

Lisa Dyer

Lisa Dyer is the Executive Director of the GPS Innovation Alliance (GPSIA), which promotes GPS, GNSS, and complementary space-based PNT systems, their receivers and devices, and champions their vital roles in public safety, critical infrastructure, consumer products, and the global economy.

Lisa has over 25 years of experience as a leader at the intersection of public policy, national security, business, and technology, and has served in both the public and private sectors. She previously worked in San Francisco on artificial intelligence policy and in fundraising, supply chain management, and growth marketing for a startup. Lisa served as a government civilian at the U.S. Department of State, advancing U.S. business interests overseas, to include leading the programming for the 2017 Global Entrepreneurship Summit; coordinating policy discussions concerning technical and other intelligence operations; and evaluating export control policy and commercial satellite regulations. She also served as an Air Force acquisitions officer, managing satellite, reconnaissance aircraft, and drone sensor and data technology programs.

Lisa received her M.A. in Business Management from Antioch University and a B.S. in Political Science from the U.S. Air Force Academy.
