

# KYLE MOSELLE

---

## SKILLS & ABILITIES

---

- Effective communicator, facilitator, coordinator, mentor, and leader
- Proven ability to incorporate scientific information into regulatory decisions
- Critical and creative thinker
- Demonstrated ability to implement federal and state environmental laws and policies
- Refined public speaking and presentation techniques relative to various audiences
- Inspired public administration and policy practitioner

## EXPERIENCE

---

- |                       |  |
|-----------------------|--|
| June 2017 - Present   | Associate Director, Alaska Department of Natural Resources, Office of Project Management and Permitting <ul style="list-style-type: none"><li>• Key responsibilities include implementing core services within the Office's mission, strategic planning, budgeting, executive-level administration, and management of the statewide, multi-agency Large Mine Permitting Team for 12 mineral development projects with a total annual budget of approximately \$2 million.</li><li>• Special duties include direct engagement with the Province of British Columbia to ensure hard rock mines permitted in transboundary watersheds, which drain from British Columbia into Alaska, do not impact Alaska interests.</li></ul>   |
| Nov. 2011 – June 2017 | Large Project Coordinator, Alaska Department of Natural Resources, Office of Project Management and Permitting <ul style="list-style-type: none"><li>• Key responsibilities included coordinating state permitting reviews for multiple mineral development projects in Alaska, representing the State of Alaska as a cooperating agency during federal environmental reviews, and coordinating state agency engagements with the U.S. Forest Service to implement the Tongass Land and Resource Management Plan.</li></ul>  |
| Nov. 2007 – Nov. 2011 | Habitat Biologist, Alaska Department of Fish and Game, Division of Habitat <ul style="list-style-type: none"><li>• Key responsibilities included conducting reviews of private and public agency project plans for impacts to fish and wildlife resources and their habitats to ensure compliance with department statutory authorities and consistency with regulations of the Alaska Coastal Management Program. This required me to appropriately apply fish and wildlife resource and habitat data to permitting, project reviews, and land use planning processes. I was responsible for conducting field inspections of permitted and proposed activities, which typically required trapping and identifying anadromous fishes, writing accurate, concise reports documenting my findings and recommendations, and nominating water bodies to the Anadromous Waters Catalog.</li></ul> |

## EDUCATION

---

- Aug. 2015      M.S. Public Administrations (natural resource policy concentration)  
*University of Alaska Southeast, Juneau Alaska*
- Dec. 2004      B.S. Marine Biology (mathematics minor)  
*University of Alaska Southeast, Juneau Alaska*

## COMMUNICATION

---

My work history demonstrates a high level of verbal and written communication skills and abilities. I regularly prepare and deliver internal and public presentations using a variety of formats to communicate complex statutory, regulatory, policy, and process-related information to both technical and non-technical audiences. I frequently develop formal written correspondence that conveys technical information, as well as departmental or state-level policy positions, to other state, federal, Tribal and international government agencies, project proponents, and public stakeholders.

## LEADERSHIP

---

I am a proven self-starter with an inclusive, measured leadership style. Through my MPA degree I developed a firm understanding of public administration and program evaluation theories, with an emphasis in New Public Service, which promotes citizen engagement in public administrative processes. I prefer to work through team approaches, and my recent work history demonstrates my abilities to build team cohesion among technical and policy staffs.

## SUBJECT MATTER EXPERTISE

---

I'm an expert in interagency coordination related to multi-jurisdictional permitting processes required for large or complex natural resource development projects in Alaska, particularly hard rock mines, timber management, and stream restoration projects.

Specific to mine regulation, I have coordinated reclamation plan approvals and negotiated financial assurance conditions for all five of Alaska's operating hard rock mines. I serve as a subject matter expert for matters related to long-term reclamation, care, and maintenance activities, including the use of trust funds as appropriate mechanisms for ensuring such obligations are fully funded in the future.

I also possess expertise regarding the National Environmental Policy Act, and I often represent the State of Alaska as a Cooperating Agency during federal environmental reviews of hard rock mines in Alaska.
