding amounts cannot be redrawn. In March 2017, the Company repaid \$250 million of aggregate principal of its outstanding Tranche 4 secured loan due December 15, 2017. As of March 31, 2017, the total principal amount of our borrowings under the EDC facility was \$300 million.

**Secured equipment credit facilities***Eksportkreditnamnden (EKN)*

During the year ended March 31, 2017 we made principal repayments totaling \$254 million on the facility, resulting in the total repayment of the principal amount at March 31, 2017. The facility has expired in accordance with its terms.

*Finnvera plc (Finnvera)*

The Finnvera secured equipment credit facility provides for the ability to borrow up to \$800 million to finance network-related purchases from Nokia Solutions and Networks US LLC, USA. The facility has one tranche remaining and available for borrowing through October 2017. Such borrowings are contingent upon the amount and timing of Sprint's network-related purchases. During the year ended March 31, 2017, we made principal repayments totaling \$56 million, resulting in a total principal amount of \$140 million outstanding at March 31, 2017.

*K-sure*

The K-Sure secured equipment credit facility provides for the ability to borrow up to \$750 million to finance network-related purchases from Samsung Telecommunications America, LLC. The facility can be divided in up to three consecutive tranches of varying size with borrowings available until May 2018, contingent upon the amount of network-related purchases made by Sprint. During the year ended March 31, 2017, we made principal repayments totaling \$65 million on the facility, resulting in a total principal amount of \$259 million outstanding at March 31, 2017.

*Delcredere | Ducroire (D/D)*

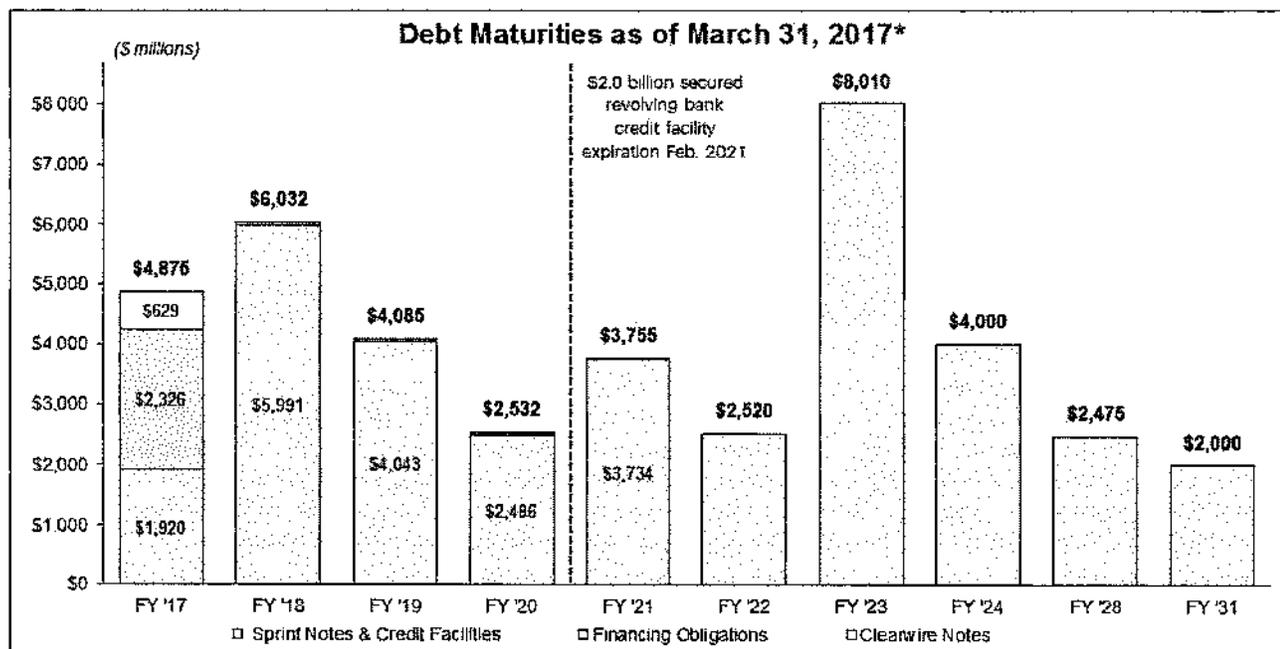

The D/D secured equipment credit facility provides for the ability to borrow up to \$250 million to finance network equipment-related purchases from Alcatel-Lucent USA Inc. The principal balance outstanding at March 31, 2017 was \$32 million.

Borrowings under the Finnvera, K-sure and D/D secured equipment credit facilities are each secured by liens on the respective equipment purchased pursuant to each of the facility's credit agreement. In addition, repayments of outstanding amounts borrowed under the secured equipment credit facilities cannot be redrawn. Each of these facilities is fully and unconditionally guaranteed by both Sprint Communications, Inc. and Sprint Corporation.

As of March 31, 2017, our Leverage Ratio, as defined by our secured revolving bank credit facility was 3.9 to 1.0. Because our Leverage Ratio exceeded 2.5 to 1.0 at period end, we were restricted from paying cash dividends.

Table of Contents

The following graph depicts our future fiscal year principal maturities of debt as of March 31, 2017:

\*This table excludes (i) our \$2.0 billion secured revolving bank credit facility, which will expire in 2021 and has no outstanding balance, (ii) \$215 million in letters of credit outstanding under the secured revolving bank credit facility, (iii) \$540 million of capital leases and other obligations, and (iv) net premiums and debt financing costs.

### Liquidity and Capital Resources

As of March 31, 2017, our liquidity, including cash and cash equivalents, short-term investments, available borrowing capacity under our secured revolving bank credit facility and availability under our Receivables Facility was \$10.9 billion. Our cash and cash equivalents and short-term investments totaled \$8.3 billion as of March 31, 2017 compared to \$2.6 billion as of March 31, 2016. As of March 31, 2017, we had approximately \$1.8 billion of borrowing capacity available under our secured revolving bank credit facility. Amounts available under our Receivables Facility as of March 31, 2017 totaled \$826 million.

In addition, we had a combined available borrowing capacity of \$1.2 billion under our Finnvera, K-sure and D/D secured equipment credit facilities as of March 31, 2017. However, utilization of these facilities is dependent upon the amount and timing of network-related purchases from the applicable suppliers, as well as the period of time remaining to complete any further borrowings available under each facility.

We offer two device financing programs which allow subscribers to forgo traditional service contracts and pay less upfront for devices in exchange for lower monthly service fees, early upgrade options, or both. While a majority of the revenue associated with the installment sales program is recognized at the time of sale along with the related cost of products, lease revenue associated with our leasing program is recorded monthly over the term of the lease and the cost of the device is depreciated to its estimated residual value generally over the lease term, which creates a positive impact to Wireless segment earnings. If the mix of leased devices continues to increase, we expect this positive impact on the financial results of Wireless segment earnings to continue and depreciation expense to increase. The installment billing and leasing programs will continue to require a greater use of operating cash flows in the earlier part of the contracts as the subscriber will generally pay less upfront than the traditional subsidy program because they are financing the device. The Receivables Facility and our relationship with MLS were established as mechanisms to mitigate the use of cash from purchasing devices from OEMs to fulfill our installment billing and leasing programs.

To meet our liquidity requirements, we look to a variety of sources. In addition to our existing cash and cash equivalents, short-term investments, and cash generated from operating activities, we raise funds as necessary from external sources. We rely on the ability to issue debt and equity securities, the ability to access other forms of financing, including

Table of Contents

debt financing, some of which is secured by our assets, proceeds from the sale of certain accounts receivable and future lease receivables, proceeds from future sale-leaseback transactions, such as spectrum, and equipment, and the borrowing capacity available under our credit facilities to support our short- and long-term liquidity requirements. We believe our existing available liquidity and cash flows from operations will be sufficient to meet our funding requirements over the next twelve months, including debt service requirements and other significant future contractual obligations.

To maintain an adequate amount of available liquidity and execute our current business plan, which includes, among other things, network deployment and maintenance, subscriber growth, data usage capacity needs and the expected achievement of a cost structure intended to improve profitability and to meet our long-term debt service requirements and other significant future contractual obligations, we will need to continue to raise additional funds from external sources. Possible future financing sources include, among others, additional receivables financing transactions and raising additional funds through spectrum-backed notes. In addition, we are pursuing extended payment terms and increased facilities with certain vendors. If we are unable to obtain external funding, execute on our cost reduction initiatives, or are not successful in attracting valuable subscribers such as postpaid handset subscribers, our operations would be adversely affected, which may lead to defaults under certain of our borrowings.

Depending on the amount of any difference in actual results versus what we currently expect, it may make it difficult for us to generate sufficient earnings before interest, taxes, depreciation and amortization and other non-recurring items (adjusted EBITDA) to remain in compliance with our financial covenants or be able to meet our debt service obligations, which could result in acceleration of our indebtedness, or adversely impact our ability to raise additional funding through the sources described above, or both. If such events occur, we may engage with our lenders to obtain appropriate waivers or amendments of our credit facilities or refinance borrowings, or seek funding from other external sources, although there is no assurance we would be successful in any of these actions.

A default under certain of our borrowings could trigger defaults under certain of our other financing obligations, which in turn could result in the maturities being accelerated. Certain indentures and other agreements governing our financing obligations require compliance with various covenants, including covenants that limit the Company's ability to sell certain of its assets, limit the Company and its subsidiaries' ability to incur indebtedness and liens, and require that we maintain certain financial ratios, each as defined by the terms of the indentures, related supplemental indentures and other agreements.

In determining our expectation of future funding needs in the next twelve months and beyond, we have made several assumptions regarding:

- projected revenues and expenses relating to our operations, including those related to our installment billing and leasing programs, along with the success of initiatives such as our expectations of achieving a more competitive cost structure through cost reduction initiatives and increasing our postpaid handset subscriber base;
- cash needs related to our installment billing and leasing programs;
- availability under the Receivables Facility, which terminates in November 2018;
- availability of our secured revolving bank credit facility, which expires in February 2021, less outstanding letters of credit;
- remaining availability of approximately \$1.2 billion of our secured equipment credit facilities for eligible capital expenditures, and any corresponding principal, interest and fee payments;
- scheduled principal payments on debt, credit facilities and financing obligations, including approximately \$21.3 billion coming due over the next five fiscal years;
- raising additional funds from external sources;
- the expected use of cash and cash equivalents in the near-term;
- anticipated levels and timing of capital expenditures, including assumptions regarding lower unit costs, network capacity additions and upgrades, and the deployment of new technologies in our networks, FCC license acquisitions, and purchases of leased devices from our indirect dealers;
- any additional contributions we may make to our pension plan;
- estimated residual values of devices related to our device lease program;
- finalization of our tender offers, which we expect to close in June 2017, to purchase for cash up to an aggregate principal amount of \$1.7 billion of our 9.000% Guaranteed Notes due in 2018 and our 8.375% Notes due in 2017; and
- other future contractual obligations and general corporate expenditures.

Table of Contents**CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

Sprint applies those accounting policies that management believes best reflect the underlying business and economic events, consistent with U.S. GAAP. Sprint's more critical accounting policies include estimated economic lives and residual values of property, plant and equipment, valuation and recoverability of long-lived assets and evaluation of goodwill and indefinite-lived assets for impairment. Inherent in such policies are certain key assumptions and estimates made by management. Management regularly updates its estimates used in the preparation of the financial statements based on its latest assessment of the current and projected business and general economic environment. Sprint's significant accounting policies and estimates are summarized in the Notes to the Consolidated Financial Statements.

***Depreciation***

Our property, plant and equipment balance represents a significant component of our consolidated assets. We record property, plant and equipment at cost and generally depreciate it on a straight-line basis over the estimated useful life of the assets. We expect that a one-year increase in estimated useful lives of our property, plant and equipment, exclusive of leased devices, would result in a decrease to our fiscal year 2017 depreciation expense of \$850 million and that a one-year decrease would result in an increase of \$1.4 billion in our fiscal year 2017 depreciation expense.

***Leased Devices***

Our accounting for device leases involves specific determinations under applicable lease accounting standards. These determinations affect the timing of revenue recognition and the timing and classification of the related cost of the device. If a lease is classified as an operating lease, revenue is recognized ratably over the lease term and the leased asset is included in property, plant and equipment and depreciated to its estimated residual value generally over the lease term. If the lease is classified as a sales-type lease, equipment revenue is recognized at the inception of the lease with a corresponding charge to cost of product. If the lease is classified as a direct-financing lease, there is no related revenue or cost of products recorded and the net investment in a leased asset is reported. The critical elements that we consider in determining the classification of our leased devices are the economic life and the fair value of the device, including the estimated residual value. For the purposes of assessing the economic life of a device, we consider both internal and external datasets including, but not limited to, the length of time subscribers use our devices, sales trends post launch, and transactions in the secondary market as there is currently a significant after-market for used telecommunication devices.

At lease inception, devices classified as operating leases are reclassified from inventory to property, plant and equipment when leased through Sprint's direct channels. For those devices leased through indirect channels, which are classified as operating leases, we purchase the devices at lease inception from the dealer, which is then capitalized to property, plant and equipment. Residual values associated with devices under operating leases represent the estimated fair value at the end of the lease term. We review residual values regularly and, when appropriate, adjust them based on, among other things, estimates of expected market conditions at the end of the lease, including the impacts of future product launches. Adjustments to residual values of leased devices are recognized as a revision in depreciation estimates. We estimate that a 10% increase or decrease in the estimated residual values of devices under operating leases at March 31, 2017 would not have a material effect on depreciation expense over the next twelve months. Through March 31, 2017, the effects of changes in the estimated residual value of devices currently under operating leases have been immaterial.

***Valuation and Recoverability of Long-lived Assets***

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized if the carrying amount of a long-lived asset or asset group is not recoverable and exceeds its fair value. Long-lived asset groups have been determined based upon certain factors including assessing the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities. Impairment analyses, when performed, are based on our current business and technology strategy, views of growth rates for our business, anticipated future economic and regulatory conditions and expected technological availability.

During the years ended March 31, 2017 and 2016, no impairments were recorded. During the year ended March 31, 2015, we recorded an impairment loss of \$233 million, which is included in "Impairments" in our consolidated statements of operations, to reduce the carrying value of the Wireline asset group, which includes the Wireline long-lived assets, to its estimated fair value as of our testing date. The fair value of the Wireline long-lived assets was estimated using a market approach, which included significant unobservable inputs including liquidation curves, useful life assumptions, and scrap values. As the assumptions are largely unobservable, the estimate of fair value is considered to be unobservable within the fair value hierarchy.

Table of Contents

The determination of fair value requires considerable judgment and is highly sensitive to changes in underlying assumptions. While we believe our judgments and assumptions are reasonable, changes in future periods may impact our assumptions and lead to additional, future impairments.

*Evaluation of Goodwill and Indefinite-Lived Intangible Assets for Impairment*

As a result of the SoftBank Merger in July 2013, we recognized indefinite-lived assets at their acquisition-date estimates of fair value, including FCC licenses, goodwill, and trade names. All of the indefinite-lived assets, including goodwill, were allocated to our Wireless segment. As of March 31, 2017, the carrying values of these assets were \$36.6 billion, \$6.6 billion and \$4.0 billion, respectively.

Sprint evaluates the carrying value of our indefinite-lived assets, including goodwill, at least annually or more frequently whenever events or changes in circumstances indicate that the asset may be impaired, or in the case of goodwill, that the fair value of the reporting unit is below its carrying amount. During the quarter-ended March 31, 2017, the Company completed its annual impairment testing for goodwill, the Sprint and Boost Mobile trade names, and spectrum licenses using a qualitative evaluation. The results of the qualitative evaluation determine whether it is necessary to perform a quantitative test. If it is more likely than not that the asset may be impaired, or in the case of goodwill, that the fair value of a reporting unit is less than its carrying amount, we would be required to perform a quantitative test. As a result of our testing in the current period, we determined that it was not more likely than not that the fair value of each of our indefinite-lived intangible assets were less than their carrying values.

In performing the annual goodwill impairment test for the year ended March 31, 2016, we estimated the fair value of the Wireless reporting unit using income-based, market-based and asset-based valuation models. The determination of the fair value of the reporting unit requires significant estimates and assumptions, including significant unobservable inputs. The key inputs included, but were not limited to, discount rates, terminal growth rates, control premiums, market multiple data from selected guideline public companies, management's internal forecasts which include numerous assumptions such as share of industry gross additions, churn, mix of plans, rate changes, operating and capital expenditures and EBITDA margins, among others. Changes in certain assumptions or management's failure to execute on the current plan could have a significant impact to the estimated fair value of the Wireless reporting unit. Under the income-based approach, we note that our fair value cushion was in excess of 10% of the carrying value in regards to the annual impairment test for the year ended March 31, 2016.

We estimated the fair value of the Sprint and Boost Mobile trade names assigned to the Wireless segment using the relief-from-royalty method, which uses several significant assumptions, including management projections of future revenue, a royalty rate, a long-term growth rate and a discount rate. As these assumptions are largely unobservable, the estimate of fair value is considered to be unobservable within the fair value hierarchy. Changes in certain assumptions can have a significant effect on the estimated fair value. For both the Sprint and Boost Mobile trade names, we note that a 5% decrease in revenue across the long-term plans would not have resulted in an impairment in regards to the annual impairment test for the year ended March 31, 2016. Additionally, the Company has seen significant market pressures in recent periods that has contributed to a loss of Boost Mobile subscribers for the fiscal year ended March 31, 2017. The Boost Mobile trade name may be subject to future impairments if the Company continues to incur Boost Mobile subscriber losses, is unable to meet future revenue projections, or future revenue projections are markedly lower in prospective periods. There can be no assurance that future revenue projections will be sufficient to avoid future impairments.

During the year ended March 31, 2015, we determined that recoverability of the carrying amount of goodwill and the Sprint trade name should be evaluated for impairment and it was determined that the carrying value of the Sprint trade name exceeded its estimated fair value of \$3.3 billion. Accordingly, during the year ended March 31, 2015 we recorded an impairment loss of \$1.9 billion, which is included in "Impairments" in our consolidated statements of operations.

The determination of fair value requires considerable judgment and is highly sensitive to changes in underlying assumptions and execution of management's plan. Consequently, there can be no assurance that the estimates and assumptions made for the purposes of the goodwill, spectrum and trade name impairment tests will prove to be an accurate prediction of the future. Sustained declines in the Company's operating results, number of wireless subscribers, future forecasted cash flows, growth rates and other assumptions, as well as significant, sustained declines in the Company's stock price and related market capitalization could impact the underlying key assumptions and our estimated fair values, potentially leading to a future material impairment of goodwill or other indefinite-lived intangible assets.

Table of Contents**NEW ACCOUNTING PRONOUNCEMENTS**

See *Note 2. Summary of Significant Accounting Policies and Other Information*, in Notes to the Consolidated Financial Statements in Item 8. of Part II of this Annual Report on Form 10-K, for a full description of new accounting pronouncements, including the expected dates of adoption and estimated effects on financial condition and results of operations, which are hereby incorporated by reference.

**FINANCIAL STRATEGIES***General Risk Management Policies*

Our board of directors has adopted a financial risk management policy that authorizes us to enter into derivative transactions, and all transactions comply with the policy. We do not purchase or hold any derivative financial instruments for speculative purposes with the exception of equity rights obtained in connection with commercial agreements or strategic investments, usually in the form of warrants to purchase common shares.

Derivative instruments are primarily used for hedging and risk management purposes. Hedging activities may be done for various purposes, including, but not limited to, mitigating the risks associated with an asset, liability, committed transaction or probable forecasted transaction. We seek to minimize counterparty credit risk through credit approval and review processes, credit support agreements, continual review and monitoring of all counterparties, and thorough legal review of contracts. Exposure to market risk is controlled by regularly monitoring changes in hedge positions under normal and stress conditions to ensure they do not exceed established limits.

**OTHER INFORMATION**

We routinely post important information on our website at [www.sprint.com/investors](http://www.sprint.com/investors). Information contained on or accessible through our website is not part of this annual report.

**FORWARD-LOOKING STATEMENTS**

We include certain estimates, projections and other forward-looking statements in our annual, quarterly and current reports, and in other publicly available material. Statements regarding expectations, including performance assumptions and estimates relating to capital requirements, as well as other statements that are not historical facts, are forward-looking statements.

These statements reflect management's judgments based on currently available information and involve a number of risks and uncertainties that could cause actual results to differ materially from those in the forward-looking statements. With respect to these forward-looking statements, management has made assumptions regarding, among other things, subscriber and network usage, subscriber growth and retention, technologies, products and services, pricing, operating costs, the timing of various events, and the economic and regulatory environment.

Future performance cannot be assured. Actual results may differ materially from those in the forward-looking statements. Some factors that could cause actual results to differ include:

- our ability to obtain additional financing, including monetizing certain of our assets, including those under our existing or future programs to monetize a portion of our network or spectrum holdings, or to modify the terms of our existing financing, on terms acceptable to us, or at all;
- our ability to continue to receive the expected benefits of our existing financings such as receivable financings;
- our ability to retain and attract subscribers and to manage credit risks associated with our subscribers;
- the ability of our competitors to offer products and services at lower prices due to lower cost structures or otherwise;
- the effective implementation of our plans to improve the quality of our network, including timing, execution, technologies, costs, and performance of our network;
- failure to improve subscriber churn, bad debt expense, accelerated cash use, costs and write-offs, including with respect to changes in expected residual values related to any of our service plans, including installment billing and leasing programs;

Table of Contents

- the ability to generate sufficient cash flow to fully implement our plans to improve and enhance the quality of our network and service plans, improve our operating margins, implement our business strategies, and provide competitive new technologies;
- the effects of vigorous competition on a highly penetrated market, including the impact of competition on the prices we are able to charge subscribers for services and devices we provide and on the geographic areas served by our network;
- the impact of installment sales and leasing of handsets; the impact of increased purchase commitments; the overall demand for our service plans, including the impact of decisions of new or existing subscribers between our service offerings; and the impact of new, emerging, and competing technologies on our business;
- our ability to provide the desired mix of integrated services to our subscribers;
- our ability to continue to access our spectrum and acquire additional spectrum capacity;
- changes in available technology and the effects of such changes, including product substitutions and deployment costs and performance;
- volatility in the trading price of our common stock, current economic conditions, and our ability to access capital, including debt or equity;
- the impact of various parties not meeting our business requirements, including a significant adverse change in the ability or willingness of such parties to provide service and products, including distribution, or infrastructure equipment for our network;
- the costs and business risks associated with providing new services and entering new geographic markets;
- the effects of any future merger or acquisition involving us, as well as the effect of mergers, acquisitions, and consolidations, and new entrants in the communications industry, and unexpected announcements or developments from others in our industry;
- our ability to comply with restrictions imposed by the U.S. Government as a condition to our merger with SoftBank;
- the effects of any material impairment of our goodwill or other indefinite-lived intangible assets;
- the impacts of new accounting standards or changes to existing standards that the FASB or other regulatory agencies issue, including the SEC;
- unexpected results of litigation filed against us or our suppliers or vendors;
- the costs or potential customer impact of compliance with regulatory mandates including, but not limited to, compliance with the FCC's Report and Order to reconfigure the 800 MHz band and government regulation regarding "net neutrality";
- equipment failure, natural disasters, terrorist acts or breaches of network or information technology security;
- one or more of the markets in which we compete being impacted by changes in political, economic, or other factors such as monetary policy, legal and regulatory changes, or other external factors over which we have no control;
- the impact of being a "controlled company" exempt from many corporate governance requirements of the NYSE; and
- other risks referenced from time to time in this report and other filings of ours with the SEC.

The words "may," "could," "should," "estimate," "project," "forecast," "intend," "expect," "anticipate," "believe," "target," "plan" and similar expressions are intended to identify forward-looking statements. Forward-looking statements are found throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this report. Readers are cautioned that other factors, although not listed above, could also materially affect our future performance and operating results. The reader should not place undue reliance on forward-looking statements, which speak only as of the date of this report. We are not obligated to publicly release any revisions to forward-looking statements to reflect events after the date of this report, including unforeseen events.

Table of Contents**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

We are primarily exposed to the market risk associated with unfavorable movements in interest rates, foreign currencies, and equity prices. The risk inherent in our market risk sensitive instruments and positions is the potential loss arising from adverse changes in those factors.

**Interest Rate Risk**

The communications industry is a capital-intensive, technology-driven business. We are subject to interest rate risk primarily associated with our borrowings. Interest rate risk is the risk that changes in interest rates could adversely affect earnings and cash flows. Specific interest rate risk includes: the risk of increasing interest rates on variable rate debt and the risk of increasing interest rates for planned new fixed rate long-term financings or refinancings. Occasionally we may enter into derivative agreements such as interest rate caps and swaps to manage some of our variable interest rate exposure. As of March 31, 2017, we entered into a five-year fixed-for-floating interest rate swap on a \$2.0 billion notional amount that has been designated as a cash flow hedge and is intended to reduce some of our exposure to rising interest rates by hedging variable interest costs related to 50% of our \$4.0 billion secured term loan.

Approximately 83% of our debt as of March 31, 2017 was fixed-rate debt. While changes in interest rates impact the fair value of this debt, there is no impact to earnings and cash flows because we intend to hold these obligations to maturity unless market and other conditions are favorable.

We perform interest rate sensitivity analyses on our variable-rate debt. These analyses indicate that a one percentage point change in interest rates would have had an annual pre-tax impact of \$62 million on our consolidated statements of operations and cash flows for the year ended March 31, 2017. We also perform a sensitivity analysis on the fair market value of our outstanding debt. A 10% decline in market interest rates is estimated to result in a \$941 million increase in the fair market value of our debt to \$44.2 billion.

**Foreign Currency Risk**

We may enter into forward contracts and options in foreign currencies to reduce the impact of changes in foreign exchange rates. Our foreign exchange risk management program focuses on reducing transaction exposure to optimize consolidated cash flow. We use foreign currency derivatives to hedge our foreign currency exposure related to settlement of international telecommunications access charges and the operation of our international subsidiaries. The dollar equivalent of our net foreign currency payables from international settlements was insignificant and the net foreign currency receivables from international operations was insignificant as of March 31, 2017. The potential immediate pre-tax loss to us that would result from a hypothetical 10% change in foreign currency exchange rates based on these positions would be insignificant.

**Item 8. Financial Statements and Supplementary Data**

The consolidated financial statements required by this item begin on page F-1 of this annual report on Form 10-K and are incorporated herein by reference.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures****Evaluation of Disclosure Controls and Procedures**

Disclosure controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports under the Securities Exchange Act of 1934 (Exchange Act), such as this annual report on Form 10-K, is reported in accordance with the SEC's rules. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

In connection with the preparation of this annual report on Form 10-K, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective as of March 31, 2017 in providing reasonable assurance that information required to be disclosed in reports we file or submit under the Exchange Act is accumulated and communicated to management,

Table of Contents

including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure and in providing reasonable assurance that the information is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

**Management's Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to our management and board of directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes.

Our management conducted an assessment of the effectiveness of our internal control over financial reporting as of March 31, 2017. This assessment was based on the criteria set forth by *Internal Control—Integrated Framework*, issued in 2013 by the Committee of Sponsoring Organizations. Management believes that, as of March 31, 2017, our internal control over financial reporting was effective.

Internal controls over our financial reporting continue to be updated as necessary to accommodate modifications to our business processes and accounting procedures. There have been no changes in our internal control over financial reporting that occurred during the quarter ended March 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our independent registered public accounting firm has issued a report on the effectiveness of our internal control over financial reporting. This report appears on page F-2.

**Item 9B. Other Information*****Disclosure of Iranian Activities under Section 13(r) of the Exchange Act***

Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 added Section 13(r) to the Securities Exchange Act of 1934. Section 13(r) requires an issuer to disclose in its annual or quarterly reports, as applicable, whether it or any of its affiliates knowingly engaged in certain activities, including, among other matters, transactions or dealings relating to the government of Iran. Disclosure is required even where the activities, transactions or dealings are conducted outside the U.S. by non-U.S. affiliates in compliance with applicable law, and whether or not the activities are sanctionable under U.S. law.

After the SoftBank Merger, SoftBank acquired control of Sprint. During the fiscal year ended March 31, 2017, SoftBank, through one of its non-U.S. subsidiaries, provided roaming services in Iran through Telecommunications Services Company (MTN Irancell), which is or may be a government-controlled entity. During the fiscal year ended March 31, 2017, SoftBank had no gross revenues from such services and no net profit was generated. This subsidiary also provided telecommunications services in the ordinary course of business to accounts affiliated with the Embassy of Iran in Japan. During the fiscal year ended March 31, 2017, SoftBank estimates that gross revenues and net profit generated by such services were both under \$9,400. Sprint was not involved in, and did not receive any revenue from, any of these activities. These activities have been conducted in accordance with applicable laws and regulations, and they are not sanctionable under U.S. or Japanese law. Accordingly, with respect to Telecommunications Services Company (MTN Irancell), the relevant SoftBank subsidiary intends to continue such activities. With respect to services provided to accounts affiliated with the Embassy of Iran in Japan, the relevant SoftBank subsidiary is obligated under contract to continue such services.

In addition, during the fiscal year ended March 31, 2017, SoftBank, through one of its non-U.S. indirect subsidiaries, provided office supplies to the Embassy of Iran in Japan. SoftBank estimates that gross revenue and net profit generated by such services were under \$5,300 and \$1,030, respectively. Sprint was not involved in, and did not receive any revenue from any of these activities. Accordingly, the relevant SoftBank subsidiary intends to continue such activities.

Table of Contents**PART III****Item 10. Directors, Executive Officers and Corporate Governance**

The information required by this item regarding our directors is incorporated by reference to the information set forth under the captions "Proposal 1. - Election of Directors" "Board Operations—Board Committees" in our proxy statement relating to our 2017 annual meeting of stockholders, which will be filed with the SEC, and with respect to family relationships, to Part I of this annual report under "Executive Officers of the Registrant." The information required by this item regarding our executive officers is incorporated by reference to Part I of this annual report under the caption titled "Executive Officers of the Registrant." The information required by this item regarding compliance with Section 16(a) of the Exchange Act by our directors, executive officers and holders of ten percent of a registered class of our equity securities is incorporated by reference to the information set forth under the caption "Security Ownership—Section 16(a) Beneficial Ownership Reporting Compliance" in our proxy statement relating to our 2017 annual meeting of stockholders, which will be filed with the SEC.

We have adopted the Sprint Corporation Code of Conduct, which applies to all of our directors, officers and employees. The Code of Conduct is publicly available on our website at <http://www.sprint.com/governance>. If we make any material amendment to our Code of Conduct, or if we grant any waiver from a provision of the Code of Conduct that applies to our principal executive officer, principal financial officer, principal accounting officer or controller, we will disclose the nature of the amendment or waiver on our website at the same location. Also, we may elect to disclose the amendment or waiver in a current report on Form 8-K filed with the SEC.

**Item 11. Executive Compensation**

The information required by this item regarding compensation of executive officers and directors is incorporated by reference to the information set forth under the captions "Director Compensation," "Executive Compensation," and "Board Operations—Compensation Committee Interlocks and Insider Participation" in our proxy statement relating to our 2017 annual meeting of stockholders, which will be filed with the SEC.

**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**

The information required by this item, other than the equity compensation plan information presented below, is incorporated by reference to the information set forth under the captions "Security Ownership—Security Ownership of Certain Beneficial Owners" and "Security Ownership—Security Ownership of Directors and Executive Officers" in our proxy statement relating to our 2017 annual meeting of stockholders, which will be filed with the SEC.

**Compensation Plan Information**

Currently we sponsor two active equity incentive plans, the 2015 Amended and Restated Omnibus Incentive Plan (2015 Plan) and our Employee Stock Purchase Plan (ESPP). We also sponsor the 2007 Omnibus Incentive Plan (2007 Plan) and the 1997 Long-Term Incentive Program (1997 Program). All outstanding options under the Nextel Incentive Equity Plan (Nextel Plan) expired in fiscal year 2015. Under the 2015 Plan, we may grant stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units and other equity-based and cash awards to our employees, outside directors and certain other service providers. Our board of directors, or one or more committees, will determine the terms of each award. No new grants can be made under the 2007 Plan or the 1997 Program.

Table of Contents

The following table provides information about the shares of common stock that may be issued upon exercise of awards as of March 31, 2017.

Plan Category	Number of Securities To be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
	(a)	(b)	(c)
Equity compensation plans approved by stockholders of common stock	120,440,328	\$4.57	211,161,529

- (1) Includes 11,825,982 shares covered by options and 71,761,210 restricted stock units under the 2015 Plan, 25,353,304 shares covered by options and 10,952,022 restricted stock units under the 2007 Plan, and 25,835 restricted stock units outstanding under the 1997 Program. Also includes purchase rights to acquire 521,975 shares of common stock accrued at March 31, 2017 under the ESPP. Under the ESPP, each eligible employee may purchase common stock at quarterly intervals at a purchase price per share equal to 85% of the market value on the last business day of the offering period.
- (2) Included in the total of 120,440,328 shares are 10,952,022 restricted stock units under the 2007 Plan, which will be counted against the 2007 Plan maximum in a 2.5 to 1 ratio.
- (3) The weighted average exercise price does not take into account the shares of common stock issuable upon vesting of restricted stock units issued under the 1997 Program, the 2007 Plan or the 2015 Plan. These restricted stock units have no exercise price. The weighted average purchase price also does not take into account the 521,975 shares of common stock issuable as a result of the purchase rights accrued under the ESPP; the purchase price of these shares was \$7.32 for each share.
- (4) Of these shares, 139,992,111 shares of common stock were available under the 2015 Plan. Through March 31, 2017, 171,358,126 cumulative shares came from the 2007 Plan, the 1997 Program and predecessor plans, including the Nextel Plan.
- (5) Includes 71,169,418 shares of common stock available for issuance under the ESPP after issuance of the 521,975 shares purchased in the quarter ended March 31, 2017 offering. See note 1 above.
- (6) No new awards may be granted under the 2007 Plan or the 1997 Program.

#### Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item is incorporated by reference to the information set forth under the captions "Certain Relationships and Related Party Transactions" and "Board Operations—Independence of Directors" in our proxy statement relating to our 2017 annual meeting of stockholders, which will be filed with the SEC.

#### Item 14. Principal Accounting Fees and Services

The information required by this item is incorporated by reference to the information set forth under the caption "Principal Accounting Fees and Services" in our proxy statement relating to our 2017 annual meeting of stockholders, which will be filed with the SEC.

The Board of Directors and Stockholders of  
Sprint Corporation  
Overland Park, Kansas

We have audited the accompanying consolidated balance sheets of Sprint Corporation and subsidiaries (the "Company") as of March 31, 2017 and 2016, and the related consolidated statements of operations, comprehensive loss, cash flows and stockholders' equity for each of the three years in the period ended March 31, 2017. We also have audited the Company's internal control over financial reporting as of March 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Sprint Corporation and subsidiaries as of March 31, 2017 and 2016, and the related results of their operations and their cash flows for each of the three years in the period ended March 31, 2017, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**Note 1. Description of Operations**

Sprint Corporation, including its consolidated subsidiaries, is a communications company offering a comprehensive range of wireless and wireline communications products and services that are designed to meet the needs of individual consumers, businesses, government subscribers and resellers.

The Wireless segment includes retail, wholesale, and affiliate service revenue from a wide array of wireless voice and data transmission services and equipment revenue from the sale or lease of wireless devices and the sale of accessories in the U.S., Puerto Rico and the U.S. Virgin Islands. The Wireline segment includes revenue from domestic and international wireline data communication services in addition to voice, data and IP communication services provided to our Wireless segment.

On July 10, 2013, SoftBank Corp., which subsequently changed its name to SoftBank Group Corp., and certain of its wholly-owned subsidiaries (together, "SoftBank") completed the merger (SoftBank Merger) with Sprint Nextel as contemplated by the Agreement and Plan of Merger, dated as of October 15, 2012 (as amended, the Merger Agreement) and the Bond Purchase Agreement, dated as of October 15, 2012 (as amended, the Bond Agreement). As a result of the SoftBank Merger, Starburst II, Inc. (Starburst II) became the parent company of Sprint Nextel. Immediately thereafter, Starburst II changed its name to Sprint Corporation and Sprint Nextel changed its name to Sprint Communications, Inc. (Sprint Communications). As a result of the completion of the SoftBank Merger in which SoftBank acquired an approximate 78% interest in Sprint Corporation, and subsequent open market stock purchases, SoftBank owned approximately 83% of the outstanding common stock of Sprint Corporation as of March 31, 2017.

**Note 2. Summary of Significant Accounting Policies and Other Information**

**Basis of Consolidation and Estimates**

The consolidated financial statements include our accounts, those of our 100% owned subsidiaries, and subsidiaries we control or in which we have a controlling financial interest. All intercompany transactions and balances have been eliminated in consolidation.

The consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States (U.S. GAAP). This requires management of the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements. Significant estimates and assumptions are used for, but are not limited to, allowance for doubtful accounts, estimated economic lives and residual values of property, plant and equipment, fair value of identified purchased tangible and intangible assets in a business combination and fair value assessments for purposes of impairment testing.

Certain prior period amounts have been reclassified to conform to the current period presentation.

***Change in Estimate***

When estimating the value of returned inventory, we evaluate many factors and obtain information to support the estimated value of used devices and their useful lives. During the year ended March 31, 2015, we observed sustained value and extended useful lives for handsets leading to an increase in the estimated value for returned inventory. As a result, we revised our methodology and assumptions used in estimating the value for returned handsets during the year ended March 31, 2015.

The change in estimate was accounted for on a prospective basis. The effect of the change in estimate, which was included in "Cost of products" in our consolidated statements of operations, reduced our operating loss by approximately \$80 million, or \$0.02 per basic and diluted share, for the year ended March 31, 2015.

**Summary of Significant Accounting Policies**

***Cash and Cash Equivalents***

Cash equivalents generally include highly liquid investments with maturities at the time of purchase of three months or less. These investments may include money market funds, certificates of deposit, U.S. government and government-sponsored debt securities, corporate debt securities, municipal securities, bank-related securities, and credit and debit card transactions in process. The carrying amounts approximate fair value.

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*****Short-Term Investments***

Short-term investments generally include time deposits and commercial paper with terms greater than three months but less than one year at the date of purchase. The carrying amounts are recorded at amortized cost and approximate fair value. The interest earned is recognized in the consolidated statements of operations over the contractual term of the short-term investments.

***Installment Receivables***

The carrying value of installment receivables approximates fair value because the receivables are recorded at their present value, net of the deferred interest and allowance for credit losses. At the time of the installment sale, we impute interest on the installment receivable and record it as a reduction to revenue and as a reduction to the face amount of the related receivable. Interest income is recognized over the term of the installment contract in service revenue.

We categorize our installment receivables as prime and subprime based upon subscriber credit profiles and as unbilled, billed-current and billed-past due based upon the age of the receivable. We use proprietary scoring systems that measure the credit quality of our receivables using several factors, such as credit bureau information, subscriber credit risk scores and service plan characteristics. Payment history is subsequently monitored to further evaluate credit profiles. Prime subscriber receivables are those with lower delinquency risk and subprime subscriber receivables are those with higher delinquency risk. Subscribers within the subprime category may be required to make a down payment on their device and accessory purchases. Installment receivables for which invoices have not yet generated for the customer are considered unbilled. Installment receivables for which invoices have been generated but which are not past the contractual due date are considered billed-current. Installment receivables for which invoices have been generated and the payment is approximately ten days past the contractual due date are considered billed-past due. Account balances are written-off if collection efforts are unsuccessful and future collection is unlikely based on the length of time from the day accounts become past due.

***Allowance for Doubtful Accounts***

An allowance for doubtful accounts is established to cover probable and reasonably estimable losses. Because of the number of subscriber accounts, it is not practical to review the collectability of each of those accounts individually to determine the amount of allowance for doubtful accounts each period, although some account level analysis is performed with respect to large wireless and wireline subscribers. The estimate of allowance for doubtful accounts considers a number of factors, including collection experience, aging of the remaining accounts receivable portfolios, credit quality of the subscriber base and other qualitative considerations, including macro-economic factors. Account balances are written off if collection efforts are unsuccessful and future collection is unlikely based on the length of time from the day accounts become past due. Amounts written off against the allowance for doubtful accounts, net of recoveries and other adjustments, were \$371 million, \$612 million, and \$752 million for the years ended March 31, 2017, 2016, and 2015, respectively. See *Note 4. Installment Receivables* for additional information as it relates to the allowance for doubtful accounts specifically attributable to installment receivables.

***Device and Accessory Inventory***

Inventories are stated at the lower of cost or market. Cost is determined by the first-in, first-out (FIFO) method. The Company sells wireless devices separately or in conjunction with a service contract. A device sold with a service contract may be sold below cost, as any promotional discounts on the device are expected to be recovered through the service contract.

The net realizable value of devices and other inventory is analyzed on a regular basis. This analysis includes assessing obsolescence, sales forecasts, product life cycle, marketplace and other considerations. If assessments regarding the above factors adversely change, we may sell devices at higher prices or record a write-down to inventory for obsolete or slow-moving items prior to the point of sale.

***Property, Plant and Equipment***

Property, plant and equipment (PP&E), including improvements that extend useful lives, are recognized at cost. Depreciation on PP&E is generally calculated using the straight-line method based on estimated economic useful lives of 3 to 30 years for buildings and improvements and network equipment, site costs and related software and 3 to 12 years for non-network internal use software, office equipment and other. Leasehold improvements are depreciated over the shorter of the

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

lease term or the estimated useful life of the respective assets. Leased devices are depreciated using the straight-line method to their estimated residual value generally over the term of the lease. We calculate depreciation on certain network assets using the group life method. Accordingly, ordinary asset retirements and disposals on those assets are charged against accumulated depreciation with no gain or loss recognized. Gains or losses associated with all other asset retirements or disposals are recognized in "Other, net" in the consolidated statements of operations. Depreciation rates for assets are revised periodically to account for changes, if any, related to management's strategic objectives, technological changes, changes in estimated residual values, or obsolescence. Changes in our estimates will result in adjustment to depreciation prospectively over the estimated useful lives of our non-leased assets and over the remaining period of benefit for devices leased to our customers. Repair and maintenance costs and research and development costs are expensed as incurred.

We capitalize costs for network and non-network software developed or obtained for internal use during the application development stage. These costs are included in PP&E and, when the software is placed in service, are depreciated over estimated useful lives of three to five years. Costs incurred during the preliminary project and post-implementation stage, as well as maintenance and training costs, are expensed as incurred.

***Long-Lived Asset Impairment***

Sprint evaluates long-lived assets, including intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. Asset groups are determined at the lowest level for which identifiable cash flows are largely independent of cash flows of other groups of assets and liabilities. When the carrying amount of a long-lived asset group is not recoverable and exceeds its fair value, an impairment loss is recognized equal to the excess of the asset group's carrying value over the estimated fair value. See *Note 6. Property, Plant and Equipment* for additional information on long-lived asset impairments.

Certain assets that have not yet been deployed in the business, including network equipment, cell site development costs and software in development, are periodically assessed to determine recoverability. Network equipment and cell site development costs are expensed whenever events or changes in circumstances cause the Company to conclude the assets are no longer needed to meet management's strategic network plans and will not be deployed. Software development costs are expensed when it is no longer probable that the software project will be deployed. Network equipment that has been removed from the network is also periodically assessed to determine recoverability. If we experience significant operational challenges, including retaining and attracting subscribers, future cash flows of the Company may not be sufficient to recover the carrying value of our wireless asset group, and we could record asset impairments that are material to Sprint's consolidated results of operations and financial condition.

***Indefinite-Lived Intangible Assets***

Our indefinite-lived intangible assets primarily consist of goodwill, certain of our trademarks and FCC licenses. Goodwill represents the excess of consideration paid over the estimated fair value of the net tangible and identifiable intangible assets acquired in business combinations. In determining whether an intangible asset, other than goodwill, is indefinite-lived, we consider the expected use of the assets, the regulatory and economic environment within which they are being used, and the effects of obsolescence on their use. We assess our indefinite-lived intangible assets, including goodwill, for impairment at least annually or, if necessary, more frequently, whenever events or changes in circumstances indicate the asset may be impaired.

These analyses, which include the determination of fair value, require considerable judgment and are highly sensitive to changes in underlying assumptions. Consequently, there can be no assurance that the estimates and assumptions made for the purposes of estimating the fair values of our indefinite-lived assets, including goodwill, will prove to be an accurate prediction of the future. Sustained declines in the Company's operating results, number of wireless subscribers, forecasted future cash flows, growth rates and other assumptions, as well as significant, sustained declines in the Company's stock price and related market capitalization could impact the underlying key assumptions and our estimated fair values, potentially leading to a future material impairment of goodwill or other indefinite-lived intangible assets. See *Note 7. Intangible Assets* for additional information on indefinite-lived intangible asset impairments.

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS*****Derivatives and Hedging***

The Company uses derivative instruments to hedge its exposure to interest rate risks arising from operating and financing activities. In accordance with its risk management policies, the Company does not hold or issue derivative instruments for trading or speculative purposes.

Derivatives are recognized in the consolidated balance sheets at their fair values. When the Company becomes a party to a derivative instrument and intends to apply hedge accounting, it formally documents the hedge relationship and the risk management objective for undertaking the hedge which includes designating the instrument for financial reporting purposes as a fair value hedge, a cash flow hedge, or a net investment hedge. The accounting for changes in fair value of a derivative instrument depends on whether the Company had designated it in a qualifying hedging relationship and further, on the type of hedging relationship. At March 31, 2017, the Company only held and applied hedge accounting for derivatives designated as cash flow hedges.

Changes in the fair value of a derivative not designated in a hedging relationship are recognized in the consolidated statements of operations along with the ineffective portions of changes in the fair value of derivatives designated in hedging relationships.

The effective portion of changes in the fair value of a derivative designated as a cash flow hedge is recorded in "Other comprehensive income (loss)" in the consolidated statements of comprehensive loss and reclassified into earnings in the period or periods during which the hedged item affects earnings.

For derivative instruments designated as hedges, the Company assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. Highly effective means that cumulative changes in the fair value of the derivative are between 80% and 125% of the cumulative changes in the fair value of the hedged item. In addition, when the Company determines that a derivative is not highly effective as a hedge, hedge accounting is discontinued. When it is probable that a hedged forecasted transaction will not occur, the Company discontinues hedge accounting for the affected portion of the forecasted transaction, and reclassifies any gains or losses in "Accumulated other comprehensive loss" to earnings in the consolidated statements of operations. When a derivative in a hedge relationship is terminated or the hedged item is sold, extinguished or terminated, hedge accounting is discontinued prospectively.

***Benefit Plans***

We provide a defined benefit pension plan and other postretirement benefits to certain employees, and we sponsor a defined contribution plan for all employees.

In June 2014, the Company's Board of Directors approved a plan amendment to the Sprint Retirement Pension Plan (the Plan) to offer certain terminated participants, who had not begun to receive Plan benefits, the opportunity to voluntarily elect to receive their benefits as an immediate lump sum distribution. Upon expiration of the election period and completion of cash payments on November 28, 2014, the lump sum distribution, totaling approximately \$560 million, created a settlement event that resulted in a \$59 million charge, which is reflected in "Other, net" in the consolidated statements of operations, and a reduction in the projected benefit obligation of approximately \$300 million, impacted by the settlement as well as a change in the mortality tables and a change in the discount rate used to estimate the projected benefit obligation.

As of March 31, 2017 and 2016, the fair value of our pension plan assets and certain other postretirement benefit plan assets in aggregate was \$1.4 billion and \$1.3 billion, respectively, and the fair value of our projected benefit obligations in aggregate was \$2.2 billion in each period. As a result, the plans were underfunded by approximately \$800 million and \$900 million as of March 31, 2017 and 2016, respectively, and were recorded as a net liability in our consolidated balance sheets. Estimated contributions totaling approximately \$50 million are expected to be paid during the fiscal year 2017.

The offset to the pension liability is recorded in equity as a component of "Accumulated other comprehensive loss," net of tax, including \$35 million, \$29 million, and \$393 million for the years ended March 31, 2017, 2016, and 2015, respectively, which is amortized to "Selling, general and administrative" in our consolidated statements of operations. The change in the net liability of the Plan in the year ended March 31, 2017 was affected by the higher than expected actual rate of return on Plan assets experienced during the year. There was no change in the discount rate used to estimate the projected benefit obligation during the year ended March 31, 2017. The change in the net liability of the Plan in the year ended March 31, 2016 was affected by a change in the discount rate used to estimate the projected benefit obligation, increasing from 4.2%

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

for the year ended March 31, 2015 to 4.3% for the year ended March 31, 2016, combined with a \$9 million prior service credit resulting from an amendment to one of the other postretirement benefit plans during 2015. The change in the net liability of the Plan in the year ended March 31, 2015 was affected by the impact of the settlement event on the projected benefit obligation combined with a change in the discount rate used to estimate the projected benefit obligation, decreasing from 4.9% for the three-month transition period ended March 31, 2014 to 4.2% for the year ended March 31, 2015. We intend to make future cash contributions to the Plan in an amount necessary to meet minimum funding requirements according to applicable benefit plan regulations.

As of December 31, 2005, the Plan was amended to freeze benefit plan accruals for participants. The objective for the investment portfolio of the pension plan is to achieve a long-term nominal rate of return, net of fees, which exceeds the plan's long-term expected rate of return on investments for funding purposes which was 7.75% for the years ended March 31, 2017 and 2016. To meet this objective, our investment strategy for the year ended March 31, 2017 was governed by an asset allocation policy, whereby a targeted allocation percentage is assigned to each asset class as follows: 38% to U.S. equities; 16% to international equities; 28% to fixed income investments; 9% to real estate investments; and 9% to other investments including hedge funds. Actual allocations are allowed to deviate from target allocation percentages within a range for each asset class as defined in the investment policy. The long-term expected rate of return on investments for funding purposes is 7.5% for the year ended March 31, 2018.

Investments of the Plan are measured at fair value on a recurring basis which is determined using quoted market prices or estimated fair values. As of March 31, 2017, 34% of the investment portfolio was valued at quoted prices in active markets for identical assets; 48% was valued using quoted prices for similar assets in active or inactive markets, or other observable inputs; and 18% was valued using unobservable inputs that are supported by little or no market activity, the majority of which used the net asset value per share (or its equivalent) as a practical expedient to measure the fair value.

Under our defined contribution plan, participants may contribute a portion of their eligible pay to the plan through payroll withholdings. For the year ended March 31, 2017 and the three-month period ended March 31, 2016, the Company matched 50% of the participants' pre-tax and Roth contribution (in aggregate) on the first 4% of eligible compensation. For the nine-month period ended December 31, 2015 and the year ended March 31, 2015, the Company matched 100% of the participants' pre-tax and Roth contribution (in aggregate) on the first 3% of eligible compensation and 50% of the participants' pre-tax and Roth contribution (in aggregate) on the next 2% of eligible compensation up to a maximum matching contribution of 4%. Fixed matching contributions totaled approximately \$28 million, \$54 million, and \$71 million for the years ended March 31, 2017, 2016, and 2015, respectively.

***Revenue Recognition***

Operating revenues primarily consist of wireless service revenues, revenues generated from device and accessory sales, revenues from leasing a device, revenues from wholesale operators and third-party affiliates, as well as long distance voice, data and Internet revenues. Service revenues consist of fixed monthly recurring charges, variable usage charges and miscellaneous fees such as directory assistance, roaming, equipment protection, late payment and early termination charges, interest, and certain regulatory related fees, net of service credits and other adjustments. We generally recognize service revenues as services are rendered, assuming all other revenue recognition criteria are met. We recognize revenue for access charges and other services charged at fixed amounts ratably over the service period, net of credits and adjustments for service discounts, billing disputes and fraud or unauthorized usage. As a result of the cutoff times of our multiple billing cycles each month, we are required to estimate the amount of subscriber revenues earned but not billed from the end of each billing cycle to the end of each reporting period. These estimates are based primarily on rate plans in effect and our historical usage and billing patterns. Regulatory fees and costs are recorded gross. The largest component of the regulatory fees is the Universal Service Fund, which represented no more than 2% of net operating revenues for all periods presented in the consolidated statements of operations.

We recognize equipment revenue and corresponding costs of equipment when title and risk of loss passes to the indirect dealer or end-use subscriber, assuming all other revenue recognition criteria are met. For arrangements involving multiple deliverables such as equipment and service, revenue is allocated to the deliverables based on their relative selling prices. Equipment revenue is limited to the amount of non-contingent consideration received when the device is sold to a subscriber. Equipment revenue is also reduced by the estimated amount of imputed interest associated with installment receivables for subscribers who elect to finance the purchase of a device for up to a 24-month period. When we subsidize the

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

cost of the device as an incentive to retain and acquire subscribers, the cost of these incentives is recorded as a reduction to revenue upon activation of the device and a service contract.

If a multiple-element arrangement includes an option to purchase, on a monthly basis, an annual trade-in right, the amount of the total arrangement consideration is reduced by the estimated fair value of the trade-in right or the guarantee and the remaining proceeds are then allocated amongst the other deliverables in the arrangement.

Qualified subscribers can lease a device for a contractual period of time. At the end of the lease term, subscribers have the option to turn in their device, continue leasing their device or purchase the device. Accounting for device leases involves specific determinations under applicable lease accounting standards, which involve complex and prescriptive provisions. These provisions impact the timing and amount of revenue recognized for our leased devices. The critical elements that are considered with respect to our lease accounting are the economic life of the device and the fair value of the device, including the residual value. We only lease devices to qualifying subscribers that also purchase a service plan. To date, substantially all of our device leases were classified as operating leases. Revenues under these arrangements are allocated amongst the deliverables in the multiple-element arrangement considering the relative fair values of the lease and non-lease elements. The amount allocable to the operating lease element is included within equipment revenue in the consolidated results of operations and is recognized ratably over the lease term, which is typically two years or less.

The accounting estimates related to the recognition of revenue require us to make assumptions about numerous factors such as future billing adjustments for disputes with subscribers, unauthorized usage, future returns, mail-in rebates on device sales, the fair value of a trade-in right and the total arrangement consideration.

***Dealer Commissions***

Cash consideration given by us to a dealer or end-use subscriber is presumed to be a reduction of equipment revenue unless we receive, or will receive, an identifiable benefit in exchange for the consideration, and the fair value of such benefit can be reasonably estimated, in which case the consideration will generally be recorded as a selling expense or a purchase of inventory. We compensate our dealers using specific compensation programs related to the sale of our devices and our subscriber service contracts, or both. When a commission is earned by a dealer solely due to a selling activity relating to wireless service, the cost is recorded as a selling expense. Commissions are generally earned upon sale of device, service, or both, to an end-use subscriber. Incentive payments to dealers for sales associated with devices and service contracts are classified as contra-revenue, to the extent the incentive payment is reimbursement of loss on the device, and selling expense for the amount associated with the selling effort. Incentive payments to certain indirect dealers who purchase devices from other sources, such as the original equipment manufacturer (OEM), are recognized as selling expense when the device is activated with a Sprint service plan because Sprint does not recognize any equipment revenue or cost of products for those transactions.

***Severance and Exit Costs***

Liabilities for severance and exit costs are recognized based upon the nature of the cost to be incurred. For involuntary separation plans that are completed within the guidelines of our written involuntary separation plan, a liability is recognized when it is probable and reasonably estimable. For voluntary separation plans (VSP), a liability is recognized when the VSP is irrevocably accepted by the employee. For one-time termination benefits, such as additional severance pay or benefit payouts, and other exit costs, such as lease termination costs, the liability is measured and recognized initially at fair value in the period in which the liability is incurred, with subsequent changes to the liability recognized as adjustments in the period of change. Severance and exit costs associated with business combinations are recorded in the results of operations when incurred.

***Compensation Plans***

As of March 31, 2017, Sprint sponsored three incentive plans: the 2015 Omnibus Incentive Plan (2015 Plan); the 2007 Omnibus Incentive Plan (2007 Plan); and the 1997 Long-Term Incentive Program (1997 Program)(together, "Compensation Plans"). Sprint also sponsors an Employee Stock Purchase Plan (ESPP). Under the 2015 Plan, we may grant share and non-share based awards, including stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units and other equity-based and cash awards to employees, outside directors and other eligible individuals as defined by the plan. As of March 31, 2017, the number of shares available and reserved for future

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

grants under the 2015 Plan and ESPP totaled approximately 211 million common shares. The Compensation Committee of our board of directors, or one or more executive officers should the Compensation Committee so authorize, as provided in the 2015 Plan, will determine the terms of each share and non-share based award. No new grants can be made under the 2007 Plan or the 1997 Program. We use new shares to satisfy share-based awards or treasury shares, if available.

The fair value of each option award is estimated on the grant date using the Black-Scholes option valuation model, based on several assumptions including the risk-free interest rate, volatility, expected dividend yield and expected term. During the year ended March 31, 2017, the Company granted approximately 12 million stock options with a weighted average grant date fair value of \$2.23 per share based upon assumptions of a risk free interest rate from 1.23% to 2.27%, expected volatility from 53.6% to 65.2%, expected dividend yield of 0% and expected term from 5.5 years to 6.5 years. In general, options are granted with an exercise price equal to the market value of the underlying shares on the grant date, vest on an annual basis over three years, and have a contractual term of ten years. As of March 31, 2017, 37 million options were outstanding, of which 17 million options were exercisable.

We generally determine the fair value of each restricted stock unit award based on the closing price of the Company's common stock on the date of grant. Restricted stock units generally have performance and service requirements or service requirements only with vesting periods ranging from one to three years. During the years ended March 31, 2017 and 2016, we also granted performance-based restricted stock units to executive and non-executive employees that are earned (Earned Shares) based upon the achievement of certain market conditions equal to specified volume-weighted average prices of the Company's common stock during regular trading on the New York Stock Exchange over any 150-day calendar period ending May 31, 2019 (Performance Period). Earned Shares will generally vest 50% over four years from the grant date and 50% over five years from the grant date, with continuous service required through each vesting date. As of March 31, 2017, the specified market criteria was achieved at a threshold price target qualifying for a 100% payout, however, the Earned Shares remain subject to the vesting requirements. The fair value of these market-based restricted stock units is estimated at the date of grant using a Monte Carlo valuation methodology, which incorporates into the valuation the possibility that the market condition may not be satisfied. For the year ended March 31, 2017, assumptions used in the Monte Carlo valuation model are consistent with those we use to value stock options and include a risk free interest rate from 1.20% to 1.92%, expected volatility from 53.6% to 70.8%, and expected dividend yield of 0%. The number of restricted stock units that ultimately vest can increase depending upon the future performance of the Company's common stock and the achievement of a higher threshold price target during the Performance Period, with a maximum payout of 120%. Compensation cost related to the share-based awards with market conditions is recognized regardless of the level of threshold price target achievement.

Employees and directors who are granted restricted stock units are not required to pay for the shares but generally must remain employed with us, or continue to serve as a member of our board of directors, until the restrictions lapse, which is typically three years for employees and one year for directors. Certain restricted stock units outstanding as of March 31, 2017, are entitled to dividend equivalents paid in cash, if dividends are declared and paid on common shares, but performance-based restricted stock units are not entitled to dividend equivalent payments until the applicable performance and service criteria have been met. During the year ended March 31, 2017, the Company granted approximately 55 million service only and performance-based restricted stock units, including those with market conditions, with a weighted average grant date fair value of \$5.64 per share. At March 31, 2017, approximately 77 million restricted stock unit awards were outstanding.

*Compensation Costs*

The cost of employee services received in exchange for share-based awards classified as equity is measured using the estimated fair value of the award on the date of the grant, and that cost is recognized over the period that the award recipient is required to provide service in exchange for the award. Awards of instruments classified as liabilities are measured at the estimated fair value at each reporting date through settlement.

Pre-tax share and non-share based compensation charges from our incentive plans included in net loss were \$93 million, \$75 million, and \$86 million for the years ended March 31, 2017, 2016, and 2015, respectively. The net income tax benefit recognized in the consolidated financial statements for share-based compensation awards was \$33 million, \$20 million, and \$34 million for the years ended March 31, 2017, 2016, and 2015, respectively. As of March 31, 2017, there was \$251 million of total unrecognized compensation cost related to non-vested incentive awards that are expected to be recognized over a weighted average period of 3.35 years.

Table of Contents

Index to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

***Advertising Costs***

We recognize advertising expense when incurred as selling, general and administrative expense. Advertising expenses totaled \$1.1 billion, \$1.3 billion, and \$1.5 billion for each of the years ended March 31, 2017, 2016, and 2015, respectively.

***Variable Interest Entities (VIE)***

VIEs are entities which lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, have equity investors which do not have the ability to make significant decisions relating to the entity's operations through voting rights, do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. A common type of VIE is a special purposes entity (SPE). SPEs are commonly used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. SPEs are generally structured to insulate investors from claims on the SPE's assets by creditors of other entities, including the creditors of the seller of the assets.

We are required to consolidate the assets and liabilities of VIEs when we are deemed to be the primary beneficiary. The primary beneficiary is the party which has the power to make the decisions that most significantly affect the economic performance of the VIE and has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

**New Accounting Pronouncements**

In May 2014, the FASB issued new authoritative literature, *Revenue from Contracts with Customers*, and has subsequently modified several areas of the standard in order to provide additional clarity and improvements. The issuance is part of a joint effort by the FASB and the International Accounting Standards Board (IASB) to enhance financial reporting by creating common revenue recognition guidance for U.S. GAAP and International Financial Reporting Standards and, thereby, improving the consistency of requirements, comparability of practices and usefulness of disclosures. The new standard will supersede much of the existing authoritative literature for revenue recognition. In July 2015, the FASB deferred the effective date of this standard. As a result, the standard and related amendments will be effective for the Company for its fiscal year beginning April 1, 2018, including interim periods within that fiscal year. Early application is permitted, but not before the original effective date of April 1, 2017.

Two adoption methods are available for implementation of the standard update related to the recognition of revenue from contracts with customers. Under one method, the guidance is applied retrospectively to contracts for each reporting period presented, subject to allowable practical expedients. Under the other method, the guidance is applied only to the most current period presented, recognizing the cumulative effect of the change as an adjustment to the beginning balance of retained earnings, and also requires additional disclosures comparing the results to the previous guidance.

The Company is currently evaluating the guidance, including which implementation approach will be applied. The ultimate impact on revenue resulting from the application of the new standard will be subject to assessments that are dependent on many variables, including, but not limited to, the terms and mix of the contractual arrangements we have with customers. Upon adoption, we expect that the allocation of revenue between equipment and service for our wireless fixed-term service plans will result in more revenue allocated to equipment and recognized earlier as compared with current GAAP. We expect the timing of recognition of our sales commission expenses will also be impacted, as a substantial portion of these costs (which are currently expensed) will be capitalized and amortized consistent with the transfer of the related good or service. We continue to evaluate the available transition methods. Our considerations include, but are not limited to, the comparability of our financial statements and the comparability within our industry from application of the new standard to our contractual arrangements.

We have established a cross-functional team to implement the standard update related to the recognition of revenue from contracts with customers. We have identified and are in the process of implementing changes to our systems, processes and internal controls to meet the updated standard's reporting and disclosure requirements. We expect this guidance to have a material impact on our consolidated financial statements.

In July 2015, the FASB issued authoritative guidance regarding *Inventory*, which simplifies the subsequent measurement of certain inventories by replacing today's lower of cost or market test with a lower of cost and net realizable value test. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

costs of completion, disposal, and transportation. The standard will be effective for the Company's fiscal year beginning April 1, 2017, including interim periods within that fiscal year. The Company does not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In January 2016, the FASB issued authoritative guidance regarding *Financial Instruments*, which amended guidance on the classification and measurement of financial instruments. Under the new guidance, entities will be required to measure equity investments that are not consolidated or accounted for under the equity method at fair value with any changes in fair value recorded in net income, unless the entity has elected the new practicability exception. For financial liabilities measured using the fair value option, entities will be required to separately present in other comprehensive income the portion of the changes in fair value attributable to instrument-specific credit risk. Additionally, the guidance amends certain disclosure requirements associated with the fair value of financial instruments. The standard will be effective for the Company's fiscal year beginning April 1, 2018, including interim reporting periods within that fiscal year. The Company does not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In February 2016, the FASB issued authoritative guidance regarding *Leases*. The new standard will supersede much of the existing authoritative literature for leases. This guidance requires lessees, among other things, to recognize right-of-use assets and liabilities on their balance sheet for all leases with lease terms longer than twelve months. The standard will be effective for the Company for its fiscal year beginning April 1, 2019, including interim periods within that fiscal year with early application permitted. Entities are required to use modified retrospective application for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements with the option to elect certain transition reliefs. The Company is currently evaluating the guidance and is still assessing the overall impact. However, we expect it to have a material impact on our consolidated financial statements.

In June 2016, the FASB issued authoritative guidance regarding *Financial Instruments - Credit Losses*, which requires entities to use a Current Expected Credit Loss impairment model based on expected losses rather than incurred losses. Under this model, an entity would recognize an impairment allowance equal to its current estimate of all contractual cash flows that the entity does not expect to collect from financial assets measured at amortized cost. The entity's estimate would consider relevant information about past events, current conditions and reasonable and supportable forecasts, which will result in recognition of lifetime expected credit losses. The standard will be effective for the Company's fiscal year beginning April 1, 2020, including interim reporting periods within that fiscal year, although early adoption is permitted. The Company does not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In October 2016, the FASB issued authoritative guidance regarding *Income Taxes*, which amended guidance for the income tax consequences of intra-entity transfers of assets other than inventory. Under the new guidance, entities will be required to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs, thereby eliminating the recognition exception within current guidance. The standard will be effective for the Company's fiscal year beginning April 1, 2018, including interim reporting periods within that fiscal year. The Company is currently evaluating the guidance and assessing the impact it will have on our consolidated financial statements.

In November 2016, the FASB issued authoritative guidance regarding *Statement of Cash Flows: Restricted Cash*, requiring that amounts generally described as restricted cash or restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The standard will be effective for the Company's fiscal year beginning April 1, 2018, including interim reporting periods within that fiscal year, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In January 2017, the FASB issued authoritative guidance amending *Business Combinations: Clarifying the Definition of a Business*, to clarify the definition of a business with the objective of providing a more robust framework to assist management when evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The standard will be effective for the Company for its fiscal year beginning April 1, 2018, including interim periods within that fiscal year, with early application permitted. The amendments are to be applied prospectively to business combinations that occur after the effective date.

In January 2017, the FASB issued authoritative guidance regarding *Intangibles - Goodwill and Other: Simplifying the Test for Goodwill Impairment*, which simplifies the goodwill impairment test by eliminating the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment charge (Step 2 of the test), but rather to record an

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

impairment charge based on the excess of the carrying value over its fair value. The standard will be effective for the Company's annual goodwill impairment test in the fiscal year beginning April 1, 2020, with early adoption permitted. The Company does not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

**Note 3. Funding Sources**

Our device leasing and installment billing programs require a greater use of operating cash flows in the earlier part of the device contracts as our subscribers will generally pay less upfront than a traditional subsidy program. The Accounts Receivable Facility and the Handset Sale-Leaseback transactions described below were designed in large part to mitigate the significant use of cash from purchasing devices from OEMs to fulfill our installment billing and leasing programs. We entered into the Network Equipment Sale-Leaseback transaction in April 2016 to sell and leaseback certain network equipment to unrelated bankruptcy-remote SPEs that provided \$2.2 billion in cash proceeds. In October 2016, we entered into a spectrum financing transaction whereby a portion of our spectrum holdings was used as collateral to issue \$3.5 billion in senior secured notes. In February 2017, we entered into a new credit agreement for \$6.0 billion, consisting of a \$4.0 billion, seven-year secured term loan that matures in February 2024 and a \$2.0 billion secured revolving bank credit facility that expires in February 2021.

**Accounts Receivable Facility***Transaction Overview*

Our Accounts Receivable Facility (Receivables Facility) provides us the opportunity to sell certain wireless service receivables, installment receivables, and future amounts due from customers who lease certain devices from us to unaffiliated third parties (the Purchasers). The maximum funding limit under the Receivables Facility is \$4.3 billion. While we have the right to decide how much cash to receive from each sale, the maximum amount of cash available to us varies based on a number of factors and currently represents approximately 50% of the total amount of the eligible receivables sold to the Purchasers. As of March 31, 2017, the total amount available to be drawn was \$826 million. The Receivables Facility was amended in November 2016 to, among other things, reallocate the Purchasers' commitments between wireless service, installment and future lease receivables to 33%, 39% and 28%, respectively. The amendment was in response to changing trends in the financing methods selected by customers. In February 2017, the Receivables Facility was amended to extend the maturity date to November 2018. Additionally, Sprint gained effective control over the receivables transferred to the Purchasers by obtaining the right, under certain circumstances, to repurchase them. Subsequent to the February 2017 amendment, all proceeds received from the Purchasers in exchange for the transfer of our wireless service and installment receivables are recorded as borrowings and all cash inflows and outflows under the Receivables Facility are reported as financing activities in the consolidated statements of cash flows. As a result of the amendment, there was a non-cash derecognition of the deferred purchase price receivable (DPP) asset totaling \$1.5 billion, along with corresponding increases to "Accounts and notes receivable, net" of \$2.6 billion, "Other assets" of \$563 million and "Long-term debt, financing and capital lease obligations" of \$1.7 billion. During the year ended March 31, 2017 and subsequent to the February 2017 amendment, we elected to receive \$100 million of cash and also remitted \$161 million of funds to the Purchasers because the amount of cash proceeds received by us under the facility exceeded the maximum funding limit, which were reported as financing activities in the consolidated statements of cash flows.

Prior to the February 2017 amendment, wireless service and installment receivables sold to the Purchasers were treated as a sale of financial assets and we derecognized these receivables, as well as the related allowances, and recognized the net proceeds received in cash provided by operating activities in the consolidated statements of cash flows. The total proceeds from the sale of these receivables were comprised of a combination of cash and a DPP. The DPP was realized by us upon either the ultimate collection of the underlying receivables sold to the Purchasers or upon Sprint's election to receive additional advances in cash from the Purchasers subject to the total availability under the Receivables Facility. The fees associated with these sales were recognized in "Selling, general and administrative" in the consolidated statements of operations through the date of the February 2017 amendment. Subsequent to the February 2017 amendment, the sale of wireless service and installment receivables are reported as financings, which is consistent with our historical treatment for the sale of future lease receivables, and the associated fees are recognized as "Interest expense" in the consolidated statements of operations.

Table of Contents

Index to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

***Transaction Structure***

Sprint contributes certain wireless service, installment and future lease receivables as well as the associated leased devices to Sprint's wholly-owned consolidated bankruptcy-remote SPEs. At Sprint's direction, the SPEs have sold, and will continue to sell, wireless service, installment and future lease receivables to Purchasers or to a bank agent on behalf of the Purchasers. Leased devices will remain with the SPEs, once sales are initiated, and continue to be depreciated over their estimated useful life. At March 31, 2017, wireless service and installment receivables contributed to the SPEs and included in "Accounts and notes receivable, net" in the consolidated balance sheets were \$2.9 billion and the long-term portion of installment receivables included in "Other assets" in the consolidated balance sheets was \$569 million. As of March 31, 2017, the net book value of devices contributed to the SPEs was approximately \$3.1 billion.

Each SPE is a separate legal entity with its own separate creditors who will be entitled, prior to and upon the liquidation of the SPE, to be satisfied out of the SPE's assets prior to any assets in the SPE becoming available to Sprint. Accordingly, the assets of the SPE are not available to pay creditors of Sprint or any of its affiliates (other than any other SPE), although collections from these receivables in excess of amounts required to repay the advances, yield and fees of the Purchasers and other creditors of the SPEs may be remitted to Sprint during and after the term of the Receivables Facility.

Sales of eligible receivables by the SPEs generally occur daily and are settled on a monthly basis. Sprint pays a fee for the drawn and undrawn portions of the Receivables Facility. A subsidiary of Sprint services the receivables in exchange for a monthly servicing fee, and Sprint guarantees the performance of the servicing obligations under the Receivables Facility.

***DPP***

Prior to the February 2017 amendment, the DPP was classified as a trading security within "Prepaid expenses and other current assets" in the consolidated balance sheets and was recorded at its estimated fair value. Subsequent to the February 2017 amendment, the Receivables Facility is accounted for as a financing and therefore the DPP is no longer recorded as a separate asset. The DPP related to our wireless service and installment receivables was \$1.2 billion as of March 31, 2016. The fair value of the DPP was estimated using a discounted cash flow model, which relies principally on unobservable inputs such as the nature and credit class of the sold receivables and subscriber payment history, and, for installment receivables sold, the estimated timing of upgrades and upgrade payment amounts for those with upgrade options. Changes in the fair value of the DPP did not have a material impact on our consolidated statements of operations for the years ended March 31, 2017 and 2016.

During the year ended March 31, 2017, prior to the February 2017 amendment, we remitted \$270 million of funds to the Purchasers because the amount of cash proceeds received by us under the facility exceeded the maximum funding limit, which increased the total amount of the DPP due to Sprint. We also elected to receive \$625 million of cash, which decreased the total amount of the DPP due to Sprint. In addition, during the year ended March 31, 2017, prior to the February 2017 amendment, sales of new receivables exceeded cash collections on previously sold receivables such that the DPP increased by \$644 million.

***Variable Interest Entity***

Sprint determined that certain of the Purchasers, which are multi-seller asset-backed commercial paper conduits (Conduits) are considered variable interest entities because they lack sufficient equity to finance their activities. Sprint's interest in the receivables purchased by the Conduits is not considered a variable interest because it is in assets that represent less than 50% of the total activity of the Conduits.

***Handset Sale-Leasebacks***

In December 2015 and May 2016, we sold certain iPhone® devices being leased by our customers to Mobile Leasing Solutions, LLC (MLS), a company formed by a group of equity investors, including SoftBank Group Corp. (SoftBank), and then subsequently leased the devices back. Under the agreements, Sprint generally maintains the customer leases, continues to collect and record lease revenue from the customer and remits monthly rental payments to MLS during the leaseback periods.

Under the agreements, Sprint contributed the devices and the associated customer leases to wholly-owned consolidated bankruptcy-remote special purpose entities of Sprint (SPE Lessees). The SPE Lessees then sold the devices and

Table of ContentsIndex to Consolidated Financial Statements**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

transferred certain specified customer lease end rights and obligations, such as the right to receive the proceeds from customers who elect to purchase the device at the end of the customer lease term, to MLS in exchange for a combination of cash and DPP. Settlement for the DPP occurs near the end of the agreement and can be reduced to the extent that MLS experiences a loss on the device (either not returned or sold at an amount less than the expected residual value of the device), but only to the extent of the device's DPP balance. In the event that MLS sells the devices returned from our customers at a price greater than the expected device residual value, Sprint has the potential to share some of the excess proceeds.

The SPE Lessees retain all rights to the underlying customer leases, such as the right to receive the rental payments during the device leaseback period, other than the aforementioned certain specified customer lease end rights. Each SPE Lessee is a separate legal entity with its own separate creditors who will be entitled, prior to and upon the liquidation of the SPE Lessee, to be satisfied out of the SPE Lessee's assets prior to any assets in the SPE Lessee becoming available to Sprint. Accordingly, the assets of the SPE Lessee are not available to pay creditors of Sprint or any of its affiliates. The SPE Lessees are obligated to pay the full monthly rental payments under each device lease to MLS regardless of whether our customers make lease payments on the devices leased to them or whether the customer lease is canceled. Sprint has guaranteed to MLS the performance of the agreements and undertakings of the SPE Lessees under the transaction documents.

***Handset Sale-Leaseback Tranche 1 (Tranche 1)***

In December 2015, Sprint transferred devices with a net book value of approximately \$1.3 billion to MLS in exchange for proceeds totaling \$1.1 billion and a DPP of \$126 million. We recorded the sale, removed the device from our balance sheet, and classified the leasebacks as operating leases. The difference between the fair value and the net book value of the devices sold was recognized as a loss on disposal of property, plant and equipment in the amount of \$65 million and was included in "Other, net" in the consolidated statements of operations for the year ended March 31, 2016. The cash proceeds received in the transaction were reflected as cash provided by investing activities in the consolidated statements of cash flows and payments made to MLS under the leaseback are reflected as "Cost of products" in the consolidated statements of operations. Rent expense related to MLS totaled \$494 million and \$277 million during the years ended March 31, 2017 and 2016, respectively, and is reflected within cash flows from operations. In December 2016, Sprint terminated Tranche 1 by repurchasing the devices and related customer lease end rights and obligations from MLS for consideration of \$375 million of net cash payments and the DPP of \$126 million. As a result of the transaction, Sprint recorded \$477 million of property, plant and equipment, \$16 million of other assets, and was released from certain liabilities. Additionally, the leaseback was canceled and there will be no future rental payments owed to MLS related to Tranche 1. The impact to the consolidated statements of operations as a result of the termination was immaterial.

***Handset Sale-Leaseback Tranche 2 (Tranche 2)***

In May 2016, Sprint transferred devices with a net book value of approximately \$1.3 billion to MLS in exchange for cash proceeds totaling \$1.1 billion and a DPP of \$186 million. Unlike Tranche 1, Tranche 2 was accounted for as a financing. Accordingly, the devices remain in "Property, plant and equipment, net" in the consolidated balance sheets and we continue to depreciate the assets to their estimated residual values over the respective customer lease terms. At March 31, 2017, the net book value of devices transferred to MLS was approximately \$575 million.

The proceeds received are reflected as cash provided by financing activities in the consolidated statements of cash flows and payments made to MLS will be reflected as principal repayments and interest expense. We have elected to account for the financing obligation at fair value. Accordingly, changes in the fair value of the financing obligation are recognized in "Other (expense) income, net" in the consolidated statements of operations over the course of the arrangement.

Tranche 2 primarily includes devices from our iPhone Forever Program, whereas these devices were specifically excluded from Tranche 1. The iPhone Forever Program provides our leasing customers the ability to upgrade their devices and to enter into a new lease agreement, subject to certain conditions, upon Apple's release of a next generation device. Upon a customer exercising their iPhone Forever upgrade right, Sprint has the option to terminate the existing leaseback by immediately remitting all unpaid device leaseback payments and returning the device to MLS. Alternatively, Sprint has the option to transfer the title in the new device to MLS in exchange for the title in the original device (Exchange Option). If Sprint elects the Exchange Option, we are required to continue to pay existing device leaseback rental related to the original device, among other requirements.

To address the introduction of the upgrade feature into the sale-leaseback structure, among other factors, numerous contractual terms from Tranche 1 were modified, which shifted certain risks of ownership in the devices away

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

from MLS to Sprint and resulted in Tranche 2 being accounted for as a financing. For instance, the device leaseback periods are generally longer in Tranche 2 as compared to Tranche 1, and the resulting amounts committed to be paid by the Company represent the initial proceeds received from MLS plus interest. This mitigates MLS's exposure to certain risks for non-returned and damaged devices, as well as to declines in device residual values.

**Network Equipment Sale-Leaseback**

In April 2016, Sprint sold and leased back certain network equipment to unrelated bankruptcy-remote special purpose entities (collectively, "Network LeaseCo"). The network equipment was used as collateral to raise approximately \$2.2 billion in borrowings from external investors, including SoftBank. Sprint's payments to Network LeaseCo during the leaseback period are used by Network LeaseCo to service debt.

Network LeaseCo is a variable interest entity for which Sprint is the primary beneficiary. As a result, Sprint is required to consolidate Network LeaseCo and our consolidated financial statements include Network LeaseCo's debt and the related financing cash inflows. The network assets included in the transaction, which had a net book value of approximately \$3.0 billion and consisted primarily of equipment located at cell towers, remain on Sprint's consolidated financial statements and continue to be depreciated over their respective estimated useful lives. At March 31, 2017, these network assets had a net book value of approximately \$2.4 billion.

The proceeds received were reflected as cash provided by financing activities in the consolidated statements of cash flows and payments made by Network LeaseCo are reflected as principal repayments and interest expense over the respective terms. Sprint has the option to purchase the equipment at the end of the leaseback term for a nominal amount. All intercompany transactions between Network LeaseCo and Sprint are eliminated in our consolidated financial statements. Principal and interest payments on the borrowings from the external investors will be repaid in staggered, unequal payments through January 2018. The first principal payment of \$300 million was made in March 2017 with the remaining \$1.9 billion of principal payments due in fiscal year 2017.

**Spectrum Financing**

In October 2016, Sprint transferred certain directly held and third-party leased spectrum licenses (collectively, "Spectrum Portfolio") to wholly-owned bankruptcy-remote special purpose entities (collectively, "Spectrum Financing SPEs"). The Spectrum Portfolio, which represents approximately 14% of Sprint's total spectrum holdings on a MHz-pops basis, was used as collateral to raise an initial \$3.5 billion in senior secured notes at 3.36% per annum from external investors under a \$7.0 billion program. Sprint can utilize this financing structure to potentially raise up to an additional \$3.5 billion, subject to certain conditions. The notes will be repaid over a five-year term, with interest-only payments over the first four quarters and amortizing quarterly principal payments thereafter commencing in December 2017 through September 2021.

Sprint Communications, Inc. simultaneously entered into a long-term lease with the Spectrum Financing SPEs for the ongoing use of the Spectrum Portfolio. Sprint Communications, Inc. is required to make monthly lease payments to the Spectrum Financing SPEs at a market rate. Those lease payments are sufficient to service the senior secured notes. As the Spectrum Financing SPEs are wholly-owned Sprint subsidiaries, these entities are consolidated and all intercompany activity has been eliminated.

**Note 4. Installment Receivables**

Certain subscribers have the option to pay for their devices in installments generally up to a 24-month period. Beginning in October 2015, Sprint sold and derecognized all eligible installment receivables, which were accounted for as sales. As a result of amendment to the Receivable Facility in February 2017, Sprint gained effective control over the sold receivables and all subsequent sales are treated as financings. Accordingly, the installment receivables are recognized in the consolidated balance sheets (*see Note 3. Funding Sources*). Short-term installment receivables are recorded in "Accounts and notes receivable, net" and long-term installment receivables are recorded in "Other assets" in the consolidated balance sheets.

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

The following table summarizes the installment receivables:

	March 31, 2017
	<i>(in millions)</i>
Installment receivables, gross	\$ 2,270
Deferred interest	(207)
Installment receivables, net of deferred interest	2,063
Allowance for credit losses	(299)
Installment receivables, net	<u>\$ 1,764</u>
<b>Classified on the consolidated balance sheets as:</b>	
Accounts and notes receivable, net	\$ 1,195
Other assets	569
Installment receivables, net	<u>\$ 1,764</u>

The balance and aging of installment receivables on a gross basis by credit category were as follows:

	March 31, 2017		
	Prime	Subprime	Total
	<i>(in millions)</i>		
Unbilled	\$ 1,501	\$ 619	\$ 2,120
Billed - current	74	36	110
Billed - past due	20	20	40
Installment receivables, gross	<u>\$ 1,595</u>	<u>\$ 675</u>	<u>\$ 2,270</u>

Activity in the deferred interest and allowance for credit losses for the installment receivables was as follows:

	Year Ended March 31,	
	2017	2016
	<i>(in millions)</i>	
Deferred interest and allowance for credit losses, beginning of period	\$ —	\$ 329
Bad debt expense	61	93
Write-offs, net of recoveries	(28)	(105)
Change in deferred interest on short-term and long-term installment receivables	8	(43)
Recognition (derecognition) of deferred interest and allowance for credit losses	465	(274)
Deferred interest and allowance for credit losses, end of period	<u>\$ 506</u>	<u>\$ —</u>

Total bad debt expense for the years ended March 31, 2017, 2016, and 2015, which includes amounts shown in the above table as well as bad debt expense on sold installment receivables, was \$322 million, \$147 million, and \$398 million, respectively.

**Note 5. Financial Instruments**

The Company carries certain assets and liabilities at fair value. Fair value is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs based on the observability as of the measurement date, is as follows: quoted prices in active markets for identical assets or liabilities; observable inputs other than the quoted prices in active markets for identical assets and liabilities; and unobservable inputs for which there is little or no market data, which require the Company to develop assumptions of what market participants would use in pricing the asset or liability.

The carrying amount of cash equivalents, accounts and notes receivable, and accounts payable approximates fair value. Short-term investments are recorded at amortized cost and the respective carrying amounts approximate fair value primarily using quoted prices in active markets. As of March 31, 2017, short-term investments totaled \$5.4 billion and consisted of approximately \$3.0 billion of time deposits and \$2.4 billion of commercial paper. Sprint did not hold any short-

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

term investments as of March 31, 2016. The fair value of marketable equity securities totaling \$46 million for both periods ended March 31, 2017 and 2016, respectively, are measured on a recurring basis using quoted prices in active markets.

Except for our financing transaction with MLS, current and long-term debt and our other financings are carried at amortized cost. The Company elected to measure the financing obligation with MLS at fair value as a means to better reflect the economic substance of the arrangement. The Tranche 2 financing obligation, which amounted to \$385 million at March 31, 2017 and is reported in "Current portion of long-term debt, financing and capital lease obligations" in our consolidated balance sheets, is the only eligible financial instrument for which we have elected the fair value option.

The fair value of the financing obligation, which was determined at the outset of the arrangement using a discounted cash flow model, was derived by unobservable inputs such as customer churn rates, customer upgrade probabilities, and the likelihood that Sprint will elect the Exchange Option versus the termination option upon a customer upgrade. Any gains or losses resulting from changes in the fair value of the financing obligation are included in "Other (expense) income, net" on the consolidated statements of operations. For the year ended March 31, 2017, the change in fair value of the financing obligation resulted in a loss of approximately \$24 million. For the year ended March 31, 2016, the payments made to MLS totaled \$654 million. In addition to the Tranche 2 financing obligation, the remaining debt for which estimated fair value is determined based on unobservable inputs primarily represents borrowings under our Network Equipment Sale-Leaseback and sales of receivables under our Receivables Facility. The carrying amounts associated with these borrowings approximates fair value.

The estimated fair value of the majority of our current and long-term debt, excluding our credit facilities, sold wireless service, installment billing and future receivables, and borrowings under our Network Equipment Sale-Leaseback and Tranche 2 transactions, is determined based on quoted prices in active markets or by using other observable inputs that are derived principally from, or corroborated by, observable market data.

