WORK EXPERIENCE

AFL-CIO, Washington DC

2014—present

Senior Safety and Health Specialist

- Coordinate labor input on regulatory, policy and advocacy for worker safety and health issues.
- Serve as a subject matter expert on safety and health regulations and legislation, and on the role of safety and health in organizing, collective bargaining and training.
- Represent 55 national and international affiliated unions and their members, fostering positive and collaborative relationships between diverse groups of stakeholders, including members of academia, labor and regulatory agencies at the national and state levels.
- Develop and publish the annual *Death on the Job: The Toll of Neglect* report covering national and state level, workplace injury, illness and fatality data, with analysis on specific industries and demographics.

U.S. Department of Labor—OSHA, Washington, DC

2010—2014

Industrial Hygienist, Directorate of Standards and Guidance

- Worked alongside stakeholders to develop regulatory and guidance documents related to health standards and other occupational health hazards.
- Represented OSHA on technical committees, boards, inter-agency work groups, and hearings.
- Served as team lead on several projects in the development of reports, draft standards and guidance documents, which included risk assessment, establishing requirements or recommendations for monitoring employee exposure, medical surveillance, limits on exposure levels, methods of compliance, handling and use of hazardous substances, employee training, recordkeeping, sanitation and other protective measures.
- Detailed to field office in Jacksonville, FL, to work with compliance officers at worksites.

U.S. Environmental Protection Agency—Indoor Environments Division
Washington, DC

2009—2010

Environmental Health Fellow

- Coordinated and managed state grant and legislative initiatives to increase awareness of and reduce radon exposure risk through the Radon Leadership Initiative and social media.

New York Taxi Workers Alliance, New York, NY

Summer 2008

Intern, Occupational Health Internship Program

- Pioneered effort to develop a taxi design standard to promote driver health.
- Designed survey instrument and interviewed taxi drivers to identify prevalence and severity of vehicle design flaws and adverse health effects; and recommended control measures.

Natural Resources Defense Council

Summer 2007

Policy Fellow

- Co-authored a white paper addressing scientific journals' conflict of interest policies.
