Biography

David M. Wulf
Director

David “Dave” Wulf joined the Department of Homeland Security in July 2011 as the Deputy Director of the Infrastructure Security Compliance Division (ISCD) within the Office of Infrastructure Protection and became Director of ISCD in July 2012. ISCD leads the national implementation of the Chemical Facility Anti-Terrorism Standards (CFATS) to assess high-risk chemical facilities, promote collaborative security planning, and ensure that covered facilities meet risk-based performance standards. In addition, ISCD manages the Department’s efforts to establish and implement a regulatory regime for detonable ammonium nitrate products.

Prior to joining DHS, Mr. Wulf held a number of positions at the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), serving—among other roles—as Chief of the Bureau’s Office of Regulatory Affairs and as Director of the National Center for Explosives Training and Research (NCETR). As Chief of ATF’s Office of Regulatory Affairs, Mr. Wulf oversaw the establishment and implementation of regulatory frameworks in the areas of firearms and explosives. As Director of the NCETR, Mr. Wulf managed ATF’s explosives-related training initiatives and built training and research partnerships with Federal, State, local, tribal, and international law enforcement agencies, as well as with private-sector and academic institutions. He was also responsible for establishing a permanent site for the NCETR in Huntsville, Alabama, and for managing the activities of the Bureau’s National Canine Training and Operations Center.

Before becoming Director of the NCETR, Mr. Wulf spent nine years in ATF’s Office of the Chief Counsel, including service as ATF’s Senior Counsel for Field Operations and as Acting Associate Chief Counsel for the Office’s Firearms, Explosives, and Arson Division. He also served as Acting Deputy Assistant Director of ATF’s Office of Public and Governmental Affairs.

During his time at ATF, Mr. Wulf focused on a variety of initiatives to prevent and respond to bombings and other major incidents, working closely with partners from across the law enforcement and homeland security communities. He worked to advance a National Strategy to Combat Terrorist Use of Explosives in the United States, to develop ATF’s Explosives Threat Assessment and Prevention Strategy, to address issues relating to the threats posed by detonable ammonium nitrate fertilizers, and high-power rocket motors, and to manage efforts to evaluate the efficacy of explosives-tagging technologies. He also served as a member of the interagency team that drafted the National Response Plan and chaired the Emergency Support Function 13 (“ESF-13”—Public Safety and Security) National Steering Committee. Additionally, as co-chair

of the National Explosives Detection Canine Advisory Board, Mr. Wulf played an important role in establishing national standards for the certification of bomb-sniffing dogs.

Prior to joining ATF, Mr. Wulf worked in the Criminal Division of the U.S. Department of Justice and also served as Associate Counsel at the U.S. Department of Veterans Affairs. Raised in Peabody, Massachusetts, he received his Bachelor of Arts in Government and History from Georgetown University and his law degree from the Emory University School of Law.
