

Committee on Energy and Commerce
U.S. House of Representatives
Witness Disclosure Requirement - "Truth in Testimony"
Required by House Rule XI, Clause 2(g)(5)

1. Your Name: <i>Steven C. Nadeau</i>		
2. Your Title: <i>Partner, Hanigman</i>		
3. The Entity(ies) You are Representing: <i>None</i>		
4. Are you testifying on behalf of the Federal, or a State or local government entity?	Yes	No <i>X</i>
5. Please list any Federal grants or contracts, or contracts or payments originating with a foreign government, that you or the entity(ies) you represent have received on or after January 1, 2013. Only grants, contracts, or payments related to the subject matter of the hearing must be listed. <i>None</i>		
6. Please attach your curriculum vitae to your completed disclosure form.		

Signature: _____  _____ Date: *7/1/16*

STEVEN C. NADEAU, ESQ.

Honigman Miller Schwartz and Cohn LLP

Contaminated Sediment Expertise

Honigman Miller Schwartz and Cohn LLP (HMSC) is a Michigan-based law firm with a full service Environmental Law Department. One of the many areas of HMSC's environmental expertise includes assisting clients on the challenging issues relating to the evaluation and remediation of contaminated sediments, as well as Natural Resource Damages issues. Steven C. Nadeau, the chair of the HMSC Environmental Law Department, has developed a substantial national sediment practice. Mr. Nadeau has been working on sediment issues extensively since 1992.

Mr. Nadeau was instrumental in founding the Sediment Management Work Group ("SMWG") in 1998 and has served as its Coordinating Director since that time. The SMWG is an *ad hoc* organization of entities with potential responsibility for contaminated sediments. The SMWG is dedicated to the advancement of risk-based, scientifically sound approaches for managing contaminated sediments and has provided a strong leadership role in influencing the emerging national and international policy on contaminated sediments. Through his position as Coordinating Director of the SMWG, Mr. Nadeau has gained considerable insight into state-of-the-art contaminated sediment management practices, knowledge of the leading experts in the area, as well as a working relationship with many of the key regulators involved with the issue of contaminated sediment.

Mr. Nadeau has been involved in numerous meetings with U.S. EPA senior management at Headquarters over the past several years, discussing sediment policy issues. He also has co-chaired and addressed numerous national sediment symposiums, sediment training courses, state environmental agencies, and industry groups on the topic of a risk-based decision making framework for managing contaminated sediment and numerous other sediment topics.

With respect to representation of individual clients, Mr. Nadeau served as lead counsel on behalf of Manistique Papers, Inc. on the Manistique Harbor sediment site in the Upper Peninsula of Michigan from 1992-1996. Mr. Nadeau was intimately involved in the development of the comprehensive, proactive approach which originally resulted

in selection of a precedent-setting capping remedy for the harbor. He later negotiated a cash-out for his client.

Mr. Nadeau also has represented individual or multiple PRPs on complex sediment sites around the country, including Michigan, Illinois, Indiana, Minnesota, Ohio, Wisconsin, New Jersey and New York. In addition to his role as the primary advisor at various sediment sites, Mr. Nadeau also is called upon to provide ancillary support to supplement the existing site team in a number of areas including peer reviewing documents (*e.g.*, RI/FS reports, feasibility studies and remedy selection white papers) to optimize and advocate compliance and consistency with national sediment policy, such as the EPA Sediment Guidance. Based on his involvement on the national sediment scene for over 15 years, Mr. Nadeau also is often called upon to serve in a cameo role to provide resources, ideas and strategy on complex sediment sites.

In addition, Mr. Nadeau is an expert on the federal contaminated sediment program, including U.S. EPA's Contaminated Sediment Technical Advisory Group (CSTAG) and is able to advise and assist companies interested in optimizing the effective utilization of this important review opportunity at complex sediment sites. Likewise, Mr. Nadeau can provide assistance in strategic and effective use of the Superfund Sediment Resources Center (SSRC).

Mr. Nadeau is also an expert on the Great Lakes Legacy Act (GLLA) and has assisted companies in preparing, submitting and securing approval of GLLA funding for remedial activities at contaminated sediment sites in the Great Lakes. Mr. Nadeau has been a leader in the effort to upgrade and improve the current GLLA statutory provisions in order to provide increased eligibility of a variety of projects and to streamline or eliminate several of the administrative impediments currently slowing progress at GLLA projects.

Mr. Nadeau is a 1977 *cum laude* graduate of Boston College Law School and is a 1974 *magna cum laude* graduate of Boston College.
