

February 24, 2020

The Honorable Mike Levin
1626 Longworth House Office Building
Washington, DC 20515

Dear Representative Levin:

On behalf of the Center for Transportation and the Environment (CTE), I am writing in support of legislation you introduced, the *Green Spaces, Green Vehicles Act*. A national non-profit organization, CTE's mission is to improve the health of our climate and communities by bringing people together to develop and commercialize clean, efficient, and sustainable transportation technologies. To achieve this, we advocate for programs that will reduce greenhouse gas emissions and combat the climate crisis through the development and deployment of zero-emission vehicles (ZEVs).

I can think of no better environment to deploy ZEVs than in public lands across the United States. Your legislation, H.R. 3681, will provide the necessary assistance and direction to implement zero-emission vehicle charging and hydrogen fueling infrastructure on U.S. National Park Service (NPS) and United States Forest Service (USFS) lands and to help those agencies promote the use of zero-emission vehicles (ZEVs) in their fleets.

Thank you for your leadership in putting a focus on the benefits of ZEVs that need to be made available on our nation's public lands. As a member-supported non-profit, non-governmental organization, CTE works daily to improve the efficiency and sustainability of the United States' energy and transportation systems. We look forward to working with you to achieve our vision of a carbon free US transportation system.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dan Raudebaugh", is written over a light blue circular background.

Dan Raudebaugh
Executive Director
Center for Transportation and the Environment
