

Biography of Nicholas Lugansky:

Nicholas Lugansky leads the mining and critical minerals business line at SLB. He brings almost three decades of experience in the mining, petrochemical, and chemical industries. Prior to joining SLB, Nicholas had a long career with two of the largest EPC companies: Fluor and Bechtel.

Throughout his career, Nicholas has been involved in securing and delivering some of the largest and most challenging mining and metals, petrochemical, and chemical projects around the world. Today, he focuses on finding technological solutions to bring sustainable technologies to the production of critical minerals to power the electrification and energy transition. Some of these solutions are a well-to-product integrated lithium production, in-situ mining, mine exploration improvements, and many more. Nicholas is trained in Civil Engineering, International Business, and Political Science. He also holds graduate degrees in International Affairs and Economics.
