

"The American Cement Association (ACA) and our members thank Chairman Westerman and Representative Golden for introducing the Standardizing Permitting and Expediting Economic Development Act (SPEED Act). By modernizing the NEPA review process, clarifying when NEPA is triggered, and establishing judicial review limits, the SPEED Act will result in quicker infrastructure construction and better use of scarce taxpayer dollars. Not only do ACA members provide a foundational building material for our nation's infrastructure, but they also depend upon energy production and carbon management technologies that could require NEPA review. For these reasons, the SPEED Act is a win-win for the cement industry, and the ACA is proud to support it."

Sean O'Neill  
Senior Vice President of Government Affairs  
American Cement Association