The following table presents carrying amounts and estimated fair values of current and long-term debt:

	Carrying amount at March 31, 2017	Estimated Fair Value Using Input Type			Total estimated fair value
		Quoted prices in active markets	Observable	Unobservable	
<i>(in millions)</i>					
Current and long-term debt	\$ 40,581	\$ 33,196	\$ 4,352	\$ 5,468	\$ 43,016

	Carrying amount at March 31, 2016	Estimated Fair Value Using Input Type			Total estimated fair value
		Quoted prices in active markets	Observable	Unobservable	
<i>(in millions)</i>					
Current and long-term debt	\$ 33,645	\$ 21,757	\$ 4,474	\$ 2,130	\$ 28,361

**Note 6. Property, Plant and Equipment**

Property, plant and equipment consists primarily of network equipment and other long-lived assets used to provide service to our subscribers. Non-cash accruals included in PP&E totaled \$962 million, \$468 million, and \$1.5 billion for the years ended March 31, 2017, 2016, and 2015, respectively.

The following table presents the components of PP&E, and the related accumulated depreciation:

	March 31,	
	2017	2016
<i>(in millions)</i>		
Land	\$ 260	\$ 260
Network equipment, site costs and related software	21,693	21,500
Buildings and improvements	818	798
Non-network internal use software, office equipment, leased devices and other	8,625	6,182
Construction in progress	2,316	1,249
Less: accumulated depreciation	(14,503)	(9,692)
Property, plant and equipment, net	<u>\$ 19,209</u>	<u>\$ 20,297</u>

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

Network equipment, site costs and related software includes switching equipment, cell site towers, site development costs, radio frequency equipment, network software, digital fiber optic cable, transport facilities and transmission-related equipment. Buildings and improvements principally consists of owned general office facilities, retail stores and leasehold improvements. Non-network internal use software, office equipment, leased devices and other primarily consists of furniture, information technology systems, equipment and vehicles, and leased devices. Construction in progress, which is not depreciated until placed in service, primarily includes materials, transmission and related equipment, labor, engineering, site development costs, interest and other costs relating to the construction and development of our network.

In September 2014, Sprint introduced a leasing program, whereby qualified subscribers can lease a device for a contractual period of time. At the end of the lease term, the subscriber has the option to turn in the device, continue leasing the device, or purchase the device. As of March 31, 2017 and 2016, substantially all of our device leases were classified as operating leases. At lease inception, the devices leased through Sprint's direct channels are reclassified from inventory to property, plant and equipment. For those devices leased through indirect channels, Sprint purchases the device to be leased from the retailer at lease inception. The devices are then depreciated using the straight-line method to their estimated residual value generally over the term of the lease.

The following table presents leased devices and the related accumulated depreciation:

	March 31,	
	2017	2016
	<i>(in millions)</i>	
Leased devices	\$ 7,276	\$ 4,913
Less: accumulated depreciation	(3,114)	(1,267)
Leased devices, net	<u>\$ 4,162</u>	<u>\$ 3,646</u>

During the years ended March 31, 2017 and 2016, there were non-cash transfers to leased devices of \$2.9 billion and \$3.2 billion, respectively, along with a corresponding decrease in "Device and accessory inventory." In addition, during the year ended March 31, 2017, we repurchased MLS Tranche 1 devices totaling \$477 million, which we had sold for \$1.3 billion during the year ended March 31, 2016 (see Note 3. *Funding Sources*). Non-cash accruals included in leased devices totaled approximately \$158 million, \$159 million, and \$182 million as of March 31, 2017, 2016, and 2015, respectively, for devices purchased from indirect dealers that were leased to our subscribers. Depreciation expense incurred on all leased devices for the years ended March 31, 2017, 2016, and 2015 was \$3.1 billion, \$1.8 billion, and \$206 million, respectively.

As of March 31, 2017, the minimum estimated payments to be received for leased devices were as follows (in millions):

Fiscal year 2017	\$ 2,338
Fiscal year 2018	290
Fiscal year 2019	2
	<u>\$ 2,630</u>

During the year ended March 31, 2017, we recorded \$509 million of loss on disposal of property, plant and equipment, net of recoveries, which is included in "Other, net" in our consolidated statements of operations. Losses totaling \$481 million resulted from the write-off of leased devices associated with lease cancellations prior to the scheduled customer lease terms where customers did not return the devices to us. If customers continue to not return devices, we may have material losses in future periods. In addition, we recorded \$28 million of losses related to cell site construction costs that are no longer recoverable as a result of changes in the Company's network plans.

During the year ended March 31, 2016, we recorded \$487 million of loss on disposal of property, plant and equipment, net of recoveries, which is included in "Other, net" in our consolidated statements of operations. These losses were the result of \$65 million in net losses recognized upon the sale of devices to MLS under the Handset Sale-Leaseback Tranche 1 transaction, which represented the difference between the fair value and net book value of the devices sold and \$256 million in losses from the write-off of leased devices associated with lease cancellations prior to the scheduled customer lease terms where customers did not return the devices to us. In addition, we recorded \$166 million of losses due to cell site construction costs and other network costs that are no longer recoverable as a result of changes in the Company's network

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

plans. During the year ended March 31, 2015, there were no losses on disposal of property, plant and equipment recorded in our consolidated statements of operations.

**Impairments**

During the year ended March 31, 2015, we recorded an impairment loss of \$233 million, which is included in "Impairments" in our consolidated statements of operations, to reduce the carrying value of the Wireline asset group, which includes the Wireline long-lived assets, to its estimated fair value of \$918 million.

**Note 7. Intangible Assets****Indefinite-Lived Intangible Assets**

Our indefinite-lived intangible assets consists of FCC licenses, which were acquired primarily through FCC auctions and business combinations, certain of our trademarks, and goodwill. At March 31, 2017, we held 800 MHz, 1.9 GHz and 2.5 GHz FCC licenses authorizing the use of radio frequency spectrum to deploy our wireless services. As long as the Company acts within the requirements and constraints of the regulatory authorities, the renewal and extension of these licenses is reasonably certain at minimal cost. Accordingly, we have concluded that FCC licenses are indefinite-lived intangible assets. Our Sprint and Boost Mobile trademarks have also been identified as indefinite-lived intangible assets. Goodwill represents the excess of consideration paid over the estimated fair value of net tangible and identifiable intangible assets acquired in business combinations.

The following provides the activity of indefinite-lived intangible assets within the consolidated balance sheets:

	March 31, 2016	Net Additions	March 31, 2017
	<i>(in millions)</i>		
FCC licenses	\$ 36,038	\$ 512 <sup>(1)</sup>	\$ 36,550
Trademarks	4,035	—	4,035
Goodwill <sup>(2)</sup>	6,575	4	6,579
	<u>\$ 46,648</u>	<u>\$ 516</u>	<u>\$ 47,164</u>
	March 31, 2015	Net Additions	March 31, 2016
	<i>(in millions)</i>		
FCC licenses	\$ 35,952	\$ 86	\$ 36,038
Trademarks	4,035	—	4,035
Goodwill <sup>(2)</sup>	6,575	—	6,575
	<u>\$ 46,562</u>	<u>\$ 86</u>	<u>\$ 46,648</u>

(1) Net additions within FCC licenses includes \$85 million of spectrum acquired from the Shentel transaction (see Note 8. Long-Term Debt, Financing and Capital Lease Obligations) and an increase from spectrum license exchanges described below during the year ended March 31, 2017.

(2) Through March 31, 2017 there is no accumulated impairment losses for goodwill.

**Spectrum License Exchanges**

In the second quarter of fiscal year 2016, we exchanged certain spectrum licenses with other carriers in non-cash transactions. As a result, we recorded a non-cash gain of \$354 million, which represented the difference between the fair value and the net book value of the spectrum transferred to the other carriers. The gain was presented in "Other, net" in the consolidated statements of operations for the year ended March 31, 2017.

**Assessment of Impairment**

Our annual impairment testing date for goodwill and indefinite-lived intangible assets is January 1 of each year; however, we test for impairment between our annual tests if an event occurs or circumstances change that indicate that the asset may be impaired, or in the case of goodwill, that the fair value of the reporting unit is below its carrying amount. We did not record any impairment during the years ended March 31, 2017 and 2016. Since the SoftBank Merger in July 2013, actual

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

results and expectations of net postpaid handset subscriber additions were lower than the forecasts used to allocate the purchase price to the assets acquired and liabilities assumed. During the year ended March 31, 2015, we determined that recoverability of the carrying amount of goodwill and the Sprint trade name should be evaluated for impairment and it was determined that the carrying value of the Sprint trade name exceeded its estimated fair value of \$3.3 billion. Accordingly, during the year ended March 31, 2015 we recorded an impairment loss of \$1.9 billion, which is included in "Impairments" in our consolidated statements of operations.

The determination of fair value requires considerable judgment and is highly sensitive to changes in underlying assumptions. Consequently, there can be no assurance that the estimates and assumptions made for the purposes of the goodwill, spectrum licenses, and Sprint and Boost Mobile trade names impairment tests will prove to be an accurate prediction of the future. Sustained declines in the Company's operating results, number of wireless subscribers, future forecasted cash flows, growth rates and other assumptions, as well as significant, sustained declines in the Company's stock price and related market capitalization could impact the underlying key assumptions and our estimated fair values, potentially leading to a future material impairment of goodwill or other indefinite-lived intangible assets.

#### Intangible Assets Subject to Amortization

Customer relationships are amortized using the sum-of-the-months' digits method, while all other definite-lived intangible assets are amortized using the straight-line method over the estimated useful lives of the respective assets. We reduce the gross carrying value and associated accumulated amortization when specified intangible assets become fully amortized. Amortization expense related to favorable spectrum and tower leases is recognized in "Cost of services" in our consolidated statements of operations.

	Useful Lives	March 31, 2017			March 31, 2016		
		Gross Carrying Value	Accumulated Amortization	Net Carrying Value	Gross Carrying Value	Accumulated Amortization	Net Carrying Value
<i>(in millions)</i>							
Customer relationships	4 to 8 years	\$ 6,923	\$ (5,053)	\$ 1,870	\$ 6,923	\$ (4,045)	\$ 2,878
Other intangible assets:							
Favorable spectrum leases	23 years	869	(138)	731	881	(110)	771
Favorable tower leases	7 years	589	(386)	203	589	(302)	287
Trademarks	34 years	520	(58)	462	520	(43)	477
Other	10 years	91	(37)	54	83	(27)	56
Total other intangible assets		2,069	(619)	1,450	2,073	(482)	1,591
Total definite-lived intangible assets		\$ 8,992	\$ (5,672)	\$ 3,320	\$ 8,996	\$ (4,527)	\$ 4,469
<i>(in millions)</i>

(1) Notes of Clearwire Communications LLC are also direct obligations of Clearwire Finance, Inc. and are guaranteed by certain Clearwire subsidiaries.

(2) The \$629 million Clearwire 8.25% Exchangeable Notes have both a par call and put on December 1, 2017 residing in the balance being classified as a current debt obligation.

As of March 31, 2017, Sprint Corporation, the parent corporation, had \$10.5 billion in aggregate principal amount of senior notes outstanding. In addition, as of March 31, 2017, the outstanding principal amount of senior notes issued by Sprint Communications, Inc. and Sprint Capital Corporation, guaranteed notes issued by Sprint Communications, Inc., exchangeable notes issued by Clearwire Communications LLC, secured term loan and secured revolving bank credit facility issued by Sprint Communications, Inc., the EDC agreement, the secured equipment credit facilities, the installment payment obligations, and the Network Equipment Sale-Leaseback and Handset Sale-Leaseback Tranche 2 financing obligations, collectively totaled \$26.1 billion in principal amount of our long-term debt issued by 100% owned subsidiaries, was fully and unconditionally guaranteed by Sprint Corporation. Although certain financing agreements restrict the ability of Sprint Communications, Inc. and its subsidiaries to distribute cash to Sprint Corporation, the ability of the subsidiaries to distribute cash to their respective parents, including to Sprint Communications, Inc. is generally not restricted.

As of March 31, 2017, approximately \$13.1 billion aggregate principal amount of our outstanding debt, comprised of certain notes, financing and capital lease obligations, was secured by substantially all of the assets of the Company. Cash interest

payments, net of amounts capitalized of \$44 million, \$51 million, and \$56 million, totaled \$2.7 billion, \$2.4 billion, and \$2.3 billion during each of the years ended March 31, 2017, 2016, and 2015, respectively. Our weighted average

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

effective interest rate related to our notes and credit facilities was 6.4% for the years ended March 31, 2017 and 2016, and 6.1% for the year ended March 31, 2015.

**Notes**

As of March 31, 2017, our outstanding notes consisted of senior notes, guaranteed notes, and exchangeable notes, all of which are unsecured, as well as senior secured notes associated with our Spectrum Financing transaction. Cash interest on all of the notes is generally payable semi-annually in arrears with the exception of the Spectrum Financing senior secured notes, which are payable quarterly. As of March 31, 2017, \$30.2 billion aggregate principal amount of the notes was redeemable at the Company's discretion at the then-applicable redemption prices plus accrued interest.

As of March 31, 2017, \$24.1 billion aggregate principal amount of our senior notes and guaranteed notes provided holders with the right to require us to repurchase the notes if a change of control triggering event (as defined in the applicable indentures and supplemental indentures) occurs.

Upon the close of the Clearwire Corporation acquisition on July 9, 2013, the Clearwire Communications, LLC 8.25% Exchangeable Notes due 2040 became exchangeable at any time, at the holder's option, for a fixed amount of cash equal to \$706.21 for each \$1,000 principal amount of notes surrendered. On December 1, 2017 the Exchangeable Notes can be tendered at the holder's option for 100% of the par value plus accrued interest resulting in the entire balance being classified as a current debt obligation.

In October 2016, the Company repaid \$300 million in aggregate principal of its Clearwire Communications LLC 14.75% secured notes. In December 2016, the Company repaid \$2.0 billion aggregate principal upon maturity of its outstanding Sprint Communications, Inc. 6% senior notes. In March 2017, the Company repaid \$1.0 billion aggregate principal upon maturity of its outstanding Sprint Communications, Inc. 9.125% senior notes.

In October 2016, Sprint transferred the Spectrum Portfolio to the Spectrum Financing SPEs. The Spectrum Portfolio, which represents approximately 14% of Sprint's total spectrum holdings on a MHz-pops basis, was used as collateral to raise an initial \$3.5 billion in senior secured notes at 3.36% per annum from external investors under a \$7.0 billion program. Sprint can utilize this financing structure to potentially raise up to an additional \$3.5 billion, subject to certain conditions. The notes will be repaid over a five-year term, with interest-only payments over the first four quarters and amortizing quarterly principal payments thereafter commencing December 2017 through September 2021. As of March 31, 2017, approximately \$438 million of the total principal outstanding was classified as "Current portion of long-term debt, financing and capital lease obligations" in the consolidated balance sheets. Total debt finance costs incurred and capitalized in connection with the issuance of notes were approximately \$95 million.

**Credit Facilities*****Secured Term Loan and Revolving Bank Credit Facility***

On February 3, 2017, we entered into a new credit agreement for \$6.0 billion, consisting of a \$4.0 billion, seven-year secured term loan that matures in February 2024 and a \$2.0 billion secured revolving bank credit facility that expires in February 2021. As of March 31, 2017, approximately \$215 million in letters of credit were outstanding under this credit facility, including the letter of credit required by the Report and Order (*see Note 12. Commitments and Contingencies*). As a result of the outstanding letters of credit, which directly reduce the availability of borrowings, the Company had approximately \$1.8 billion of borrowing capacity available under the secured revolving bank credit facility as of March 31, 2017. The bank credit facility requires a ratio (Leverage Ratio) of total indebtedness to trailing four quarters earnings before interest, taxes, depreciation and amortization and other non-recurring items, as defined by the bank credit facility (adjusted EBITDA), not to exceed 6.0 to 1.0 through the quarter ending December 31, 2017. After December 31, 2017, the Leverage Ratio declines on a scheduled basis until the ratio becomes fixed at 3.5 to 1.0 for the fiscal quarter ended March 31, 2020 and each fiscal quarter ending thereafter through expiration of the facility. The term loan has an interest rate equal to LIBOR plus 250 basis points and the secured revolving bank credit facility has an interest rate equal to LIBOR plus a spread that varies depending on the Leverage Ratio. The secured revolving bank credit facility replaced the \$3.3 billion unsecured revolving bank credit facility that was due to expire in February 2018.

In consideration of the seven-year secured term loan, we entered into a five-year fixed-for-floating interest rate swap on a \$2.0 billion notional amount that has been designated as a cash flow hedge. The effective portion of changes in fair value are recorded in "Other comprehensive income (loss)" in the consolidated statements of comprehensive loss and the

[Table of Contents](#)

[Index to Consolidated Financial Statements](#)

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

ineffective portion, if any, is recorded in current period earnings in the consolidated statements of operations as interest expense. The fair value of the interest rate swap was approximately \$2 million, which was recorded as a liability on the consolidated balance sheets at March 31, 2017.

*Accounts Receivable Facility*

As of March 31, 2017, the total amount of borrowings under our \$4.3 billion Receivable Facility was \$2.0 billion and the total amount available to be drawn was \$826 million. Prior to the February 2017 amendment, wireless service and installment receivables sold to the Purchasers were treated as a sale of financial assets and Sprint derecognized these receivables and recognized the net proceeds received in cash provided by operating activities in the consolidated statements of cash flows. Subsequent to the February 2017 amendment, the sale of wireless service and installment receivables are reported as financings, which is consistent with our historical treatment for the sale of future lease receivables. During the year ended March 31, 2017, we repaid \$416 million to the Purchasers and drew \$100 million.

*EDC agreement*

On February 3, 2017, we amended the EDC agreement to provide for security and covenant terms similar to our secured term loan and revolving bank credit facility. However, under the terms of the EDC agreement repayments of outstanding amounts cannot be redrawn. In March 2017, the Company repaid \$250 million of aggregate principal of its outstanding Tranche 4 secured loan due December 15, 2017. As of March 31, 2017, the total principal amount of our borrowings under the EDC facility was \$300 million.

*Secured equipment credit facilities*

*Eksportkreditinamnden (EKN)*

During the year ended March 31, 2017, we made principal repayments totaling \$254 million on the facility, resulting in the total repayment of the principal amount at March 31, 2017. The facility has expired in accordance with its terms.

*Finnvera plc (Finnvera)*

The Finnvera secured equipment credit facility provides for the ability to borrow up to \$800 million to finance network-related purchases from Nokia Solutions and Networks US LLC, USA. The facility has one tranche remaining and available for borrowing through October 2017. Such borrowings are contingent upon the amount and timing of Sprint's network-related purchases. During the year ended March 31, 2017, we made principal repayments totaling \$56 million, resulting in a total principal amount of \$140 million outstanding at March 31, 2017.

*K-sure*

The K-sure secured equipment credit facility provides for the ability to borrow up to \$750 million to finance network-related purchases from Samsung Telecommunications America, LLC. The facility can be divided in up to three consecutive tranches of varying size with borrowings available until May 2018, contingent upon the amount of network-related purchases made by Sprint. During the year ended March 31, 2017, we made principal repayments totaling \$65 million, resulting in a total principal amount of \$259 million outstanding at March 31, 2017.

*Delcredere | Ducroire (D/D)*

The D/D secured equipment credit facility provides for the ability to borrow up to \$250 million to finance network equipment-related purchases from Alcatel-Lucent USA Inc. The principal balance outstanding at March 31, 2017 was \$32 million.

Borrowings under the Finnvera, K-sure and D/D secured equipment credit facilities are each secured by liens on the respective equipment purchased pursuant to each facility's credit agreement. In addition, repayments of outstanding amounts borrowed under the secured equipment credit facilities cannot be redrawn. Each of these facilities is fully and unconditionally guaranteed by both Sprint Communications, Inc. and Sprint Corporation. The secured equipment credit facilities have certain key covenants similar to those in our secured term loan and revolving bank credit facility.

[Index to Consolidated Financial Statements](#)

## SPRINT CORPORATION NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

### Financing Obligations

#### *Network Equipment Sale-Leaseback*

In April 2016, Sprint sold and leased back certain network equipment to Network LeaseCo. The network equipment acquired by Network LeaseCo, which is consolidated by us, was used as collateral to raise approximately \$2.2 billion in borrowings from external investors, including SoftBank. Principal and interest payments on the borrowings from the external investors will be repaid in staggered, unequal payments through January 2018. The first principal payment of \$300 million was made in March 2017 with the remaining \$1.9 billion of principal payments due in fiscal year 2017 (see Note 3. *Funding Sources*).

#### *Handset Sale-Leaseback Tranche 2*

In May 2016, Sprint entered into a second transaction with MLS to sell and leaseback certain iPhone® devices leased by our customers. Upon the transfer of devices with a net book value of approximately \$1.3 billion to MLS, Sprint received cash proceeds of \$1.1 billion. Unlike Tranche 1, the proceeds from Tranche 2 were accounted for as a financing (see Note 3. *Funding Sources*). During the year ended March 31, 2017, we repaid \$654 million to MLS, which reduced the principal amount of the financing obligation to \$385 million as of March 31, 2017.

#### *Tower Financing*

We have approximately 3,000 cell sites that we sold and subsequently leased back during 2008. Terms extend through 2021, with renewal options for an additional 20 years. These cell sites continue to be reported as part of our "Property, plant and equipment, net" in our consolidated balance sheets due to our continued involvement with the property sold and the transaction is accounted for as a financing. The financing obligation as of March 31, 2017 is \$191 million.

### Capital Lease and Other Obligations

On August 10, 2015, Shenandoah Telecommunications Company (Shentel) entered into a definitive agreement to acquire one of our wholesale partners, NTELOS Holdings Corp (nTelos). In connection with this definitive agreement, we entered into a series of agreements with Shentel to, among other things, acquire certain assets such as spectrum, terminate our existing wholesale arrangement with nTelos, and amend our existing affiliate agreement with Shentel to primarily include the subscribers formerly under the wholesale arrangement with nTelos. The agreements also expanded the area in which Shentel provides wireless service to Sprint customers and provided for more favorable economic terms. In April 2016, we received regulatory approval and the transaction closed in May 2016. The total consideration for this transaction included \$181 million, on a net present value basis, of notes payable to Shentel. Sprint will satisfy its obligations under the notes payable over an expected term of five to six years, of which the remaining obligation is \$225 million as of March 31, 2017. FCC licenses acquired from Shentel had a total value of \$85 million. \$96 million of the total purchase was recorded in "Other, net" in the consolidated statements of operations as a contract termination in the quarter ended June 30, 2016, which related to the termination of our pre-existing wholesale arrangement with nTelos. The remainder of our capital lease and other obligations of \$315 million as of March 31, 2017 are primarily for the use of wireless network equipment.

### Covenants

Certain indentures and other agreements also require compliance with various covenants, including covenants that limit the ability of the Company and its subsidiaries to sell all or substantially all of its assets, limit the ability of the Company and its subsidiaries to incur indebtedness and liens, and require that we maintain certain financial ratios, each as defined by the terms of the indentures, supplemental indentures and financing arrangements.

As of March 31, 2017, the Company was in compliance with all restrictive and financial covenants associated with its borrowings. A default under any of our borrowings could trigger defaults under certain of our other debt obligations, which in turn could result in the maturities being accelerated.

Under our secured revolving bank credit facility, we are currently restricted from paying cash dividends because our ratio of total indebtedness to adjusted EBITDA (each as defined in the applicable agreements) exceeds 2.5 to 1.0.

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**Future Maturities of Long-Term Debt, Financing and Capital Lease Obligations**

Aggregate amount of maturities for long-term debt, financing and capital lease obligations outstanding as of March 31, 2017, were as follows (in millions):

Fiscal year 2017	\$ 5,039
Fiscal year 2018	6,157
Fiscal year 2019	4,168
Fiscal year 2020	2,596
Fiscal year 2021	3,816
Fiscal year 2022 and thereafter	19,048
	<u>40,824</u>
Net premiums and debt financing costs	90
	<u>\$ 40,914</u>

**Note 9. Severance and Exit Costs**

Severance and exit costs consist of lease exit costs primarily associated with tower and cell sites, access exit costs related to payments that will continue to be made under our backhaul access contracts for which we will no longer be receiving any economic benefit, and severance costs associated with reductions in our work force.

The following provides the activity in the severance and exit costs liability included in "Accounts payable," "Accrued expenses and other current liabilities" and "Other liabilities" within the consolidated balance sheets:

	March 31, 2016	Net Expense	Cash Payments and Other	March 31, 2017
	<i>(in millions)</i>			
Lease exit costs	\$ 338	\$ 17 <sup>(1)</sup>	\$ (106)	\$ 249
Severance costs	150	20 <sup>(2)</sup>	(158)	12
Access exit costs	37	31 <sup>(3)</sup>	(28)	40
	<u>\$ 525</u>	<u>\$ 68</u>	<u>\$ (292)</u>	<u>\$ 301</u>

(1) For the year ended March 31, 2017, we recognized costs of \$17 million (\$14 million Wireless, \$3 million Wireline).

(2) For the year ended March 31, 2017, we recognized costs of \$20 million (\$19 million Wireless, \$1 million Wireline).

(3) For the year ended March 31, 2017, we recognized \$2 million (solely attributable to Wireline) as "Cost of services" and \$29 million (\$12 million Wireless, \$17 million Wireline) as "Severance and exit costs."

	March 31, 2015	Net Expense	Cash Payments and Other	March 31, 2016
	<i>(in millions)</i>			
Lease exit costs	\$ 291	\$ 156 <sup>(4)</sup>	\$ (109)	\$ 338
Severance costs	119	216 <sup>(5)</sup>	(185)	150
Access exit costs	44	19 <sup>(6)</sup>	(26)	37
	<u>\$ 454</u>	<u>\$ 391</u>	<u>\$ (320)</u>	<u>\$ 525</u>

(4) We recognized costs of \$176 million (Wireless only) for the year ended March 31, 2016, which were offset by \$20 million of income (Wireless only) resulting from a revision to our estimate of a previously recorded reserve.

(5) For the year ended March 31, 2016, we recognized costs of \$216 million (\$191 million Wireless, \$25 million Wireline).

(6) For the year ended March 31, 2016, we recognized \$2 million (solely attributable to Wireline) as "Cost of services" and \$17 million (solely attributable to Wireless) as "Severance and exit costs".

We continually refine our network strategy and evaluate other potential network initiatives to improve the overall performance of our network. Additionally, major cost cutting initiatives are expected to continue, which may include headcount reductions, among other actions, to reduce operating expenses and improve our operating cash flows. As a result of these ongoing activities, we may incur future material charges associated with lease and access exit costs, severance, asset impairments, and accelerated depreciation, among others.

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**Note 11. Income Taxes**

Sprint Corporation is the parent corporation of an affiliated group of corporations which join in the filing of a U.S. federal consolidated income tax return. Additionally, we file income tax returns in each state jurisdiction which imposes an income tax. In certain state jurisdictions, Sprint and its subsidiaries filed combined state tax returns with certain other SoftBank affiliates beginning with the year ended March 31, 2016. State tax expense or benefit has been determined utilizing the separate return approach as if Sprint and its subsidiaries file on a stand-alone basis. We also file income tax returns in a number of foreign jurisdictions. However, our foreign income tax activity has been immaterial. Cash paid or received for income tax purposes was insignificant for all periods presented.

Income tax expense consists of the following:

	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Current income tax (expense) benefit			
Federal	\$ 50	\$ 13	\$ 5
State	(50)	(30)	(39)
Total current income tax (expense) benefit	—	(17)	(34)
Deferred income tax (expense) benefit			
Federal	(284)	(206)	491
State	(149)	83	118
Total deferred income tax (expense) benefit	(433)	(123)	609
Foreign income tax expense	(2)	(1)	(1)
Total income tax (expense) benefit	\$ (435)	\$ (141)	\$ 574

The differences that caused our effective income tax rates to differ from the 35% U.S. federal statutory rate for income taxes were as follows:

	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Income tax benefit at the federal statutory rate	\$ 270	\$ 649	\$ 1,372

Income tax expense allocated to other items was as follows:

	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Unrecognized net periodic pension and other postretirement benefit cost <sup>(1)</sup>	\$ (24)	\$ —	\$ —

*(1) These amounts have been recognized in accumulated other comprehensive loss.*

F-33

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

Deferred income taxes are recognized for the temporary differences between the carrying amounts of our assets and liabilities for financial statement purposes and their tax bases. Deferred tax assets are also recorded for operating loss, capital loss and tax credit carryforwards. The sources of the differences that give rise to the deferred income tax assets and liabilities as of March 31, 2017 and 2016, along with the income tax effect of each, were as follows:

	March 31,	
	2017	2016
	<i>(in millions)</i>	
<b>Deferred tax assets</b>		
Net operating loss carryforwards	\$ 6,812	\$ 8,057
Tax credit carryforwards	340	384
Capital loss carryforwards	1	83
Property, plant and equipment	2,192	1,230
Debt obligations	205	—
Deferred rent	402	438
Pension and other postretirement benefits	332	378
Accruals and other liabilities	1,454	1,376
	<u>11,738</u>	<u>11,946</u>
<b>Valuation allowance</b>	<u>(10,477)</u>	<u>(9,793)</u>
	<u>1,261</u>	<u>2,153</u>
<b>Deferred tax liabilities</b>		
FCC licenses	12,876	12,738
Trademarks	1,712	1,718
Intangibles	771	1,166
Debt obligations	—	58
Other	318	432
	<u>15,677</u>	<u>16,112</u>
<b>Long-term deferred tax liability</b>	<u>\$ 14,416</u>	<u>\$ 13,959</u>

The realization of deferred tax assets, including net operating loss carryforwards, is dependent on the generation of future taxable income sufficient to realize the tax deductions, carryforwards and credits. However, our history of annual losses reduces our ability to rely on expectations of future income in evaluating the ability to realize our deferred tax assets. Valuation allowances on deferred tax assets are recognized if it is determined that it is more likely than not that the asset will not be realized. As a result, the Company recognized income tax expense to increase the valuation allowance by \$615 million, \$939 million, and \$911 million for the years ended March 31, 2017, 2016, and 2015, respectively. We do not expect to record significant tax benefits on future net operating losses until our circumstances justify the recognition of such benefits.

We believe it is more likely than not that our remaining deferred income tax assets, net of the valuation allowance, will be realized based on current income tax laws and expectations of future taxable income stemming from the reversal of existing deferred tax liabilities. Uncertainties surrounding income tax law changes, shifts in operations between state taxing jurisdictions and future operating income levels may, however, affect the ultimate realization of all or some of these deferred income tax assets.

Income tax expense of \$435 million for the year ended March 31, 2017 was primarily attributable to taxable temporary differences from the tax amortization of FCC licenses and tax expense of \$136 million on pre-tax gains from spectrum license exchanges which increased our deferred tax liability on FCC license temporary differences. In addition, we increased our state income tax valuation allowance by \$89 million as a result of a shift in operations among wholly-owned subsidiaries and an organizational restructuring that occurred during the year.

Income tax expense of \$141 million for the year ended March 31, 2016 was primarily attributable to tax expense resulting from taxable temporary differences from the tax amortization of FCC licenses, partially offset by tax benefits from

F-34

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

the reversal of state income tax valuation allowance on deferred tax assets and changes in state income tax laws enacted during the year. As a result of organizational restructuring, which drove a sustained increase in the profitability of specific legal entities, we revised our estimate regarding the realizability of the involved entities' deferred state tax assets and recorded a state tax benefit of \$90 million.

Income tax benefit of \$574 million for the year ended March 31, 2015 was primarily attributable to recognition of a tax benefit on the \$1.9 billion Sprint trade name impairment loss, partially offset by tax expense on taxable temporary differences from the tax amortization of FCC licenses during the period.

During the years ended March 31, 2017, 2016, and 2015, we generated \$204 million, \$343 million, and \$398 million, respectively, of foreign income, which is included in "Loss before income taxes" on the consolidated statements of operations. We have no material unremitted earnings of foreign subsidiaries.

As of March 31, 2017, we had federal operating loss carryforwards of \$16.4 billion, state operating loss carryforwards of \$17.5 billion and foreign net operating loss carryforwards of \$805 million. Related to these loss carryforwards, we have recorded federal tax benefits of \$5.7 billion, net state tax benefits of \$863 million and foreign tax benefits of \$265 million before consideration of the valuation allowances. Approximately \$620 million of the federal net operating loss carryforwards expire between fiscal years 2017 and 2021. The remaining \$15.8 billion expire in varying amounts between fiscal years 2022 and 2034. The state operating loss carryforwards expire in varying amounts through fiscal year 2035. Foreign operating loss carryforwards of \$446 million do not expire. The remaining foreign operating loss carryforwards expire in varying amounts between fiscal years 2017 and 2035.

We also had available \$429 million of federal and state income tax credit carryforwards as of March 31, 2017. Included in this amount are \$74 million of income tax credits which expire prior to fiscal year 2018 and \$301 million which expire in varying amounts between fiscal years 2018 and 2036. The remaining \$54 million do not expire.

Unrecognized tax benefits are established for uncertain tax positions based upon estimates regarding potential future challenges to those positions at the largest amount that is greater than fifty percent likely of being realized upon ultimate settlement. These estimates are updated at each reporting date based on the facts, circumstances and information available. Interest related to these unrecognized tax benefits is recognized in interest expense. Penalties are recognized as additional income tax expense. The unrecognized tax benefits attributable to uncertain tax positions were \$190 million and \$166 million, as of the March 31, 2017 and 2016, respectively. As of March 31, 2017, the unrecognized tax benefits included items that would favorably affect the income tax provision by \$175 million, if recognized without an offsetting valuation allowance adjustment. The accrued liability for income tax related interest and penalties was insignificant for all periods presented.

A reconciliation of the beginning and ending amount of unrecognized tax benefits was as follows:

	Year Ended March 31,	
	2017	2016
	<i>(in millions)</i>	
<b>Balance at beginning of period</b>	\$ 166	\$ 163
Additions based on current year tax positions	15	—
Additions based on prior year tax positions	10	5
Reductions for lapse of statute of limitations	(1)	(2)
<b>Balance at end of period</b>	<b>\$ 190</b>	<b>\$ 166</b>

As of March 31, 2017, we are under a limited scope federal income tax examination for the tax year ended March 31, 2015 that is being handled by the IRS Exam division. There are not any issues being handled by the IRS Appeals division. We are involved in multiple state income tax examinations related to various years beginning with 1996, which are in various stages of the examination, administrative/judicial review or appellate process. Based on our current knowledge of the examinations, administrative/judicial reviews and appellate processes, we believe it is reasonably possible a number of our uncertain tax positions may be resolved during the next twelve months which could result in a reduction of up to \$42 million in our unrecognized tax benefits.

The federal and state statutes of limitations for assessment of tax liability generally lapse three and four years, respectively, after the date the tax returns are filed. However, income tax attributes that are carried forward, such as net

Table of Contents

Index to Consolidated Financial Statements

## SPRINT CORPORATION NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

operating loss carryforwards, may be challenged and adjusted by taxing authorities at any time prior to the expiration of the statute of limitations for the tax year in which they are utilized.

In March 2016, the FASB issued authoritative guidance on *Compensation - Stock Compensation: Improvements to Employee Share-Based Payment Accounting* which, in part, eliminates the additional paid-in capital pools and requires excess tax benefits and tax deficiencies to be recorded in the income statement when the awards vest or are settled. The Company elected to early adopt this guidance effective April 1, 2016. The early adoption of this guidance did not have a material effect on our consolidated financial statements.

### Note 12. Commitments and Contingencies

#### Litigation, Claims and Assessments

In March 2009, a stockholder brought suit, *Bennett v. Sprint Nextel Corp.*, in the U.S. District Court for the District of Kansas, alleging that Sprint Communications and three of its former officers violated Section 10(b) of the Exchange Act and Rule 10b-5 by failing adequately to disclose certain alleged operational difficulties subsequent to the Sprint-Nextel merger, and by purportedly issuing false and misleading statements regarding the write-down of goodwill. The district court granted final approval of a settlement in August 2015, which did not have a material impact to our financial statements. Five stockholder derivative suits related to this 2009 stockholder suit were filed against Sprint Communications and certain of its present and/or former officers and directors. The first, *Murphy v. Forsee*, was filed in state court in Kansas on April 8, 2009, was removed to federal court, and was stayed by the court pending resolution of the motion to dismiss the *Bennett* case; the second, *Randolph v. Forsee*, was filed on July 15, 2010 in state court in Kansas, was removed to federal court, and was remanded back to state court; the third, *Ross-Williams v. Bennett, et al.*, was filed in state court in Kansas on February 1, 2011; the fourth, *Price v. Forsee, et al.*, was filed in state court in Kansas on April 15, 2011; and the fifth, *Hartleib v. Forsee, et al.*, was filed in federal court in Kansas on July 14, 2011. These cases were essentially stayed while the *Bennett* case was pending, and we have reached an agreement in principle to settle the matters, by agreeing to some governance provisions and by paying plaintiffs' attorneys fees in an immaterial amount. The court approved the settlement but reduced the plaintiffs' attorneys fees; the attorneys fees issue is on appeal.

On April 19, 2012, the New York Attorney General filed a complaint alleging that Sprint Communications has fraudulently failed to collect and pay more than \$100 million in New York sales taxes on receipts from its sale of wireless telephone services since July 2005. The complaint also seeks recovery of triple damages under the State False Claims Act, as well as penalties and interest. Sprint Communications moved to dismiss the complaint on June 14, 2012. On July 1, 2013, the court entered an order denying the motion to dismiss in large part, although it did dismiss certain counts or parts of certain counts. Sprint Communications appealed that order and the intermediate appellate court affirmed the order of the trial court. On October 20, 2015, the Court of Appeals of New York affirmed the decision of the appellate court that the tax statute requires us to collect and remit the disputed taxes. Our petition for certiorari to the U.S. Supreme Court on grounds of federal preemption was denied. Through the year ended March 31, 2017, we have accrued approximately \$200 million associated with this matter. The parties are now engaged in discovery in the trial court. We will continue to defend this matter vigorously and we do not expect the resolution of this matter to have a material adverse effect on our financial position or results of operations.

Eight related stockholder derivative suits have been filed against Sprint Communications and certain of its current and former officers and directors. Each suit alleges generally that the individual defendants breached their fiduciary duties to Sprint Communications and its stockholders by allegedly permitting, and failing to disclose, the actions alleged in the suit filed by the New York Attorney General. One suit, filed by the Louisiana Municipal Police Employees Retirement System, was dismissed by a federal court. Two suits were filed in state court in Johnson County, Kansas and one of those suits was dismissed as premature; and five suits are pending in federal court in Kansas. The remaining Kansas suits have been stayed pending resolution of the Attorney General's suit. We do not expect the resolution of these matters to have a material adverse effect on our financial position or results of operations.

Sprint Communications is also a defendant in a complaint filed by several stockholders of Clearwire Corporation (Clearwire) asserting claims for breach of fiduciary duty by Sprint Communications, and related claims and otherwise challenging the Clearwire acquisition. *ACP Master, LTD, et al. v. Sprint Nextel Corp., et al.*, was filed April 26, 2013, in Chancery Court in Delaware. Plaintiffs in the *ACP Master, LTD* suit have also filed suit requesting an appraisal of the fair

[Table of Contents](#)[Index to Consolidated Financial Statements](#)

## SPRINT CORPORATION NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

value of their Clearwire stock. Trial of those cases took place in October and November 2016; the parties have submitted their post-trial briefing, and oral argument was held on April 25, 2017. We are awaiting a decision. We do not expect the resolution of these matters to have a material adverse effect on our financial position or results of operations.

Sprint is currently involved in numerous court actions alleging that Sprint is infringing various patents. Most of these cases effectively seek only monetary damages. A small number of these cases are brought by companies that sell products and seek injunctive relief as well. These cases have progressed to various degrees and a small number may go to trial if they are not otherwise resolved. Adverse resolution of these cases could require us to pay significant damages, cease certain activities, or cease selling the relevant products and services. In many circumstances, we would be indemnified for monetary losses that we incur with respect to the actions of our suppliers or service providers. We do not expect the resolution of these cases to have a material adverse effect on our financial position or results of operations.

In October 2013, the FCC Enforcement Bureau began to issue notices of apparent liability (NALs) to other Lifeline providers, imposing fines for intracarrier duplicate accounts identified by the government during its audit function. Those audits also identified a small percentage of potentially duplicative intracarrier accounts related to our Assurance Wireless business. No NAL has yet been issued with respect to Sprint and we do not know if one will be issued. Further, we are not able to reasonably estimate the amount of any claim for penalties that might be asserted. However, based on the information currently available, if a claim is asserted by the FCC, Sprint does not believe that any amount ultimately paid would be material to the Company's results of operations or financial position.

Various other suits, inquiries, proceedings and claims, either asserted or unasserted, including purported class actions typical for a large business enterprise and intellectual property matters, are possible or pending against us or our subsidiaries. During the year ended March 31, 2017, we recorded a \$103 million charge associated with a state tax matter which is presented in our consolidated statements of operations within "Other, net". If our interpretation of certain laws or regulations, including those related to various federal or state matters such as sales, use or property taxes, or other charges were found to be mistaken, it could result in payments by us. While it is not possible to determine the ultimate disposition of each of these proceedings and whether they will be resolved consistent with our beliefs, we expect that the outcome of such proceedings, individually or in the aggregate, will not have a material adverse effect on our financial position or results of operations.

### **Spectrum Reconfiguration Obligations**

In 2004, the FCC adopted a Report and Order that included new rules regarding interference in the 800 MHz band and a comprehensive plan to reconfigure the 800 MHz band. The Report and Order provides for the exchange of a portion of our 800 MHz FCC spectrum licenses, and requires us to fund the cost incurred by public safety systems and other incumbent licensees to reconfigure the 800 MHz spectrum band. Also, in exchange, we received licenses for 10 MHz of nationwide spectrum in the 1.9 GHz band.

The minimum cash obligation is \$2.8 billion under the Report and Order. We are, however, obligated to pay the full amount of the costs relating to the reconfiguration plan, even if those costs exceed \$2.8 billion. As required under the terms of the Report and Order, a letter of credit has been secured to provide assurance that funds will be available to pay the relocation costs of the incumbent users of the 800 MHz spectrum. The letter of credit was initially \$2.5 billion, but has been reduced during the course of the proceeding to \$165 million as of March 31, 2017. Since the inception of the program, we have incurred payments of approximately \$3.5 billion directly attributable to our performance under the Report and Order, including approximately \$45 million during the year ended March 31, 2017. When incurred, substantially all costs are accounted for as additions to FCC licenses with the remainder as property, plant and equipment. Although costs incurred through March 31, 2017 have exceeded \$2.8 billion, not all of those costs have been reviewed and accepted as eligible by the transition administrator.

Completion of the 800 MHz band reconfiguration was initially required by June 26, 2008 and public safety reconfiguration is nearly complete across the country with the exception of the States of Washington, Arizona, California, Texas and New Mexico. The FCC continues to grant the remaining 800 MHz public safety licensees additional time to complete their band reconfigurations which, in turn, delays our access to our 800 MHz replacement channels in these areas. In the areas where band reconfiguration is complete, Sprint has received its replacement spectrum in the 800 MHz band and Sprint is deploying 3G CDMA and 4G LTE on this spectrum in combination with its spectrum in the 1.9 GHz and 2.5 GHz bands.

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**Future Minimum Commitments**

As of March 31, 2017, the minimum estimated amounts due under operating leases, spectrum leases and service credits, and purchase orders and other commitments were as follows:

Future Minimum Commitments	Total	Fiscal Year 2017	Fiscal Year 2018	Fiscal Year 2019	Fiscal Year 2020	Fiscal Year 2021	Fiscal Year 2022 and thereafter
	<i>(in millions)</i>						
Operating leases	\$ 12,173	\$ 2,147	\$ 2,113	\$ 2,001	\$ 1,885	\$ 1,579	\$ 2,448
Spectrum leases and service credits	6,971	247	244	268	244	263	5,705
Purchase orders and other commitments	10,051	6,361	1,277	652	429	326	1,006
Total	<u>\$ 29,195</u>	<u>\$ 8,755</u>	<u>\$ 3,634</u>	<u>\$ 2,921</u>	<u>\$ 2,558</u>	<u>\$ 2,168</u>	<u>\$ 9,159</u>

***Operating Leases***

We lease various equipment, office facilities, retail outlets and kiosks, switching facilities and cell sites under operating leases. The non-cancelable portion of these leases generally ranges from monthly up to 15 years. These leases, with few exceptions, provide for automatic renewal options and escalations that are either fixed or based on the consumer price index. Any rent abatements, along with rent escalations, are included in the computation of rent expense calculated on a straight-line basis over the lease term. Our lease term for most leases includes the initial non-cancelable term plus at least one renewal period, if the non-cancelable term is less than ten years, as the exercise of the related renewal option or options is reasonably assured. Our cell site leases generally provide for an initial non-cancelable term of five to twelve years with up to 5 renewal options for five years each.

Our rental commitments for operating leases, including lease renewals that are reasonably assured, consisted mainly of leases for cell and switch sites, real estate, information technology and network equipment and office space. Total rental expense was \$3.1 billion, \$2.9 billion, and \$2.6 billion, for the years ended March 31, 2017, 2016, and 2015, respectively.

***Spectrum Leases and Service Credits***

Certain of the spectrum leases provide for minimum lease payments, additional charges, renewal options and escalation clauses. Leased spectrum agreements generally have terms of up to 30 years. We expect that all renewal periods in our spectrum leases will be renewed by us.

We also have commitments to provide services to certain lessors, and to reimburse lessors for certain capital equipment and third-party service expenditures over the term of the lease. We accrue a monthly obligation for the services and equipment based on the total estimated available service credits divided by the term of the lease. The obligation is reduced by services provided and as actual invoices are presented and paid to the lessors. During the period ended March 31, 2017, we satisfied \$3 million related to these commitments. The maximum remaining commitment at March 31, 2017 was \$83 million and is expected to be incurred over the term of the related lease agreements, which generally range from 15 to 30 years.

***Purchase Orders and Other Commitments***

We are a party to other commitments, which includes, among other things, service, spectrum, network equipment, devices, asset retirement obligations and other executory contracts in connection with conducting our business. Amounts actually paid under some of these agreements will likely be higher due to variable components of these agreements. The more significant variable components that determine the ultimate obligation owed include such items as hours contracted, subscribers and other factors. In addition, we are a party to various arrangements that are conditional in nature and obligate us to make payments only upon the occurrence of certain events, such as the delivery of functioning software or a product. Because it is not possible to predict the timing or amounts that may be due under these conditional arrangements, no such amounts have been included in the table above.

[Table of Contents](#)[Index to Consolidated Financial Statements](#)

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**Note 13. Stockholders' Equity and Per Share Data**

Our certificate of incorporation authorizes 10,020,000,000 shares of capital stock as follows:

- 9,000,000,000 shares of common stock, par value \$0.01 per share;
- 1,000,000,000 shares of non-voting common stock, par value \$0.01 per share; and
- 20,000,000 shares of preferred stock, par value \$0.0001 per share.

**Classes of Common Stock***Voting Common Stock*

The holders of our common stock are entitled to one vote per share on all matters submitted for action by the stockholders. There were approximately 4.0 billion shares of common stock outstanding as of March 31, 2017.

*Treasury Shares*

Shares of common stock repurchased by us are recorded at cost as treasury shares and result in a reduction of stockholders' equity. We reissue treasury shares as part of our stockholder approved stock-based compensation programs, as well as upon conversion of outstanding securities that are convertible into common stock. When shares are reissued, we determine the cost using the FIFO method.

**Dividends**

We did not declare any dividends on our common shares for all periods presented in the consolidated financial statements. We are currently restricted from paying cash dividends by the terms of our secured revolving bank credit facility (*see Note 8. Long-Term Debt, Financing and Capital Lease Obligations*).

**Accumulated Other Comprehensive Loss**

The components of accumulated other comprehensive loss, net of tax were as follows:

	March 31,	
	2017	2016
	<i>(in millions)</i>	
Unrecognized net periodic pension and postretirement benefit cost	\$ (369)	\$ (407)
Unrealized net losses on derivatives	(2)	—
Foreign currency translation adjustments	(33)	(32)
Accumulated other comprehensive loss	<u>\$ (404)</u>	<u>\$ (439)</u>

**Per Share Data**

Basic net loss per common share is calculated by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted net loss per common share adjusts basic net loss per common share, computed using the treasury stock method, for the effects of potentially dilutive common shares, if the effect is not antidilutive. Outstanding options and restricted stock units (exclusive of participating securities) that had no effect on our computation of dilutive weighted average number of shares outstanding as their effect would have been antidilutive were approximately 114 million, 73 million, and 56 million as of the years ended March 31, 2017, 2016, and 2015, respectively, in addition to 62 million total shares issuable under warrants, of which 55 million relate to shares issuable under the warrant held by SoftBank. The warrant was issued to SoftBank at the close of the merger with SoftBank and is exercisable at \$5.25 per share at the option of Softbank, in whole or in part, at any time on or prior to July 10, 2018.

**Note 14. Segments**

Sprint operates two reportable segments: Wireless and Wireline.

- Wireless primarily includes retail, wholesale, and affiliate revenue from a wide array of wireless voice and data transmission services and equipment revenue from the sale of wireless devices (handset and tablets) and accessories in the U.S., Puerto Rico and the U.S. Virgin Islands.

Table of ContentsIndex to Consolidated Financial Statements

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

- Wireline primarily includes revenue from domestic and international wireline voice and data communication services provided to other communications companies and targeted business subscribers, in addition to our Wireless segment.

We define segment earnings as wireless or wireline operating (loss) income before other segment expenses such as depreciation, amortization, severance, exit costs, goodwill impairments, asset impairments, and other items, if any, solely and directly attributable to the segment representing items of a non-recurring or unusual nature. Expense and income items excluded from segment earnings are managed at the corporate level. Transactions between segments are generally accounted for based on market rates, which we believe approximate fair value. The Company generally re-establishes these rates at the beginning of each fiscal year. Over the past several years, there has been an industry-wide trend of lower rates due to increased competition from other wireline and wireless communications companies as well as cable and Internet service providers.

Segment financial information is as follows:

<u>Statement of Operations Information</u>	Wireless	Wireline	Corporate, Other and Eliminations	Consolidated

Capital expenditures	\$ 6,381	\$ 279	\$ 312	\$ 6,972
Total assets	\$ 73,408	\$ 1,255	\$ 4,312	\$ 78,975
<b>As of and for the year ended March 31, 2015</b>				
Capital expenditures	\$ 5,442	\$ 275	\$ 287	\$ 6,004
Total assets	\$ 75,533	\$ 1,262	\$ 6,046	\$ 82,841

(1) Inter-segment revenues consist primarily of wireline services provided to the Wireless segment for resale to or use by wireless subscribers.

(2) Impairments for the year ended March 31, 2015 consist of a \$1.9 billion trade name impairment related to the Wireless segment and a \$233 million impairment related to Wireline long-lived assets.

(3) Other, net for the year ended March 31, 2017 consists of \$66 million of severance and exit costs, a \$140 million charge for a state tax matter combined with legal reserves related to other pending legal suits and proceedings, and a \$28 million loss on disposal of property, plant and equipment related to cell site construction costs that are no longer recoverable as a result of changes in our network plans. In addition, the year ended March 31, 2017 included a \$354 million non-cash gain related to spectrum license exchanges with other carriers and \$140 million of contract termination costs, primarily related to the termination of our pre-existing wholesale arrangement with nTelos, as a result of the Shentel transaction combined with the costs related to the termination of our relationship with General Wireless Operations Inc. (Radio Shack). Losses totaling \$481 million related to the write-off of leased devices associated with lease cancellations were excluded from Other, net and included within Wireless segment earnings. Other, net for the year ended March 31, 2016 consists of \$409 million of severance and exit costs, combined with \$193 million for legal reserves related to various pending legal suits and proceedings and a \$166 million loss on disposal of property, plant and equipment related to cell site construction costs and other network costs that are no longer recoverable as a result of changes in the Company's network plans, partially offset by \$20 million of income resulting from a revision to our estimate of a previously recorded reserve. Losses totaling \$321 million relating to the write-off of leased devices associated with lease cancellations of \$256 million and the loss on sale of devices to MLS under the Handset Sale-Leaseback Tranche 1 transaction for \$65 million was excluded from Other, net and included within Wireless segment earnings. Other, net for the year ended March 31, 2015 consists of \$304 million of severance and exit costs, combined with \$91 million for legal reserves related to various pending legal suits and proceedings and \$59 million for a partial pension settlement, partially offset by \$41 million of income resulting from a revision to our estimate of a previously recorded reserve.

**Note 16. Related-Party Transactions****SoftBank Related-Party Transactions**

In addition to agreements arising out of or relating to the SoftBank Merger, Sprint has entered into various other arrangements with SoftBank or its controlled affiliates (SoftBank Parties) or with third parties to which SoftBank Parties are also parties, including for international wireless roaming, wireless and wireline call termination, real estate, logistical management and other services.

**Brightstar**

We have arrangements with Brightstar US, Inc. (Brightstar), whereby Brightstar provides supply chain and inventory management services to us in our indirect channels and whereby Sprint may sell new and used devices and new accessories to Brightstar for its own purposes. To facilitate certain of these arrangements, we have extended a \$700 million credit line to Brightstar to assist with the purchasing and distribution of devices and accessories. As a result, we shifted our concentration of credit risk away from our indirect channel partners to Brightstar. As Brightstar is a subsidiary of SoftBank, we expect SoftBank will provide the necessary support to ensure that Brightstar will fulfill its obligations to us under these agreements. However, we have no assurance that SoftBank will provide such support.

The supply chain and inventory management arrangement included, among other things, that Brightstar may purchase inventory from the OEMs to sell directly to our indirect dealers. As compensation for these services, we remit per unit fees to Brightstar for each device sold to dealers or retailers in our indirect channels. During the years ended March 31, 2017, 2016, and 2015 we incurred fees under these arrangements totaling \$64 million, \$102 million, and \$66 million, respectively. Additionally, we have an arrangement with Brightstar whereby they perform certain of our reverse logistics including device buyback, trade-in technology and related services. We may also purchase new and used devices and accessories from Brightstar to be sold in our direct channels.

[Table of Contents](#)[Index to Consolidated Financial Statements](#)

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

Amounts included in our consolidated financial statements associated with these arrangements with Brightstar were as follows:

Consolidated balance sheets:	March 31,	
	2017	2016
	<i>(in millions)</i>	
Accounts receivable	\$ 367	\$ 197
Accounts payable	\$ 160	\$ 96

Consolidated statements of operations:	Year Ended March 31,		
	2017	2016	2015
	<i>(in millions)</i>		
Equipment revenues	\$ 1,682	\$ 1,731	\$ 1,818
Cost of products	\$ 1,600	\$ 1,743	\$ 1,887

In addition, Sprint earned fees of approximately \$100 million, \$103 million, and \$13 million from a Brightstar subsidiary, in the years ended March 31, 2017, 2016, and 2015, respectively, for billing and collecting payments from subscribers under certain insurance programs.

**SoftBank**

In November 2015 and April 2016, Sprint entered into Handset Sale-Leaseback transactions with MLS, a company formed by a group of equity investors, including SoftBank, to sell and lease-back certain devices, which are currently being leased by our customers, for total cash proceeds of approximately \$2.2 billion. SoftBank's initial equity investment in MLS totaled \$79 million. Brightstar provides reverse logistics and remarketing services to MLS with respect to the devices.

In December 2016, Handset Sale-Leaseback Tranche I was terminated and the associated devices were repurchased by Sprint from MLS. With the cash proceeds, MLS repurchased the equity units from its investors including SoftBank. As a result, SoftBank's remaining equity investment in MLS totaled \$39 million as of March 31, 2017.

In April 2016, Sprint sold and leased back certain network equipment to Network LeaseCo. The network equipment acquired by Network LeaseCo, which is consolidated by us, was used as collateral to raise approximately \$2.2 billion in borrowings from external investors, including \$250 million from SoftBank. Principal and interest payments on the borrowings from the external investors will be repaid in staggered, unequal payments through January 2018 (See Note 3. *Funding Sources*) with the first principal payment of approximately \$300 million paid in March 2017 followed by the remaining \$1.9 billion of principal payments due in fiscal year 2017.

All other transactions under agreements with SoftBank Parties, in the aggregate, were immaterial through the period ended March 31, 2017.

**SPRINT CORPORATION**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

**Note 17. Guarantor Financial Information**

On September 11, 2013, Sprint Corporation issued \$2.25 billion aggregate principal amount of 7.250% notes due 2021 and \$4.25 billion aggregate principal amount of 7.875% notes due 2023 in a private placement transaction with registration rights. On December 12, 2013, Sprint Corporation issued \$2.5 billion aggregate principal amount of 7.125% notes due 2024 in a private placement transaction with registration rights. Each of these issuances is fully and unconditionally guaranteed by Sprint Communications, Inc. (Subsidiary Guarantor), which is a 100% owned subsidiary of Sprint Corporation (Parent/Issuer). In connection with the foregoing, the registration rights agreements with respect to the notes required the Company and Sprint Communications, Inc. to use their reasonable best efforts to cause an offer to exchange the notes for a new issue of substantially identical exchange notes registered under the Securities Act of 1933. Accordingly, in November 2014, we completed an exchange offer for these notes in compliance with our registration obligations. We did not receive any proceeds from this exchange offer. In addition, on February 24, 2015, Sprint Corporation issued \$1.5 billion aggregate principal amount of 7.625% notes due 2025, which are fully and unconditionally guaranteed by Sprint Communications, Inc.

During the years ended March 31, 2017 and 2016 there were non-cash equity contributions from the Subsidiary Guarantor to the Non-Guarantor Subsidiaries as a result of organizational restructuring for tax purposes of approximately \$450 million and \$1.5 billion, respectively.

Under the Subsidiary Guarantor's secured revolving bank credit facility, the Subsidiary Guarantor is currently restricted from paying cash dividends to the Parent/Issuer or any Non-Guarantor Subsidiary because the ratio of total indebtedness to adjusted EBITDA (each as defined in the applicable agreement) exceeds 2.5 to 1.0.

Sprint has a Receivables Facility providing for the sale of eligible wireless service, installment and certain future lease receivables. In November 2015, Sprint also entered into the Tranche 1 transaction to sell and lease-back certain leased devices, which was subsequently terminated in December 2016. In April 2016, Sprint entered into the Tranche 2 transaction to sell and leaseback certain leased devices and a Network Equipment Sale-Leaseback to sell and leaseback certain network equipment. In connection with the Receivables Facility, Tranches 1 and 2 and the Network Equipment Sale-Leaseback, Sprint formed certain wholly-owned consolidated bankruptcy-remote SPEs and SPE Lessees that are included in the non-guarantor subsidiaries condensed consolidated financial information. Each SPE and SPE Lessee is a separate legal entity with its own separate creditors who will be entitled, prior to and upon the liquidation of the SPE or SPE Lessee, to be satisfied out of the SPE or SPE Lessee's assets prior to any assets in the SPE and SPE Lessee becoming available to Sprint (*see Note 3. Funding Sources*).

We have accounted for investments in subsidiaries using the equity method. Presented below is the condensed consolidating financial information.

**Cash Tender Offers for Certain Outstanding Debt**

On May 9, 2017, the Company's wholly-owned subsidiary, Sprint Communications, Inc. commenced tender offers to purchase for cash up to an aggregate principal amount of \$1.0 billion of its 9.000% Guaranteed Notes due 2018 and its 8.375% Notes due 2017. The tender offer with respect to the Guaranteed Notes due 2018 is also subject to a maximum principal amount sublimit of \$500 million. On May 23, 2017, the Company subsequently amended the terms of the tender offers to increase the aggregate principal amount of notes subject to the tender offers to \$1.7 billion and increase the maximum principal amount sublimit applicable to the Guaranteed Notes due 2018 to \$1.2 billion. The tender offers are intended to lower the Company's current overall interest expense and decrease current debt levels and will be funded by available cash on hand. The tender offers will each expire on June 6, 2017, unless extended or earlier terminated by the Company in accordance with the terms of the offers.

As of May 23, 2017, the Company had accepted early tenders for approximately \$1.2 billion principal amount of 9.000% Guaranteed Notes due 2018 and approximately \$388 million principal amount of 8.375% Notes due 2017. As a result of the early tenders, approximately \$1.6 billion aggregate principal amount of debt was retired, and the tender offer for 9.000% Guaranteed Notes due 2018 was concluded. The tender offer for 8.375% Notes due 2017 is still in effect until June 6, 2017, although it is now limited to approximately \$112 million principal amount of such notes.

## Cautionary Statement Regarding Forward-Looking Statements

This Annual Report on Form 10-K ("Form 10-K") includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, including information concerning our future results of operations, are forward-looking statements. These forward-looking statements are generally identified by the words "anticipate," "believe," "estimate," "expect," "intend," "may," "could" or similar expressions. Forward-looking statements are based on current expectations and assumptions, which are subject to risks and uncertainties and may cause actual results to differ materially from the forward-looking statements. The following important factors, along with the Risk Factors included in Part I, Item 1A of this Form 10-K, could affect future results and cause those results to differ materially from those expressed in the forward-looking statements:

- adverse economic or political conditions in the U.S. and international markets;
- competition in the wireless services market, including new competitors entering the industry as technologies converge;
- the effects any future merger or acquisition involving us, as well as the effects of mergers or acquisitions in the technology, media and telecommunications industry;
- challenges in implementing our business strategies or funding our wireless operations, including payment for additional spectrum or network upgrades;
- the possibility that we may be unable to renew our spectrum licenses on attractive terms or acquire new spectrum licenses at reasonable costs and terms;
- difficulties in managing growth in wireless data services, including network quality;
- material changes in available technology;
- the timing, scope and financial impact of our deployment of advanced network and business technologies;
- the impact on our networks and business from major technology equipment failures;
- breaches of our and/or our third party vendors' networks, information technology ("IT") and data security;
- natural disasters, terrorist attacks or similar incidents;
- existing or future litigation;
- any changes in the regulatory environments in which we operate, including any increase in restrictions on the ability to operate our networks;
- any disruption or failure of our third parties' or key suppliers' provisioning of products or services;
- material adverse changes in labor matters, including labor campaigns, negotiations or additional organizing activity, and any resulting financial, operational and/or reputational impact;
- the ability to make payments on our debt or to repay our existing indebtedness when due;
- adverse change in the ratings of our debt securities or adverse conditions in the credit markets;
- changes in accounting assumptions that regulatory agencies, including the Securities and Exchange Commission ("SEC"), may require, which could result in an impact on earnings; and,
- changes in tax laws, regulations and existing standards and the resolution of disputes with any taxing jurisdictions.

Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. In this Form 10-K, unless the context indicates otherwise, references to "T-Mobile," "T-Mobile US," "our Company," "the Company," "we," "our," and "us" refer to T-Mobile US, Inc., a Delaware corporation, and its wholly-owned subsidiaries.

## PART I.

### Item 1. Business

#### Business Overview

We are the Un-carrier<sup>®</sup>. Un-satisfied with the status quo. Un-afraid to innovate. T-Mobile is the fastest growing wireless company in the U.S. based on customer growth in 2016. T-Mobile provides wireless communications services, including voice, messaging and data, to more than 71 million customers in the postpaid, prepaid and wholesale markets. The Un-carrier strategy is an approach that seeks to listen to the customer, address their pain points, bring innovation to the industry and improve the wireless experience for all. In practice, this means offering our customers a great service on a nationwide 4G Long-Term Evolution ("LTE") network, offering devices when and how our customers want them, and providing plans that are simple, affordable and without unnecessary restrictions. Going forward, we will continue to listen and respond to our customers, refine and improve the Un-carrier strategy and deliver the best value experience in the industry.

Table of Contents**History**

T-Mobile USA, Inc. ("T-Mobile USA") was formed in 1994 as VoiceStream Wireless PCS ("VoiceStream"), a subsidiary of Western Wireless Corporation ("Western Wireless"). VoiceStream was spun off from Western Wireless in 1999, acquired by Deutsche Telekom AG ("Deutsche Telekom") in 2001 and renamed T-Mobile USA, Inc. in 2002.

In 2013, T-Mobile US, Inc. was formed through the business combination between T-Mobile USA and MetroPCS Communications, Inc. ("MetroPCS"). The business combination was accounted for as a reverse acquisition with T-Mobile USA as the accounting acquirer. Accordingly, T-Mobile USA's historical financial statements became the historical financial statements of the combined company.

Our common stock and our 5.50% mandatory convertible preferred stock, Series A ("preferred stock") trade on the NASDAQ Global Select Market of The NASDAQ Stock Market LLC ("NASDAQ") under the symbols "TMUS" and "TMUSP," respectively.

**Business Strategy**

We generate revenue by offering affordable wireless communication services to our postpaid, prepaid and wholesale customers, as well as a wide selection of wireless devices and accessories. Our most significant expenses are related to acquiring and retaining high-quality customers, providing a full range of devices, compensating employees, and operating and expanding our network. We provide service, devices and accessories across our flagship brands, T-Mobile and MetroPCS, through our owned and operated retail stores, third party distributors and our websites (www.T-Mobile.com and www.MetroPCS.com). The information on our websites is not part of this Form 10-K.

We continue to aggressively pursue our strategy, which includes the following elements:

*Un-carrier Strategy*

We introduced our Un-carrier strategy in 2013 and continue to aggressively focus on addressing customer pain points with the launch of additional signature moves. Un-carrier initiatives have included, but are not limited to, offering the following to qualifying customers:

- providing customers with affordable rate plans while eliminating annual service contracts;
- allowing customers easier options to upgrade their eligible devices when they want;
- reimbursing qualifying customers' early termination fees and/or remaining phone payments when they switch from other carriers and trade-in their phones;
- allowing customers to stream music without it counting against their high speed data allotment;
- providing Wi-Fi calling and texting for customers with capable smartphones;
- giving qualified customers the ability to roll-over up to 20 GB per year of their unused high-speed data automatically each month;
- providing reduced United States to international calling rates, and providing messaging and data roaming while traveling abroad at no extra charge;
- allowing customers to access coverage and calling, as well as 4G LTE data, across the U.S., Mexico and Canada at no extra charge;
- providing select video streaming services without it counting against their high speed data allotment on qualifying plans;
- offering eligible new (through December 31, 2016) or existing (as of June 6, 2016) customers ownership in the Company with a free share of T-Mobile stock or an additional share of T-Mobile stock for every new active account each customer refers through December 31, 2016, subject to a maximum of 100 shares in a calendar year;
- enabling eligible customers who download the T-Mobile Tuesday app to be informed about and to redeem products and services offered by participating business partners each Tuesday;
- offering eligible customers a full hour of free in-flight Wi-Fi on their smartphone on all Gogo-equipped domestic flights;
- giving our customers one simple rate plan, T-Mobile ONE™, that includes unlimited calls, unlimited text and unlimited high-speed 4G LTE data on their device; and

## Table of Contents

- beginning in 2017, with our introduction of Un-carrier Next, T-Mobile ONE includes:
  - monthly wireless service fees and taxes in the advertised monthly recurring charge;
  - paying participating customers back for data that is not used in a month if they use less than 2GB high-speed data/month; and
  - giving customers the first-ever price guarantee on an unlimited 4G LTE plan and allowing our customers to keep their T-Mobile ONE price until they decide to change it.

### *Customer Experience*

The ongoing success of our Un-carrier strategy and continued transformation of the network has strengthened T-Mobile's position as a provider of dependable high-speed 4G LTE service. Additionally, we have continued to focus on retaining customers by delivering an improved wireless customer experience. Branded postpaid phone churn improved to 1.30% in 2016, compared to 1.39% in 2015 and 1.58% in 2014. On September 1, 2016, we sold our marketing and distribution rights to certain existing T-Mobile co-branded customers to a current Mobile Virtual Network Operators ("MVNO") partner for nominal consideration. The impact of this transaction resulted in improvements to branded postpaid phone churn for the year ended December 31, 2016. See Performance Measures of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation of this Form 10-K for information regarding this transaction. Our branded postpaid net customer additions remained strong with 4.1 million in 2016, compared to 4.5 million in 2015 and 4.9 million in 2014, primarily driven by strong customer response to our Un-carrier initiatives, ongoing improvements to network quality, and promotions for services and devices. In addition, we continue to buildout our Extended Range LTE, which operates on our low-band 700 MHz A-Block spectrum. These results reinforce our position as an organization with a strong focus and commitment to providing an outstanding customer experience.

### *Aligned Cost Structure*

We continue to pursue a low-cost business operating model to drive cost savings, which can then be reinvested in the business. These cost-reduction programs are on-going as we continue to simplify our business and drive operational efficiencies and cost savings in areas, such as network optimization, customer roaming and customer service. A portion of these savings have been, and will continue to be, reinvested into growth of our business.

### **Customers**

We provide wireless communication services to three primary categories of customers:

- Branded postpaid customers generally include customers that are qualified to pay after using wireless communication services;
- Branded prepaid customers generally include customers who pay for wireless communication services in advance. Our branded prepaid customers include customers of T-Mobile and MetroPCS; and
- Wholesale customers include Machine-to-Machine ("M2M") and MVNO that operate on our network, but are managed by wholesale partners.

We generate the majority of our service revenues by providing wireless communication services to branded postpaid and branded prepaid customers. Our ability to acquire and retain branded postpaid and prepaid customers is important to our business in the generation of service revenues, equipment revenues and other revenues. In 2016, our service revenues generated by providing wireless communication services by customer category were:

- 65% branded postpaid customers;
- 31% branded prepaid customers; and
- 4% wholesale customers, roaming and other services.

### **Services and Products**

We provide wireless communication services through a variety of service plan options. We also offer a wide selection of wireless devices, including smartphones, tablets and other mobile communication devices, which are manufactured by various suppliers. Services, devices and accessories are offered directly to consumers through our owned and operated retail stores, as

## Table of Contents

well as through our websites. In addition, we sell devices to dealers and other third party distributors for resale through independent third-party retail outlets and a variety of third-party websites.

Our service plan offerings, which allow customers to subscribe for wireless services separately from the purchase of a device include:

- Our T-Mobile ONE plan (T-Mobile ONE), which was launched in September 2016 as phase 12.0 of our Un-carrier initiatives. T-Mobile ONE gives our customers unlimited calls, unlimited text and unlimited high-speed 4G LTE data on their device. On T-Mobile ONE, video typically streams at DVD (480p) quality and tethering is at maximum 3G speeds. Customers can choose to add on additional features to T-Mobile ONE for an additional cost. On T-Mobile ONE Plus customers also receive unlimited High Definition Video Day Passes, Voicemail to Text, NameID, unlimited Gogo in-flight internet passes on capable domestic flights and up to two times faster speeds when traveling abroad in 140+ countries and destinations. On T-Mobile ONE Plus International, customers receive the benefits of T-Mobile ONE Plus as well as free and reduced calling from the U.S. to foreign countries and unlimited high-speed 4G LTE mobile hotspot data in the U.S., Mexico and Canada.
- In January 2017, we introduced the latest in our Un-carrier initiatives, Un-carrier Next, where monthly wireless service fees and taxes are included in the advertised monthly recurring charge for T-Mobile ONE. We also unveiled Kickback on T-Mobile ONE, where participating customers who use 2 GB or less of data in a month, will get an up to a \$10 credit on their next month's bill per qualifying line. In addition, we introduced the Un-contract for T-Mobile ONE with the first-ever price guarantee on an unlimited 4G LTE plan, which allows T-Mobile ONE customers to keep their price for service until they decide to change it.
- Simple Choice plans, which were launched in 2013 as part of phase 1.0 of our Un-carrier initiatives, eliminated annual service contracts and simplified the lineup of consumer rate plans to one affordable plan for unlimited voice and messaging services with the option to add data services. On January 25, 2017, we streamlined our Simple Choice plan offerings to new customers into our T-Mobile ONE plan.

Depending on their credit profile, customers are qualified either for postpaid or prepaid service.

Our device options for customers on T-Mobile ONE, and previously on Simple Choice plans, include:

- Depending on their credit profile, qualifying customers who purchase a device from us have the option of financing all or a portion of the purchase price at the time of sale over an installment period of up to 24 months using our Equipment Installment Plan ("EIP").
- In addition, qualifying customers who finance their initial device with an EIP can enroll in our JUMP!<sup>®</sup> program ("JUMP!") to later upgrade their device. Upon a qualifying JUMP! upgrade, the customer's remaining EIP balance is settled provided they trade-in their used device at the time of upgrade in good working condition and purchase a new device from us on a new EIP.
- In 2015, we introduced JUMP! On Demand. With JUMP! On Demand, a low monthly payment covers the cost of leasing a new device and gives qualified customers the freedom to exchange it for a new device up to three times in 12 months for no extra fee. Upon device upgrade or at lease end, customers must return their device in good working condition or purchase their device.

## **Network Transformation Update**

We continue to increase the depth, breadth and functionality of the nation's densest LTE network by adding new spectrum to increase coverage, and re-farming existing spectrum and implementing new technology to augment capacity. Collectively, these network advancements help provide improved network performance and reliability for our customers.

## *Spectrum Growth*

We provide mobile communication services utilizing mid-band spectrum licenses, such as Advanced Wireless Services ("AWS") and Personal Communications Service ("PCS"), and low-band spectrum licenses utilizing our 700 MHz A-Block spectrum.

- We owned or had agreements to own an average of 86 MHz of spectrum across the top 25 markets in the U.S. as of December 31, 2016, comprised of an average of 12 MHz in the 700 MHz band, 30 MHz in the 1900 MHz PCS band and 44 MHz in the AWS band. This is compared to an average of 85 MHz of spectrum across the top 25 markets in the U.S. as of December 31, 2015.

Table of Contents

- Over the last year, we have entered into and closed on various agreements for the acquisition and exchange of 700 MHz A-Block, AWS and PCS spectrum licenses. See Note 5 – Goodwill, Spectrum Licenses and Other Intangible Assets of the Notes to the Consolidated Financial Statements.
- In addition, we intend to opportunistically acquire spectrum licenses in private party transactions and future Federal Communications Commissions (“FCC”) spectrum license auctions, including the broadcast incentive auction of low-band 600 MHz spectrum licenses that is currently in-progress.
- We have continued to build out our network to concentrate our cell sites where our customers need data most. We had approximately 66,000 cell sites, including macro sites and distributed antenna system network nodes as of December 31, 2016, compared to approximately 64,000 cell sites as of December 31, 2015.
- In 2015, we completed the shutdown of the MetroPCS Code Division Multiple Access (“CDMA”) network. The migration of customers from the MetroPCS CDMA network onto T-Mobile’s LTE and Evolved High Speed Packet Access Plus network provides faster network performance for MetroPCS customers with compatible handsets.

*Network Coverage Growth*

- We continue to expand our coverage breadth and currently provide 4G LTE coverage to 314 million people, up from zero 4G LTE coverage four years ago. We are targeting to provide 320 million people with 4G LTE coverage by year-end 2017.
- We own 700 MHz A-Block spectrum covering 272 million people or approximately 84% of the U.S. population. The spectrum covers all of the top 10 market areas and 29 of the top 30 market areas in the U.S.
- We have deployed our 700 MHz A-Block spectrum in over 500 market areas covering more than 252 million people under the name “Extended Range LTE.” We expect to continue to aggressively roll-out new 700 MHz market areas in 2017 including Chicago, Eastern Montana, and substantially all of the remaining population in 700 MHz licensed areas.

*Network Capacity Growth*

We continue to expand our capacity through the re-farming of existing spectrum and implementation of new technologies including Voice over LTE (“VoLTE”), Carrier Aggregation, 4x4 MIMO, and 256 Quadrature Amplitude Modulation (“QAM”).

- At the end of the fourth quarter of 2016, approximately 70% of spectrum was being used for 4G LTE compared to 52% at the end of the fourth quarter of 2015. We expect to continue to re-farm spectrum currently committed to 2G and 3G technologies.
- Re-farmed spectrum enables us to continue expanding Wideband LTE, which currently covers 232 million people. Wideband LTE refers to markets that have bandwidth of at least 15+15 MHz dedicated to 4G LTE.
- VoLTE currently comprises approximately 67% of total voice calls compared to 39% in December 2015. Moving voice traffic to VoLTE frees up spectrum and allows for the transition of spectrum currently used for 2G and 3G to 4G LTE. We are leading the U.S. wireless industry in terms of VoLTE migration.
- Carrier aggregation is live for our customers in 674 cities. This advanced technology delivers superior speed and performance by bonding two or three discrete spectrum channels together.
- 4x4 MIMO is currently available in more than 300 cities. This technology effectively delivers twice the speed, and incremental network capacity, to customers by doubling the number of data paths between the cell site and a customer's device.
- We have rolled out 256 QAM, which increases the number of bits delivered per transmission to enable faster speed.
- Innovative programs like Binge On and T-Mobile ONE also create capacity by optimizing video for mobile viewing. These programs deliver material capacity benefits to both customers and our network. Since the launch of Binge On, our customers have watched more than 4 billion hours of optimized video.

*Network Speed Leadership*

We continue to have the fastest nationwide 4G LTE network in the U.S. based on both download and upload speeds from millions of user-generated tests. This is the twelfth consecutive quarter that we have led the industry in both download and upload speeds.

## Table of Contents

### **Distribution**

We had approximately 52,000 total points of distribution, including approximately 13,000 T-Mobile and MetroPCS branded locations and 39,000 third-party and national retailer locations, as well as distribution through our websites, as of December 31, 2016. Our distribution density in major metropolitan areas provides customers with the convenience of having retail and service locations close to where they live and work.

### **Competition**

The wireless telecommunications industry is highly competitive. We are the third largest provider of postpaid service plans and the largest provider of prepaid service plans in the U.S. as measured by customers. Our competitors include other national carriers, such as AT&T Inc. ("AT&T"), Verizon Communications, Inc. ("Verizon") and Sprint Corporation. AT&T and Verizon are significantly larger than us and may enjoy greater resources and scale advantages as compared to us. In addition, our competitors include numerous smaller regional carriers, existing MVNOs, such as TracFone Wireless, Inc., and future MVNOs, such as Comcast Corporation and Charter Communications, Inc., many of which offer or plan to offer no-contract, prepaid service plans. Competitors also include providers who offer similar communication services, such as voice and messaging, using alternative technologies or services. Competitive factors within the wireless telecommunications industry include pricing, market saturation, service and product offerings, customer experience, network investment and quality, development and deployment of technologies, availability of additional spectrum licenses and regulatory changes. Some competitors have shown a willingness to use aggressive pricing as a source of differentiation. Other competitors have sought to add ancillary services, like mobile video, to enhance their offerings. Taken together, the competitive factors we face continue to put pressure on margins as companies compete to retain the current customer base and continue to add new customers.

### **Employees**

As of December 31, 2016, we employed approximately 50,000 full-time and part-time employees, including network, retail, administrative and customer support functions.

### **Regulation**

The FCC regulates many key aspects of our business, including licensing, construction, the operation and use of our network, modifications of our network, control and ownership of our licenses and authorizations, the sale, transfer and acquisition of certain licenses, domestic roaming arrangements and interconnection agreements, pursuant to its authority under the Communications Act of 1934, as amended ("Communications Act"). The FCC has a number of complex requirements and proceedings that affect our operations and that could increase our costs or diminish our revenues. For example, the FCC has rules regarding provision of 911 and E-911 services, porting telephone numbers, interconnection, roaming, internet openness or net neutrality, disabilities access, privacy and cybersecurity, consumer protection, and the universal service and Lifeline programs. Many of these and other issues are being considered in ongoing proceedings, and we cannot predict whether or how such actions will affect our business, financial condition or results of operations. Our ability to provide services and generate revenues could be harmed by adverse regulatory action or changes to existing laws and regulations. In addition, regulation of companies that offer competing services can impact our business indirectly.

Wireless communications providers must be licensed by the FCC to provide communications services at specified spectrum frequencies within specified geographic areas and must comply with the rules and policies governing the use of the spectrum as adopted by the FCC. The FCC issues each license for a fixed period of time, typically 10 years in the case of cellular, PCS and point-to-point microwave licenses. AWS licenses have an initial term of 15 years, with successive 10-year terms thereafter. While the FCC has generally renewed licenses given to operating companies like us, the FCC has authority to both revoke a license for cause and to deny a license renewal if a renewal is not in the public interest. Furthermore, we could be subject to fines, forfeitures and other penalties for failure to comply with FCC regulations, even if any such non-compliance was unintentional. In extreme cases, penalties can include revocation of our licenses. The loss of any licenses, or any related fines or forfeitures, could adversely affect our business, results of operations and financial condition.

Additionally, Congress' and the FCC's allocation of additional spectrum for broadband commercial mobile radio service ("CMRS"), which includes cellular, PCS and specialized mobile radio, could significantly increase competition. We cannot assess the impact that any developments that may occur in the U.S. economy or any future spectrum allocations by the FCC may have on license values. FCC spectrum auctions and other market developments may adversely affect the market value of our licenses in the future. A significant decline in the value of our licenses could adversely affect our financial condition and results of operations. In addition, the FCC periodically reviews its policies on how to evaluate carriers' spectrum holdings. A change in these policies could affect spectrum resources and competition among us and other carriers.

Table of Contents

Congress and the FCC have imposed limitations on foreign ownership of CMRS licensees that exceed 20% direct ownership or 25% indirect ownership. The FCC has ruled that higher levels of indirect foreign ownership, even up to 100%, are presumptively consistent with the public interest albeit subject to review. Consistent with that established policy, the FCC has issued a declaratory ruling authorizing up to 100% ownership of our company by Deutsche Telekom. This declaratory ruling, and our licenses, are conditioned on Deutsche Telekom's and the Company's compliance with a network security agreement with the Department of Justice, the Federal Bureau of Investigation and the Department of Homeland Security. Failure to comply with the terms of this agreement could result in fines, injunctions and other penalties, including potential revocation of our spectrum licenses.

While the Communications Act generally preempts state and local governments from regulating the entry of, or the rates charged by, wireless communication providers, certain state and local governments regulate other terms and conditions of wireless service, including billing, termination of service arrangements and the imposition of early termination fees, advertising, network outages, the use of devices while driving, zoning and land use. Additionally, the Federal Trade Commission ("FTC") and other federal agencies have asserted that they have jurisdiction over some consumer protection and elimination and prevention of anticompetitive business practices with respect to the provision of non-common carrier services. Further, the FCC and the Federal Aviation Administration regulate the siting, lighting and construction of transmitter towers and antennae. Tower siting and construction are also subject to state and local zoning, as well as federal statutes regarding environmental and historic preservation. The future costs to comply with all relevant regulations are to some extent unknown and changes to regulations, or the applicability of regulations, could result in higher operating and capital expenses, or reduced revenues in the future.

**Available Information**

Our Form 10-K and all other reports and amendments filed with or furnished to the SEC, are publicly available free of charge on the Investor Relations section of our website at investor.t-mobile.com or at www.sec.gov as soon as reasonably practicable after these materials are filed with or furnished to the SEC. Our corporate governance guidelines, code of business conduct, code of ethics for senior financial officers and charters for the audit, compensation, nominating and corporate governance and executive committees of our board of directors are also posted on the Investor Relations section of our website at investor.t-mobile.com. The information on our websites is not part of this or any other report we file with, or furnishes to, the SEC.

Investors and others should note that we announce material financial and operational information to our investors using our investor relations website, press releases, SEC filings and public conference calls and webcasts. We intend to also use the @TMobileIR Twitter account (<https://twitter.com/TMobileIR>) and the @JohnLegere Twitter (<https://twitter.com/JohnLegere>), Facebook and Periscope accounts, which Mr. Legere also uses as means for personal communications and observations, as means of disclosing information about the Company and its services and for complying with its disclosure obligations under Regulation FD. The information we post through these social media channels may be deemed material. Accordingly, investors should monitor these social media channels in addition to following the Company's press releases, SEC filings and public conference calls and webcasts. The social media channels that we intend to use as a means of disclosing the information described above may be updated from time to time as listed on the Company's investor relations website.

**Item 1A. Risk Factors**

In addition to the other information contained in this Form 10-K, the following risk factors should be considered carefully in evaluating T-Mobile. Our business, financial condition, liquidity, or operating results, as well as the price of our common stock and other securities, could be materially adversely affected by any of these risks.

***Risks Related to Our Business and the Wireless Industry***

**The scarcity and cost of additional wireless spectrum, and regulations relating to spectrum use, may adversely affect our business strategy and financial performance.**

We will need to acquire additional spectrum in order to continue our customer growth, expand and deepen our coverage, maintain our quality of service, meet increasing customer demands and deploy new technologies. We will be at a competitive disadvantage and possibly experience erosion in the quality of service in certain markets if we fail to gain access to necessary spectrum before reaching capacity. As a result, we are actively seeking to make additional investment in spectrum, which could be significant.

Table of Contents

The continued interest in, and acquisition of, spectrum by existing carriers and others may reduce our ability to acquire and/or raise the cost of acquiring spectrum in the secondary market or negatively impact our ability to gain access to spectrum through other means, including government auctions. We may need to enter into spectrum sharing or leasing arrangements, which are subject to certain risks and uncertainties and may involve significant expenditures. Although the FCC is conducting an auction for low band spectrum, in which we are participating, gaining access to that spectrum may take up to three years or more. Any material delay could adversely impact our ability to implement our plans and efforts to improve our network. In addition, our return on investment in spectrum depends on our ability to attract additional customers and to provide additional services and usage to existing customers. As a result, the return on any investment in spectrum that we make may not be as much as we anticipate or take longer than expected. Additionally, we may be unable to secure the spectrum we need in any auction we may elect to participate in or in the secondary market, on favorable terms or at all.

The FCC may impose conditions on the use of new wireless broadband mobile spectrum, including new restrictions or rules governing the use or access to current or future spectrum. This could increase pressure on capacity. Additional conditions that may be imposed by the FCC include heightened build-out requirements, limited renewal rights, clearing obligations, or open access or net neutrality requirements that may make it less attractive or less economical to acquire spectrum. In addition, rules may be established for future government spectrum auctions that may negatively impact our ability to obtain spectrum economically or in appropriate configurations or coverage areas.

If we cannot acquire needed spectrum from the government or otherwise, if competitors acquire spectrum that will allow them to provide services competitive with our services, or if we cannot deploy services over acquired spectrum on a timely basis without burdensome conditions, at reasonable cost, and while maintaining network quality levels, then our ability to attract and retain customers and our associated financial performance could be materially adversely affected.

