

J. David Grossman is Vice President of Policy and Regulatory Affairs at the Consumer Technology Association (CTA) where he leads the association's work on technology issues related to artificial intelligence, cybersecurity, and competition.

Prior to joining CTA, Grossman served as Executive Director of the GPS Innovation Alliance, where he led efforts to protect, promote, and enhance the use of GPS. He also served on the National Space-Based Positioning, Navigation, and Timing Advisory Board, which provides advice and recommendations on U.S. GPS and PNT policy.

With more than two decades of experience in technology and telecommunications policy, Grossman has worked extensively on issues affecting innovation, communications, and emerging technologies as Chief of Staff to FCC Commissioner Mignon Clyburn, Legislative Director to Congresswoman Anna Eshoo (D-CA), and Technology Counsel to the U.S. House Small Business Committee.

He holds a Master of Public Policy degree from George Mason University and a bachelor's degree in Political Communication from George Washington University's School of Media and Public Affairs.
