

Fred Zalcman is Ørsted Energy Wind Power's Head of Market Development and Government Affairs for the US. His work focuses primarily on creating robust, self-sustaining markets for offshore wind energy.

Zalcman has nearly 30 years of experience in the energy field as an attorney and policy analyst. His career has centered on promoting market structures and regulatory policies that are supportive of energy efficiency, renewable resources and clean distributed generation. Prior to joining DONG Energy, Zalcman was Managing Director of External Affairs for the Eastern U.S. for SunEdison, the world's largest renewable energy developer, where he spearheaded legislative and regulatory efforts resulting in the exponential growth of distributed solar across multiple state markets. Previously, Zalcman was the Executive Director of the Pace Law School Energy and Climate Center, one of the nation's preeminent sustainable energy research, education and advocacy groups.

Zalcman has served on a number of gubernatorial, legislative and agency advisory boards providing guidance and counsel on clean energy policy and program development. He has also taught energy and natural resources law, and has written and lectured extensively on energy and environmental matters. The Association of Energy Engineers named him the Northeast Region's Renewable Energy Innovator of 2009.

Zalcman received a B.A in History from Washington University in St. Louis, and a joint degree in Law and Public Administration from Indiana University.