**Competition, industry consolidation, and changes in the market for wireless services could negatively affect our ability to attract and retain customers and adversely affect our business, financial condition, and operating results.**

We have multiple wireless competitors, some of which have greater resources than us and compete for customers based principally on service/device offerings; price; network coverage, speed and quality; and customer service. We expect market saturation to continue to cause the wireless industry's customer growth rate to be moderate in comparison with historical growth rates or possibly negative, leading to ongoing competition for customers. Customer churn may increase as the wireless industry shifts away from service contracts. We also expect that our customers' appetite for data services will place increasing demands on our network capacity. This competition and our capacity will continue to put pressure on pricing and margins as companies compete for potential customers. Our ability to compete will depend on, among other things, continued absolute and relative improvement in network quality and customer services, effective marketing and selling of products and services, attractive pricing, and cost management, all of which will involve significant expenses.

Joint ventures, mergers, acquisitions and strategic alliances in the wireless sector have resulted in and are expected to result in larger competitors competing for a limited number of customers. The two largest national wireless communication providers currently serve a significant percentage of all wireless customers and hold significant spectrum and other resources. Our largest competitors may be able to enter into exclusive handset, device, or content arrangements, execute pervasive advertising and marketing campaigns, or otherwise improve their cost position relative to ours. In addition, refusal of our large competitors to provide critical access to resources and inputs, such as roaming services on reasonable terms, could improve their position within the wireless broadband mobile services industry.

We are also facing competition from other service providers as industry sectors converge, such as telecom services and content; satellite, wireless, and fiber; and other service providers. Companies like Comcast and AT&T/DirecTV (and AT&T's proposed acquisition of Time Warner) will have the scale and assets to aggressively compete in a converging industry. Verizon is also a significant competitor focusing on premium content offerings as well as acquisitions and proposed acquisitions like AOL and Yahoo to diversify outside of core wireless. Further, some of our competitors now provide content services in addition to voice and broadband services, and consumers are increasingly accessing video content from Internet-based providers and applications, all of which create increased competition in this area. These factors, together with the effects of the increasing aggregate penetration of wireless services in all metropolitan areas and the ability of our larger competitors to use resources to build out their networks and to quickly deploy advanced technologies, could make it more difficult for us to continue to attract and retain customers, and may adversely affect our competitive position and ability to grow, which would have a material adverse effect on our business, financial condition and operating results.

Table of Contents

**If we are unable to take advantage of technological developments on a timely basis, we may experience a decline in demand for our services or face challenges in implementing or evolving our business strategy.**

Significant technological changes continue to impact the communications industry. In general, these technological changes enhance communications and enable a broader array of companies to offer services competitive with ours. In order to grow and remain competitive with new and evolving technologies in our industry, we will need to adapt to future changes in technology, continually invest in our network, enhance our existing offerings, and introduce new offerings to address our current and potential customers' changing demands. Enhancing our network, such as deploying 5G, is subject to risk from equipment changes and migration of customers from existing spectrum bands and the potential inability to secure spectrum necessary to deploy advanced technologies. Adopting new and sophisticated technologies may result in implementation issues such as scheduling and supplier delays, unexpected or increased costs, technological constraints, regulatory permitting issues, customer dissatisfaction, and other issues that could cause delays in launching new technological capabilities, which in turn could result in significant costs or reduce the anticipated benefits of the upgrades. In general, the development of new services in the wireless telecommunications industry will require us to anticipate and respond to the continuously changing demands of our customers, which we may not be able to do accurately or timely. We could experience a material adverse effect on our business, operations, financial condition and operating results if our new services fail to retain or gain acceptance in the marketplace or if costs associated with these services are higher than anticipated.

**We could be harmed by data loss or other security breaches, whether directly or by way of third parties.**

Our business, like that of most retailers and wireless companies, involves the receipt, storage, and transmission of confidential information, including sensitive personal information and payment card information, confidential information about our employees and suppliers, and other sensitive information about our company, such as our business plans, transactions and intellectual property ("confidential information"). Unauthorized access may be difficult to anticipate, detect, or prevent, particularly given that the methods of unauthorized access constantly change and evolve. We may experience unauthorized access or distribution of confidential information by third parties or employees, errors or breaches by third party suppliers, or other breaches of security that compromise the integrity of confidential information, and such breaches can have a materially adverse effect on our business or damage our reputation.

In addition, cyber-attacks, such as denial of service and other malicious attacks, could disrupt our internal systems and applications, impair our ability to provide services to our customers, and have other adverse effects on our business and that of others who depend on our services. As a telecommunications carrier, we are considered a critical infrastructure provider and therefore may be more likely to be the target of such attacks. Such attacks against companies may be perpetrated by a variety of groups or persons, including those in jurisdictions where U.S. law enforcement is or has been unable to effectively address such attacks.

In addition, we provide confidential, proprietary and personal information to third-party service providers when it is necessary to pursue business objectives. We and our third-party service providers have been subject to unauthorized access to confidential information in the past, including a breach at one of our credit check providers in September 2015 in which a subset of records containing current and potential customer information was compromised by an external party.

Although we regularly review our procedures and safeguards to prevent unauthorized access to sensitive data and to defend against attacks seeking to disrupt our services, the ever-evolving threat landscape requires us to continually evaluate and adapt our systems and processes. We cannot assure you that the preventive actions we take will be adequate to repel a significant attack or prevent information security breaches or the misuses of data, unauthorized access by third parties or employees, or exploits against third-party supplier environments. If we are subject to such attacks or compromise, we may incur significant costs, be subject to regulatory investigations, sanctions and private litigation, experience disruptions to our operations or suffer damage to our reputation. Although the cyber-attacks that we and our third-party service providers have been subjected to in the past have not caused significant harm to our company, future cyber-attacks may materially adversely affect our business, financial condition, and operating results.

**System failures and business disruptions may allow unauthorized use of or interference with our network and other systems which could be materially adversely affect our reputation and financial condition.**

To be successful, we must provide our customers with reliable, trustworthy service and protect the communications, location, and personal information shared or generated by our customers. We rely upon both our systems and networks and the systems and networks of other providers and suppliers to provide and support our services and, in some cases, protect our customers' and our information. Failure of our or others' systems, networks, or infrastructure may prevent us from providing reliable service or may allow for the unauthorized use of or interference with our networks and other systems or for the compromise of

Table of Contents

customer information. Examples of these risks include:

- human error such as responding to deceptive communications or unintentionally executing malicious code;
- physical damage, power surges or outages, or equipment failure, including those as a result of severe weather, natural disasters, terrorist attacks, and acts of war;
- theft of customer and/or proprietary information offered for sale for competitive advantage or corporate extortion;
- unauthorized access to our IT and business systems or to our network and critical infrastructure and those of our suppliers and other providers;
- supplier failures or delays; and
- system failures or outages of our business systems or communications network.

Such events could cause us to lose customers, lose revenue, incur expenses, suffer reputational and goodwill damages, and subject us to litigation or governmental investigation. Remediation costs could include liability for information loss, repairing infrastructure and systems, and/or costs of incentives offered to customers. Our insurance may not cover, or be adequate to fully reimburse us for, costs and losses associated with such events.

**We are in the process of implementing a new billing system, which will support a portion of our subscribers, while maintaining our legacy billing system. Any unanticipated difficulties, disruption, or significant delays could have adverse operational, financial, and reputational effects on our business.**

We are currently implementing a new customer billing system, which involves a new third-party supported platform and utilization of a phased deployment approach. Post implementation, we plan to operate both the existing and new billing systems in parallel to aid in the transition to the new system until all phases of the conversion are complete.

The implementation may cause major system or business disruptions, or we may fail to implement the new billing system in a timely or effective manner. In addition, the third-party billing services supporting vendor may experience errors, cyber-attacks, or other operational disruptions that could negatively impact us and over which we may have limited control. Interruptions and/or failure of this new billing services system could disrupt our operations and impact our ability to provide or bill for our services, retain customers, attract new customers, or negatively impact overall customer experience. Any occurrence of the foregoing could cause material adverse effects on our operations and financial condition, material weaknesses in our internal control over financial reporting, and reputational damage.

**We rely on third parties to provide products or services for the operation of our business, and a failure or inability by such parties to provide these products or services could adversely affect our business, financial condition, and operating results.**

We depend heavily on suppliers, their subcontractors, and other third parties in order for us to efficiently operate our business. Our business is complex, and it is not unusual for multiple vendors located in multiple locations to help us to develop, maintain, and troubleshoot products and services, such as network components, software development services, and billing and customer service support. Our suppliers may provide services outside of the United States, which carries associated additional regulatory and legal obligations. We generally rely upon the suppliers to provide contractual assurances and accurate information regarding risks associated with their provision of products or services in accordance with our expectations and standards such as our supplier code of conduct and our third party-risk management standard, and they may fail to do so.

Generally, there are multiple sources for the types of products and services we purchase or use. However, we currently rely on a limited number of suppliers for billing services, voice and data communications transport services, network infrastructure, equipment, handsets, other devices, and payment processing services, among other products and services. Disruptions or failure of such suppliers to adequately perform could have a material adverse effect on our business, operations, and financial performance.

In the past, our suppliers, contractors and third-party retailers may not have always performed at the levels we expected or at the levels required by their contracts. Our business could be severely disrupted if key suppliers, contractors, service providers, or third-party retailers fail to comply with their contracts or become unable to continue the supply due to patent or other intellectual property infringement actions or other disruptions. Our business could also be disrupted if we experience delays or service degradation during any transition to a new outsourcing provider or other supplier or we were required to replace the supplied products or services with those from another source, especially if the replacement became necessary on short notice. Any such disruptions could have a material adverse effect on our business, financial condition, and operating results.

Table of Contents**Economic, political, and market conditions may adversely affect our business and financial performance, as well as our access to financing on favorable terms or at all.**

Our business and financial performance are sensitive to changes in general economic conditions, including interest rates, consumer credit conditions, consumer debt levels, consumer confidence, rates of inflation (or concerns about deflation), unemployment rates, economic growth, energy costs, and other macro-economic factors. Difficult, or worsening, general economic conditions could have a material adverse effect on our business, financial condition, and operating results.

Market volatility, political and economic uncertainty, and weak economic conditions may materially adversely affect our business and financial performance in a number of ways. Our services are available to a broad customer base, a significant segment of which may be more vulnerable to weak economic conditions. We may have greater difficulty in gaining new customers within this segment, and existing customers may be more likely to terminate service due to an inability to pay.

Weak economic conditions and credit conditions may also adversely impact our suppliers and dealers, some of which have filed for or may be considering bankruptcy, or may experience cash flow or liquidity problems, or are unable to obtain or refinance credit such that they may no longer be able to operate. Any of these could adversely impact our ability to distribute, market, or sell our products and services.

In addition, instability in the global financial markets could lead to periodic volatility in the credit, equity, and fixed income markets. This volatility could limit our access to the credit markets, leading to higher borrowing costs or, in some cases, the inability to obtain financing on terms that are acceptable to us or at all.

**The agreements governing our indebtedness and other financing arrangements include restrictive covenants that limit our operating flexibility.**

The agreements governing our indebtedness impose significant operating and financial restrictions on us. These restrictions, subject in certain cases to customary baskets, exceptions, and incurrence-based ratio tests, may limit our or our subsidiaries' ability to engage in some transactions, including the following:

- incurring additional indebtedness and issuing preferred stock;
- paying dividends, redeeming capital stock, or making other restricted payments or investments;
- selling or buying assets, properties, or licenses, including participating in future FCC auctions of spectrum or private sales of spectrum;
- developing assets, properties, or licenses that we have or in the future may procure;
- creating liens on assets;
- engaging in mergers, acquisitions, business combinations, or other transactions;
- entering into transactions with affiliates; and
- placing restrictions on the ability of subsidiaries to pay dividends or make other payments.

These restrictions could limit our ability to react to changes in our operating environment or the economy. Any future indebtedness that we incur may contain similar or more restrictive covenants. Any failure to comply with the restrictions of our debt agreements may result in an event of default under these agreements, which in turn may result in defaults or acceleration of obligations under these agreements and other agreements, giving our lenders the right to terminate any commitments they had made to provide us with further funds and to require us to repay all amounts then outstanding. Any of these events would have a material adverse effect on our business, financial condition, and operating results.

**Our significant indebtedness could adversely affect our business, financial condition and operating results.**

Our ability to make payments on our debt, to repay our existing indebtedness when due, and to fund our capital intensive business and operations, and significant planned capital expenditures will depend on our ability to generate cash in the future, which is in turn subject to the operational risks described elsewhere in this report. Our debt service obligations could have material adverse effects on our business, financial condition, and operating results, including by:

- limiting our flexibility in planning for, or reacting to, changes in our business or the communications industry or pursuing

growth opportunities;

- reducing the amount of cash available for other operational or strategic needs; and

Table of Contents

- placing us at a competitive disadvantage to competitors who are less leveraged than we are.

Some of our debt also has a floating rate of interest linked to various indices. If the resets or the change in indices result in interest rate increases, debt service requirements will increase, which could adversely affect our cash flow and operating results. While we have and may enter into agreements limiting our exposure to higher interest rates in the future, any such agreements may not offer complete protection from this risk, and any portion not subject to such agreements would have full exposure to higher interest rates. Any of these risks could have a material adverse effect on our business, financial condition and operating results.

**Failure to maintain effective internal controls in accordance with Section 404 of the Sarbanes-Oxley Act could result in a loss of investor confidence regarding our financial statements or may have a material adverse effect on our business.**

Under Section 404 of the Sarbanes-Oxley Act of 2002, we along with our independently registered public accounting firm are required to report on the effectiveness of our internal controls over financial reporting. We rely heavily on IT systems as an important part of our internal controls in order to operate, transact, and otherwise manage our business, as well as provide effective and timely reporting of our financial results. Failure to design and maintain effective internal controls, including those over our IT systems, could constitute a material weakness that could result in inaccurate financial statements, inaccurate disclosures, or failure to prevent fraud. If we or our independent registered public accounting firm were unable to conclude that we have effective internal controls, investor confidence regarding our financial statements and our business could be materially adversely affected.

**Our financial performance will be impaired if we experience high fraud rates related to device financing, credit cards, dealers, or subscriptions.**

Our operating costs could increase substantially as a result of fraud, including device financing, customer credit card, subscription, or dealer fraud. If our fraud detection strategies and processes are not successful in detecting and controlling fraud, whether directly or by way of the systems, processes, and operations of third parties such as national retailers, dealers, and others, the resulting loss of revenue or increased expenses could have a materially adverse impact on our financial condition and operating results.

**We rely on highly-skilled personnel throughout all levels of our business. Our business could be harmed if we are unable to retain or motivate key personnel, hire qualified personnel or maintain our corporate culture.**

The market for highly skilled workers and leaders in our industry is extremely competitive. We believe that our future success depends in substantial part on our ability to recruit, hire, motivate, develop, and retain talented and highly-skilled personnel for all areas of our organization. Doing so may be difficult due to many factors, including fluctuations in economic and industry conditions, changes to U.S. immigration policy, competitors' hiring practices, employee tolerance for the significant amount of change within and demands on our company and our industry, and the effectiveness of our compensation programs. Our continued ability to compete effectively depends on our ability to retain and motivate our existing employees and to attract new employees. If we do not succeed in retaining and motivating our existing key employees and attracting new key personnel, we may not be able to meet our business plan and, as a result, our revenue growth and profitability may be materially adversely affected.

**Any acquisition, investment, or merger may subject us to significant risks, any of which may harm our business.**

We may pursue acquisitions of, investments in or mergers with businesses, technologies, services and/or products that complement or expand our business. Some of these potential transactions could be significant relative to the size of our business and operations. Any such transaction would involve a number of risks and could present financial, managerial and operational challenges, including:

- diversion of management attention from running our existing business;
- increased costs to integrate the networks, spectrum, technology, personnel, customer base and business practices of the business involved in any such transaction with our business;
- difficulties in effectively integrating the financial and operational reporting systems of the business involved in any such transaction into (or supplanting such systems with) our financial and operational reporting infrastructure and internal control framework in an effective and timely manner;
- potential exposure to material liabilities not discovered in the due diligence process or as a result of any litigation arising in connection with any such transaction;
- significant transaction expenses in connection with any such transaction, whether consummated or not;

Table of Contents

- risks related to our ability to obtain any required regulatory approvals necessary to consummate any such transaction;
- acquisition financing may not be available on reasonable terms or at all and any such financing could significantly increase our outstanding indebtedness or otherwise affect our capital structure or credit ratings; and
- any business, technology, service, or product involved in any such transaction may significantly under-perform relative to our expectations, and we may not achieve the benefits we expect from our transaction, which could, among other things, also result in a write-down of goodwill and other intangible assets associated with such transaction.

For any or all of these reasons, our pursuit of an acquisition, investment, or merger may have a material adverse effect on our business, financial condition, and operating results.

***Risks related to Legal and Regulatory Matters*****Changes in regulations or in the regulatory framework under which we operate could adversely affect our business prospects or operating results.**

The FCC regulates the licensing, construction, modification, operation, ownership, sale, and interconnection of wireless communications systems, as do some state and local regulatory agencies. In particular, the FCC imposes significant regulation on licensees of wireless spectrum with respect to how radio spectrum is used by licensees, the nature of the services that licensees may offer and how the services may be offered, and resolution of issues of interference between spectrum bands. Additionally, the FTC and other federal agencies have asserted that they have jurisdiction over some consumer protection, and elimination and prevention of anticompetitive business practices with respect to the provision of wireless products and services. We are subject to regulatory oversight by various federal, state and local agencies, as well as judicial review and actions, on issues related to the wireless industry that include, but are not limited to: roaming, spectrum allocation and licensing, facilities siting, pole attachments, intercarrier compensation, Universal Service Fund ("USF"), net neutrality, special access, 911 services, consumer protection, consumer privacy, and cybersecurity. We are also subject to regulations in connection with other aspects of our business, including handset financing and insurance activities.

We cannot assure you that the FCC or any other federal, state or local agencies will not adopt regulations or take other enforcement or other actions that would adversely affect our business, impose new costs, or require changes in current or planned operations. For example, in June 2015, the FCC's new net neutrality rules became effective, with the exception of enhanced transparency requirements, a portion of which became effective January 2017. In 2016, the FCC also adopted a new broadband privacy regime that applies to our operations. Both sets of rules potentially subject some of our initiatives and practices to more burdensome requirements and heightened scrutiny by federal and state regulators, the public, edge providers, and private litigants regarding whether such initiatives or practices are compliant.

In addition, states are increasingly focused on the quality of service and support that wireless communication providers provide to their customers and several states have proposed or enacted new and potentially burdensome regulations in this area. We also face potential investigations by, and inquiries from or actions by state Public Utility Commissions. We also cannot assure you that Congress will not amend the Communications Act, from which the FCC obtains its authority and which serves to limit state authority, or enact other legislation in a manner that could be adverse to our business.

Failure to comply with applicable regulations could have a material adverse effect on our business, financial condition and operating results. We could be subject to fines, forfeitures, and other penalties (including, in extreme cases, revocation of our spectrum licenses) for failure to comply with FCC or other governmental regulations, even if any such non-compliance was unintentional. The loss of any licenses, or any related fines or forfeitures, could adversely affect our business, financial condition, and operating results.

**Unfavorable outcomes of legal proceedings may adversely affect our business and financial condition.**

We are regularly involved in a number of legal proceedings before various state and federal courts, the FCC, the FTC, other federal agencies, and state and local regulatory agencies, including state attorneys general. Such legal proceedings can be complex, costly, and highly disruptive to business operations by diverting the attention and energies of management and other key personnel. The assessment of the outcome of legal proceedings, including our potential liability, if any, is a highly subjective process that requires judgments about future events that are not within our control. The amounts ultimately received or paid upon settlement or pursuant to final judgment, order or decree may differ materially from amounts accrued in our financial statements. In addition, litigation or similar proceedings could impose restraints on our current or future manner of doing business. Such potential outcomes including judgments, awards, settlements or orders could have a material adverse effect on our business, financial condition, operating results or ability to do business.

Table of Contents**We offer highly regulated financial services products. These products expose us to a wide variety of state and federal regulations.**

The financing of devices, including through our EIP and JUMP! On Demand programs, has expanded our regulatory compliance obligations. If we fail to remain compliant with any of these regulations, then we face the risk of:

- increased consumer complaints and potential examinations or enforcement actions by federal and state regulatory agencies, including but not limited to the Consumer Financial Protection Board, the FCC and the FTC;
- violation of financial services and consumer protections regulations may result in regulatory fines, penalties, enforcement actions, civil litigation, and/or class action lawsuits.

Failure to comply with applicable regulations and the realization of any of these risks could have a material adverse effect on our business, financial condition, and operating results.

**We may not be able to adequately protect our intellectual property rights or may be accused of infringing intellectual property rights of third parties.**

We rely on a combination of patent, service mark, trademark, and trade secret laws and contractual restrictions to establish and protect our proprietary rights, all of which offer only limited protection. The steps we have taken to protect our intellectual property may not prevent the misappropriation of our proprietary rights. We may not have the ability in certain jurisdictions to adequately protect intellectual property rights. Moreover, others may independently develop processes and technologies that are competitive to ours. Also, we may not be able to discover or determine the extent of any unauthorized use of our proprietary rights. Unauthorized use of our intellectual property rights may increase the cost of protecting these rights or reduce our revenues. We cannot be sure that any legal actions against such infringers will be successful, even when our rights have been infringed. We cannot assure you that our pending or future patent applications will be granted or enforceable, or that the rights granted under any patent that may be issued will provide us with any competitive advantages. In addition, we cannot assure you that any trademark or service mark registrations will be issued with respect to pending or future applications or will provide adequate protection of our brands. We do not have insurance coverage for intellectual property losses, and as such, a charge for an anticipated settlement or an adverse ruling awarding damages represents unplanned loss events. Any of these factors could have material adverse effects on our business, financial condition, and operating results.

Third parties may claim we infringe their intellectual property rights. We are a defendant in numerous intellectual property lawsuits, including patent infringement lawsuits, which exposes us to the risk of adverse financial impact either by way of significant settlement amounts or damage awards. As we adopt new technologies and new business systems, and provide customers with new products and/or services, we may face additional infringement claims. These claims could require us to cease certain activities or to cease selling relevant products and services. These claims can be time-consuming and costly to defend, and divert management resources, and expose us to significant damages awards or settlements, any or all of which could have a material adverse effect on our operations and financial condition. In addition to litigation directly involving our company, our vendors and suppliers can be threatened with patent litigation and/or subjected to the threat of disruption or blockage of sale, use, or importation of products, posing the risk of supply chain interruption to particular products and associated services exposing us to material adverse operational and financial impacts.

**Our business may be impacted by new or changing tax laws or regulations and actions by federal, state, and/or local agencies, or how judicial authorities apply tax laws.**

In connection with the products and services we sell, we calculate, collect, and remit various federal, state, and local taxes, surcharges and regulatory fees ("tax" or "taxes") to numerous federal, state and local governmental authorities, including federal USF contributions and common carrier regulatory fees. In addition, we incur and pay state and local taxes and fees on purchases of goods and services used in our business.

Tax laws are dynamic and subject to change as new laws are passed and new interpretations of the law are issued or applied. In many cases, the application of tax laws are uncertain and subject to differing interpretations, especially when evaluated against new technologies and telecommunications services, such as broadband internet access and cloud related services. Changes in tax laws could impact revenue on tax inclusive plans.

In the event that we have incorrectly described, disclosed, calculated, assessed, or remitted amounts that were due to governmental authorities, we could be subject to additional taxes, fines, penalties, or other adverse actions, which could materially impact our operations or financial condition. In the event that federal, state, and/or local municipalities were to

## Table of Contents

significantly increase taxes on our network, operations, or services, or seek to impose new taxes, it could have a material adverse effect on our margins and financial and operational results.

### **Our wireless licenses are subject to renewal and may be revoked in the event that we violate applicable laws.**

Our existing wireless licenses are subject to renewal upon the expiration of the 10-year or 15-year period for which they are granted. Historically, the FCC has approved our license renewal applications. However, the Communications Act provides that licenses may be revoked for cause and license renewal applications denied if the FCC determines that a renewal would not serve the public interest. In addition, our licenses are subject to our compliance with the terms set forth in the agreement pertaining to national security among Deutsche Telekom, the Federal Bureau of Investigation, the Department of Justice, the Department of Homeland Security and the Company. The failure of Deutsche Telekom or the Company to comply with the terms of this agreement could result in fines, injunctions and other penalties, including potential revocation or non-renewal of our spectrum licenses. If we fail to timely file to renew any wireless license or fail to meet any regulatory requirements for renewal, including construction and substantial service requirements, we could be denied a license renewal. Many of our wireless licenses are subject to interim or final construction requirements and there is no guarantee that the FCC will find our construction, or the construction of prior licensees, sufficient to meet the build-out or renewal requirements. The FCC has pending a rulemaking proceeding to reevaluate, among other things, its wireless license renewal showings and standards and may in this or other proceedings promulgate changes or additional substantial requirements or conditions to its renewal rules, including revising license build out requirements. Accordingly, we cannot assure you that the FCC will renew our wireless licenses upon their expiration. If any of our wireless licenses were to be revoked or not renewed upon expiration, we would not be permitted to provide services under that license, which could have a material adverse effect on our business, financial condition, and operating results.

### **Our business could be adversely affected by findings of product liability for health/safety risks from wireless devices and transmission equipment, as well as by changes to regulations/radio frequency emission standards.**

We do not manufacture the devices or other equipment that we sell, and we depend on our suppliers to provide defect-free and safe equipment. Suppliers are required by applicable law to manufacture their devices to meet certain governmentally imposed safety criteria. However, even if the devices we sell meet the regulatory safety criteria, we could be held liable with the equipment manufacturers and suppliers for any harm caused by products we sell if such products are later found to have design or manufacturing defects. We generally seek to enter into indemnification agreements with the manufacturers who supply us with devices to protect us from losses associated with product liability, but we cannot guarantee that we will be fully protected against all losses associated with a product that is found to be defective.

Allegations have been made that the use of wireless handsets and wireless transmission equipment, such as cell towers, may be linked to various health concerns, including cancer and brain tumors. Lawsuits have been filed against manufacturers and carriers in the industry claiming damages for alleged health problems arising from the use of wireless handsets. In addition, the FCC has from time to time gathered data regarding wireless handset emissions and its assessment of this issue may evolve based on its findings. The media has also reported incidents of handset battery malfunction, including reports of batteries that have overheated. These allegations may lead to changes in regulatory standards. There have also been other allegations regarding wireless technology, including allegations that wireless handset emissions may interfere with various electronic medical devices (including hearing aids and pacemakers), airbags and anti-lock brakes. Defects in the products of our suppliers, such the recent recalls by a handset Original Equipment Manufacturer ("OEM") on one of its smartphone devices, could have an adverse impact on our operating results.

Additionally, there are safety risks associated with the use of wireless devices while operating vehicles or equipment. Concerns over any of these risks and the effect of any legislation, rules or regulations that have been and may be adopted in response to these risks could limit our ability to sell our wireless services.

### ***Related to Ownership of our Common Stock***

#### **We are controlled by Deutsche Telekom, whose interests may differ from the interests of our other stockholders.**

Deutsche Telekom beneficially owns and possesses majority voting power of the fully diluted shares of our common stock.

Through its control of the voting power of our common stock and the rights granted to Deutsche Telekom in our certificate of incorporation and the Stockholder's Agreement, Deutsche Telekom controls the election of our directors and all other matters requiring the approval of our stockholders. By virtue of Deutsche Telekom's voting control, we are a "controlled company," as defined in the NASDAQ listing rules, and are not subject to NASDAQ requirements that would otherwise require us to have a

Table of Contents

majority of independent directors, a nominating committee composed solely of independent directors or a compensation committee composed solely of independent directors. Accordingly, our stockholders will not be afforded the same protections generally as stockholders of other NASDAQ-listed companies with respect to corporate governance for so long as we rely on these exemptions from the corporate governance requirements.

In addition, our certificate of incorporation and the Stockholder's Agreement restrict us from taking certain actions without Deutsche Telekom's prior written consent as long as Deutsche Telekom beneficially owns 30% or more of the outstanding shares of our common stock, including:

- the incurrence of debt (excluding certain permitted debt) if our consolidated ratio of debt to cash flow for the most recently ended four full fiscal quarters for which financial statements are available would exceed 5.25 to 1.0 on a pro forma basis;
- the acquisition of any business, debt or equity interests, operations or assets of any person for consideration in excess of \$1 billion;
- the sale of any of our or our subsidiaries' divisions, businesses, operations or equity interests for consideration in excess of \$1 billion;
- any change in the size of our board of directors;
- the issuances of equity securities in excess of 10% of our outstanding shares or to repurchase debt held by Deutsche Telekom;
- the repurchase or redemption of equity securities or the declaration of extraordinary or in-kind dividends or distributions other than on a pro rata basis; or
- the termination or hiring of our chief executive officer.

These restrictions could prevent us from taking actions that our board of directors may otherwise determine are in the best interests of the Company and our stockholders or that may be in the best interests of our other stockholders.

Deutsche Telekom effectively has control over all matters submitted to our stockholders for approval, including the election or removal of directors, changes to our certificate of incorporation, a sale or merger of our company and other transactions requiring stockholder approval under Delaware law. Deutsche Telekom's controlling interest may have the effect of making it more difficult for a third party to acquire, or discouraging a third party from seeking to acquire, the Company. Deutsche Telekom may have strategic, financial, or other interests different from our other stockholders, including as the holder of a substantial amount of our indebtedness and as the counter-party in a number of commercial arrangements, and may make decisions adverse to the interests of our other stakeholders.

**Future sales or issuances of our common stock, including sales by Deutsche Telekom, could have a negative impact on our stock price.**

We cannot predict the effect, if any, that market sales of shares or the availability of shares of our common stock will have on the prevailing trading price of our common stock from time to time. Sales of a substantial number of shares of our common stock could cause our stock price to decline and could result in dilution of your shares.

We and Deutsche Telekom are parties to the Stockholder's Agreement pursuant to which Deutsche Telekom is free to transfer its shares in public sales without notice, as long as such transactions would not result in the transferee owning 30% or more of the outstanding shares of our common stock. If a transfer would exceed the 30% threshold, it is prohibited unless the transferee makes a binding offer to purchase all of the other outstanding shares on the same price and terms. The Stockholder's Agreement does not otherwise impose any other restrictions on the sales of common stock by Deutsche Telekom. Moreover, we have filed a shelf registration statement with respect to the common stock and certain debt securities held by Deutsche Telekom, which would facilitate the resale by Deutsche Telekom of all or any portion of the shares of our common stock it holds. The sale of shares of our common stock by Deutsche Telekom (other than in transactions involving the purchase of all of our outstanding shares) could significantly increase the number of shares available in the market, which could cause a decrease in our stock price. In addition, even if Deutsche Telekom does not sell a large number of its shares into the market, its right to transfer a large number of shares into the market may depress our stock price.

In addition, we have reserved up to 38.684 million shares of common stock for issuance upon conversion of our preferred stock, subject to certain anti-dilution adjustments. The dividends on the preferred stock may also be paid in cash or, subject to certain limitations, shares of common stock or any combination of cash and shares of common stock. The issuance of additional shares of common stock upon conversion of, or in connection with the payment of dividends upon, the mandatory

Table of Contents

convertible preferred stock may depress our stock price.

**Our stock price may be volatile, and may fluctuate based upon factors that have little or nothing to do with our business, financial condition and operating results.**

The trading prices of the securities of communications companies historically have been highly volatile, and the trading price of our common stock may be subject to wide fluctuations. Our stock price may fluctuate in reaction to a number of events and factors that may include, among other things:

- our or our competitors' actual or anticipated operating and financial results; introduction of new products and services by us or our competitors or changes in service plans or pricing by us or our competitors;
- analyst projections, predictions and forecasts, analyst target prices for our securities and changes in, or our failure to meet, securities analysts' expectations;
- transaction in our common stock by major investors;
- Deutsche Telekom's financial performance, results of operation, or actions implied or taken by Deutsche Telekom;
- entry of new competitors into our markets or perceptions of increased price competition, including a price war;
- our performance, including subscriber growth, and our financial and operational metric performance;
- market perceptions relating to our services, network, handsets, and deployment of our LTE platform and our access to iconic handsets, services, applications, or content;
- market perceptions of the wireless communications industry and valuation models for us and the industry;
- conditions or trends in the Internet and the industry sectors we operate in;
- changes in our credit rating or future prospects;
- changes in interest rates;
- changes in our capital structure, including issuance of additional debt or equity to the public;
- the availability or perceived availability of additional capital in general and our access to such capital;
- actual or anticipated consolidation, or other strategic mergers or acquisition activities involving us or our competitors, or other participants in related or adjacent industries, or market speculations regarding such activities;
- disruptions of our operations or service providers or other vendors necessary to our network operations;
- the general state of the U.S. and world politics and economies, including changes in interest rates; and
- availability of additional spectrum, whether by the announcement, commencement, bidding and closing of auctions for new spectrum or the acquisition of companies that own spectrum, and the extent to which we or our competitors succeed in acquiring additional spectrum.

In addition, the stock market has been volatile in the recent past and has experienced significant price and volume fluctuations, which may continue for the foreseeable future. This volatility has had a significant impact on the trading price of securities issued by many companies, including companies in the communications industry. These changes frequently occur irrespective of the operating performance of the affected companies. Hence, the trading price of our common stock could fluctuate based upon factors that have little or nothing to do with our business, financial condition and operating results.

**We have never paid or declared any cash dividends on our common stock, and we do not intend to declare or pay any cash dividends on our common stock in the foreseeable future.**

We have never paid or declared any cash dividends on our common stock, and we do not intend to declare or pay any cash dividends on our common stock in the foreseeable future. Our credit facilities and the indentures and supplemental indentures governing our long-term debt to affiliates and third parties contain covenants that, among other things, restrict our ability to declare or pay dividends on our common stock. In addition, no dividend may be declared or paid on our common stock, other than dividends payable solely in Shares of our common stock, unless all accrued dividends for all completed dividend periods have been declared and paid on our preferred stock. Other than to pay dividends on our preferred stock, we currently intend to retain future earnings, if any, to invest in our business.

**Our stockholder rights plan could prevent a change in control of our Company in instances in which some stockholders may believe a change in control is in their best interests.**

We have a stockholder rights plan ("Rights Plan") in effect that will expire in March 2017, unless renewed. The Rights Plan will cause substantial dilution to a person or group that attempts to acquire our company on terms that our board of directors

Table of Contents

does not believe are in our and our stockholders' best interest. The Rights Plan is intended to protect stockholders in the event of an unfair or coercive offer to acquire the Company and to provide our board of directors with adequate time to evaluate unsolicited offers. The Rights Plan may prevent or make takeovers or unsolicited corporate transactions with respect to our company more difficult, even if stockholders may consider such transactions favorable, possibly including transactions in which stockholders might otherwise receive a premium for their shares.

**Item 1B. Unresolved Staff Comments**

None.

**Item 2. Properties**

As of December 31, 2016, our significant properties used in connection with switching centers, data centers, call centers and warehouses were as follows:

	Approximate Number	Approximate Size in Square Feet
Switching centers	57	1,400,000
Data centers	8	600,000
Call center	16	1,300,000
Warehouses	16	500,000

As of December 31, 2016, we leased approximately 60,000 cell sites.

As of December 31, 2016, we leased approximately 2,000 T-Mobile and MetroPCS retail locations, including stores and kiosks ranging in size from approximately 100 square feet to 17,000 square feet.

We currently lease office space totaling approximately 950,000 square feet for our corporate headquarters in Bellevue, Washington. We use these offices for engineering and administrative purposes. We also lease space throughout the U.S., totaling approximately 1,200,000 square feet as of December 31, 2016, for use by our regional offices primarily for administrative, engineering and sales purposes.

**Item 3. Legal Proceedings**

See Note 12 – Commitments and Contingencies of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for information regarding certain legal proceedings in which we are involved.

**Item 4. Mine Safety Disclosures**

None.

**PART II.****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market Information**

Our common stock is traded on the NASDAQ Global Select Market of The NASDAQ Stock Market LLC ("NASDAQ") under the symbol "TMUS." As of December 31, 2016, there were 309 registered stockholders of record of our common stock, but we estimate the total number of stockholders to be much higher as a number of our shares are held by brokers or dealers for their customers in street name.

Table of Contents

The high and low common stock sales prices per share were as follows:

	High		Low
<b>Year Ended December 31, 2016</b>			
First Quarter	\$ 41.23	\$	33.23
Second Quarter	44.13		37.93
Third Quarter	48.11		42.71
Fourth Quarter	59.19		44.91
<b>Year Ended December 31, 2015</b>			
First Quarter	\$ 33.48	\$	26.46
Second Quarter	40.77		31.19
Third Quarter	43.43		36.33
Fourth Quarter	42.06		34.24

We have never paid or declared any cash dividends on our common stock, and we do not intend to declare or pay any cash dividends on our common stock in the foreseeable future. Our credit facilities and the indentures and supplemental indentures governing our long-term debt to affiliates and third parties, excluding capital leases, contain covenants that, among other things, restrict our ability to declare or pay dividends on our common stock. In addition, no dividend may be declared or paid on our common stock, other than dividends payable solely in shares of our common stock, unless all accrued dividends for all completed dividend periods have been declared and paid on our preferred stock. Other than to pay dividends on our preferred stock, we currently intend to retain future earnings, if any, to invest in our business. Subject to Delaware law, our board of directors will determine the payment of future dividends on our common stock, if any, and the amount of any dividends in light of:

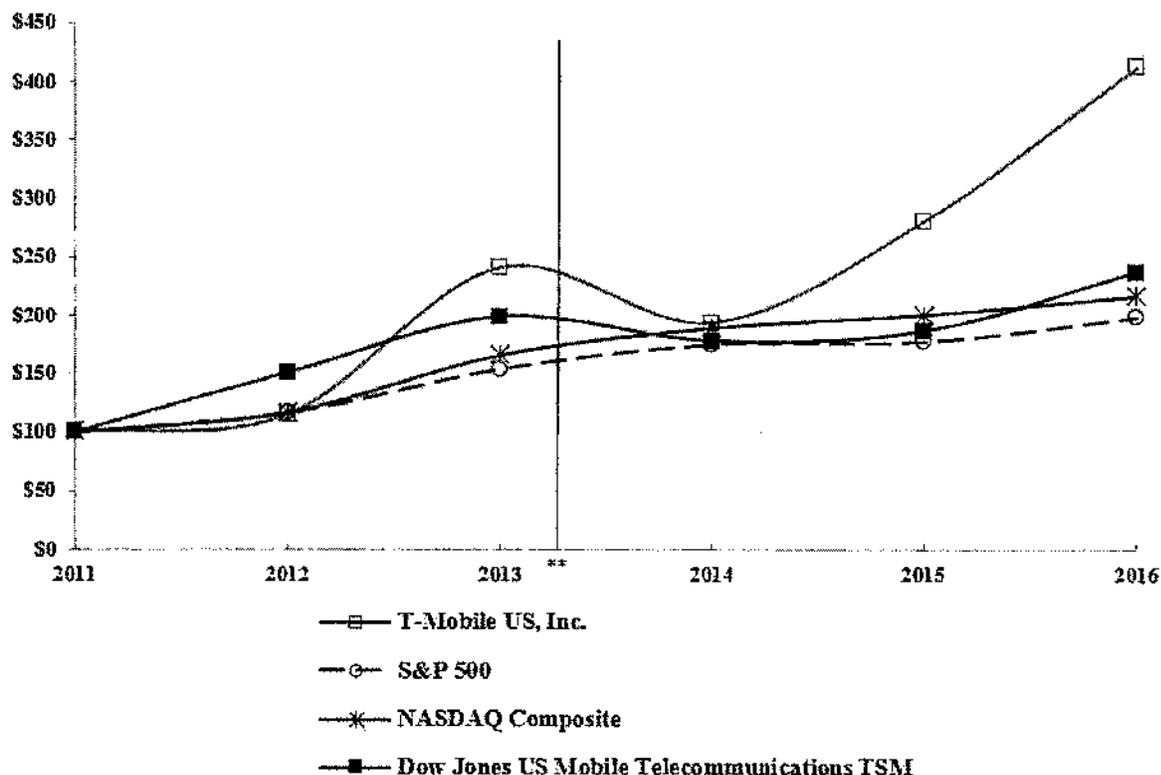

- any applicable contractual or charter restrictions limiting our ability to pay dividends;
- our earnings and cash flows;
- our capital requirements;
- our future needs for cash;
- our financial condition; and
- other factors our board of directors deems relevant.

### Performance Graph

The graph below compares the five-year cumulative total returns of T-Mobile, the NASDAQ Composite index, the S&P 500 index and the Dow Jones US Mobile Telecommunications TSM index. The graph tracks the performance of a \$100 investment, with the reinvestment of all dividends, from December 31, 2011 to December 31, 2016. For periods prior to the closing of the business combination with MetroPCS, our stock price performance represents the stock price of MetroPCS, adjusted to reflect the 1-for-2 reverse stock split effected on April 30, 2013.

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations****Overview**

The objectives of our Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") are to provide users of our consolidated financial statements with the following:

- A narrative explanation from the perspective of management of our financial condition, results of operations, cash flows, liquidity and certain other factors that may affect future results;
- Context to the financial statements; and
- Information that allows assessment of the likelihood that past performance is indicative of future performance.

Our MD&A is provided as a supplement to, and should be read together with, our audited consolidated financial statements for the three years ended December 31, 2016 included in Part II, Item 8 of this Form 10-K. Except as expressly stated, the financial condition and results of operations discussed throughout our MD&A are those of T-Mobile US, Inc. and its consolidated subsidiaries.

**Business Overview**

We introduced our Un-carrier strategy in 2013 with the objective of eliminating customer pain points from the unnecessary complexity of the wireless communication industry. Since that time, we have continued our efforts with the launch of additional initiatives of our Un-carrier strategy. During 2016, we launched the following Un-carrier initiatives:

- In June 2016, we introduced #GetThanked, a history-making move dedicated exclusively to saying “thank you” to our customers. This program, offered to our customers as part of their T-Mobile service: (i) offers eligible new (through December 31, 2016) or existing (as of June 6, 2016) customers ownership in the Company with a free share of T-

Table of Contents

Mobile stock or an additional share of T-Mobile stock for every new active account each customer refers through December 31, 2016, subject to a maximum of 100 shares in a calendar year, (ii) enables eligible customers who download the T-Mobile Tuesday app to be informed about and to redeem products and services offered by participating business partners each Tuesday and (iii) offers eligible customers a full hour of free in-flight Wi-Fi on their smartphone on all Gogo-equipped domestic flights.

- In September 2016, we introduced our T-Mobile ONE plan, a move that gives our customers unlimited calls, unlimited text and unlimited high-speed 4G Long Term Evolution (LTE) data. On T-Mobile ONE, video typically streams at DVD (480p) quality and tethering is at maximum 3G speeds. Customers can choose to add on additional features to T-Mobile ONE for an additional cost. On T-Mobile ONE Plus customers also receive unlimited High Definition Video Day Passes, Voicemail to Text, NameID, unlimited Gogo in-flight internet passes on capable domestic flights and up to two times faster speeds when traveling abroad in 140+ countries and destinations. On T-Mobile ONE Plus International, customers receive the benefits of T-Mobile ONE Plus as well as free and reduced calling from the U.S. to foreign countries and unlimited high-speed 4G LTE mobile hotspot data.
- In January 2017, we introduced, Un-carrier Next, where monthly wireless service fees and all taxes are included in the advertised monthly recurring charge for T-Mobile ONE. We also unveiled Kickback on T-Mobile ONE, where participating customers who use 2 GB or less of data in a month, will get up to a \$10 credit on their next month's bill per qualifying line. In addition, we introduced the Un-contract for T-Mobile ONE with the first-ever price guarantee on an unlimited 4G LTE plan which allows T-Mobile ONE customers to keep their price for service until they decide to change it.

Our ability to acquire and retain branded customers is important to our business in the generation of revenues and we believe our Un-carrier strategy, along with ongoing network improvements, has been successful in attracting and retaining customers as evidenced by continued branded customer growth and improved branded postpaid phone and branded prepaid customer churn.

(in thousands)	Year Ended December 31,			2016 Versus 2015		2015 Versus 2014	
	2016	2015	2014	% Change	% Change	% Change	% Change
<b>Net customer additions</b>							
Branded postpaid customers	4,097	4,510	4,886	(413)	(9)%	(376)	(8)%
Branded prepaid customers	2,508	1,315	1,244	1,193	91 %	71	6 %
Total branded customers	6,605	5,825	6,130	780	13 %	(305)	(5)%

	Year Ended December 31			Bps Change	
	2016	2015	2014	2016 Versus 2015	2015 Versus 2014
Branded postpaid phone churn	1.30%	1.39%	1.58%	-9 bps	-19 bps
Branded prepaid churn	3.88%	4.45%	4.76%	-57 bps	-31 bps

On September 1, 2016, we sold our marketing and distribution rights to certain existing T-Mobile co-branded customers to a current MVNO partner for nominal consideration (the "MVNO Transaction"). Upon the sale, the MVNO Transaction resulted in a transfer of 1,365,000 branded postpaid phone customers and 326,000 branded prepaid customers to wholesale customers. Prospectively from September 1, 2016, revenue for these customers is recorded within wholesale revenues in our Consolidated Statements of Comprehensive Income. Additionally, the impact of the MVNO Transaction resulted in improvements to branded postpaid phone churn for year ended December 31, 2016.

During the year ended December 31, 2016, a handset OEM announced recalls on certain of its smartphone devices. As a result, we recorded no revenue associated with the device sales to customers and impaired the devices to their net realizable value. The OEM has agreed to reimburse T-Mobile for direct and indirect costs associated with the recall, as such, we have recorded an amount due from the OEM as an offset to the loss recorded in Cost of equipment sales and the costs incurred within Selling, general and administrative in our Consolidated Statements of Comprehensive Income and a reduction to Accounts payable and accrued liabilities in our Consolidated Balance Sheets.

Table of Contents**Results of Operations****2016 Highlights**

- Total revenues increased \$5.2 billion, or 16%, to \$37.2 billion in 2016 primarily driven by growth in service and equipment revenues as further discussed below. The MVNO Transaction shifted Branded postpaid revenues to Wholesale revenues, but did not materially impact total revenues.
- Service revenues increased \$3.0 billion, or 12%, to \$27.8 billion in 2016 primarily due to growth in our average branded customer base as a result of strong customer response to our Un-carrier initiatives and the success of our MetroPCS brand and continued growth in new markets.
- Equipment revenues increased \$2.0 billion, or 30%, to \$8.7 billion in 2016 primarily as a result of higher lease revenues, which are recognized over the lease term, resulting from the launch of our JUMP! On Demand program at the end of the second quarter of 2015, an increase in the number of devices sold and a higher average revenue per device sold.
- Operating income increased \$1.7 billion, or 84%, to \$3.8 billion in 2016 primarily due to higher total revenues as well as increased gains on disposals of spectrum licenses, partially offset by higher depreciation and amortization from an increase in the number of devices leased under our JUMP! On Demand Program, higher costs of equipment sales primarily from an increase in the number of devices sold and a higher average cost per device and higher Selling, general and administrative expenses to support customer growth and retention.
- Net income increased \$727 million, or 99%, to \$1.5 billion in 2016 primarily due to higher operating income driven by the factors described above, partially offset by higher interest expense related to higher average debt and higher income tax expense. Additionally, 2016 included \$509 million of net, after-tax gains on disposal of spectrum licenses compared to \$100 million in 2015.
- Adjusted EBITDA increased \$3.0 billion, or 41%, to \$10.4 billion in 2016 primarily from higher service revenues and gains on disposal of spectrum licenses, partially offset by increases in selling, general and administrative expenses to support customer growth. Lower losses on equipment in 2016 primarily due to an increase in lease revenues resulting from the launch of our JUMP! On Demand program at the end of the second quarter of 2015. Revenues associated with leased devices are recognized over the lease term.
- Net cash provided by operating activities increased \$721 million, or 13%, to \$6.1 billion in 2016. The increase was primarily due to an increase in net non-cash income and expenses included in Net income primarily due to changes in Depreciation and Amortization, Deferred income tax expense and Gains on disposal of spectrum licenses expense, as well as an increase in Net income. The increase was partially offset by an increase in net cash outflows from changes in working capital.
- Free Cash Flow increased \$743 million, or 108%, to \$1.4 billion in 2016. The increase was primarily from higher net cash provided by operating activities as discussed above. Cash purchases of property and equipment includes capitalized interest of \$142 million and \$246 million in 2016 and 2015, respectively.

Table of Contents

Set forth below is a summary of our consolidated results:

(in millions)	Year Ended December 31,			2016 Versus 2015		2015 Versus 2014

**Comparing 2016 Results with 2015 Results**

**Total revenues** increased \$5.2 billion or 16% primarily due to:

**Branded postpaid revenues** increased \$1.8 billion or 11% primarily from:

- A 13% increase in the number of average branded postpaid phone and mobile broadband customers, driven by strong

customer response to our Un-carrier initiatives and promotions for services and devices;

- Higher device insurance program revenues primarily from customer growth; and
- Higher regulatory program revenues; partially offset by
- An increase in the non-cash net revenue deferral for Data Stash; and
- The impact of reduced Branded postpaid revenues resulting from the MVNO Transaction.

Table of Contents

**Branded prepaid revenues** increased \$1.0 billion or 13% primarily from:

- A 13% increase in the number of average branded prepaid customers driven by the success of our MetroPCS brand; and
- Continued growth in new markets.

**Wholesale revenues** increased \$211 million or 30% primarily from:

- The impact of the increased Wholesale revenues resulting from the MVNO Transaction;
- Growth in customers of certain MVNO partners; and
- An increase in data usage per customer.

**Roaming and other service revenues** increased \$57 million or 30% primarily due to higher international roaming revenues driven by an increase in inbound roaming volumes.

**Equipment revenues** increased \$2.0 billion or 30% primarily from:

- An increase of \$1.2 billion in lease revenues resulting from the launch of our JUMP! On Demand program at the end of the second quarter of 2015. Revenues associated with leased devices are recognized over the lease term.
- An increase of \$570 million in device sales revenues, primarily due to a 9% increase in the number of devices sold. Device sales revenue is recognized at the time of sale.

Gross EIP device financing to our customers increased by \$923 million to \$6.1 billion primarily due to an increase in devices financed due to our focus on EIP sales in 2016, compared to focus on devices financed on JUMP! On Demand after the launch of the program at the end of the second quarter of 2015.

**Other revenues** increased \$157 million or 31% primarily from:

- Higher revenue from revenue share agreements with third parties; and
- An increase in co-location rental income from leasing space on wireless communication towers to third parties.

Our operating expenses consist of the following categories:

- **Cost of services** consists primarily of costs directly attributable to providing wireless service through the operation of our network, including direct switch and cell site costs, such as rent, network access and transport costs, utilities, maintenance, associated labor costs, long distance costs, regulatory program costs, roaming fees paid to other carriers and data content costs.
- **Cost of equipment sales** consists primarily of costs of devices and accessories sold to customers and dealers, device costs to fulfill insurance and warranty claims, costs related to returned and purchased leased devices, write-downs of inventory related to shrinkage and obsolescence, and shipping and handling costs.
- **Selling, general and administrative** consists of costs not directly attributable to providing wireless service for the operation of sales, customer care and corporate activities. These include commissions paid to dealers and retail employees for activations and upgrades, labor and facilities costs associated with retail sales force and administrative space, marketing and promotional costs, customer support and billing, bad debt expense, losses from sales of receivables and back office administrative support activities.

**Operating expenses** increased \$3.5 billion or 12% primarily due to:

**Cost of services** increased \$177 million or 3% primarily from:

- Higher regulatory program costs and expenses associated with network expansion and the build-out of our network to utilize our 700 MHz A-Block spectrum licenses, including higher employee-related costs; partially offset by
- Lower long distance and toll costs; and

- Synergies realized from the decommissioning of the MetroPCS CDMA network.

Table of Contents

**Cost of equipment sales** increased \$1.5 billion or 16% primarily from:

- A 9% increase in the number of devices sold; and
- An increase in the impact from returned and purchased leased devices.

Under our JUMP! On Demand program, the cost of the leased wireless device is capitalized and recognized as depreciation expense over the term of the lease rather than recognized as cost of equipment sales when the device is delivered to the customer. Additionally, upon device upgrade or at lease end, customers must return or purchase their device. Returned devices transferred from Property and equipment, net are recorded as inventory and are valued at the lower of cost or market with any write-down to market recognized as Cost of equipment sales.

**Selling, general and administrative** increased \$1.2 billion or 12% primarily from strategic investments to support our growing customer base including higher:

- Employee-related costs;
- Commissions driven by an increase in branded customer additions; and
- Promotional costs.

**Depreciation and amortization** increased \$1.6 billion or 33% primarily from:

- \$1.5 billion in depreciation expense related to devices leased under our JUMP! On Demand program launched at the end of the second quarter of 2015. Under our JUMP! On Demand program, the cost of a leased wireless device is depreciated over the lease term to its estimated residual value. The total number of devices under lease was higher year-over-year, resulting in higher depreciation expense; and
- The continued build-out of our 4G LTE network.

**Cost of MetroPCS business combination** decreased \$272 million or 72% primarily from lower network decommissioning costs. In 2014, we began decommissioning the MetroPCS CDMA network and certain other redundant network cell sites as part of the business combination. On July 1, 2015, we officially completed the shutdown of the MetroPCS CDMA network. Network decommissioning costs, which are excluded from Adjusted EBITDA, primarily relate to the acceleration of lease costs for cell sites that would have otherwise been recognized as cost of services over the remaining lease term had we not decommissioned the cell sites. Although we expect to incur additional network decommissioning costs in 2017, these costs are not expected to be significant.

**Gains on disposal of spectrum licenses** increased \$672 million primarily from a \$636 million gain from a spectrum license transaction with AT&T recorded in the first quarter of 2016 and \$199 million from other transactions in 2016, compared to \$163 million in 2015. See Note 5 – Goodwill, Spectrum Licenses and Other Intangible Assets of the Notes to the Consolidated Financial Statements.

**Net income** increased \$727 million or 99% primarily from:

- **Operating income**, the components of which are discussed above, increased \$1.7 billion or 84% and
- **Interest expense to affiliates** decreased \$99 million or 24% primarily from:
  - Changes in the fair value of embedded derivative instruments associated with our Senior Reset Notes issued to Deutsch Telekom in 2015; partially offset by
  - Higher interest rates on certain Senior Reset Notes issued to Deutsch Telekom, which were adjusted at reset dates in the second quarter of 2016 and in 2015. Partially offset by:
- **Income tax expense** increased \$622 million or 254% primarily from:
  - Higher income before income taxes; and
  - A higher effective tax rate. The effective tax rate was 37.3% in 2016, compared to 25.1% in 2015. The increase in the effective income tax rate was primarily due to income tax benefits for discrete income tax items recognized in 2015 that did not impact 2016; partially offset by the recognition of \$58 million of excess

Table of Contents

tax benefits related to share-based payments following the adoption of ASU 2016-09 as of January 1, 2016. See Note 1 – Summary of Significant Accounting Policies of the Notes to the Consolidated Financial Statements. Based on recent earnings in certain jurisdictions, sufficient positive evidence may exist within the next twelve months such that we may release a portion of our valuation allowance.

- **Interest expense** increased \$333 million or 31% primarily from:
  - Higher average debt balances with third parties; and
  - Lower capitalized interest costs of \$83 million primarily due to a higher level of build out of our network to utilize our 700 MHz A-Block spectrum licenses in 2015, compared to 2016.
- **Interest income** decreased \$159 million or 38% primarily due to \$166 million lower imputed interest income associated with devices financed through EIP resulting from:
  - An increase in sales of certain EIP receivables pursuant to our EIP receivables sales arrangement resulting from an increase in the maximum funding commitment in June 2016. Interest associated with EIP receivables is imputed at the time of a device sale and then recognized over the financed installment term. See Note 2 – Equipment Installment Plan Receivables of the Notes to the Consolidated Financial Statements; and
  - Focus on devices financed on JUMP! On Demand in the third and fourth quarters of 2015 following the launch of the program of at the end of the second quarter 2015.

We are making an accounting change in 2017 to include imputed interest associated with EIP receivables in Other revenues in our Consolidated Statements of Comprehensive Income. The impact from this accounting change is expected to be approximately \$0.2 to \$0.3 billion in 2017.

Net income during 2016 and 2015 included net, after-tax gains on disposal of spectrum licenses of \$509 million and \$100 million, respectively.

**Guarantor Subsidiaries**

The financial condition and results of operations of the Parent, Issuer and Guarantor Subsidiaries is substantially similar to our consolidated financial condition.

The most significant components of the financial condition of our Non-Guarantor Subsidiaries were as follows:

(in millions)	December 31,		Change	
	2016	2015	\$	%
Other current assets	\$ 565	\$ 400	\$ 165	41 %
Property and equipment, net	375	454	(79)	(17)%
Tower obligations	2,221	2,247	(26)	(1)%
Total stockholders' deficit	(1,374)	(1,359)	(15)	(1)%

The most significant components of the results of operations of our Non-Guarantor Subsidiaries were as follows:

(in millions)	Year Ended December 31,		Change	
	2016	2015	\$	%
Service revenues	\$ 2,023	\$ 1,669	\$ 354	21 %
Cost of equipment sales	1,027	720	307	43 %
Selling, general and administrative	868	733	135	18 %
Total comprehensive income	24	60	(36)	(60)%

The increases in Service revenues, Cost of equipment sales and Selling, general and administrative were primarily the result of an increase in activity of the non-guarantor subsidiary that provides device insurance, primarily driven by growth in our customer base. All other results of operations of the Parent, Issuer and Guarantor Subsidiaries are substantially similar to the Company's consolidated results of operations. See Note 15 – Guarantor Financial Information of the Notes to the Consolidated Financial Statements.

Table of Contents**Comparing 2015 Results with 2014 Results**

**Total Revenues** increased \$2.5 billion or 8% primarily due to:

**Branded postpaid revenues** increased \$2.0 billion or 14% primarily from:

- Growth in the number of average branded postpaid and mobile broadband customers, driven by strong customer response to our Un-carrier initiatives and promotions for services and devices;
- Increased customer adoption of upgrade and insurance programs; and
- Increased regulatory program revenues; partially offset by
- Lower branded postpaid phone ARPU.

**Branded prepaid revenues** increased \$567 million or 8% primarily from:

- Growth in the number of average branded prepaid customers driven by the success of our MetroPCS brand promotional activities; and
- Continued growth in expansion markets.

**Wholesale revenues** decreased \$39 million or 5% primarily from:

- Revised agreements with certain MVNO partners in 2015; partially offset by
- Growth in customers of certain MVNO partners.

**Roaming and other service revenues** decreased \$73 million or 27% primarily from:

- Lower international roaming revenues driven by changes in contractual arrangements with certain roaming partners; and
- A reduction in early termination fees.

**Equipment revenues** decreased \$71 million or 1% primarily from:

- Lower average revenue per device sold, due in part to the impact of customers shifting to leasing higher-end devices under our JUMP! On Demand program; partially offset by
- Growth in the number of devices and accessories sold.

With JUMP! On Demand, revenues associated with leased wireless devices are recognized over the term of the lease rather than when the device is delivered to the customer. Despite the increase in the number of devices leased in 2015 following the launch of JUMP! On Demand, the unit volume of device sales increased 5% in 2015, compared to 2014.

We financed \$5.2 billion of devices through EIP during 2015, a decrease from \$5.8 billion in 2014, primarily due to a decline in devices financed through EIP as customers increasingly shifted to leasing devices with JUMP! On Demand.

**Other revenues** increased \$114 million or 29% primarily attributable to higher non-service revenues from revenue share agreements with third parties.

**Operating expenses** increased \$1.8 billion or 7% primarily due to:

**Cost of services** decreased \$234 million or 4% primarily from:

- Synergies realized from the decommissioning of the MetroPCS CDMA network;
- Lower lease expense associated with spectrum license lease agreements; and
- A reduction in certain regulatory program costs; partially offset by
- Increases related to our network expansion and build-out of our 700 MHz A-Block spectrum.

Table of Contents

**Cost of equipment sales** decreased \$277 million or 3% primarily from:

- Lower average cost per device sold, mainly due to the impact of customers shifting to leasing higher-end devices with JUMP! On Demand; partially offset by
- Growth in the number of devices and accessories sold.

With JUMP! On Demand, the cost of the leased wireless device is capitalized and recognized as depreciation expense over the term of the lease rather than recognized as cost of equipment sales when the device is delivered to the customer. Despite the increase in the number of devices leased in 2015 following the launch of JUMP! On Demand, the unit volume of device sales increased 5% in 2015, compared to 2014.

**Selling, general and administrative** increased \$1.3 billion or 15% primarily from supporting the growing customer base, which also increased 15% and reflects increases in:

- Employee-related costs;
- Promotional costs;
- Commissions; and
- Bad debt expense and losses from sales of receivables primarily resulting from growth in the customer base and in the EIP program.

**Depreciation and amortization** increased \$276 million or 6% primarily from \$312 million in depreciation expense related to devices leased under our JUMP! On Demand program launched at the end of the second quarter of 2015. Under our JUMP! On Demand program, the cost of a leased wireless device is depreciated over the lease term to its estimated residual value. The total number of devices under lease was higher year-over-year, resulting in higher depreciation expense.

**Cost of MetroPCS business combination** increased \$77 million or 26% primarily from higher network decommissioning costs associated with the business combination. In 2014, we began decommissioning the MetroPCS CDMA network and certain other redundant network cell sites. On July 1, 2015, T-Mobile officially completed the shutdown of the MetroPCS CDMA network. Network decommissioning costs, which are excluded from Adjusted EBITDA, primarily relate to the acceleration of lease costs for cell sites that would have otherwise been recognized as cost of services over the remaining lease term had we not decommissioned the cell sites.

**Gains on disposal of spectrum licenses** decreased \$677 million or 81% primarily from:

- \$163 million in 2015 which primarily consisted of a non-cash gain of \$139 million from spectrum license transactions with Verizon recorded in the fourth quarter of 2015; as compared to
- \$840 million in 2014 which primarily consisted of non-cash gains from spectrum license transactions with Verizon, and to a lesser extent, a non-cash gain from a spectrum license transaction with AT&T during the fourth quarter of 2014.

See Note 5 – Goodwill, Spectrum Licenses and Other Intangible Assets of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.

**Net income** increased \$486 million or 197% primarily from:

- **Operating income**, the components of which are discussed above, increased \$649 million or 46% and
- **Interest income** increased \$61 million or 17% primarily attributable to higher interest income from devices financed through EIP. Interest associated with EIP receivables is imputed at the time of sale and then recognized over the financed installment term. Partially offset by:
- **Interest expense to affiliates** increased \$133 million or 48% primarily from:
  - Changes in the fair value of embedded derivative instruments associated with the Senior Reset Notes issued to Deutsche Telekom; partially offset by
  - Lower capitalized interest costs associated with the build out of our network to utilize our 700 MHz A-Block spectrum licenses.

Table of Contents

- **Income tax expense** increased \$79 million or 48% primarily from:
  - Higher income before income taxes; partially offset by
  - A lower effective tax rate. The effective tax rate was 25.1% in 2015, compared to 40.2% in 2014. The decrease in the effective income tax rate was primarily due to the impact of discrete income tax items recognized in 2015, including changes in state and local income tax laws and the recognition of foreign tax credits.
- **Interest expense** increased \$12 million or 1% primarily from:
  - Higher debt balances with third parties; partially offset by
  - Lower capitalized interest costs associated with the build out of our network to utilize our 700 MHz A-Block spectrum licenses.

Net income during 2015 and 2014 included net, after-tax gains on disposal of spectrum licenses of \$100 million and \$515 million, respectively.

**Guarantor Subsidiaries**

The financial condition and results of operations of the Parent, Issuer and Guarantor Subsidiaries is substantially similar to the Company's consolidated financial condition.

The most significant components of the financial condition of our Non-Guarantor Subsidiaries were as follows:

(in millions)	December 31,		Change	
	2015	2014	\$	%
Other current assets	\$ 400	\$ 249	\$ 151	61%
Property and equipment, net	454	537	(83)	(15)%
Tower obligations	2,247	2,250	(3)	—%
Total stockholders' deficit	(1,359)	(1,451)	92	(6)%

The most significant components of the results of operations of our Non-Guarantor Subsidiaries were as follows:

(in millions)	Year Ended December 31,		Change	
	2015	2014	\$	%
Service revenues	\$ 1,669	\$ 1,302	\$ 367	28%
Cost of equipment sales	720	702	18	3%
Selling, general and administrative	733	518	215	42%
Total comprehensive income (loss)	60	(38)	98	258%

The increases in Service revenues, Cost of equipment sales and Selling, general and administrative were primarily the result of an increase in activity of the non-guarantor subsidiary that provides device insurance, primarily driven by growth in our customer base. All other results of operations of the Parent, Issuer and Guarantor Subsidiaries are substantially similar to our consolidated results of operations. See Note 15 – Guarantor Financial Information of the Notes to the Consolidated Financial Statements.

**Performance Measures**

In managing our business and assessing financial performance, we supplement the information provided by our financial statements with other operating or statistical data and non-GAAP financial measures. These operating and financial measures are utilized by our management to evaluate our operating performance and, in certain cases, our ability to meet liquidity requirements. Although companies in the wireless industry may not define each of these measures in precisely the same way, we believe that these measures facilitate comparisons with other companies in the wireless industry on key operating and financial measures.

Table of Contents**Total Customers**

A customer is generally defined as a SIM card with a unique T-Mobile identity number which is associated with an account that generates revenue. Branded customers generally include customers that are qualified either for postpaid service utilizing phones or mobile broadband devices (including tablets), where they generally pay after receiving service, or prepaid service, where they generally pay in advance. Wholesale customers include M2M and MVNO customers that operate on our network, but are managed by wholesale partners.

The following table sets forth the number of ending customers:

(in thousands)	December 31, 2016	December 31, 2015	December 31, 2014	% Change 2016 Versus 2015	% Change 2016 Versus 2014
<b>Customers, end of period</b>					
Branded postpaid phone customers	31,297	29,355	25,844	7%	14%
Branded postpaid mobile broadband customers	3,130	2,340	1,341	34%	74%
Total branded postpaid customers	34,427	31,695	27,185	9%	17%
Branded prepaid customers	19,813	17,631	16,316	12%	8%
Total branded customers	54,240	49,326	43,501	10%	13%
Wholesale customers	17,215	13,956	11,517	23%	21%
Total customers, end of period	71,455	63,282	55,018	13%	15%

The following table sets forth the number of net customer additions:

(in thousands)	Year Ended December 31,			2016 Versus 2015		2016 Versus 2014	
	2016	2015	2014	% Change	% Change	% Change	% Change
<b>Net customer additions</b>							
Branded postpaid phone customers	3,307	3,511	4,047	(204)	(6)%	(536)	(13)%
Branded postpaid mobile broadband customers	790	999	839	(209)	(21)%	160	19%
Total branded postpaid customers	4,097	4,510	4,886	(413)	(9)%	(376)	(8)%
Branded prepaid customers	2,508	1,315	1,244	1,193	91%	71	6%
Total branded customers	6,605	5,825	6,130	780	13%	(305)	(5)%
Wholesale customers	1,568	2,439	2,204	(871)	(36)%	235	11%
Total net customer additions	8,173	8,264	8,334	(91)	(1)%	(70)	(1)%
Transfer from branded postpaid phone customers	(1,365)	—	—	(1,365)	100%	—	—%
Transfer from branded prepaid customers	(326)	—	—	(326)	100%	—	—%
Transfer to wholesale customers	1,691	—	—	1,691	100%	—	—%

The MVNO Transaction resulted in a transfer of 1,365,000 branded postpaid phone customers and 326,000 branded prepaid customers to wholesale customers on September 1, 2016. Prospectively from September 1, 2016, net customer additions for these customers are included within Wholesale customers. Ending customers as of December 31, 2016 reflect the transfers in connection with the MVNO Transaction.

**Branded Customers**

Total branded net customer additions increased 780,000, or 13%, in 2016 primarily from:

- Higher branded prepaid net customer additions primarily due to the success of our MetroPCS brand, continued growth in new markets and distribution expansion, partially offset by an increase in the number of qualified branded prepaid customers migrating to branded postpaid plans; partially offset by
- Lower branded postpaid mobile broadband net customer additions primarily due to higher deactivations resulting from churn on a growing branded postpaid mobile broadband customer base, partially offset by higher gross customer additions; and
- Lower branded postpaid phone net customer additions primarily due to lower gross customer additions from higher

deactivations on a growing customer base, partially offset by lower churn as well as an increase in the number of qualified branded prepaid customers migrating to branded postpaid plans as well as the optimization of our third-party distribution channels.

Table of Contents

Total branded net customer additions decreased 305,000, or 5%, in 2015 primarily from:

- Lower branded postpaid phone net customer additions primarily due to lower gross customer additions in 2015, compared to 2014, which included the introduction of Un-carrier 4.0 Contract Freedom and certain attractive family rate plan promotions, partially offset by approximately 765,000 qualified branded prepaid customers upgrading to branded postpaid plans in 2015, compared to approximately 420,000 in 2014; partially offset by
- Higher branded postpaid mobile broadband net customer additions primarily due to higher gross customer additions driven by promotions for mobile broadband devices, partially offset by higher deactivations resulting from the discontinuation of certain promotional pricing for mobile broadband services and ongoing competitive activity in the marketplace; and
- Higher branded prepaid net customer additions primarily due to higher gross customer additions driven by the success of our MetroPCS brand promotional activities and continued growth in new markets, partially offset by approximately 765,000 qualified branded prepaid customers upgrading to branded postpaid plans in 2015, compared to approximately 420,000 in 2014.

**Wholesale**

Wholesale net customer additions decreased 871,000, or 36%, in 2016 primarily due to higher MVNO deactivations from certain MVNO partners. Going forward, we expect wholesale net customer additions to be significantly lower in 2017, as our MVNO partners deemphasize Lifeline in favor of higher ARPU customer categories.

Wholesale net customer additions increased 235,000, or 11%, in 2015 primarily due to higher MVNO gross customer additions, partially offset by higher MVNO deactivations.

**Customers Per Account**

Customers per account is calculated by dividing the number of branded postpaid customers as of the end of the period by the number of branded postpaid accounts as of the end of the period. An account may include branded postpaid phone and mobile broadband customers. We believe branded postpaid customers per account provides management, investors and analysts with useful information to evaluate our branded postpaid customer base on a per account basis.

	December 31, 2016	December 31, 2015	December 31, 2014	2016 Versus 2015		2015 Versus 2014	
				% Change	% Change	% Change	% Change
Branded postpaid customers per account	2.86	2.54	2.36	0.32	13%	0.18	8%

Branded postpaid customers per account increased in 2016 and 2015 primarily due growth of customers on promotions targeting families and increased penetration of mobile broadband devices. In addition, the increase in 2016 was impact by the MVNO Transaction.

**Churn**

Churn represents the number of customers whose service was disconnected as a percentage of the average number of customers during the specified period. The number of customers whose service was disconnected is presented net of customers that subsequently have their service restored within a certain period of time. We believe that churn provides management, investors and analysts with useful information to evaluate customer retention and loyalty.

	Year Ended December 31,			Bps Change 2016 Versus 2015	Bps Change 2015 Versus 2014
	2016	2015	2014		
Branded postpaid phone churn	1.30%	1.39%	1.58%	-9 bps	-19 bps
Branded prepaid churn	3.88%	4.45%	4.76%	-57 bps	-31 bps

Branded postpaid phone churn decreased 9 basis points in 2016 primarily from:

- The MVNO Transaction as the customers transferred had a higher rate of churn; and
- Increased customer satisfaction and loyalty from ongoing improvements to network quality, customer service and the overall value of our offerings in the marketplace.

Table of Contents

Branded postpaid phone churn decreased 19 basis points in 2015 primarily from ongoing improvements to network quality, customer service and the overall value of our offerings in the marketplace, resulting in increased customer satisfaction and loyalty.

Branded prepaid churn decreased 57 basis points in 2016 primarily from:

- A decrease in certain customers, which have a higher rate of branded prepaid churn;
- Strong performance of the MetroPCS brand; and
- A methodology change in the third quarter of 2015 as discussed below.

Branded prepaid churn decreased 31 basis points in 2015 primarily from a methodology change during 2015 that had no impact on our reported branded prepaid ending customers or net customer additions, but resulted in computationally lower gross customer additions and deactivations. Revision of prior periods was not practicable because certain historical data was no longer available.

*Average Revenue Per User, Average Billings Per User*

ARPU represents the average monthly service revenue earned from customers. We believe ARPU provides management, investors and analysts with useful information to assess and evaluate our service revenue realization per customer and assist in forecasting our future service revenues generated from our customer base. Branded postpaid phone ARPU excludes mobile broadband customers and related revenues.

Average Billings Per User ("ABPU") represents the average monthly customer billings, including monthly lease revenues and EIP billings before securitization, per customer. We believe branded postpaid ABPU provides management, investors and analysts with useful information to evaluate average branded postpaid customer billings as it is indicative of estimated cash collections, including device financing payments, from our customers each month.

The following tables illustrate the calculation of our operating measures ARPU and ABPU and reconcile these measures to the related service revenues:

(in millions, except average number of customers, ARPU and ABPU)	Year Ended December 31,			2016 Versus 2015		2015 Versus 2014	
	2016	2015	2014	\$ Change	% Change	\$ Change	% Change
<b>Calculation of Branded Postpaid Phone ARPU</b>							
Branded postpaid service revenues	\$ 18,138	\$ 16,383	\$ 14,392	\$ 1,755	11 %	\$ 1,991	14 %
Less: Branded postpaid mobile broadband revenues	(773)	(588)	(261)	(185)	31 %	(327)	125 %
Branded postpaid phone service revenues	\$ 17,365	\$ 15,795	\$ 14,131	\$ 1,570	10 %	\$ 1,664	12 %
Divided by: Average number of branded postpaid phone customers (in thousands) and number of months in period	30,484	27,604	23,817	2,880	10 %	3,787	16 %
Branded postpaid phone ARPU	\$ 47.47	\$ 47.68	\$ 49.44	\$ (0.21)	NM	\$ (1.76)	(4)%
<b>Calculation of Branded Postpaid ABPU</b>

Branded prepaid ARPU	\$ 37.92	\$ 37.68	\$ 37.10	\$ 0.24	1 %	\$ 0.58	2 %

NM - Not Meaningful

Table of Contents**Branded Postpaid Phone ARPU:**

Branded postpaid phone ARPU decreased \$0.21, in 2016 primarily from:

- Decreases due to an increase in the non-cash net revenue deferral for Data Stash;
- Dilution from promotional activities; partially offset by
- Higher data attach rates;
- The positive impact from our T-Mobile ONE rate plans;
- The transfer of customers as part of the MVNO transaction as those customers had lower ARPU;
- Continued growth of our insurance programs; and
- Higher regulatory program revenues.

We are making an accounting change in 2017 to include imputed interest associated with EIP receivables in Other revenues in our Consolidated Statements of Comprehensive Income, which will be excluded from branded postpaid phone ARPU.

Branded postpaid phone ARPU decreased \$1.76, or 4%, in 2015 primarily from:

- Dilution from the continued growth of customers on Simple Choice plans and promotions targeting families; partially offset by
- An increase in regulatory program revenues.

**Branded Postpaid ABPU:**

Branded postpaid ABPU decreased \$0.02 in 2016 primarily from:

- Lower EIP billings due to the impact of our JUMP! On Demand program launched at the end of the second quarter of 2015;
- Lower branded postpaid phone ARPU, as described above;
- Dilution from increased penetration of mobile broadband devices; partially offset by
- An increase in lease revenues.

Branded postpaid ABPU increased \$2.04, or 3%, in 2015 primarily from:

- Growth in devices financed by customers through the EIP and JUMP! on Demand programs; partially offset by
- Lower branded postpaid phone ARPU, as described above.

**Branded Prepaid ARPU:**

Branded prepaid ARPU increased \$0.24, or 1%, in 2016 primarily from:

- A decrease in certain customers that had lower average branded prepaid ARPU, as well as higher data attach rates; partially offset by
- Dilution from growth of customers on rate plan promotions.

Branded prepaid ARPU increased \$0.58, or 2%, in 2015 primarily from:

- An increase in the mix of branded prepaid customers choosing plans with more data, which generate a higher ARPU; partially offset by
- Dilution from growth of customers on rate plan promotions.

***Adjusted EBITDA***

Adjusted EBITDA represents earnings before interest expense, net of Interest income, Income tax expense, Depreciation and amortization, non-cash Stock-based compensation and certain expenses not reflective of T-Mobile's operating performance.

Table of Contents

Net income margin represents Net income divided by Service revenues. Adjusted EBITDA margin represents Adjusted EBITDA divided by Service revenues.

Adjusted EBITDA is a non-GAAP financial measure utilized by our management to monitor the financial performance of our operations. We use Adjusted EBITDA internally as a metric to evaluate and compensate our personnel and management for their performance, and as a benchmark to evaluate our operating performance in comparison to our competitors. Management believes analysts and investors use Adjusted EBITDA as a supplemental measure to evaluate overall operating performance and facilitate comparisons with other wireless communications companies because it is indicative of our ongoing operating performance and trends by excluding the impact of interest expense from financing, non-cash depreciation and amortization from capital investments, non-cash stock-based compensation, network decommissioning costs as they are not indicative of our ongoing operating performance and certain other nonrecurring expenses. Adjusted EBITDA has limitations as an analytical tool and should not be considered in isolation or as a substitute for income from operations, net income or any other measure of financial performance reported in accordance with GAAP.

The following table illustrates the calculation of Adjusted EBITDA and reconciles Adjusted EBITDA to Net income, which we consider to be the most directly comparable GAAP financial measure:

(in millions)	Year Ended December 31,			2016 Versus 2015		2015 Versus 2014	
	2016	2015	2014	\$ Change	% Change	\$ Change	% Change
Net income	\$ 1,460	\$ 733	\$ 247	\$ 727	99 %	\$ 486	197%
Adjustments:							
Interest expense	1,418	1,085	1,073	333	31 %	12	1%
Interest expense to affiliates	312	411	278	(99)	(24)%	133	48%
Interest income	(261)	(420)	(359)	159	(38)%	(61)	17%
Other expense, net	6	11	11	(5)	(45)%	—	—%
Income tax expense	867	245	166	622	254 %	79	48%
Operating income	3,802	2,065	1,416	1,737	84 %	649	46%
Depreciation and amortization	6,243	4,688	4,412	1,555	33 %	276	6%
Cost of MetroPCS business combination	104	376	299	(272)	(72)%	77	26%
Stock-based compensation <sup>(1)</sup>	235	222	211	13	6 %	11	5%
Gains on disposal of spectrum licenses <sup>(1)</sup>	—	—	(720)	—	NM	720	NM
Other, net <sup>(1)</sup>	7	42	18	(35)	(83)%	24	NM
Adjusted EBITDA	\$ 10,391	\$ 7,393	\$ 5,636	\$ 2,998	41 %	\$ 1,757	31%
Net income margin (Net income divided by service revenues)	5%	3%	1%		200 bps		200 bps
Adjusted EBITDA margin (Adjusted EBITDA divided by service revenues)	37%	30%	25%		700 bps		500 bps

NM - Not Meaningful

(1) Stock-based compensation includes payroll tax impacts and may not agree to stock-based compensation expense in the consolidated financial statements. Gains on disposal of spectrum licenses may not agree to the Consolidated Statements of Comprehensive Income primarily due to certain routine operating activities, such as routine spectrum license exchanges that would be expected to reoccur, and are therefore included in Adjusted EBITDA. Other, net may not agree to the Consolidated Statements of Comprehensive Income primarily due to certain non-routine operating activities, such as other special items that would not be expected to reoccur, and are therefore excluded in Adjusted EBITDA.

Adjusted EBITDA increased \$3.0 billion, or 41%, in 2016 primarily from:

- Increased branded postpaid and prepaid service revenues primarily due to strong customer response to our Un-carrier initiatives and the ongoing success of our promotional activities;
- Higher gains on disposal of spectrum licenses of \$672 million; gains on disposal were \$835 million in 2016 compared to \$163 million in 2015;
- Lower losses on equipment in 2016 primarily due to an increase in lease revenues resulting from the launch of our JUMP! On Demand program at the end of the second quarter of 2015. Additionally, the costs of leased devices, which are capitalized and depreciated over the lease term, are excluded from Adjusted EBITDA. In connection with JUMP! On Demand, we had lease revenues of \$1.4 billion in 2016, and depreciation expense of \$1.5 billion related to leased wireless devices in 2016; and
- Focused cost control and synergies realized from the MetroPCS business combination, primarily in cost of services; partially

offset by

Table of Contents

- Higher selling, general and administrative expenses primarily due to strategic investments to support our growing customer base, including higher employee-related costs, higher commissions driven by an increase in branded customer additions and higher promotional costs.

We are making an accounting change in 2017 to include imputed interest associated with EIP receivables in Other revenues in our Consolidated Statements of Comprehensive Income, which will be included in Adjusted EBITDA. The impact from this accounting change is expected to be approximately \$0.2 to \$0.3 billion in 2017.

Adjusted EBITDA increased \$1.8 billion, or 31%, in 2015 primarily from:

- Increased branded postpaid and prepaid revenues driven by strong customer response to our Un-carrier initiatives and the ongoing success of our promotional activities;
- Focused cost control and synergies realized from the MetroPCS business combination, especially in cost of services;
- Lower losses on equipment in 2015 primarily due to an increase in lease revenues, which are recognized over the lease term, resulting from the launch of our JUMP! On Demand at the end of the second quarter of 2015. Additionally, the costs of leased devices, which are capitalized and depreciated over the lease term, are excluded from Adjusted EBITDA. In connection with JUMP! On Demand, we had lease revenues of \$224 million in 2015, and depreciation expense of \$312 million related to leased wireless devices in 2015; partially offset by
- Higher selling, general and administrative expenses.

**Liquidity and Capital Resources**

Our principal sources of liquidity are our cash and cash equivalents and cash generated from operations, proceeds from issuance of long-term debt, capital leases, common and preferred stock, the sale of certain receivables, financing arrangements of vendor payables which effectively extend payment terms and an unsecured revolving credit facility with Deutsche Telekom.

**Cash Flows**

The following is an analysis of our year-to-date cash flows:

(in millions)	Year Ended December 31,			2016 Versus 2015		2017 Versus 2014	
	2016	2015	2014	\$ Change	% Change	\$ Change	% Change
Net cash provided by operating activities	\$ 6,135	\$ 5,414	\$ 4,146	\$ 721	13 %	\$ 1,268	31%
Net cash used in investing activities	(5,680)	(9,560)	(7,246)	3,880	(41)%	(2,314)	32%
Net cash provided by financing activities	463	3,413	2,524	(2,950)	(86)%	889	35%

**Operating Activities**

Cash provided by operating activities increased \$721 million, or 13%, in 2016 primarily from:

- \$727 million increase in Net income;
- \$1.4 billion increase in net non-cash income and expenses included in Net income primarily due to changes in Depreciation and amortization, Deferred income tax expense and Gains on disposal of spectrum licenses; partially offset by
- \$1.4 billion increase in net cash outflows from changes in working capital primarily due to changes in Accounts payable and accrued liabilities of \$1.9 billion as well as the change in Equipment installment plan receivables, including inflows from the sale of certain EIP receivables, partially offset by the change in Inventories. Net cash used for Accounts payable and accrued liabilities was \$1.2 billion in 2016 as compared to net cash provided by Accounts payable and accrued liabilities of \$693 million in 2015. Net cash proceeds from the sale of EIP and service receivables was \$536 million in 2016 as compared to \$884 million in 2015.

Cash provided by operating activities increased \$1.3 billion, or 31%, in 2015 primarily from:

- \$486 million increase in Net income;
- \$1.3 billion increase in net non-cash income and expenses included in Net income primarily due to changes in Depreciation and amortization, Gains on disposal of spectrum licenses and Deferred income tax expense; partially offset by

Table of Contents

- \$509 million increase in net cash outflows from changes in working capital primarily due to changes in Inventories, Accounts payable and accrued liabilities, and Equipment installment plan receivables, including inflows from the sale of certain EIP receivables.

**Investing Activities**

Cash used in investing activities decreased \$3.9 billion, or 41%, in 2016, to a use of \$5.7 billion primarily from:

- \$4.7 billion for Purchases of property and equipment, including capitalized interest of \$142 million primarily related to the build out of our 4G LTE network;
- \$4.0 billion for Purchases of spectrum licenses and other intangible assets, including a \$2.2 billion deposit made to a third party in connection with a potential asset purchase; partially offset by
- \$3.0 billion in Sales of short-term investments.

Cash used in investing activities increased \$2.3 billion, or 32%, in 2015, to a use of \$9.6 billion primarily from:

- \$4.7 billion for Purchases of property and equipment, including capitalized interest of \$246 million primarily related to the build out of our 4G LTE network;
- \$1.9 billion for Purchases of spectrum licenses and other intangible assets and
- \$3.0 billion in Purchases of short-term investments.

**Financing Activities**

Cash provided by financing activities decreased \$3.0 billion, or 86%, in 2016 to an inflow of \$463 million primarily from:

- \$997 million Proceeds from issuance of long-term debt; partially offset by
- \$205 million for Repayments of capital lease obligations;
- \$150 million for Repayments of short-term debt for purchases of inventory, property and equipment, net; and
- \$121 million for Tax withholdings on share-based awards.

Cash provided by financing activities increased \$889 million, or 35%, in 2015 to inflow of \$3.4 billion primarily from:

- \$4.0 billion Proceeds from issuance of long-term debt; partially offset by
- \$564 million for Repayments of short-term debt for purchases of inventory, property and equipment, net.

**Cash and Cash Equivalents**

As of December 31, 2016, our Cash and cash equivalents were \$5.5 billion.

**Free Cash Flow**

Free Cash Flow represents net cash provided by operating activities less payments for purchases of property and equipment. Free Cash Flow is a non-GAAP financial measure utilized by our management, investors and analysts of T-Mobile's financial information to evaluate cash available to pay debt and provide further investment in the business.

