

*“The AI Supply Chain Alliance supports bipartisan efforts in Congress, such as the Standardizing Permitting and Expediting Economic Development (SPEED) Act, to cut permitting delays for energy, manufacturing, and construction projects. America needs a more predictable regulatory framework to build the infrastructure that will drive AI leadership, economic growth, and job creation. We applaud House Committee on Natural Resources Chairman Bruce Westerman and U.S. Rep. Jared Golden for introducing this bill, and we look forward to working with Congress to enact comprehensive permitting reform legislation.” – **The AI Supply Chain Alliance (AI-SCA)***

The [AI Supply Chain Alliance \(AI-SCA\)](#) is a national coalition of companies that design, build, and deploy the physical infrastructure behind America’s AI systems, from chips and servers to cooling, power, and data center platforms. With members across the country, AI-SCA advocates for policies that expand U.S. manufacturing, modernize the grid, and strengthen the AI supply chain to ensure America leads in building as well as innovating in AI.
