## Attachment – Additional Questions for the Record

### The Honorable John Shimkus

1. Witnesses noted in testimony that it is unfair that, under current law, local jurisdictions may be subject to penalties for failure to attain standards, even though the failure is due to emissions from sources that are outside the jurisdictions' authority to control.
  - a. To assist with our identifying the problem fully, would you provide examples of the types of emissions or pollutants, natural or anthropogenic, that are outside your state's control and that may impede your ability to reach attainment of air quality standards so as to subject you to fees or other penalties?
  - b. Are there circumstances in your view in which relief from penalties may be provided either to local or to state level jurisdictions?
2. Hearing testimony raised concerns about the quality of modeling data. When promulgating nonattainment designations in air quality control regions, should the Administrator base such designations on modeling predictions that do not incorporate state/local air agency input in lieu of the state's air quality monitoring data? .
3. Are there any other considerations we should take into account concerning H.R. 806 that you believe we did not cover sufficiently in the hearing?