The following table illustrates the calculation of Free Cash Flow and reconciles Free Cash Flow to Net cash provided by operating activities, which we consider to be the most directly comparable GAAP financial measure:

(in millions)	Year Ended December 31,			2016 Versus 2015		2015 Versus 2014	
	2016	2015	2014	\$ Change	% Change	\$ Change	% Change
Net cash provided by operating activities	\$ 6,135	\$ 5,414	\$ 4,146	\$ 721	13 %	\$ 1,268	31 %
Cash purchases of property and equipment	(4,702)	(4,724)	(4,317)	22	— %	(407)	9 %
Free Cash Flow	\$ 1,433	\$ 690	\$ (171)	\$ 743	108 %	\$ 861	(504)%

Table of Contents

Free Cash Flow increased \$743 million in 2016 and increased \$861 million for 2015 primarily from:

- Higher net cash provided by operating activities, as described above; and
- Lower purchases of property and equipment from the build-out of our 4G LTE network in 2016, as described above. In 2015, purchases of property and equipment were higher compared to 2014 from the build-out of our 4G LTE network, as described above. Cash purchases of property and equipment includes capitalized interest of \$142 million, \$246 million and \$64 million for 2016, 2015 and 2014, respectively.

**Debt**

As of December 31, 2016, our total debt was \$27.8 billion, excluding our tower obligations, of which \$27.4 billion was classified as long-term debt. Significant debt-related activity during 2016 included:

- In March 2016, T-Mobile USA, a subsidiary of T-Mobile US, Inc., and certain of its affiliates, as guarantors, entered into a purchase agreement with Deutsche Telekom AG (“Deutsche Telekom”), our majority stockholder, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 (the “5.300% Senior Notes”) for an aggregate purchase price of \$2.0 billion. As amended in October 2016, if T-Mobile USA does not elect to issue the 5.300% Senior Notes on or prior to May 5, 2017, the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. In addition, T-Mobile USA is required to reimburse Deutsche Telekom for its cost of hedging arrangements related to the extension for the duration of the extended commitments.
- In April 2016, T-Mobile USA issued \$1.0 billion of public 6.000% Senior Notes due 2024.
- In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024 and (iii) entered into another purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to an additional \$650 million of 6.000% Senior Notes due 2024.
- The purchase price for the 6.000% Senior Notes that may be issued under the \$1.35 billion purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued. As amended in October 2016, if T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$1.35 billion purchase agreement on or prior to May 5, 2017 or elects to issue less than \$1.35 billion of 6.000% Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. In addition, T-Mobile USA is required to reimburse Deutsche Telekom for its cost of hedging arrangements related to the extension for the duration of the extended commitments.
- In April 2016, T-Mobile USA entered into another purchase agreement with Deutsche Telekom, in which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to an additional \$650 million of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes that may be issued under the \$650 million purchase agreement will be approximately 104.047% of the outstanding principal balance of the notes issued. As amended in October 2016, if T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$650 million purchase agreement on or prior to May 5, 2017 or elects to issue less than \$650 million Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. In addition, T-Mobile USA is required to reimburse Deutsche Telekom for its cost of hedging arrangements related to the extension for the duration of the extended commitments.
- We have entered into uncommitted capital lease facilities with certain partners, which provide us with the ability to enter into capital leases for network equipment and services. As of December 31, 2016, we have committed to \$1.3 billion of capital leases under these capital lease facilities, of which \$799 million was executed during the year ended December 31, 2016. We expect to enter into up to an additional \$900 million in capital lease commitments during 2017.
- In December 2016, we terminated our \$500 million unsecured revolving credit facility with Deutsche Telekom. In addition, T-Mobile USA entered into a \$2.5 billion revolving credit facility with Deutsche Telekom which comprised of (i) a three-year \$1.0 billion senior unsecured revolving credit agreement and (ii) a three-year \$1.5 billion senior

Table of Contents

secured revolving credit agreement. As of December 31, 2016, there were no outstanding borrowings under the revolving credit facility.

- In January 2017, T-Mobile USA borrowed \$4.0 billion under a secured term loan facility (“Incremental Term Loan Facility”) with Deutsche Telekom to refinance \$1.98 billion of outstanding secured term loans under its Term Loan Credit Agreement dated November 9, 2015, with the remaining net proceeds from the transaction intended to be used to redeem callable high yield debt. The loans under the Incremental Term Loan Facility were drawn in two tranches on January 31, 2017 (i) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.00% and will mature on November 9, 2022 and (ii) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.25% and will mature on January 31, 2024. The Incremental Term Loan Facility increases Deutsche Telekom’s incremental term loan commitment provided to T-Mobile USA under that certain First Incremental Facility Amendment dated as of December 29, 2016 from \$660 million to \$2.0 billion and provides to T-Mobile USA an additional \$2.0 billion incremental term loan commitment. See Note 14 – Subsequent Events of the Notes to the Consolidated Financial Statements for further information.

See Note 7 – Debt of the Notes to the Consolidated Financial Statements for additional details.

We could seek additional sources of liquidity, including through the issuance of additional long-term debt in 2017, to continue to opportunistically acquire spectrum licenses in private party transactions and future FCC spectrum license auctions or for the refinancing of existing long-term debt on an opportunistic basis. Excluding liquidity that could be needed for spectrum acquisitions, we expect our principal sources of funding to be sufficient to meet our anticipated liquidity needs for business operations for the next 12 months. Our intended use of any such funds is for general corporate purposes, including for capital expenditures and redemption of high yield callable debt.

We determine future liquidity requirements, for both operations and capital expenditures, based in large part upon projected financial and operating performance, and opportunities to acquire additional spectrum. We regularly review and update these projections for changes in current and projected financial and operating results, general economic conditions, the competitive landscape and other factors. There are a number of risks and uncertainties that could cause our financial and operating results and capital requirements to differ materially from our projections, which could cause future liquidity to differ materially from our assessment.

The indentures and credit facilities governing our long-term debt to affiliates and third parties, excluding capital leases, contain covenants that, among other things, limit the ability of the Issuer and the Guarantor Subsidiaries to: incur more debt; pay dividends and make distributions on our common stock; make certain investments; repurchase stock; create liens or other encumbrances; enter into transactions with affiliates; enter into transactions that restrict dividends or distributions from subsidiaries; and merge, consolidate, or sell, or otherwise dispose of, substantially all of their assets. Certain provisions of each of the credit facilities, indentures and supplemental indentures relating to the long-term debt to affiliates and third parties restrict the ability of the Issuer to loan funds or make payments to the Parent. However, the Issuer is allowed to make certain permitted payments to the Parent under the terms of each of the credit facilities, indentures and supplemental indentures relating to the long-term debt to affiliates and third parties. We were in compliance with all restrictive debt covenants as of December 31, 2016.

### *Capital Expenditures*

Our liquidity requirements have been driven primarily by capital expenditures for spectrum licenses and the construction, expansion and upgrading of our network infrastructure. Property and equipment capital expenditures primarily relate to our network transformation, including the build out of 700 MHz A-Block spectrum licenses. We expect cash capital expenditures for property and equipment to be in the range of \$4.8 billion to \$5.1 billion in 2017, excluding capitalized interest. This does not include property and equipment obtained through capital lease agreements, leased wireless devices transferred from inventory or purchases of spectrum licenses. Similar to 2016, cash capital expenditures will be front-end loaded in 2017 due to the completion of the 700 MHz A-Block build-out.

In particular, we are participating in the FCC broadcast incentive auction of low-band 600 MHz spectrum licenses that is currently in-progress. If we win spectrum in the auction, we may incur substantial additional expenditures for the purchase price and to gain access to such spectrum. Any such amounts would be funded primarily through cash on hand and borrowings. As a result, our level of debt could increase.

Table of Contents**Contractual Obligations**

The following table summarizes our contractual obligations and borrowings as of December 31, 2016 and the timing and effect that such commitments are expected to have on our liquidity and capital requirements in future periods:

(in millions)	Less Than 1 Year	1 - 3 Years	4 - 5 Years	More Than 5 Years	Total
Long-term debt <sup>(1)</sup>	\$ 20	\$ 3,040	\$ 7,790	\$ 15,330	\$ 26,180
Interest on long-term debt	1,679	3,270	2,568	1,925	9,442
Capital lease obligations, including interest	390	669	350	214	1,623
Tower obligations <sup>(2)</sup>	184	368	370	1,164	2,086
Operating leases <sup>(3)</sup>	2,417	3,950	2,613	2,188	11,168
Purchase obligations <sup>(4)</sup>	2,011	1,818	1,330	960	6,119
Network decommissioning <sup>(5)</sup>	112	176	83	48	419
Total contractual obligations	\$ 6,813	\$ 13,291	\$ 15,104	\$ 21,829	\$ 57,037

- (1) Represents principal amounts of long-term debt to affiliates and third parties at maturity, excluding unamortized premium from purchase price allocation fair value adjustment, capital lease obligations and vendor financing arrangements. See Note 7 – Debt of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.
- (2) Future minimum payments, including principal and interest payments and imputed lease rental income, related to the tower obligations. See Note 8 – Tower Obligations of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.
- (3) As of December 31, 2016, we have updated the future minimum lease payments for all cell site leases presented above to include only payments due for the initial non-cancelable lease term only as they represent the payments which we cannot avoid at our option and also corresponds to our lease term assessment for new leases. This update had the effect of reducing our operating lease commitments included in the table above by \$4.6 billion as of December 31, 2016. See Note 12 – Commitments and Contingencies of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.
- (4) T-Mobile calculated the minimum obligation for certain agreements to purchase goods or services based on termination fees that can be paid to exit the contract. Termination penalties are included in the above table as payments due in less than one year, as this is the earliest T-Mobile could exit these contracts. For certain contracts that include fixed volume purchase commitments and fixed prices for various products, the purchase obligations are calculated using fixed volumes and contractually fixed prices for the products that are expected to be purchased. This table does not include open purchase orders as of December 31, 2016 under normal business purposes. See Note 12 – Commitments and Contingencies of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.
- (5) Represents future undiscounted cash flows related to decommissioned MetroPCS CDMA network and certain other redundant cell sites as of December 31, 2016.

Certain commitments and obligations are included in the table based on the year of required payment or an estimate of the year of payment. Other long-term liabilities, excluding network decommissioning, have been omitted from the table above due to the uncertainty of the timing of payments, combined with the absence of historical trending to be used as a predictor of such payments. In addition, because dividends on preferred stock are subject to approval by our Board of Directors, amounts are not included in the preceding table unless such authorization has occurred and the dividend has not been paid. See Note 13 – Additional Financial Information of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.

The purchase obligations reflected in the table above are primarily commitments to purchase handsets and accessories, equipment, software, programming and network services, and marketing activities, which will be used or sold in the ordinary course of business. These amounts do not represent T-Mobile's entire anticipated purchases in the future, but represent only those items for which T-Mobile is contractually committed. Where T-Mobile is committed to make a minimum payment to the supplier regardless of whether it takes delivery, T-Mobile has included only that minimum payment as a purchase obligation. Additionally, included within purchase obligations are amounts for the acquisition of spectrum licenses, which are subject to regulatory approval and other customary closing conditions.

**Off-Balance Sheet Arrangements**

In 2015, we entered into an arrangement, as amended, to sell certain EIP accounts receivable on a revolving basis through November 2017 as an additional source of liquidity. In June 2016, the arrangement was amended to increase the maximum funding commitment to \$1.3 billion with a scheduled expiration date in November 2017. In 2014, we entered into an arrangement, as amended, to sell certain service accounts receivable on a revolving basis through March 2017 as an additional source of liquidity. In November 2016, the arrangement was amended to increase the maximum funding commitment to \$950 million with a scheduled expiration date in March 2018. As of December 31, 2016, T-Mobile derecognized net receivables of \$2.5 billion upon sale through these arrangements. See Note 3 – Sales of Certain Receivables of the Notes to the Consolidated Financial Statements.

Table of Contents**Related-Party Transactions**

In March 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 for an aggregate purchase price of \$2.0 billion.

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes that may be issued under the \$1.35 billion purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued.

In April 2016, T-Mobile USA entered into a purchase agreement with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom up to \$650 million of 6.000% Senior Notes due 2024. The purchase price for the 6.000% Senior Notes that may be issued under the \$650 million purchase agreement will be approximately 104.047% of the outstanding principal balance of the notes issued.

The purchase agreements were amended in October 2016, see Note 7 – Debt of the Notes to the Consolidated Financial Statements.

In December 2016, we terminated our \$500 million unsecured revolving credit facility with Deutsche Telekom. In addition, T-Mobile USA entered into a \$2.5 billion revolving credit facility with Deutsche Telekom which comprised of (i) a three-year \$1.0 billion senior unsecured revolving credit agreement and (ii) a three-year \$1.5 billion senior secured revolving credit agreement. As of December 31, 2016, there were no outstanding borrowings under the revolving credit facility.

In January 2017, T-Mobile USA borrowed \$4.0 billion under a secured term loan facility (“Incremental Term Loan Facility”) with Deutsche Telekom to refinance \$1.98 billion of outstanding secured term loans under its Term Loan Credit Agreement dated November 9, 2015, with the remaining net proceeds from the transaction intended to be used to redeem callable high yield debt. The loans under the Incremental Term Loan Facility were drawn in two tranches on January 31, 2017 (i) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.00% and will mature on November 9, 2022 and (ii) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.25% and will mature on January 31, 2024. The Incremental Term Loan Facility increases Deutsche Telekom’s incremental term loan commitment provided to T-Mobile USA under that certain First Incremental Facility Amendment dated as of December 29, 2016 from \$660 million to \$2.0 billion and provides to T-Mobile USA an additional \$2.0 billion incremental term loan commitment. See Note 14 – Subsequent Events of the Notes to the Consolidated Financial Statements for further information.

We also have related party transactions associated with Deutsche Telekom or its affiliates in the ordinary course of business, including intercompany servicing and licensing. See Note 13 – Additional Financial Information of the Notes to the Consolidated Financial Statements.

***Disclosure of Iranian Activities under Section 13(r) of the Securities Exchange Act of 1934***

Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012 added Section 13(r) to the Exchange Act of 1934, as amended (“Exchange Act”). Section 13(r) requires an issuer to disclose in its annual or quarterly reports, as applicable, whether it or any of its affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with designated natural persons or entities involved in terrorism or the proliferation of weapons of mass destruction. Disclosure is required even where the activities, transactions or dealings are conducted outside the U.S. by non-U.S. affiliates in compliance with applicable law, and whether or not the activities are sanctionable under U.S. law.

As of the date of this report, we are not aware of any activity, transaction or dealing by us or any of our affiliates in 2016 that requires disclosure in this report under Section 13(r) of the Exchange Act, except as set forth below with respect to affiliates that we do not control and that are our affiliates solely due to their common control with Deutsche Telekom. We have relied upon Deutsche Telekom for information regarding their activities, transactions and dealings.

Deutsche Telekom, through certain of its non-U.S. subsidiaries, is party to roaming and interconnect agreements with the following mobile and fixed line telecommunication providers in Iran, some of which are or may be government-controlled entities: Gostaresh Ertebatat Taliya, Irancell Telecommunications Services Company (“MTN Irancell”), Telecommunication Kish Company, Mobile Telecommunication Company of Iran, and Telecommunication Infrastructure Company of Iran. In

Table of Contents

2016, gross revenues of all Deutsche Telekom affiliates generated by roaming and interconnection traffic with Iran were less than \$1.0 million and estimated net profits were less than \$1.0 million.

In addition, Deutsche Telekom, through certain of its non-U.S. subsidiaries, operating a fixed line network in their respective European home countries (in particular Germany), provides telecommunications services in the ordinary course of business to the Embassy of Iran in those European countries. Gross revenues and net profits recorded from these activities in 2016 were less than \$0.1 million. We understand that Deutsche Telekom intends to continue these activities.

**Critical Accounting Policies and Estimates**

Our significant accounting policies are fundamental to understanding our financial condition and results as they require the use of estimates and assumptions which affect the financial statements and accompanying notes. See Note 1 – Summary of Significant Accounting Policies of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for further information.

These policies are critical because they require management to make difficult, subjective and complex judgments about matters that are inherently uncertain. These estimates are inherently subject to judgment and actual results could differ from those estimates.

**Allowances**

We maintain an allowance for estimated losses inherent in the accounts receivable and EIP receivable portfolios. When determining the allowance, we consider a number of factors, including historical experience and current collection trends, aging of the receivable portfolio, credit quality of the customer base and other qualitative factors such as macro-economic conditions.

Credit collection risks are assessed for each type of receivable, such as EIP receivables, based upon historical and expected write-offs, net of recoveries, and an analysis of the aged receivable balances with reserves generally increasing as the receivable ages. To the extent that actual loss experience differs significantly from historical trends or assumptions, the required allowance amounts could differ from the estimate. We write off account balances if collection efforts are unsuccessful and the receivable balance is deemed uncollectible, based on customer credit ratings and the length of time from the original billing date.

We offer certain retail customers the option to pay for their devices and other purchases in installments over a period of up to 24 months using an EIP. At the time of an installment sale, we impute a discount for interest as there is no stated rate of interest on the EIP receivables and record the EIP receivables at their present value, which is determined by discounting future payments at the imputed interest rate. The difference between the present value of the EIP receivables and their face amount results in a discount which is recorded as a direct reduction to the carrying value with a corresponding reduction to equipment revenues. We determine the imputed discount rate based primarily on current market interest rates and the amount of expected credit losses on the EIP receivables. As a result, we do not recognize a separate valuation allowance at the time of issuance as the effects of uncertainty about future cash flows are included in the initial present value measurement of the receivable. The imputed discount on EIP receivables is amortized over the financed installment term using the effective interest method and recognized as Interest income in our Consolidated Statements of Comprehensive Income.

Subsequent to the initial determination of the imputed discount, we assess the need for and, if necessary, recognize an allowance for credit losses to the extent the amount of estimated probable losses on the gross EIP receivables exceed the remaining unamortized imputed discount balances.

Total imputed discount and allowances as of December 31, 2016 and 2015 was approximately 8.0% and 8.2%, respectively, of the total amount of gross accounts receivable, including EIP receivables.

**Depreciation**

Depreciation commences once assets have been placed in service. We generally depreciate property and equipment over the period the property and equipment provide economic benefit. Leased wireless devices are depreciated to their estimated residual value over the period expected to provide utility to T-Mobile, which is generally the lease term. Depreciable life studies are performed periodically to confirm the appropriateness of depreciable lives for certain categories of property, plant and equipment. These studies take into account actual usage, physical wear and tear, replacement history, assumptions about technology evolution and expected loss of leased wireless devices. When these factors indicate that an asset's useful life is different from the previous assessment, the remaining book values are depreciated prospectively over the adjusted remaining

## Table of Contents

estimated useful life. See Note 1 – Summary of Significant Accounting Policies and Note 4 – Property and Equipment of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for information regarding depreciation of assets, including management’s underlying estimates of useful lives.

### *Evaluation of Goodwill and Indefinite-Lived Intangible Assets for Impairment*

We assess the carrying value of goodwill and other indefinite-lived intangible assets, such as our spectrum licenses, for potential impairment annually as of December 31 or more frequently if events or changes in circumstances indicate that assets might be impaired.

We may elect to first perform a qualitative assessment to determine whether it is more likely than not the fair value of the single reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. If we do not perform a qualitative assessment, or if the qualitative assessment indicates it is more likely than not the fair value of the single reporting unit is less than its carrying amount, goodwill is tested for impairment based on a two-step test. In the first step, we compare the fair value of the reporting unit to its carrying value. The fair value of the reporting unit is determined using a market approach, which is based on market capitalization. We recognize market capitalization is subject to volatility and will monitor changes in market capitalization to determine whether declines, if any, necessitate an interim impairment review. In the event market capitalization does decline below its book value, we will consider the length, severity and reasons for the decline when assessing whether potential impairment exists, including considering whether a control premium should be added to the market capitalization. We believe short-term fluctuations in share price may not necessarily reflect the underlying aggregate fair value.

In the second step, we determine the fair values of all of the assets and liabilities of the reporting unit, including those that currently may not be recorded. The excess of the fair value of the reporting unit over the sum of the fair value of all of those assets and liabilities represents the implied goodwill amount. If the implied fair value of goodwill is lower than the carrying amount of goodwill, then an impairment loss is recognized for the difference.

We test spectrum licenses for impairment on an aggregate basis, consistent with the management of the overall business at a national level. We may elect to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of an intangible asset group is less than its carrying value. If we do not perform the qualitative assessment, or if the qualitative assessment indicates it is more likely than not the fair value of the intangible asset group is less than its carrying amount, we calculate the estimated fair value of the intangible asset group. If the carrying amount of spectrum licenses exceeds the fair value, an impairment loss is recognized. We estimate the fair value of the spectrum licenses using the Greenfield approach, which is an income approach that estimates the price at which an orderly transaction to sell the asset would take place between market participants at the measurement date under current market conditions. The Greenfield approach values the spectrum licenses by calculating the cash flow generating potential of a hypothetical start-up company that goes into business with no assets except the asset to be valued (in this case, spectrum licenses). The value of the spectrum licenses can be considered as equal to the present value of the cash flows of this hypothetical start-up company. We base the assumptions underlying the Greenfield approach on a combination of market participant data and our historical results, trends and business plans. Future cash flows in the Greenfield approach are based on estimates and assumptions of market participant revenues, EBITDA margin, network build-out period and a long-term growth rate for a market participant. The cash flows are discounted using a weighted average cost of capital.

The valuation approaches utilized to estimate fair value for the purposes of the impairment tests of goodwill and spectrum licenses require the use of assumptions and estimates, which involve a degree of uncertainty. If actual results or future expectations are not consistent with the assumptions, this may result in the recording of significant impairment charges on goodwill or spectrum licenses. The most significant assumptions within the valuation models are the discount rate, revenues, EBITDA margins and the long-term growth rate. See Note 1 – Summary of Significant Accounting Policies and Note 5 – Goodwill, Spectrum Licenses and Other Intangible Assets of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for information regarding our annual impairment test and impairment charges.

### *Guarantee Liabilities*

In 2013, we introduced a device trade-in program, Just Upgrade My Phone (“JUMP!”), which provides eligible customers a specified-price trade-in right to upgrade their device. Participating customers must finance the purchase of a device on an EIP and have a qualifying T-Mobile monthly wireless service plan, which is treated as a single multiple-element arrangement when entered into at or near the same time. Upon qualifying JUMP! program upgrades, the customers’ remaining EIP balance is settled provided they trade-in their eligible used device in good working condition and purchase a new device from us on a new EIP.

Table of Contents

For customers who enroll in JUMP!, we defer and recognize a liability, for the portion of revenue which represents the estimated fair value of the specified-price trade-in right guarantee. The guarantee liability is valued based on various economic and customer behavioral assumptions, which requires judgment, including estimating the customer's remaining EIP balance at trade-in, the expected fair value of the used device at trade-in, and the probability and timing of trade-in. When customers upgrade their device, the difference between the EIP balance credit to the customer and the fair value of the returned device is recorded against the guarantee liabilities. All assumptions are reviewed periodically.

***Rent Expense***

Most of the leases on our tower sites have fixed rent escalations which provide for periodic increases in the amount of rent payable over time. We calculate straight-line rent expense for each of these leases based on the fixed non-cancellable term of the lease plus all periods, if any, for which failure to renew the lease imposes a penalty on us in such amount that a renewal appears, at lease inception or significant modification, to be reasonably assured. We consider several factors in assessing whether renewal periods are reasonably assured of being exercised, including the continued maturation of our network nationwide, technological advances within the telecommunications industry and the availability of alternative sites. We make significant assumptions at lease inception in determining and assessing the factors that constitute a "penalty." In doing so, we primarily consider costs incurred in acquiring and developing new sites, the useful life of site improvements and equipment costs, future economic conditions and the extent to which improvements in wireless technologies can be incorporated into a current assessment of whether an economic compulsion will exist in the future to renew a lease.

***Income Taxes***

We recognize deferred tax assets and liabilities based on temporary differences between the financial statement and tax basis of assets and liabilities using enacted tax rates expected to be in effect when these differences are realized. A valuation allowance is maintained against deferred tax assets when it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of a deferred tax asset depends on the ability to generate sufficient taxable income of the appropriate character and in the appropriate taxing jurisdictions within the carryforward periods available. We consider many factors when determining whether a valuation allowance is needed, including recent cumulative earnings experience by taxing jurisdiction, expectations of future income, the carryforward periods available for tax reporting purposes and other relevant factors.

We account for uncertainty in income taxes recognized in the financial statements in accordance with the accounting guidance on the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. We assess whether it is more likely than not that a tax position will be sustained upon examination based on the technical merits of the position and adjust the unrecognized tax benefits in light of changes in facts and circumstances, such as changes in tax law, interactions with taxing authorities and developments in case law.

**Accounting Pronouncements Not Yet Adopted**

See Note 1 – Summary of Significant Accounting Policies of the Notes to the Consolidated Financial Statements included in Part II, Item 8 of this Form 10-K for information regarding recently issued accounting standards.

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

We are exposed to economic risks in the normal course of business, primarily from changes in interest rates. These risks, along with other business risks, impact our cost of capital. Our policy is to manage exposure related to fluctuations in interest rates in order to manage capital costs, control financial risks and maintain financial flexibility over the long term. We have established interest rate risk limits that are closely monitored by measuring interest rate sensitivities of our debt portfolio. We do not foresee significant changes in the strategies used to manage market risk in the near future.

Table of Contents

To perform the sensitivity analysis, we assessed the risk of a change in the fair value from the effect of a hypothetical interest rate change of positive 150 and negative 50 basis points. As of December 31, 2016, the change in the fair value of our Senior Secured Term Loans, based on this hypothetical change, is shown in the table below:

(in millions)	Carrying Amount		Fair Value	Fair Value Assuming				
				+150 Basis Point Shift	-50 Basis Point Shift			
Senior Secured Term Loans	\$	1,980	\$	2,005	\$	1,864	\$	2,055

Table of Contents**Item 8. Financial Statements and Supplementary Data****Financial Statements****Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Stockholders of T-Mobile US, Inc.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of comprehensive income, of stockholders' equity and of cash flows present fairly, in all material respects, the financial position of T-Mobile US, Inc. and its subsidiaries at December 31, 2016 and December 31, 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**T-Mobile US, Inc.**  
**Notes to the Consolidated Financial Statements**

**Note 1 – Summary of Significant Accounting Policies****Description of Business**

T-Mobile US, Inc. (“T-Mobile,” “we,” “our,” “us” or the “Company”), together with its consolidated subsidiaries, is a leading provider of mobile communications services, including voice, messaging and data, under its flagship brands, T-Mobile and MetroPCS, in the United States (“U.S.”), Puerto Rico and the U.S. Virgin Islands. We provide mobile communications services primarily using 4G Long-Term Evolution (“LTE”) technology. We also offer a wide selection of wireless devices, including handsets, tablets and other mobile communication devices, and accessories for sale, as well as financing through Equipment Installment Plans (“EIP”) and leasing through JUMP On Demand™. Additionally, we provide reinsurance for handset insurance policies and extended warranty contracts offered to our mobile communications customers.

**Basis of Presentation**

The consolidated financial statements include the balances and results of operations of T-Mobile and our consolidated subsidiaries. We operate as a single operating segment. We consolidate majority-owned subsidiaries over which we exercise control, as well as variable interest entities (“VIE”) where we are deemed to be the primary beneficiary and VIEs, which cannot be deconsolidated, such as those related to Tower obligations. Intercompany transactions and balances have been eliminated in consolidation.

Certain prior year amounts relating to the adoption of Accounting Standards Update (“ASU”) 2015-03, “Simplifying the Presentation of Debt Issuance Costs,” have been reclassified to conform to the current presentation. See “Accounting Pronouncements Adopted During the Current Year” below.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires our management to make estimates and assumptions which affect the financial statements and accompanying notes. Examples include service revenues earned but not yet billed, service revenues billed but not yet earned, relative selling prices, allowances for uncollectible accounts and sales returns, discounts for imputed interest on EIP receivables, guarantee liabilities, losses incurred but not yet reported, tax liabilities, deferred income taxes including valuation allowances, useful lives of long-lived assets, cost estimates of asset retirement obligations, residual values on leased handsets, reasonably assured renewal terms for operating leases, stock-based compensation forfeiture rates, and fair value measurements related to goodwill, spectrum licenses, intangible assets, and derivative financial instruments. Estimates are based on historical experience, where applicable, and other assumptions which our management believes are reasonable under the circumstances. These estimates are inherently subject to judgment and actual results could differ from those estimates.

**Cash and Cash Equivalents**

Cash equivalents consist of highly liquid money market funds and U.S. Treasury securities with remaining maturities of three months or less at the date of purchase.

**Short-Term Investments**

Our short-term investments consist of U.S. Treasury securities classified as available for sale, which are stated at fair value and have remaining maturities of more than three months at the date of purchase. Unrealized gains and losses, net of related income taxes, on available for sale securities are reported as net increases and decreases to Accumulated other comprehensive income (loss) (“AOCI”), a component of stockholders' equity, until realized. The estimated fair values of our short-term investments are based on quoted market prices as of the end of the reporting period. The U.S. Treasury securities reported as of December 31, 2015 matured during 2016.

We review our available-for-sale securities for impairment on a quarterly basis or more often if a potential loss-triggering event occurs. If there has been a decline in the fair value below the amortized cost basis, we assess whether the impairment is other-than-temporary by considering, among other factors, the reason for the decline in fair value, our intent to sell the security, whether it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis and whether we do not expect to recover the entire amortized cost basis of the security. If we determine the impairment is other-than-temporary, we record a charge to Other expense, net in our Consolidated Statements of Comprehensive Income.

Table of Contents**Accounts Receivable and Allowances**

Accounts receivable consist primarily of amounts billed and currently due from customers, other carriers and third-party retail channels ("dealers"), as well as revenues earned but not yet billed at the end of each period. Accounts receivable not held for sale are reported in the balance sheet at outstanding principal adjusted for any charge-offs and the allowance for credit losses. Accounts receivable held for sale are reported at the lower of amortized cost or fair value. We have an arrangement to sell the majority of service accounts receivable on a revolving basis, which are treated as sales of financial assets. We maintain an allowance for estimated losses inherent in the accounts receivable portfolio based on a number of factors, including historical experience and current collection trends, aging of the receivable portfolio, credit quality of the customer base and other qualitative factors such as macro-economic conditions. We write off account balances if collection efforts are unsuccessful and the receivable balance is deemed uncollectible, based on customer credit ratings and the length of time from the original billing date.

**Equipment Installment Plan Receivables**

We offer certain retail customers the option to pay for their devices and other purchases in installments over a period of up to 24 months using an EIP. EIP not held for sale are reported in the balance sheet at outstanding principal adjusted for any charge-offs, allowance for credit losses and unamortized discounts. Accounts receivable held for sale are reported at the lower of amortized cost or fair value. At the time of an installment sale, we impute a discount for interest as there is no stated rate of interest on the EIP receivables and record the EIP receivables at their present value, which is determined by discounting future payments at the imputed interest rate. The difference between the present value of the EIP receivables and their face amount results in a discount which is recorded as a direct reduction to the carrying value with a corresponding reduction to equipment revenues in our Consolidated Statements of Comprehensive Income. We determine the imputed discount rate based primarily on current market interest rates and the amount of expected credit losses on the EIP receivables. As a result, we do not recognize a separate valuation allowance at the time of issuance as the effects of uncertainty about future cash flows are included in the initial present value measurement of the receivable. The imputed discount on EIP receivables is amortized over the financed installment term using the effective interest method and recognized as Interest income in our Consolidated Statements of Comprehensive Income.

Subsequent to the initial determination of the imputed discount, we assess the need for and, if necessary, recognize an allowance for credit losses to the extent the amount of estimated probable losses on the gross EIP receivable balances exceed the remaining unamortized imputed discount balances. The allowance is based on a number of factors, including collection experience, aging of the EIP receivable portfolio, credit quality of the customer base and other qualitative factors such as macro-economic conditions. We write off account balances if collection efforts are unsuccessful and the receivable balance is deemed uncollectible, based on customer credit ratings and the length of time from the original billing date. Equipment sales not reasonably assured to be collectible are recorded on a cash basis as payments are received.

The current portion of the EIP receivables is included in Equipment installment plan receivables, net and the long-term portion of the EIP receivables is included in Equipment installment plan receivables due after one year, net in our Consolidated Balance Sheets. We have an arrangement to sell certain EIP receivables on a revolving basis, which are treated as sales of financial assets.

**Inventories**

Inventories consist primarily of wireless devices and accessories, which are valued at the lower of cost or market. Cost is determined using standard cost which approximates average cost. Shipping and handling costs paid to wireless device and accessories vendors, and costs to refurbish used devices recovered through our device upgrade programs are included in the standard cost of inventory. We record inventory write-downs to net realizable value for obsolete and slow-moving items based on inventory turnover trends and historical experience.

**Long-Lived Assets**

Long-lived assets include assets that do not have indefinite lives, such as property and equipment and other intangible assets. We assess potential impairments to our long-lived assets when events or changes in circumstances indicate the carrying amount of the asset may not be recoverable. If any indicators of impairment are present, we test recoverability. The carrying value of a long-lived asset or asset group is not recoverable if it exceeds the sum of the undiscounted cash flows expected to be generated from the use and eventual disposition of the asset or asset group. If the undiscounted cash flows do not exceed the asset or asset group's carrying amount, then an impairment loss is recorded, measured as the amount by which the carrying amount of a long-lived asset or asset group exceeds its fair value.

Table of Contents***Property and Equipment***

Property and equipment consists of buildings and equipment, wireless communication systems, leasehold improvements, capitalized software, leased wireless devices and construction in progress. Buildings and equipment include certain network server equipment. Wireless communication systems include assets to operate our wireless network and IT data centers, including tower assets and leasehold improvements, assets related to the liability for the retirement of long-lived assets and capital leases. Leasehold improvements include asset improvements other than those related to the wireless network.

Property and equipment are recorded at cost less accumulated depreciation and impairments, if any, in Property and equipment, net on our Consolidated Balance Sheets. We generally depreciate property and equipment over the period the property and equipment provide economic benefit. Depreciable life studies are performed periodically to confirm the appropriateness of useful lives for certain categories of property and equipment. These studies take into account actual usage, physical wear and tear, replacement history and assumptions about technology evolution. When these factors indicate the useful life of an asset is different from the previous assessment, the remaining book value is depreciated prospectively over the adjusted remaining estimated useful life. Leasehold improvements are depreciated over the shorter of their estimated useful lives or the related lease term.

In 2015, we introduced JUMP! On Demand which allows customers to lease a device over a period up to 18 months and upgrade it for a new one up to three times in a 12 month period. To date, all of our leased devices were classified as operating leases by considering critical elements of the lease arrangement such as the lease term and the economic life, fair value and residual value of the device. At operating lease inception, leased wireless devices are transferred from inventory to property and equipment. Leased wireless devices are depreciated to their estimated residual value over the period expected to provide utility to us, which is generally the lease term. Revenues associated with the leased wireless devices, net of incentives, are generally recognized over the lease term. Upon device upgrade or at lease end, customers must return or purchase their device. Returned devices transferred from Property and equipment, net are recorded as inventory and are valued at the lower of cost or market with any write-down to market recognized as Cost of equipment sales in our Consolidated Statements of Comprehensive Income.

Costs of major replacements and improvements are capitalized. Repair and maintenance expenditures which do not enhance or extend the asset's useful life are charged to operating expenses as incurred. Construction costs, labor and overhead incurred in the expansion or enhancement of our wireless network are capitalized. Capitalization commences with pre-construction period administrative and technical activities, which includes obtaining leases, zoning approvals and building permits, and ceases at the point at which the asset is ready for its intended use. We capitalize interest associated with the acquisition or construction of certain property and equipment. Capitalized interest is reported as a reduction in interest expense and depreciated over the useful life of the related assets.

Future obligations related to capital leases are included in Short-term debt and Long-term debt in our Consolidated Balance Sheets. Depreciation of assets held under capital leases is included in Depreciation and amortization expense in our Consolidated Statements of Comprehensive Income.

We record an asset retirement obligation for the fair value of legal obligations associated with the retirement of tangible long-lived assets and a corresponding increase in the carrying amount of the related asset in the period in which the obligation is incurred. In periods subsequent to initial measurement, we recognize changes in the liability resulting from the passage of time and revisions to either the timing or the amount of the original estimate. Over time, the liability is accreted to its present value and the capitalized cost is depreciated over the estimated useful life of the asset. Our obligations relate primarily to certain legal obligations to remediate leased property on which our network infrastructure and administrative assets are located.

We capitalize certain costs incurred in connection with developing or acquiring internal use software. Capitalization of software costs commences once the final selection of the specific software solution has been made and management authorizes and commits to funding the software project. Capitalized software costs are included in Property and equipment, net in our Consolidated Balance Sheets and are amortized on a straight-line basis over the estimated useful life of the asset. Costs incurred during the preliminary project stage, as well as maintenance and training costs are expensed as incurred.

***Other Intangible Assets***

Intangible assets that do not have indefinite useful lives are amortized over their estimated useful lives. Customer lists are amortized using the sum-of-the-years-digits method over the expected period in which the relationship is expected to contribute to future cash flows. The remaining finite-lived intangible assets are amortized using the straight-line method.

Table of Contents**Goodwill and Indefinite-Lived Intangible Assets***Goodwill*

Goodwill consists of the excess of the purchase price over the fair value of identifiable net assets acquired in a business combination.

*Spectrum Licenses*

Spectrum licenses are carried at costs incurred to acquire the spectrum licenses and the costs to prepare the spectrum licenses for their intended use, such as costs to clear acquired spectrum licenses. The Federal Communications Commission ("FCC") issues spectrum licenses which provide us with the exclusive right to utilize designated radio frequency spectrum within specific geographic service areas to provide wireless communication services. While spectrum licenses are issued for a fixed period of time, typically for up to fifteen years, the FCC has granted license renewals routinely and at a nominal cost. The spectrum licenses held by us expire at various dates. We believe we will be able to meet all requirements necessary to secure renewal of our spectrum licenses at nominal costs. Moreover, we determined there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful lives of our spectrum licenses. Therefore, we determined the spectrum licenses should be treated as indefinite-lived intangible assets.

At times, we enter into agreements to sell or exchange spectrum licenses. Upon entering into the arrangement, if the transaction has been deemed to have commercial substance, spectrum licenses are reviewed for impairment and transferred at their carrying value, net of any impairment, to assets held for sale included in Other current assets in our Consolidated Balance Sheets until approval and completion of the exchange or sale. Upon closing of the transaction, spectrum licenses acquired as part of an exchange of nonmonetary assets are valued at fair value and the difference between the fair value of the spectrum licenses obtained, book value of the spectrum licenses transferred and cash paid, if any, is recognized as a gain and included in Gains on disposal of spectrum licenses in our Consolidated Statements of Comprehensive Income. Our fair value estimates of spectrum licenses are based on information for which there is little or no observable market data. If the transaction lacks commercial substance or the fair value is not measurable, the acquired spectrum licenses are recorded at the book value of the assets transferred or exchanged.

*Impairment*

We assess the carrying value of our goodwill and other indefinite-lived intangible assets, such as our spectrum licenses, for potential impairment annually as of December 31, or more frequently if events or changes in circumstances indicate such assets might be impaired.

We may elect to first perform a qualitative assessment to determine whether it is more likely than not the fair value of the single reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. If we do not perform a qualitative assessment, or if the qualitative assessment indicates it is more likely than not the fair value of the single reporting unit is less than its carrying amount, goodwill is tested for impairment based on a two-step test. In the first step, we compare the fair value of the reporting unit to the carrying value. The fair value of the reporting unit is determined using a market approach, which is based on market capitalization. If the fair value is less than the carrying value, the second step is performed. In the second step, we determine the fair values of all of the assets and liabilities of the reporting unit, including those that may not be currently recorded. The excess of the fair value of the reporting unit over the sum of the fair value of all of those assets and liabilities represents the implied goodwill amount. If the implied fair value of goodwill is lower than its carrying amount, an impairment loss is recognized for the difference.

We test our spectrum licenses for impairment on an aggregate basis, consistent with our management of the overall business at a national level. We may elect to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of an intangible asset group is less than its carrying value. If we do not perform the qualitative assessment, or if the qualitative assessment indicates it is more likely than not the fair value of the intangible asset group is less than its carrying amount, we calculate the estimated fair value of the intangible asset group. If the estimated fair value of the spectrum licenses is lower than their carrying amount, an impairment loss is recognized for the difference. We estimate fair value using the Greenfield approach, which is an income approach, to estimate the price at which an orderly transaction to sell the asset would take place between market participants at the measurement date under current market conditions.

Table of Contents**Guarantee Liabilities**

We offer a device trade-in program, Just Upgrade My Phone ("JUMP!"), which provides eligible customers a specified-price trade-in right to upgrade their device. Participating customers must finance the purchase of a device on an EIP and have a qualifying T-Mobile monthly wireless service plan, which is treated as a single multiple-element arrangement when entered into at or near the same time. Upon a qualifying JUMP! program upgrade, the customer's remaining EIP balance is settled provided they trade-in their eligible used device in good working condition and purchase a new device from us on a new EIP.

For customers who enroll in JUMP!, we defer and recognize a liability for the portion of revenue which represents the estimated fair value of the specified-price trade-in right guarantee. The guarantee liability is valued based on various economic and customer behavioral assumptions, which requires judgment, including estimating the customer's remaining EIP balance at trade-in, the expected fair value of the used device at trade-in, and the probability and timing of trade-in. We assess our guarantee liability at each reporting date to determine if facts and circumstances would indicate the incurrence of an incremental contingent liability is probable and if so, reasonably estimable. The recognition and subsequent adjustments of the contingent guarantee liability as a result of these assessments are recorded as adjustments to revenue. When customers upgrade their device, the difference between the EIP balance credit to the customer and the fair value of the returned device is recorded against the guarantee liabilities.

**Fair Value Measurements**

We carry certain assets and liabilities at fair value. Fair value is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The three tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs based on the observability as of the measurement date, is as follows:

- Level 1 Quoted prices in active markets for identical assets or liabilities;
- Level 2 Observable inputs other than the quoted prices in active markets for identical assets and liabilities; and
- Level 3 Unobservable inputs for which there is little or no market data, which require us to develop assumptions of what market participants would use in pricing the asset or liability.

Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the placement of assets and liabilities being measured within the fair value hierarchy.

The carrying values of cash and cash equivalents, short-term investments, accounts receivable, accounts receivable from affiliates and accounts payable approximate fair value due to the short-term maturities of these instruments. The carrying values of EIP receivables approximate fair value as the receivables are recorded at their present value, net of unamortized discount and allowance for credit losses. There were no financial instruments with a carrying value materially different from their fair value, based on quoted market prices or rates for the same or similar instruments, or internal valuation models.

**Derivative Financial Instruments**

Derivative financial instruments primarily relate to embedded derivatives for certain components of the reset feature of the Senior Reset Notes to affiliates, which are required to be bifurcated and are recorded on the Consolidated Balance Sheets at fair value. Changes in fair value are recognized in Interest expense to affiliates in our Consolidated Statements of Comprehensive Income. We do not enter into derivatives for trading or speculative purposes.

**Revenue Recognition**

We primarily generate our revenue from providing wireless services to customers and selling or leasing devices and accessories. We offer our wireless services and devices to customers through bundled arrangements, which may be comprised of multiple contracts entered into with a customer at or near the same time. In recognizing revenue, we assess such agreements as a single bundled arrangement that may involve multiple deliverables, which include wireless services, wireless devices or a combination thereof, and allocated revenue between each deliverable based on the relative selling prices of each deliverable on a standalone basis.

## Table of Contents

In June 2016, we introduced #GetThanked, which offers eligible customers the following free promotional items as part of their T-Mobile service:

- **T-Mobile stock** - A share of T-Mobile stock to eligible new (through December 31, 2016) or existing (as of June 6, 2016) customers. Shares issued to customers under this promotion are purchased by an independent third-party broker in the open market on behalf of eligible customers. The associated cost, which is paid by T-Mobile, is recorded as a reduction of service revenue for existing customers and as a reduction of equipment revenue for new customers in our Consolidated Statements of Comprehensive Income. Through December 31, 2016, existing eligible customers can also receive a share of T-Mobile stock (subject to a maximum of 100 shares in a calendar year) for every new active account they refer, purchased by the third-party broker and paid for by T-Mobile. The cost of shares issued under this refer-a-friend program are included in Selling, general and administrative expense in our Consolidated Statements of Comprehensive Income;
- **Weekly surprise items** - Each Tuesday, eligible customers who download the T-Mobile Tuesday app are informed about and can redeem products and services offered by participating business partners. The associated cost is included in Selling, general and administrative expense in our Consolidated Statements of Comprehensive Income; and
- **In-flight Wi-Fi** - A full hour of in-flight Wi-Fi free to eligible customers on their smartphone on all Gogo-equipped domestic flights. The associated cost, which is paid by T-Mobile, is included in Cost of services in our Consolidated Statements of Comprehensive Income.

### *Wireless Services Revenue*

We generate our wireless service revenues from providing access to, and usage of, our wireless communications network. Service revenues also include revenues earned for providing value added services to customers, such as handset insurance services. Service revenues are billed either in advance or arrears or are prepaid and are recognized when the service is rendered and all other revenue recognition criteria have been met. Revenues that are not reasonably assured to be collectible are recorded on a cash basis as payments are received. The recognition of prepaid revenue is deferred until services are rendered or the prepaid balance expires. Incentives given to customers are recorded as a reduction to revenue. We recognize service revenues for Data Stash plans when such services are delivered and the data is consumed, or at time of forfeiture or expiration. Revenues relating to unused data that is carried over to the following month are deferred and valued based on their relative standalone selling price. Revenue is recorded gross for arrangements involving the resale of third-party services where we are considered the primary obligor and is recorded net of associated costs incurred for services whereby we are not considered the primary obligor.

Federal Universal Service Fund ("USF") and other fees are assessed by various governmental authorities in connection with the services we provide to our customers. When we separately bill and collect these regulatory fees from customers, they are recorded gross in Total service revenues and cost of services in our Consolidated Statements of Comprehensive Income. For the years ended December 31, 2016, 2015 and 2014, we recorded approximately \$409 million, \$334 million and \$349 million, respectively, of USF and other fees on a gross basis.

### *Equipment Revenues*

We generate equipment revenues from the sale or lease of mobile communication devices and accessories. Device and accessory sales revenues are generally recognized when the products are delivered to, and accepted by, the customer or dealer. We defer a portion of equipment revenues and cost of equipment sales for expected device returns based on historical experience. We offer certain customers the option to pay for devices and accessories in installments using an EIP. See EIP Receivables section above for further information.

In addition, for customers enrolled in JUMP!, we separate the JUMP! trade-in right from the multiple element arrangement at its fair value and defer the portion of revenue which represents the fair value of the trade-in right. See Guarantee Liabilities section above for further information. In 2015, we introduced JUMP! On Demand, which allows customers to lease a device and upgrade their leased wireless device for a new one up to three times in a 12 month period. Leased wireless devices are accounted for as operating leases and lease revenues are recognized as earned on a straight-line basis over the lease term. The residual value of purchased leased devices is recorded as equipment revenues and cost of equipment sales. See Property and Equipment section above for further information.

## Table of Contents

### **Rent Expense**

We have operating leases for cell sites, retail locations, corporate offices and dedicated transportation lines, some of which have escalating rentals during the initial lease term and during subsequent optional renewal periods. We recognize rent expense on a straight-line basis, over the non-cancelable lease term and renewal periods that are considered reasonably assured at the inception of the lease. We consider several factors in assessing whether renewal periods are reasonably assured of being exercised, including the continued maturation of our network nationwide, technological advances within the telecommunications industry and the availability of alternative sites.

### **Advertising Expense**

We expense the cost of advertising and other promotional expenditures to market our services and products as incurred. For the years ended December 31, 2016, 2015 and 2014, advertising expenses included in Selling, general and administrative expenses in our Consolidated Statements of Comprehensive Income were \$1.7 billion, \$1.6 billion and \$1.4 billion, respectively.

### **Income Taxes**

Deferred tax assets and liabilities are recognized based on temporary differences between the financial statement and tax bases of assets and liabilities using enacted tax rates expected to be in effect when these differences are realized. A valuation allowance is recorded when it is more likely than not that some portion or all of a deferred tax asset will not be realized. The ultimate realization of a deferred tax asset depends on the ability to generate sufficient taxable income of the appropriate character and in the appropriate taxing jurisdictions within the carryforward periods available.

We account for uncertainty in income taxes recognized in the financial statements in accordance with the accounting guidance on the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. We assess whether it is more likely than not that a tax position will be sustained upon examination based on the technical merits of the position and adjust the unrecognized tax benefits in light of changes in facts and circumstances, such as changes in tax law, interactions with taxing authorities and developments in case law.

### **Other Comprehensive Income (Loss)**

Other comprehensive income (loss) consists of adjustments, net of tax, related to unrealized gains (losses) on available-for-sale securities. This is reported in AOCI as a separate component of stockholders' equity until realized in earnings.

### **Stock-Based Compensation**

Stock-based compensation cost for stock awards, which include restricted stock units ("RSUs") and performance-based restricted stock units ("PRSUs"), is measured at fair value on the grant date and recognized as expense, net of expected forfeitures, over the related service period. The fair value of stock awards is based on the closing price of our common stock on the date of grant. RSUs are recognized as expense using the straight-line method. PSUs are recognized as expense following a graded vesting schedule.

### **Earnings Per Share**

Basic earnings per share is computed by dividing Net income attributable to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share is computed by giving effect to all potentially dilutive common shares outstanding during the period. Potentially dilutive common shares consist of outstanding stock options, RSUs and PRSUs, calculated using the treasury stock method, and mandatory convertible preferred stock ("preferred stock"), calculated using the if-converted method.

### **Variable Interest Entities**

VIEs are entities which lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, have equity investors which do not have the ability to make significant decisions relating to the entity's operations through voting rights, do not have the obligation to absorb the expected losses or do not have the right to receive the residual returns of the entity. The most common type of VIE is a special purpose entity ("SPE"). SPEs are commonly used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. SPEs are generally structured to insulate investors from claims on the SPE's assets by creditors of other entities, including the creditors of the seller of the assets.

Table of Contents

The primary beneficiary is required to consolidate the assets and liabilities of the VIE. The primary beneficiary is the party which has both the power to direct the activities of an entity that most significantly impact the VIE's economic performance, and through its interests in the VIE, the obligation to absorb losses or the right to receive benefits from the VIE which could potentially be significant to the VIE. We consolidate VIEs when we are deemed to be the primary beneficiary or when the VIE cannot be deconsolidated.

In assessing which party is the primary beneficiary, all the facts and circumstances are considered, including each party's role in establishing the VIE and its ongoing rights and responsibilities. This assessment includes, first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE (such as asset managers and servicers) or have the right to unilaterally remove those decision-makers are deemed to have the power to direct the activities of a VIE.

**Accounting Pronouncements Adopted During the Current Year**

In March 2016, the Financial Accounting Standards Board (the "FASB") issued Accounting Standards Update (ASU) 2016-09, "Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting," which simplifies several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. We elected to adopt this standard effective as of January 1, 2016. The impacts on our consolidated financial statements from the adoption of this standard are as follows:

- Consolidated Balance Sheets - A \$38 million decrease to the January 1, 2016 Accumulated deficit balance from the recognition, on a modified retrospective basis, of all previously unrecognized income tax attributes related to share-based payments;
- Consolidated Statements of Comprehensive Income - On a prospective basis, all excess tax benefits and deficiencies related to share-based payments will be recognized through Income tax expense. Prior period amounts were not adjusted; and
- Consolidated Statements of Cash Flows - On a prospective basis, as permitted, excess tax benefits related to share-based payments will be presented as operating activities. Prior period amounts were not adjusted.

In April 2015, the FASB issued ASU 2015-03, "Simplifying the Presentation of Debt Issuance Costs." The standard requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected. We adopted this new guidance in the first quarter of 2016 and applied the changes retrospectively. The implementation of this standard did not have a significant impact on our consolidated financial statements.

In August 2014, the FASB issued ASU 2014-15, "Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern." The standard requires us to assess our ability to continue as a going concern each interim and annual reporting period and provide certain disclosures if there is substantial doubt about our ability to continue as a going concern, including management's plan to alleviate the substantial doubt. We adopted this new guidance in the fourth quarter of 2016. The implementation of this standard did not have an impact on our consolidated financial statements.

**Accounting Pronouncements Not Yet Adopted**

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers" ("ASU 2014-09"), and has since modified the standard with several ASU's.

The standard requires entities to recognize revenue through the application of a five-step model, which includes the: identification of the contract; identification of the performance obligations; determination of the transaction price; allocation of the transaction price to the performance obligations; and recognition of revenue as the entity satisfies the performance obligations.

The standard becomes effective for us beginning January 1, 2018; however, early adoption with the original effective date for periods beginning January 1, 2017 is permitted. We plan to adopt the standard when it becomes effective for us beginning January 1, 2018.

Table of Contents

The guidance permits two methods of adoption, the full retrospective method applying the standard to each prior reporting period presented, or the modified retrospective method with a cumulative effect of initially applying the guidance recognized at the date of initial application. The standard also allows entities to apply certain practical expedients at their discretion. We currently anticipate adopting the standard using the modified retrospective method with a cumulative catch up adjustment and providing additional disclosures comparing results to previous rules.

We continue to evaluate the impact of the new standard on our consolidated financial statements but anticipate this standard will have a material impact on our consolidated financial statements. While we are continuing to assess all potential impacts of the standard, we currently believe the most significant impacts may include the following items:

- Whether our EIP contracts contain a significant financing component, which is similar to our current practice of imputing interest, and would similarly impact the amount of revenue recognized at the time of an EIP sale and whether or not a portion of the revenue is recognized as interest rather than equipment revenue.
- As we currently expense contract acquisition costs and believe that the requirement to defer incremental contract acquisition costs and recognize them over the term of the initial contract and anticipated renewal contracts to which the costs relate will have a significant impact to our consolidated financial statements.
- Whether bill credits earned over time result in extended service contracts, which would impact the allocation and timing of revenue between service revenue and equipment revenue.
- Overall, with the exception of the aforementioned impacts, we do not expect that the new standard will result in a substantive change to the method of allocation of contract revenues between various services and equipment, nor to the timing of when revenues are recognized for most of our service contracts.

We are still in the process of evaluating these impacts, and our initial assessment may change as we continue to refine our systems, process and assumptions.

We are in the process of implementing significant new revenue accounting systems, processes and internal controls over revenue recognition which will ultimately assist us in the application of the new standard.

In February 2016, the FASB issued ASU 2016-02, "Leases." The standard requires all lessees to report a right-of-use asset and a lease liability for most leases. The income statement recognition is similar to existing lease accounting and is based on lease classification. The standard requires lessees and lessors to classify most leases using principles similar to existing lease accounting, but eliminates the "bright line" classification tests. For lessors, the standard modifies the classification criteria and the accounting for sales-type and direct financing leases. The standard will become effective for us beginning January 1, 2019 and will require recognizing and measuring leases at the beginning of the earliest period presented using a modified retrospective approach. Early adoption is permitted. We are currently evaluating the standard and the timing of adoption but expect that it will have a material impact on our consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." The standard requires a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The measurement of expected credit losses is based on relevant information about past events, including historical experience, current conditions and reasonable and supportable forecasts that affect the collectibility of the reported amount. The standard will become effective for us beginning January 1, 2020 and will require a cumulative-effect adjustment to Accumulated deficit as of the beginning of the first reporting period in which the guidance is effective (that is, a modified-retrospective approach). Early adoption is permitted for us as of January 1, 2019. We are currently evaluating the impact this guidance will have on our consolidated financial statements and the timing of adoption.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments." The standard provides guidance on how certain cash receipts and payments are presented and classified in the statement of cash flows, including beneficial interests in securitization, which would impact the presentation of the deferred purchase price from sales of receivables. The standard is intended to reduce current diversity in practice. The standard will become effective for us beginning January 1, 2018 and will require a retrospective approach. Early adoption is permitted, including adoption in an interim period. We are currently evaluating the impact this guidance will have on our consolidated financial statements and the timing of adoption.

In October 2016, the FASB issued ASU 2016-16, "Accounting for Income Taxes: Intra-Entity Transfers of Assets Other Than Inventory." The standard requires that the income tax impact of intra-entity sales and transfers of property, except for

Table of Contents

inventory, be recognized when the transfer occurs. The standard will become effective for us beginning January 1, 2018 and will require any deferred taxes not yet recognized on intra-entity transfers to be recorded to retained earnings under a modified retrospective approach. Early adoption is permitted. We are currently evaluating the standard, but expect that it will not have a material impact on our consolidated financial statements.

In November 2016, the FASB issued ASU 2016-18, "Statement of Cash Flows (Topic 230): Restricted Cash." The standard requires entities to include in their cash and cash-equivalent balances in the statement of cash flows those amounts that are deemed to be restricted cash and restricted cash equivalents. The ASU does not define the terms "restricted cash" and "restricted cash equivalents." The standard will be effective for us beginning January 1, 2018 and will require a retrospective approach. Early adoption is permitted. We are currently evaluating the standard, but expect that it will not have a material impact on our consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment." The standard eliminates the requirement to measure the implied fair value of goodwill by assigning the fair value of a reporting unit to all assets and liabilities within that unit ("the Step 2 test") from the goodwill impairment test. Instead, if the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recognized in an amount equal to that excess, limited by the amount of goodwill in that reporting unit. The standard will become effective for us beginning January 1, 2020 and must be applied to any annual or interim goodwill impairment assessments after that date. Early adoption is permitted. We are currently evaluating the standard, but expect that it will not have a material impact on our consolidated financial statements.

**Note 2 – Equipment Installment Plan Receivables**

We offer certain retail customers the option to pay for their devices and accessories in installments over a period of up to 24 months using an EIP.

The following table summarizes the EIP receivables:

(in millions)	December 31, 2016	December 31, 2017
EIP receivables, gross	\$ 3,230	\$ 3,558
Unamortized imputed discount	(195)	(185)
EIP receivables, net of unamortized imputed discount	3,035	3,373
Allowance for credit losses	(121)	(148)
EIP receivables, net	\$ 2,914	\$ 3,225
<b>Classified on the balance sheet as:</b>		
Equipment installment plan receivables, net	\$ 1,930	\$ 2,378
Equipment installment plan receivables due after one year, net	984	847
EIP receivables, net	\$ 2,914	\$ 3,225

We use a proprietary credit scoring model that measures the credit quality of a customer at the time of application for mobile communications service using several factors, such as credit bureau information, consumer credit risk scores and service plan characteristics. Based upon customer credit profiles, we classify EIP receivables into the credit categories of "Prime" and "Subprime." Prime customer receivables are those with lower delinquency risk and Subprime customer receivables are those with higher delinquency risk. Subprime customers may be required to make a down payment on their equipment purchases. In addition, certain customers within the Subprime category are required to pay an advance deposit.

EIP receivables for which invoices have not yet been generated for the customer are classified as Unbilled. EIP receivables for which invoices have been generated but which are not past the contractual due date are classified as Billed – Current. EIP receivables for which invoices have been generated and the payment is past the contractual due date are classified as Billed – Past Due.

Table of Contents

The balance and aging of the EIP receivables on a gross basis by credit category were as follows:

(in millions)	December 31, 2016			December 31, 2015		
	Prime	Subprime	Total	Prime	Subprime	Total
Unbilled	\$ 1,343	\$ 1,686	\$ 3,029	\$ 1,593	\$ 1,698	\$ 3,291
Billed – Current	51	77	128	77	91	168
Billed – Past Due	25	48	73	37	62	99
EIP receivables, gross	<u>\$ 1,419</u>	<u>\$ 1,811</u>	<u>\$ 3,230</u>	<u>\$ 1,707</u>	<u>\$ 1,851</u>	<u>\$ 3,558</u>

The increase in subprime EIP receivables as a percentage of total EIP receivables is primarily due to the EIP sale arrangement funding increase during the year ended December 31, 2016.

Activity for the years ended December 31, 2016 and 2015 in the unamortized imputed discount and allowance for credit losses balances for the EIP receivables was as follows:

(in millions)	December 31, 2016	December 31, 2015
Imputed discount and allowance for credit losses, beginning of year	\$ 333	\$ 448
Bad debt expense	250	365
Write-offs, net of recoveries	(277)	(333)
Change in imputed discount on short-term and long-term EIP receivables	186	(84)
Impacts from sales of EIP receivables	(176)	(63)
Imputed discount and allowance for credit losses, end of year	<u>\$ 316</u>	<u>\$ 333</u>

The EIP receivables had weighted average effective imputed interest rates of 9.0% and 8.8% as of December 31, 2016 and 2015, respectively.

### Note 3 – Sales of Certain Receivables

We have entered into transactions to sell certain service and EIP accounts receivables. The transactions, including our continuing involvement with the sold receivables and the respective impacts to our financial statements, are described below.

#### Sales of Service Receivables

##### Overview of the Transaction

In 2014, we entered into an arrangement to sell certain service accounts receivables on a revolving basis with a maximum funding commitment of \$750 million (the “service receivable sale arrangement”). In November 2016, the arrangement was amended to increase the maximum funding commitment to \$950 million with a scheduled expiration date in March 2018. As of December 31, 2016 and 2015, the service receivable sale arrangement provided funding of \$907 million and \$750 million, respectively. Sales of receivables occur daily and are settled on a monthly basis. The receivables consist of service charges currently due from customers and are short-term in nature.

In connection with the service receivable sale arrangement, we formed a wholly-owned subsidiary, which qualifies as a bankruptcy remote entity to sell service accounts receivables (the “Service BRE”). The Service BRE does not qualify as a Variable Interest Entity (“VIE”), and due to the significant level of control we exercise over the entity, it is consolidated. Pursuant to the arrangement, certain of our wholly-owned subsidiaries transfer selected receivables to the Service BRE. The Service BRE then sells the receivables to an unaffiliated entity (the “Service VIE”), which was established to facilitate the sale of beneficial ownership interests in the receivables to certain third parties.

##### Variable Interest Entity

We determined that the Service VIE qualifies as a VIE as it lacks sufficient equity to finance its activities. We have a variable interest in the Service VIE, but are not the primary beneficiary as we lack the power to direct the activities that most significantly impact the Service VIE’s economic performance. Those activities include committing the Service VIE to legal agreements to purchase or sell assets, selecting which receivables are purchased in the service receivable sale arrangement, determining whether the Service VIE will sell interests in the purchased service receivables to other parties, funding of the entities and servicing of receivables. We do not hold

the power to direct the key decisions underlying these activities. For example, while we act as the servicer of the sold receivables, which is considered a significant activity of the Service VIE, we

Table of Contents

are acting as an agent in our capacity as the servicer and the counterparty to the service receivable sale arrangement has the ability to remove us as the servicing agent of the receivables at will with no recourse available to us. As we have determined we are not the primary beneficiary, the results of the Service VIE are not consolidated into our consolidated financial statements.

The following table summarizes the carrying amounts and classification of assets, which consists primarily of the deferred purchase price and liabilities included in our Consolidated Balance Sheets that relate to our variable interest in the Service VIE:

(in millions)	December 31, 2016	December 31, 2015
Other current assets	\$ 207	\$ 206
Accounts payable and accrued liabilities	17	—
Other current liabilities	129	73

**Sales of EIP Receivables***Overview of the Transaction*

In 2015, we entered into an arrangement to sell certain EIP accounts receivables on a revolving basis with a maximum funding commitment of \$800 million (the "EIP sale arrangement"). In June 2016, the EIP sale arrangement was amended to increase the maximum funding commitment to \$1.3 billion with a scheduled expiration date in November 2017. As of December 31, 2016 and 2015, the EIP sale arrangement provided funding of \$1.2 billion and \$800 million, respectively. Sales of EIP receivables occur daily and are settled on a monthly basis. The receivables consist of customer EIP balances, which require monthly customer payments for up to 24 months.

In connection with this EIP sale arrangement, we formed a wholly-owned subsidiary, which qualifies as a bankruptcy remote entity (the "EIP BRE"). Pursuant to the EIP sale arrangement, our wholly-owned subsidiary transfers selected receivables to the EIP BRE. The EIP BRE then sells the receivables to a non-consolidated and unaffiliated third-party entity for which we do not exercise any level of control, nor does the entity qualify as a VIE.

*Variable Interest Entity*

We determined that the EIP BRE is a VIE as its equity investment at risk lacks the obligation to absorb a certain portion of its expected losses. We have a variable interest in the EIP BRE and determined that we are the primary beneficiary based on our ability to direct the activities which most significantly impact the EIP BRE's economic performance. Those activities include selecting which receivables are transferred into the EIP BRE and sold in the EIP sale arrangement and funding of the EIP BRE. Additionally, our equity interest in the EIP BRE obligates us to absorb losses and gives us the right to receive benefits from the EIP BRE that could potentially be significant to the EIP BRE. Accordingly, we determined that we are the primary beneficiary, and include the balances and results of operations of the EIP BRE in our consolidated financial statements.

The following table summarizes the carrying amounts and classification of assets (primarily the deferred purchase price) and liabilities included in our Consolidated Balance Sheets that relate to the EIP BRE:

(in millions)	December 31, 2016	December 31, 2015
Other current assets	\$ 371	\$ 164
Other assets	83	44
Accounts payable and accrued liabilities	—	14
Other long-term liabilities	4	3

In addition, the EIP BRE is a separate legal entity with its own separate creditors who will be entitled, prior to any liquidation of the EIP BRE, to be satisfied prior to any value in the EIP BRE becoming available to us. Accordingly, the assets of the EIP BRE may not be used to settle our general obligations and creditors of the EIP BRE have limited recourse to our general credit.

Table of Contents**Sales of Receivables**

The transfers of service receivables and EIP receivables to the non-consolidated entities are accounted for as sales of financial assets. Once identified for sale, the receivable is recorded at the lower of cost or fair value. Upon sale, we derecognize the net carrying amount of the receivables. We recognize the net cash proceeds in Net cash provided by operating activities in our Consolidated Statements of Cash Flows.

The proceeds are net of the deferred purchase price, consisting of a receivable from the purchasers that entitles us to certain collections on the receivables. We recognize the collection of the deferred purchase price in Net cash provided by operating activities as it is dependent on collection of the customer receivables and is not subject to significant interest rate risk. The deferred purchase price represents a financial asset that is primarily tied to the creditworthiness of the customers and which can be settled in such a way that we may not recover substantially all of our recorded investment, due to default by the customers on the underlying receivables. We elected, at inception, to measure the deferred purchase price at fair value with changes in fair value included in Selling, general and administrative expense in our Consolidated Statements of Comprehensive Income. The fair value of the deferred purchase price is determined based on a discounted cash flow model which uses primarily unobservable inputs (Level 3 inputs), including customer default rates. As of December 31, 2016 and 2015, our deferred purchase price related to the sales of service receivables and EIP receivables was \$659 million and \$389 million, respectively.

The following table summarizes the impacts of the sale of certain service receivables and EIP receivables in our Consolidated Balance Sheets:

(in millions)	December 31, 2016	December 31, 2015
Derecognized net service receivables and EIP receivables	\$ 2,502	\$ 1,850
Other current assets	578	370
<i>of which, deferred purchase price</i>	576	345
Other long-term assets	83	44
<i>of which, deferred purchase price</i>	83	44
Accounts payable and accrued liabilities	17	14
Other current liabilities	129	73
Other long-term liabilities	4	3
Net cash proceeds since inception	2,030	1,494
Of which:		
Net cash proceeds during the year-to-date period	536	884
Net cash proceeds funded by reinvested collections	1,494	610

We recognized losses from sales of receivables of \$228 million, \$204 million and \$179 million for the years ended December 31, 2016, 2015 and 2014, respectively. These losses from sales of receivables were recognized in Selling, general and administrative expense in our Consolidated Statements of Comprehensive Income. Losses from sales of receivables include adjustments to the receivables' fair values and changes in fair value of the deferred purchase price.

**Continuing Involvement**

Pursuant to the sale arrangements described above, we have continuing involvement with the service receivables and EIP receivables we sell as we service the receivables and are required to repurchase certain receivables, including ineligible receivables, aged receivables and receivables where write-off is imminent. We continue to service the customers and their related receivables, including facilitating customer payment collection, in exchange for a monthly servicing fee. As the receivables are sold on a revolving basis, the customer payment collections on sold receivables may be reinvested in new receivable sales. While servicing the receivables, we apply the same policies and procedures to the sold receivables as we apply to our owned receivables, and we continue to maintain normal relationships with our customers. Pursuant to the EIP sale arrangement, under certain circumstances, we are required to deposit cash or replacement EIP receivables primarily for contracts terminated by customers under our JUMP! Program.

In addition, we have continuing involvement with the sold receivables as we may be responsible for absorbing additional credit losses pursuant to the sale arrangements. Our maximum exposure to loss related to the involvement with the service receivables and EIP receivables sold under the sale arrangements was \$1.1 billion as of December 31, 2016. The maximum exposure to loss, which is a

required disclosure under GAAP, represents an estimated loss that would be incurred under severe, hypothetical circumstances whereby we would not receive the deferred purchase price portion of the contractual proceeds

Table of Contents

withheld by the purchasers and would also be required to repurchase the maximum amount of receivables pursuant to the sale arrangements without consideration for any recovery. As we believe the probability of these circumstances occurring is remote, the maximum exposure to loss is not an indication of our expected loss.

**Note 4 – Property and Equipment**

The components of property and equipment were as follows:

(in millions)	Useful Lives	December 31, 2016	December 31, 2015
Buildings and equipment	Up to 40 years	\$ 1,657	\$ 1,900
Wireless communications systems	Up to 20 years	29,272	27,063
Leasehold improvements	Up to 12 years	1,068	1,003
Capitalized software	Up to 7 years	8,488	8,524
Leased wireless devices	Up to 18 months	2,624	2,236
Construction in progress		2,613	2,466
Accumulated depreciation and amortization		(24,779)	(23,192)
Property and equipment, net		<u>\$ 20,943</u>	<u>\$ 20,000</u>

Wireless communication systems include capital lease agreements for network equipment with varying expiration terms through 2030. Capital lease assets and accumulated amortization were \$1.6 billion and \$300 million, and \$839 million and \$117 million, as of December 31, 2016 and 2015, respectively.

We capitalize interest associated with the acquisition or construction of certain property and equipment. We recognized capitalized interest of \$142 million, \$230 million and \$81 million for the years ended December 31, 2016, 2015 and 2014, respectively.

The components of leased wireless devices under our JUMP! On Demand program were as follows:

(in millions)	December 31, 2016	December 31, 2015
Leased wireless devices, gross	\$ 2,624	\$ 2,236
Accumulated depreciation	(1,193)	(263)
Leased wireless devices, net	<u>\$ 1,431</u>	<u>\$ 1,973</u>

Future minimum payments expected to be received over the lease term related to the leased wireless devices, which exclude optional residual buy-out amounts at the end of the lease term, are summarized below:

(in millions)	Total
Year Ending December 31, 2017	\$ 710
2018	92
Total	<u>\$ 802</u>

Depreciation expense relating to property and equipment was \$6.0 billion, \$4.4 billion and \$4.1 billion for the years ended December 31, 2016, 2015 and 2014, respectively. Depreciation expense for the years ended December 31, 2016 and 2015 included \$1.5 billion and \$312 million, respectively, related to leased wireless devices.

For the years ended December 31, 2016, 2015 and 2014, we recorded additional depreciation expense of \$101 million, \$85 million and \$242 million, respectively, as a result of adjustments to useful lives of network equipment expected to be replaced in connection with our network transformation and decommissioning the MetroPCS CDMA network and redundant network cell sites.

Asset retirement obligations are primarily for certain legal obligations to remediate leased property on which our network infrastructure and administrative assets are located.

Table of Contents

Activity in our asset retirement obligations was as follows:

(in millions)	December 31, 2016	December 31, 2015
Asset retirement obligations, beginning of year	\$ 483	\$ 390
Liabilities incurred	50	19
Liabilities settled	(67)	(130)
Accretion expense	24	17
Changes in estimated cash flows	49	187
Asset retirement obligations, end of year	<u>\$ 539</u>	<u>\$ 483</u>
<b>Classified on the balance sheet as:</b>		
Other current liabilities	\$ 16	\$ 41
Other long-term liabilities	523	442
Asset retirement obligations	<u>\$ 539</u>	<u>\$ 483</u>

The corresponding assets, net of accumulated depreciation, related to asset retirement obligations were \$258 million and \$241 million as of December 31, 2016 and 2015, respectively. For the year ended December 31, 2015, we settled asset retirement obligations in connection with the decommissioning of certain cell sites. Due to new information gained throughout 2015, primarily from decommissioning the MetroPCS CDMA network cell sites, we reassessed the expected cash flows related to its asset retirement obligations for all remaining T-Mobile network cell sites. As a result, we recorded asset retirement obligations and corresponding assets in the fourth quarter of 2015 to reflect the change in estimated cash flows.

**Note 5 – Goodwill, Spectrum Licenses and Other Intangible Assets****Goodwill**

There were no changes in carrying values of goodwill for the years ended December 31, 2016 and 2015.

**Spectrum Licenses**

The following table summarizes our spectrum license activity:

(in millions)	December 31, 2016	December 31, 2015
Spectrum licenses, beginning of year	\$ 23,955	\$ 21,955
Spectrum license acquisitions	3,334	2,615
Spectrum licenses transferred to held for sale	(324)	(727)
Costs to clear spectrum	49	112
Spectrum licenses, end of year	<u>\$ 27,014</u>	<u>\$ 23,955</u>

We had the following spectrum license transactions during 2016:

- We closed on the agreement with AT&T Inc. for the acquisition and exchange of certain spectrum licenses. Upon closing of the transaction during the first quarter of 2016, we recorded the spectrum licenses received at their estimated fair value of approximately \$1.2 billion and recognized a gain of \$636 million included in Gains on disposal of spectrum licenses in our Consolidated Statements of Comprehensive Income.
- We closed on agreements with multiple third parties for the purchase and exchange of certain spectrum licenses for \$1.3 billion in cash. Upon closing of the transactions, we recorded spectrum licenses received at their estimated fair values totaling approximately \$1.7 billion and recognized gains of \$199 million included in Gains on disposal of spectrum licenses in our Consolidated Statements of Comprehensive Income.
- We closed on an agreement with a third party for the purchase of certain spectrum licenses covering approximately 11 million people for approximately \$420 million during the fourth quarter of 2016.

Table of Contents

- We entered into an agreement with a third party for the exchange of certain spectrum licenses, which is expected to close in the first half of 2017. Our spectrum licenses to be transferred as part of the exchange transaction were reclassified as assets held for sale and were included in Other current assets in our Consolidated Balance Sheets at their carrying value of \$86 million as of December 31, 2016.

We had the following spectrum license transactions during 2015:

- Upon conclusion of the 2014 Advanced Wireless Services ("AWS") auction, we were awarded AWS spectrum licenses covering approximately 97 million people for an aggregate bid price of approximately \$1.8 billion.
- We closed on the agreement with Verizon Communications Inc. for the exchange of certain spectrum licenses. Upon closing of the transaction, we recorded the spectrum licenses received at their estimated fair value of \$311 million and recognized a non-cash gain of \$139 million included in Gains on disposal of spectrum licenses in our Consolidated Statements of Comprehensive Income.
- We closed on agreements with multiple third parties for the purchase and exchange of certain spectrum licenses for \$459 million in cash. Upon closing of the transactions, we recorded spectrum licenses received at their estimated fair values totaling approximately \$530 million and recognized gains of \$24 million included in Gains on disposal of spectrum licenses in our Consolidated Statements of Comprehensive Income.
- We entered into multiple agreements with third parties for the exchange of certain spectrum licenses. Our spectrum licenses to be transferred as part of the exchange transaction were reclassified as assets held for sale and were included in Other current assets in our Consolidated Balance Sheets at their carrying value of \$554 million as of December 31, 2015.

**Goodwill and Other Intangible Assets Impairment Assessments**

Our impairment assessment of goodwill and indefinite-lived intangible assets (spectrum licenses) resulted in no impairment as of December 31, 2016 and 2015.

**Other Intangible Assets**

The components of intangible assets were as follows:

(in millions)	Useful Lives	December 31, 2016			December 31, 2015		
		Gross Amount	Accumulated Amortization	Net Amount	Gross Amount	Accumulated Amortization	Net Amount
Customer lists	Up to 6 years	\$ 1,104	\$ (894)	\$ 210	\$ 1,104	\$ (719)	\$ 385
Trademarks and patents	Up to 12 years	303	(156)	147	300	(115)	185
Other	Up to 28 years	50	(31)	19	51	(27)	24
Other intangible assets		\$ 1,457	\$ (1,081)	\$ 376	\$ 1,455	\$ (861)	\$ 594

Amortization expense for intangible assets subject to amortization was \$220 million, \$276 million and \$333 million for the years ended December 31, 2016, 2015 and 2014, respectively.

The estimated aggregate future amortization expense for intangible assets subject to amortization are summarized below:

(in millions)	Estimated future Amortization
Year Ending December 31,	
2017	\$ 163
2018	104
2019	52
2020	34
2021	14
Thereafter	9
Total	\$ 376

Table of Contents**Note 6 – Fair Value Measurements and Derivative Instruments****Embedded Derivative Instruments**

In connection with the business combination with MetroPCS, we issued senior reset notes to Deutsche Telekom. The interest rates were adjusted at the reset dates to rates defined in the applicable supplemental indentures to manage interest rate risk related to the senior reset notes. We determined certain components of the reset feature are required to be bifurcated from the senior reset notes and separately accounted for as embedded derivative instruments. As of December 31, 2015, one embedded derivative related to the 5.950% Senior Reset Notes to affiliates due 2023 was subject to interest rate volatility. In April 2016, the interest rate related to the 5.950% Senior Reset Notes to affiliates due 2023 was adjusted from 5.950% to 9.332%. See Note 7 – Debt for further information. As of December 31, 2016, there were no embedded derivatives subject to interest rate volatility related to the Senior Reset Notes to affiliates.

The fair value of our embedded derivatives was determined using a lattice-based valuation model by determining the fair value of the senior reset notes with and without the embedded derivatives included. The fair value of the senior reset notes with the embedded derivatives utilizes the contractual term of each senior reset note, reset rates calculated based on the spread between specified yield curves and the yield curve on certain T-Mobile long-term debt adjusted pursuant to the applicable supplemental indentures and interest rate volatility. Interest rate volatility is a significant unobservable input (Level 3) as it is derived based on weighted risk-free rate volatility and credit spread volatility. Significant increases or decreases in the weighting of risk-free volatility and credit spread volatility, in isolation, would result in a higher or lower fair value of the embedded derivatives. The embedded derivatives were classified as Level 3 in the fair value hierarchy.

The fair value of embedded derivative instruments by balance sheet location and level were as follows:

(in millions)	December 31, 2015			
	Level 1	Level 2	Level 3	Total
Other long-term liabilities	\$ —	\$ —	\$ 118	\$ 118

(in millions)	December 31, 2016			
	Level 1	Level 2	Level 3	Total
Other long-term liabilities	\$ —	\$ —	\$ 143	\$ 143

The following table summarizes the gain (loss) activity related to embedded derivatives instruments recognized in Interest expense to affiliates:

(in millions)	Year ended December 31,		
	2016	2015	2014
Embedded derivatives	\$ 25	\$ (148)	\$ 18

**Assets and Liabilities Measured at Fair Value on a Recurring Basis**

The carrying amounts and fair values of our short-term investments and long-term debt included in our Consolidated Balance Sheets were as follows:

(in millions)	Level within the Fair Value Hierarchy	December 31, 2016		December 31, 2015	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
<b>Assets:</b>					
Short-term investments	1	\$ —	\$ —	\$ 2,998	\$ 2,998
Deferred purchase price assets	3	659	659	389	389
<b>Liabilities:</b>					
Senior Notes to third parties	1	\$ 18,600	\$ 19,584	\$ 17,600	\$ 18,098
Senior Reset Notes to affiliates	2	5,600	5,955	5,600	6,072
Senior Secured Term Loans	2	1,980	2,005	2,000	1,990
Guarantee Liabilities	3	135	135	163	163

Table of Contents***Short-term Investments***

The fair value of our short-term investments as of December 31, 2015, which consisted of U.S. Treasury securities, was determined based on quoted market prices in active markets, and therefore was classified as Level 1 in the fair value hierarchy. We did not have any short-term investments as of December 31, 2016.

***Long-term Debt***

The fair value of our Senior Notes to third parties was determined based on quoted market prices in active markets, and therefore was classified as Level 1 in the fair value hierarchy. The fair value of the Senior Secured Term Loans and Senior Reset Notes to affiliates was determined based on a discounted cash flow approach using quoted prices of instruments with similar terms and maturities and an estimate for our standalone credit risk. Accordingly, our Senior Secured Term Loans and Senior Reset Notes to affiliates were classified as Level 2 in the fair value hierarchy.

Although we have determined the estimated fair values using available market information and commonly accepted valuation methodologies, considerable judgment was required in interpreting market data to develop fair value estimates for the Senior Secured Term Loans and Senior Reset Notes to affiliates. The fair value estimates were based on information available as of December 31, 2016 and 2015. As such, our estimates are not necessarily indicative of the amount we could realize in a current market exchange.

***Deferred Purchase Price Assets***

In connection with the sales of certain service and EIP receivables pursuant to the sale arrangements, we have deferred purchase price assets measured at fair value that are based on a discounted cash flow model using unobservable Level 3 inputs, including customer default rates. See Note 3 – Sales of Certain Receivables.

***Guarantee Liabilities***

Our guarantee liabilities were valued based on various economic and customer behavioral assumptions, including expected trade-in period, volumes of trade-in, and the fair value of handsets traded in and therefore were classified as Level 3 in the fair value hierarchy.

The total estimated remaining gross EIP receivable balances of all enrolled handset upgrade program customers, which are the remaining EIP amounts underlying the JUMP! guarantee, including EIP receivables that have been sold, was \$2.1 billion as of December 31, 2016. This is not an indication of our expected loss exposure as it does not consider the expected fair value of the used handset or the probability and timing of the trade-in.

Table of Contents**Note 7 – Debt**

Debt was as follows:

(in millions)	December 31, 2016	December 31, 2015
5.250% Senior Notes due 2018	\$ 500	\$ 500
6.288% Senior Reset Notes to affiliates due 2019	1,250	1,250
6.464% Senior Notes due 2019	1,250	1,250

Long-term debt to affiliates	5,600	5,600
Total long-term debt	\$ 27,432	\$ 26,061

**Long-term Debt**

In March 2016, T-Mobile USA, Inc. (“T-Mobile USA”), a subsidiary of T-Mobile US, Inc., and certain of its affiliates, as guarantors, entered into a purchase agreement with Deutsche Telekom AG (“Deutsche Telekom”), our majority stockholder, under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom \$2.0 billion of 5.300% Senior Notes due 2021 (the “5.300% Senior Notes”) for an aggregate purchase price of \$2.0 billion. As amended in October 2016, if T-Mobile USA does not elect to issue the 5.300% Senior Notes on or prior to May 5, 2017, the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. As of December 31, 2016, if the commitment under this purchase agreement was terminated, the reimbursement amount due to Deutsche Telekom would not be

significant. In addition, T-Mobile USA is required to reimburse Deutsche Telekom for its cost of hedging arrangements related to the extension for the duration of the extended commitments, which is not expected to be significant.

In April 2016, T-Mobile USA and certain of its affiliates, as guarantors, (i) issued \$1.0 billion of public 6.000% Senior Notes due 2024, (ii) entered into a purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue

## Table of Contents

and sell to Deutsche Telekom up to \$1.35 billion of 6.000% Senior Notes due 2024 and (iii) entered into another purchase agreement with Deutsche Telekom, under which T-Mobile USA may, at its option, issue and sell up to an additional \$650 million of 6.000% Senior Notes due 2024.

The purchase price for the 6.000% Senior Notes that may be issued under the \$1.35 billion purchase agreement will be approximately 103.316% of the outstanding principal balance of the notes issued. As amended in October 2016, if T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$1.35 billion purchase agreement on or prior to May 5, 2017 or elects to issue less than \$1.35 billion of 6.000% Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. As of December 31, 2016, if the commitment under this purchase agreement was terminated, the reimbursement amount due to Deutsche Telekom would not be significant. In addition, T-Mobile USA is required to reimburse Deutsche Telekom for its cost of hedging arrangements related to the extension for the duration of the extended commitments, which is not expected to be significant.

The purchase price for the 6.000% Senior Notes that may be issued under the \$650 million purchase agreement will be approximately 104.047% of the outstanding principal balance of the notes issued. As amended in October 2016, if T-Mobile USA does not elect to issue the 6.000% Senior Notes under the \$650 million purchase agreement on or prior to May 5, 2017 or elects to issue less than \$650 million of 6.000% Senior Notes, any unused portion of the commitment under the purchase agreement terminates and T-Mobile USA must reimburse Deutsche Telekom for the cost of its hedging arrangements (if any) related to the transaction. As of December 31, 2016, if the commitment under this purchase agreement was terminated, the reimbursement amount due to Deutsche Telekom would not be significant. In addition, T-Mobile USA is required to reimburse Deutsche Telekom for its cost of hedging arrangements related to the extension for the duration of the extended commitments, which is not expected to be significant.

In January 2017, T-Mobile USA borrowed \$4.0 billion under a secured term loan facility ("Incremental Term Loan Facility") with Deutsche Telekom to refinance \$1.98 billion of outstanding secured term loans under its Term Loan Credit Agreement dated November 9, 2015, with the remaining net proceeds from the transaction intended to be used to redeem callable high yield debt. The loans under the Incremental Term Loan Facility were drawn in two tranches on January 31, 2017 (i) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.00% and will mature on November 9, 2022 and (ii) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.25% and will mature on January 31, 2024. The Incremental Term Loan Facility increases Deutsche Telekom's incremental term loan commitment provided to T-Mobile USA under that certain First Incremental Facility Amendment dated as of December 29, 2016 from \$660 million to \$2.0 billion and provides to T-Mobile USA an additional \$2.0 billion incremental term loan commitment. See Note 14 – Subsequent Events for further information.

In addition to the new debt issued, and purchase commitments with Deutsche Telekom, the supplemental indentures governing the Senior Reset Notes to affiliates provided for the adjustment of the interest rates on such Notes at various reset dates to rates determined in accordance with the applicable supplemental indenture. In April 2016, the interest rate on the \$600 million of Senior Reset Notes to affiliates due 2023 was adjusted from 5.950% to 9.332%.

