

**Statement of ACI-NA President and CEO Kevin M. Burke on H.R. 4776, the SPEED Act
November 20, 2025**

“There is widespread agreement that NEPA reviews must be completed more efficiently. For airports, protracted and complex federal reviews have delayed critical infrastructure projects and driven up costs—slowing efforts to build new runways, expand terminals, and meet record air travel demand. We look forward to working with Congress on meaningful reforms that provide clear direction to the federal agencies.

“ACI-NA applauds the leadership of Chair Westerman and Rep. Golden in advancing the SPEED Act. Their bipartisan legislation would remove many burdensome federal requirements and provide a clearer, more predictable framework for NEPA reviews. We strongly support this effort to streamline the NEPA process, accelerate federal determinations, and ensure that airports nationwide can move forward more quickly with responsible, much-needed capital development projects.”
