

Curriculum Vitae

Jason G. Demers
President & CEO Tacitus Ventures Corp

Jason Demers has been a leader and entrepreneur in Calgary's energy and production industry for the past decade. In the course of his career, he has built broad experience of the energy industry across exploration, infrastructure construction, and production.

2015-Present - President and Chief Executive Officer, Tacitus Ventures Corporation

A founding partner of Tacitus Ventures Corp, an Alberta corporation dedicated to the identification and development of helium resources in North America. As President and CEO, Demers has assembled a world class management team, and a rich portfolio of prospective opportunities which will, when brought to production, help ensure continued North American helium self sufficiency.

2007-2015 - Founder and Chief Executive Officer, Delfan Energy Resources Corp.

Delfan Energy assembled an extensive portfolio of assets throughout the Northern Rockies amenable to enhanced oil recovery techniques.

2001-2007 - Founder & Chairman, Association of Accredited Corporations of Alberta (AACA)

The Association of Accredited Corporations of Alberta (AACA) was established to facilitate communication between the energy industry and regulatory bodies in Alberta, British Columbia and Saskatchewan. Today, the AACA continues to be an effective and widely respected voice representing the regulatory interests of Canada's energy, power and transportation industry.

2002 - 2007 - Chief Executive Officer, Marex Canada Limited

Building upon his extensive field experience developing and implementing management systems for regulatory compliance, Demers founded Marex, an engineering consulting, and inspection firm with a roster of clients including Shell Oil, ConocoPhillips, Northwest Upgrader, StatOil Hydro, MEG Energy, and InterPipeline. Mr. Demers served as Chairman until 2013.

1995-2001 - Early Career

Demers spent his early career in the energy industry in a variety of administrative and regulatory management roles, implementing and auditing regulatory compliance programs for various energy companies and acting as liaison with government regulatory authorities