## Capital Leases

Capital lease agreements relate to network and IT equipment with varying expiration terms through 2030. Future minimum payments required under capital leases, including interest, over their remaining terms are summarized below:

(in millions)	Future Minimum Payments
Year Ending December 31,	
2017	\$ 390
2018	354
2019	315
2020	200
2021	150
Thereafter	214
Total	<u>\$ 1,623</u>
Interest included	<u>\$ 198</u>

Table of Contents**Financing Arrangements**

We maintain a handset financing arrangement with Deutsche Bank AG (“Deutsche Bank”), which allows for up to \$108 million in borrowings. Under the handset financing arrangement, we can effectively extend payment terms for invoices payable to certain handset vendors. The interest rate on the handset financing arrangement is determined based on LIBOR plus a specified margin per the arrangement. Obligations under the handset financing arrangement are included in Short-term debt in our Consolidated Balance Sheets. In 2016 and 2015, we utilized and repaid \$100 million under the financing arrangement. As of December 31, 2016 and 2015, there was no outstanding balance.

We maintain vendor financing arrangements with our primary network equipment suppliers. Under the respective agreements, we can obtain extended financing terms. The interest rate on the vendor financing arrangements is determined based on the difference between LIBOR and a specified margin per the agreements. Obligations under the vendor financing arrangements are included in Short-term debt in our Consolidated Balance Sheets. As of December 31, 2016 and 2015, there was no outstanding balance.

**Revolving Credit Facility and Standby Letters of Credit**

We had an unsecured revolving credit facility with Deutsche Telekom which allowed for up to \$500 million in borrowings. In December 2016, we terminated our \$500 million unsecured revolving credit facility with Deutsche Telekom. As of December 31, 2016, there were no outstanding borrowings outstanding under this facility.

In December 2016, T-Mobile USA entered into a \$2.5 billion revolving credit facility with Deutsche Telekom which comprised of (i) a three-year \$1.0 billion unsecured revolving credit agreement and (ii) a three-year \$1.5 billion secured revolving credit agreement. The applicable margin for the Unsecured Revolving Credit Facility ranges from 2.00% to 3.25% per annum for Eurodollar Rate loans. The applicable margin for the Secured Revolving Credit Facility ranges from 1.00% to 1.75% per annum for Eurodollar Rate loans. As of December 31, 2016, there were no outstanding borrowings under the revolving credit facility.

For the purposes of securing our obligations to provide handset insurance services, we maintain an agreement for standby letters of credit with JP Morgan Chase Bank, N.A. (“JP Morgan Chase”). For purposes of securing our general purpose obligations, we maintain a letter of credit reimbursement agreement with Deutsche Bank.

The following table summarizes the outstanding standby letters of credit under each agreement:

(in millions)	December 31, 2016	December 31, 2015
JP Morgan Chase	\$ 20	\$ 36
Deutsche Bank	54	54
Total outstanding balance	<u>\$ 74</u>	<u>\$ 90</u>

**Note 8 – Tower Obligations**

In 2012, we conveyed to Crown Castle International Corp. (“CCI”) the exclusive right to manage and operate approximately 7,100 T-Mobile-owned wireless communication tower sites (“CCI Tower Sites”) in exchange for net proceeds of \$2.5 billion (“2012 Tower Transaction”). Rights to approximately 6,200 of the tower sites were transferred to CCI via a Master Prepaid Lease with site lease terms ranging from 23 to 37 years (“CCI Lease Sites”), while the remaining tower sites were sold to CCI (“CCI Sales Sites”). CCI has fixed-price purchase options for these towers totaling approximately \$2.0 billion, based on the estimated fair market value at the end of the lease term. We lease back space at certain tower sites for an initial term of ten years, followed by optional renewals at customary terms.

In 2015, we conveyed to Phoenix Tower International (“PTI”) the exclusive right to manage and operate approximately 600 T-Mobile-owned wireless communication tower sites (“PTI Tower Sites”) in exchange for net proceeds of approximately \$140 million (“2015 Tower Transaction”). As of December 31, 2016, rights to approximately 200 of the tower sites remain operated by PTI under a management agreement (“PTI Managed Sites”). We lease back space at certain tower sites for an initial term of ten years, followed by optional renewals at customary terms.

Assets and liabilities associated with the operation of certain of the tower sites were transferred to SPEs. Assets included ground lease agreements or deeds for the land on which the towers are situated, the towers themselves and existing subleasing agreements with other mobile network operator tenants, who lease space at the tower sites. Liabilities included the obligation

Table of Contents

to pay ground lease rentals, property taxes and other executory costs. Upon closing of the 2012 Tower Transaction, CCI acquired all of the equity interests in the SPEs containing CCI Sales Sites and an option to acquire the CCI Lease Sites at the end of their respective lease terms and entered into a master lease agreement under which we agreed to lease back space at certain of the tower sites. Upon closing of the 2015 Tower Transaction, PTI acquired all of the equity interests in the SPEs containing PTI Sales Sites and entered into a master lease agreement under which we agreed to lease back space at certain of the tower sites.

We determined the SPEs containing the CCI Lease Sites ("Lease Site SPEs") are VIEs as the Company's equity investment lacks the power to direct the activities that most significantly impact the economic performance of the VIEs. These activities include managing tenants and underlying ground leases, performing repair and maintenance on the towers, the obligation to absorb expected losses and the right to receive the expected future residual returns from the purchase option to acquire the CCI Lease Sites. As we determined that we are not the primary beneficiary and do not have a controlling financial interest in the Lease Site SPEs, the results of the Lease Site SPEs are not consolidated into our consolidated financial statements.

Due to our continuing involvement with the tower sites, we determined that we were precluded from applying sale-leaseback accounting. We recorded long-term financial obligations in the amount of the net proceeds received and recognized interest on the tower obligations at a rate of approximately 8% for the 2012 Tower Transaction and 3% for the 2015 Tower Transaction using the effective interest method. The tower obligations are increased by interest expense and amortized through contractual leaseback payments made by us to CCI or PTI and through estimated future net cash flows generated and retained by CCI or PTI from operation of the tower sites. Our historical tower site asset costs continue to be reported in Property and equipment, net in our Consolidated Balance Sheets and are depreciated.

The following table summarizes the impacts to the Consolidated Balance Sheets:

(in millions)	December 31, 2016	December 31, 2015
Property and equipment, net	\$ 485	\$ 601
Tower obligations	2,621	2,658

Future minimum payments related to the tower obligations are summarized below:

(in millions)	Future Minimum Payments
Year Ending December 31,	
2017	\$ 184
2018	184
2019	184
2020	185
2021	185
Thereafter	1,164
Total	<u>\$ 2,086</u>

We are contingently liable for future ground lease payments through the remaining term of the CCI Lease Sites. These contingent obligations are not included in the above table as any amount due is contractually owed by CCI based on the subleasing arrangement. See Note 12 – Commitments and Contingencies for further information.

#### Note 9 – Employee Compensation and Benefit Plans

Under our 2013 Omnibus Incentive Plan (the "Incentive Plan"), we are authorized to issue up to 63 million shares of our common stock. Under the Incentive Plan, we can grant stock options, stock appreciation rights, restricted stock, restricted stock units ("RSUs"), and performance awards to eligible employees, consultants, advisors and non-employee directors. As of December 31, 2016, there were 22 million shares of common stock available for future grants under the Incentive Plan.

We grant RSUs to eligible employees and certain non-employee directors and performance-based restricted stock units ("PRSUs") to eligible key executives. RSUs entitle the grantee to receive shares of our common stock at the end of a vesting period of generally up to 3 years, subject to continued service through the applicable vesting date. PRSUs entitle the holder to receive shares of our common stock at the end of a vesting period of generally up to 3 years if the applicable performance goals are achieved and generally subject to continued employment through the vesting period. The number of shares ultimately

Table of Contents

received by the holder of PRSUs is dependent on our business performance against the specified performance goal(s) over a pre-established performance period. We also maintain an employee stock purchase plan ("ESPP"), under which eligible employees can purchase our common stock at a discounted price.

Stock-based compensation expense and related income tax benefits were as follows:

(in millions, except shares, per share and contractual life amounts)	December 31, 2016	December 31, 2015	December 31, 2014
Stock-based compensation expense	\$ 235	\$ 201	\$ 196
Income tax benefit related to stock-based compensation	80	71	73
Realized excess tax benefit	—	79	34
Weighted average fair value per stock award granted	45.07	35.56	28.52
Unrecognized compensation expense	389	327	271
Weighted average period to be recognized (years)	2.0	2.0	1.9
Fair value of stock awards vested	354	445	209

**Stock Awards***RSU and PRSU Awards*

The following activity occurred under the RSU and PRSU awards:

(in millions, except shares, per share and contractual life amounts)	Number of Units	Weighted Average Grant Date Fair Value	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Nonvested, December 31, 2015	16,334,271	\$ 29.95	1.2	\$ 639
Granted	8,431,980	45.07		
Vested	(7,712,463)	28.33		
Forfeited	(1,338,397)	34.42		
Nonvested, December 31, 2016	15,715,391	\$ 37.93	1.1	\$ 904

Payment of the underlying shares in connection with the vesting of stock awards generally triggers a tax obligation for the employee, which is required to be remitted to the relevant tax authorities. We have agreed to withhold stock otherwise issuable under the award to cover certain of these tax obligations, with the net shares issued to the employee accounted for as outstanding common stock. We withheld 2,605,807 and 4,176,464 shares of stock to cover tax obligations associated with the payment of shares upon vesting of stock awards and remitted cash of \$121 million and \$156 million to the appropriate tax authorities for the years ended December 31, 2016 and 2015, respectively.

**Employee Stock Purchase Plan**

Our ESPP allows eligible employees to contribute up to 15% of their eligible earnings toward the semi-annual purchase of our common stock at a discounted price, subject to an annual maximum dollar amount. Employees can purchase stock at a 15% discount applied to the closing stock price on the first or last day of the six month offering period, whichever price is lower. The number of shares issued under our ESPP was 1,905,534 and 761,085 for the years ended December 31, 2016 and 2015, respectively.

**Stock Options**

Prior to the business combination, MetroPCS had established the MetroPCS Communications, Inc. 2010 Equity Incentive Compensation Plan, the Amended and Restated MetroPCS Communications, Inc. 2004 Equity Incentive Compensation Plan and the Second Amended and Restated 1995 Stock Option Plan ("Predecessor Plans"). Following stockholder approval of the Incentive Plan, no new awards have been or may be granted under the Predecessor Plans.

Table of Contents

The following activity occurred under the Predecessor Plans:

	Stock	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)
Outstanding and exercisable, December 31, 2015	1,824,354	\$ 30.50	2.7
Exercised	(982,904)	29.34	
Expired	(7,519)	44.21	
Outstanding and exercisable, December 31, 2016	833,931	\$ 31.75	2.3

Stock options exercised under the Predecessor Plans generated proceeds of approximately \$29 million and \$47 million for the years ended December 31, 2016 and 2015, respectively.

**Employee Retirement Savings Plan**

We sponsor a retirement savings plan for the majority of our employees under section 401(k) of the Internal Revenue Code and similar plans. The plans allow employees to contribute a portion of their pretax income in accordance with specified guidelines. The plans provide that we match a percentage of employee contributions up to certain limits. Employer matching contributions were \$83 million, \$73 million and \$66 million for the years ended December 31, 2016, 2015 and 2014, respectively.

**Legacy Long Term Incentive Plan**

Prior to the business combination with MetroPCS Communications, Inc., we maintained a performance-based Long Term Incentive Plan ("LTIP") which aligned to our long-term business strategy. As of December 31, 2016, there were no LTIP awards outstanding and no new awards are expected to be granted under the LTIP.

Compensation expense reported within operating expenses related to our LTIP and payments to participants related to our LTIP were as follows:

(in millions)	December 31, 2016	December 31, 2015	December 31, 2014
Compensation expense	\$ —	\$ 27	\$ 44
Payments	52	57	60

**Note 10 – Income Taxes**

Our sources of income before income taxes were as follows:

(in millions)	Year Ended December 31,		
	2016	2015	2014
U.S.	\$ 2,286	\$ 898	\$ 347
Puerto Rico	41	80	66

Table of Contents

As of December 31, 2016, we have net operating loss ("NOL") carryforwards, tax effected, of \$1.1 billion for federal income tax purposes and \$689 million for state income tax purposes, expiring through 2036. As of December 31, 2016, our federal and state NOL carryforwards for financial reporting purposes were approximately \$204 million and \$167 million, respectively, tax effected, less than our NOL carryforwards for federal and state income tax purposes, due to unrecognized tax benefits of the same amount.

As of December 31, 2016, we have available Alternative Minimum Tax credit carryforwards of \$89 million, which may be used to reduce regular federal income taxes and have no expiration. We also have research and development and foreign tax credit carryforwards of \$174 million for federal income tax purposes, which begin to expire in 2018.

As of December 31, 2016 and 2015, our valuation allowance was \$573 million and \$583 million, respectively. The change in the valuation allowance of \$10 million is primarily related to the adoption of ASU 2016-09 and the related release of a \$33 million valuation allowance on stock option deductions included in NOL carryforwards, partially offset by 2016 activity related to state deferred tax assets for which a valuation allowance exists. Based on recent earnings in certain jurisdictions, sufficient positive evidence may exist within the next twelve months such that we may release a portion of our valuation allowance.

We file income tax returns in the U.S. federal jurisdiction, various state jurisdictions and in Puerto Rico. We are currently under examination by various states. Management does not believe the resolution of any of the audits will result in a material change to our financial condition, results of operations or cash flows. The IRS has concluded its audits of our federal tax returns through the 2013 tax year, however, NOL carryforwards for certain audited periods remain open for examination. We are generally closed to U.S. federal, state and Puerto Rico examination for years prior to 1998.

A reconciliation of the beginning and ending amount of unrecognized tax benefits were as follows:

(in millions)	Year Ended December 31,		
	2016	2015	2014
Unrecognized tax benefits, beginning of year	\$ 411	\$ 388	\$ 178
Gross decreases to tax positions in prior periods	(5)	(112)	(52)
Gross increases to current period tax positions	4	135	262
Unrecognized tax benefits, end of year	<u>\$ 410</u>	<u>\$ 411</u>	<u>\$ 388</u>

As of December 31, 2016 and 2015, we had \$168 million and \$163 million, respectively, in unrecognized tax benefits that, if recognized, would affect our annual effective tax rate. Penalties and interest on income tax assessments are included in Selling, general and administrative expenses and Interest expense, respectively, in our Consolidated Statements of Comprehensive Income. The accrued interest and penalties associated with unrecognized tax benefits are insignificant.

Table of Contents**Note 11 – Earnings Per Share**

The computation of basic and diluted earnings per share was as follows:

(in millions, except shares and per share amounts)	Year Ended December 31,		
	2016	2015	2014
Net income	\$ 1,460	\$ 733	\$ 247
Less: Dividends on mandatory convertible preferred stock	(55)	(55)	—
Net income attributable to common stockholders - basic and diluted	\$ 1,405	\$ 678	\$ 247
Weighted average shares outstanding - basic	822,470,275	812,994,028	805,284,712
Effect of dilutive securities:			
Outstanding stock options and unvested stock awards	10,584,270	9,623,910	8,893,887
Mandatory convertible preferred stock	—	—	1,743,659
Weighted average shares outstanding - diluted	833,054,545	822,617,938	815,922,258
Earnings per share - basic	\$ 1.71	\$ 0.83	\$ 0.31
Earnings per share - diluted	\$ 1.69	\$ 0.82	\$ 0.30
Potentially dilutive securities:			
Outstanding stock options and unvested stock awards	3,528,683	4,842,370	1,426,331
Mandatory convertible preferred stock	32,237,266	32,237,266	—

Potentially dilutive securities were not included in the computation of diluted earnings per share if to do so would have been anti-dilutive.

**Note 12 – Commitments and Contingencies****Commitments*****Operating Leases and Purchase Commitments***

Future minimum payments for non-cancelable operating leases and purchase commitments are summarized below:

(in millions)	Operating Leases	Purchase Commitments
Year Ending December 31,		
2017	\$ 2,417	\$ 2,011
2018	2,118	977
2019	1,832	841
2020	1,511	704
2021	1,102	626
Thereafter	2,188	960
Total	\$ 11,168	\$ 6,119

***Operating Leases***

We have operating leases for cell sites, switch sites, retail stores and office facilities with contractual terms expiring through 2026.

The majority of cell site leases have an initial non-cancelable term of five years to ten years with several renewal options. Historically, our assessment of cell site lease terms included renewal options on certain cell site leases which were reasonably assured of exercise and we had included such renewal options in the future minimum lease payments presented in the Operating Lease and Purchase Commitments table, above. As of December 31, 2016, we have updated the future minimum lease payments for all cell site leases

presented above to include only payments due for the initial non-cancelable lease term as they represent the payments which we cannot avoid at our option and also correspond to our lease term assessment for new leases. This update had the effect of reducing our contractual operating lease commitments included in the table above by \$4.6

## Table of Contents

billion as of December 31, 2016.

In addition, we have operating leases for dedicated transportation lines with varying expiration terms through 2026.

As of December 31, 2016, we were contingently liable for future ground lease payments related to the tower obligations. These contingent obligations are not included in the above table as the amounts due are contractually owed by CCI based on the subleasing arrangement. See Note 8 – Tower Obligations for further information.

Total rent expense under operating leases, including dedicated transportation lines, was \$2.8 billion, \$2.8 billion and \$3.0 billion for the years ended December 31, 2016, 2015 and 2014, respectively, and is classified as Cost of services and Selling, general and administrative in our Consolidated Statements of Comprehensive Income.

### ***Purchase Commitments***

We have commitments for non-dedicated transportation lines with varying expiration terms through 2028. In addition, we have commitments to purchase spectrum licenses, handsets, network services, equipment, software, marketing sponsorship agreements and other items in the ordinary course of business, with various terms through 2028. These amounts are not reflective of our entire anticipated purchases under the related agreements, but are determined based on the non-cancelable quantities or termination amounts to which we are contractually obligated.

### ***Related-Party Commitments***

In 2016, T-Mobile USA entered into three purchase agreements with Deutsche Telekom under which T-Mobile USA may, at its option, issue and sell to Deutsche Telekom certain Senior Notes. The purchase agreements were amended in October 2016. See Note 7 – Debt for further information.

In January 2017, T-Mobile USA borrowed \$4.0 billion under a secured term loan facility (“Incremental Term Loan Facility”) with Deutsche Telekom to refinance \$1.98 billion of outstanding secured term loans under its Term Loan Credit Agreement dated November 9, 2015, with the remaining net proceeds from the transaction intended to be used to redeem callable high yield debt. The loans under the Incremental Term Loan Facility were drawn in two tranches on January 31, 2017 (i) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.00% and will mature on November 9, 2022 and (ii) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.25% and will mature on January 31, 2024. The Incremental Term Loan Facility increases Deutsche Telekom’s incremental term loan commitment provided to T-Mobile USA under that certain First Incremental Facility Amendment dated as of December 29, 2016 from \$660 million to \$2.0 billion and provides to T-Mobile USA an additional \$2.0 billion incremental term loan commitment. See Note 14 – Subsequent Events for further information.

In December 2016, T-Mobile USA also entered into a \$2.5 billion revolving credit facility with Deutsche Telekom which comprised of (i) a three-year \$1.0 billion senior unsecured revolving credit agreement and (ii) a three-year \$1.5 billion senior secured revolving credit agreement. As of December 31, 2016, there were no outstanding borrowings under the revolving credit facility. See Note 7 – Debt for further information.

### ***Contingencies and Litigation***

We are involved in various lawsuits, claims, government agency investigations and enforcement actions, and other proceedings (“Litigation Matters”) that arise in the ordinary course of business, which include numerous court actions alleging that we are infringing various patents. Virtually all of the patent infringement cases are brought by non-practicing entities and effectively seek only monetary damages, although they occasionally seek injunctive relief as well. The Litigation Matters described above have progressed to various stages and some of them may proceed to trial, arbitration, hearing or other adjudication that could include an award of monetary or injunctive relief in the coming 12 months, if they are not otherwise resolved. We have established an accrual with respect to certain of these matters, where appropriate, which is reflected in the consolidated financial statements but that we do not consider, individually or in the aggregate, material. An accrual is established when we believe it is both probable that a loss has been incurred and an amount can be reasonably estimated. For other matters, where we have not determined that a loss is probable or because the amount of loss cannot be reasonably estimated, we have not recorded an accrual due to various factors typical in contested proceedings, including but not limited to: uncertainty concerning legal theories and their resolution by courts or regulators; uncertain damage theories and demands; and a less than fully developed factual record. While we do not expect that the ultimate resolution of these proceedings, individually or in the aggregate will have a material adverse effect on our financial position, an unfavorable outcome of some or all of these proceedings could have a material adverse impact on results of operations or cash flows for a particular period. This

Table of Contents

assessment is based on our current understanding of relevant facts and circumstances. As such, our view of these matters is subject to inherent uncertainties and may change in the future.

**Note 13 – Additional Financial Information****Supplemental Consolidated Balance Sheets Information***Allowances and Imputed Discount*

The following table summarizes the changes in allowances and unamortized imputed discount related to our current accounts receivables and EIP receivables:

(in millions)	2016	2015	2014
Allowances, beginning of year	\$ 264	\$ 199	\$ 169

82

Table of Contents

Book overdrafts included in accounts payable and accrued liabilities were \$356 million and \$501 million as of December 31, 2016 and 2015, respectively.

**Other**

In June 2016, we made a refundable deposit of \$2.2 billion to a third party in connection with a potential asset purchase. The deposit is included in Asset purchase deposit in our Consolidated Balance Sheets.

During the quarter ended and subsequent to September 30, 2016, a handset Original Equipment Manufacturer ("OEM") announced recalls on certain of its smartphone devices. As a result, we recorded no revenue associated with the device sales to customers and impaired the devices to their net realizable value. The OEM has agreed to reimburse T-Mobile, as such, we have recorded an amount due from the OEM as an offset to the loss recorded in Cost of equipment sales in our Consolidated Statements of Comprehensive Income and a reduction to Accounts payable and accrued liabilities in our Consolidated Balance Sheets.

**Supplemental Consolidated Statements of Comprehensive Income Information****Related Party Transactions**

We have related party transactions associated with Deutsche Telekom or its affiliates in the ordinary course of business, which are included in the consolidated financial statements.

The following table summarizes the impact of significant transactions with Deutsche Telekom or its affiliates included in operating expenses in the Consolidated Statements of Comprehensive Income:

(in millions)	Year Ended December 31,		
	2016	2015	2014
Discount related to roaming expenses	\$ (15)	\$ (21)	\$ (61)
Fees incurred for use of the T-Mobile brand	74	65	60
Expenses for telecommunications and IT services	25	23	24
International long distance agreement	60	—	—

We have an agreement with Deutsche Telekom for the reimbursement of certain administrative expenses, which were \$11 million and \$2 million for the years ended December 31, 2016 and 2015, respectively. There were no reimbursements for the year ended December 31, 2014.

**Supplemental Consolidated Statement of Stockholders' Equity Information****Preferred Stock**

In 2014, we completed a public offering of 20 million shares of mandatory convertible preferred stock for net proceeds of \$982 million. Dividends on the preferred stock are payable on a cumulative basis when and if declared by our board of directors at an annual rate of 5.5%. The dividends may be paid in cash, shares of common stock, subject to certain limitations, or any combination of cash and shares of common stock.

Unless converted earlier, each share of preferred stock will convert automatically on December 15, 2017 into between 1.6119 and 1.9342 shares of common stock, subject to customary anti-dilution adjustments, depending on the applicable market value of the common stock. At any time, the preferred shares may be converted, in whole or in part, at the minimum conversion rate of 1.6119 shares of common stock, except during a fundamental change conversion period. In addition, holders may be entitled to shares based on the amount of accumulated and unpaid dividends. If certain fundamental changes involving the Company occur, the preferred stock may be converted into common shares at the applicable conversion rate, subject to certain anti-dilution adjustments, and holders will also be entitled to a make-whole amount. The preferred stock ranks senior with respect to liquidation preference and dividend rights to common stock. In the event of any voluntary or involuntary liquidation, winding-up or dissolution of the Company, each holder of preferred stock will be entitled to receive a liquidation preference in the amount of \$50 per share, plus an amount equal to accumulated and unpaid dividends, after satisfaction of liabilities to our creditors and before any distribution or payment is made to any holders of common stock. The preferred stock is not redeemable.

Table of Contents**Note 14 – Subsequent Events**

In January 2017, we delivered a notice of redemption on \$1.0 billion aggregate principal amount of our 6.625% Senior Notes due 2020. The notes were redeemed on February 10, 2017 at a redemption price equal to 102.208% of the principal amount of the notes (plus accrued and unpaid interest thereon).

In January 2017, T-Mobile USA borrowed \$4.0 billion under a secured term loan facility (“Incremental Term Loan Facility”) with Deutsche Telekom to refinance \$1.98 billion of outstanding secured term loans under its Term Loan Credit Agreement dated November 9, 2015, with the remaining net proceeds from the transaction intended to be used to redeem callable high yield debt. The loans under the Incremental Term Loan Facility were drawn in two tranches on January 31, 2017 (i) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.00% and will mature on November 9, 2022 and (ii) \$2.0 billion of which will bear interest at a rate equal to a per annum rate of LIBOR plus a margin of 2.25% and will mature on January 31, 2024. The Incremental Term Loan Facility increases Deutsche Telekom’s incremental term loan commitment provided to T-Mobile USA under that certain First Incremental Facility Amendment dated as of December 29, 2016 from \$660 million to \$2.0 billion and provides to T-Mobile USA an additional \$2.0 billion incremental term loan commitment.

In February 2017, we delivered a notice of redemption on \$500 million aggregate principal amount of our 5.250% Senior Notes due 2018. The notes will be redeemed on March 6, 2017 at a redemption price equal to 101.313% of the principal amount of the notes (plus accrued and unpaid interest thereon).

**Note 15 – Guarantor Financial Information**

Pursuant to the applicable indentures and supplemental indentures, the long-term debt to affiliates and third parties, excluding Senior Secured Term Loans and capital leases, issued by T-Mobile USA (“Issuer”) is fully and unconditionally guaranteed, jointly and severally, on a senior unsecured basis by T-Mobile (“Parent”) and certain of the Issuer’s 100% owned subsidiaries (“Guarantor Subsidiaries”).

In April 2016, T-Mobile USA and certain of its affiliates, as guarantors, issued \$1.0 billion of public 6.000% Senior Notes due 2024.

The guarantees of the Guarantor Subsidiaries are subject to release in limited circumstances only upon the occurrence of certain customary conditions. The indentures governing the long-term debt contain covenants that, among other things, limit the ability of the Issuer and the Guarantor Subsidiaries to: incur more debt; pay dividends and make distributions; make certain investments; repurchase stock; create liens or other encumbrances; enter into transactions with affiliates; enter into transactions that restrict dividends or distributions from subsidiaries; and merge, consolidate, or sell, or otherwise dispose of, substantially all of their assets. Certain provisions of each of the indentures and the supplemental indentures relating to the long-term debt restrict the ability of the Issuer to loan funds or make payments to Parent. However, the Issuer and Guarantor Subsidiaries are allowed to make certain permitted payments to the Parent under the terms of the indentures and the supplemental indentures.

Presented below is the condensed consolidating financial information as of December 31, 2016 and 2015 and for the years ended December 31, 2016, 2015 and 2014.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

**Item 9A. Controls and Procedures****Evaluation of Disclosure Controls and Procedures**

We maintain disclosure controls and procedures designed to ensure information required to be disclosed in our periodic reports filed or submitted under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our disclosure controls are also designed to ensure that information required to be disclosed in the reports we file or

submit under the Exchange Act is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and

Table of Contents

procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this report.

The certifications required by Section 302 of the Sarbanes-Oxley Act of 2002 are filed as exhibits 31.1 and 31.2, respectively, to this Form 10-K.

**Changes in Internal Control over Financial Reporting**

There were no changes in our internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act, during our most recently completed fiscal quarter that materially affected or are reasonably likely to materially affect internal control over financial reporting.

**Management's Annual Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes maintaining records that in reasonable detail accurately and fairly reflect our transactions; providing reasonable assurance that transactions are recorded as necessary for preparation of our financial statements in accordance with generally accepted accounting principles; providing reasonable assurance that receipts and expenditures are made in accordance with management authorization; and providing reasonable assurance that unauthorized acquisition, use or disposition of company assets that could have a material effect on our financial statements would be prevented or detected on a timely basis. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies and procedures may deteriorate.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework and criteria established in Internal Control – Integrated Framework (2013), issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2016.

The effectiveness of our internal control over financial reporting as of December 31, 2016 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report herein.

**Item 9B. Other Information**

None.

**PART III.****Item 10. Directors, Executive Officers and Corporate Governance**

We maintain a code of ethics applicable to our Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer, Treasurer, and Controller, which is a "Code of Ethics for Senior Financial Officers" as defined by applicable rules of the SEC. This code is publicly available on our website at [investor.t-mobile.com](http://investor.t-mobile.com). If we make any amendments to this code other than technical, administrative or other non-substantive amendments, or grant any waivers, including implicit waivers, from a provision of this code we will disclose the nature of the amendment or waiver, its effective date and to whom it applies on our website at [investor.t-mobile.com](http://investor.t-mobile.com) or in a periodic report on Form 8-K filed with the SEC.

The remaining information required by this item, including information about our Directors, Executive Officers and Audit Committee, is incorporated by reference to the definitive Proxy Statement for our 2017 Annual Meeting of Stockholders, which will be filed with the SEC, no later than 120 days after December 31, 2016.

Table of Contents**Item 11. Executive Compensation**

The information required by this item is incorporated by reference to the definitive Proxy Statement for our 2017 Annual Meeting of Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2016.

**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**

The information required by this item is incorporated by reference to the definitive Proxy Statement for our 2017 Annual Meeting of Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2016.

**Item 13. Certain Relationships and Related Transactions, and Director Independence**

The information required by this item is incorporated by reference to the definitive Proxy Statement for our 2017 Annual Meeting of Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2016.

**Item 14. Principal Accounting Fees and Services**

The information required by this item is incorporated by reference to the definitive Proxy Statement for our 2017 Annual Meeting of Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2016.

**PART IV.****Item 15. Exhibits, Financial Statement Schedules**

(a) Documents filed as a part of this Form 10-K:

**1. Financial Statements**

The following financial statements are included in Part II, Item 8 of this Form 10-K:

**Report of Independent Registered Public Accounting Firm**

Consolidated Balance Sheets

Consolidated Statements of Comprehensive Income

Consolidated Statements of Cash Flows

Consolidated Statement of Stockholders' Equity

Notes to the Consolidated Financial Statements

**2. Financial Statement Schedules**

All other schedules have been omitted because they are not required, not applicable, or the required information is otherwise included.

**3. Exhibits**

See the Exhibit Index immediately following the signature page of this Form 10-K.

**Item 16. Form 10-K Summary**

None.

Table of Contents**SIGNATURES**

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

**T-MOBILE US, INC.**

February 14, 2017

/s/ John J. Legere

John J. Legere  
President and Chief Executive Officer

Each person whose signature appears below constitutes and appoints John J. Legere and J. Braxton Carter, and each or either of them, his or her true and lawful attorney-in-fact and agent, each acting alone, with full power of substitution and resubstitution, for him or her and in his or her name, place and stead, in any and all capacities, to sign any or all amendments or supplements (including post-effective amendments) to this Report, and to file the same, with all exhibits thereto, and all documents in connection therewith, with the Securities and Exchange Commission, granting unto said attorney-in-fact and agent, full power and authority to do and perform each and every act and thing requisite and necessary to be done in and about the premises, as fully to all intents and purposes as he or she might or could do in person, hereby ratifying and confirming all that said attorney-in-fact and agent, or his or her substitute or substitutes, may lawfully do or cause to be done by virtue hereof.

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the registrant and in the capacities indicated as of February 14, 2017.

Table of Contents**PART I****Item 1. Business****General**

United States Cellular Corporation ("U.S. Cellular") provides wireless telecommunications services to customers with approximately 5.0 million connections in 23 states collectively representing a total population of 32 million. U.S. Cellular operates in one reportable segment, and all of its wireless operating markets are in the United States.

- U.S. Cellular's strategy is to attract and retain wireless customers through a value proposition comprised of a high-quality network, outstanding customer service, and competitive devices, plans, and pricing, all provided with a local focus.
- U.S. Cellular Common Shares trade on the New York Stock Exchange ("NYSE") under the ticker symbol "USM."
- U.S. Cellular is a majority-owned subsidiary of Telephone and Data Systems, Inc. (NYSE: TDS). As of December 31, 2016, TDS owns 83% of U.S. Cellular common stock, has the voting power to elect all of the directors of U.S. Cellular and controls over 96% of the voting power in matters other than the election of directors of U.S. Cellular.
- U.S. Cellular was incorporated under the laws of the state of Delaware in 1983.

The map below highlights areas of operation of U.S. Cellular's consolidated operating markets.

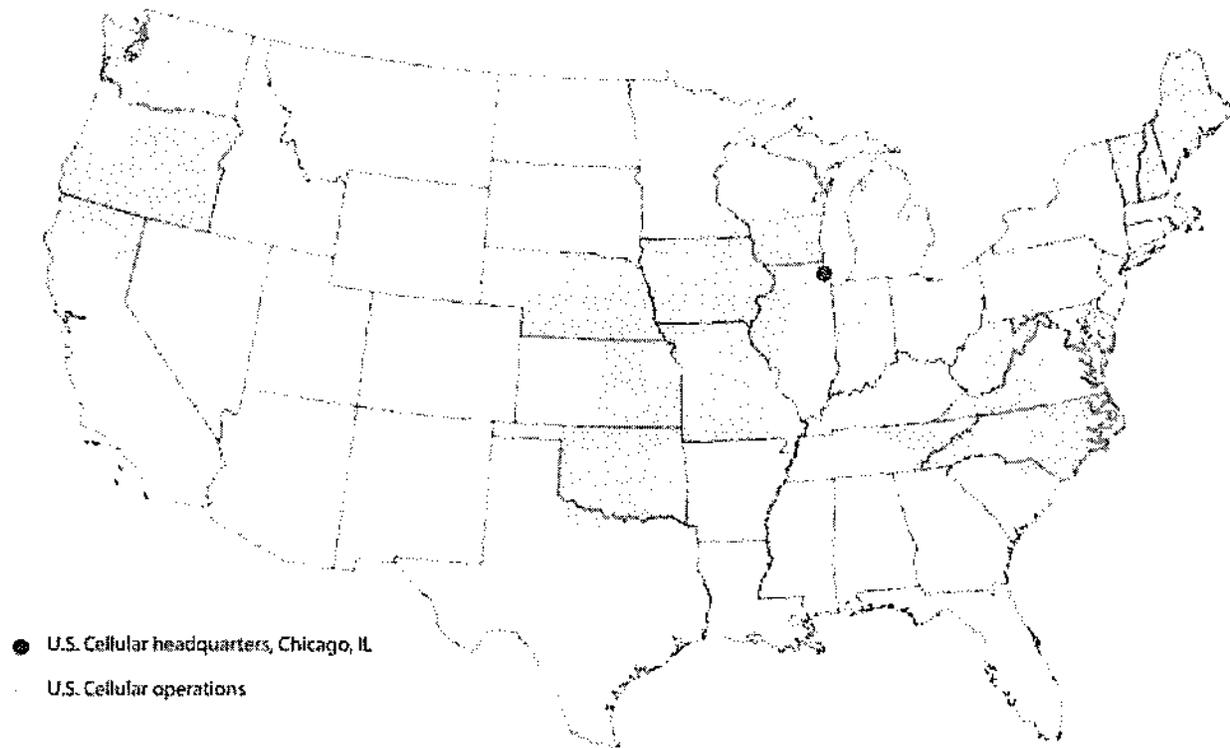

Table of Contents**Customers, Services and Products**

*Customers.* U.S. Cellular provides service to postpaid and prepaid customers from a variety of demographic segments. U.S. Cellular focuses on retail consumers, governments, and small-to-mid-size business customers in industries such as construction, retail, agriculture, professional services and real estate. These customers are served primarily through U.S. Cellular's retail and direct sales channels. U.S. Cellular builds customer loyalty by offering high-quality network services, outstanding customer-focused support services, competitive pricing, and other benefits as discussed further in "Marketing, Customer Service, and Sales and Distribution Channels."

*Services.* U.S. Cellular's postpaid customers are able to choose from a variety of national plans with voice, messaging and data usage options and pricing that are designed to fit different customer needs, usage patterns and budgets. Helping a customer find the right pricing plan is an important element of U.S. Cellular's brand positioning. U.S. Cellular offers Shared Connect data plans which allow customers to share data usage among all users and devices connected to the plan. Business rate plans are designed to meet the unique needs of the business customer. U.S. Cellular's national plans price all domestic calls as local calls, regardless of where they are made or received in the United States, with no long distance or roaming charges, made possible by roaming agreements with other wireless carriers. See "System Usage" section below for further discussion related to roaming. U.S. Cellular also offers monthly prepaid service plans, which provide customers unlimited voice and unlimited messaging with a specified amount of high-speed data and unlimited data at lower speeds once the high-speed data limit is reached to ensure customers are never without data access.

U.S. Cellular's portfolio of smartphones, tablets and other connected devices is a key part of its strategy to deliver wireless devices which allow customers to stay productive, entertained and connected on the go; these devices are backed by U.S. Cellular's high-speed networks, including a fourth generation ("4G") Long-Term Evolution ("LTE") network, which covers 99% of its postpaid connections and supports nationwide roaming. U.S. Cellular's 4G LTE network features smartphone messaging, data and internet services that allow customers to access the web and social network sites, e-mail, text, picture and video message, utilize turn-by-turn GPS navigation, and browse and download thousands of applications to customize their wireless devices to fit their lifestyles.

U.S. Cellular also offers advanced wireless solutions to consumers and business and government customers, including a growing suite of connected machine to machine solutions and software applications across the categories of monitor and control (e.g., sensors and cameras), business automation/operations (e.g., e-forms), communication (e.g., enterprise messaging, back-up router for business continuity services) and asset management (e.g., telematics, fleet management). U.S. Cellular intends to continue to further enhance these offerings for consumer and business customers in 2017 and beyond.

*Devices and Products.* U.S. Cellular offers a comprehensive range of wireless devices such as handsets, tablets, mobile hotspots, home phones and routers for use by its customers. U.S. Cellular offers wireless devices that are compatible with its 4G LTE and third generation ("3G") networks and are compliant with the Federal Communications Commission ("FCC") enhanced wireless 911 requirements. In addition, U.S. Cellular also offers a wide range of accessories, including wireless basics such as cases, screen protectors, chargers, and memory cards as well as an ever growing assortment of consumer electronics such as headphones, speakers, and hands-free devices. In addition, U.S. Cellular recently introduced an assortment of home automation products (e.g., cameras, sensors, thermostats).

During 2016, U.S. Cellular offered customers the option to purchase devices under two alternatives: (1) through equipment installment contracts over a specified time period, where no annual service contract is signed and a discount is provided on their connection charge or (2) alternative plans that are subject to a service contract. Starting in September 2016, however, new postpaid handset sales to retail consumers are made under equipment installment plans only; business and government customers may continue to purchase equipment under either alternative. For certain installment plans, after a specified period of time, the customer may have the right to upgrade to a new device prior to reaching the end of the installment term, thus enabling customers to access the latest smartphones and provide a better overall customer experience.

U.S. Cellular continues to offer device service programs that provide customers a simple process to replace a damaged or defective device through a retail store or via direct mail. U.S. Cellular also offers its Device Protection+ program which includes overnight delivery of a replacement device for lost and stolen devices. In 2016, U.S. Cellular launched Device Protection+ Advanced, which includes 100GB of data backup, TechSupport+, and AppleCare services for Apple iOS customers.

U.S. Cellular offers a full array of both iconic and value smartphones with options for both Android and iOS customers. U.S. Cellular continues to bolster its expanding smartphone portfolio with the Samsung Galaxy S@ 7 and S@ 7 Edge, the iPhone@ 7 and 7 Plus, the LG V20 and K8, and the Motorola G4 Play. Along with the iconic devices, U.S. Cellular supports the larger ecosystem of Samsung and Apple devices, such as the Samsung Gear VR, the Samsung Gear S2 and the Apple Watch. For tablets, U.S. Cellular offers the full complement of iPads, the Samsung Galaxy Tab S2, the LG G Pad F™ 8.0 LTE, and the ZTE ZPad™. U.S. Cellular's smartphone offerings play a significant role in attracting customers and driving data service usage and revenues. U.S. Cellular also offers additional products and services that utilize the company's network, including feature phones, mobile hotspots, LTE wireless routers and home phones.

Table of Contents

U.S. Cellular purchases wireless devices and accessory products from a number of original equipment manufacturers, including Samsung, Apple, Motorola, LG, Kyocera, ZTE, and Tescos. U.S. Cellular also has relationships with its suppliers to ensure best possible pricing and identifies opportunities for promotional support. Additionally, in 2016 U.S. Cellular completed multiple auctions to optimize pricing from accessories suppliers and was able to realize lower costs as a result. U.S. Cellular does not own significant product warehousing and distribution infrastructure; rather, it contracts with third party providers for the majority of its product warehousing, distribution and direct customer fulfillment activities. U.S. Cellular also contracts with third party providers for services related to its device service programs.

U.S. Cellular continuously monitors the financial condition of its wireless device and accessory suppliers. Since U.S. Cellular has a diversified portfolio of products from more than one supplier, U.S. Cellular does not expect the financial condition of any single supplier to affect its ability to offer a competitive portfolio of wireless devices and accessories for sale to customers.

**Marketing, Customer Service, and Sales and Distribution Channels**

*Marketing and Advertising.* U.S. Cellular's marketing plan is focused on acquiring, retaining and growing customer relationships by maintaining a high-quality wireless network, providing outstanding customer service, and offering a comprehensive portfolio of products and services built around customer needs at fair prices with a local focus.

U.S. Cellular believes that creating positive relationships with its customers enhances their wireless experience and builds customer loyalty. U.S. Cellular currently offers several customer-centric programs and services to customers. The Overage Protection service provides customers peace of mind by sending them text message alerts when they come close to reaching their allowable monthly plan minutes, text messages or data usage in order to avoid overage charges. U.S. Cellular also offers a service to customers on Shared Connect data plans to allow them to limit data usage on specific lines – or for the entire account – thereby providing controls to manage account overages. This service, Data Usage Controls, allows customers an easy way to divide their data bucket by line.

U.S. Cellular's advertising is directed at increasing the public awareness of the U.S. Cellular brand and understanding of the wireless services it offers, to attract potential customers, retain existing customers and increase their usage of U.S. Cellular's services. U.S. Cellular supplements its advertising with a focused public relations program that drives store traffic, supports sales of products and services, and builds brand awareness and preference. The approach combines national and local media relations in mainstream and social media channels with market-wide activities, events, and sponsorships.

U.S. Cellular focuses its charitable giving strategy on supporting initiatives relevant to consumers in its service areas. These initiatives include support of programs that focus on youth in the communities U.S. Cellular serves, such as the Boys and Girls Clubs and 4H Societies of America.

*Customer Service.* U.S. Cellular manages customer retention by focusing on outstanding customer service through the development of processes that are customer-friendly, extensive training of frontline sales and support associates and the implementation of retention programs.

U.S. Cellular currently operates four regional customer care centers in its operating markets with personnel who are responsible for customer service activities, and a national financial services center with personnel who perform credit and other customer payment activities. U.S. Cellular also contracts with third parties that provide additional customer care and financial services support.

*Sales and Distribution Channels.* U.S. Cellular supports a multi-faceted distribution program, including retail sales, direct sales, third-party national retailers, and independent agents, plus a website and telesales.

Company retail store locations are designed to market wireless products and services to the consumer and small business segments in a setting familiar to these types of customers. As of December 31, 2016, retail sales associates work in 267 U.S. Cellular-operated retail stores and kiosks. Direct sales consultants market wireless services to mid-size business and government customers. Additionally, the U.S. Cellular website enables customers to activate service and purchase wireless devices online.

U.S. Cellular maintains an ongoing training program to improve the effectiveness of retail sales associates and direct sales consultants by focusing their efforts on obtaining customers by facilitating the sale of appropriate packages for the customer's expected usage and value-added services that meet the individual needs of the customer.

U.S. Cellular has relationships with exclusive and non-exclusive agents (collectively "agents"). Those agents are independent businesses that obtain customers for U.S. Cellular on a commission basis. At December 31, 2016, U.S. Cellular had contracts with these businesses aggregating 523 locations. U.S. Cellular provides additional support and training to its agents to increase customer satisfaction and to ensure a consistent customer experience. U.S. Cellular's agents are generally in the business of selling wireless devices, wireless service packages and other related products. No single agent accounted for 10% or more of U.S. Cellular's operating revenues during the past three years.

U.S. Cellular products and services are also offered through third-party national and on-line retailers. Wal-Mart, Sam's Club, and Dollar General offer U.S. Cellular products and services at select retail locations in U.S. Cellular's service areas. Further, Amazon offers U.S. Cellular's postpaid and prepaid services on-line. U.S. Cellular continues to explore new relationships with additional third-party retailers as part of its strategy to expand distribution.

*Seasonality.* Seasonality in operating expenses may cause operating income to vary from quarter to quarter. U.S. Cellular's operating expenses tend to be higher in the fourth quarter due to increased marketing and promotional activities during the holiday season.

## Table of Contents

### Competition

The wireless telecommunication industry is highly competitive. U.S. Cellular competes directly with several wireless service providers in each of its markets. In general, there are between two and four competitors in each wireless market in which U.S. Cellular provides service, excluding resellers and mobile virtual network operators. In its footprint, U.S. Cellular competes to varying degrees against each of the national wireless companies: Verizon Wireless, AT&T Mobility, Sprint, and T-Mobile USA, in addition to a few smaller regional carriers in specific areas of its footprint. All of the national competitors have substantially greater financial and other resources than U.S. Cellular. Additionally, U.S. Cellular competes with other companies that use alternative communication technology and services to provide similar products and services.

Since each of these wireless competitors operates on systems using spectrum licensed by the FCC and has comparable technology and facilities, competition among wireless service providers for customers is principally on the basis of types of products and services, price, size of area covered, network quality, network speed and responsiveness of customer service. U.S. Cellular employs a customer satisfaction strategy that includes maintaining an outstanding wireless network throughout its markets. U.S. Cellular owns and operates low-band spectrum (less than 1 GHz) that covers the majority of its footprint and enables more efficient coverage in rural areas (compared to spectrum above 1 GHz), which strengthens its network quality positioning. As discussed below, the FCC is currently completing the auction process for a new tranche of low-band spectrum, the 600 MHz band. To the extent existing competitors or new entrants acquire such spectrum in U.S. Cellular markets, U.S. Cellular could face increased competition over time from competitors that hold such more-efficient low-band spectrum.

The use of national advertising and promotional programs by the top four wireless service providers is a source of additional competitive and pricing pressures in all U.S. Cellular markets, even if those operators do not provide direct service in a particular market. Over the past year, competition among top carriers has continued to be aggressive, with the top four carriers engaging in rich promotional initiatives including contract buyouts and limited-time and permanent price reductions. In addition, in the current wireless environment, U.S. Cellular's ability to compete depends on its ability to continue to offer national voice and data plans. U.S. Cellular provides wireless services comparable to the national competitors, but the national wireless companies operate in a wider geographic area and are able to provide such services over a wider area on their own networks than U.S. Cellular can offer on its network. Although U.S. Cellular offers similar coverage area as these competitors, U.S. Cellular incurs roaming charges for data sessions and calls made in portions of the coverage area which are not part of its network, thereby increasing its cost of operations. U.S. Cellular depends on roaming agreements with other wireless carriers to provide voice and data roaming capabilities in areas not covered by U.S. Cellular's network. Similarly, U.S. Cellular provides roaming services on its network to other wireless carriers' customers who travel within U.S. Cellular's coverage areas and receives revenue from other carriers for the provision of these services.

Convergence of connectivity is taking place on many levels, including wireless devices that can act as wireless or wireline replacement devices and the incorporation of wireless "hot spot" technology in wireless devices making internet access seamless regardless of location. Although less directly a substitute for other wireless services, wireless data services such as Wi-Fi may be adequate for those who do not need mobile wide-area roaming or full two-way voice services. Technological advances or regulatory changes in the future, such as the rollout and consumer adoption of Wi-Fi calling and Voice over Long-Term Evolution ("VoLTE") capabilities, may make available other alternatives to current wireless service, thereby creating additional sources of competition that shift consumers' perceptions and preferences of network strength, speed and reliability. If the trend toward convergence continues, U.S. Cellular is at a competitive disadvantage to larger competitors, including the national wireless carriers, traditional cable companies, mobile virtual network operators ("MVNO") and other potential large new entrants with much greater financial and other resources in adapting to such convergence.

U.S. Cellular's approach in 2017 and in future years will be to focus on the unique needs and attitudes of its customers towards wireless service. U.S. Cellular will deliver high-quality products and services at competitive prices and intends to continue to differentiate itself by seeking to provide an overall outstanding customer experience, founded on a high-quality network. U.S. Cellular's ability to compete successfully in the future will depend upon its ability to anticipate and respond to changes related to new service offerings, consumer preferences, competitors' pricing strategies and new product offerings, technology, demographic trends, economic conditions and its access to adequate spectrum resources.

### System Usage

U.S. Cellular's main sources of revenues are from its own customers and from customers of other wireless operators who roam on its network. An inter-carrier roaming agreement is negotiated between the wireless operators to enable customers who are in a wireless service area other than the customer's home service area to place or receive a call, SMS or use data in that service area. U.S. Cellular has entered into reciprocal roaming agreements with operators of other wireless systems covering virtually all systems with Code Division Multiple Access ("CDMA") technology in the United States, Canada and Mexico. In addition, U.S. Cellular has entered into 4G LTE roaming agreements with national wireless companies and, as a result, a majority of U.S. Cellular customers currently have access to nationwide 4G LTE service.

When roaming on another wireless carrier's network, customers will automatically pre-register on the serving carrier's network allowing customers to make or receive calls, SMS or use data. The charge for this service is negotiated as part of the roaming agreement between U.S. Cellular and the roaming customer's carrier. U.S. Cellular bills this charge to the customer's home carrier, which then may bill the customer. In many instances, based on competitive factors, carriers, including U.S. Cellular, may or may not charge their customers for roaming. Since 2010, U.S. Cellular has offered nationwide 3G data roaming services, allowing its customers to access high-speed data across the country.

[Table of Contents](#)**Access Technology and System Design**

*Technology.* Wireless telecommunication systems transmit voice, data, graphics and video through the transmission of signals over networks of radio towers using radio spectrum licensed by the FCC. Access to local, regional, national and worldwide telecommunications networks is provided through system interconnections. A high-quality network, supported by continued investments in that network, will remain an important factor for U.S. Cellular to remain competitive.

4G LTE technology enables more network capacity for more data per user as well as faster access to data. U.S. Cellular continues to devote efforts to enhance its network capabilities with the deployment of VoLTE technology and plans a multi-year roll out with one market in early 2017. VoLTE will allow U.S. Cellular's customers and customers of other wireless carriers that have roaming agreements with U.S. Cellular to utilize U.S. Cellular's LTE network for voice and data services. U.S. Cellular continues to offer services based on 3G technology and CDMA digital technology across its networks.

Through roaming agreements with other U.S. based wireless carriers, U.S. Cellular's customers may access CDMA and 4G LTE services in virtually all areas of the United States, as well as CDMA in parts of Canada and Mexico. Another digital technology, Global System for Mobile Communication ("GSM"), has a larger installed base of customers worldwide. U.S. Cellular customers now have the ability to roam on GSM carriers with voice, data and SMS in Canada, Mexico and internationally. Both CDMA and GSM technologies are being succeeded by 4G LTE technology.

*System Design and Construction.* U.S. Cellular designs and constructs its systems in a manner it believes will permit it to provide high-quality service to substantially all types of compatible wireless devices. Designs are based on engineering studies which relate to specific markets, in support of the larger network. Network reliability is given careful consideration and extensive backup redundancy is employed in many aspects of U.S. Cellular's network design. Route diversity, redundant equipment, ring topology and extensive use of emergency standby power also are used to enhance network reliability and minimize service disruption from any particular network element failure.

In accordance with its strategy of building and strengthening its operating market areas, U.S. Cellular has selected high-capacity, carrier-class digital wireless switching systems that are capable of serving multiple markets through a single mobile telephone switching office. Centralized equipment, used for network and data management, is located in high-availability facilities supported by multiple levels of power and network redundancy. U.S. Cellular's systems are designed to incorporate Internet Protocol ("IP") packet-based Ethernet technology, which allows for increased data capacity and a more efficient network. Interconnection between the mobile telephone switching office and the cell sites utilizes Ethernet technology for nearly all 4G LTE sites, over fiber or microwave links.

U.S. Cellular believes that currently available technologies and appropriate capital additions will allow sufficient capacity on its networks to meet anticipated demand for voice and data services over the next few years. However, increasing demand for high-speed data may require the acquisition of additional spectrum licenses to provide sufficient capacity and throughput.

Construction of wireless systems is capital-intensive, requiring substantial investment for land and improvements, buildings, towers, mobile telephone switching offices, cell site equipment, transport equipment, engineering and installation. U.S. Cellular primarily uses its own personnel to engineer each wireless system it owns and operates, and engages contractors to construct the facilities.

The costs (inclusive of the costs to acquire licenses) to develop the systems which U.S. Cellular operates have historically been financed primarily through proceeds from debt and equity offerings, with cash generated by operations, and proceeds from the sales of wireless interests and other non-strategic assets.

**Business Development Strategy**

U.S. Cellular groups its individual markets (geographic service areas as defined by the FCC in which wireless carriers are licensed, for fixed terms, to provide service) into broader geographic market areas to offer customers large service areas that primarily utilize U.S. Cellular's network. U.S. Cellular's ownership interests in wireless licenses include both consolidated and investment interests in operating and non-operating licenses covering portions of 32 states and a total population of 50 million at December 31, 2016.

U.S. Cellular's business development strategy is to obtain interests in and access to wireless licenses in its current operating markets and in areas that are adjacent to or in close proximity to its other wireless licenses, thereby building contiguous operating market areas. U.S. Cellular believes that the acquisition of additional licenses within its current operating markets will enhance its network capacity and speed to meet its customers' growing demand for data services. U.S. Cellular may continue to make opportunistic acquisitions or exchanges that further strengthen its current operating markets. From time to time, U.S. Cellular has divested outright or included in exchanges for other wireless interests certain consolidated and investment interests that were considered less essential to its current and expected future operations. As part of its business development strategy, U.S. Cellular may periodically be engaged in negotiations relating to the acquisition, exchange or disposition of companies, strategic properties or wireless spectrum. See Note 6 — Acquisitions, Divestitures and Exchanges in the Notes to Consolidated Financial Statements for a description of significant acquisitions, divestitures and exchanges in the years 2014 through 2016.

Table of Contents

Occasionally, the FCC conducts auctions through which additional spectrum is made available for the provision of wireless services. Historically, U.S. Cellular has participated in certain prior FCC auctions indirectly through its limited partnership interests. Each entity that qualified as a "designated entity" was eligible for bidding credits with respect to most licenses purchased in accordance with the rules defined by the FCC for each auction. In most cases, the bidding credits resulted in a 25% discount from the gross winning bid. In January 2015, the FCC released the results of Auction 97. U.S. Cellular participated in Auction 97 indirectly through its limited partnership interest in Advantage Spectrum L.P. Advantage Spectrum L.P. applied as a "designated entity" and received bid credits resulting in a 25% discount with respect to spectrum purchased in Auction 97. See Note 13 — Variable Interest Entities in the Notes to Consolidated Financial Statements for additional information. U.S. Cellular may participate as a bidder, or member of a bidding group, in future auctions.

In July 2016, the FCC announced U.S. Cellular as a qualified bidder in the FCC's forward auction of 600MHz spectrum licenses, referred to as Auction 1002. Due to changes in FCC rules, U.S. Cellular did not apply to participate in Auction 1002 by investing in a "designated entity" limited partnership which would have qualified for a discount of 25% on any licenses won in the auction. Instead, U.S. Cellular applied to participate in the auction directly and will not qualify for any discount on licenses that may be won in the auction. See Exhibit 13 to this Form 10-K, under "Regulatory Matters – FCC Auction 1002" for a summary of U.S. Cellular's participation in Auction 1002.

**Regulation**

U.S. Cellular's operations are subject to federal, state and local regulation. Key regulatory considerations are discussed below. Additional information relating to U.S. Cellular's regulatory environment is in Risk Factors and incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section "Regulatory Matters."

U.S. Cellular provides various wireless services, including voice and data services, pursuant to licenses granted by the FCC. The construction, operation and transfer of wireless systems in the United States are regulated to varying degrees by the FCC pursuant to the Communications Act of 1934, as amended ("Communications Act"). The FCC currently does not require wireless carriers to comply with a number of statutory provisions otherwise applicable to common carriers that provide, originate or terminate interstate or international telecommunications. However, the FCC has enacted regulations governing construction and operation of wireless systems, licensing (including renewal of licenses) and technical standards for the provision of wireless services under the Communications Act.

Wireless licenses segmented by geographic areas are granted by the FCC. The completion of acquisitions, involving the transfer of control of all or a portion of a wireless system, requires prior FCC approval. The FCC determines on a case-by-case basis whether an acquisition of wireless licenses is in the public interest. Wireless licenses are granted generally for a ten year term or, in some cases, for a fifteen year term. The FCC establishes the standards for conducting comparative renewal proceedings between a wireless license holder seeking renewal of its license and challengers filing competing applications. All of U.S. Cellular's licenses for which it applied for renewal since 1995 have been renewed. U.S. Cellular expects to continue to meet the criteria of the FCC's license renewal process.

As part of its data services, U.S. Cellular provides internet access. Such internet access services may be subject to different regulatory requirements than other wireless services.

Reference is made to Exhibit 13 to this Form 10-K under "Regulatory Matters" for information regarding any significant recent developments and proposals relating to the foregoing regulatory matters.

Although the Communications Act generally pre-empts state and local governments from regulating the entry of, or the rates charged by, wireless carriers, certain state and local governments regulate other terms and conditions of wireless services, including billing, termination of service arrangements, imposition of early termination fees, advertising, network outages, the use of handsets while driving, zoning and land use. Further, the Federal Aviation Administration also regulates the siting, lighting and construction of transmitter towers and antennae.

**Debt Securities**

The following securities trade on the NYSE: U.S. Cellular's 6.95% Senior Notes due 2060 trade under the symbol "UZA," U.S. Cellular's 7.25% Senior Notes due 2063 trade under the symbol "UZB," and U.S. Cellular's 7.25% Senior Notes due 2064 trade under the symbol "UZC." U.S. Cellular's 6.7% Senior Notes due 2033 are traded over the counter and are not listed on any stock exchange.

**Employees**

U.S. Cellular had approximately 6,300 full-time and part-time employees as of December 31, 2016. None of U.S. Cellular's employees are represented by labor organizations. U.S. Cellular considers its relationship with its employees to be good.

Table of Contents**Location and Company Information**

U.S. Cellular executive offices are located at 8410 West Bryn Mawr Avenue, Chicago, Illinois 60631. U.S. Cellular's telephone number is 773-399-8900. U.S. Cellular's website address is [www.uscellular.com](http://www.uscellular.com). U.S. Cellular files with, or furnishes to, the Securities and Exchange Commission ("SEC") annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, as well as various other information. Investors may access, free of charge, through the Investor Relations portion of the website, U.S. Cellular's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practical after such material is filed electronically with the SEC. The public may read and copy any materials U.S. Cellular files with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington D.C. 20549. The public may obtain information on the operation of the Reference Room by calling the SEC at 1-800-732-0330. The public may also view electronic filings of U.S. Cellular by accessing SEC filings at [www.sec.gov](http://www.sec.gov).

## Item 1A. Risk Factors

### PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995 SAFE HARBOR CAUTIONARY STATEMENT

This Annual Report on Form 10-K, including exhibits, contains statements that are not based on historical facts and represent forward-looking statements, as this term is defined in the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, that address activities, events or developments that U.S. Cellular intends, expects, projects, believes, estimates, plans or anticipates will or may occur in the future are forward-looking statements. The words "believes," "anticipates," "estimates," "expects," "plans," "intends," "projects" and similar expressions are intended to identify these forward-looking statements, but are not the exclusive means of identifying them. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, events or developments to be significantly different from any future results, events or developments expressed or implied by such forward-looking statements. Such risks, uncertainties and other factors include those set forth below under "Risk Factors" in this Form 10-K. Each of the following risks could have a material adverse effect on U.S. Cellular's business, financial condition or results of operations; however, such factors are not necessarily all of the important factors that could cause actual results, performance or achievements to differ materially from those expressed in, or implied by, the forward-looking statements contained in this document. Other unknown or unpredictable factors also could have material adverse effects on future results, performance or achievements. U.S. Cellular undertakes no obligation to update publicly any forward-looking statements whether as a result of new information, future events or otherwise. You should carefully consider the following risk factors and other information contained in, or incorporated by reference into, this Form 10-K to understand the material risks relating to U.S. Cellular's business.

#### Risk Factors

**1. Intense competition in the markets in which U.S. Cellular operates could adversely affect U.S. Cellular's revenues or increase its costs to compete.**

Competition in the wireless industry is intense and is expected to intensify in the future due to multiple wireless industry factors such as increasing market penetration, decreasing customer churn rates, introduction of new products, new competitors and changing prices. There is competition in pricing; handsets and other devices; network quality, coverage, speed and technologies; distribution; new entrants; and other categories. In particular, wireless competition includes aggressive promotional pricing to induce customers to switch carriers, which could result in switching activity and churn; data network speed is a competitive differentiator; and there has been a resurgence of new entrants to wireless markets including prepaid brands that have been purchased by national carriers. U.S. Cellular's ability to compete effectively will depend, in part, on its ability to anticipate and respond to various competitive factors affecting the telecommunications industry. U.S. Cellular anticipates that competition will continue to cause the prices for products and services to decline and the costs to compete to increase. Most of U.S. Cellular's competitors are national or global telecommunications companies that are larger than U.S. Cellular, possess greater financial and other resources, possess more extensive coverage areas and more spectrum within their coverage areas, and market other services with their communications services that U.S. Cellular does not offer. Further, other companies that currently are less competitive may also add more efficient low-band spectrum to become more competitive in U.S. Cellular's primary markets. In particular, to the extent that existing competitors or new entrants acquire low-band (600 MHz) spectrum in FCC Auction 1002 in U.S. Cellular markets, U.S. Cellular could face increased competition over time from competitors which hold more efficient low-band spectrum. In addition, U.S. Cellular may face competition from technologies that may be introduced in the future. New technologies, services and products that are more commercially effective than the technologies, services and products offered by U.S. Cellular may be developed. Further, new technologies may be proprietary such that U.S. Cellular is not able to adopt such technologies. There can be no assurance that U.S. Cellular will be able to compete successfully in this environment.

Sources of competition to U.S. Cellular's business typically include two to four competing wireless telecommunications service providers in each market, wireline telecommunications service providers, cable companies, resellers (including MVNO), and providers of other alternate telecommunications services. Many of U.S. Cellular's wireless competitors and other competitors have substantially greater financial, technical, marketing, sales, purchasing and distribution resources than U.S. Cellular.

If U.S. Cellular does not adapt to compete effectively in such a highly competitive environment, such competitive factors could result in product, service, pricing or cost disadvantages and could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Table of Contents**2. A failure by U.S. Cellular to successfully execute its business strategy (including planned acquisitions, spectrum acquisitions, divestitures and exchanges) or allocate resources or capital could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular is a regional wireless carrier, but competes primarily against much larger national wireless carriers with much greater resources. Its business strategy in attempting to attract and retain wireless customers through a value proposition comprised of a high-quality network, outstanding customer service, and competitive devices, plans and pricing, all provided with a local focus has not resulted in, and in the future may not result in, performance that achieves returns in line with or above its cost of capital. U.S. Cellular's current forecast indicates that U.S. Cellular will not achieve a return on capital that exceeds its cost of capital in the foreseeable future. U.S. Cellular also might be unable to adopt technologies, products and services as fast as its larger competitors. As a result, consumers who are eager to adopt new technologies, products and services more quickly may select U.S. Cellular's competitors rather than U.S. Cellular as their service provider. To the extent that U.S. Cellular does not attract or retain these types of customers, U.S. Cellular could be at a competitive disadvantage and have a customer base that generates lower profit margins relative to its competition.

The successful execution of strategy and optimal capital allocation decisions depend on various internal and external factors, many of which are not in U.S. Cellular's control. U.S. Cellular's ability to achieve projected financial results by implementing and executing its business strategy and optimally allocating its assets and capital could be affected by such factors. Such factors include but are not limited to pricing practices by competitors, relative scale, purchasing power, roaming and other strategic agreements, wireless device availability, timing of introduction of wireless devices, access to spectrum, emerging technologies and other factors. In addition, there is no assurance that U.S. Cellular's strategy will be successful. Even if U.S. Cellular executes its business strategy as intended, such strategy may not be successful in the long term at achieving growth in customers, revenues, net income, or generating a return on capital greater than U.S. Cellular's cost of capital. A failure by U.S. Cellular to execute its business strategy successfully or to allocate resources or capital optimally could have an adverse effect on U.S. Cellular's wireless business, financial condition or results of operations.

**3. Uncertainty in U.S. Cellular's future cash flow and liquidity or in the ability to access capital, deterioration in the capital markets, other changes in U.S. Cellular's performance or market conditions, changes in U.S. Cellular's credit ratings or other factors could limit or restrict the availability of financing on terms and prices acceptable to U.S. Cellular, which could require U.S. Cellular to reduce its construction, development or acquisition programs, reduce the acquisition of spectrum licenses, and/or reduce or cease share repurchases.**

U.S. Cellular operates a capital-intensive business. U.S. Cellular has used internally-generated funds and also has obtained substantial funds from external sources for general corporate purposes. In the past, U.S. Cellular's existing cash and investment balances, funds available under its revolving credit facilities, funds from other financing sources, including a term loan and other long-term debt, and cash flows from operating, investing and financing activities, including sales of assets or businesses, provided sufficient liquidity and financial flexibility for U.S. Cellular to meet its normal day-to-day operating needs and debt service requirements, to finance the build-out and enhancement of markets and to fund acquisitions. There is no assurance that this will be the case in the future. It may be necessary from time to time to increase the size of the existing revolving credit facility, to put in place new credit facilities, or to obtain other forms of financing in order to fund potential expenditures. U.S. Cellular's liquidity would be adversely affected if, among other things, U.S. Cellular is unable to obtain short or long-term financing on acceptable terms, U.S. Cellular makes spectrum license purchases in FCC auctions or from other parties, the LA Partnership discontinues or reduces distributions compared to prior historical levels and/or Eligible Telecommunications Carrier ("ETC") and/or other regulatory support payments decline. In addition, although sales of assets or businesses by U.S. Cellular have been an important source of liquidity for U.S. Cellular in recent periods, U.S. Cellular does not expect a similar level of such sales in the future, which will reduce a source of liquidity for U.S. Cellular. In recent years, U.S. Cellular's credit rating has declined to sub-investment grade. In certain recent periods, U.S. Cellular has incurred negative free cash flow (defined as Cash flows from operating activities less Cash paid for additions to property, plant and equipment) and this will continue in the future if operating results do not improve or if capital expenditures do not decrease. U.S. Cellular currently expects to have negative free cash flow in 2017. U.S. Cellular may require substantial additional capital for, among other uses, funding day-to-day operating needs, working capital, acquisitions of providers of wireless telecommunications services, spectrum license or system acquisitions, system development and network capacity expansion, debt service requirements, the repurchase of shares, or making additional investments. There can be no assurance that sufficient funds will continue to be available to U.S. Cellular or its subsidiaries on terms or at prices acceptable to U.S. Cellular. Insufficient cash flows from operating activities, changes in its credit ratings, defaults of the terms of debt or credit agreements, uncertainty of access to capital, deterioration in the capital markets, reduced regulatory capital at banks which in turn limits their ability to borrow and lend, other changes in the performance of U.S. Cellular or in market conditions or other factors could limit or restrict the availability of financing on terms and prices acceptable to U.S. Cellular, which could require U.S. Cellular to reduce its acquisition, capital expenditure and business development programs, reduce the acquisition of spectrum licenses, and/or reduce or cease share repurchases. U.S. Cellular cannot provide assurances that circumstances that could have a material adverse effect on its liquidity or capital resources will not occur. Any of the foregoing would have an adverse impact on U.S. Cellular's business, financial condition or results of operations.

[Table of Contents](#)**4. U.S. Cellular has a significant amount of indebtedness which could adversely affect its financial performance and in turn adversely affect its ability to make payments on its indebtedness, comply with terms of debt covenants and incur additional debt.**

U.S. Cellular has a significant amount of indebtedness and may need to incur additional indebtedness. U.S. Cellular's level of indebtedness could have important consequences. For example, it (i) may limit U.S. Cellular's ability to obtain additional financing for working capital, capital expenditures or general corporate purposes, particularly if the ratings assigned to its debt securities by rating organizations are revised downward; (ii) will require U.S. Cellular to dedicate a substantial portion of its cash flow from operations to the payment of interest and principal on its debt, reducing the funds available to U.S. Cellular for other purposes including expansion through acquisitions, capital expenditures, marketing spending and expansion of its business; and (iii) may limit U.S. Cellular's flexibility to adjust to changing business and market conditions and make U.S. Cellular more vulnerable to a downturn in general economic conditions as compared to U.S. Cellular's competitors. U.S. Cellular's ability to make scheduled payments on its indebtedness or to refinance it will depend on its financial and operating performance, which, in turn, is subject to prevailing economic and competitive conditions and other factors beyond its control. In addition, U.S. Cellular's leverage may put it at a competitive disadvantage to some of its competitors that are not as leveraged. U.S. Cellular's revolving credit facility and the U.S. Cellular term loan facility require U.S. Cellular to comply with certain affirmative and negative covenants, including certain financial covenants. Depending on actual financial performance of U.S. Cellular, there is a risk that U.S. Cellular could fail to satisfy the required financial covenants. If U.S. Cellular breaches a financial or other covenant of any of these agreements, it would result in a default under that agreement, and could involve a cross-default under other debt instruments. This could in turn cause the affected lenders to accelerate the repayment of principal and accrued interest on any outstanding debt under such agreements and, if they choose, terminate the facility. If appropriate, U.S. Cellular may request the applicable lender for an amendment of financial covenants in the U.S. Cellular revolving credit facility and the U.S. Cellular term loan facility, in order to provide additional financial flexibility to U.S. Cellular, and may also seek other changes to such facilities. There is no assurance that the lenders will agree to any amendments. If the lenders agree to amendments, this may result in additional payments or higher interest rates payable to the lenders and/or additional restrictions. Restrictions in such debt instruments may limit U.S. Cellular's operating and financial flexibility.

As a result, U.S. Cellular's level of indebtedness, restrictions contained in debt instruments and/or possible breaches of covenants, defaults, and acceleration of indebtedness could have an adverse effect on U.S. Cellular's business, financial condition, revenues, results of operations and cash flows.

**5. Changes in roaming practices or other factors could cause U.S. Cellular's roaming revenues to decline from current levels, roaming expenses to increase from current levels and/or impact U.S. Cellular's ability to service its customers in geographic areas where U.S. Cellular does not have its own network, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular's service revenues include roaming revenues related to the use of U.S. Cellular's network by other carriers' customers who travel within U.S. Cellular's coverage areas. Changes in the network footprints of carriers due to mergers, acquisitions or network expansions could have an adverse effect on U.S. Cellular's roaming revenues. For example, consolidation among other carriers which have network footprints that currently overlap U.S. Cellular's network could decrease the amount of roaming revenues for U.S. Cellular.

Similarly, U.S. Cellular's customers can access another carrier's digital system automatically only if the other carrier allows U.S. Cellular's customers to roam on its network. U.S. Cellular relies on roaming agreements with other carriers to provide roaming capability to its customers in areas of the U.S. and internationally outside of its service areas, including Mexico and Canada, and to improve coverage within selected areas of U.S. Cellular's network footprint. Such agreements cover traditional voice services as well as data services. Although U.S. Cellular currently has long-term roaming agreements with certain other carriers, these agreements generally are subject to renewal and termination if certain events occur. FCC rules and orders impose certain requirements on wireless carriers to offer certain roaming arrangements to other carriers. However, carriers frequently disagree on what is required. Although U.S. Cellular has entered into 4G LTE roaming agreements with national carriers, there is no assurance that U.S. Cellular will be able to maintain these agreements and/or enter into new agreements with other carriers to provide roaming services using 4G LTE or other technologies or that it will be able to do so on reasonable or cost-effective terms.

Some competitors may be able to obtain lower roaming rates than U.S. Cellular is able to obtain because they have larger call volumes or may be able to reduce roaming charges by providing service principally over their own networks. In addition, the quality of service that a wireless carrier delivers during a roaming call may be inferior to the quality of service U.S. Cellular provides, the price of a roaming call may not be competitive with prices of other wireless carriers for such call, and U.S. Cellular's customers may not be able to use some of the advanced features, such as voicemail notification or data applications, that U.S. Cellular's customers enjoy when making calls on U.S. Cellular's network. U.S. Cellular's rate of adoption of new technologies, such as those enabling high-speed data and voice services, could affect its ability to enter into or maintain roaming agreements with other carriers. In addition, U.S. Cellular's wireless technology may not be compatible with technologies used by other carriers, which may limit the ability of U.S. Cellular to enter into voice or data roaming agreements with such other carriers. Carriers whose customers roam on U.S. Cellular's network could switch their business to new operators or, over time, to their own networks. Changes in roaming usage patterns, rates for roaming minutes or data usage or relationships with carriers whose customers generate roaming minutes or data use on U.S. Cellular's network could have an adverse effect on U.S. Cellular's revenues and revenue growth. Further, other carriers could negotiate higher roaming rates for accessing their networks, resulting in increased roaming expense for U.S. Cellular.

Table of Contents

To the extent that other carriers expand their networks in U.S. Cellular's service areas, the roaming arrangements between U.S. Cellular and these other carriers could become less strategic for them. That is, these other carriers will have fewer or less extensive geographic areas where roaming services are required by their customers and, as a result, the roaming arrangements could become less critical to serving their customer base. This presents a risk to U.S. Cellular in that, to the extent U.S. Cellular is not able to enter into economically viable roaming arrangements with these other carriers, this could impact U.S. Cellular's ability to service its customers in geographic areas where U.S. Cellular does not have its own network.

If U.S. Cellular's roaming revenues decline, roaming expenses increase, or if U.S. Cellular is unable to obtain or maintain roaming agreements with other carriers that contain pricing and other terms that are competitive and acceptable to U.S. Cellular, and that satisfy U.S. Cellular's quality and interoperability requirements, its business, financial condition or results of operations could be adversely affected.

**6. A failure by U.S. Cellular to obtain access to adequate radio spectrum to meet current or anticipated future needs and/or to accurately predict future needs for radio spectrum could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular's business depends on the ability to use portions of the radio spectrum licensed by the FCC. U.S. Cellular could fail to obtain access to sufficient spectrum capacity in new or existing critical markets, whether through FCC auctions or other transactions, in order to meet the anticipated spectrum requirements associated with increased demand for existing services, especially increases in customer demand for data services, and to enable deployment of next-generation services. U.S. Cellular believes that this increased demand for data services reflects a trend that will continue for the foreseeable future. However, U.S. Cellular could fail to accurately forecast its future spectrum requirements considering changes in customer usage patterns, technology requirements and the expanded demands of new services. Such a failure could have an adverse impact on the quality of U.S. Cellular's services or U.S. Cellular's ability to roll out such future services in some markets, or could require that U.S. Cellular curtail existing services in order to make spectrum available for next-generation services. Spectrum constrained providers could be effectively capped in increasing market share. As spectrum constrained providers gain customers, they use up their network capacity. Since they lack spectrum, they can respond to demand only by adding cell sites, which is capital intensive, adds fixed operating costs, is limited by zoning considerations, and ultimately may not be cost effective.

U.S. Cellular may acquire access to spectrum through a number of alternatives, including acquisitions, exchanges and participation in spectrum auctions. U.S. Cellular may participate in spectrum auctions conducted by the FCC in the future. As required by law, the FCC has conducted auctions for licenses to use some parts of the radio spectrum. The decision to conduct auctions, and the determination of what spectrum frequencies will be made available for auction and the determination of geographic size of licenses, are made by the FCC pursuant to laws that it administers. The FCC may not be able to allocate spectrum sufficient to meet the demands of all those wishing to obtain licenses for new market entry or to expand their spectrum holdings to meet the expanding demand for data services or to address other spectrum constraints. Due to factors such as geographic size of licenses and auction bidders that may raise prices beyond acceptable levels, U.S. Cellular may not be successful in FCC auctions in obtaining access to the spectrum that it believes is necessary to implement its business and technology strategies.

In addition, newly auctioned spectrum may not be compatible with existing spectrum, and vendors may not create suitable products to use such spectrum. Further, access to spectrum licenses won in FCC auctions may not be available on a timely basis. Such access is dependent upon the FCC actually granting licenses won, which can be delayed for various reasons. Furthermore, newly licensed spectrum may not be available for immediate use since the radio operations of incumbent users, including in some cases government agencies, may need to be relocated to other portions of the radio spectrum, and/or the newly licensed spectrum may be subject to sharing and coordination obligations for a period of time. U.S. Cellular also may seek to acquire radio spectrum through purchases and exchanges with other spectrum licensees. However, U.S. Cellular may not be able to acquire sufficient spectrum through these types of transactions, and U.S. Cellular may not be able to complete any of these transactions on favorable terms.

**7. To the extent conducted by the FCC, U.S. Cellular may participate in FCC auctions of additional spectrum in the future directly or indirectly and, during certain periods, will be subject to the FCC's anti-collusion rules, which could have an adverse effect on U.S. Cellular.**

From time to time, the FCC conducts auctions through which additional spectrum is made available for the provision of wireless services. U.S. Cellular has participated in such auctions in the past and may participate in other auctions conducted by the FCC in the future. FCC anti-collusion rules place certain restrictions on business communications and disclosures by participants in an FCC auction. These anti-collusion rules may restrict the normal conduct of U.S. Cellular's business, U.S. Cellular's acquisition, divestiture, exchange and other corporate development activity and/or disclosures by U.S. Cellular relating to an FCC auction. The restrictions could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

As a result of its application to participate in the FCC's forward auction of 600 MHz spectrum licenses, referred to as Auction 1002, since February 10, 2016, U.S. Cellular has been subject to FCC anti-collusion rules that place certain restrictions on public disclosures and business communications with other companies relating to U.S. Cellular's participation. As a result of the FCC's announcement of U.S. Cellular as a qualified bidder on July 15, 2016, these restrictions will continue until the down payment deadline for Auction 1002, which will be ten business days after release of the FCC's Channel Reassignment Public Notice, following the end of the auction. These anti-collusion rules may restrict the conduct of certain U.S. Cellular activities with other auction applicants as well as with nationwide providers of wireless services which are not applicants. The restrictions could have an adverse effect on U.S. Cellular's business, financial condition or results of operations. See Exhibit 13 to this Form 10-K, under "Regulatory Matters – FCC Auction 1002" for a summary of U.S. Cellular's participation in Auction 1002.

Table of Contents**8. Failure by U.S. Cellular to timely or fully comply with any existing applicable legislative and/or regulatory requirements or changes thereto could adversely affect U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular's operations are subject to varying degrees of regulation by the FCC, state public utility commissions and other federal, state and local regulatory agencies and legislative bodies. Changes in the administration of the various regulatory agencies and legislative bodies could result in different policies with respect to many federal laws and regulations, including but not limited to changes to fiscal and tax policies, which may include comprehensive tax reform. New or amended regulatory requirements could increase U.S. Cellular's costs and divert resources from other initiatives. Adverse decisions, increased regulation, or changes to existing regulation by regulatory bodies could negatively impact U.S. Cellular's operations by, among other things, changing the amount that can be charged for local, intrastate or interstate access rates, increasing U.S. Cellular's costs of doing business, permitting greater competition or limiting U.S. Cellular's ability to engage in certain sales or marketing activities. New regulatory mandates or enforcement may require unexpected or increased capital expenditures, lost revenues, higher operating expenses or other changes. Court decisions and rulemakings could have a substantial impact on U.S. Cellular's operations, including rulemakings on intercarrier access compensation and state and federal universal service. Litigation and different objectives among federal and state regulators could create uncertainty and delay U.S. Cellular's ability to respond to new regulations. Further, wireless licenses are subject to renewal by the FCC and could be revoked in the event of a violation of applicable laws or regulatory requirements. Also, FCC rules relating to net neutrality, broadband consumer privacy and other rules may result in additional costs for compliance and may limit opportunities to derive profits from certain business practices or resources, if not amended or rescinded.

U.S. Cellular attempts to timely and fully comply with all regulatory requirements. However, U.S. Cellular is unable to predict the future actions of the various legislative and regulatory bodies that govern U.S. Cellular, but such actions could have adverse effects on U.S. Cellular's business. Any failure by U.S. Cellular to timely or fully comply with any regulatory requirements could adversely affect U.S. Cellular's financial condition, results of operations or ability to do business.

For additional information about U.S. Cellular's regulatory environment, see Risk Factor Number 15 below and "Regulatory Matters" in Exhibit 13 to this Form 10-K.

**9. An inability to attract people of outstanding potential, to develop their potential through education and assignments, and to retain them by keeping them engaged, challenged and properly rewarded could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular's business is highly technical and competition for skilled talent in the wireless industry is aggressive. Due to competition for qualified management, technical, sales and other personnel, there can be no assurance that U.S. Cellular will be able to continue to attract and/or retain people of outstanding potential for the development of its business. The loss of the services of existing key personnel as well as the failure to recruit additional qualified personnel in a timely manner could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

**10. U.S. Cellular's assets are concentrated in the U.S. wireless telecommunications industry. Consequently, its operating results may fluctuate based on factors related primarily to conditions in this industry.**

U.S. Cellular's assets and revenue streams are concentrated in the U.S. wireless telecommunications industry. The U.S. wireless telecommunications industry is facing significant change and an uncertain operating environment. U.S. Cellular's focus on the U.S. wireless telecommunications industry, together with its positioning relative to larger competitors with greater resources within the industry, may represent increased risk for investors due to the lack of diversification. This could have an adverse effect on U.S. Cellular's ability to attain and sustain long-term, profitable revenue growth and could have an adverse effect on its business, financial condition or results of operations.

**11. U.S. Cellular's smaller scale relative to larger competitors that may have greater financial and other resources than U.S. Cellular could cause U.S. Cellular to be unable to compete successfully, which could adversely affect its business, financial condition or results of operations.**

There has been a trend in the telecommunications and related industries in recent years towards consolidation of service providers through acquisitions, reorganizations and joint ventures. This trend could continue, leading to larger competitors over time. U.S. Cellular has smaller scale efficiencies compared to larger competitors. U.S. Cellular may be unable to compete successfully with larger companies that have substantially greater financial, technical, marketing, sales, purchasing and distribution resources or that offer more services than U.S. Cellular, which could adversely affect U.S. Cellular's revenues and costs of doing business. Specifically, U.S. Cellular's smaller scale relative to most of its competitors could have the following impacts, among others:

- Low profit margins and returns on investment that are below U.S. Cellular's cost of capital;
- Increased operating costs due to lack of leverage with vendors;
- Limited opportunities for strategic partnerships as potential partners are focused on wireless companies with greater scale and scope;
- Limited access to content;
- Limited ability to influence industry standards;
- Reduced ability to invest in research and development of new products and services;

- Vendors may deem U.S. Cellular non-strategic and not develop or sell products and services to U.S. Cellular, particularly where technical requirements differ from those of larger companies;
- Limited access to intellectual property; and
- Other limited opportunities such as for software development or third party distribution.

## Table of Contents

U.S. Cellular's business increasingly depends on access to content for data and access to new wireless devices being developed by vendors. U.S. Cellular's ability to obtain such access depends in part on other parties. If U.S. Cellular is unable to obtain timely access to new content or wireless devices being developed by vendors, its business, financial condition or results of operations could be adversely affected.

As a result of the foregoing, U.S. Cellular's smaller scale relative to larger competitors could adversely affect U.S. Cellular's business, financial condition or results of operations.

### **12. Changes in various business factors, including changes in demand, customer preferences and perceptions, price competition, churn from customer switching activity and other factors, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

Changes in any of several factors could have an adverse effect on U.S. Cellular's business, financial condition or results of operations. These factors include, but are not limited to:

- Demand for or usage of services, particularly data services;
- Customer preferences, including type of wireless devices;
- Customer perceptions of network quality and performance;
- The pricing of services, including an increase in price-based competition;
- The overall size and growth rate of U.S. Cellular's customer base;
- Penetration rates;
- Churn rates;
- Selling expenses;
- Net customer acquisition and retention costs;
- Customers' ability to pay for wireless service and the potential impact on bad debts expense;
- Roaming agreements and rates;
- Third-party vendor support;
- The mix of products and services offered by U.S. Cellular and purchased by customers; and
- The costs of providing products and services.

### **13. Advances or changes in technology could render certain technologies used by U.S. Cellular obsolete, could put U.S. Cellular at a competitive disadvantage, could reduce U.S. Cellular's revenues or could increase its costs of doing business.**

The telecommunications industry is experiencing significant changes in technologies and services expected by customers, as evidenced by evolving industry standards, ongoing improvements in the capacity and quality of digital technology, shorter development cycles for new services and products, and enhancements and changes in end-user requirements and preferences. Widespread deployment of new technologies could cause the technology used on U.S. Cellular's wireless networks to become less competitive or obsolete. Further, fixed-mobile convergence services that combine wireline broadband services with mobile services represent a competitive threat. If the trend toward convergence continues, U.S. Cellular is at a competitive disadvantage to larger competitors, including the national wireless carriers and other potential large new entrants with much greater financial and other resources in adapting to such convergence. Future technological changes or advancements may enable other wireless technologies to equal or exceed U.S. Cellular's current levels of service and render its system infrastructure obsolete. For example, the timing, cost, and availability of CDMA enabled devices and other CDMA ecosystem support needs may inhibit U.S. Cellular's ability to maintain 3G wireless voice services until it is fully replaced by VoLTE. U.S. Cellular may not be able to respond to such changes and implement new technology on a timely or cost-effective basis, which could reduce its revenues or increase its costs of doing business. If U.S. Cellular cannot keep pace with these technological changes or other changes in the telecommunications industry over time, its financial condition, results of operations or ability to do business could be adversely affected.

