

*“The Virginia Chamber of Commerce is pleased to support the bipartisan SPEED Act by Chairman Westerman and Rep. Golden as a constructive step toward improving the federal permitting processes. In shaping Blueprint Virginia 2035, the business community identified the need to consolidate reviews, reduce duplication, and establish clear and enforceable timelines, all while maintaining rigorous environmental protections. The SPEED Act reflects meaningful progress toward these goals, and we look forward to working with Congress to advance comprehensive permitting reform that supports continued economic opportunity for all Virginians.”*
