

The United Association of Union Plumbers and Pipefitters (UA) strongly urges you to vote in support of the bipartisan SPEED Act. America's infrastructure depends on a permitting system that is efficient, predictable, and responsive. Unfortunately, today's process is often slow, inconsistent, and burdened by delays that prevent critical projects.

The SPEED Act is a vital step towards repairing this broken system. By reducing unnecessary red tape and improving the overall clarity of the permitting process, the SPEED Act will help our nation complete infrastructure projects faster, reduce associated costs, increase job stability for our members, and without compromising key environmental safeguards.