### **14. Complexities associated with deploying new technologies present substantial risk and U.S. Cellular investments in unproven technologies may not produce the benefits that U.S. Cellular expects.**

U.S. Cellular has completed the transition to 4G LTE and has implemented 4G LTE roaming agreements with national carriers. U.S. Cellular will begin commercial deployment of VoLTE in early 2017 and has begun testing 5G technology. Transition to new technologies involves significant time and cost. Furthermore, the wireless business experiences rapid technology changes and new services and products. If U.S. Cellular fails to effectively deploy new wireless technologies, services or products on a timely basis, this could have an adverse impact on U.S. Cellular's business, financial condition and results of operations.

Furthermore, it is not certain that U.S. Cellular's investments in various new, unproven technologies and service and product offerings will be effective. The markets for some of these services, products and solutions may still be emerging and the overall potential for these markets may be uncertain. If customer demand for these new services, products and solutions does not develop as expected, U.S. Cellular's business, financial condition or results of operations could be adversely affected.

[Table of Contents](#)**15. U.S. Cellular receives regulatory support and is subject to numerous surcharges and fees from federal, state and local governments, and the applicability and the amount of the support and fees are subject to great uncertainty, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

Telecommunications companies may be designated by states, or in some cases by the FCC, as an ETC to receive universal service support payments if they provide specified services in "high cost" areas. U.S. Cellular has been designated as an ETC in certain states and received \$92 million in high cost support for service to high cost areas in 2016.

In 2011, the FCC released an order ("Reform Order") to: reform its universal service and intercarrier compensation mechanisms; establish a new, broadband-focused support mechanism; and propose further rules to advance reform. Pursuant to the Reform Order, U.S. Cellular's ETC support has been phased down by 40% since July 1, 2012. As provided by the Reform Order, the phasedown is currently suspended and U.S. Cellular will continue to receive 60% of its baseline support until a new fund proposed in the Reform Order is operational. On February 23, 2017, the FCC adopted an order concerning the Mobility Fund II and the resumption of the phase down. The text of the order has not been released but the press release issued by the FCC following adoption of the order indicates that the order will establish a Mobility Fund II support mechanism of \$453 million annually for ten years to be distributed through a market-based, multi-round reverse auction and that the phase down of unnecessary legacy support from the Federal USF will commence on the first day of the month following the completion of the auction and will conclude two years later. U.S. Cellular cannot predict at this time when the Mobility Fund II auction will occur, when the phase down period for its existing legacy support from the Federal USF will commence, or whether the Mobility Fund II auction will provide opportunities to the Company to offset any loss in existing support. However, U.S. Cellular currently expects that its legacy support will continue at the existing level for 2017. If the foregoing regulatory support is reduced from current levels, this could have an adverse effect on U.S. Cellular's business, financial condition or operating results. With respect to intercarrier compensation, the Reform Order provides for a reduction in the charges that U.S. Cellular pays to wireline phone companies to transport and terminate calls that originate on their networks, which will reduce U.S. Cellular's operating expenses. The reductions in intercarrier charges are to increase over the next five to ten years, further reducing U.S. Cellular's operating expenses.

Telecommunications providers pay a variety of surcharges and fees on their gross revenues from interstate and intrastate services, including USF fees and common carrier regulatory fees.

The division of services between interstate services and intrastate services, including the divisions associated with the Federal USF fees, is a matter of interpretation and may in the future be contested by the FCC or state authorities. The FCC also may change in the future the basis on which Federal USF fees are charged. The Federal government and many states also apply transaction-based taxes to sales of telecommunications products and services and to purchases of telecommunications services from various carriers. In addition, state regulators and local governments have imposed and may continue to impose various surcharges, taxes and fees on telecommunications services. The applicability of these surcharges and fees to its services is uncertain in many cases and jurisdictions may contest whether U.S. Cellular has assessed and remitted those monies correctly. Periodically, state and federal regulators may increase or change the surcharges and fees U.S. Cellular currently pays. In some instances, U.S. Cellular passes through these charges to its customers. However, Congress, the FCC, state regulatory agencies or state legislatures may limit the ability to pass through transaction-based tax liabilities, regulatory surcharges and regulatory fees imposed on U.S. Cellular to customers. U.S. Cellular may or may not be able to recover some or all of those taxes from its customers and the amount of taxes may deter demand for its services or increase its cost to provide service which could have an adverse effect on its business, financial condition or operating results.

**16. Performance under device purchase agreements could have a material adverse impact on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular has entered into purchase commitments with certain vendors and may enter into similar purchase commitments with other vendors in the future. If U.S. Cellular is unable to sell all of the devices that it is required to purchase under such agreements, or if it is unable to sell them at the prices it projects, its business, financial condition or results of operations could be adversely affected.

**17. Changes in U.S. Cellular's enterprise value, changes in the market supply or demand for wireless licenses, adverse developments in the business or the industry in which U.S. Cellular is involved and/or other factors could require U.S. Cellular to recognize impairments in the carrying value of its licenses, goodwill and/or physical assets.**

A large portion of U.S. Cellular's assets consists of indefinite-lived intangible assets in the form of licenses and goodwill. U.S. Cellular also has substantial investments in long-lived assets such as property, plant and equipment. U.S. Cellular reviews its licenses, goodwill and other long-lived assets for impairment annually or whenever events or circumstances indicate that the carrying amount of such assets may not be fully recoverable. An impairment loss may need to be recognized to the extent the carrying value of the assets exceeds the fair value of such assets. The amount of any such impairment loss could be significant and could have an adverse effect on U.S. Cellular's reported financial results for the period in which the loss is recognized. The estimation of fair values requires assumptions by management about factors that are uncertain including such things as future cash flows and the appropriate discount rate. Different assumptions for these factors could create materially different results.

Table of Contents**18. Costs, integration problems or other factors associated with acquisitions, divestitures or exchanges of properties or licenses and/or expansion of U.S. Cellular's business could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

As part of U.S. Cellular's operating strategy, U.S. Cellular from time to time may be engaged in the acquisition, divestiture or exchange of companies, businesses, strategic properties, wireless spectrum or other assets. U.S. Cellular may change the markets in which it operates and the services that it provides through such acquisitions, divestitures and/or exchanges. In general, U.S. Cellular may not disclose the negotiation of such transactions until a definitive agreement has been reached.

These transactions commonly involve a number of risks, including:

- Identification of attractive companies, businesses, properties, spectrum or other assets for acquisition or exchange, and/or the selection of U.S. Cellular's businesses or assets for divestiture or exchange;
- Competition for acquisition targets and the ability to acquire or exchange businesses at reasonable prices;
- Inability to make acquisitions that would achieve sufficient scale to be competitive with competitors with greater scale;
- Possible lack of buyers for businesses or assets that U.S. Cellular desires to divest and the ability to divest or exchange such businesses or assets at reasonable prices;
- Ability to negotiate favorable terms and conditions for acquisitions, divestitures and exchanges;
- Significant expenditures associated with acquisitions, divestitures and exchanges;
- Legal and regulatory risks associated with new businesses or markets;
- Ability to enter markets in which U.S. Cellular has limited or no direct prior experience and competitors have stronger positions;
- Ability to integrate and manage businesses that are engaged in activities other than traditional wireless service;
- Uncertain revenues and expenses associated with acquisitions, with the result that U.S. Cellular may not realize the growth in revenues, anticipated cost structure, profitability, or return on investment that it expects;
- Difficulty of integrating the technologies, services, products, operations and personnel of the acquired businesses, or of separating such matters for divested businesses or assets;
- Diversion of management's attention;
- Disruption of ongoing business;
- Impact on U.S. Cellular's cash and available credit lines for use in financing future growth and working capital needs;
- Inability to retain key personnel;
- Inability to successfully incorporate acquired assets and rights into U.S. Cellular's service offerings;
- Inability to maintain uniform standards, controls, procedures and policies;
- Possible conditions to approval by the FCC, the Federal Trade Commission and/or the Department of Justice; and
- Impairment of relationships with employees, customers or vendors.

No assurance can be given that U.S. Cellular will be successful with respect to its acquisition, divestiture or exchange strategies or initiatives. If U.S. Cellular is not successful with respect to its acquisitions, divestitures or exchanges, its business, financial condition or results of operations could be adversely affected.

**19. U.S. Cellular offers customers the option to purchase certain devices under installment contracts which, compared to fixed-term service contracts, includes risks that U.S. Cellular may possibly incur greater churn, lower cash flows, increased costs and/or increased bad debts expense due to differences in contract terms, which could have an adverse impact on U.S. Cellular's financial condition or results of operations.**

U.S. Cellular sells devices to customers under installment contracts over a specified period of time. Customers with installment contracts are not required to sign a fixed-term service contract to obtain postpaid service; rather, their service is provided on a month to month basis with no early termination fee. These device installment contract plans may not meet U.S. Cellular's customers' or potential customers' needs, expectations or demands. In addition, customers on these device installment contract plans can discontinue their service at any time without penalty, other than the obligation of any residual commitment they may have for unpaid service or for amounts due under the installment contract for the device. U.S. Cellular could experience a higher churn rate than it expects due to the ability of customers to more easily change service providers, which could adversely affect its results of operations. U.S. Cellular's operational and financial performance may be adversely affected if it is unable to grow its customer base and achieve the customer penetration levels that it anticipates with this business model.

Customers who have financed their devices through these device installment contracts pay for their devices in installments over a specified period of time. Compared to fixed-term service contracts, such plans result in lower cash flows from operating activities in the near term and could have an adverse effect on U.S. Cellular's liquidity or capital resources. In addition, such device installment contracts subject U.S. Cellular to increased risks relating to consumer credit issues, which could result in increased costs, including increases to its bad debts expense. These device installment contracts may be particularly sensitive to changes in general economic conditions, and any declines in the credit quality of U.S. Cellular's customer base could have a material adverse effect on U.S. Cellular's financial condition or results of operations.

Table of Contents**20. A failure by U.S. Cellular to complete significant network construction and systems implementation activities as part of its plans to improve the quality, coverage, capabilities and capacity of its network, support and other systems and infrastructure could have an adverse effect on its operations.**

U.S. Cellular's business plan includes significant construction activities and enhancements to its network, support and other systems and infrastructure. As U.S. Cellular deploys, expands and enhances its network, it may need to acquire additional spectrum. Also, as U.S. Cellular continues to build out and enhance its network, U.S. Cellular must, among other things, continue to:

- Lease, acquire or otherwise obtain rights to cell and switch sites;
- Obtain zoning variances or other local governmental or third-party approvals or permits for network construction;
- Complete and update the radio frequency design, including cell site design, frequency planning and network optimization, for each of U.S. Cellular's markets; and
- Improve, expand and maintain customer care, network management, billing and other financial and management systems.

Any difficulties encountered in completing these activities, as well as problems in vendor equipment availability, technical resources, system performance or system adequacy, could delay expansion of operations and product capabilities in new or existing markets or result in increased costs. Failure to successfully build-out and enhance U.S. Cellular's network and necessary support facilities and systems in a cost-effective manner, and in a manner that satisfies customer expectations for quality and coverage, could have an adverse effect on U.S. Cellular's business, business prospects, financial condition or results of operations.

**21. Difficulties involving third parties with which U.S. Cellular does business, including changes in U.S. Cellular's relationships with or financial or operational difficulties of key suppliers or independent agents and third party national retailers who market U.S. Cellular's services, could adversely affect U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular has relationships with independent agents and third party national retailers who market U.S. Cellular services. If such relationships are seriously harmed or if such parties experience financial difficulties, including bankruptcy, U.S. Cellular's business, financial condition or results of operations could be adversely affected.

U.S. Cellular depends upon certain vendors to provide it with equipment (including wireless devices), services or content to continue its network construction and upgrades and to operate its business. U.S. Cellular does not have operational or financial control over such key suppliers and has limited influence with respect to the manner in which these key suppliers conduct their businesses. If these key suppliers experience financial difficulties or file for bankruptcy or experience other operational difficulties, they may be unable to provide equipment, services or content to U.S. Cellular on a timely basis, or at all, or they may otherwise fail to honor their obligations to U.S. Cellular.

Regulations regarding the use of "conflict minerals" mined from the Democratic Republic of Congo and adjoining countries may affect some of U.S. Cellular's suppliers. These regulations may limit the availability of conflict free minerals and, as a result, U.S. Cellular may not be able to obtain products in sufficient quantities or at competitive prices from its vendors who utilize such minerals in the manufacture of products. In such cases, U.S. Cellular may be unable to maintain and upgrade its network or provide products and services to its customers in a competitive manner, or could suffer other disruptions to its business. In that event, U.S. Cellular's business, financial condition or results of operations could be adversely affected.

In addition, operation of U.S. Cellular's supply chain and management of its inventory require accurate forecasting of customer growth and demand, which has become increasingly challenging. If overall demand for wireless devices or the mix of demand for wireless devices is significantly different than U.S. Cellular's expectations, U.S. Cellular could face inadequate or excess supplies of particular models of wireless devices. This could result in lost sales opportunities or an excess supply of inventory. Either of these situations could adversely affect U.S. Cellular's revenues, costs of doing business, results of operations or financial condition.

Also, U.S. Cellular has other arrangements with third parties, including arrangements pursuant to which U.S. Cellular now outsources certain support functions to third party vendors. Operational problems associated with such functions, including any failure by the vendor to provide the required level of service under the outsourcing arrangements, could have adverse effects on U.S. Cellular's business, financial condition or results of operations.

**22. U.S. Cellular has significant investments in entities that it does not control. Losses in the value of such investments could have an adverse effect on U.S. Cellular's financial condition or results of operations.**

U.S. Cellular has significant investments in entities that it does not control, including equity investments and interests in certain variable interest entities. U.S. Cellular's interests in such entities do not provide U.S. Cellular with control over the business strategy, financial goals, network build-out plans or other operational aspects of these entities. U.S. Cellular cannot provide assurance that these entities will operate in a manner that will increase or maintain the value of U.S. Cellular's investments, that U.S. Cellular's proportionate share of income from these investments will continue at the current level in the future or that U.S. Cellular will not incur losses from the holding of such investments. Losses in the values of such investments or a reduction in income from these investments could adversely affect U.S. Cellular's financial condition or results of operations. In addition, certain investments have historically contributed significant cash flows to U.S. Cellular and a reduction or suspension of such cash flows could adversely affect U.S. Cellular's financial condition.

Table of Contents**23. A failure by U.S. Cellular to maintain flexible and capable telecommunication networks or information technology, or a material disruption thereof, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular relies extensively on its telecommunication networks and information technology to operate and manage its business, process transactions and summarize and report results. These networks and technology become obsolete over time and must be upgraded, replaced and/or otherwise enhanced over time. Enhancements must be more flexible and dependable than ever before. All of this is capital intensive and challenging. A failure by U.S. Cellular to maintain flexible and capable telecommunication networks or information technology could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

The increased provision of data services has introduced significant new demands on U.S. Cellular's network and also has increased complexities related to network management. Further, the increased provision of data services on U.S. Cellular's networks has created an increased level of risk related to quality of service. This is due to the fact that many customers increasingly rely on data communications to execute and validate transactions. As a result, redundancy and geographical diversity of U.S. Cellular's network facilities are critical to providing uninterrupted service. Also, the speed of repair and maintenance procedures in the event of network interruptions is critical to maintaining customer satisfaction. U.S. Cellular's ability to maintain high-quality, uninterrupted service to its customers is critical, particularly given the increasingly competitive environment and customers' ability to choose other service providers.

In addition, U.S. Cellular's networks and information technology and the networks and information technology of vendors on which U.S. Cellular relies are subject to damage or interruption due to various events, including power outages, computer, network and telecommunications failures, computer viruses, security breaches, hackers and other cyber security risks, catastrophic events, natural disasters, errors or unauthorized actions by employees and vendors, flawed conversion of systems, disruptive technologies and technology changes.

**24. U.S. Cellular has experienced and, in the future, expects to experience cyber-attacks or other breaches of network or information technology security of varying degrees on a regular basis, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular experiences cyber-attacks of varying degrees on a regular basis. U.S. Cellular maintains administrative, technical and physical controls, as well as other preventative actions, to reduce the risk of security breaches. Although to date U.S. Cellular has not experienced a material security breach, these efforts may be insufficient to prevent a security breach stemming from future cyber-attacks. If U.S. Cellular's or its vendors' networks and information technology are not adequately adapted to changes in technology or are damaged or fail to function properly, and/or if U.S. Cellular's or its vendors' security is breached or otherwise compromised, U.S. Cellular could suffer adverse consequences, including theft, destruction or other loss of critical and private data, including customer and/or employee data, interruptions or delays in its operations, inaccurate billings, inaccurate financial reporting, and significant costs to remedy the problems. If U.S. Cellular's or its vendors' systems become unavailable or suffer a security breach of customer or other data, U.S. Cellular may be required to expend significant resources and take various actions to address the problems, including notification under data privacy laws and regulations, may be subject to fines, sanctions and litigation, and its reputation and operating results could be adversely affected. Any material disruption in U.S. Cellular's networks or information technology, including security breaches, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

**25. The market price of U.S. Cellular's Common Shares is subject to fluctuations due to a variety of factors.**

Factors that may affect the future market price of U.S. Cellular's Common Shares include:

- General economic conditions, including conditions in the credit and financial markets;
- Industry conditions;
- Fluctuations in U.S. Cellular's quarterly customer additions, churn rate, revenues, results of operations or cash flows;
- Variations between U.S. Cellular's actual financial and operating results and those expected by analysts and investors; and
- Announcements by U.S. Cellular's competitors.

Any of these or other factors could adversely affect the future market price of U.S. Cellular's Common Shares, or could cause the future market price of U.S. Cellular's Common Shares to fluctuate from time to time.

**26. Changes in facts or circumstances, including new or additional information, could require U.S. Cellular to record charges in excess of amounts accrued in the financial statements, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

The preparation of financial statements requires U.S. Cellular to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. U.S. Cellular bases its estimates on historical experience and on various other assumptions and information that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from estimates under different assumptions or conditions. Changes in facts or circumstances, including new or additional information, could require U.S. Cellular to record charges in excess of amounts accrued in the financial statements, if any, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Table of Contents

**27. Disruption in credit or other financial markets, a deterioration of U.S. or global economic conditions or other events could, among other things, impede U.S. Cellular's access to or increase the cost of financing its operating and investment activities and/or result in reduced revenues and lower operating income and cash flows, which would have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

Disruptions in the credit and financial markets, declines in consumer confidence, increases in unemployment, declines in economic growth and uncertainty about corporate earnings could have a significant negative impact on the U.S. and global financial and credit markets and the overall economy. Such events could have an adverse impact on financial institutions resulting in limited access to capital and credit for many companies. Furthermore, economic uncertainties make it very difficult to accurately forecast and plan future business activities. Changes in economic conditions, changes in financial markets, deterioration in the capital markets or other factors could have an adverse effect on U.S. Cellular's business, financial condition, revenues, results of operations and cash flows.

**28. Settlements, judgments, restraints on its current or future manner of doing business and/or legal costs resulting from pending and future litigation could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular is regularly involved in a number of legal and policy proceedings before the FCC and various state and federal courts. Such legal and policy proceedings can be complex, costly, protracted and highly disruptive to business operations by diverting the attention and energies of management and other key personnel.

The assessment of legal and policy proceedings is a highly subjective process that requires judgments about future events. Additionally, amounts ultimately received or paid upon settlement or resolution of litigation and other contingencies may differ materially from amounts accrued in the financial statements. Depending on a range of factors, these or similar proceedings could impose restraints on U.S. Cellular's current or future manner of doing business. Such potential outcomes could have an adverse effect on U.S. Cellular's financial condition, results of operations or ability to do business.

**29. The possible development of adverse precedent in litigation or conclusions in professional studies to the effect that radio frequency emissions from wireless devices and/or cell sites cause harmful health consequences, including cancer or tumors, or may interfere with various electronic medical devices such as pacemakers, could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

Media reports and certain professional studies have suggested that certain radio frequency emissions from wireless devices may be linked to various health problems, including cancer or tumors, and may interfere with various electronic medical devices, including hearing aids and pacemakers. U.S. Cellular is a party to and may in the future be a party to lawsuits against wireless carriers and other parties claiming damages for alleged health effects, including cancer or tumors, arising from wireless phones or radio frequency transmitters. Concerns over radio frequency emissions may discourage use of wireless devices or expose U.S. Cellular to potential litigation. In addition, the FCC or other regulatory authorities may adopt regulations in response to concerns about radio frequency emissions. Any resulting decrease in demand for wireless services, costs of litigation and damage awards or regulation could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

In addition, some studies have indicated that some aspects of using wireless devices while driving may impair drivers' attention in certain circumstances, making accidents more likely. These concerns could lead to potential litigation relating to accidents, deaths or serious bodily injuries, any of which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

Numerous state and local legislative bodies have enacted or proposed legislation restricting or prohibiting the use of wireless devices while driving motor vehicles. These enacted or proposed laws or other similar laws, if passed, could have the effect of reducing customer usage and/or increasing costs, which could have an adverse effect on U.S. Cellular's business, financial condition, or results of operations.

Table of Contents

**30. Claims of infringement of intellectual property and proprietary rights of others, primarily involving patent infringement claims, could prevent U.S. Cellular from using necessary technology to provide products or services or subject U.S. Cellular to expensive intellectual property litigation or monetary penalties, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.**

U.S. Cellular faces possible effects of industry litigation relating to patents, other intellectual property or otherwise, that may restrict U.S. Cellular's access to devices for sale to customers. If technology that U.S. Cellular uses in products or services were determined by a court to infringe a patent or other intellectual property right held by another person, U.S. Cellular could be precluded from using that technology and could be required to pay significant monetary damages. U.S. Cellular also may be required to pay significant royalties to such person to continue to use such technology in the future. The successful enforcement of any intellectual property rights, or U.S. Cellular's inability to negotiate a license for such rights on acceptable terms, could force U.S. Cellular to cease using the relevant technology and offering services incorporating the technology. Any litigation to determine the validity of claims that U.S. Cellular's products or services infringe or may infringe intellectual property rights of another, regardless of their merit or resolution, could be costly and divert the effort and attention of U.S. Cellular's management and technical personnel. Regardless of the merits of any specific claim, U.S. Cellular cannot give assurance that it would prevail in litigation because of the complex technical issues and inherent uncertainties in intellectual property litigation. Although U.S. Cellular generally seeks to obtain indemnification agreements from vendors that provide it with technology, there can be no assurance that any claim of infringement will be covered by an indemnity or that U.S. Cellular will be able to recover all or any of its losses and costs under any available indemnity agreements. Any claims of infringement of intellectual property and proprietary rights of others could prevent U.S. Cellular from using necessary technology to provide its services or subject U.S. Cellular to expensive intellectual property litigation or monetary penalties, which could have an adverse effect on U.S. Cellular's business, financial condition or results of operations.

**31. There are potential conflicts of interests between TDS and U.S. Cellular.**

TDS owns over 80% of the combined total of both classes of common stock of U.S. Cellular, including a majority of the outstanding Common Shares and 100% of the Series A Common Shares, and controls over 96% of their combined voting power. As a result, TDS is effectively able to elect all of U.S. Cellular's fourteen directors and otherwise control the management and operations of U.S. Cellular. Seven of the fourteen directors of U.S. Cellular are also directors of TDS and/or executive officers of TDS and/or U.S. Cellular. Directors and officers of TDS who are also directors or officers of U.S. Cellular, and TDS as U.S. Cellular's controlling shareholder, are in positions involving the possibility of conflicts of interest with respect to certain transactions concerning U.S. Cellular. When the interests of TDS and U.S. Cellular diverge, TDS may exercise its influence in its own best interests.

U.S. Cellular and TDS have entered into contractual arrangements governing certain transactions and relationships between them. These agreements were executed prior to the initial public offering of U.S. Cellular's Common Shares and were not the result of arm's-length negotiations. Accordingly, there is no assurance that the terms and conditions of these agreements are as favorable to U.S. Cellular as could have been obtained from unaffiliated third parties. See "Certain Relationships and Related Transactions" in this Form 10-K.

Conflicts of interest may arise between TDS and U.S. Cellular when faced with decisions that could have different implications for U.S. Cellular and TDS, including technology decisions, financial budgets, the payment of distributions by U.S. Cellular, agreements or transactions between TDS and U.S. Cellular, business activities and other matters. TDS also may take action that favors its other businesses and the interests of its shareholders over U.S. Cellular's wireless business and the interests of U.S. Cellular shareholders and debt holders. Because TDS controls U.S. Cellular, conflicts of interest could be resolved in a manner adverse to U.S. Cellular and its other shareholders or its debt holders.

The U.S. Cellular Restated Certificate of Incorporation provides that, so long as not less than 500,000 Series A Common Shares are outstanding, U.S. Cellular, without the written consent of TDS, shall not, directly or indirectly own, invest or otherwise have an interest in, lease, operate or manage any business other than a business engaged solely in the construction of, the ownership of interests in and/or the management of wireless telephone systems. This limitation on the scope of U.S. Cellular's potential business could hurt the growth of U.S. Cellular's business. This restriction would preclude U.S. Cellular from pursuing attractive related or unrelated business opportunities unless TDS consents in writing. TDS has no obligation to consent to any business opportunities proposed by U.S. Cellular and may withhold its consent in its own best interests.

**32. Certain matters, such as control by TDS and provisions in the U.S. Cellular Restated Certificate of Incorporation, may serve to discourage or make more difficult a change in control of U.S. Cellular.**

The control of U.S. Cellular by TDS may tend to deter non-negotiated tender offers or other efforts to obtain control of U.S. Cellular and thereby deprive shareholders of opportunities to sell shares at prices higher than those prevailing in the market.

The U.S. Cellular Restated Certificate of Incorporation also contains provisions which may serve to discourage or make more difficult a change in control of U.S. Cellular without the support of TDS or without meeting various other conditions. In particular, the authorization of multiple classes of capital stock with different voting rights could prevent shareholders from profiting from an increase in the market value of their shares as a result of a change in control of U.S. Cellular by delaying or preventing such change in control.

The U.S. Cellular Restated Certificate of Incorporation also authorizes the U.S. Cellular Board of Directors to designate and issue Preferred Shares in one or more classes or series from time to time. Generally, no further action or authorization by the shareholders is necessary prior to the designation or issuance of the additional Preferred Shares authorized pursuant to the U.S. Cellular Restated Certificate of Incorporation unless applicable laws or regulations would require such approval in a given instance. Such Preferred Shares could be issued in circumstances that would serve to preserve TDS' control of U.S. Cellular.

Table of Contents**33. Any of the foregoing events or other events could cause revenues, earnings, capital expenditures and/or any other financial or statistical information to vary from U.S. Cellular's forward-looking estimates by a material amount.**

From time to time, U.S. Cellular may disclose forward-looking information, including estimates of future operating revenues; various measures of income before income taxes; and/or capital expenditures. Any such forward-looking information includes consideration of known or anticipated changes to the extent disclosed, but dynamic market conditions and/or other unknown or unanticipated events, including but not limited to the risks discussed above, could cause such estimates to differ materially from the actual amounts.

[Table of Contents](#)

## Item 1B. Unresolved Staff Comments

None.

## Item 2. Properties

U.S. Cellular has properties located throughout the United States. U.S. Cellular's mobile telephone switching offices, cell sites, call centers and retail stores are located primarily in U.S. Cellular's operating markets and are either owned or leased by U.S. Cellular, one of its subsidiaries, or the partnership, limited liability company or corporation which holds the license issued by the FCC.

As of December 31, 2016, U.S. Cellular's Property, plant and equipment, net of accumulated depreciation, totaled \$2,470 million.

U.S. Cellular considers the properties owned or leased by it and its subsidiaries to be maintained in good operating condition and suitable and adequate for its business operations.

## Item 3. Legal Proceedings

U.S. Cellular is involved or may be involved from time to time in legal proceedings before the FCC, other regulatory authorities, and/or various state and federal courts. If U.S. Cellular believes that a loss arising from such legal proceedings is probable and can be reasonably estimated, an amount is accrued in the financial statements for the estimated loss. If only a range of loss can be determined, the best estimate within that range is accrued; if none of the estimates within that range is better than another, the low end of the range is accrued. The assessment of the expected outcomes of legal proceedings is a highly subjective process that requires judgments about future events. The legal proceedings are reviewed at least quarterly to determine the adequacy of accruals and related financial statement disclosures. The ultimate outcomes of legal proceedings could differ materially from amounts accrued in the financial statements. See Note 12 --- Commitments and Contingencies in the Notes to Consolidated Financial Statements for further information.

## Item 4. Mine Safety Disclosures

Not applicable.

[Table of Contents](#)**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Market, holder, dividend and performance graph information is incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report sections entitled "Shareholder Information" and "Consolidated Quarterly Information (Unaudited)."

U.S. Cellular has not paid any cash dividends in recent periods and currently intends to retain all earnings for use in U.S. Cellular's business.

Information relating to Issuer Purchases of Equity Securities is set forth below.

In November 2009, U.S. Cellular announced by Form 8-K that the Board of Directors of U.S. Cellular authorized the repurchase of up to 1,300,000 Common Shares on an annual basis beginning in 2009 and continuing each year thereafter, on a cumulative basis. In December 2016, the U.S. Cellular Board amended this authorization to provide that such amount will be any amount from zero to 1,300,000 beginning on January 1, 2017, as determined by the Pricing Committee, and that if the Pricing Committee did not specify an amount for any year, such amount would be zero for such year. The Pricing Committee did not specify any increase as of January 1, 2017. The Pricing Committee was also authorized to decrease the cumulative amount of the authorization at any time, but has not taken any action to do so at this time. As a result, there was no change to the cumulative amount of the share repurchase authorization as of January 1, 2017. The authorization provides that share repurchases will be made pursuant to open market purchases, block purchases, private purchases, or otherwise, depending on market prices and other conditions. This authorization does not have an expiration date. U.S. Cellular did not determine to terminate the foregoing Common Share repurchase program, as amended, or cease making further purchases thereunder, during the fourth quarter of 2016.

The following table provides certain information with respect to all purchases made by or on behalf of U.S. Cellular, and any open market purchases made by any "affiliated purchaser" (as defined by the SEC) of U.S. Cellular, of U.S. Cellular Common Shares during the fourth quarter of 2016.

Period	Total Number of Common Shares Purchased	Average Price Paid per Common Share	Total Number of Common Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Common Shares that May Yet Be Purchased Under the Plans or Programs
October 1 – 31, 2016	4,135	\$ 35.01	4,135	6,004,302
November 1 – 30, 2016	103,453	34.43	103,453	5,900,849
December 1 – 31, 2016	—	—	—	5,900,849
Total as of or for the quarter ended December 31, 2016	107,588	\$ 34.45	107,588	5,900,849

Table of Contents**Item 6. Selected Financial Data**

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section entitled "Selected Consolidated Financial Data," except for Ratio of earnings to fixed charges, which is incorporated herein by reference from Exhibit 12 to this Form 10-K.

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations."

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk**

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report section entitled "Market Risk."

**Item 8. Financial Statements and Supplementary Data**

Incorporated by reference from Exhibit 13 to this Form 10-K, Annual Report sections entitled "Consolidated Statement of Operations," "Consolidated Statement of Cash Flows," "Consolidated Balance Sheet," "Consolidated Statement of Changes in Equity," "Notes to Consolidated Financial Statements," "Management's Report on Internal Control Over Financial Reporting," "Report of Independent Registered Public Accounting Firm," and "Consolidated Quarterly Information (Unaudited)." The Consolidated Statement of Comprehensive Income was not included because comprehensive income for the years ended December 31, 2016, 2015 and 2014 equaled net income.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

Table of Contents

## Item 9A. Controls and Procedures

### Evaluation of Disclosure Controls and Procedures

U.S. Cellular maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Exchange Act is processed, recorded, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to U.S. Cellular's management, including its principal executive officer and principal financial officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As required by SEC Rule 13a-15(b), U.S. Cellular carried out an evaluation, under the supervision and with the participation of management, including its principal executive officer and principal financial officer, of the effectiveness of the design and operation of U.S. Cellular's disclosure controls and procedures as of the end of the period covered by this Annual Report. Based on this evaluation, the principal executive officer and principal financial officer have concluded that U.S. Cellular's disclosure controls and procedures were effective as of December 31, 2016, at the reasonable assurance level.

### Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. U.S. Cellular's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America ("GAAP"). U.S. Cellular's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and, where required, the board of directors of the issuer; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the issuer's assets that could have a material effect on the interim or annual consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of U.S. Cellular's management, including its principal executive officer and principal financial officer, U.S. Cellular conducted an evaluation of the effectiveness of its internal control over financial reporting as of December 31, 2016, based on the criteria established in the 2013 version of *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Management has concluded that U.S. Cellular maintained effective internal control over financial reporting as of December 31, 2016 based on criteria established in the 2013 version of *Internal Control — Integrated Framework* issued by the COSO.

The effectiveness of U.S. Cellular's internal control over financial reporting as of December 31, 2016 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in the firm's report which is incorporated by reference into Item 8 of this Annual Report on Form 10-K from Exhibit 13 filed herewith.

### Changes in Internal Control over Financial Reporting

There were no changes in U.S. Cellular's internal control over financial reporting during the fourth quarter of 2016 that have materially affected, or are reasonably likely to materially affect, U.S. Cellular's internal control over financial reporting.

## Report of Independent Registered Public Accounting Firm

## The Partners of Los Angeles SMSA Limited Partnership

We have audited the accompanying consolidated balance sheets of Los Angeles SMSA Limited Partnership and Subsidiary (the Partnership) as of December 31, 2016 and 2015, and the related consolidated statements of income and comprehensive income, changes in partners' capital and cash flows for each of the three years in the period ended December 31, 2016. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our December 31, 2016 audit in accordance with the standards of the Public Company Accounting Oversight Board (United States) and in accordance with auditing standards generally accepted in the United States of America. We conducted our December 31, 2015 and 2014 audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Partnership at December 31, 2016 and 2015, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with U.S. generally accepted accounting principles.

Table of Contents**Los Angeles SMSA Limited Partnership and Subsidiary**

Notes to Consolidated Financial Statements – For the Years Ended December 31, 2016, 2015 and 2014.

(Dollars in Thousands)

**1. ORGANIZATION AND MANAGEMENT**

The Consolidated Financial Statements include the accounts of the Los Angeles SMSA Limited Partnership ("Los Angeles SMSA") and Los Angeles Edge LLC, a wholly owned subsidiary of Los Angeles SMSA (collectively, the "Partnership"). The principal activity of Los Angeles SMSA, formed in 1984, is to provide cellular service in the Los Angeles metropolitan service area. Los Angeles Edge LLC was formed during 2015 and is a bankruptcy remote special purpose entity, created for the purpose of selling wireless device payment plan receivables to third parties (see Note 3).

In accordance with the partnership agreement, AirTouch Cellular Inc. an indirect wholly owned subsidiary of Cellco Partnership ("Cellco"), doing business as Verizon Wireless, and general partner of the Partnership is responsible for managing the operations of the Partnership (see Note 8).

The partners and their respective ownership percentages of the Partnership as of December 31, 2016, 2015 and 2014 are as follows:

## General Partner:

AirTouch Cellular Inc.	40.0%
------------------------	-------

## Limited Partners:

AirTouch Cellular Inc.	42.3%
Cellco Partnership	12.2%
United States Cellular Investment Corporation of Los Angeles	5.5%

**2. SIGNIFICANT ACCOUNTING POLICIES**

**Consolidation** – The method of accounting applied to consolidated investments involves an evaluation of all significant terms of the investments that explicitly grant or suggest evidence of control or influence over the operations of the investee. The consolidated financial statements include our subsidiary which is a variable interest entity (VIE) where Los Angeles SMSA is deemed to be the primary beneficiary. All significant intercompany accounts and transactions have been eliminated (see Note 3).

**Use of estimates** – The financial statements are prepared using U.S. generally accepted accounting principles (GAAP), which requires management to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates.

Examples of significant estimates include: the allowance for doubtful accounts, the recoverability of property, plant and equipment, the recoverability of intangible assets and other long-lived assets, unbilled revenues, fair values of financial instruments, deferred purchase price, beneficial interest, accrued expenses and contingencies.

**Revenue recognition** – The Partnership offers products and services to customers through bundled arrangements. These arrangements involve multiple deliverables which may include products, services, or a combination of products and services.

The Partnership earns revenue primarily by providing access to and usage of its network as well as the sale of equipment. In general, access revenue is billed one month in advance and recognized when earned. Usage revenue is generally billed in arrears and recognized when service is rendered. Equipment revenue associated with the sale of wireless devices and accessories is generally recognized when the products are delivered to and accepted by the customer, as equipment sales is considered to be a separate earnings process from providing wireless services. For agreements involving the resale of third-party services in which the Partnership is considered the primary obligor in the arrangements, the revenue is recorded gross at the time of sale.

Under the Verizon device payment program, eligible wireless customers purchase wireless devices under a device payment plan agreement. On select devices, certain marketing promotions have been revocably offered to customers to upgrade to a new device after paying down a certain specified portion of the required device payment plan agreement amount as well as trading in their device in good working order. When a customer enters into a device payment plan agreement with the right to upgrade to a new device, the Partnership accounts for this trade-in right as a guarantee obligation. The full amount of the trade-in right's fair value (not an allocated value) is recognized as a guarantee liability and the remaining allocable consideration is allocated to the device. The value of the guarantee liability effectively results in a reduction to the revenue recognized for the sale of the device. The Partnership may offer customers certain promotions where a customer can trade-in his or her owned device in connection with the purchase of a new device. Under these types of promotions, the customer will receive trade-in credits that are applied to the customer's monthly bill. As a result, the Partnership recognizes a trade-in obligation measured at fair value using weighted-average selling prices obtained in recent resales of devices eligible for trade-in.

Table of Contents

In multiple element arrangements that bundle devices and monthly wireless service, revenue is allocated to each unit of accounting using a relative selling price method. At the inception of the arrangement, the amount allocable to the delivered units of accounting is limited to the amount that is not contingent upon the delivery of the monthly wireless service (the noncontingent amount). The Partnership effectively recognizes revenue on the delivered device at the lesser of the amount allocated based on the relative selling price of the device or the noncontingent amount owed when the device is sold.

Roaming revenue reflects service revenue earned by the Partnership when customers not associated with the Partnership operate in the service area of the Partnership and use the Partnership's network. The roaming rates with third party carriers associated with those customers are based on agreements with such carriers. The roaming rates charged by the Partnership to Cellco are established by Cellco on a periodic basis and may not reflect current market rates (see Note 8).

Other revenues primarily consist of certain fees billed to customers for surcharges and elected services as well as non-customer related revenues. The Partnership reports taxes imposed by governmental authorities on revenue producing transactions between the Partnership and its customers which is passed through to the customers on a net basis. Other revenues also include switch revenue. This revenue represents revenue earned by the Partnership for switch services provided to other Cellco owned entities by the Partnership. The switch revenue rates charged by the Partnership to Cellco are established by Cellco on a periodic basis and may not reflect current market rates (see Note 8).

**Operating expenses** – Operating expenses include expenses incurred directly by the Partnership, as well as an allocation of selling, general and administrative, and operating costs incurred by Cellco or its affiliates on behalf of the Partnership. Employees of Cellco provide services on behalf of the Partnership. These employees are not employees of the Partnership, therefore operating expenses include direct and allocated charges of salary and employee benefit costs for the services provided to the Partnership. Cellco believes such allocations, principally based on the Partnership's percentage of certain revenue streams, total customers, customer gross additions or minutes-of-use, are calculated in accordance with the Partnership agreement and are a reasonable method of allocating such costs (see Note 8).

Cost of roaming reflects costs incurred by the Partnership when customers associated with the Partnership operate in a service area not associated with the Partnership and use a network not associated with the Partnership. The roaming rates with third party carriers are based on agreements with such carriers. The roaming rates charged to the Partnership by Cellco are established by Cellco on a periodic basis and may not reflect current market rates (see Note 8).

Cost of equipment is recorded upon sale of the related equipment at Cellco's cost basis. Inventory is wholly owned by Cellco and is not recorded in the financial statements of the Partnership.

**Maintenance and repairs** – The cost of maintenance and repairs, including the cost of replacing minor items not constituting substantial betterments, is charged principally to Cost of service as these costs are incurred.

**Advertising costs** – Costs for advertising products and services as well as other promotional and sponsorship costs are charged to Selling, general and administrative expense in the periods in which they are incurred.

**Comprehensive income** – Comprehensive income is the same as net income as presented in the accompanying statements of income and comprehensive income.

**Income taxes** – The Partnership is treated as a pass through entity for income tax purposes and, therefore, is not subject to federal, state or local income taxes. Accordingly, no provision has been recorded for income taxes in the Partnership's financial statements. The results of operations, including taxable income, gains, losses, deductions and credits, are allocated to and reflected on the income tax returns of the respective partners.

The Partnership files federal and state tax returns. The 2013 through 2016 tax years for the Partnership remain subject to examination by the Internal Revenue Service and state tax jurisdiction. Because the application of tax laws and regulations to many types of transactions is susceptible to varying interpretations, amounts reported in the financial statements could be changed at a later date upon final determination by taxing authorities.

**Due to/from affiliate** – Due to/from affiliate principally represents the Partnership's cash position with Cellco. Cellco manages, on behalf of the Partnership, all cash, investing and financing activities, including all transactions associated with the sales of wireless device payment plan agreement receivables, of the Partnership. As such, the change in due to/from affiliate is reflected as an investing activity or a financing activity in the statements of cash flows depending on whether it represents a net asset or net liability for the Partnership.

Additionally, cost of equipment, administrative and operating costs incurred by Cellco on behalf of the Partnership, as well as property, plant and equipment and wireless license transactions with affiliates, are charged to the Partnership through this account. Interest income on due from affiliate is based on the Applicable Federal Rate which was approximately 0.7%, 0.5% and 0.3% for the years ended December 31, 2016, 2015 and 2014, respectively. Interest expense on due to affiliate is calculated by applying Cellco's average cost of borrowing from Verizon Communications Inc., which was approximately 4.8%, 4.8% and 5.0% for the years ended December 31, 2016, 2015 and 2014, respectively to the outstanding due to/from affiliate balance. Included in interest (expense) income, net is interest income of \$1,390, \$0 and \$1,706 for the years ended December 31, 2016, 2015 and 2014, respectively, related to due to/from affiliate. Interest expense of \$2,683 and \$23,878 was incurred during the years ended December 31, 2016 and 2015 respectively, of which all was capitalized.

Table of Contents

**Accounts receivable and allowance for doubtful accounts** – Accounts receivable are recorded in the financial statements at cost net of allowance for credit losses, with the exception of device payment plan agreement receivables which are initially recorded at fair value. The Partnership maintains allowances for uncollectible accounts receivable, including device payment plan agreement receivables, for estimated losses resulting from the failure or inability of customers to make required payments. The allowance for uncollectible accounts receivable is based on Cellco's assessment of the collectability of each Partnership's specific customer accounts and includes consideration of the credit worthiness and financial condition of those customers. The Partnership records an allowance to reduce the receivables to the amount that is reasonably believed to be collectible. The Partnership also records an allowance for all other receivables based on multiple factors including historical experience with bad debts, the general economic environment, and the aging of such receivables. Similar to traditional service revenue accounting treatment, bad debt expense related to device payment plan agreement receivables is recorded based on an estimate of the percentage of device payment plan agreement receivables that will not be collected. This estimate is based on a number of factors including historical write-off experience, credit quality of the customer base and other factors such as macro-economic conditions. Due to the device payment plan agreement receivables being incorporated in the standard Verizon Wireless bill, the collection and risk strategies continue to follow historical practices. The Partnership monitors the aging of accounts receivable, including device payment plan agreement receivables, and writes off account balances if collection efforts are unsuccessful and future collection is unlikely.

**Property, plant and equipment** – Property, plant and equipment is recorded at cost. Property, plant and equipment are generally depreciated on a straight-line basis.

Leasehold improvements are amortized over the shorter of the estimated life of the improvement or the remaining term of the related lease, calculated from the time the asset was placed in service.

When the depreciable assets are retired or otherwise disposed of, the related cost and accumulated depreciation are deducted from the property, plant and equipment accounts and any gains or losses on disposition are recognized in income. Transfers of property, plant and equipment between Cellco and affiliates are recorded at net book value on the date of the transfer with an offsetting entry included in due to/from affiliate.

Interest associated with the acquisition or construction of network-related assets is capitalized. Capitalized interest is reported as a reduction in interest expense and depreciated as part of the cost of the network-related assets.

In connection with the ongoing review of estimated useful lives of property, plant and equipment during 2016, Cellco determined that the average useful lives of certain leasehold improvements would be increased from 5 to 7 years. This change was immaterial in 2016. While the timing and extent of current deployment plans are subject to ongoing analysis and modification, Cellco and the Partnership believes the current estimates of useful lives are reasonable.

**Other assets** – Other assets primarily include long term device payment plan agreement receivables, net of allowances of \$16,545 and \$8,661 at December 31, 2016 and 2015, respectively.

**Impairment** – All long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If any indications were to become present, the Partnership would test for recoverability by comparing the carrying amount of the asset group to the net undiscounted cash flows expected to be generated from the asset group. If those net undiscounted cash flows do not exceed the carrying amount, the next step would be to determine the fair value of the asset and record an impairment, if any. The Partnership reevaluates the useful life determinations for these long-lived assets each year to determine whether events and circumstances warrant a revision to their remaining useful lives.

**Wireless licenses** – Intangible assets are wireless licenses that provide the Partnership wireless operations with the exclusive right to utilize designated radio frequency spectrum to provide wireless communications services. In addition, Cellco maintains wireless licenses that provide the Partnership's operations with the exclusive right to utilize designated radio frequency spectrum to provide wireless communications services. While licenses are issued for only a fixed time, generally ten years, such licenses are subject to renewal by the Federal Communications Commission (FCC). License renewals, which are managed by Cellco, have historically occurred routinely and at nominal cost. Moreover, the Partnership determined that there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of wireless licenses. As a result, wireless licenses are treated as an indefinite-lived intangible asset. The useful life determination for wireless licenses is reevaluated each year to determine whether events and circumstances continue to support an indefinite useful life. The Partnership aggregates wireless licenses into one single unit of accounting, as they are utilized on an integrated basis.

Cellco and the Partnership test the wireless licenses balance for potential impairment annually or more frequently if impairment indicators are present. In 2016 and 2015, the Partnership performed a qualitative assessment to determine whether it is more likely than not that the fair value of wireless licenses was less than the carrying amount. As part of the assessment, several qualitative factors were considered including market transactions, the business enterprise value, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA (Earnings before interest, taxes, depreciation and amortization) margin projections), the projected financial performance, as well as other factors. In 2016, Cellco also performed a qualitative assessment similar to that described for the Partnership. In 2015, Cellco performed a quantitative assessment which consisted of comparing the estimated fair value of its aggregate wireless licenses to the aggregated carrying amount as of the test date.

Table of Contents

Interest expense incurred while qualifying activities are performed to ready wireless licenses for their intended use is capitalized as part of wireless licenses (see Note 4). The capitalization period ends when the development is discontinued or substantially complete and the license is ready for its intended use.

In addition, Cellco believes that under the Partnership agreement it has the right to allocate, based on a reasonable methodology, any impairment loss recognized by Cellco for licenses included in Cellco's national footprint. Cellco and the Partnership evaluated their wireless licenses for potential impairment as of December 15, 2016 and 2015. These evaluations resulted in no impairment of wireless licenses.

**Financial instruments** – The Partnership's trade receivables and payables are short-term in nature, and accordingly, their carrying value as well as the carrying value of the deferred purchase price and beneficial interest approximates fair value. The Partnership receives a beneficial interest, which is the residual amount on the device payment plan agreement receivables in excess of proceeds from the sale of these receivables to Cellco. The Partnership records a deferred purchase price, which is the residual amount on the device payment plan agreement receivables in excess of proceeds from the sale of these receivables to a third party. The deferred purchase price and the beneficial interest is recorded at fair value based on the remaining device payment amounts expected to be collected, adjusted, as applicable, for the time value of money and by the timing and estimated value of the device trade-in in connection with upgrades. The collection of the deferred purchase price and the beneficial interest is contingent on collections from customers.

**Fair value measurements** – Fair value of financial and non-financial assets and liabilities is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs used in the methodologies of measuring fair value for assets and liabilities, is as follows:

Level 1 - Quoted prices in active markets for identical assets or liabilities

Level 2 - Observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3 - No observable pricing inputs in the market

Financial assets and financial liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. The assessment of the significance of a particular input to the fair value measurements requires judgment, and may affect the valuation of the assets and liabilities being measured and their categorization within the fair value hierarchy.

**Distributions** – The Partnership is required to make distributions to its partners based upon the Partnership's operating results, due to/from affiliate status, and financing needs as determined by the General Partner at the date of the distribution.

**Variable interest entities (VIEs)** – VIEs are entities which lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, have equity investors which do not have the ability to make significant decisions relating to the entity's operations through voting rights, do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. The assets and liabilities of the VIEs are consolidated when the Partnership is deemed to be the primary beneficiary. The primary beneficiary is the party which has the power to make the decisions that most significantly affect the economic performance of the VIE and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

**Recent accounting standards** – In August 2016, the accounting standard update related to the classification of certain cash receipts and cash payments was issued. This standard update addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice for these issues. Among the updates, this standard update requires cash receipts from payments on a transferor's beneficial interests in securitized trade receivables to be classified as cash inflows from investing activities. This standard update is effective as of the first quarter of 2018; however, early adoption is permitted. The Partnership is currently evaluating the impact that this standard update will have on the consolidated financial statements. The Partnership expects the amendment relating to beneficial interests in securitization transactions will have an impact on the presentation of collections of the deferred purchase price from sales of wireless device payment plan agreement receivables in the consolidated statements of cash flows.

In June 2016, the standard update related to the measurement of credit losses on financial instruments was issued. This standard update requires that certain financial assets be measured at amortized cost reflecting an allowance for estimated credit losses expected to occur over the life of the assets. The estimate of credit losses must be based on all relevant information including historical information, current conditions and reasonable and supportable forecasts that affect the collectability of the amounts. This standard update is effective as of the first quarter of 2020; however early adoption is permitted. The Partnership is currently evaluating the impact that this standard update will have on the consolidated financial statements.

Table of Contents

In February 2016, the accounting standard update related to leases was issued. This standard update intends to increase transparency and improve comparability by requiring entities to recognize assets and liabilities on the balance sheet for all leases, with certain exceptions. In addition, through improved disclosure requirements, the standard update will enable users of financial statements to further understand the amount, timing, and uncertainty of cash flows arising from leases. This standard update is effective as of the first quarter of 2019; however early adoption is permitted. The Partnership's current operating lease portfolio is primarily comprised of spectrum, network, real estate, and equipment leases. Upon adoption of the standard, the balance sheet is expected to include a right of use asset and liability related to substantially all operating lease arrangements. At Cellco, a cross-functional coordinated implementation team has been established to implement the standard update related to leases. The Partnership is in the process of assessing the impact to its systems, processes and internal controls to meet the standard update's reporting and disclosure requirements.

In May 2014, the accounting standard update related to the recognition of revenue from contracts with customers was issued. This standard update along with related subsequently issued updates clarifies the principles for recognizing revenue and develops a common revenue standard for U.S. GAAP. The standard update also amends current guidance for the recognition of costs to obtain and fulfill contracts with customers such that incremental costs of obtaining and direct costs of fulfilling contracts with customers will be deferred and amortized consistent with the transfer of the related good or service. The standard update intends to provide a more robust framework for addressing revenue issues; improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; and provide more useful information to users of financial statements through improved disclosure requirements. The two permitted transition methods under the new standard are the full retrospective method, in which case the standard would be applied to each prior reporting period presented and the cumulative effect of applying the standard would be recognized at the earliest period shown, or the modified retrospective method, in which case the standard is applied only to the most current period presented and the cumulative effect of applying the standard would be recognized at the date of initial application. In August 2015, an accounting standard update was issued that delays the effective date of this standard update until the first quarter of 2018, at which time the Partnership plans to adopt the standard.

The Partnership is in the process of evaluating the impact of the standard update. The ultimate impact on revenue resulting from the application of the new standard will be subject to assessments that are dependent on many variables, including, but not limited to, the terms of contractual arrangements and the mix of business. Upon adoption, the Partnership expects that the allocation of revenue between equipment and service for wireless fixed-term service plans will result in more revenue allocated to equipment and recognized earlier as compared with current GAAP. The timing of recognition of sales commission expenses is also expected to be impacted, as a substantial portion of these costs (which are currently expensed) will be capitalized and amortized as described above. The available transition methods will continue to be evaluated. The Partnership's considerations include, but are not limited to, the comparability of financial statements and the comparability within the industry from application of the new standard to contractual arrangements. The Partnership plans to select a transition method by the second half of 2017.

At Cellco, a cross-functional coordinated implementation team has been established to implement the standard update related to the recognition of revenue from contracts with customers. The Partnership has identified and is in the process of implementing changes to its systems, processes and internal controls to meet the standard update's reporting and disclosure requirements.

**Reclassifications** – The Partnership reclassified certain prior year amounts to conform to the current year presentation.

**Subsequent events** – Events subsequent to December 31, 2016 have been evaluated through February 22, 2017, the date the financial statements were issued.

Table of Contents**3. WIRELESS DEVICE PAYMENT PLANS**

Under the Verizon device payment program, eligible wireless customers purchase wireless devices under a device payment plan agreement. Customers that activate service on devices purchased under the device payment program pay lower service fees as compared to those under fixed-term service plans, and their device payment plan charge is included in their standard wireless monthly bill.

**Wireless device payment plan agreement receivables** – The following table displays device payment plan agreement receivables, net, recognized in the accompanying balance sheets:

	2016	2015
Device payment plan agreement receivables, gross	\$ 272,174	\$ 159,527
Unamortized imputed interest	(11,544)	(6,534)
Device payment plan agreement receivables, net of unamortized imputed interest	260,630	152,993
Allowance for credit losses	(36,026)	(25,873)
<b>Device payment plan agreement receivables, net</b>	<b>\$ 224,604</b>	<b>\$ 127,120</b>
<b>Classified on the consolidated balance sheets:</b>		
Accounts receivable, net	\$ 120,747	\$ 68,785
Other assets	\$ 103,857	\$ 58,335
<b>Device payment plan agreement receivables, net</b>	<b>\$ 224,604</b>	<b>\$ 127,120</b>

The Partnership may offer customers certain promotions where a customer can trade-in his or her owned device in connection with the purchase of a new device. Under these types of promotions, the customer will receive trade-in credits that are applied to the customer's monthly bill. As a result, the Partnership recognizes a trade-in obligation measured at fair value using weighted-average selling prices obtained in recent resales of devices eligible for trade-in. Device payment plan agreement receivables, net does not reflect this trade-in obligation. At December 31, 2016 and 2015, the amount of trade-in obligations was not material.

At the time of sale, the Partnership imputes risk adjusted interest on the device payment plan agreement receivables. Imputed interest is recorded as a reduction to the related accounts receivable. Interest income, which is included within Other revenues on the statements of income and comprehensive income, is recognized over the financed payment term.

When originating device payment plan agreements, the Partnership uses internal and external data sources to create a credit risk score to measure the credit quality of a customer and to determine eligibility for the device payment program. If a customer is either new to the Partnership or has less than 210 days of customer tenure (a new customer), the credit decision process relies more heavily on external data sources. For a small portion of new customer applications, a traditional credit report is not available from one of the national credit reporting agencies because the potential customer does not have sufficient credit history. In those instances, alternate credit data is used for the risk assessment. If the customer has 210 days or more of customer tenure (an existing customer), the credit decision process relies on internal data sources. The experience has been that the payment attributes of longer tenured customers are highly predictive when considering their ability to pay in the future. External data sources include obtaining a credit report from a national consumer credit reporting agency, if available. Internal data and/or credit data obtained from the credit reporting agencies is used to create a custom credit risk score. The custom credit risk score is generated automatically (except with respect to a small number of applications where the information needs manual intervention) from the applicant's credit data using Verizon's proprietary custom credit models, which are empirically derived and demonstrably and statistically sound. The credit risk score measures the likelihood that the potential customer will become severely delinquent and be disconnected for non-payment.

Based on the custom credit risk score, each customer is assigned to a credit class, each of which has a specified required down payment percentage and specified credit limits. Device payment plan agreement receivables originated from customers assigned to credit classes requiring no down payment represent the lowest risk. Device payment plan agreement receivables originated from customers assigned to credit classes requiring a down payment represent a higher risk.

Subsequent to origination, the Partnership monitors delinquency and write-off experience as key credit quality indicators for its portfolio of device payment plan agreements and fixed-term service plans. The extent of collection efforts with respect to a particular customer are based on the results of proprietary custom empirically derived internal behavioral scoring models which analyze the customer's past performance to predict the likelihood of the customer falling further delinquent. These customer scoring models assess a number of variables, including origination characteristics, customer account history and payment patterns. Based on the score derived from these models, accounts are grouped by risk category to determine the collection strategy to be applied to such accounts. The Partnership continuously monitors collection performance results and the credit quality of device payment plan agreement receivables based on a variety of metrics, including aging. The Partnership considers an account to be delinquent and in default status if there are unpaid charges remaining on the account on the day after the bill's due date.

Table of Contents

As of December 31, 2016, the balance and aging of the device payment plan agreement receivables on a gross basis was as follows:

Unbilled	\$	264,724
Billed:		
Current		5,885
Past Due		1,565
Device payment plan agreement receivables, gross		272,174

Activity in the allowance for credit losses for the device payment plan agreement receivables was as follows:

	2016	2015
Balance at January 1	\$ 25,873	\$ 3,205
Bad debt expenses	48,965	43,794
Write-offs	(24,482)	(14,319)
Allowance related to receivables sold	(16,829)	(8,758)
Other	2,499	1,951
Balance at December 31	<u>\$ 36,026</u>	<u>\$ 25,873</u>

Customers entering into device payment plan agreements prior to May 31, 2015, have the right to upgrade their device, subject to certain conditions, including making a stated portion of the required device payment plan agreement payments and trading in their device in good working condition. Generally, customers entering into device payment agreements on or after June 1, 2015 are required to repay all amounts due under their device payment agreement before being eligible to upgrade their device. However, on select devices, certain marketing promotions have been revocably offered to customers to upgrade to a new device after paying down a certain specified portion of the device payment plan agreement amount as well as trading in their device in good working order. When a customer enters into a device payment plan agreement with the right to upgrade to a new device or for a device that is subject to an upgrade promotion, the Partnership records a guarantee liability in accordance with the Partnership's accounting policy. The guarantee liability related to this program, which was \$2,840 at December 31, 2016 and \$11,526 at December 31, 2015, was included in Advance billings and other on the accompanying consolidated balance sheets.

**Sales of wireless device payment plan agreement receivables** -- During 2015 and 2016, Cellco established programs pursuant to a Receivables Purchase Agreement (RPA) to sell from time to time, on an uncommitted basis, eligible device payment plan receivables to a group of primarily relationship banks (Purchasers) on both a revolving (Revolving Program) and non-revolving (Non-Revolving Program) basis. Additionally, during September of 2016, Cellco entered into a device payment plan agreement receivables financing facility (the "ABS Financing Facility") with a number of financial institutions. The receivables sold under the RPA and ABS are no longer considered assets of the Partnership.

Cellco continues to bill and collect on the receivables on behalf of the Partnership. Eligible receivables under the RPA exclude device payment plan agreements where a new customer was required to provide a down payment. The sales of receivables under the RPA did not have a material impact on the consolidated statements of income and comprehensive income. The proceeds received from the Purchasers are recorded within cash flows provided by operating activities on the consolidated statements of cash flows.

**Receivables Purchase Agreement** -- Under the Non-Revolving Program, Los Angeles SMSA transfers the eligible receivables to Los Angeles Edge LLC (Seller or SPE). The Seller then sells the receivables to the Purchasers for upfront proceeds and additional consideration upon settlement of the receivables (the deferred purchase price). Under the Revolving Program, Los Angeles SMSA transfers the eligible device payment plan agreement receivables to the Seller. The Seller then sells the eligible receivables on a revolving basis, subject to a maximum funding limit, to the Purchasers. Sales of eligible receivables by the Sellers, once initiated, generally occur and are settled on a monthly basis. Customer payments made towards receivables sold under the Revolving Program will be available to purchase additional eligible device payment plan agreement receivables originated during the revolving period. Cellco elected to end the revolving period in July 2016.

During 2016, the Partnership sold \$178,981 of receivables, net of allowances and imputed interest under the Revolving Program. The Partnership received proceeds from new transfers of \$132,483 and proceeds from reinvested collections of \$36,855, and recorded a deferred purchase price of \$23,873.

During 2015, the Partnership sold \$418,615 of receivables, net of allowances and imputed interest, under the Non-Revolving Program. In connection with this sale, proceeds from new transfers of \$308,659 were received and a deferred purchase price of \$117,587 was recorded. During 2015, the Partnership also sold \$201,283 of receivables, net of allowances and imputed interest, under the Revolving Program. In connection with this sale, proceeds from new transfers of \$168,854 were received and a deferred purchase price of \$32,429 was recorded.

Table of Contents

**Deferred purchase price** – Under the RPA, the deferred purchase price was initially recorded at fair value, based on the remaining device payment amounts expected to be collected, adjusted, as applicable, for the time value of money and by the timing and estimated value of the device trade-in in connection with upgrades. The estimated value of the device trade-in considers prices expected to be offered to us by independent third parties. This estimate contemplates changes in value after the launch of a device. The initial fair value measurements are considered to be Level 3 measurements within the fair value hierarchy. The collection of the deferred purchase price is contingent on collections from customers. At December 31, 2016 and 2015, the Partnership's deferred purchase price receivable was \$95,827 and \$148,941, respectively, which is held by the SPE and is included within Other assets on the consolidated balance sheets.

**Variable interest entities (VIEs)** – Under the RPA, the SPE's sole business consists of the acquisition of the receivables from Los Angeles SMSA and the resale of the receivables to the Purchasers. The assets of the SPE are not available to be used to satisfy obligations of any Partnership entities other than the SPE's. It was determined that the SPE is a VIE as it lacks sufficient equity to finance its activities. Given that Los Angeles SMSA has the power to direct the activities of the SPE that most significantly impact the SPE's economic performance, Los Angeles SMSA is deemed to be the primary beneficiary of the SPE. As a result, the Los Angeles SMSA consolidates the assets and liabilities of the SPE into the consolidated financial statements (see Note 2). Under ABS, there is a Trust entity (the "Trust") whose sole business consists of holding collected receivables which were previously sold by the Partnership to Cellco affiliates under the terms of the ABS Financing Facility. The activity of servicing the receivables and distribution of the cash collected is the activity that has the most significant impact on the Trust. Cellco is the master and special servicer for the receivables but does not have a direct variable interest in the Trust. The Partnership holds a beneficial interest in the Trust which represents the residual interest in the Trust and as such are variable interests. Since Cellco maintains decision making rights as servicer and has an obligation to absorb losses, it is the primary beneficiary in the Trust.

**ABS Financing Facility** – Under the terms of the ABS Financing Facility, the counterparties to the facility made advances under asset-backed loans backed by device payment plan agreement receivables for proceeds. There is a two year revolving period, which may be extended, during which Cellco may transfer additional receivables to an ABS Entity. Subject to certain conditions, Cellco may also remove receivables from the ABS Entity. Cellco may prepay the outstanding amounts of the loans without penalty, but in certain cases, with breakage costs. During 2016, the Partnership sold \$389,800 of device payment plan agreement receivables, net of allowances and imputed interest to Cellco and received proceeds of \$331,454 and recorded a beneficial interest of \$58,346, which is included within Other assets on the consolidated balance sheets.

**Beneficial interest** – Under the ABS Financing Facility, the beneficial interest was initially recorded at fair value, based on the remaining device payment amounts expected to be collected, adjusted, as applicable, for the time value of money. This estimate contemplates changes in value after the launch of a device. The initial fair value measurements are considered to be Level 3 measurements within the fair value hierarchy. The collection of the beneficial interest is contingent on collections from customers. At December 31, 2016, the Partnership's beneficial interest was \$56,359.

**Continuing involvement** – The Partnership has continuing involvement related to the sold receivables as they may be responsible for absorbing additional credit losses pursuant to the RPA. The Partnership's maximum exposure to loss related to the sold receivables is limited to the amount of the deferred purchase price, which was \$95,827 and \$148,941 as of December 31, 2016 and 2015, respectively. The maximum exposure to loss represents an estimated loss that would be incurred under severe, hypothetical circumstances whereby the Partnership would not receive the total portion of the proceeds withheld by the Purchasers. As the Partnership believes the probability of these circumstances occurring is remote, the maximum exposure to loss is not an indication of the Partnership's expected loss. Additionally, Cellco has continuing involvement with the sold receivables as it services the receivables on behalf of the Partnership under the RPA and ABS Financing Facility. Cellco continues to service the customer and their related receivables, including facilitating customer payment collection. The Partnership has no continuing involvement related to the sold receivables and is not responsible for absorbing additional credit losses pursuant to the ABS Financing Facility. While servicing the receivables, the same policies and procedures are applied to the sold receivables that apply to owned receivables, and Cellco continues to maintain normal relationships with the customers. The credit quality of the customers served was consistent throughout the periods presented.

The outstanding device payment plan agreement receivables derecognized from the Partnership's consolidated balance sheets, but which Cellco continues to service, was \$609,990 and \$527,002 (1) at December 31, 2016 and 2015, respectively.

- (1) The Partnership corrected the 2015 information in the preceding Paragraph, which was identified during the preparation of the 2016 consolidated financial statements. Management believes such amounts are immaterial to the previously issued consolidated financial statements.

Table of Contents**4. WIRELESS LICENSES**

Changes in the carrying amount of wireless licenses are as follows:

Balance at January 1, 2015	\$	79,543
Acquisitions		1,972,824
Capitalized interest on wireless licenses		21,075
Reclassifications, adjustments and other		309
Balance at December 31, 2015	\$	2,073,751
Acquisitions		-
Capitalized interest on wireless licenses		1,697
Reclassifications, adjustments and other		-
<b>Balance at December 31, 2016</b>	<b>\$</b>	<b>2,075,448</b>

At December 31, 2016, \$1,972,824 of wireless licenses were under development for commercial service for which the Partnership was capitalizing interest costs.

The average remaining renewal period of the Partnership's wireless license portfolio was 7.0 years as of December 31, 2016.

**Spectrum license transaction** – On January 29, 2015, the FCC completed an auction of 65 MHz of spectrum, which it identified as the AWS-3 band. Cellco participated in that auction and was the high bidder on the licenses covering the Partnership service area. The licenses were deemed to be right to use assets and were allocated and recorded by the Partnership as wireless licenses. The cash payment made by the Partnership of \$1,972,824 is classified within Acquisition of wireless licenses on the statement of cash flows for the year ended December 31, 2015.

**5. PROPERTY, PLANT AND EQUIPMENT, NET**

Property, plant and equipment consist of the following as of December 31, 2016 and 2015:

	2016	2015
Land	\$ 7,716	\$ 7,716
Buildings and improvements (15-45 years)	940,411	836,428
Wireless plant and equipment (3-50 years)	4,165,458	3,973,684
Furniture, fixtures and equipment (3-10 years)	63,565	64,269
Leasehold improvements (5-7 years)	428,995	400,313
	<b>5,606,145</b>	5,282,410
Less: accumulated depreciation	<b>(3,743,253)</b>	(3,477,533)
Property, plant and equipment, net	<b>\$ 1,862,892</b>	\$ 1,804,877

Capitalized interest cost of \$772 and \$2,803, and capitalized network engineering costs of \$24,656 and \$26,754, were recorded during the years ended December 31, 2016 and 2015, respectively. Construction in progress included in certain classifications shown above, principally consists of wireless plant and equipment, amounted to \$127,758 and \$106,935, as of December 31, 2016 and 2015, respectively. Depreciation expense of \$354,329, \$353,975, and \$343,883 was incurred during the years ended December 31, 2016, 2015 and 2014.

Table of Contents**6. TOWER MONETIZATION TRANSACTION**

Prior to the acquisition of the Partnership interest by Celco in 2000, Vodafone Group PLC ("Vodafone"), then parent company of AirTouch Cellular, entered into agreements to sublease all of its unused space on up to 430 of its communications towers ("Sublease Agreement") to SpectraSite Holdings, Inc. ("SpectraSite") in exchange for \$155,000. At various closings in 2001 and 2000, SpectraSite leased 274 communications towers owned and operated by the Partnership for \$98,465. At December 31, 2016 and 2015, the Partnership has \$18,967 and \$23,932, respectively, recorded as deferred rent. The Sublease Agreement requires monthly maintenance fees for the existing physical space used by the Partnership's cellular equipment. The Partnership paid \$1,528, \$2,152 and \$3,944 to SpectraSite pursuant to the Sublease Agreement for the years ended December 31, 2016, 2015 and 2014, respectively, which is included in cost of service in the accompanying statements of income and comprehensive income.

During March 2015, Verizon Communications, the parent company of Celco, entered into an agreement with American Tower Corporation (ATC) giving ATC exclusive rights to lease and operate approximately 11,300 wireless towers owned and operated by Celco and its subsidiaries for an upfront payment of \$5.0 billion (not in thousands). Verizon Communications also sold 162 towers to ATC for an upfront payment of \$0.1 billion (not in thousands). Under the terms of the lease agreements, ATC has exclusive rights to lease and operate the towers over an average term of approximately 28 years. As the leases expire, ATC has fixed-price purchase options to acquire these towers based on their anticipated fair market values at the end of the lease terms. The Partnership has subleased capacity on the towers from ATC for a minimum of 10 years at current market rates, with options to renew. The Partnership participated in this arrangement and has leased 538 towers to ATC for an upfront payment of \$221,653 and has sold 1 tower to ATC for an upfront payment of \$616. The upfront payment, including the towers sold was \$222,269 and was accounted for as deferred rent and as a financing obligation. The \$95,634 accounted for as deferred rent was included in cash flows provided by operating activities and relates to the portion of the towers for which the right-of-use has passed to ATC. The deferred rent is being recognized on a straight-line basis over the Partnership's average lease term of 30 years. At December 31, 2015, a financing obligation in the amount of \$126,635 was included in cash flows provided by financing activities, which relates to the portion of the towers that continue to be occupied and used for the Partnership's network operations. The Partnership makes a sublease payment to ATC for \$1.9 per month per site, with annual increases of 2 percent. During 2016 and 2015, the Partnership made \$12,498 and \$10,260, respectively, of sublease payments to ATC, which is recorded as Repayments of financing obligation.

At December 31, 2016 and 2015, the balance of deferred rent was \$89,605 and \$93,057, respectively. At December 31, 2016 and 2015, the balance of the financing obligation was \$125,296 and \$125,510, respectively.

**7. CURRENT LIABILITIES**

Accounts payable and accrued liabilities consist of the following as of December 31, 2016 and 2015:

	2016	2015
Accounts payable	\$ 189,081	\$ 174,883
Accrued liabilities	13,203	15,924
Accounts payable and accrued liabilities	<u>\$ 202,284</u>	<u>\$ 190,807</u>

Advance billings and other consist of the following as of December 31, 2016 and 2015:

	2016	2015
Advance billings	\$ 139,714	\$ 142,652
Customer deposits	17,880	12,355
Guarantee liability	2,840	11,526
Advance billings and other	<u>\$ 160,434</u>	<u>\$ 166,533</u>

Table of Contents**8. TRANSACTIONS WITH AFFILIATES AND RELATED PARTIES**

In addition to fixed asset purchases and right to use licenses substantially all of service revenues, equipment revenues, other revenues, cost of service, cost of equipment, and selling, general and administrative expenses represent transactions processed by affiliates (Cellco and its related parties) on behalf of the Partnership or represent transactions with affiliates. These transactions consist of (1) revenues and expenses that pertain to the Partnership which are processed by Cellco and directly attributed to or directly charged to the Partnership; (2) roaming revenue by customers of other Cellco affiliated markets within the Partnership market or Partnership customers' cost when roaming in other Cellco affiliated markets; and (3) certain revenues and expenses that are processed or incurred by Cellco which are allocated to the Partnership based on factors such as the Partnership's percentage of revenue streams, customers, gross customer additions, or minutes of use. These transactions do not necessarily represent arm's length transactions and may not represent all revenues and costs that would be present if the Partnership operated on a standalone basis. Cellco periodically reviews the methodology and allocation bases for allocating certain revenues, operating costs, selling, general and administrative expenses to the Partnership. Resulting changes, if any, in the allocated amounts have historically not been significant.

**Service revenues** – Service revenues include monthly customer billings processed by Cellco on behalf of the Partnership and roaming revenues relating to customers of other affiliated markets that are specifically identified to the Partnership. For the years ended December 31, 2016, 2015, and 2014 roaming revenues were \$486,262, \$438,105 and \$369,731, respectively. Service revenues also include long distance, data, and certain revenue reductions including revenue concessions that are processed by Cellco and allocated to the Partnership based on certain factors deemed appropriate by Cellco.

**Equipment revenues** – Equipment revenues include equipment sales processed by Cellco and specifically identified to the Partnership, as well as certain handset and accessory revenues, contra-revenues including equipment concessions, and coupon rebates that are processed by Cellco and allocated to the Partnership based on certain factors deemed appropriate by Cellco.

**Other revenues** – Other revenues include switch revenue and other fees and surcharges charged to the customer that are specifically identified to the Partnership. For the years ended December 31, 2016, 2015, and 2014 switch revenues were \$8,570, \$9,234, and \$6,614, respectively.

**Cost of service** – Cost of service includes roaming costs relating to the Partnership's customers roaming in other affiliated markets. For the years ended December 31, 2016, 2015 and 2014 roaming costs were \$619,985, \$547,672, and \$477,949, respectively. Cost of service also includes cost of telecom, long distance and application content that are incurred by Cellco and allocated to the Partnership based on certain factors deemed appropriate by Cellco. The Partnership has lease agreements for the right to use additional spectrum owned by Cellco. See Note 2 for further information regarding this arrangement.

**Cost of equipment** – Cost of equipment is recorded at Cellco's cost basis (see Note 2). Cost of equipment also includes certain costs related to handsets, accessories and other costs incurred by Cellco and allocated to the Partnership based on certain factors deemed appropriate by Cellco.

**Selling, general and administrative** – Selling, general and administrative expenses include commissions, customer billing, office telecom, customer care, salaries, sales and marketing and advertising expenses that are specifically identified to the Partnership as well as incurred by Cellco and allocated to the Partnership based on certain factors deemed appropriate by Cellco. The Partnership recorded \$113,300, \$117,409 and \$118,342 in advertising costs for the years ended December 31, 2016, 2015 and 2014, respectively.

**Property, plant and equipment** – Property, plant and equipment includes assets purchased by Cellco and directly charged to the Partnership as well as assets transferred between Cellco and the Partnership (see Note 2).

**Wireless licenses** – Wireless licenses include the right to use assets that were allocated by Cellco and recorded by the Partnership in exchange for a \$1,972,824 payment (see Note 4).

Table of Contents**9. COMMITMENTS**

Cellco, on behalf of the Partnership, and the Partnership itself have entered into operating leases for facilities and equipment used in its operations. Lease contracts include renewal options that include rent expense adjustments based on the Consumer Price Index as well as annual and end-of-lease term adjustments. Rent expense is recorded on a straight-line basis. The noncancellable lease term used to calculate the amount of the straight-line rent expense is generally determined to be the initial lease term, including any optional renewal terms that are reasonably assured of occurring. Leasehold improvements related to these operating leases are amortized over the shorter of their estimated useful lives or the noncancellable lease term. For the years ended December 31, 2016, 2015 and 2014, the Partnership incurred a total of \$117,771, \$104,515 and \$97,285 respectively, as rent expense related to these operating leases, which was included in Cost of service and Selling, general and administrative expenses in the accompanying statements of income and comprehensive income. Aggregate future minimum rental commitments under noncancellable operating leases, excluding renewal options that are not reasonably assured of occurring and remaining tower maintenance fees of \$10,182 (see Note 6), for the years shown are as follows:

Years	Amount
2017	\$ 95,290
2018	84,812
2019	73,290
2020	49,838
2021	27,042
2022 and thereafter	<u>131,324</u>
Total minimum payments	<u>\$ 461,596</u>

The Partnership has also entered into certain agreements with Cellco, whereas the Partnership leases certain spectrum from Cellco that overlaps the Los Angeles metropolitan service area. Total rent expense under these spectrum leases amounted to \$124,943 in 2016, \$124,722 in 2015 and \$110,044 in 2014, respectively, which is included in Cost of service in the accompanying consolidated statements of income and comprehensive income.

Based on the terms of these leases as of December 31, 2016, future spectrum lease obligations are expected to be as follows:

Years	Amount
2017	\$ 103,919
2018	93,249
2019	82,781
2020	72,312
2021	72,312
2022 and thereafter	<u>882,177</u>
Total minimum payments	<u>\$ 1,306,750</u>

The General Partner currently expects that any renewal option in the leases will be exercised.

Table of Contents**10. CONTINGENCIES**

Cellco and the Partnership are subject to lawsuits and other claims including class actions, product liability, patent infringement, intellectual property, antitrust, partnership disputes, and claims involving relations with resellers and agents. Cellco is also currently defending lawsuits filed against it and other participants in the wireless industry alleging various adverse effects as a result of wireless phone usage. Various consumer class action lawsuits allege that Cellco violated certain state consumer protection laws and other statutes and defrauded customers through misleading billing practices or statements. These matters may involve indemnification obligations by third parties and/or affiliated parties covering all or part of any potential damage awards against Cellco and the Partnership and/or insurance coverage. All of the above matters are subject to many uncertainties, and the outcomes are not currently predictable.

The Partnership may be allocated a portion of the damages that may result upon adjudication of these matters if the claimants prevail in their actions. In none of the currently pending matters is the amount of accrual material to the Partnership. An estimate of the reasonably possible loss or range of loss with respect to these matters as of December 31, 2016 cannot be made at this time due to various factors typical in contested proceedings, including (1) uncertain damage theories and demands; (2) a less than complete factual record; (3) uncertainty concerning legal theories and their resolution by courts or regulators; and (4) the unpredictable nature of the opposing party and its demands. The Partnership continuously monitors these proceedings as they develop and will adjust any accrual or disclosure as needed. It is not expected that the ultimate resolution of any pending regulatory or legal matter in future periods will have a material effect on the financial condition of the Partnership, but it could have a material effect on the results of operations for a given reporting period.

**11. RECONCILIATION OF ALLOWANCE FOR DOUBTFUL ACCOUNTS**

	Balance at Beginning of the Year	Additions Charged to Operations	Write-offs Net of Recoveries	Balance at End of the Year
Accounts Receivable Allowances:				
2016	\$ 45,751	\$ 71,925	\$ (70,038)	\$ 47,638
2015	24,136	79,063	(57,448)	45,751
2014	21,600	34,370	(31,834)	24,136

### **PART I**

#### **Item 1 Business**

##### **General**

Verizon Communications Inc. (Verizon, or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, information and entertainment products and services to consumers, businesses and governmental agencies. With a presence around the world, we offer voice, data and video services and solutions on our wireless and wireline networks that are designed to meet customers' demand for mobility, reliable network connectivity, security and control. Formerly known as Bell Atlantic Corporation (Bell Atlantic), we were incorporated in 1983 under the laws of the State of Delaware. We began doing business as Verizon on June 30, 2000 following our merger with GTE Corporation. We have a highly diverse workforce of approximately 160,900 employees.

Our principal executive offices are located at 1095 Avenue of the Americas, New York, New York 10036 (telephone number 212-395-1000).

We have two reportable segments, Wireless and Wireline, which we operate and manage as strategic business segments and organize by products and services.

**Wireless** Wireless' communications products and services include wireless voice and data services and equipment sales, which are provided to consumer, business and government customers across the United States.

**Wireline** Wireline's voice, data and video communications products and enhanced services include broadband video and data, corporate networking solutions, data center and cloud services, security and managed network services and local and long distance voice services. We provide these products and services to consumers in the United States, as well as to carriers, businesses and government customers both in the United States and around the world.

Additional discussion of our reportable segments is included in the 2016 Verizon Annual Report to Shareowners under the headings "Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview and - Segment Results of Operations" and in Note 12 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries, which are incorporated by reference into this report.

##### **Wireless**

###### **Background**

Our Wireless segment, doing business as Verizon Wireless, provides wireless communications services and products across one of the most extensive wireless networks in the United States (U.S.). Verizon Wireless is the largest wireless service provider in the United States as measured by retail connections and revenue. At December 31, 2016, Verizon Wireless had 114.2 million retail connections and 2016 revenues of approximately \$89.2 billion, representing approximately 71% of Verizon's aggregate revenues.

Cellco Partnership (Cellco), which originally held the wireless assets of Bell Atlantic, began operating as "Verizon Wireless" in April 2000 with both Vodafone Group Plc (Vodafone) and Bell Atlantic as partners, following Vodafone's contribution of its U.S. wireless assets into Cellco. On September 2, 2013, Verizon entered into a stock purchase agreement with Vodafone and Vodafone 4 Limited, pursuant to which Verizon agreed to acquire all of Vodafone's indirect 45% interest in Verizon Wireless for aggregate consideration of approximately \$130 billion (the Wireless Transaction). We completed the Wireless Transaction on February 21, 2014 and, as a result, we acquired 100% ownership of Verizon Wireless. The consideration paid was primarily comprised of cash and Verizon common stock.

We have the largest fourth-generation (4G) Long-Term Evolution (LTE) technology and third-generation (3G) Evolution - Data Optimized (EV-DO) networks of any U.S. wireless service provider. Our 4G LTE network is available to over 98% of the U.S. population in more than 500 markets covering approximately 314 million people, including those in areas served by our LTE in Rural America partners. Under this program, we are working with wireless carriers in rural areas to collaboratively build and operate a 4G LTE network using each carrier's network assets and our core 4G LTE equipment and 700 MHz C Block and Advanced Wireless Services (AWS) spectrum.

We are adding capacity and density to our 4G LTE network. We are committed to developing and deploying fifth-generation (5G) wireless technology and are working with key partners to ensure the aggressive pace of innovation, standards development and appropriate requirements for this next generation of wireless technology. Based on the outcome of our ongoing pre-commercial trials, we intend to be the first company to deploy a 5G fixed wireless broadband network in the United States. We expect to launch a fixed commercial wireless service supported by this network in 2018.

## Table of Contents

### **Wireless Service and Product Offerings**

Our wireless services are available to our customers receiving service under the Verizon Wireless brand. In addition, customers can obtain wireless products and services that operate on our network from resellers that purchase network access from us on a wholesale basis.

#### *Wireless Services*

We offer our wireless services on a postpaid and prepaid basis. Retail (non-wholesale) postpaid accounts primarily represent retail customers with Verizon Wireless that are directly served and managed by Verizon Wireless and use its branded services. A single account may include monthly wireless services for a variety of connected devices. A postpaid retail connection represents an individual line of service for a wireless device for which a customer is billed in advance a monthly access charge in return for a monthly network service allowance, and usage beyond the allowance is billed in arrears. Approximately 95% of our total retail connections were postpaid retail connections as of December 31, 2016. Our prepaid service enables individuals to obtain wireless services without credit verification by paying for all services in advance.

We offer various postpaid account service plans, including shared data plans, single connection plans and other plans tailored to the needs of our customers. Our shared data plans typically feature domestic unlimited voice minutes, unlimited domestic and international text, video and picture messaging, and a single data allowance that can be shared among the wireless devices on a customer's account. These allowances will vary from time to time as part of promotional offers or in response to market circumstances. On February 12, 2017, we announced an introductory plan, our new Verizon Unlimited plan, available to our consumer and small business customers, which offers among other things, unlimited domestic voice, data and texting. Both our shared data plans and the Verizon Unlimited plan include our HD (High Definition) Voice, Video Calling and Mobile Hotspot services on compatible devices. HD Voice is a suite of services enabled by Voice over LTE (VoLTE), which delivers calls over our 4G LTE network, and our Video Calling service combines an HD Voice call with real-time video. Our Mobile Hotspot service enables a customer to activate a personal Wi-Fi hotspot via their smartphone that can provide Internet access to multiple Wi-Fi enabled devices. We also offer various voice and shared data plans for small and large businesses.

Our simplified shared data plan, the new Verizon Plan, offers customers various sizes of data packages that can be shared among up to 10 devices on a consumer account or 25 devices on a business account. The plan features Carryover Data, which allows customers to carry over unused data to the next month, and Safety Mode, which enables customers to avoid data overage fees by allowing them to continue using data at a reduced data speed after using their data allowance. Certain plans, with higher account access amounts also include calling to and voice, text and data roaming in Mexico and Canada. Customers who wish to participate in this new plan can do so by purchasing a device from Verizon either under our device payment program or at full retail, or by using their own compatible device.

Customers on our fixed-term service plans have historically paid higher access fees for their wireless service in exchange for the ability to purchase their wireless devices at subsidized prices. We have largely discontinued this form of device subsidy. Under the Verizon device payment program, our eligible wireless customers purchase wireless devices under a device payment plan agreement. Customers that activate service on devices purchased under the device payment program or on a compatible device that they already own pay lower access fees (unsubsidized service pricing) as compared to those under our fixed-term service plans. Generally, customers entering into device payment plan agreements on or after June 1, 2015 are required to repay all amounts due under their device payment plan agreement before being eligible to upgrade their device. However, certain devices are subject to promotions that allow customers to upgrade to a new device after paying down a specified percentage of the balance on their device payment plan and trading in their device in good working condition.

We also offer prepaid single connection service plans that feature domestic unlimited voice minutes and unlimited domestic and international text. On compatible devices, certain of our prepaid plans also feature video and picture messaging, Carryover Data and Always-On Data, which allows a customer to stay online at reduced data speeds after using their data allowance. HD Voice, Video Calling and Mobile Hotspot service are available on compatible devices. Customers can manage their prepaid services on the device using their My Verizon Mobile application or logging in to the My Verizon website.

