Professional Experience

Responsible Offshore Development Alliance Washington DC

Executive Director, 2018 – present

- Establish strategic and administrative policies for rapidly growing non-profit organization.
- Identify areas of mutual interest to broad cross-section of commercial fishing industry organizations and coordinate input regarding offshore wind and other developments.
- Develop innovative platforms for regional science, monitoring, and research efforts to better inform offshore leasing processes, fisheries management, and implementation of ecosystem-based management practices.
- Collaborate directly through close partnerships with federal and state governments and private sector offshore developers to develop solutions for sustainable fisheries with other ocean uses.

Kelley Drye & Warren, LLP Washington DC

Associate Attorney, 2013 – 2018

- Provided legal and policy advice regarding natural resource issues in supply chain management to diverse clients including trade groups for fisheries, agriculture, shipping, energy, and technology.
- Assisted clients with federal and state rulemaking procedures, litigation, permitting, and enforcement proceedings arising from the National Environmental Policy Act, Magnuson-Stevens Act, Administrative Procedure Act, Endangered Species Act, Lacey Act, Jones Act, MARPOL, Energy Policy Act, and other laws.
- Supported clients in activities regarding regional ocean planning and prevention of Illegal, Unreported and Unregulated (IUU) fishing through innovations in technology and governance.
- Performed significant pro bono work, earning the William W. Scott Pro Bono Award in January 2016.

Integrated Statistics / National Marine Fisheries Service Narragansett RI

Deputy Director of Large Marine Ecosystems Programs, 2012 – 2013

- Coordinated policy and scientific support programs and drafted best practices for large marine ecosystem (LME) management agreements with international and national partners including the United Nations; formulated budget for U.S. LME Program, in addition to drafting budgets and grants for specific LME activities totaling \$7 million; managed international community of LME practitioners and served as main communication liaison among 17 projects.

New England Fishery Management Council Newburyport MA

Fishery Analyst, 2008 – 2012

- Planned, developed, and drafted Fishery Management Plan for the commercial and recreational groundfish fishery in federal waters; participated in the U.S./Canada Transboundary Management Committee, negotiating and drafting complex bilateral fisheries agreements; performed economic, biological, and social impact analyses of potential management actions in accordance with applicable laws including the Magnuson-Stevens Act and National Environmental Policy Act, including collecting and analyzing complex data sets, responding to comments from the public and government agencies, and presenting information to the Council and the public in various forums.
