

Things to know:

The tool uses census tracts . Census tracts are a small unit of geography. They generally have populations  of between 1,200 - 8,000 people.

Communities that are disadvantaged live in tracts that experience burdens. These tracts are highlighted  on the map.

The tool ranks most of the burdens using percentiles . Percentiles show how much burden each tract experiences when compared to other tracts.

Thresholds , or cutoffs, are used to determine if

U.S. territories note

Not all the data used in the tool are available or used for all U.S. territories.