We offer our customers a wide variety of wireless services accessible on a broad range of devices. Access to the Internet is available on all smartphones and nearly all basic phones. We also offer service that enables our customers to access the Internet wirelessly at broadband speeds on notebook computers and tablets that either have embedded 4G LTE or 3G EV-DO modules or that are used in conjunction with separate devices that enable access to this service, such as USB modems, Jetpacks™ and other dedicated devices that provide a mobile Wi-Fi connection.

Our customers can access multimedia offerings, provided by Verizon and by third parties, consisting of applications providing music, video, gaming, news and other content. Our business-focused offerings, which are designed to increase productivity, include solutions that enable customers to access the Internet, their corporate intranets and e-mail across our diverse portfolio of wireless devices. Our location-based services provide our customers with directions to their destination and enable our business customers to locate, monitor and

communicate with their mobile field workers. Our global data services allow our customers to access data services and the Internet on all smartphones and many tablets and basic phones from hundreds of international destinations that we sell. A majority of the wireless devices used by our customers can run applications and services offered by Google (a subsidiary of Alphabet Inc.) via Google Play or Apple Inc. (Apple) via iTunes.

Our customers can also make and receive calls on their home phone handsets using our wireless network through our Home Phone Connect service or Verizon 4G LTE Broadband Router with Voice service. We also offer LTE Internet (Installed), a high-speed Internet service that provides customers with Internet connections in their homes using our 4G LTE network.

## **Table of Contents**

We provide network access and, in some cases, enhanced value-added services to support wireless connections for the Internet of Things (IoT). Our IoT services offer end-to-end solutions for various IoT vertical markets, such as:

- Fleet management and telematics – We provide in-vehicle solutions that enable vehicle navigation, GPS tracking, engine diagnostic monitoring and maintenance alerts;
- Energy – We offer solutions targeted to providing the energy sector with greater visibility into energy usage and the ability to remotely monitor devices used to track energy usage;
- Agricultural technology – We provide solutions that give farmers critical data they need to improve yields and save costs; and
- Smart Communities – Our solutions enable localities to collect data from IoT and connected machine technologies with the goal of improving public safety, managing traffic, reducing pollution, identifying revenue generation opportunities, making efficient use of limited resources and attracting businesses, residents and workers.

We also work with various companies that purchase network access from us to connect their Open Development certified devices, bundled together with their own solutions, which they sell to end-users.

### ***Wireless Devices***

We offer several categories of wireless devices, including smartphones and basic phones, tablets and other Internet access devices.

*Smartphones and Basic Phones.* All of the smartphones we offer are enabled to utilize our 4G LTE and 3G EV-DO high-speed data services. These devices run on various operating platforms, primarily Apple iOS and Google Android. The basic phones we offer are 3G EV-DO-enabled and have HTML-browsing capability.

*Tablets and Other Internet Devices.* We offer tablets from multiple manufacturers, all of which can access the Internet via our 4G LTE network or a Wi-Fi connection. The tablets run primarily on the Apple iOS and Google Android operating systems. In addition, we offer dedicated devices, which we refer to as Jetpacks that provide a mobile Wi-Fi 4G LTE and/or 3G EV-DO connection and are capable of connecting multiple Wi-Fi enabled devices to the Internet at one time. Our customers can also access the Internet wirelessly at broadband speeds on their computers via data cards, USB modems or through the use of certain laptop computers and netbooks enabled to access our wireless network.

We purchase a substantial majority of our wireless devices and accessories from Apple, Samsung, Motorola Mobility, Google, LG Electronics and HTC.

A key component of all wireless devices is the chipset, which contains the “intelligence” of the device. The LTE chipsets used in our 4G LTE-enabled devices are manufactured by various companies, each using its own 4G LTE chipset technology. To support Code Division Multiple Access (CDMA)-1XRTT and EV-DO technologies (with and without 4G LTE), most of our wireless device suppliers currently rely on Qualcomm Incorporated for the manufacture and supply of chipsets. In addition, there are a number of other components common to wireless devices provided by various electronic component manufacturers that we do not deal with directly.

### ***Network***

We have the largest 4G LTE and 3G EV-DO networks of any service provider in the United States, with licensed and operational coverage in all of the 100 most populous U.S. metropolitan areas. As of December 31, 2016, our 4G LTE network covered approximately 314 million people in the United States, including those in areas served by our LTE in Rural America partners. We currently have 21 LTE in Rural America partners that provide 4G LTE coverage to an area covering approximately three million people.

The reliability of our wireless network is a key factor for our continued success, and we strive to provide our customers with the highest network reliability for their wireless services. We believe that steady and consistent network and platform investments provide the foundation for innovative products and services that will fuel profitable growth. The depth and breadth of our network provides our fundamental strength and is the basis for our competitive advantage.

We design and deploy our network in an efficient manner that we believe maximizes the number of successful data sessions, including video, permitting the completion of large file downloads and uploads while delivering on our advertised throughput speeds, and maximizes the number of calls that are connected on the first attempt and completed without being dropped. We plan to continue to upgrade our network, primarily to increase its capacity and density, by utilizing small cell technology, in-building solutions and distributed antennae systems in addition to deploying existing AWS spectrum. We are also exploring strategic opportunities to increase our network capacity and efficiency through selective acquisitions of spectrum licenses.

Our network includes various elements of redundancy designed to enhance the reliability of our service. To mitigate the impact of power disruptions on our operations, we have battery backup at every switch and every macrocell in our network. We also utilize backup generators at a majority of our macrocells and at every switch location. In addition, we have a fleet of portable backup generators that can be deployed, if needed. We further enhance reliability by using a fully redundant Multiprotocol Label Switching backbone network in critical locations.

## Table of Contents

In addition to our own network coverage, we have roaming agreements with a number of wireless service providers to enable our customers to receive wireless service in nearly all other areas in the United States where wireless service is available. We also offer a variety of international wireless voice and data services to our customers through roaming arrangements with wireless service providers outside of the United States. Certain of our roaming agreements can be terminated at will by either party upon several months' notice; however, we do not believe that the termination of any of these at-will agreements would have a material adverse effect on our business.

### **Technology**

Our primary network technology platforms are 4G LTE and 3G CDMA. 4G LTE provides higher data throughput performance for data services at a lower cost compared to that offered by 3G technologies.

In 2014, we commercially launched our mobile VoLTE service. HD Calling, enabled by VoLTE, is now being used, in addition to CDMA technology, to provide voice calling services to our customers.

We are committed to developing and deploying 5G wireless technology. We are densifying our 4G LTE network to add capacity and pre-position us for 5G technology. We launched the Verizon 5G Technology Forum with key industry partners to develop 5G requirements and standards and conduct testing to accelerate the introduction of 5G technologies. We believe that 5G technology will provide higher throughput than the current 4G LTE technology, lower latency and the ability to handle more network traffic as the number of Internet-connected devices grows. Based on the outcome of our ongoing pre-commercial trials, we intend to be the first company to deploy a 5G fixed wireless broadband network in the United States. We expect to launch a fixed commercial wireless service supported by this network in 2018.

### **Spectrum**

The spectrum licenses we hold can be used for mobile wireless voice and data communications services. We have licenses to provide these wireless services on portions of the 800 MHz band, also known as cellular spectrum, the 1800-1900 MHz band, also known as Personal Communication Services (PCS) spectrum, portions of the 700 MHz upper C band and AWS spectrum in the 1700 and 2100 MHz bands, in areas that, collectively, cover nearly all of the population of the United States.

In January 2015, the Federal Communications Commission (FCC) completed an auction of 65 MHz of spectrum in the AWS-3 band. We participated in that auction and were the high bidder on 181 spectrum licenses, for which we paid cash of approximately \$10.4 billion. The FCC granted us these spectrum licenses in April 2015.

We anticipate we will need additional spectrum to meet future demand. This increasing demand is driven by growth in customer connections and the increased usage of wireless broadband services, that use more bandwidth and require ever faster rates of speed. Additional spectrum may also allow us to offer new products enabled by advances in technology, including emerging 5G and IoT services. We can meet our future spectrum needs by acquiring licenses or leasing spectrum from other licensees, or by acquiring new spectrum licenses from the FCC, if and when future FCC spectrum auctions occur. In March 2016, the FCC commenced a voluntary incentive auction of television broadcast spectrum in the 600 MHz frequency range. The auction has finished the reverse and forward clock phases. Any results will be disclosed by the FCC after the completion of the assignment phase and after the FCC announces the close of the auction by public notice.

Since we and competing wireless service providers have experienced spectrum shortages in certain markets and may have spectrum surpluses in others, from time to time we have exchanged spectrum licenses with other service providers through secondary market swap transactions. We expect to continue to pursue similar opportunities to trade spectrum licenses in order to meet certain of our capacity and expansion needs in the future. In other cases, we have entered into intra-market spectrum swaps designed to increase the amount of contiguous spectrum within frequency bands in a specific market. Contiguous spectrum improves network performance and efficiency. These swaps as well as any spectrum purchases are subject to obtaining governmental approvals for the transfer of spectrum licenses in each instance.

Additional information regarding spectrum license transactions is included in the 2016 Verizon Annual Report to Shareowners in Note 2 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries, which is incorporated by reference into this report.

### **Network Equipment and Build-out**

Nokia and Ericsson are currently our primary network vendors for our LTE network deployments for macro sites as well as small cells. Our primary CDMA cell site equipment infrastructure vendors are Nokia, which provides more than half of our CDMA cell site equipment, and Ericsson, which provides nearly all of our remaining cell site equipment. We also rely on Nokia and Ericsson for our switching equipment.

As we continue to build and upgrade our existing network, we must complete a variety of steps, including securing rights to a large number of sites as well as obtaining zoning and other governmental approvals and fiber facilities for both our macro and small cells. As we densify our network, we follow a similar process for small cells, in-building systems and antennas and related radio equipment that comprise distributed antenna systems. We utilize tower site management firms, such as Crown Castle International Corp. and American Tower Corporation (American Tower), as lessors or managers of a portion of our existing tower sites.

During March 2015, we completed a transaction with American Tower pursuant to which American Tower acquired the exclusive rights to lease and operate approximately 11,300 of our wireless towers for an upfront payment of \$5.0 billion. Under the terms of the lease agreements, American

## **Table of Contents**

Tower has exclusive rights to lease and operate towers over an average term of approximately 28 years. As the leases expire, American Tower has fixed-price purchase options to acquire these towers based on their anticipated fair market values at the end of the lease terms. As part of this transaction, we also sold 162 towers for \$0.1 billion. We have subleased capacity on the towers from American Tower for a minimum of 10 years at current market rates, with options to renew.

### **Marketing and Distribution**

Our marketing strategy is focused on offering solutions tailored to the needs of our various customer market groups; promoting our brand; leveraging our extensive distribution network; and jointly marketing our products and services to large business and government customers with Verizon's Wireline business units through the Wireless Business Group, a sales and marketing organization that encompasses all of Verizon Wireless' solutions for medium and large business and government customers. Our marketing plan includes a coordinated program of television, print, radio, outdoor signage, Internet and point-of-sale media promotions designed to present our corporate message consistently across all of our markets. We use a combination of direct, indirect and alternative distribution channels in order to increase customer growth while reducing customer acquisition costs.

Company-operated stores are a core component of our distribution strategy. We have Verizon Destination Stores in various major metropolitan areas, which focus on the mobile lifestyle and highlight the many ways consumers can use wireless technology in their daily lives. These stores are part of a broader initiative that includes the redesign of our retail stores nationwide into "Smart Stores," which showcase the same mobile lifestyle zones on a smaller scale. In addition, our direct channel includes our business-to-business sales operations and systems organization and is focused on supporting the wireless communications needs of consumers and local, regional and national business customers. In addition, we have a telemarketing sales force dedicated to handling incoming calls from customers, and we offer fully-automated, end-to-end web-based sales of wireless devices, accessories and service plans.

Our indirect channel includes agents that sell our postpaid and prepaid wireless products and services at retail locations throughout the United States, as well as through the Internet. The majority of these agents sell both our postpaid and prepaid products and services, and do so under exclusive selling arrangements with us. We also have relationships with high-profile national retailers, such as Best Buy, Wal-Mart and Target, to sell our postpaid and prepaid wireless products and services. Stores such as Dollar General and various drugstore chains sell our prepaid products and services.

### **Competition**

We operate in a highly competitive industry. We compete against other national wireless service providers, including AT&T Inc., Sprint Corporation and T-Mobile USA, Inc., as well as various regional wireless service providers. We also compete for retail activations with resellers that buy bulk wholesale service from facilities-based wireless service providers for resale, including resellers that buy from us. Competition is intense as a result of continuing increases in wireless market penetration levels, network investment by our competitors, the development and deployment of new technologies, the introduction of new products and services, new market entrants, the availability of additional spectrum, both licensed and unlicensed, and regulatory changes. Competition may also increase as smaller, stand-alone wireless service providers merge or transfer licenses to larger, better capitalized wireless service providers.

The wireless industry also faces competition from other communications and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. For example, Microsoft, Google, Apple and others are offering alternative means for making wireless voice calls that, in certain cases, can be used in lieu of the wireless provider's voice service, as well as alternative means of accessing video content.

We believe that the following are the most important competitive factors in our industry:

- *Network reliability, capacity and coverage.* We believe that a wireless network that consistently provides high-quality and reliable service is a key differentiator in the U.S. market and driver of customer satisfaction. Lower prices, improved service quality and new wireless service offerings, which in many cases include video content, have led to increased customer usage of wireless services, which, in turn, puts pressure on network capacity. In order to compete effectively, wireless service providers must keep pace with network capacity needs and offer highly reliable national coverage through their networks. We believe that our investments in our 4G LTE network to increase network capacity will enable us to meet consumer demand.

- *Pricing.* Service and equipment pricing play an important role in the wireless competitive landscape. As the demand for wireless services continues to grow, we and other wireless service providers are offering service plans at competitive prices that include unlimited voice minutes and text messages and a specific amount of data access in varying megabyte or gigabyte sizes or, in some cases, on an unlimited basis subject to certain restrictions. These allowances will vary from time to time as part of promotional offers or in response to market circumstances. We and many other wireless service providers also allow customers on certain plans to carry over unused data allowances to the next billing period, or to stay online at a reduced data speed after using all of a data allowance for a billing period. In addition, some wireless service providers have bundled wireless service offerings with other products while others offer promotional pricing and incentives targeted specifically to customers of Verizon Wireless.

We and other wireless service providers, as well as equipment manufacturers, offer device payment options that distinguish service pricing from equipment pricing and blur the traditional boundary between prepaid and postpaid plans. These payment options include device payment plans.

## Table of Contents

which provide customers with the ability to pay for their device over a period of time, and device leasing arrangements. Historically, wireless service providers offered customers wireless plans whereby, in exchange for the customer entering into a fixed-term service agreement, the wireless service provider significantly, and in some cases fully, subsidized the customer's device purchase. Wireless providers recovered those subsidies through higher service fees as compared to those paid by customers on device payment plans. We and many other wireless providers have limited or discontinued this form of device subsidy.

- *Customer service.* We believe that high-quality customer service is a key factor in retaining customers and attracting new customers, including those of other wireless providers. Our customer service, retention and satisfaction programs are based on providing customers with convenient and easy-to-use products and services and focusing on their needs in order to promote long-term relationships and minimize churn. Our competitors also recognize the importance of customer service and are also focused on improving in this area. As part of our efforts to transform and simplify the customer experience, we launched a new My Verizon app, which allows customers to manage their price plan, data usage, account and billing from their device. As part of our efforts to promote long-term relationships with our customers, we offer Verizon Smart Rewards, which is a program that offers a wide variety of rewards to customers in exchange for points they earn in connection with their account-related interactions with Verizon Wireless. The program offers customers discounts and savings on merchandise from well-known brands, as well as discounts and other offers at local shopping and dining venues.
- *Product and service development.* As wireless technologies develop and wireless broadband networks proliferate, continued customer and revenue growth will be increasingly dependent on the development of new and enhanced data products and services. We continue to pursue the development and rapid deployment of new and innovative wireless products and services both independently and in collaboration with application and content providers. We also collaborate with various device manufacturers in the development of distinctive smartphones and other wireless devices that can access the growing array of data applications and content available over the Internet. We continue to focus on increasing the penetration of smartphones, tablets and other connected devices throughout our customer base.
- *Sales and distribution.* The key to achieving sales success in the wireless industry is the reach and quality of sales channels and distribution points. We believe that attaining the optimal combination of varying distribution channels is important to achieving industry-leading profitability, as measured by operating income. We endeavor to increase sales through our company-operated stores, outside sales teams and telemarketing, web-based sales and fulfillment capabilities, our extensive indirect distribution network of retail outlets and prepaid replenishment locations, and through manufacturers of laptops and netbooks with embedded 4G LTE and 3G modules that can access the Internet on our network at broadband speeds. In addition, we sell network access to both traditional resellers, which resell network services to their end-users, and to various companies to enable wireless communications for their IoT devices or services.
- *Capital resources.* In order to expand the capacity and coverage of their networks and introduce new products and services, wireless service providers require significant capital resources. We generate significant cash flow from operations, as do some of our competitors.

Our success will depend on our ability to anticipate and respond to various factors affecting the wireless industry, including the factors described above, as well as new technologies, new business models, changes in customer preferences, regulatory changes, demographic trends, economic conditions and pricing strategies of competitors.

### **Wireline**

#### **Background**

Our Wireline segment provides voice, data and video communications products and enhanced services. We provide these products and services to consumers in the United States, as well as to carriers, businesses and government customers both in the United States and around the world. In 2016, Wireline revenues were \$31.3 billion, representing approximately 25% of Verizon's aggregate revenues.

#### **Strategic Transactions**

On February 5, 2015, we entered into a definitive agreement with Frontier Communications Corporation (Frontier) pursuant to which Verizon sold its local exchange business and related landline activities in California, Florida and Texas, including Fios Internet and video customers, switched and special access lines and high-speed Internet service and long distance voice accounts in these three states, for approximately \$10.5 billion (approximately \$7.3 billion net of income taxes), subject to certain adjustments and including the assumption of \$0.6 billion of indebtedness from Verizon by Frontier. The transaction, which included the acquisition by Frontier of the equity interests of Verizon's incumbent local exchange carriers (ILECs) in California, Florida and Texas, did not involve any assets or liabilities of Verizon Wireless. The transaction closed on April 1, 2016.

The transaction resulted in Frontier acquiring approximately 3.3 million voice connections, 1.6 million Fios Internet subscribers, 1.2 million Fios video subscribers and the related ILEC businesses from Verizon. Approximately 9,300 Verizon employees who served customers in California, Florida and Texas continued employment with Frontier. The operating results of these businesses are excluded from our Wireline segment for all periods presented to reflect comparable segment operating results consistent with the information regularly reviewed by our chief operating decision maker.

## Table of Contents

On February 20, 2016, we entered into a purchase agreement to acquire XO Holdings' wireline business, which owns and operates one of the largest fiber-based IP and Ethernet networks, for approximately \$1.8 billion, subject to adjustment. We completed the acquisition on February 1, 2017. Separately, we entered into an agreement to lease certain wireless spectrum from a wholly-owned subsidiary of XO Holdings that holds its wireless spectrum. Verizon has an option, exercisable under certain circumstances, to buy that subsidiary.

We are reinventing our network architecture around a common fiber platform that will support both our wireless and wireline technologies. We expect that this new "One Fiber" architecture will improve our 4G LTE coverage, speed the deployment of 5G, deliver high-speed Fios broadband to homes and businesses and create new opportunities in the small and medium business market. In April 2016, we announced our One Fiber strategy for the city of Boston. We launched One Fiber for consumer and business services to customers in Boston late in 2016.

On December 6, 2016, we entered into a definitive agreement with Equinix, Inc. pursuant to which Verizon will sell 24 customer-facing data center sites in the United States and Latin America for approximately \$3.6 billion, subject to certain adjustments. The sale does not affect Verizon's data center services delivered from 27 sites in Europe, Asia-Pacific and Canada, or its managed hosting and cloud offerings. The transaction is subject to customary regulatory approvals and closing conditions, and is expected to close during the first half of 2017.

### **Wireline Service and Product Offerings**

We organize our service and product offerings by the primary customers targeted by these offerings – mass markets, global enterprise and global wholesale.

#### ***Mass Markets***

Mass Markets operations provide broadband Internet and video services (including high-speed Internet, Fios Internet and Fios video services), and local exchange (basic service and end-user access) and long distance (including regional toll) voice services to residential and small business subscribers. In 2016, Mass Markets revenues were \$14.4 billion, representing approximately 46% of Wireline's aggregate revenues.

*Internet services.* We offer Fios Internet and high-speed Internet services with varying throughput speeds. We believe that as consumers connect more devices and stream more video, they will require increased broadband speeds. With our Fios Quantum broadband service and certain other data services, our customers can achieve symmetrical upload and download speeds of up to 500 Mbps, and we recently launched our Instant Internet service, which allows customers in certain markets to achieve symmetrical upload and download speeds of 750 Mbps and higher. As more data storage and, in some cases, processing is moved to the cloud, we believe that customers will place an increasing value on upstream performance that matches what they already receive for downloads.

*Video services.* We offer video service over our fiber-optic network. As of December 31, 2016, Fios video services were available to approximately 14 million homes across 9 states, as well as the District of Columbia. We have several offerings available to our Fios TV customers, including:

- *Fios Quantum TV*, which provides customers the ability to record up to 12 shows at once and control live TV from any room in their home;
- *Fios Custom TV*, which provides customers local versions of the Fox, CBS, NBCU, and ABC broadcast stations and other similar local content and offers customers the option of purchasing an Essentials plan that includes a base set of lifestyle, entertainment, pop culture and content for children and national news networks, or a Sports and More plan that includes national and regional sports networks as well as non-sports national networks. Customers can add more sets of categorized channels to their Custom TV package for an additional monthly fee; and
- *Fios on Demand*, which gives Fios customers the ability to watch content virtually anytime and anywhere, on any compatible device. Customers who subscribe to Fios Internet and video service also have the ability to upload their photos, music and videos to their personal Fios on Demand Library, which gives them access to this content via various data-capable devices. With the Fios Mobile App, programming, such as ESPN, TNT, Nickelodeon, HBO and TBS, can be streamed to a customer's tablet or other mobile device.

We continue to partner with major corporations to offer further interoperability with various products such as video game consoles, smart televisions and tablets. This technology further expands our initiative to provide customers with the ability to watch content anytime and anywhere on any data-capable device.

*Voice services.* We offer voice services that include local exchange, regional and long distance calling and voice messaging services, as well as Voice over Internet protocol (VoIP) services, which use the Internet or private broadband networks to transmit voice

communications.

**Global Enterprise**

Global Enterprise offers strategic services and other core communications services to medium and large business customers, including multinational corporations, as well as state and federal government customers. Global Enterprise markets these services through Verizon Enterprise Solutions. In 2016, Global Enterprise revenues were \$11.6 billion, representing approximately 37% of Wireline's aggregate revenues.

Verizon Enterprise Solutions offers an array of advanced information and communication technology services, including Global Internet Protocol (IP) network, cloud and IT solutions, and business communications, IoT, data, security and mobility services.

- *Network products and solutions* – These products and solutions primarily include our Private IP, Public Internet, Ethernet and optical networking services. Our Private IP service enables customers around the world to communicate over a virtual private network using a variety of access methods, including Ethernet and Verizon Wireless 4G LTE. Our Public Internet services provide Internet connectivity through a variety of low and high-speed options. Our Ethernet portfolio includes access services that allow customers to connect network environments around the world and enable applications and technologies to work seamlessly and with little disruption, as well as local and long distance layer 2 services that include Metro local area network (LAN), long distance switched and dedicated architectures. Optical networking services include technologies that help customers handle bandwidth demands and control their costs.

## Table of Contents

- *IT solutions and cloud services* – Our IT solutions and cloud services are built to help our enterprise customers drive innovation and business growth. We offer IT infrastructure services that include colocation and managed hosting in data centers around the globe. Our cloud services include computing, storage, backup, recovery and application platforms our customers rely on to run their business operations.
- *Business communications services* – Business communications services primarily include IP communications services, which simplify network management and drive operational efficiencies by enabling the convergence of voice and data traffic on the same access connection; dedicated Internet access, which provides enterprise customers with high-bandwidth dedicated access to Verizon's global network; unified communications and collaboration capabilities, which enable customers to communicate in real-time through VoIP and IP conferencing, and emergency communication services, which allow customers to respond effectively to emergencies while maintaining business continuity.
- *Security services* – We offer a suite of data security services to help companies secure their networks, data, applications and infrastructure from security threats while building customer trust and confidence.
- *Core services* – Core services include core voice and data services, which consist of a comprehensive portfolio of global solutions utilizing traditional telecommunications technology, such as conferencing and contact center solutions, and private line and data access networks. Core services also include providing customer premise equipment, and installation, maintenance and site services. We are continuing to transition customers out of copper-based legacy voice and data services to fiber services, including IP and Ethernet.

### **Global Wholesale**

Global Wholesale provides communications services, including data, voice, local dial tone and broadband services, primarily to local, long distance, wireless and other carriers that use our facilities to provide services to their customers. In 2016, Global Wholesale revenues were \$5.0 billion, representing approximately 16% of Wireline's aggregate revenues. A portion of Global Wholesale revenues are generated by a few large telecommunications companies, most of which compete directly with us.

Global Wholesale provides the following services, which it jointly markets with Verizon's other business units through Verizon Enterprise Solutions:

- *Data services.* We offer a robust portfolio of data services with varying speeds and options to enhance our wholesale customers' networks and provide connections to their end-users and subscribers. Our data services include high-speed digital data offerings, such as Ethernet and Wavelength services, as well as core data circuits, such as DS1s and DS3s. In addition, we receive revenue from data services that is generated from carriers that buy dedicated local exchange capacity to support their private networks.

Data services also include certain value-added business services, which leverage many of the same offerings available in the Global Enterprise portfolio, including:

- *Managed services*, which offer wholesale customers security, remote access, web applications and the opportunity to outsource the management of their networks to Verizon;
  - *Mobility offerings*, which enable wholesale customers to enhance their portfolio to triple-play or quad-play capability by leveraging wireless devices and services offered through Verizon Wireless that can be packaged and resold under their own carrier brand; and
  - *Security services*, which provide wholesale customers integrated solutions to help their enterprise end-users secure their networks and data.
- *Voice services.* We provide switched access services that allow carriers to complete their end-user calls that originate or terminate within our territory. In addition, we provide originating and terminating voice services throughout the United States and globally utilizing our time-division multiplexing (TDM) and VoIP networks.
  - *Local services.* We offer an array of local dial tone and broadband services to competitive local exchange carriers, some of which are offered to comply with telecommunications regulations. In addition, we offer services such as colocation, resale and unbundled network elements in compliance with applicable regulations.

### **Network**

Verizon operates a large and advanced telecommunications network in the United States and around the world to provide services and solutions to its customers.

- *Fios.* Our fiber-to-the-home network through which we provide our Fios residential broadband service has passed over 16.9 million premises in the United States as of December 31, 2016. Residential broadband service has seen significant growth in bandwidth demand over the past several years, and we believe that demand will continue to grow. The continued emergence of new video services, new data applications and the proliferation of IP devices in the home will continue to drive new network requirements for increased data speeds and throughput. We believe that the Passive Optical Network (PON) technology underpinning Fios makes us well positioned to meet these demands in a cost effective and efficient manner. Our PON technology provides the flexibility to adapt our network to deliver increased data speeds and new services without major overhauls or replacements to the fiber-optic infrastructure.

## Table of Contents

While deployed initially as a consumer broadband network, the PON infrastructure is also finding more widespread application in the enterprise sector, especially as businesses increasingly migrate to Ethernet-based access services.

- *Global IP.* Verizon owns and operates one of the largest global fiber networks in the world, providing connectivity to business customers in more than 150 countries. Our global IP network includes long haul, metro and submarine assets that span over 800,000 route miles and enable and support far reaching international operations.

Global business is rapidly evolving to an “everything-as-a-service” model in which business customers seek cloud-based, converged enterprise solutions delivered securely via managed and professional services. With the continued deployment of packet optical transport strategy, Verizon is creating a single, high-capacity global network platform that combines optical transport with advanced packet switching technology. The result is a global IP network that can offer powerful solutions to these service demands.

We believe that our continued focus on enhancing our domestic and global fiber-based networks, and achieving cost efficient solutions through new technology deployments, will help Verizon advance its position as a provider of choice to residential and enterprise customers.

## **Competition**

The wireline telecommunications industry is highly competitive. We expect competition to intensify further with traditional, non-traditional and emerging players seeking increased market share. Current and potential competitors include cable companies, wireless service providers, domestic and foreign telecommunications providers, satellite television companies, Internet service providers and other companies that offer network services and managed enterprise solutions.

In addition, companies with a global presence increasingly compete with our wireline businesses. A relatively small number of telecommunications and integrated service providers with global operations serve customers in the global enterprise and, to a lesser extent, the global wholesale markets. We compete with these providers for large contracts to provide integrated services to global enterprises. Many of these companies have strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition that may affect our future revenue growth.

We believe the following are the most important competitive factors and trends in the wireline industry:

- *Bandwidth (speed) and network reliability:* Consumers and small business customers are seeking to leverage high-speed connections for entertainment, communications and productivity. As online and online-enabled activities increase, so will bandwidth requirements, both downstream and upstream. To succeed, we and other network-based providers must ensure that our networks can meet these increasing bandwidth requirements. In addition, network reliability and security are increasingly important competitive factors in the global enterprise market. We continue to invest in our network to be able to meet growing bandwidth demand and provide the most reliable and secure network.
- *Pricing:* Cable operators, telecommunications companies and integrated service providers use pricing to capture market share from incumbents. Pricing is also a significant factor as non-traditional modes of providing communication services emerge and new entrants compete for customers. For example, VoIP and portal-based calling is free or nearly free to customers and is often supported by advertising revenues.
- *Customer service:* Customers expect industry-leading service from their service providers. As technologies and services evolve, the ability to excel in this area is important for customer acquisition and retention. In Mass Markets, we compete in this area through our service representatives and online support. In Global Enterprise, we provide our customers with ready access to their system and performance information, and we conduct proactive testing of our network to identify issues before they affect customers. In the Global Wholesale business, we believe service improvement can be achieved through continued system automation initiatives.
- *Product differentiation:* As a result of pricing pressures, providers need to differentiate their products and services. Customers are shifting their focus from access to applications and are seeking ways to leverage their broadband and video connections. Converged features, such as integrated wireless and wireline functionality, are becoming similarly important, driven by both customer demand and technological advancement.
- *Innovation:* The delivery of new and innovative products and services has been accelerating. To compete effectively, providers need to continuously review, improve and refine their product portfolio and develop and rapidly deploy new products and services tailored to the needs of the customer.

## Table of Contents

In the Mass Markets business, cable operators are significant competitors. Cable operators have increased the size and capacity of their networks in order to offer digital products and services. We continue to market competitive bundled offerings that include high-speed Internet access, digital television and voice services. Several major cable operators also offer bundles with wireless services through strategic relationships.

We expect customer migration from traditional voice services to wireless services to continue as a growing number of customers place greater value on mobility and wireless companies position their service as a landline alternative. We also face increasing competition from cable companies and other providers of VoIP services as well as Internet portal providers. In addition, customers have more choices for obtaining video content from various online services and that content can be accessed on a TV, computer, tablet or mobile phone.

In the global enterprise market, the customer's need to reduce technical complexity coupled with the growth opportunity created by technology convergence is driving the expansion of the competitive landscape. Major competitors include system integrators, carriers and hardware and software providers. Some of the biggest companies in IT services are making strategic acquisitions, divesting non-strategic assets or forging new alliances to be better positioned for a rebound in technology spending. Many new alliances and acquisitions have focused on emerging fields such as cloud computing, software delivery, communication applications and other computing tasks via the network, rather than on in-house machines. Carriers have also utilized acquisitions to make significant inroads into enterprise outsourcing markets that have long been dominated by the major IT outsourcers.

Global Wholesale competes with traditional carriers for long-haul, voice and IP services. In addition, mobile video and data needs are driving a greater need for wireless backhaul. Network providers, cable companies and niche players are competitors for this new revenue opportunity.

We also compete with competitive local exchange carriers (CLECs). Our telephone operations generally have been required to sell their services to CLECs at significant discounts from the prices our telephone operations charge their retail customers.

### **New Product Development and Strategic Initiatives**

Technology developments, interconnected markets, shifting consumer needs and converging industry ecosystems are creating innovative opportunities for Verizon. We are transforming around the capabilities of our high-performing networks, with a goal of future growth based on delivering what customers want and need in the new digital world. Our three tier strategy is to lead at the network connectivity level in the markets we serve, develop new business models through global platforms in digital media and IoT and deliver solutions to key industry segments for incremental monetization. To execute this strategy, we have created an organization devoted to the development of new products and the cultivation of new businesses. This organization is focused on leveraging all of our assets to create innovative products and services that can provide our customers with integrated solutions that address their needs. Several strategic initiatives have been undertaken by this organization in the areas of digital media, interactive entertainment and IoT and telematics products and services.

As a market leader in offering differentiated solutions to our connected customers across their devices at home, at work and on the go, Verizon will continue to focus on strategic partnerships as an important pillar of our future strategy. Strategic partnerships are aimed at complementing and augmenting our strengths, expanding our addressable market, accelerating our pace of innovation, enabling faster delivery of solutions such as media and IoT to the marketplace and, where possible, lowering our market and execution risk. Strong partnerships are expected to further our efforts to offer comprehensive solutions for our customers. We look to formulate strategic partnerships and alliances with a global orientation, which we believe will benefit us in terms of technology sourcing, content acquisition, consumer insights and application ecosystems.

We believe these investments will assist us in bringing innovative next generation products and services to market and uncovering new sources of revenue, increasing revenue from existing projects and leveraging our strengths across the company.

### **Digital Media and Interactive Entertainment**

Verizon has been investing in emerging technology that taps into the market shift to digital content and advertising. We have been investing in video assets and capabilities with a goal of building a global platform and developing new business models for reaching the digital video customer. We believe the growth in video consumption using mobile devices provides us with an opportunity for revenue growth. Through various acquisitions and investments and the launch of video streaming products and services, we are expanding the ways in which we can deliver content to our customers, including the following:

- In June 2015, we completed our acquisition of AOL Inc. (AOL), a leader in digital content and advertising. AOL's business model aligns with our approach, and we believe that its combination of owned and operated content properties plus a digital advertising platform enhances our ability to further develop future revenue streams. During 2015, we also acquired Millennial Media, an advertising technology business.

- In July 2016, we entered into a stock purchase agreement (the Purchase Agreement) with Yahoo! Inc. (Yahoo). Pursuant to the Purchase Agreement, upon the terms and subject to the conditions thereof, we agreed to acquire the stock of one or more subsidiaries of Yahoo holding all of Yahoo's operating business, for approximately \$4.83 billion in cash, subject to certain adjustments (the Transaction). On February 20, 2017, we entered into an amendment to the Purchase Agreement, pursuant to which, among other things, the Transaction purchase price will be reduced by \$350 million to approximately \$4.48 billion in cash, subject to certain adjustments. The Transaction is expected to provide us with a valuable portfolio of online properties and mobile applications, including market leading content in sports, finance, news and email services, which have attracted over one billion monthly active consumer views. The Transaction is expected to also expand our analytics and ad tech capabilities and enhance our competitive position and value proposition to advertisers. Additional discussion of the Transaction is included in the 2016 Verizon Annual Report to Shareowners in Note 2 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries, which is incorporated by reference into this report.

## **Table of Contents**

- In 2015, we launched go90, a mobile-first social entertainment platform that provides the opportunity for ad-supported mobile video streaming as well as subscription-based services. Digital content available on the go90 platform includes live events, popular web and television content and original content. In 2016, we introduced StreamPass, which offers streaming of live sports through go90 free of data charges to Verizon Wireless customers on certain data plans. We also introduced FreeBee Data, a sponsored data service that enables content providers to provide our customers with access to some or all of the provider's mobile content or to sponsor specific consumer actions on a per-click basis, free of data charges to the customer.
- We have made investments in converging technologies and services involving content delivery networks (CDNs), video streaming and related consumer hardware to leverage new content models. Our wireless network enables us to move towards a unified video strategy that positions us to take advantage of this growth opportunity. We began using Multimedia Broadcast Multicast Service technology to develop our LTE Multicast service, which we use to deliver live events in go90. This service has the potential to enhance our network efficiency and provide our customers with access to live streaming video content with virtually no buffering, regardless of the number of devices using the service. We also believe it is important to have rights to deliver content over a wireless network that do not require an authentication back to a subscription agreement. For example, our NFL agreement allows our customers to access certain games live on our 4G LTE network without authenticating back to any subscription.
- We continue to invest in Verizon Digital Media Services, which offers a scalable platform for delivering content, including live broadcasts, video on demand, games, software and websites, to our customers on their devices at any time. As the digital platform reshapes the delivery of media and entertainment content, there is an increasing need for a stable, high-quality video delivery platform. We are focused on providing a simple end-to-end global platform for the delivery of media to customers, which we believe will be superior to that offered by the existing and highly fragmented media delivery ecosystem. This platform is targeted at media and entertainment companies and other businesses focused on delivering their digital products and services through the Internet. We also expect, through this platform, to further integrate our Fios and wireless offerings.
- During 2016, we established Verizon Hearst Media Partners, LLC, a content joint venture with Hearst Entertainment & Syndication (Hearst), to build new multiplatform digital video channels targeted to the mobile millennial audience. In partnership with Hearst, we have also invested in two media companies, AwesomenessTV Holdings, LLC and Complex Media, Inc. & CM Partners, LLC, which are leaders in producing content targeted at key demographics, in order to further diversify our content and distribution businesses within our digital media portfolio.

## **Internet of Things and Telematics**

The adoption of IoT technology continues to grow as companies across a wide range of industries are leveraging IoT technologies to increase efficiency, gain better customer insights, facilitate compliance with regulations and build new business models. Although IoT growth is expanding broadly, adoption is particularly strong in the telematics and transportation industries, as well as the fields of smart communities, healthcare, utilities and energy management. We are building our growth capabilities in the IoT market by developing business models that monetize usage on our network at the connectivity, platform and solution layers. For example, we have developed IoT solutions that address key market needs for electric and other utilities, farms and other purveyors of food and agriculture, drug companies and others with complex supply chains. In addition, our IoT customers can turn the data that our solutions provide into actionable opportunities to develop new services and create revenue growth.

Our strategy to simplify IoT technology and accelerate its adoption also includes ThingSpace, an IoT platform. ThingSpace is designed to help developers create, test, manage and market IoT-based solutions aimed at major vertical markets, such as energy, health care and connected cities. ThingSpace comes with a portal that includes immediate access to dedicated application programming interfaces and partner development kits. In October 2016, we acquired Sensity Systems, Inc., a leading provider of IoT solutions for smart communities, in order to add a leading comprehensive suite of smart city solutions.

Through Verizon Telematics, we provide connectivity and telematics services and applications to manufacturers such as Mercedes-Benz and help businesses manage large vehicle fleets more efficiently. Our suite of real-time vehicle communications services and applications connects automobiles with content services and call centers. Our platform enables factory and aftermarket-installed automotive safety and security features as well as location-based services and vehicle diagnostics. We provide usage-based data services to new vehicles in the United States, China and Europe. Our Verizon Telematics solution provides commercial fleet managers throughout North America with real-time access to data that yields operational efficiencies, increased vehicle reliability and improved driver safety. We also provide this service to over 23,000 vehicles operated by Verizon.

In 2015, we introduced hum, an aftermarket vehicle technology and subscription service. This subscription-based service provides consumers with diagnostic technology in their vehicles, access to live assistance and roadside assistance with GPS accuracy when needed. Our hum service also offers the ability to connect with a certified mechanic to diagnose potential problems and offer solutions.

In 2016, we acquired Fleetmatics Group PLC, a global provider of fleet and mobile workforce management solutions, and Telogis, Inc., a global, cloud-based mobile enterprise management software company. We expect these acquisitions to advance our fleet telematics solutions, expand our distribution relationships and position our telematics business as a leading provider of fleet and mobile workforce management solutions globally.

## **Table of Contents**

### **Patents, Trademarks and Licenses**

We own or have licenses to various patents, copyrights, trademarks, domain names and other intellectual property rights necessary to conduct our business. We actively pursue the filing and registration of patents, copyrights, domain names, trademarks and service marks to protect our intellectual property rights within the United States and abroad. We also actively grant licenses, in exchange for appropriate fees or other consideration and subject to appropriate safeguards and restrictions, to other companies that enable them to utilize certain of our intellectual property rights and proprietary technology as part of their products and services. Such licenses enable the licensees to take advantage of the results of Verizon's research and development efforts. While these licenses result in valuable consideration being paid to us, we do not believe that the loss of such consideration, or the expiration of any of our intellectual property rights, would have a material effect on our results of operations.

We periodically receive offers from third parties to purchase or obtain licenses for patents and other intellectual property rights in exchange for royalties or other payments. We also periodically receive notices alleging that our products or services infringe on third-party patents or other intellectual property rights. These claims, whether against us directly or against third-party suppliers of products or services that we, in turn, sell to our customers, if successful, could require us to pay damages or royalties, or cease offering the relevant products or services.

### **Acquisitions and Divestitures**

Information about our acquisitions and divestitures is included in the 2016 Verizon Annual Report to Shareowners under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations - Acquisitions and Divestitures", which is incorporated by reference into this report.

### **Regulatory and Competitive Trends**

#### **Regulatory and Competitive Landscape**

Verizon operates in a regulated and highly competitive market. Current and potential competitors include other voice and data service providers such as other wireless companies, traditional telephone companies, cable companies, Internet service providers, software and application providers, and other non-traditional companies. Many of these companies have strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition that may affect our future revenue growth. Some of our competitors also are subject to fewer regulatory constraints than Verizon. For many services offered by Verizon, the FCC is our primary regulator. The FCC has jurisdiction over interstate telecommunications services and other matters under the Communications Act of 1934, as amended (Communications Act or Act). Other Verizon services are subject to state and local regulation.

#### **Federal Regulation**

##### *Wireless Services*

The FCC regulates several aspects of our wireless operations. Generally, the FCC has jurisdiction over the construction, operation, acquisition and transfer of wireless communications systems. All wireless services require use of radio frequency spectrum, the assignment and distribution of which is subject to FCC oversight. Verizon anticipates that it will need additional spectrum to meet future demand. We can meet our needs for licensed spectrum by purchasing licenses or leasing spectrum from others, or by participating in a competitive bidding process to acquire new spectrum from the FCC. Those processes are subject to certain reviews, approvals and potential conditions.

Today, Verizon holds FCC spectrum licenses that allow it to provide a wide range of mobile and fixed communications services, including both voice and data services. FCC spectrum licenses typically have a term of 10 years, at which time they are subject to renewal. While the FCC has routinely renewed all of Verizon's wireless licenses, challenges could be raised in the future. If a wireless license was revoked or not renewed, Verizon would not be permitted to provide services on the spectrum covered by that license. Some of our licenses require us to comply with so-called "open access" FCC regulations, which generally require licensees of particular spectrum to allow customers to use devices and applications of their choice, subject to certain technical limitations. The FCC has also imposed certain specific mandates on wireless carriers, including construction and geographic coverage requirements, technical operating standards, provision of enhanced 911 services, roaming obligations and requirements for wireless tower and antenna facilities.

##### *Broadband*

Verizon offers many different broadband services. Traditionally, the FCC recognized that broadband Internet access services as "information services" subject to a "light touch" regulatory approach rather than to the traditional, utilities-style regulations. In 2015, the FCC reversed course and declared that broadband Internet access services are "telecommunications services" subject to common carriage regulation under Title II of the Communications Act. This decision created uncertainty concerning the level of regulation that will apply to

broadband services. It created a risk that such regulation would limit the ways that broadband Internet access service providers structure their business arrangements and manage their networks and could spur additional restrictions, including rate regulation, that could adversely affect broadband investment and innovation. The FCC's decision was affirmed by the United States Court of Appeals, but may be subject to further challenge in the courts. In addition, Congress and the FCC are likely to continue to debate the proper scope of such regulations. Regardless of regulation, Verizon remains committed to the open Internet which provides consumers with competitive choices and unblocked access to lawful websites and content when, where, and how they want, and our commitment to our customers can be found on our website at <http://responsibility.verizon.com/broadband-commitment>.

## **Table of Contents**

### *Wireline Voice*

Verizon offers many different wireline voice services, including traditional telephone service and other services that rely on technologies such as VoIP. For regulatory purposes, legacy telephone services are generally considered to be “common carrier” services. Common carrier services are subject to heightened regulatory oversight with respect to rates, terms and conditions and other aspects of the services. The FCC has not decided the regulatory classification of VoIP but has said VoIP service providers must comply with certain rules, such as 911 capabilities and law enforcement assistance requirements.

### *Video*

Verizon offers a multichannel video service that is regulated like traditional cable service. The FCC has a body of rules that apply to cable operators, and these rules also generally apply to Verizon. In areas where Verizon offers its facilities-based multichannel video services, Verizon has typically been required to obtain a franchise from local authorities.

### *Privacy and Data Security*

We are subject to federal, state and international laws and regulations relating to privacy and data security that impact all parts of our business, including voice, wireless, broadband and the development and roll out of new products, such as those in the IoT space. At the federal level, much of our business is subject to the FCC’s privacy and data security requirements. In November 2016, the FCC released new privacy and data security rules that will apply to all telecommunications services, including our fixed and mobile voice and broadband services. Other parts of our business are subject to the privacy and data security oversight of other federal regulators, including the Federal Trade Commission. Generally, attention to privacy and data security requirements is increasing at both the state and federal level. In addition, a new data protection regulation will go into effect in Europe in May 2018 that includes significant penalties for non-compliance.

### *Public Safety and Cybersecurity*

The FCC has played a role in addressing public safety concerns by regulating emergency communications services and mandating widespread availability of both media (broadcast/cable) and wireless emergency alerting services. In response to recent cyber attacks, however, the FCC or other regulators may attempt to increase regulation of the cybersecurity practices of providers.

### *Inter-carrier Compensation and Network Access*

The FCC regulates some of the rates that carriers pay each other for the exchange of voice traffic (particularly traditional wireline traffic) over different networks and other aspects of interconnection for some voice services. The FCC also regulates some of the rates and terms and conditions for certain wireline “business data services” and other services and network facilities. Verizon is both a seller and a buyer of these services, and both makes and receives interconnection payments. The FCC has focused in recent years on whether changes in the rates, terms and conditions for both the exchange of traffic and for business data services may be appropriate.

## **State Regulation and Local Regulation**

### *Wireless Services*

The Act generally preempts regulation by state and local governments of the entry of, or the rates charged by, wireless carriers. The Act does not prohibit states from regulating the other “terms and conditions” of wireless service. For example, some states attempt to regulate wireless customer billing matters and impose reporting requirements. Several states also have laws or regulations that address safety issues (e.g., use of wireless handsets while driving) and taxation matters. In addition, wireless tower and antenna facilities are often subject to state and local zoning and land use regulation, and securing approvals for new or modified facilities is often a lengthy and expensive process.

### *Wireline Services*

State public utility commissions regulate Verizon’s telephone operations with respect to certain telecommunications intrastate matters. Verizon operates as an “incumbent local exchange carrier” in nine states and the District of Columbia. These incumbent operations are subject to various levels of pricing flexibility and other state oversight and requirements. Verizon also has other wireline operations that are more lightly regulated. In addition, as a video services operator in many states, Verizon has been required to obtain a cable franchise from local government entities, or in some cases a state-wide franchise, and comply with certain one-time and ongoing obligations, as a result.

**Table of Contents****Environmental Matters**

Reserves have been established to cover environmental matters relating to discontinued businesses and past telecommunications activities. These reserves include funds to address contamination at the site of a former Sylvania facility in Hicksville, NY, which had processed nuclear fuel rods in the 1950s and 1960s. In September 2005, the Army Corps of Engineers (ACE) accepted the site into its Formerly Utilized Sites Remedial Action Program. As a result, the ACE has taken primary responsibility for addressing the contamination at the site. An adjustment to the reserves may be made after a cost allocation is conducted with respect to the past and future expenses of all of the parties. Adjustments to the environmental reserve may also be made based upon the actual conditions found at other sites requiring remediation.

**Executive Officers**

See Part III, Item 10. "Directors, Executive Officers and Corporate Governance" of this Annual Report on Form 10-K for information about our executive officers.

**Employees**

As of December 31, 2016, Verizon and its subsidiaries had approximately 160,900 employees. Unions represent approximately 23% of our employees.

**Information on Our Internet Website**

We make available, free of charge on our website, our annual reports on Form 10-K and Form SD, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports at <http://www.verizon.com/about/investors>.

## Table of Contents

### **Cautionary Statement Concerning Forward-Looking Statements**

In this report we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words "anticipates," "believes," "estimates," "hopes" or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

The following important factors, along with those discussed elsewhere in this report and in other filings with the Securities and Exchange Commission (SEC), could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

- adverse conditions in the U.S. and international economies;
- the effects of competition in the markets in which we operate;
- material changes in technology or technology substitution;
- disruption of our key suppliers' provisioning of products or services;
- changes in the regulatory environment in which we operate, including any increase in restrictions on our ability to operate our networks;
- breaches of network or information technology security, natural disasters, terrorist attacks or acts of war or significant litigation and any resulting financial impact not covered by insurance;
- our high level of indebtedness;
- an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations or adverse conditions in the credit markets affecting the cost, including interest rates, and/or availability of further financing;
- material adverse changes in labor matters, including labor negotiations, and any resulting financial and/or operational impact;
- significant increases in benefit plan costs or lower investment returns on plan assets;
- changes in tax laws or treaties, or in their interpretation;
- changes in accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings;
- the inability to implement our business strategies; and
- the inability to realize the expected benefits of strategic transactions.

## **Table of Contents**

### *Item 1A. Risk Factors*

*The following discussion of "Risk Factors" identifies the most significant factors that may adversely affect our business, operations, financial condition or future performance. This information should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Result of Operations" and the consolidated financial statements and related notes. The following discussion of risks is not all-inclusive but is designed to highlight what we believe are important factors to consider when evaluating our business and expectations. These factors could cause our future results to differ materially from our historical results and from expectations reflected in forward-looking statements.*

#### ***Adverse conditions in the U.S. and international economies could impact our results of operations.***

Unfavorable economic conditions, such as a recession or economic slowdown in the United States or elsewhere, could negatively affect the affordability of and demand for some of our products and services. In difficult economic conditions, consumers may seek to reduce discretionary spending by forgoing purchases of our products, electing to use fewer higher margin services or obtaining lower-cost products and services offered by other companies. Similarly, under these conditions, the business customers that we serve may delay purchasing decisions, delay full implementation of service offerings or reduce their use of services. In addition, adverse economic conditions may lead to an increased number of our consumer and business customers that are unable to pay for services. If these events were to occur, it could have a material adverse effect on our results of operations.

#### ***We face significant competition that may reduce our profits.***

We face significant competition in our industry. The rapid development of new technologies, services and products has eliminated many of the traditional distinctions among wireless, cable, Internet, local and long distance communication services and brought new competitors to our markets, including other telephone companies, cable companies, wireless service providers, satellite providers, application and device providers and providers of VoIP services. While these changes have enabled us to offer new types of products and services, they have also allowed other providers to broaden the scope of their own competitive offerings. In addition, wireless service providers are significantly altering the financial relationships with their customers through commercial offers that vary service and device pricing, promotions, incentives and levels of service provided – in some cases specifically targeting Verizon Wireless customers. Our ability to compete effectively will depend on, among other things, our network quality, capacity and coverage, the pricing of our products and services, the quality of our customer service, our development of new and enhanced products and services, the reach and quality of our sales and distribution channels and our capital resources. It will also depend on how successfully we anticipate and respond to various factors affecting our industry, including new technologies and business models, changes in consumer preferences and demand for existing services, demographic trends and economic conditions. If we are not able to respond successfully to these competitive challenges, we could experience reduced profits.

#### ***If we are not able to adapt to changes and disruptions in technology and address changing consumer demand on a timely basis, we may experience a decline in the demand for our services, be unable to implement our business strategy and experience reduced profits.***

Our industry is rapidly changing as new technologies are developed that offer consumers an array of choices for their communications needs and allow new entrants into the markets we serve. In order to grow and remain competitive, we will need to adapt to future changes in technology, enhance our existing offerings and introduce new offerings to address our customers' changing demands. If we are unable to meet future challenges from competing technologies on a timely basis or at an acceptable cost, we could lose customers to our competitors. We may not be able to accurately predict technological trends or the success of new services in the market. In addition, there could be legal or regulatory restraints on our introduction of new services. If our services fail to gain acceptance in the marketplace, or if costs associated with the implementation and introduction of these services materially increase, our ability to retain and attract customers could be adversely affected.

In addition to introducing new technologies and offerings, we must phase out outdated and unprofitable technologies and services. If we are unable to do so on a cost-effective basis, we could experience reduced profits. In addition, there could be legal or regulatory restraints on our ability to phase out current services.

#### ***We depend on key suppliers and vendors to provide equipment that we need to operate our business.***

We depend on various key suppliers and vendors to provide us, directly or through other suppliers, with equipment and services, such as switch and network equipment, smartphones and other wireless devices, that we need in order to operate our business and provide products to our customers. For example, our smartphone and other device suppliers often rely on one vendor for the manufacture and supply of critical components, such as chipsets, used in their devices. If these suppliers or vendors fail to provide equipment or service on a timely basis or fail to meet our performance expectations, we may be unable to provide products and services as and when requested by our customers. We also may be unable to continue to maintain or upgrade our networks. Because of the cost and time lag that can be associated with transitioning from one supplier to another, our business could be substantially disrupted if we were required to, or chose

to, replace the products or services of one or more major suppliers with products or services from another source, especially if the replacement became necessary on short notice. Any such disruption could increase our costs, decrease our operating efficiencies and have a material adverse effect on our business, results of operations and financial condition.

The suppliers and vendors on which we rely may also be subject to litigation with respect to technology on which we depend, including litigation involving claims of patent infringement. Such claims are frequently made in the communications industry. We are unable to predict whether our business will be affected by any such litigation. We expect our dependence on key suppliers to continue as we develop and introduce more advanced generations of technology.

## Table of Contents

### ***Changes in the regulatory framework under which we operate could adversely affect our business prospects or results of operations.***

Our domestic operations are subject to regulation by the FCC and other federal, state and local agencies, and our international operations are regulated by various foreign governments and international bodies. These regulatory regimes frequently restrict or impose conditions on our ability to operate in designated areas and provide specified products or services. We are frequently required to maintain licenses for our operations and conduct our operations in accordance with prescribed standards. We are often involved in regulatory and other governmental proceedings or inquiries related to the application of these requirements. It is impossible to predict with any certainty the outcome of pending federal and state regulatory proceedings relating to our operations, or the reviews by federal or state courts of regulatory rulings. Without relief, existing laws and regulations may inhibit our ability to expand our business and introduce new products and services. Similarly, we cannot guarantee that we will be successful in obtaining the licenses needed to carry out our business plan or in maintaining our existing licenses. For example, the FCC grants wireless licenses for terms generally lasting 10 years, subject to renewal. The loss of, or a material limitation on, certain of our licenses could have a material adverse effect on our business, results of operations and financial condition.

New laws or regulations or changes to the existing regulatory framework at the federal, state and local, or international level could restrict the ways in which we manage our wireline and wireless networks, impose additional costs, impair revenue opportunities and potentially impede our ability to provide services in a manner that would be attractive to us and our customers. For example, we are subject to federal, state and international laws related to privacy and data protection. A new data protection regulation will go into effect in Europe in May 2018 that includes significant penalties for non-compliance. In addition, in its order imposing so-called "network neutrality" regulations, the FCC reversed course in 2015 on the longstanding "light touch" approach and "reclassified" broadband Internet access services as telecommunications services subject to utilities-style common carriage regulation. While the full scope and effect of this new regulatory approach is uncertain, these rules limit the ways that a broadband Internet access service provider can structure business arrangements, manage its network and open the door to additional restrictions, including rate regulation that could adversely affect broadband investment and innovation. These rules may be subject to further challenge in the courts and the proper scope of such regulations is being debated in Congress and the FCC, but the outcome and timing of those challenges and debates remain uncertain. As another example, we hold certain wireless licenses that require us to comply with so-called "open access" FCC regulations, which generally require licensees of particular spectrum to allow customers to use devices and applications of their choice. Moreover, certain services could be subject to conflicting regulation by the FCC and/or various state and local authorities, which could significantly increase the cost of implementing and introducing new services. The further regulation of broadband, wireless and our other activities and any related court decisions could restrict our ability to compete in the marketplace and limit the return we can expect to achieve on past and future investments in our networks.

### ***Cyber attacks impacting our networks or systems could have an adverse effect on our business.***

Cyber attacks, including through the use of malware, computer viruses, dedicated denial of services attacks, credential harvesting and other means for obtaining unauthorized access to or disrupting the operation of our networks and systems and those of our suppliers, vendors and other service providers, could have an adverse effect on our business. Cyber attacks may cause equipment failures, loss of information, including sensitive personal information of customers or employees or valuable technical and marketing information, as well as disruptions to our or our customers' operations. Cyber attacks against companies, including Verizon, have increased in frequency, scope and potential harm in recent years. Further, the perpetrators of cyber attacks are not restricted to particular groups or persons. These attacks may be committed by company employees or external actors operating in any geography, including jurisdictions where law enforcement measures to address such attacks are unavailable or ineffective, and may even be launched by or at the behest of nation states. While, to date, we have not been subject to cyber attacks which, individually or in the aggregate, have been material to our operations or financial condition, the preventive actions we take to reduce the risks associated with cyber attacks, including protection of our systems and networks, may be insufficient to repel or mitigate the effects of a major cyber attack in the future.

The inability to operate our networks and systems or those of our suppliers, vendors and other service providers as a result of cyber attacks, even for a limited period of time, may result in significant expenses to Verizon and/or a loss of market share to other communications providers. The costs associated with a major cyber attack on Verizon could include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and the use of alternate resources, lost revenues from business interruption and litigation. The potential costs associated with these attacks could exceed the insurance coverage we maintain. Further, certain of Verizon's businesses, such as those offering security solutions and infrastructure and cloud services to business customers, could be negatively affected if our ability to protect our own networks and systems is called into question as a result of a cyber attack. Moreover, our increasing presence in the IoT industry with offerings of telematics products and services, including vehicle telematics, could also increase our exposure to potential costs and expenses and reputational harm in the event of cyber attacks impacting these products or services. In addition, a compromise of security or a theft or other compromise of valuable information, such as financial data and sensitive or private personal information, could result in lawsuits and government claims,

investigations or proceedings. Any of these occurrences could damage our reputation, adversely impact customer and investor confidence, and could further result in a material adverse effect on Verizon's results of operation or financial condition.

*Natural disasters, terrorist acts or acts of war could cause damage to our infrastructure and result in significant disruptions to our operations.*

Our business operations are subject to interruption by natural disasters, power outages, terrorist attacks, other hostile acts and events beyond our control. Such events could cause significant damage to our infrastructure upon which our business operations rely, resulting in degradation or disruption of service to our customers. While we maintain insurance coverage for some of these events, the potential liabilities associated with these events could exceed the insurance coverage we maintain. Our system redundancy may be ineffective or inadequate, and our disaster recovery

## **Table of Contents**

planning may not be sufficient for all eventualities. These events could also damage the infrastructure of the suppliers that provide us with the equipment and services that we need to operate our business and provide products to our customers. A natural disaster or other event causing significant physical damage could cause us to experience substantial losses resulting in significant recovery time and expenditures to resume operations. In addition, these occurrences could result in lost revenues from business interruption as well as damage to our reputation.

### ***Verizon has significant debt, which could increase further if Verizon incurs additional debt in the future and does not retire existing debt.***

As of December 31, 2016, Verizon had approximately \$108.1 billion of outstanding indebtedness, as well as approximately \$8.9 billion of unused borrowing capacity under its existing credit facility. Verizon's debt level and related debt service obligations could have negative consequences, including:

- requiring Verizon to dedicate significant cash flow from operations to the payment of principal, interest and other amounts payable on its debt and the preferred stock issued by an entity acquired in a transaction with Vodafone, which would reduce the funds Verizon has available for other purposes, such as working capital, capital expenditures and acquisitions;
- making it more difficult or expensive for Verizon to obtain any necessary future financing for working capital, capital expenditures, debt service requirements, debt refinancing, acquisitions or other purposes;
- reducing Verizon's flexibility in planning for or reacting to changes in its industry and market conditions;
- making Verizon more vulnerable in the event of a downturn in its business; and
- exposing Verizon to increased interest rate risk to the extent that its debt obligations are at variable interest rates.

In addition, our term loan agreements require Verizon to maintain a certain leverage ratio unless Verizon's credit ratings are at or above a certain level, which could limit Verizon's ability to obtain additional financing in the future.

### ***Adverse changes in the credit markets could increase our borrowing costs and the availability of financing.***

We require a significant amount of capital to operate and grow our business. We fund our capital needs in part through borrowings in the public and private credit markets. Adverse changes in the credit markets, including increases in interest rates, could increase our cost of borrowing and/or make it more difficult for us to obtain financing for our operations or refinance existing indebtedness. In addition, our borrowing costs can be affected by short- and long-term debt ratings assigned by independent rating agencies, which are based, in significant part, on our performance as measured by customary credit metrics. A decrease in these ratings would likely increase our cost of borrowing and/or make it more difficult for us to obtain financing. A severe disruption in the global financial markets could impact some of the financial institutions with which we do business, and such instability could also affect our access to financing.

### ***Increases in costs for pension benefits and active and retiree healthcare benefits may reduce our profitability and increase our funding commitments.***

With approximately 160,900 employees and approximately 201,000 retirees as of December 31, 2016 eligible to participate in Verizon's benefit plans, the costs of pension benefits and active and retiree healthcare benefits have a significant impact on our profitability. Our costs of maintaining these plans, and the future funding requirements for these plans, are affected by several factors, including the legislative and regulatory uncertainty regarding the potential repeal and replacement or modification of the Patient Protection and Affordable Care Act, increases in healthcare costs, decreases in investment returns on funds held by our pension and other benefit plan trusts and changes in the discount rate and mortality assumptions used to calculate pension and other postretirement expenses. If we are unable to limit future increases in the costs of our benefit plans, those costs could reduce our profitability and increase our funding commitments.

### ***A significant portion of our workforce is represented by labor unions, and we could incur additional costs or experience work stoppages as a result of the renegotiation of our labor contracts.***

As of December 31, 2016, approximately 23% of our workforce was represented by labor unions. While less than 1% of the workforce of our wireless and other businesses outside of wireline are represented by unions, we cannot predict what level of success unions may have in organizing these workforces or the potentially negative impact it would have on our costs.

### ***We are subject to a significant amount of litigation, which could require us to pay significant damages or settlements.***

We are subject to a substantial amount of litigation, including, from time to time, shareholder derivative suits, patent infringement lawsuits, antitrust class actions, wage and hour class actions, personal injury claims and lawsuits relating to our advertising, sales, billing and collection practices. In addition, our wireless business also faces personal injury and consumer class action lawsuits relating to alleged

health effects of wireless phones or radio frequency transmitters, and class action lawsuits that challenge marketing practices and disclosures relating to alleged adverse health effects of handheld wireless phones. We may incur significant expenses in defending these lawsuits. In addition, we may be required to pay significant awards or settlements.

**Table of Contents***Item 1B. Unresolved Staff Comments*

None.

*Item 2. Properties*

Our principal properties do not lend themselves to simple description by character and location. Our total investment in plant, property and equipment was approximately \$232 billion at December 31, 2016 and \$220 billion at December 31, 2015, including the effect of retirements, but before deducting accumulated depreciation. Our gross investment in plant, property and equipment consisted of the following:

At December 31,	2016	2015
Network equipment	78.5%	78.8%
Land, buildings and building equipment	12.0%	11.9%
Furniture and other	9.5%	9.3%
	100.0%	100.0%

Our properties as a percentage of total properties are as follows:

At December 31,	2016	2015
Wireline	51.7%	53.2%
Wireless	46.8%	45.4%
Other	1.5%	1.4%
	100.0%	100.0%

Network equipment consists primarily of cable (aerial, buried, underground or undersea) and the related support structures of poles and conduit, wireless plant, switching equipment, network software, transmission equipment and related facilities. Land, buildings and building equipment consists of land and land improvements, central office buildings or any other buildings that house network equipment, and buildings that are used for administrative and other purposes. Substantially all the switching centers are located on land and in buildings we own due to their critical role in the network and high set-up relocation costs. We also maintain facilities throughout the United States comprised of administrative and sales offices, customer care centers, retail sales locations, garage work centers, switching centers, cell sites and data centers. Furniture and other consists of telephone equipment, furniture, data processing equipment, office equipment, motor vehicles, plant under construction and leasehold improvements.

*Item 3. Legal Proceedings*

In October 2013, the California Attorney General's Office notified Verizon California Inc. and other Verizon companies of potential violations of California state hazardous waste statutes primarily arising from the disposal of electronic components, batteries and aerosol cans at certain California facilities. We are cooperating with this investigation and continue to review our operations relating to the management of hazardous waste. While penalties relating to the alleged violations could exceed \$100,000, we do not expect that any penalties ultimately incurred will be material. On April 1, 2016, we completed the sale to Frontier of our landline business operated by Verizon California Inc. and certain other Verizon landline companies. As a result of this transaction, Frontier now owns and operates Verizon California Inc. and has assumed the liabilities of Verizon California Inc. that may arise as a result of these alleged violations.

### PART II

#### *Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

The principal market for trading in the common stock of Verizon is the New York Stock Exchange. As of December 31, 2016, there were 690,741 shareowners of record.

High and low stock prices, as reported on the New York Stock Exchange composite tape of transactions, and dividend data are as follows:

	Market Price		Cash Dividend Declared
	High	Low	
2016 Fourth Quarter	\$ 53.90	\$ 46.01	\$ .5775
Third Quarter	56.95	51.02	.5775
Second Quarter	55.92	49.05	.5650
First Quarter	54.37	43.79	.5650
2015 Fourth Quarter	\$ 47.23	\$ 42.20	\$ .5650
Third Quarter	48.26	38.06	.5650
Second Quarter	50.86	46.60	.5500
First Quarter	49.99	45.37	.5500

#### **Stock Repurchases**

In March 2014, the Verizon Board of Directors authorized a three-year share buyback program to repurchase up to 100 million shares of the Company's common stock. Under the program, shares may be repurchased in privately negotiated transactions and on the open market, including through plans complying with Rule 10b5-1(c) under the Exchange Act. The timing and number of shares purchased under the program, if any, will depend on market conditions and the Company's capital allocation priorities.

During the fourth quarter of 2016, Verizon did not repurchase any shares of Verizon common stock. At December 31, 2016, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 97.2 million.

#### *Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

## Table of Contents

### *Item 9A. Controls and Procedures*

Our chief executive officer and chief financial officer have evaluated the effectiveness of the registrant's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), as of the end of the period covered by this Annual Report, that ensure that information relating to the registrant which is required to be disclosed in this report is recorded, processed, summarized and reported within required time periods using the criteria for effective internal control established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013. Based on this evaluation, our chief executive officer and chief financial officer have concluded that the registrant's disclosure controls and procedures were effective as of December 31, 2016.

In the ordinary course of business, we routinely review our system of internal control over financial reporting and make changes to our systems and processes that are intended to ensure an effective internal control environment. There were no changes in the Company's internal control over financial reporting during the fourth quarter of 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's report on internal control over financial reporting and the attestation report of Verizon's independent registered public accounting firm are included in the 2016 Verizon Annual Report to Shareowners and are incorporated herein by reference.

### *Item 9B. Other Information*

None.

## PART III

### *Item 10. Directors, Executive Officers and Corporate Governance*

Set forth below is information with respect to our executive officers.

Name	Age	Office	Held Since
Lowell C. McAdam	62	Chairman and Chief Executive Officer	2011
Matthew D. Ellis	45	Executive Vice President and Chief Financial Officer	2016
Roger Gurmani	56	Executive Vice President and Chief Information and Technology Architect	2015
Marc C. Reed	58	Executive Vice President and Chief Administrative Officer	2012
Diego Scotti	44	Executive Vice President and Chief Marketing Officer	2014
Craig L. Silliman	49	Executive Vice President of Public Policy and General Counsel	2015
Anthony T. Skiadas	48	Senior Vice President and Controller	2013
John G. Stratton	55	Executive Vice President and President of Operations	2015
Marni M. Walden	49	Executive Vice President and President of Product Innovation and New Businesses	2015

Prior to serving as an executive officer, each of the above officers has held high-level managerial positions with the Company or one of its subsidiaries for at least five years, with the exception of Mr. Ellis, who has been with the Company since 2013 and Mr. Scotti, who has been with the Company since 2014. Officers are not elected for a fixed term of office and may be removed from office at any time at the discretion of the Board of Directors.

Matthew D. Ellis is the Executive Vice President and Chief Financial Officer for Verizon. Mr. Ellis served as Senior Vice President and CFO of Operations - Finance of the Company from February 2015 until the appointment to his current role in November 2016 and as Senior Vice President and Treasurer of the Company from the time he joined the Company in 2013 until February 2015. Prior to joining Verizon, Mr. Ellis served in leadership positions at Tyson Foods, Inc. for 15 years, most recently as Vice President and Treasurer responsible for financing, cash management, insurance and credit.

Diego Scotti is Executive Vice President and Chief Marketing Officer for Verizon. Mr. Scotti joined the company in October 2014. Prior to joining Verizon, Mr. Scotti served as Chief Marketing Officer of J. Crew from 2011 to 2014 and as Executive Director of Marketing at Conde Nast Publications, where he oversaw 20 print and digital media brands, from 2008 to 2011. Mr. Scotti also previously served as the head of global advertising and brand management at American Express.

## Table of Contents

For other information required by this item, see the sections entitled “Governance — Where to find more information on governance at Verizon and — Business conduct and ethics,” “Item 1: Election of Directors — Director nominations,” “Board and Committees — Board committees” and “Stock Ownership — Section 16(a) Beneficial Ownership Reporting Compliance” in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2017 Annual Meeting of Shareholders, which are incorporated herein by reference.

### *Item 11. Executive Compensation*

For information with respect to executive compensation, see the sections entitled “Executive Compensation — Compensation Discussion and Analysis, — Compensation Committee Report and — Compensation Tables” in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2017 Annual Meeting of Shareholders, which is incorporated by reference. There were no relationships to be disclosed under paragraph (e)(4) of Item 407 of Regulation S-K.

### *Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

For information with respect to the security ownership of the Directors and executive officers and for information with respect to securities authorized for issuance under Verizon’s equity compensation plan, see the sections entitled “Stock Ownership — Security Ownership of Certain Beneficial Owners and Management” and “Item 5: Approval of Verizon’s 2017 Long-Term Incentive Plan,” respectively, in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2017 Annual Meeting of Shareholders, which is incorporated herein by reference.

### *Item 13. Certain Relationships and Related Transactions, and Director Independence*

For information with respect to certain relationships and related transactions and Director independence, see the sections entitled “Governance — Related person transactions” and “Item 1: Election of Directors — Independence” in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2017 Annual Meeting of Shareholders, which are incorporated by reference.

### *Item 14. Principal Accounting Fees and Services*

For information with respect to principal accounting fees and services, see the section entitled “Audit Matters — Item 2: Ratification of Appointment of Independent Registered Public Accounting Firm” in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2017 Annual Meeting of Shareholders, which are incorporated by reference.

Table of Contents**Schedule II - Valuation and Qualifying Accounts****Verizon Communications Inc. and Subsidiaries**

For the Years Ended December 31, 2016, 2015 and 2014

(dollars in millions)

Description	Balance at Beginning of Period	Additions		Deductions Note (c)(d)	Balance at End of Period
		Charged to Expenses	Charged to Other Accounts Note (a)(b)		
Allowance for Uncollectible Accounts Receivable:					
Year 2016 (e)	\$ 1,037	\$ 1,420	\$ 204	\$ 1,515	\$ 1,146
Year 2015 (e)	739	1,610	200	1,512	1,037
Year 2014	645	1,095	141	1,142	739
Valuation Allowance for Deferred Tax Assets:					
Year 2016	\$ 3,414	\$ 146	\$ 47	\$ 1,134	\$ 2,473
Year 2015	1,841	237	1,701	365	3,414
Year 2014	1,685	505	5	354	1,841

- (a) Allowance for Uncollectible Accounts Receivable primarily includes amounts previously written off which were credited directly to this account when recovered.
- (b) Valuation Allowance for Deferred Tax Assets includes an increase to the valuation allowance as a result of the acquisition of AOL in 2015 and amounts charged to equity and reclassifications from other balance sheet accounts.
- (c) Amounts written off as uncollectible or transferred to other accounts or utilized.
- (d) Reductions to valuation allowances related to deferred tax assets.
- (e) Allowance for Uncollectible Accounts Receivable includes approximately \$301 million and \$155 million at December 31, 2016 and 2015, respectively, related to long-term device payment plan receivables.

**PART I****ITEM 1. BUSINESS****GENERAL**

AT&T Inc. ("AT&T," "we" or the "Company") is a holding company incorporated under the laws of the State of Delaware in 1983 and has its principal executive offices at 208 S. Akard St., Dallas, Texas, 75202 (telephone number 210-821-4105). We maintain an internet website at [www.att.com](http://www.att.com). (This website address is for information only and is not intended to be an active link or to incorporate any website information into this document.) We make available, free of charge, on our website our annual report on Form 10-K, our quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the Securities and Exchange Commission (SEC). We also make available on that website, and in print, if any stockholder or other person so requests, our "Code of Ethics" applicable to all employees and Directors, our "Corporate Governance Guidelines," and the charters for all committees of our Board of Directors, including Audit, Human Resources and Corporate Governance and Nominating. Any changes to our Code of Ethics or waiver of our Code of Ethics for senior financial officers, executive officers or Directors will be posted on that website.

**History**

AT&T, formerly known as SBC Communications Inc. (SBC), was formed as one of several regional holding companies created to hold AT&T Corp.'s (ATTC) local telephone companies. On January 1, 1984, we were spun-off from ATTC pursuant to an anti-trust consent decree, becoming an independent publicly-traded telecommunications services provider. At formation, we primarily operated in five southwestern states. Our subsidiaries merged with Pacific Telesis Group in 1997, Southern New England Telecommunications Corporation in 1998 and Ameritech Corporation in 1999, thereby expanding our wireline operations as the incumbent local exchange carrier (ILEC) into a total of 13 states. In November 2005, one of our subsidiaries merged with ATTC, creating one of the world's leading telecommunications providers. In connection with the merger, we changed the name of our company from "SBC Communications Inc." to "AT&T Inc." In December 2006, one of our subsidiaries merged with BellSouth Corporation (BellSouth) making us the ILEC in an additional nine states. With the BellSouth acquisition, we also acquired BellSouth's 40 percent economic interest in AT&T Mobility LLC (AT&T Mobility), formerly Cingular Wireless LLC, resulting in 100 percent ownership of AT&T Mobility. In 2014, we completed the acquisition of wireless provider Leap Wireless International, Inc. (Leap) and sold our ILEC operations in Connecticut, which we had previously acquired in 1998. In 2015, we completed acquisitions of wireless properties in Mexico and DIRECTV, a leading provider of digital television entertainment services in both the United States and Latin America. Our services and products are marketed under the AT&T, Cricket, DIRECTV, SKY, and Unefon brand names.

**Scope**

We are a leading provider of communications and digital entertainment services in the United States and the world. We offer our services and products to consumers in the U.S., Mexico and Latin America and to businesses and other providers of telecommunications services worldwide. We also own and operate three regional TV sports networks, and retain non-controlling interests in another regional sports network and a network dedicated to game-related programming as well as internet interactive game playing.

The services and products that we offer vary by market, and include: wireless communications, data/broadband and internet services, digital video services, local and long-distance telephone services, telecommunications equipment, managed networking, and wholesale services. Our operating subsidiaries are organized as follows, corresponding to our operating segments for financial reporting purposes:

- Business Solutions business units provide services to business customers, including multinational companies; governmental and wholesale customers; and individual subscribers who purchase wireless services through employer-sponsored plans. We provide advanced IP-based services including Virtual Private Networks (VPN); Ethernet-related products and broadband, collectively referred to as fixed strategic services; as well as traditional data and voice products. We utilize our wireless and wired networks (referred to as "wired" or "wireline") to provide a complete integrated communications solution to our business customers.
- Entertainment Group business units provide video, internet, voice communication, and interactive and targeted advertising services to customers located in the United States or in U.S. territories. We utilize our copper and IP-based network and/or our satellite technology.
- Consumer Mobility business units provide nationwide wireless service to consumers, and wholesale and resale subscribers located in the United States or in U.S. territories. We utilize our network to provide voice and data services, including high-speed internet, video and home-monitoring services over wireless devices.

**AT&T Inc.**

---

- International business units provide entertainment services in Latin America and wireless services in Mexico. Video entertainment services are provided to primarily residential customers using satellite technology. We utilize our regional and national wireless networks in Mexico to provide consumer and business customers with wireless data and voice communication services.

Our Corporate and Other unit includes (1) operations that are not considered reportable segments and that are no longer integral to our operations or which we no longer actively market, and (2) impacts of corporate-wide decisions for which the individual operating segments are not being evaluated, including interest costs and expected return on plan assets for our pension and postretirement benefit plans.

With continuing advances in technology and in response to changing demands from our customers, in recent years we have focused on providing enhanced broadband, video and voice services. In 2015, we purchased DIRECTV to expand our involvement in the digital entertainment space. The nationwide reach of DIRECTV and superior content-owner relationships significantly improve the economics and expanded the geographic reach of our pre-existing AT&T U-verse® video service. We also purchased wireless operations in Mexico, moving quickly to build a world-class mobile business in a country with a strong economic outlook, a growing middle class, and cultural and geographic ties to the United States. These acquisitions and our continued investment in a premier network experience make our customers' lives more convenient and productive and foster competition and further innovation in the communications and entertainment industry. In late 2016, we took another step in our strategy of providing an unmatched communication and entertainment experience for our customers when we agreed to purchase Time Warner Inc., a global leader in creating premium media and entertainment content. In 2017, we plan to focus on the areas discussed below.

**Wireless**

AT&T Mobility began operations in October 2000 as a joint venture between us and BellSouth and, in 2004, acquired AT&T Wireless Services, Inc. Upon our acquisition of BellSouth in 2006, AT&T Mobility became a wholly-owned subsidiary. We provide wireless video, data and voice services. We are experiencing rapid growth in video and data usage as consumers are demanding seamless access across their wired and wireless devices, and as more and more machines are being connected to the internet.

As of December 31, 2016, we served 146.8 million wireless subscribers in North America, with nearly 135 million in the United States. Our LTE technology covers almost 400 million people in North America, and, in the United States, we cover all major metropolitan areas and almost 320 million people with our LTE technology. We also provide 4G coverage using another technology (HSPA+), and, when combined with our upgraded backhaul network, we are able to enhance our network capabilities and provide superior mobile broadband speeds for data and video services. Our wireless network also relies on other GSM digital transmission technologies for 3G data communications.

We have also started planning for deployment of the latest wireless technology (5G) and are currently testing in our labs and in the field various ways to deploy that technology. We expect global 5G technology standards to be set over the next two years or so, enabling companies to begin commercial deployment thereafter. The increased speeds and network operating efficiency expected with 5G technology should enable massive deployment of devices connected to the internet as well as faster delivery of video and data services.

As the wireless industry continues to mature, future wireless growth will become increasingly dependent on our ability to offer innovative video and data services and a wireless network that has sufficient spectrum and capacity to support these innovations. We continue to invest significant capital in expanding our network capacity, as well as to secure and utilize spectrum that meets our long-term needs. To that end, we submitted winning bids for 251 AWS spectrum licenses for a near-nationwide contiguous block of high-quality AWS spectrum in the AWS-3 Auction (FCC Auction 97). Our strategy also includes redeploying spectrum previously used for basic 2G services to support more advanced mobile internet services on our 3G and 4G networks. We have bid on FirstNet, the First Responder Network Authority, which if awarded will provide access to a nationwide low band 20 MHz of spectrum, assuming all states "opt in," and are participating in the FCC 600 MHz Auction (Auction 1000). We will continue to invest in our wireless network as we look to provide future service offerings and participate in technologies such as 5G and millimeter-wave bands.

**Business Solutions**

We expect to continue to strengthen the reach and sophistication of our network facilities and our ability to offer a variety of communications services, both fixed and mobile, to businesses customers, including multinational companies; governmental and wholesale customers; and individual subscribers who purchase wireless services through employer-sponsored plans.

**AT&T Inc.**

---

**Internet Protocol (IP) Technology**

IP is generally used to describe the transmission of data, which can include voice (called voice over IP or VoIP), using a software-based technology rather than a traditional wire and physical switch-based telephone network. A company using this technology can provide voice and data services at a lower cost because this technology uses bandwidth more efficiently than a traditional network. Using this technology also presents growth opportunities, especially in providing data and video services to both fixed locations and mobile devices. To take advantage of both these growth and cost-savings opportunities, we have encouraged the migration of wireline customers in our current 21-state ILEC service area to services using IP, and expect to continue this transition through at least 2020.

**Integration of Data/Broadband and Entertainment Services**

As the communications industry continues to move toward internet-based technologies that are capable of blending traditional wireline and wireless services, we plan to offer services that take advantage of these new and more sophisticated technologies. In particular, we intend to continue to focus on expanding our high-speed internet and video offerings and on developing IP-based services that allow customers to unite their home or business fixed services with their mobile service. During 2017, we will continue to develop and provide unique integrated video, mobile and broadband solutions, including our recently introduced over-the-top video service, DIRECTV NOW.

**International**

We believe that the wireless model in the U.S., with exploding demand for mobile internet service and the associated economic benefits, will be repeated around the world as companies invest in high-speed mobile networks. Due in part to changes in the legal and regulatory framework in Mexico in 2015, we acquired Mexican wireless operations to establish a unique, seamless, cross-border North American wireless network covering nearly 400 million people and businesses in the United States and Mexico. During 2017, we will continue to build a world-class mobile business and network in Mexico.

**BUSINESS OPERATIONS****OPERATING SEGMENTS**

Our segments are strategic business units that offer different products and services over various technology platforms and/or in different geographies that are managed accordingly. We analyze our operating segments based on Segment Contribution, which consists of operating income, excluding acquisition-related costs and other significant items, and equity in net income (loss) of affiliates for investments managed within each operating segment. We have four reportable segments: (1) Business Solutions, (2) Entertainment Group, (3) Consumer Mobility and (4) International.

Additional information about our segments, including financial information, is included under the heading "Segment Results" on pages 13 through 21 and in Note 4 of the Annual Report and is incorporated herein by reference pursuant to General Instruction G(2).

**BUSINESS SOLUTIONS**

Our Business Solutions segment provides services to business customers, including multinational companies; governmental and wholesale customers; and individual subscribers who purchase wireless services through employer-sponsored plans. We provide advanced IP-based services including Virtual Private Networks (VPN); Ethernet-related products and broadband, collectively referred to as fixed strategic services; as well as traditional data and voice products. We utilize our wireless and wired networks (referred to as "wired" or "wireline") to provide a complete integrated communications solution to our business customers. The Business Solutions segment provided approximately 44% of 2016 segment operating revenues and 52% of our 2016 total Segment Contribution. We divide Business Solutions revenue into the following categories: wireless service, fixed strategic services, legacy voice and data services, other services and wireless equipment.

**Wireless Service** – We offer a comprehensive range of high-quality nationwide wireless voice and data communications services in a variety of pricing plans to approximately 81.4 million Business Solutions wireless subscribers. Our offerings are tailored to meet the communications needs of targeted customer categories. We classify our subscribers as either postpaid, connected device or reseller.

Wireless data services continue to be a growing area for this segment, representing an increasing share of overall subscriber revenue. We are experiencing solid growth in this area as an increasing number of our subscribers have upgraded their handsets to more advanced integrated devices, are using data-centric devices such as tablets and connected cars and are utilizing the network to connect and control physical devices using embedded computing systems and/or software, commonly called the Internet of Things (IoT). We offer both Mobile Share plans and an integrated offer combining unlimited wireless data with our video services. These plans allow sharing of voice, text and data across multiple devices. We also offer equipment installment programs, such as AT&T Next<sup>SM</sup> (AT&T Next), a program allowing subscribers to more frequently upgrade handsets using an installment payment plan; and Rollover Data on Mobile Share plans, which allows unused shareable plan data to be rolled over and used within the next month. Such offerings are intended to encourage existing subscribers to upgrade their current services and/or add connected devices, attract subscribers from other providers and minimize subscriber churn. Participation in these plans continues to increase. Customers in our "connected device" category (e.g., users of session-based tablets, monitoring devices and automobile systems) purchase those devices from third-party suppliers that buy data access supported by our network. We continue to upgrade our network and coordinate with equipment manufacturers and applications developers to further capitalize on the continued growing demand for wireless data services.

**AT&T Inc.**

---

During the first quarter of 2016, we discontinued offering subsidized smartphones to most of our customers. Under our no-subsidy model, subscribers must purchase a device under an equipment installment program or choose to bring their own device, with no annual service contract. Our wireless services include data and voice services, including long-distance service and roaming services. Roaming services enable our subscribers to utilize other carriers' networks when they are "roaming" outside our network footprint.

**Fixed Strategic Services** – Fixed strategic services (previously known as strategic business services) are our most advanced business solutions. Our offerings use high-capacity digital circuits, and allow customers to create internal data networks and access external data networks. Switched Transport services transmit data using switching equipment to transfer the data between multiple lines before reaching its destination. Dedicated transport services use a single direct line to transmit data between destinations. Due to advances in technology, our most advanced business solutions are subject to change periodically. We review and evaluate our fixed strategic service offerings annually, which may result in an updated definition and the recast of our historical financial information to conform to the current period presentation. Any modifications will be reflected in the first quarter.

