

**Amendment to Authorization and Oversight Plan**  
**Offered by Rep. Huffman**

On page 6, at the beginning of the “WATER AND POWER” heading, insert:

“The Committee is aware of unscheduled water releases by the Trump administration from the Terminus and Schafer Dams in California, purportedly to support wildfire response efforts in Southern California. However, due to a lack of conveyance infrastructure, these water releases never reached Southern California and were ultimately wasted, reducing local water supplies for critical needs. Additionally, the water releases deviated from established flood safety protocols, jeopardized public safety, and were carried out with minimal notice, leaving local authorities insufficient time to adjust or plan accordingly. These sudden, uncoordinated actions raise serious concerns about the Trump administration’s water management practices. The Committee will conduct appropriate oversight to ensure that critical water supplies are managed in a responsible manner that maintains public safety while meeting the needs of critical municipal, agricultural, environmental, and wildfire response efforts.”
