

CHAMBER OF COMMERCE
OF THE
UNITED STATES OF AMERICA

NEIL L. BRADLEY
EXECUTIVE VICE PRESIDENT &
CHIEF POLICY OFFICER

1615 H STREET, NW
WASHINGTON, DC 20062
(202) 463-5310

May 15, 2019

The Honorable Paul Tonko
Chairman
Subcommittee on Environment and
Climate Change
U.S. House of Representatives
Washington, D.C. 20510

The Honorable John Shimkus
Ranking Member
Subcommittee on Environment and
Climate Change
U.S. House of Representatives
Washington, D.C. 20510

Dear Chairman Tonko and Ranking Member Shimkus:

The U.S. Chamber of Commerce writes to you regarding the hearing, “Legislative Proposals to Protect Americans at Risk of PFAS Contamination & Exposure.”

Per- and polyfluoroalkyl substances (PFAS) are a large and diverse class of chemicals with unique properties that have been used in a broad number of beneficial applications for years. Heightened attention to potential health effects of certain PFAS chemicals has understandably led to increased public concern and interest in new regulatory protections in this area.

The Chamber supports action to address these concerns, and is committed to proactively working with legislators, regulators, and all stakeholders to establish risk-based standards that protect human health and the environment. Collaboration and transparency are critical to any such efforts, and the government, industry, and the scientific community must work together to share knowledge and focus resources on the highest priorities based on actual risk, while utilizing existing regulatory processes to proactively address both current and future issues.

There are close to 5,000 PFAS class chemicals. The chemistries among these chemicals vary substantially and have different characteristics, profiles, and uses. Any federal action – legislative or regulatory – should be undertaken on an individual chemical basis, rather than as a class. Science should guide such decisions and neither legislation nor regulation should predetermine outcomes.

We also encourage the development of a consistent approach and clear timelines for assessing and regulating specific PFAS across all relevant federal agencies to ensure that government regulations, actions, and communications are consistent and coordinated for maximum effectiveness. Further, federal agencies should prioritize clear, science-based risk communication and regulatory transparency to ensure that the American public can better understand the actual risks associated with specific PFAS chemicals.

We look forward to working with you on this important matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Neil L. Bradley". The signature is fluid and cursive, with the last name "Bradley" being more prominent and ending in a large, sweeping flourish.

Neil L. Bradley