We provide businesses voice applications over IP-based networks (i.e., Enhanced Virtual Private Networks or "EVPN"). Over the past several years, we have built out our new IP/MPLS (Internet Protocol/MultiProtocol Label Switching) network, to supplement our IP-based product set, and eventually replace our older circuit-based networks and services. These products allow us to provide highly complex global data networks. Additional IP-based services include internet access and network integration, network security, dedicated internet and enterprise networking services. These advanced IP-based services continued to grow during 2016 as customers shift from our older circuit-based services. We expect this trend to continue in 2017 as customers continue to use more services based on internet access and demand ever-increasing transmission speeds, especially for video. To align with these trends, we continue to reconfigure our wireline network to take advantage of the latest technologies and services.

Packet services consist of data networks using packet switching and transmission technologies, including traditional circuit-based and IP connectivity services. Packet services enable customers to transmit large volumes of data economically and securely and are used for local area network (LAN) interconnection and inter-office communications. High-speed packet services are used extensively by enterprise (large business) customers.

Enterprise networking services provide comprehensive support from network design, implementation and installation to ongoing network operations and management for networks of varying scales, including LANs and virtual private networks. These services include applications such as e-mail, order entry systems, employee directories, human resource transactions and other database applications. We also offer Wi-Fi service.

**Legacy Voice and Data Services** – Voice services include traditional local and long-distance service provided directly to business and governmental customers, or through wholesale arrangements with other service providers. Our circuit-based, traditional data products include switched and dedicated transport services that allow customers to transmit data at high speeds, as well as access the internet using a DSL connection.

Revenues from our traditional voice services continue to decline as customers switch to wireless or VoIP services provided by either us, cable companies or other internet-based providers. In addition, the continuing slow economic growth and business starts have led some wireline customers to terminate their business phone service. We have responded by offering packages of combined voice and data services, including broadband and video, and intend to continue this strategy during 2017.

**AT&T Inc.**

---

**Other Services** – Other service revenues include project-based revenue, which is nonrecurring in nature, as well as revenues from other managed services, outsourcing, government professional service and equipment.

We provide intrastate, interstate and international wholesale networking capacity to other service providers. We offer a combination of high-volume transmission capacity and conventional dedicated line services on a regional, national and international basis to our wholesale customers, which are primarily wireless carriers, interexchange carriers, Internet Service Providers (ISPs), and facility-based and switchless resellers.

**Wireless Equipment** – We sell a wide variety of handsets, wirelessly enabled computers (e.g., tablets and notebooks) and personal computer wireless data cards manufactured by various suppliers for use with our voice and data services. We sell through our own company-owned stores, agents and third-party retail stores. Like other wireless service providers, we have historically provided postpaid contract subscribers substantial equipment subsidies to initiate, renew or upgrade service. We have now largely eliminated these subsidies and provide our customers with more service options, the ability to purchase handsets on an installment basis and the opportunity to bring their own device. With the elimination of handset subsidies, our subscribers have been retaining their handsets for longer periods; accordingly, we expect equipment revenues to be pressured in 2017. We also sell accessories, such as carrying cases, hands-free devices and other items.

Additional information on our Business Solutions segment is contained in the Annual Report in the “Operating Environment Overview” section beginning on page 14 and is incorporated herein by reference pursuant to General Instruction G(2).

**ENTERTAINMENT GROUP**

Our Entertainment Group segment provides video, internet, voice communication, and interactive and targeted advertising services to customers in the United States and U.S. territories by utilizing our copper and IP-based wired network and/or our satellite technology. In July 2015, we acquired DIRECTV, a leading provider of digital television entertainment engaged in acquiring, promoting, selling and distributing digital entertainment programming primarily via satellite to subscribers. The Entertainment Group segment provided approximately 32% of 2016 segment operating revenues and 19% of our 2016 total Segment Contribution. We divide this segment’s revenue into the following categories: video entertainment, high-speed internet, legacy voice and data services, and equipment and other.

**Video Entertainment** – We offer video entertainment services using satellite and IP-based technologies (referred to as “linear”) as well as a streaming option that does not require either satellite or wired IP services (referred to as “over-the-top”). Our offerings are structured to provide customers with the best video experience both inside and outside of the home by offering subscribers attractive programming, technology and customer service. Due to the rising cost of programming as well as higher costs to acquire new subscribers in an increasingly competitive industry, it is even more important to distinguish and elevate our video entertainment experience for our new and existing customers.

We provide approximately 25.3 million subscribers with access to hundreds of channels of digital-quality video entertainment and audio programming. For our satellite subscribers, we provide video-on-demand (VOD) by “pushing” top-rated movies onto customers’ digital video recorders (DVRs) for instant viewing, as well as via broadband to our subscribers who have connected their set-top receiver to their broadband service. In addition, our video entertainment subscribers have the ability to use the internet and/or our mobile applications for smartphones and tablets to view authorized content, search program listings and schedule DVR recordings.

We believe it is critical that we continue to extend our brand leadership as the premium pay-TV provider in the marketplace by providing the best video experience both at home and on mobile devices. We believe that our flexible platform that uses a combination of satellite, IP-based and cloud infrastructure with a broadband and wireless connection is the most efficient way to transport content to subscribers when and where they want it. Through this integrated approach, we’re able to optimize the use of storage in the home as well as in the cloud, while also providing a seamless service for consumers across screens and locations.

**High-Speed Internet** – We offer broadband and internet services to 12.9 million residential subscribers. Our IP-based technology provides more advanced high-speed internet services.

**Legacy Voice and Data Services** – Voice services include traditional local and long-distance service provided to residential customers. Our circuit-based, traditional data products include DSL internet access.

**AT&T Inc.**

---

Revenues from our traditional voice services continue to decline as customers switch to wireless or VoIP services provided by either us, cable or other internet-based providers. We have responded by offering packages of combined voice and data services, including broadband, video and wireless, and intend to continue this strategy during 2017.

**Equipment and Other** – Other service revenues include revenue from voice services provided over IP-based technology (VoIP) as well as revenues associated with technical support and other customer service functions and equipment.

Additional information on our Entertainment Group segment is contained in the Annual Report in the “Operating Environment Overview” section beginning on page 16 and is incorporated herein by reference pursuant to General Instruction G(2).

**CONSUMER MOBILITY**

Our Consumer Mobility segment consists of AT&T Mobility operations that provide nationwide wireless services to consumers and wholesale and resale wireless subscribers located in the United States or U.S. territories by utilizing our network to provide voice and data services, including high-speed internet, video and home-monitoring services over wireless devices. Wireless services include data and voice, including long-distance and roaming services. Roaming services enable our subscribers to utilize other carriers’ networks when they are “roaming” outside our network footprint. The Consumer Mobility segment provided approximately 20% of 2016 total segment operating revenues and 31% of our 2016 total Segment Contribution. We classify our subscribers as either postpaid, prepaid, connected device or reseller. At December 31, 2016, we served 53.5 million Consumer Mobility subscribers, including 27.1 million postpaid, 13.5 million prepaid, 11.9 million reseller and 942,000 connected devices. We divide our revenue into the following categories: services and equipment.

**Wireless Services** – We offer a comprehensive range of high-quality nationwide wireless voice and data communications services in a variety of postpaid and prepaid pricing plans. Wireless data services continue to be a growing area of Consumer Mobility’s business, representing an increasing share of overall subscriber revenue. Subscribers continue to upgrade their handsets to more advanced integrated devices, contributing to growth from wireless data services. We offer Mobile Share plans and an integrated offer combining our unlimited wireless data with our video services. These plans allow sharing of voice, text and data across multiple devices. We also offer equipment installment programs, such as AT&T Next, a program allowing subscribers to more frequently upgrade handsets using an installment payment plan; and Rollover Data on Mobile Share plans, which allows unused shareable plan data to be rolled over and used within the next month. We also launched in 2016 a program for wireless subscribers that also purchase our video service to view such programming without it counting against their wireless data allowances. Such offerings are intended to encourage existing subscribers to upgrade their current services and/or add connected devices, attract subscribers from other providers, and minimize subscriber churn. Participation in these plans continues to increase. Customers in our “connected device” category (e.g., users of session-based tablets) purchase those devices from third-party suppliers that buy data access supported by our network. We continue to upgrade our network and coordinate with equipment manufacturers and applications developers in order to further capitalize on the continued growth in the demand for wireless data services.

During the first quarter of 2016, we discontinued offering subsidized smartphones to most of our customers. Under our no-subsidy model, subscribers must purchase a device under an equipment installment program or choose to bring their own device, with no annual service contract. Market maturity, competition and the migration of subscribers to employer plans offered by our Business Solutions segment have slowed the growth in subscribers.

We also offer nationwide wireless voice and data communications to certain customers who prefer to pay in advance. These services are offered under the Cricket and Go Phone brands and are typically monthly prepaid services.

**Other Service** – Other services includes consulting, advertising, application and co-location, as well as fees we charge to other carriers for providing roaming services to their customers utilizing our network.

**Equipment** – We sell a wide variety of handsets, wirelessly enabled computers (e.g., tablets and notebooks) and personal computer wireless data cards manufactured by various suppliers for use with our voice and data services. We sell through our own company-owned stores, agents and third-party retail stores. Like other wireless service providers, we have historically provided postpaid contract subscribers substantial equipment subsidies to initiate, renew or upgrade service. We have now largely eliminated these subsidies and provide our customers with more service options, the ability to purchase handsets on an installment basis and the opportunity to bring their own device. We also sell accessories, such as carrying cases, hands-free devices, and other items, to consumers, as well as to agents and third-party distributors for resale.

Additional information on our Consumer Mobility segment is contained in the Annual Report in the “Operating Environment Overview” section beginning on page 18 and is incorporated herein by reference pursuant to General Instruction G(2).

**AT&T Inc.**

---

**INTERNATIONAL**

Our International segment provides entertainment services in Latin America and wireless services in Mexico. Video entertainment services are provided to primarily residential customers using satellite technology. We utilize our regional and national wireless networks in Mexico to provide consumer and business customers with wireless data and voice communication services. The International segment provided approximately 4% of 2016 segment operating revenues. We divide our revenue into the following categories: video entertainment, wireless service and wireless equipment.

**Video Entertainment** – We are a leading provider of digital television services throughout Latin America, providing a wide selection of local and international digital-quality video entertainment and audio programming under the DIRECTV and SKY brands. We believe we provide one of the most extensive collections of programming available in the Latin America pay-TV market, including HD sports video content and the most innovative interactive technology across the region. In addition, we have the unique ability to sell superior offerings of our differentiated products and services on a continent-wide basis with an operational cost structure that we believe to be lower than that of our competition.

We have approximately 12.5 million video subscribers in Latin America. Our operations are comprised of: PanAmericana, which provides services in Argentina, Chile, Colombia, Ecuador, Peru, Venezuela and certain other countries in the region; and SKY Brasil Servicos Ltda., or SKY Brasil, which is a 93% owned subsidiary. Our Latin American operations also include our 41% equity method investment in Innova. S. de R.L. de C.V., or SKY Mexico, which we include in our International segment. As of December 31, 2016, PanAmericana had approximately 7.2 million subscribers and SKY Brasil had approximately 5.3 million subscribers.

**Wireless** – We offer postpaid and prepaid wireless services in Mexico to approximately 12.0 million subscribers under the AT&T and Unefon brands. Postpaid services allow for (1) no annual service contract for subscribers who bring their own device or purchase a device on installment (the device must be paid in full if the customer chooses to drop their service from AT&T); and (2) service contracts for periods up to 24 months for subscribers who purchase their equipment under the traditional device subsidy model. All plans offer no roaming charges in the United States or Canada, unlimited minutes and messages to the extended AT&T community and unlimited social networking. We also offer prepaid services to certain customers who prefer to pay in advance.

**Equipment** – We sell a wide variety of handsets, including smartphones manufactured by various suppliers for use with our voice and data services. We sell through our own company-owned stores, agents and third-party retail stores.

Additional information on our International segment is contained in the Annual Report in the “Operating Environment Overview” section beginning on page 20 and is incorporated herein by reference pursuant to General Instruction G(2).

AT&amp;T Inc.

**MAJOR CLASSES OF SERVICE**

The following table sets forth the percentage of total consolidated reported operating revenues by any class of service that accounted for 10% or more of our consolidated total operating revenues in any of the last three fiscal years:

	Percentage of Total Consolidated Operating Revenues		
	2016	2015	2014
<b>Business Solutions Segment</b>			
Wireless service	19 %	21 %	23 %
Legacy voice and data services	10	12	15
Equipment <sup>1</sup>	5	6	6
<b>Entertainment Group Segment</b>			
Video entertainment	22	14	5
Legacy voice and data services	3	4	6
<b>Consumer Mobility Segment</b>			
Wireless service	17	20	23
Equipment	3	4	4
<b>International Segment</b>			
Video entertainment	3	1	-

<sup>1</sup> Includes customer premises equipment of \$982 million in 2016, \$929 million in 2015 and \$979 million in 2014 that is reported as other service and equipment revenues in our Business Solutions segment.

Additional information on our geographical distribution of revenues is contained in the Annual Report in the "Segment Information" section beginning on page 54 and is incorporated herein by reference pursuant to General Instruction G(2).

**GOVERNMENT REGULATION**

Wireless communications providers must be licensed by the U.S. Federal Communications Commission (FCC) to provide communications services at specified spectrum frequencies within defined geographic areas and must comply with the rules and policies governing the use of the spectrum as adopted by the FCC. The FCC's rules have a direct impact on whether the wireless industry has sufficient spectrum available to support the high-quality, innovative services our customers demand. Wireless licenses are issued for a fixed time period, typically 10 years, and we must seek renewal of these licenses. While the FCC has generally renewed licenses given to operating companies such as us, the FCC has authority to both revoke a license for cause and to deny a license renewal if a renewal is not in the public interest. Additionally, while wireless communications providers' prices and service offerings are generally not subject to regulation, the federal government and various states are considering new regulations and legislation relating to various aspects of wireless services.

The Communications Act of 1934 and other related acts give the FCC broad authority to regulate the U.S. operations of our satellite services, which are licensed by the FCC. In addition, states representing a majority of our local service access lines have adopted legislation that enables us to provide IP-based video service through a single statewide or state-approved franchise (as opposed to the need to acquire hundreds or even thousands of municipal-approved franchises) to offer a competitive video product. We also are supporting efforts to update and improve regulatory treatment for retail services. Regulatory reform and passage of legislation is uncertain and depends on many factors.

In February 2015, the FCC released an order in response to the D.C. Circuit's January 2014 decision adopting new rules, and classifying both fixed and mobile consumer broadband internet access as telecommunications services, subject to comprehensive regulation under the Telecommunications Act of 1996. The FCC's decision significantly expands its existing authority to regulate the provision of fixed and mobile broadband internet access services. The FCC also asserted jurisdiction over internet interconnection arrangements, which until now have been unregulated. These actions could have an adverse impact on our fixed and mobile broadband services and operating results. AT&T and several other parties, including US Telecom and CTIA trade groups, have challenged the FCC's order.

**AT&T Inc.**

---

Our ILEC subsidiaries are subject to regulation by state governments, which have the power to regulate intrastate rates and services, including local, long-distance and network access services, provided such state regulation is consistent with federal law. Some states have eliminated or reduced regulations on our retail offerings. These subsidiaries are also subject to the jurisdiction of the FCC with respect to intercarrier compensation, interconnection, and interstate and international rates and services, including interstate access charges. Access charges are a form of intercarrier compensation designed to reimburse our wireline subsidiaries for the use of their networks by other carriers.

Our subsidiaries operating outside the United States are subject to the jurisdiction of national and supranational regulatory authorities in the market where service is provided.

Additional information relating to regulation of our subsidiaries is contained in the Annual Report under the headings "Operating Environment Overview" beginning on page 24 and "Regulatory Developments" beginning on page 27 and is incorporated herein by reference pursuant to General Instruction G(2).

**IMPORTANCE, DURATION AND EFFECT OF LICENSES**

Certain of our subsidiaries own or have licenses to various patents, copyrights, trademarks and other intellectual property necessary to conduct business. Many of our subsidiaries also hold government-issued licenses or franchises to provide wireline, satellite or wireless services and additional information relating to regulation affecting those rights is contained in the Annual Report under the heading "Operating Environment Overview" beginning on page 24 and is incorporated herein by reference pursuant to General Instruction G(2). We actively pursue patents, trademarks and service marks to protect our intellectual property within the United States and abroad. We maintain a significant global portfolio of patents, trademarks and service mark registrations. We have also entered into agreements that permit other companies, in exchange for fees and subject to appropriate safeguards and restrictions, to utilize certain of our trademarks and service marks. We periodically receive offers from third parties to obtain licenses for patents and other intellectual rights in exchange for royalties or other payments. We also receive notices asserting that our products or services infringe on their patents and other intellectual property rights. These claims, whether against us directly or against third-party suppliers of products or services that we, in turn, sell to our customers, such as wireless handsets, could require us to pay damages, royalties, stop offering the relevant products or services and/or cease other activities. While the outcome of any litigation is uncertain, we do not believe that the resolution of any of these infringement claims or the expiration or non-renewal of any of our intellectual property rights would have a material adverse effect on our results of operations.

**MAJOR CUSTOMER**

No customer accounted for 10% or more of our consolidated revenues in 2016, 2015 or 2014.

**COMPETITION**

Information relating to competition in each of our operating segments is contained in the Annual Report under the heading "Competition" beginning on page 27, and is incorporated herein by reference pursuant to General Instruction G(2).

**AT&T Inc.**

---

**RESEARCH AND DEVELOPMENT**

AT&T scientists and engineers conduct research in a variety of areas, including IP networking, advanced network design and architecture, network and cyber security, network operations support systems, satellite technology and data analytics. The majority of the development activities are performed to create new services and to invent tools and systems to manage secure and reliable networks for us and our customers. In recent years, we initiated a technology outreach effort aimed at venture capital funded startups with the objective of rapidly introducing new solutions, products and applications developed by third parties. Research and development expenses were \$1.649 million in 2016, \$1.693 million in 2015, and \$1.730 million in 2014.

**EMPLOYEES**

As of January 31, 2017, we employed approximately 268,000 persons. Approximately 48% of our employees are represented by the Communications Workers of America, the International Brotherhood of Electrical Workers or other unions. Contracts covering approximately 20,000 mobility employees across the country and approximately 25,000 traditional wireline employees in our Southwest and Midwest regions will expire in 2017. Additionally, negotiations continue with approximately 15,000 traditional wireline employees in our West region where the contract expired in April 2016. Approximately 11,000 former DIRECTV employees were eligible for and chose union representation. Bargaining has resulted in approximately 70% of these employees now being covered under ratified contracts that expire between 2017 and 2020. After expiration of the current agreements, work stoppages or labor disruptions may occur in the absence of new contracts or other agreements being reached.

At December 31, 2016, we had approximately 533,000 retirees and dependents that were eligible to receive retiree benefits.

AT&amp;T Inc.

**ITEM IA. RISK FACTORS**

Information required by this Item is included in the Annual Report under the heading "Risk Factors" on pages 39 through 43 which is incorporated herein by reference pursuant to General Instruction G(2).

**CAUTIONARY LANGUAGE CONCERNING FORWARD-LOOKING STATEMENTS**

Information set forth in this report contains forward-looking statements that are subject to risks and uncertainties, and actual results could differ materially. Many of these factors are discussed in more detail in the "Risk Factors" section. We claim the protection of the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995.

The following factors could cause our future results to differ materially from those expressed in the forward-looking statements:

- Adverse economic and/or capital access changes in the markets served by us or in countries in which we have significant investments, including the impact on customer demand and our ability and our suppliers' ability to access financial markets at favorable rates and terms.
- Changes in available technology and the effects of such changes, including product substitutions and deployment costs.
- Increases in our benefit plans' costs, including increases due to adverse changes in the United States and foreign securities markets, resulting in worse-than-assumed investment returns and discount rates; adverse changes in mortality assumptions; adverse medical cost trends; and unfavorable or delayed implementation or repeal of healthcare legislation, regulations or related court decisions.
- The final outcome of FCC and other federal, state or foreign government agency proceedings (including judicial review, if any, of such proceedings) involving issues that are important to our business, including, without limitation, special access and business data services; intercarrier compensation; interconnection obligations; pending Notices of Apparent Liability; the transition from legacy technologies to IP-based infrastructure, including the withdrawal of legacy TDM-based services; universal service; broadband deployment; E911 services; competition policy; privacy net neutrality, including the FCC's order classifying broadband as Title II services subject to much more comprehensive regulation; unbundled network elements and other wholesale obligations; multi-channel video programming distributor services and equipment; availability of new spectrum, on fair and balanced terms; and wireless and satellite license awards and renewals.
- The final outcome of state and federal legislative efforts involving issues that are important to our business, including deregulation of IP-based services, relief from Carrier of Last Resort obligations and elimination of state commission review of the withdrawal of services.
- Enactment of additional state, local, federal and/or foreign regulatory and tax laws and regulations, or changes to existing standards and actions by tax agencies and judicial authorities including the resolution of disputes with any taxing jurisdictions, pertaining to our subsidiaries and foreign investments, including laws and regulations that reduce our incentive to invest in our networks, resulting in lower revenue growth and/or higher operating costs.
- Our ability to absorb revenue losses caused by increasing competition, including offerings that use alternative technologies or delivery methods (e.g., cable, wireless, VoIP and over-the-top video service) and our ability to maintain capital expenditures.
- The extent of competition including from governmental networks and other providers and the resulting pressure on customer and access line totals and segment operating margins.
- Our ability to develop attractive and profitable product/service offerings to offset increasing competition.
- The ability of our competitors to offer product/service offerings at lower prices due to lower cost structures and regulatory and legislative actions adverse to us, including state regulatory proceedings relating to unbundled network elements and non-regulation of comparable alternative technologies (e.g., VoIP).
- The continued development and delivery of attractive and profitable video offerings through satellite and IP-based networks; the extent to which regulatory and build-out requirements apply to our offerings; and the availability, cost and/or reliability of the various technologies and/or content required to provide such offerings.
- Our continued ability to maintain margins, attract and offer a diverse portfolio of wireless service and devices and device financing plans.
- The availability and cost of additional wireless spectrum and regulations and conditions relating to spectrum use, licensing, obtaining additional spectrum, technical standards and deployment and usage, including network management rules.
- Our ability to manage growth in wireless video and data services, including network quality and acquisition of adequate spectrum at reasonable costs and terms.
- The outcome of pending, threatened or potential litigation (which includes arbitrations), including, without limitation, patent and product safety claims by or against third parties.
- The impact from major equipment failures on our networks, including satellites operated by DIRECTV; the effect of security breaches related to the network or customer information; our inability to obtain handsets, equipment/software or have handsets, equipment/software serviced in a timely and cost-effective manner from suppliers; and in the case of satellites launched, timely provisioning of services from vendors; or severe weather conditions, natural disasters, pandemics, energy shortages, wars or terrorist attacks.
- The issuance by the Financial Accounting Standards Board or other accounting oversight bodies of new accounting standards or changes to existing standards.
- Our ability to integrate our acquisition of DIRECTV.
- Our ability to close our pending acquisition of Time Warner Inc. and successfully integrate its operations.
- Our ability to adequately fund our wireless operations, including payment for additional spectrum, network upgrades and technological advancements.
- Our increased exposure to video competition and foreign economics due to our recent acquisitions of DIRECTV and Mexican wireless properties, including foreign exchange fluctuations as well as regulatory and political uncertainty.
- Changes in our corporate strategies, such as changing network-related requirements or acquisitions and dispositions, which may require significant amounts of cash or stock, to respond to competition and regulatory, legislative and technological developments.
- The uncertainty surrounding further congressional action to address spending reductions, which may result in a significant decrease in government spending and reluctance of businesses and consumers to spend in general.

- The uncertainty and impact of anticipated regulatory and corporate tax reform, which may impact the overall economy and incentives for business investments.

Readers are cautioned that other factors discussed in this report, although not enumerated here, also could materially affect our future earnings.

**AT&T Inc.****ITEM 2. PROPERTIES**

Our properties do not lend themselves to description by character and location of principal units. At December 31, 2016, central office equipment represented 29%; outside plant (including cable, wiring and other non-central office network equipment) represented approximately 25%; satellites represented 1%; other equipment, comprised principally of wireless network equipment attached to towers, furniture and office equipment and vehicles and other work equipment, represented 27%; land, building and wireless communications towers represented 12%; and other miscellaneous property represented 6%.

Substantially all of the installations of central office equipment are located in buildings and on land we own. Many garages, administrative and business offices, wireless towers, telephone centers and retail stores are leased. Property on which communication towers are located may be either owned or leased.

**ITEM 3. LEGAL PROCEEDINGS**

We are a party to numerous lawsuits, regulatory proceedings and other matters arising in the ordinary course of business. As of the date of this report, we do not believe any pending legal proceedings to which we or our subsidiaries are subject are required to be disclosed as material legal proceedings pursuant to this item.

We are subject from time to time to judicial and administrative proceedings brought by various governmental authorities under federal, state or local environmental laws. We are required to discuss three of these proceedings in our Forms 10-Q and 10-K, because each could result in monetary sanctions (exclusive of interest and costs) of \$100,000 or more. However, we do not believe that any of them currently pending will have a material adverse effect on our results of operations.

- (a) **Waste Disposal Inquiry Involving DIRECTV** In August 2012, a unit organized by the California Attorney General and the District Attorney for Alameda County, California notified DIRECTV that the unit was examining allegations that DIRECTV had failed to properly manage, store, transport and dispose of Hazardous and Universal Waste in accordance with the California Health & Safety Code. No litigation has been filed. DIRECTV is cooperating with the unit and is seeking to resolve all claims. A monetary settlement has been proposed and agreed to in principle by DIRECTV in an amount that is not material. Negotiation of final terms is proceeding.
- (b) **San Diego County Inquiry Involving Cricket Communications, Inc.** In February 2014, the San Diego County Air Pollution Control District began inquiring into alleged violations of California regulations governing removal, handling and disposal of asbestos containing materials arising from an independent dealer's demolition and construction activity in preparation to install upgraded point of purchase and fixtures in accordance with Cricket Dealer Guidelines. While the independent dealer was in sole control of contractors performing the work at issue, the County has focused on Cricket Communications dealer agreement terms and interactions with the independent dealer as a basis for asserting direct liability against Cricket Communications, Inc. After discussions, in November 2015, the County issued a penalty demand in excess of \$100,000. In October 2016, we reached a monetary settlement with the County of this matter for an immaterial amount.
- (c) **South Coast Air Quality** In January 2016, AT&T Mobility received an offer to enter into an administrative settlement with California's South Coast Air Quality Management District associated with a Notice of Violation (NOV) received in 2015. The 2015 NOV alleged violations of local environmental air permitting and emissions rules issued by the District in connection with operation of a back-up power generator system at one AT&T Mobility facility. After discussions, the parties resolved the alleged violations without admission of fault by AT&T Mobility for a payment of civil penalties in an amount of less than \$100,000.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

**AT&T Inc.**

---

**EXECUTIVE OFFICERS OF THE REGISTRANT  
(As of February 1, 2017)**

<u>Name</u>	<u>Age</u>	<u>Position</u>	<u>Held Since</u>
Randall L. Stephenson	56	Chairman of the Board, Chief Executive Officer and President	6/2007
F. Thaddeus Arroyo	53	Chief Executive Officer – Business Solutions and International	1/2017
William A. Blase Jr.	61	Senior Executive Vice President – Human Resources	6/2007
John M. Donovan	56	Chief Strategy Officer and Group President – AT&T Technology and Operations	2/2016
David S. Huntley	58	Senior Executive Vice President and Chief Compliance Officer	12/2014
Lori M. Lee	51	Senior Executive Vice President and Global Marketing Officer	4/2015
David R. McAtee II	48	Senior Executive Vice President and General Counsel	10/2015
Robert W. Quinn Jr.	56	Senior Executive Vice President – External and Legislative Affairs. AT&T Services, Inc.	10/2016
John T. Stankey	54	Chief Executive Officer-AT&T Entertainment Group, AT&T Services, Inc.	7/2015
John J. Stephens	57	Senior Executive Vice President and Chief Financial Officer	6/2011

All of the above executive officers have held high-level managerial positions with AT&T or its subsidiaries for more than the past five years. Executive officers are not appointed to a fixed term of office.

AT&amp;T Inc.

## PART II

## ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Our common stock is listed on the New York Stock Exchange. The number of stockholders of record as of December 31, 2016 and 2015 was 1,020,203 and 1,074,894. The number of stockholders of record as of February 10, 2017, was 1,015,975. We declared dividends, on a quarterly basis, totaling \$1.93 per share in 2016 and \$1.89 per share in 2015.

Other information required by this Item is included in the Annual Report under the headings "Quarterly Financial Information" on page 83, "Selected Financial and Operating Data" on page 10, and "Stock Trading Information" on the back cover, which are incorporated herein by reference pursuant to General Instruction G(2).

(c) In July 2012, the Board of Directors approved an authorization to repurchase 300 million shares, which we completed in May 2013. In March 2013, our Board of Directors approved an authorization to repurchase up to an additional 300 million shares of our common stock. In March 2014, our Board of Directors approved another authorization to repurchase up to an additional 300 million shares of our common stock. For the year ended December 31, 2016, we repurchased 11 million shares for distribution through our employee benefit plans, totaling \$444 million under the March 2013 authorization. For the year ended December 31, 2015, we repurchased 8 million shares totaling \$269 million under the March 2013 authorization. The emphasis of our 2017 financing activities will be the issuance of debt and the payment of dividends, subject to approval by our Board of Directors, and the repayment of debt.

To implement these authorizations, we used open market repurchase programs, relying on Rule 10b5-1 of the Securities Exchange Act of 1934 where feasible.

We will continue to fund any share repurchases through a combination of cash from operations, borrowings dependent on market conditions, or cash from the disposition of certain non-strategic investments.

A summary of our repurchases of common stock during the fourth quarter of 2016 is as follows:

## ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares (or Units) Purchased <sup>1,2,3</sup>	(b) Average Price Paid Per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs <sup>1</sup>	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under The Plans or Programs
October 1, 2016 - October 31, 2016	45,330	\$ -	-	395,550,000
November 1, 2016 - November 30, 2016	1,841,719	-	-	395,550,000
December 1, 2016 - December 31, 2016	528,674	-	-	395,550,000
<b>Total</b>	<b>2,415,723</b>	<b>\$ -</b>	<b>-</b>	

<sup>1</sup> In March 2014, our Board of Directors approved an authorization to repurchase up to 300 million shares of our common stock. In March 2013, our Board of Directors approved an authorization to repurchase up to 300 million shares of our common stock. The authorizations have no expiration date.

<sup>2</sup> Of the shares purchased, 73,743 shares were acquired through the withholding of taxes on the vesting of restricted stock or through the payment in stock of taxes on the exercise price of options.

<sup>3</sup> Of the shares repurchased, 2,341,980 were acquired through reimbursements from the AT&T maintained Voluntary Employee Benefit Association (VEBA) trusts or through litigation settlement.

**ITEM 6. SELECTED FINANCIAL DATA**

Information required by this Item is included in the Annual Report under the heading "Selected Financial and Operating Data" on page 10, which is incorporated herein by reference pursuant to General Instruction G(2).

**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Information required by this Item is included in the Annual Report on pages 11 through 44, which is incorporated herein by reference pursuant to General Instruction G(2).

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

Information required by this Item is included in the Annual Report under the heading "Market Risk" on page 38, which is incorporated herein by reference pursuant to General Instruction G(2).

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

Information required by this Item is included in the Annual Report on pages 45 through 83, which is incorporated herein by reference pursuant to General Instruction G(2).

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

During our two most recent fiscal years, there has been no change in the independent accountant engaged as the principal accountant to audit our financial statements, and the independent accountant has not expressed reliance on other independent accountants in its reports during such time period.

**ITEM 9A. CONTROLS AND PROCEDURES****Disclosure Controls and Procedures**

The registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed by the registrant is recorded, processed, summarized, accumulated and communicated to its management, including its principal executive and principal financial officers, to allow timely decisions regarding required disclosure, and reported within the time periods specified in the SEC's rules and forms. The Chief Executive Officer and Chief Financial Officer have performed an evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of December 31, 2016. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the registrant's disclosure controls and procedures were effective as of December 31, 2016.

**Internal Control Over Financial Reporting****(a) Management's Annual Report on Internal Control over Financial Reporting**

The management of AT&T is responsible for establishing and maintaining adequate internal control over financial reporting. AT&T's internal control system was designed to provide reasonable assurance as to the integrity and reliability of the published financial statements. AT&T management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2016. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework* (2013 framework). Based on its assessment, AT&T management believes that, as of December 31, 2016, the Company's internal control over financial reporting is effective based on those criteria.

**(b) Attestation Report of the Independent Registered Public Accounting Firm**

The independent registered public accounting firm that audited the financial statements included in the Annual Report containing the disclosure required by this Item, Ernst & Young LLP, has issued an attestation report on the Company's internal control over financial reporting. The attestation report issued by Ernst & Young LLP is included in the Annual Report on page 85, which is incorporated herein by reference pursuant to General Instruction G(2).

**ITEM 9B. OTHER INFORMATION**

There is no information that was required to be disclosed in a report on Form 8-K during the fourth quarter of 2016 but was not reported.

**PART III****ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Information regarding executive officers required by Item 401 of Regulation S-K is furnished in a separate disclosure at the end of Part I of this report since the registrant did not furnish such information in its definitive proxy statement prepared in accordance with Schedule 14A. Information regarding directors required by Item 401 of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's definitive proxy statement, dated on or about March 10, 2017 (Proxy Statement) under the heading "Management Proposal Item 1. Election of Directors."

Information required by Item 405 of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's Proxy Statement under the heading "Section 16(a) Beneficial Ownership Reporting Compliance."

The registrant has a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The members of the committee are Messrs. Di Piazza, Jr. and McCallister, and Mses. Taylor and Tyson. The additional information required by Item 407(d)(5) of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's Proxy Statement under the heading "Audit Committee."

The registrant has adopted a code of ethics entitled "Code of Ethics" that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer, or controller or persons performing similar functions. The additional information required by Item 406 of Regulation S-K is provided in this report under the heading "General" under Part I, Item 1. Business.

**ITEM 11. EXECUTIVE COMPENSATION**

Information required by Item 402(k) of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's Proxy Statement under the heading "Director Compensation." Information regarding officers is included in the registrant's Proxy Statement on the pages beginning with the heading "Compensation Discussion and Analysis" and ending with, and including, the pages under the heading "Potential Payments upon Change in Control" which are incorporated herein by reference pursuant to General Instruction G(3). Information required by Item 407(e)(5) of Regulation S-K is included in the registrant's Proxy Statement under the heading "Compensation Committee Report" and is incorporated herein by reference pursuant to General Instruction G(3) and shall be deemed furnished in this Annual Report on Form 10-K and will not be deemed incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934.

Information required by this Item is included in the registrant's Proxy Statement, under the heading "Director Compensation," and the pages beginning with the heading "Summary Compensation Table," and ending with, and including, the page immediately before the heading "Cost of Proxy Solicitation" which are incorporated herein by reference pursuant to General Instruction G(3).

**ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

Information required by Item 403 of Regulation S-K is included in the registrant's Proxy Statement under the heading "Common Stock Ownership," which is incorporated herein by reference pursuant to General Instruction G(3).

**AT&T Inc.****Equity Compensation Plan Information**

The following table provides information as of December 31, 2016, concerning shares of AT&T common stock authorized for issuance under AT&T's existing equity compensation plans.

<b>Equity Compensation Plan Information</b>			
<b>Plan Category</b>	<b>Number of securities to be issued upon exercise of outstanding options, warrants and rights</b>	<b>Weighted-average exercise price of outstanding options, warrants and rights</b>	<b>Number of securities remaining available for future issuance under equity compensation Plans (excluding securities reflected in column (a))</b>
	(a)	(b)	(c)
Equity compensation plans approved by security holders	38,989,880 (1)	29.46	129,216,883(2)
Equity compensation plans not approved by security holders	-	-	-
<b>Total</b>	<b>38,989,880 (3)</b>	<b>\$29.46</b>	<b>129,216,883 (2)</b>

(1) Includes stock to be issued in connection with the following stockholder approved plans: (a) 5,684,800 stock options under the Stock Purchase and Deferral Plan (SPDP), (b) 2,086,954 phantom stock units under the Stock Savings Plan (SSP), 10,124,461 phantom stock units under the SPDP, 13,515 restricted stock units under the 2016 Incentive Plan, and 6,094,321 restricted stock units under the 2011 Incentive Plan, and (c) 6,022 target number of stock-settled performance shares under the 2016 Incentive Plan, and 12,690,355 target number of stock-settled performance shares under the 2011 Incentive Plan. At payout, the target number of performance shares may be reduced to zero or increased by up to 150%. Each phantom stock unit and performance share is settleable in stock on a 1-to-1 basis. The weighted-average exercise price in the table does not include outstanding performance shares or phantom stock units.

The SSP was approved by stockholders in 1994 and then was amended by the Board of Directors in 2000 to increase the number of shares available for purchase under the plan (including shares from the Company match and reinvested dividend equivalents). Stockholder approval was not required for the amendment. To the extent applicable, the amount shown for approved plans in column (a), in addition to the above amounts, includes 2,289,453 phantom stock units (computed on a first-in-first-out basis) that were approved by the Board in 2000. Under the SSP, shares could be purchased with payroll deductions and reinvested dividend equivalents by mid-level and above managers and limited Company partial matching contributions. No new contributions may be made to the plan.

(2) Includes 20,429,062 shares that remain available for future issuance under the SPDP, 88,541,244 shares remaining under the 2011 Incentive Plan, and up to 2,943,330 shares that may be purchased through reinvestment of dividends on phantom shares held in the SSP.

(3) Does not include certain stock options issued by companies acquired by AT&T that were converted into options to acquire AT&T stock. As of December 31, 2016, there were 640,749 shares of AT&T common stock subject to the converted options, having a weighted-average exercise price of \$19.34. Also, does not include 3,570,683 outstanding phantom stock units that were issued by companies acquired by AT&T that are convertible into stock on a 1-to-1 basis, along with up to 120,227 shares that may be purchased with reinvested dividend equivalents paid on the outstanding phantom stock units. No further phantom stock units, other than reinvested dividends, may be issued under the assumed plans. The weighted-average exercise price in the table does not include outstanding performance shares or phantom stock units.

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE**

Information required by Item 404 of Regulation S-K is included in the registrant's Proxy Statement under the heading "Related Person Transactions Disclosure," which is incorporated herein by reference pursuant to General Instruction G(3). Information required by Item 407(a) of Regulation S-K is included in the registrant's Proxy Statement under the heading "Director Independence," which is incorporated herein by reference pursuant to General Instruction G(3).

**AT&T Inc.****ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Information required by this Item is included in the registrant's Proxy Statement under the heading "Principal Accountant Fees and Services," which is incorporated herein by reference pursuant to General Instruction G(3).

**Part IV****ITEM 15. EXHIBITS and FINANCIAL STATEMENT SCHEDULES**

(a) Documents filed as a part of the report:

	Page
(1) Report of Independent Registered Public Accounting Firm	*
Financial Statements covered by Report of Independent Registered Public Accounting Firm:	*

10-K 1 cabo20161231\_10k.htm FORM 10-K [Table of Contents](#)

**UNITED STATES SECURITIES AND EXCHANGE COMMISSION**  
Washington, D.C. 20549

**FORM 10-K**

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2016

Commission File Number: 001-36863

**Cable One, Inc.**

*(Exact name of registrant as specified in its charter)*

**Delaware**  
*(State or Other Jurisdiction of  
Incorporation)*

**13-3060083**  
*(I.R.S. Employer  
Identification No.)*

**210 E. Earll Drive, Phoenix, Arizona**  
*(Address of Principal Executive Offices)*

**85012**  
*(Zip Code)*

**(602) 364-6000**

*(Registrant's Telephone Number, Including Area Code)*

Securities registered pursuant to Section 12(b) of the Act:

<u>Title Of Each Class</u>	<u>Name Of Each Exchange On Which Registered</u>
Common Stock, par value \$0.01	New York Stock Exchange

Securities Registered Pursuant to Section 12(g) of the Act:

**None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes   
No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes   
No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment of this Form 10-K.

\*\*\*\*\*

Table of Contents

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer       Accelerated filer       Non-accelerated filer       Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The aggregate market value of the registrant's common stock held by non-affiliates as of June 30, 2016 was approximately \$2.4 billion, based on the closing price for the registrant's common stock on such date. For purposes of this computation only, all executive officers, directors, and 10% beneficial owners of the registrant as of June 30, 2016 are deemed to be affiliates of the registrant. Such determination should not be deemed to be an admission that such executive officers, directors, or 10% beneficial owners are, in fact, affiliates of the registrant.

There were 5,719,502 shares of the registrant's common stock issued and outstanding as of February 21, 2017.

**Documents Incorporated by Reference**

Portions of the registrant's Definitive Proxy Statement relating to its 2017 Annual Meeting of Stockholders, to be filed with the Securities and Exchange Commission pursuant to Regulation 14A within 120 days after the registrant's fiscal year ended December 31, 2016, are incorporated by reference in Part III of this Form 10-K.

Table of Contents**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

This document contains “forward-looking statements” that involve risks and uncertainties. These statements can be identified by the fact that they do not relate strictly to historical or current facts, but rather are based on current expectations, estimates, assumptions and projections about the cable industry and our business and financial results. Forward-looking statements often include words such as “anticipates,” “estimates,” “expects,” “projects,” “intends,” “plans,” “believes” and words and terms of similar substance in connection with discussions of future operating or financial performance. As with any projection or forecast, forward-looking statements are inherently susceptible to uncertainty and changes in circumstances. Our actual results may vary materially from those expressed or implied in our forward-looking statements. Accordingly, undue reliance should not be placed on any forward-looking statement made by us or on our behalf. Important factors that could cause our actual results to differ materially from those in our forward-looking statements include government regulation, economic, strategic, political and social conditions and the following factors:

- uncertainties as to the timing of the acquisition of RBI Holding LLC (“NewWave”) and the risk that the transaction may not be completed in a timely manner or at all;
- the possibility that any or all of the various conditions to the consummation of the acquisition of NewWave may not be satisfied or waived, including failure to receive any required regulatory approvals (or any conditions, limitations or restrictions placed in connection with such approvals);
- risks regarding the failure to obtain the necessary financing to complete the NewWave transaction;
- the effect of the announcement or pendency of the transaction on our and NewWave’s ability to retain and hire key personnel and their ability to maintain relationships with customers, suppliers and other business partners;
- the potential diversion of senior management’s attention from our ongoing operations;
- uncertainties as to our ability and the amount of time necessary to realize the expected synergies and other benefits of the NewWave transaction;
- our ability to integrate NewWave’s operations into our own in an efficient and effective manner;
- rising levels of competition from historical and new entrants in our markets;
- recent and future changes in technology;
- our ability to continue to grow our business services product;
- increases in programming costs and retransmission fees;
- our ability to obtain support from vendors;
- the effects of any significant acquisitions by us;
- adverse economic conditions;
- the integrity and security of our network and information systems;
- legislative and regulatory efforts to impose new legal requirements on our data services;
- changing and additional regulation of our data, video and voice services;
- our ability to renew cable system franchises;
- increases in pole attachment costs;
- the failure to meet earnings expectations;
- the adequacy of our risk management framework;
- changes in tax and other laws and regulations;
- changes in accounting principles generally accepted in the United States (“GAAP”) or other applicable accounting policies; and
- the other risks and uncertainties detailed in the section titled “Risk Factors” in this Annual Report on Form 10-K.

Any forward-looking statements made by us in this document speak only as of the date on which they are made. We are under no obligation to, and expressly disclaim any obligation to, update or alter our forward-looking statements, whether as a result of new information, subsequent events or otherwise.

[Table of Contents](#)**PART I****ITEM 1. BUSINESS****Overview**

On July 1, 2015, Cable One, Inc. (“Cable One,” “us,” “our,” “we” or the “Company”) became an independent company traded under the ticker symbol “CABO” on the New York Stock Exchange after completion of its spin-off from Graham Holdings Company (“GHC”). The spin-off was effected through the distribution by GHC of 100% of the outstanding shares of common stock of Cable One to GHC stockholders as of the record date for the distribution (the “spin-off”) in a pro rata dividend (the “Distribution”). In connection with the spin-off, approximately 5.84 million shares of Cable One’s common stock were issued and outstanding on July 1, 2015, based on approximately 0.96 million shares of GHC Class A Common Stock and 4.88 million shares of GHC Class B Common Stock outstanding as of June 30, 2015. No preferred stock was issued or outstanding.

We are a fully integrated provider of data, video and voice services in 19 Western, Midwestern and Southern states. We provide these broadband services to residential and business customers in more than 35 cable systems covering over 400 cities and towns. The markets we serve are primarily non-metropolitan, secondary markets, with 76% of our customers located in five states: Arizona, Idaho, Mississippi, Oklahoma and Texas. Our biggest customer concentrations are in the Mississippi Gulf Coast region and in the greater Boise, Idaho region. We are the seventh-largest cable system operator in the United States based on customers and revenues in 2016, making services available to approximately 1.7 million homes in the United States as of December 31, 2016.

As of December 31, 2016, we provided service to 657,222 residential and business customers out of approximately 1.7 million homes passed. Of these customers, 513,908 subscribed to data services, 320,246 to video services and 115,811 to voice services.

We generate revenues through five primary products. Ranked by share of our total revenues in 2016, they are residential data (42.0%), residential video (36.0%), business services (data, voice and video – 12.2%), residential voice (5.2%) and advertising sales (3.4%). The profit margins, growth rates and capital intensity of our five primary products vary significantly due to competition, product maturity and relative costs. In 2016, our Adjusted EBITDA margins for residential data and business services were approximately four and five times greater, respectively, than for residential video. We define Adjusted EBITDA margin for a product line as Adjusted EBITDA attributable to that product line divided by revenue attributable to that product line (see the section entitled “*Management’s Discussion and Analysis of Financial Condition and Results of Operations—Use of Adjusted EBITDA*” for the definition of Adjusted EBITDA and a reconciliation of Adjusted EBITDA to net income, which is the most directly comparable GAAP measure). This margin disparity is largely the result of significant programming costs and retransmission fees incurred to deliver residential video services, which in each of the last three years represented between 50% and 60% of total residential video revenues (in addition to the other material direct and indirect costs associated with residential video). None of our other product lines has direct costs representing as substantial a portion of revenues as programming costs and retransmission fees represent for residential video, and indirect costs are allocated equally on a per primary service unit (“PSU”) basis. Programming costs and retransmission fees have a meaningfully lower impact on business services margins than residential video because business services include data, voice and video, diminishing the relative impact of programming costs and retransmission fees on that product line as a whole.

Prior to 2012, we were focused on growing revenues through subscriber retention and growth in overall PSUs. To that end, our strategies consisted of, among others, offering promotional discounts to new and existing subscribers adding new services and to subscribers purchasing more than one service offering.

Since 2012, we have adapted our strategy to face the trend, which has affected the entire cable industry, of declining profitability of residential video and declining revenues from residential voice services. We believe the declining profitability of residential video services is primarily due to competition from other content providers and increasing programming costs and retransmission fees and the declining revenues from residential voice services is primarily due to the increasing use of wireless voice services in addition to, or instead of, landline voice service. Beginning in 2013, we shifted our focus away from maximizing customer PSUs and towards growing and maintaining our higher margin businesses, namely residential data and business services. Separately, we have also focused on retaining customers with a high expected life-time value (“LTV”), who are less attracted by discounting, require less support and churn less. This strategy focuses on increasing Adjusted EBITDA, Adjusted EBITDA less capital expenditures and margins.

Table of Contents

The trends described above have impacted our four largest product lines in the following ways:

- *Residential data.* We experienced growth in the number of and revenues from our residential data customers every year since 2013. We expect this growth to continue due to projected increases in the number of potential customers for us to serve, as there are still a number of households in our markets that do not subscribe to data services from any provider. We expect to capture a portion of these customers and anticipate capturing additional market share from existing data subscribers due to our recent upgrades in broadband capacity and our ability to offer higher access speeds than many of our competitors.
- *Residential video.* Residential video service is a competitive and highly-penetrated business. As we focus on the higher-margin businesses of residential data and business services, we are de-emphasizing our residential video business and, as a result, expect residential video revenues to continue to decline in the future.
- *Residential voice.* We have experienced declines in residential voice customers as a result of homes in the United States deciding to terminate their landline voice service and exclusively use wireless voice service. We believe this trend will continue because of competition from wireless voice service. Revenues from residential voice customers have declined over recent years, and we expect this decline will continue.
- *Business services.* We have experienced significant growth in business data and voice customers and revenues and expect this to continue. We attribute this growth to our strategic focus shift on increasing sales to business customers. More recently, we have expanded our efforts to attract enterprise business customers. Margins in products sold to business customers have remained attractive, and we expect this trend to continue.

We continue to experience increased competition, particularly from telephone companies, cable overbuilders, over-the-top (“OTT”) video providers and direct broadcast satellite (“DBS”) television providers. Because of the levels of competition we face, we believe it is important to make investments in our infrastructure. We made elevated levels of capital investments between 2012 and 2015 to increase our cable plant capacities and reliability, launch all-digital video services, which has freed up approximately three-fourths of average plant bandwidth for data services, and increase data capacity by moving from four-channel bonding to 32-channel bonding. We expect to continue devoting financial resources to infrastructure improvements because we believe these investments are necessary to remain competitive.

The spin-off provided us the opportunity to further tailor our strategies to achieve greater operational focus and drive our return on investment. Our goals are to continue to grow residential data and business services and to maintain profit margins to deliver strong Adjusted EBITDA. To achieve these goals, we intend to continue our industrial engineering-driven cost management, remain focused on customers with high LTV and follow through with further investments in broadband plant upgrades and new data services offerings for residential and business services customers.

Our business is subject to extensive governmental regulation. Such regulation has led to increases in our operational and administrative expenses. In addition, we could be significantly impacted by changes to the existing regulatory framework, whether triggered by legislative, administrative or judicial rulings. In 2015, the Federal Communications Commission (the “FCC”) used its Title II authority to regulate broadband Internet access services in its Open Internet Order (the “Order”). According to the Order, under this regime, the FCC will forbear from systematic rate regulation of Internet access service at the subscriber level, which we believe will permit us to continue to manage data usage efficiently by establishing appropriate rates. However, the Order also imposes on all providers of broadband Internet access service, including us, obligations that limit the ways we can manage certain types of traffic. In June 2016, the U.S. Court of Appeals for the D.C. Circuit upheld the Order in its entirety. A petition for an *en banc* rehearing of the June 2016 decision upholding the Order is currently pending in the U.S. Court of Appeals for the D.C. Circuit. In addition, the change in administration and the newly-constituted FCC may take steps to revise the Order and the resulting rules. We cannot predict whether or not future changes to the regulatory framework that are inconsistent with the Order will occur, whether the petition for an *en banc* rehearing will be granted, or whether the decision of the U.S. Court of Appeals for the D.C. Circuit will be appealed, and if any such rehearing or appeal would be successful.

We serve our customers through a plant and network with 100% two-way capacity currently measuring approximately 750 MHz on average and DOCSIS 3.0 capabilities in all of our systems. Our technically advanced infrastructure provides for delivery of a full suite of data, video and voice products. Our broadband plant offers fiber-to-the-node with ample unused capacity and standard download speeds of 100 Megabits per second (“Mbps”), which meaningfully distinguishes our offering from competitors in most of our markets. In 2016, we substantially completed a multi-year investment program in our plant, which resulted in increased broadband capacity and reliability and which has enabled and will continue to enable us to offer even higher download speeds to our customers (at both the standard and enhanced data service levels), which we believe will reinforce our competitive strength in this area.

Table of Contents**Corporate History**

In 1986, The Washington Post Company (the prior name of our prior corporate parent, GHC) acquired from Capital Cities Communications, Inc. a number of other companies owning, in total, 53 cable television systems. The Washington Post Company paid \$350 million for these systems. The cable systems acquired in that transaction had approximately 350,000 subscribers in 15 Western, Midwestern and Southern states. All other mid-sized cable operators that existed when we were established have since exited the cable business.

Subsequent to the Capital Cities transaction, we completed over 30 acquisitions and dispositions of cable systems, both through cash sales and trades of certain of our cable systems for cable systems of other cable operators, ultimately increasing our customer count to the current total of approximately 657,000. We have been disciplined about the price we pay in acquisitions, acquiring new customers opportunistically at what we considered favorable prices. In the process, we have substantially reshaped our original geographic footprint and resized our typical system, including exiting a number of metropolitan markets. For example, we traded to other cable operators our cable systems in the Chicago, San Francisco, Cleveland and Indianapolis markets (which we acquired as part of the Capital Cities transaction) for cable systems in non-metropolitan markets that fit our business model.

While we are smaller than the nation's biggest cable companies, we have a record of consistent, long-term financial and operational success driven by our differentiated operating philosophy. We emphasize focus as opposed to scale, which is a departure from more conventional strategies in the cable industry, but is well suited to the markets in which we operate and enables us to take advantage of our strengths as a cable operator.

**NewWave Acquisition**

On January 18, 2017, we announced that we and Frequency Merger Sub, LLC, our wholly owned subsidiary, entered into an Agreement and Plan of Merger, dated as of January 17, 2017 (the "Merger Agreement"), with NewWave, RBI Blocker Corp., RBI Blocker Holdings LLC and GTCR-RBI, LLC, as equityholder representative, pursuant to which we have agreed to acquire all of the outstanding equity interests in NewWave. NewWave is owned by funds affiliated with GTCR LLC, a leading private equity firm based in Chicago. Under the terms of the Merger Agreement, we will pay a purchase price of \$735 million in cash, subject to customary post-closing adjustments. The closing of the transaction is subject to the receipt of certain regulatory approvals and other customary closing conditions. We currently anticipate that the transaction will be completed in the second quarter of 2017.

We expect to finance the transaction with \$650 million of senior secured loans and cash on hand. In connection with the entry into the Merger Agreement, we entered into a commitment letter on January 17, 2017, as amended and restated on February 13, 2017, with JPMorgan Chase Bank, N.A. ("JPMorgan"), Wells Fargo Bank, National Association, Wells Fargo Securities, LLC, RBC Capital Markets, Royal Bank of Canada, Toronto Dominion Bank, New York Branch, TD Securities (USA) LLC, SunTrust Bank, SunTrust Robinson Humphrey, Inc. and U.S. Bank National Association (the "Lenders"). Pursuant to the amended and restated commitment letter, and subject to the terms and conditions set forth therein, the Lenders have committed to provide us with \$300 million of incremental five-year term "A" loans and \$350 million of incremental seven-year term "B" loans to finance the transaction.

On February 13, 2017, we entered into an amendment to our existing credit agreement to permit, among other things, the incurrence of the \$650 million of senior secured loans expected to be used to finance the acquisition of NewWave and the other transactions contemplated by the Merger Agreement.

**Industry Overview**

Cable companies in the United States are typically fully integrated providers of data, video and voice services to residential and business customers in various geographic regions. A headend typically serves each of a cable company's cable systems, receiving data, video and voice service signals by connecting directly to the network backbone, which aggregates signals delivered through over-the-air broadcasting, fiber optic networks and satellite transmissions. From the headend, cable companies modulate, amplify and distribute these signals over a proprietary network of coaxial and fiber optic cable to the homes and businesses of subscribers. In addition to building their own network backbone or leasing physical access to the network backbone from telecommunications companies, cable companies also purchase licenses to provide their subscribers with access to cable television channels owned by programmers and distributed over the network backbone. Cable companies also typically sell advertising on their video channels. The cable industry has benefited from a progression of profitable new product introductions over the past 15 years, including, but not limited to, high-speed data service, high-definition and digital video service and Voice over Internet Protocol ("VoIP") voice service.

Table of Contents

Cable companies generate revenue by charging subscription fees to their residential and business customers, typically billed in advance on a monthly basis, at rates that vary according to the data, video and/or voice services for which customers subscribe, and the type of video and Internet access equipment furnished to them, as well as through advertising sales. The margins that a cable company can earn on its PSU offerings vary from product to product. Because of rising programming costs and retransmission fees, the profit margin on video services is generally lower than it once was and significantly lower than the current margins on data services. Despite lower margins on video services, the strategy of many cable companies is to market and sell all three PSUs as a single "triple play" package in order to maximize the number of PSUs per household. Many in the industry believe it is desirable to sell all three products as a package because they consider video service a gateway offering to sell data service and because fixed costs per customer can be spread over multiple PSUs. However, recent industry trends have been towards increases in data subscribers even as video subscriptions have declined.

Cable companies generally operate by establishing cable systems in geographic markets under non-exclusive franchises granted by state or local authorities for specified periods of time. The most sought-after markets by major cable companies have generally been the largest metropolitan markets. These markets are thought to offer the advantages of population density (which may permit efficient construction and operation of a cable distribution system) and attractive demographics, including customers with higher income-per-household than their counterparts in non-metropolitan, secondary markets, leading to lower price sensitivity and a willingness to purchase a greater number of PSUs.

**Our Strengths**

We have a variety of strengths as a cable operator, stemming from, among other things, historical and ongoing capital investments in our plant and our focus on serving customers in non-metropolitan markets. These strengths include the following:

*Attractive markets.* Our customers are located primarily in non-metropolitan, secondary markets with favorable competitive dynamics in comparison to major urban centers. In particular:

- We tend to face less vigorous competition from telephone companies than cable operators in metropolitan markets.
- Advances in technology often come later to our markets—for example, very few of our competitors offer fiber-to-the-home.
- Our subscribers tend to be value-focused, enabling us to save video services costs by not carrying expensive programming options with low subscriber demand.
- We are regionally diversified, reducing the impact that an economic downturn in a specific geographic market would have on our overall business.

*Deep customer understanding.* We have operated as a non-metropolitan cable business for over 20 years. In order to understand our customers' demands and preferences, we have conducted daily customer research for nearly two decades and currently conduct thousands of customer satisfaction surveys per year. We believe we have gained valuable insight into how to serve customers in non-metropolitan markets, including with respect to providing an optimal mix of video channel options, price points and best-in-class customer service levels. In addition, the vast majority of our employees, or associates, reside and work in our markets, providing local service that enhances the communities we serve.

*Superior broadband technology with ample unused capacity.* We offer our residential and business data customers Internet products at faster speeds than those available from competitors in most of our markets. Our broadband plant consists of a hybrid fiber coax ("HFC") network offering fiber-to-the-node with ample unused capacity. Our standard broadband offering for our residential customers is a download speed of 100 Mbps, which is at the high end of the range of standard residential offerings in our markets. Our enhanced broadband offering for our residential customers is currently a download speed of up to 1 Gigabit per second ("Gpbs").

Table of Contents

In addition, we have made significant investments in our business consistent with our strategic focus to enhance sales of residential data services and business services. We substantially completed significant, multi-year plant and product enhancements in 2016, which increased our broadband capacity and reliability. These initiatives caused us to incur several years of higher than usual capital spending. However, we believe the competitive benefits will be significant, particularly for data services. Among the enhancements in 2016:

- We continued to decrease the average number of data customers per unique service by aggressively splitting service areas (fiber nodes), which substantially improves data throughput during periods of peak usage, minimizing disruptions in data access speeds to our customers.
- We substantially completed a multi-year plant reinforcement project, which enhanced reliability and expanded average plant bandwidth to an average of 750 MHz.
- We completed a 30-month replacement of nearly all headend cable modem termination systems, allowing us to move from four-channel bonding to 32-channel bonding.
- We rolled out our 1 Gbps data service (GigaONE™) to nearly 70% of our residential customers based on homes passed as of December 31, 2016. We expect that this level of service will be available to all of the residential customers in our current markets by the end of 2017.
- We substantially completed a multi-year video product conversion to all-digital distribution, which has freed up approximately three-fourths of average plant bandwidth for data services at speeds up to and exceeding 1 Gbps.

We anticipate the foregoing capital projects will facilitate sustained increases in residential data and business services and customer satisfaction.

**Low cost structure and competitive pricing.** We believe our operating and capital costs, taken as a whole, are as low as or lower than any major cable operator. We attribute our low cost structure to a commitment to focusing on retaining our highest value customers, rather than seeking to obtain as many customers as possible, and the lower costs of operations available in a non-metropolitan market compared to a metropolitan market. In addition, because we operate our residential and business data services with a competitive plant and cost structure, we are able to offer our customers both attractive pricing and compelling products.

**Customer satisfaction.** We have a customer-focused approach, influencing how we are organized, how we sell our services and how we service our customers. For example, we offer a same-day-service guarantee in almost every one of our markets, which we believe none of our major competitors in our markets currently offer. We believe that our dedication to providing a differentiated customer experience is an important driver of our overall value proposition and creates loyalty, improves customer retention and drives increased demand for our services. We have always focused on customer satisfaction, with an emphasis on consistently benchmarking our customer satisfaction over time and relative to our competitors based on internally and externally generated customer-satisfaction data.

**Associate satisfaction.** We have also focused on associate satisfaction, believing our customers' satisfaction is tightly linked to our associate satisfaction. Associate satisfaction has been routinely measured over time internally and has been consistently high throughout the past decade, based on internal measurements. We currently measure our associate satisfaction annually. None of our employees have been unionized for over two decades.

**Experienced management team.** Our senior management team is comprised of senior executives who have significant experience in the cable industry. Our executive management team has an average tenure at Cable One (or its predecessors) of approximately 20 years, and we believe this team is deeply knowledgeable about cost and competitive conditions in our markets. They also understand and are deeply committed to our strategy, which we developed on a collaborative basis over many years.

## Our Strategies

We have a multi-faceted strategy that builds upon our long track record of focusing on the right markets, the right products and the right customers, as well as controlling our operating and capital costs. More specifically, our strategy includes the following principal components:

Table of Contents

**Focus on larger non-metropolitan markets.** We believe our decision over 20 years ago to concentrate on non-metropolitan markets has served us well, and we intend to continue to focus on offering our products primarily in these markets. The cable economics of non-metropolitan markets, for which we have optimized our strategy and our operations, are different from cable operations in major cities, and have yielded positive operating results for our business. Because price points for services in non-metropolitan markets are generally lower, and customers in non-metropolitan markets tend to subscribe to fewer PSUs, our average revenue per customer and our PSUs per customer are lower than they might be in metropolitan markets. However, many of our costs are lower than they would be in metropolitan markets. The dynamics of larger, non-metropolitan markets enable us to operate at attractive margins and earn substantial returns, while remaining consistent with our focus on meeting customer demand for low prices while simultaneously keeping costs down. In addition, we tend to face less vigorous competition from telephone companies than cable operators in metropolitan markets.

**Maximize Adjusted EBITDA less capital expenditures and drive profitable growth.** We concentrate on the products and customers that maximize Adjusted EBITDA less capital expenditures and provide the best opportunity for profitable growth. We believe residential video and residential voice face inexorable long-term declines. With respect to the video product, programmers are charging higher rates for content to cable companies providing video services (often for content for which viewership is declining), and cable companies have had to choose between absorbing those increases to the detriment of their margins or passing on the full cost to customers, which adversely affects customer demand. At the same time, the rapid expansion of OTT offerings via the Internet has given customers new alternatives to cable companies' video offerings. In addition, demand for cellular and smartphone offerings have reduced residential voice starts for us and others in our industry. As a result, we have reduced our focus on these two products and prioritized higher growth opportunities such as residential data and business services.

We have declined to cross-subsidize our video business with cash flow from our higher growth, higher margin products, which has resulted in our residential video customers declining at a faster rate than the industry average. Our residential video customers decreased by 12.4% in 2016 versus 2015 and by 19.8% in 2015 versus 2014. Our residential video revenues declined by \$37.9 million, or 11.4%, for the year ended December 31, 2016 versus 2015 and by \$29.0 million, or 8.0%, for the year ended December 31, 2015 versus 2014. While this strategy runs contrary to conventional wisdom in the cable industry, which puts heavy emphasis on video customer counts and maximizing the number of PSUs per customer by bundling and discounting services, we believe it best positions us for long-term success. For us, success in growing and retaining residential data and business services customers is far more important than the number of triple-play customers we have.

**Target higher value residential customers.** Since 2013, we have introduced rigorous analytics to determine the LTV of current and potential residential customers. We target marketing and customer service at customers who we believe are likely to produce relatively higher value over the life of their service relationships with us, rather than seeking to maximize the number of new customers. We analyze the net present value of every residential start and seek to identify customers with high LTV, who are more likely to buy data service, less likely to churn and more likely to pay on time. Seeking to retain and sell more services to residential customers with a high LTV has enabled us to earn higher profits with fewer customers and PSU subscriptions. We believe that optimizing the LTV of data-only customers as video and voice cord-cutting accelerates is both a necessity and an opportunity for our business.

**Drive growth in residential data and business services.** We believe our residential data and business services products provide attractive current and future growth opportunities. Our disciplined prioritization of residential data and business services is reflected in everything we do, including pricing, the allocation of sales, marketing and customer service resources, capital spending and the way we conduct negotiations with suppliers, especially video suppliers. During 2016, we continued to further diversify our revenue streams away from video as residential data and business services represented 54.2% of our total revenues versus 47.5% for 2015 and 42.0% for 2014. Our residential data revenues grew to \$344.2 million in 2016, a 16.9% increase versus 2015. We believe we have demonstrated that it is possible to decouple unit growth in our residential data and residential video businesses, which historically have been marketed as a package. Our data-only connects are growing significantly faster than any other segment of our residential business as we have focused on selling data-only packages to new customers rather than on cross-selling video services to these customers.

Our business services revenues grew to \$100.3 million in 2016, a 13.0% increase versus 2015. We expect to generate continued growth in business services by leveraging our existing infrastructure capabilities and footprint to offer higher broadband speeds than other providers in our markets and to expand our business services to attract more small, medium- sized and enterprise business customers.

**Continue our culture of cost leadership.** We believe our total combined operating and capital costs per PSU over the past decade have been among the lowest of any cable company with publicly reported numbers and that our operating margins compare very favorably with those of significantly bigger companies in the cable industry. This is the antithesis of normal cable economies-of-

scale expectations, where higher volumes are expected to create lower costs per PSU and increase operating margins. Rather than increasing our size and seeking cost savings through economies-of-scale, we have achieved our lower cost structure over many years by focusing on:

## Table of Contents

- serving non-metropolitan, secondary markets and not expanding into metropolitan markets, which contain different customer dynamics and would require us to implement additional operational components;
- the adoption of new technologies only after they have been tested by other companies in other markets, rather than incurring the level of capital expenditures necessary to be an early adopter of most new technologies;
- implementing a virtually centralized call center to receive inbound customer service calls and dispatch technicians across all of our markets, while keeping the majority of our call center associates in our non-metropolitan markets;
- standardizing our cable programming offerings across our markets, which reduces our customer service costs, in contrast to other cable companies that offer different programming packages in different markets;
- focusing on retaining and seeking high-LTV customers rather than trying to maximize the number of customers or PSUs per customer; and
- aligning our resources to emphasize increased sales of residential data services and sales to business customers and continuing our industrial engineering-driven approach to cost management, rather than committing resources equally to sales of all of our products.

We believe our strategy of focus has produced positive results. From 2011 through December 31, 2016, we have experienced a 70% reduction in bad debt; a 34% reduction in the frequency of telephone customer service calls, resulting in a 32% headcount reduction in telephone customer service personnel; a decline of 33% in the frequency of technicians being dispatched to customer locations, resulting in a 17% headcount reduction in the staff devoted to that function; and an overall headcount reduction of 453, representing a reduction, primarily through attrition, of more than 19% of our total workforce (1,877 associates as of the end of 2016). During this same period, both our customer and associate satisfaction have remained high or improved based on internal measurements and, in the case of customer satisfaction, externally generated data.

**Balanced capital allocation.** We are committed to a disciplined approach to evaluating acquisitions and internal investments, capital structure optimization and return of capital.

## **Our Products**

### *Residential Data Services*

For 2016, residential data services represented approximately 42.0% of our total revenues. We offer multiple tiers of data services with download speeds up to 1 Gbps to nearly 70% of our residential customers as of December 31, 2016 and up to 200 Mbps to our remaining residential customers. We expect that our 1 Gbps level of service will be available to nearly all of the residential customers in our current markets by the end of 2017. Our data services also include our Internet portal, <http://home.cableone.net>, which provides multiple e-mail addresses. To meet the increasing bandwidth needs of our customers who use multiple Internet-connected devices in the home, our customers may lease wireless modems to maximize their wireless Internet speeds.

### *Residential Video Services*

For 2016, residential video services represented approximately 36.0% of our total revenues. We offer a broad variety of residential video services, generally ranging from a basic video service to a full digital service with access to hundreds of channels. Our basic video service generally consists of local networks, local community programming, such as governmental and public access, and certain other channels, such as weather, shopping and religious channels. Our digital video service includes national and regional cable networks, music channels and an interactive, electronic programming guide with parental controls. We also offer premium channels, which include networks such as HBO, Showtime, Starz and Cinemax that generally offer, without commercial interruption, movies, original programming, live sporting events and concerts and other features. Our digital video customers, which we expect will include all of the residential customers in our current markets by the end of 2017, may also subscribe to our advanced services. Our advanced video services include TiVo DVRs, which digitally record programming and pause and rewind live programming, and high-definition set-top boxes, which provide high-resolution picture quality, improved audio quality and a wide-screen format and allow our customers to access Internet content on their televisions.

Table of Contents

Our TV Everywhere product enables our video customers to stream many of their favorite channels and shows to mobile devices and computers, expanding the value of our video service. Our TV Everywhere product includes over 75 of the most popular networks across a wide range of genres, including HBO and Cinemax.

***Residential Voice Services***

For 2016, residential voice services represented approximately 5.2% of our total revenues. Our residential voice service transmits digital voice signals over our network and is an interconnected VoIP service. Our voice services include unlimited local and long-distance calling, voicemail, call waiting, three-way calling, caller ID, anonymous call rejection and other features. Our voice services also provide international calling by the minute.

***Business Services***

We consider the data, voice and video services products we sell to our business customers as a separate product from our residential versions of these services. For 2016, business services represented approximately 12.2% of our total revenues. We offer multiple tiers of data, voice and video services for a variety of small-sized to enterprise-level businesses. We offer our business customers data services over our coaxial network with download speeds ranging from 25 Mbps to 500 Mbps, with varying upload speed options. In 2016, we began delivering data services over an Ethernet Passive Optical Network ("EPON"). This shared fiber architecture offers a mixture of symmetrical and asymmetrical internet speeds ranging from 50 Mbps and 2 Gbps. We expect to offer EPON in several additional markets each year for the foreseeable future. Both our coaxial network and our EPON data services offer the ability to have a single Internet Protocol ("IP") address or multiple IP addresses. Business voice services packages range from one line to multi-line options, including availability of all the most popular calling features like caller ID, call waiting, call forwarding and much more. Business video packages range from a basic video service tier to a comprehensive video selection including variety, news and sports programming in high-definition. We also lease fiber optic cable capacity on a wholesale basis to our business customers.

We offer dedicated bandwidth via fiber optic technology to medium-sized and enterprise-level businesses, in addition to wholesale services to other carriers. Our fiber optic-based products include Dedicated Internet Access and Ethernet Private Line with speeds ranging from 10 Mbps to 10 Gbps in scalable increments. Each of these products requires the use of IP-compatible equipment to use the service. We also offer Network to Network Interface connections to other carriers at multiple Points of Presence across the United States.

***Advertising***

For 2016, advertising sales represented approximately 3.4% of our total revenues. Our agreements with each of our programmers provide that we may sell a specified amount of time on our programmers' channels, during both local and national programming spots, to our advertising customers. We also produce television commercials for these customers. We also sell advertising space on select cable network websites.

**Competition**

We operate in highly competitive, subscriber-driven and rapidly changing environments and compete with a growing number of companies that provide a broad range of communications products, services and content to subscribers. Our competitors have historically included, and we expect will continue to include, over-the-air reception providers; DBS providers; telephone companies that offer data and video services through digital subscriber line ("DSL") technology or fiber-to-the-node networks; and other cable companies that have been granted a franchise to operate in a geographic market in which we are already operating.

Substantially all of our cable systems are in markets in which CenturyLink or AT&T is the established local telephone company and our primary competitor. The remainder of our cable systems are in markets where we compete with various other companies. CenturyLink, AT&T (through its U-verse brand) and other companies have overbuilt approximately 28% of our homes passed with fiber-to-the-node or other high-speed networks, such that they are able to offer data, video and voice services, including data services with high access speeds (albeit generally lower when compared to those that we offer). However, less than 3% of the customers in our markets have access to fiber-to-the-home from our competitors, which offer a triple-play product offering comprised of high-speed data, video and voice. Fiber-to-the-home facilitates greater access speeds than we are able to offer through our fiber-to-the-node HFC infrastructure at this time, although in the next few years we expect our access speeds to be comparable to those provided by fiber-to-the-home. In addition, on their own or via strategic partnerships or other arrangements with DBS operators that permit telephone companies to package the video services of DBS operators with telephone companies' own DSL service, landline voice and wireless voice services, some telephone companies are competing with our video programming and data and voice services. An example of such an arrangement is the merger of AT&T and DirecTV. We also face increasing competition for residential voice services from

wireless telephone companies, as some of our customers are replacing our landline voice service completely with wireless voice service.

## Table of Contents

In addition, new entrants with significant financial resources may compete on a larger scale with our video and data services. For example, several years ago Alphabet launched Google Fiber, which offers data and video services in several areas of the country, although none of the existing or currently announced cities are in regions in which we compete. Google Fiber's infrastructure consists of fiber optic wirelines, which is technologically superior to the DSL technology of certain of our competitors. Although Alphabet announced in the fourth quarter of 2016 that it was pausing its Google Fiber expansion in most of its potential Google Fiber cities, if Alphabet expands its Google Fiber offerings into our markets, it may be able to offer our current customers attractive pricing and technology, increasing competition in our markets.

A number of municipalities have also announced plans to construct their own data networks with access speeds that match or exceed those of our own through the use of fiber optic technology. In some cases, local government entities and municipal utilities may legally compete with us without obtaining a franchise from a state or local governmental franchising authority ("LFA"), reducing their barriers to entry into our markets. The entrance of municipalities as competitors in our markets would add to the competition we face and could lead to additional customer attrition.

Our video business also faces substantial and increasing competition from other forms of in-home entertainment and recreational activities, including video games, mobile apps and the Internet, as well as from other media companies. Internet and other media companies, including Alphabet, Amazon, Apple, Sling TV, Hulu and Netflix, increasingly offer video programming via OTT streaming on the Internet. Because of the significant size and financial resources of such companies, we anticipate that they will continue to invest resources in increasing the availability of video content on the Internet.

### **Employees**

As of December 31, 2016, we had approximately 1,877 full-time employees, and none were represented by a union.

### **Available Information and Website**

Our Internet address is [www.cableone.net](http://www.cableone.net). We make available free of charge through our website, <http://ir.cableone.net>, copies of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as soon as reasonably practicable after such documents are electronically filed with the Securities and Exchange Commission (the "SEC"). Printed copies of these documents will be furnished without charge (except exhibits) to any stockholder upon written request addressed to our Secretary at 210 E. Earl Drive, Phoenix, Arizona 85012. The SEC maintains a website, [www.sec.gov](http://www.sec.gov), that contains the reports, proxy and information statements and other information regarding issuers that file electronically with the SEC. Also, the public may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The contents of these websites are not incorporated by reference into this Annual Report on Form 10-K and shall not be deemed "filed" under the Exchange Act. Further, our references to website URLs are intended to be inactive textual references only.

### **Executive Officers**

The following table presents certain information, as of March 1, 2017, concerning our executive officers.

<b>Name</b>	<b>Age</b>	<b>Position</b>
Mr. Thomas O. Might	65	Executive Chairman and Chairman of the Board
Ms. Julia M. Laulis	54	President and Chief Executive Officer and Director
Mr. Michael E. Bowker	48	Senior Vice President, Chief Sales and Marketing Officer
Mr. Kevin P. Coyle	65	Senior Vice President and Chief Financial Officer
Mr. Stephen A. Fox	51	Senior Vice President, Chief Network Officer
Mr. Eric M. Lardy	43	Senior Vice President
Mr. Charles B. McDonald	41	Senior Vice President, Operations
Mr. Alan H. Silverman	63	Senior Vice President, General Counsel, Director of Administration and Secretary

Table of Contents**Mr. Thomas O. Might**

Mr. Might has been Executive Chairman of Cable One since January 2017. He has served as Chairman of the board of directors (the "Board") of Cable One since 2015 and as a member of the Board of Cable One since 1995. Mr. Might served as Chief Executive Officer of Cable One from 1994 to 2016 and as President of Cable One from 1994 to 2014.

Mr. Might joined The Washington Post Company in 1978 as assistant to publisher Donald E. Graham after serving a summer internship at the newspaper in 1977. He was promoted to Vice President-Production in 1982 and served in that position until 1987, when he became Vice President-Production and Marketing. In 1991, Mr. Might was named Vice President-Advertising Sales.

In 1993, Mr. Might was promoted to President and Chief Operating Officer of Cable One (formerly named Post-Newsweek Cable). He became President and Chief Executive Officer of Cable One in 1994 and was elected to the Board in 1995.

Mr. Might serves on the boards of the American Cable Association, CableLabs, and C-SPAN. Mr. Might was a Combat Engineer Officer in the U.S. Army from 1972 to 1976.

**Ms. Julia M. Laulis**

Ms. Laulis has been Chief Executive Officer and a member of the Board since January 2017 and President of Cable One since January 2015.

Ms. Laulis joined Cable One in 1999 as Director of Marketing-NW Division. In 2001, she was named Vice President of Operations for the SW Division. In 2004, she accepted the additional responsibility for starting up Cable One's Phoenix Customer Care Center. In 2008, she was named Chief Operations Officer, and in 2012, she was named Chief Operating Officer of Cable One. In January 2015, she was promoted to President and Chief Operating Officer of Cable One.

Prior to joining Cable One, Ms. Laulis served in various senior marketing positions with Jones Communications. Ms. Laulis began her 30-plus-year career in the cable industry with Hauser Communications.

**Mr. Michael E. Bowker**

Mr. Bowker has been Senior Vice President, Chief Sales and Marketing Officer of Cable One since 2014.

Mr. Bowker joined Cable One in 1999 as Advertising Regional Sales Manager. Mr. Bowker was named Vice President of Sales in 2012, and was promoted to Senior Vice President, Chief Sales and Marketing Officer in 2014.

Prior to joining Cable One, Mr. Bowker was with AT&T Media Services and TCI Cable, where he served in various sales management positions.

**Mr. Kevin P. Coyle**

Mr. Coyle has been Senior Vice President and Chief Financial Officer of Cable One since March 2015.

Mr. Coyle has more than 30 years of financial and operations experience. Prior to joining Cable One, he served with Elauwit Networks, a private provider of telecom services to MDUs as Chief Financial Officer from September 2014 to March 2015 and as Senior Vice President – Business Development from May 2014 to September 2014. From 2012 to 2015, Mr. Coyle served as a director and as the chairman of the audit committee of WPCS International Incorporated, a publicly traded provider of fixed wireless technology services for corporations. Previously, Mr. Coyle performed strategic planning for Charter Communications and Comcast Communications in their MDU and business sales area as Senior Vice President – Business Development of Comcast from January 2011 to June 2011 and as a Principal with KPC Consulting, an independent, private consulting firm, from 2009 to January 2011 and from June 2011 to 2014. Before that, Mr. Coyle served as Treasurer and Chief Financial Officer at Jones Intercable, a publicly traded cable television company with 1.4 million subscribers that was acquired by Comcast in 1999. Mr. Coyle has been the Chief Executive Officer of two start-up companies and the Chief Financial Officer of two others in telecommunications and high-tech fields.

Table of Contents***Mr. Stephen A. Fox***

Mr. Fox has been Senior Vice President, Chief Network Officer of Cable One since July 2015.

Mr. Fox started his career in 1988 as a programmer/operator for Cable One (formerly named Post-Newsweek Cable). Mr. Fox's current areas of responsibility include long range planning and the strategic evolution of technology roadmaps related to products, internal and external networks and capital allocation. Prior to his current position, Mr. Fox was named Senior Vice President, Chief Technology Officer in 2008.

***Mr. Eric M. Lardy***

Mr. Lardy has been a Senior Vice President of Cable One since January 2017.

Mr. Lardy joined Cable One in 1997 as a manager in one of our systems and held a variety of positions of increasing responsibility in marketing, operations, and system general management. Mr. Lardy was named Vice President, Strategic Planning and Finance in 2014, and was promoted to Senior Vice President in January 2017.

***Mr. Charles B. McDonald***

Mr. McDonald has been Senior Vice President, Operations of Cable One since January 2016.

Mr. McDonald joined Cable One in 2008 as an Industrial Engineer. Mr. McDonald was named Vice President, Customer Service Operations in 2014, and was promoted to Senior Vice President, Operations in January 2016.

Prior to joining Cable One, Mr. McDonald worked as a Senior Process Engineer for Three-Five Systems and Brilliant Corp.

***Mr. Alan H. Silverman***

Mr. Silverman has been Senior Vice President, General Counsel, Director of Administration and Secretary of Cable One since January 2015.

From 1986 to December 2014, Mr. Silverman was Vice President, General Counsel, Director of Administration and Secretary of Cable One. Prior to joining Cable One, he was Assistant Counsel at Newsweek, Inc. (then a subsidiary of The Washington Post Company), and he also practiced law at Hughes Hubbard & Reed in New York.

**Regulation and Legislation*****General***

Our data, video and voice operations are subject to various requirements imposed by the U.S. local, state and Federal governmental authorities. The regulation of certain cable rates pursuant to procedures established by Congress has negatively affected our revenue. Certain other legislative and regulatory matters discussed in this section also have the potential to adversely affect our data, video and voice businesses. The following discussion does not purport to be a complete summary of all of the provisions of U.S. Federal and state law that may affect our operations. Proposals for additional or revised regulations and requirements are pending before Congress, state legislatures, and state and federal regulatory agencies. We generally cannot predict whether new legislation, court action, new regulations, or a change in the extent of application or enforcement of current laws and regulations would have an adverse impact on our operations.

***Cable***

Title VI of the U.S. Federal Communications Act of 1934, as amended (the "Communications Act"), establishes the principal federal regulatory framework for our operation of cable systems and for the provision of our video services. The Communications Act allocates primary responsibility for enforcing the federal policies among the FCC and state and local governmental authorities.

Table of Contents

*Franchising.* We are required to obtain franchises from state or local governmental authorities to operate our cable systems. Those franchises typically are non-exclusive and limited in time, contain various conditions and limitations and provide for the payment of fees to the local authority, determined generally as a percentage of revenues. Failure to comply with all of the terms and conditions of a franchise may give rise to rights of termination by the franchising authority. The FCC has adopted rules designed to expedite the process of awarding competitive franchises and relieving applicants for competing franchises of some locally-imposed franchise obligations. This development, which is especially beneficial to new entrants, is expected to continue to accelerate the competition we are experiencing in the video service marketplace.

*Rate Regulation.* FCC regulations prohibit LFAs or the FCC from regulating the rates that cable systems charge for certain levels of video cable service, equipment and service calls when those cable systems are subject to "effective competition." In 2015, the FCC revised its rate regulations to create a presumption that all cable systems are subject to the effective-competition exemption unless proven otherwise. That decision has been appealed to a U.S. Federal court, and we cannot predict the outcome.

*"Must-Carry" and Retransmission Consent and Content Rules.* U.S. Federal law provides that a television broadcast station may, subject to certain limitations, insist on carriage of its signal on cable systems located within the station's prescribed area. As a result, certain of our cable systems must carry broadcast stations that we might not otherwise have elected to carry.

In other cases, we have been required to provide consideration to broadcasters to obtain retransmission consent, such as commitments to carry other program services offered by a station or an affiliated company, to purchase advertising on a station or to provide advertising availabilities on cable to a station, or to provide cash compensation. This development results in increased operating costs for cable systems, which ultimately increases the rates cable systems charge subscribers. In March and November 2014, the FCC and Congress imposed new requirements in this area including restrictions on broadcasters' ability to jointly negotiate with cable providers for carriage of their stations, and the FCC is seeking comment on possible changes to regulations in this area, which could affect our business. In July 2016, the FCC announced that it would not adopt additional rules governing good faith negotiations for retransmission consent, but it would be prepared to assist in negotiations when necessary. In September 2014, the FCC repealed its sports blackout rules, which prohibited cable and satellite operators from retransmitting any sports event that was blacked out on a local broadcast station.

*Independent Programming.* On September 29, 2016, the FCC initiated a rulemaking proceeding to adopt rules prohibiting certain practices that may affect the relationship between multichannel video programming distributors ("MVPDs") such as cable companies and independent programmers. The proposal examines whether certain "most favored nation" and alternative distribution method provisions in program carriage agreements should be prohibited, and whether program bundling practices by large programmers affect the ability of MVPDs to carry independent programmers. We cannot predict whether the newly-constituted FCC will pursue this proceeding, and, if so, how it will proceed.

*Pole Attachments.* U.S. Federal law requires most telephone and power utilities to charge reasonable rates to cable operators for utilizing space on utility poles or in underground conduits. In May 2010 and again in April 2011, the FCC adopted new requirements relating to pole access and construction practices that were expected to improve the ability of cable operators to attach to utility poles on a timely basis and to lower the pole attachment rate for telecommunications services. In October 2013, the U.S. Supreme Court declined to review a lower court's decision to uphold the FCC's pole attachment regulations. The FCC further revised its pole attachment rules in November 2015 to adjust the formula for calculating pole rental rates, which resulted in similar rates for telecommunications attachments and cable attachments, and eliminated the ability of utility companies to justify higher rates for pole attachments used to provide broadband Internet access service. The FCC's revisions to the pole attachment rate formula have been challenged in a U.S. Federal court by the utility companies, where the matter is pending. In the meantime, the appropriate method for calculating pole attachment rates for cable operators that provide VoIP services remains unclear, although the FCC's recent rule revisions to equalize pole attachment rates make this issue less significant. We cannot predict the extent to which these and other rule changes will affect our ability over time to secure timely access to poles at reasonable rates for our data, voice and video services. As a general matter, changes to our pole attachment rate structure could significantly increase our annual pole attachment costs.

*U.S. Federal Copyright Issues.* The U.S. Federal Copyright Act of 1976, as amended (the "Copyright Act"), gives cable systems the ability, under certain terms and conditions and assuming that any applicable retransmission consents have been obtained, to retransmit the signals of television stations pursuant to a compulsory copyright license.
