April 12, 2021

Dear Representatives Biggs, Gosar, Kirkpatrick, Lasko, O'Halleran, Schweikert, and Stanton:

As the highest elected leader of the Fort McDowell Yavapai Nation, a sovereign tribal nation in Arizona, on behalf of tribal leadership I write to ask you to cosponsor H.R.1884, the Save Oak Flat Act.

Chi'chil Bildagoteel, known as Oak Flat, is a Traditional Cultural Property listed on the National Register of Historic Places located in the Tonto National Forest (TNF) in southeastern Arizona. The Oak Flat area plays a vital role in tribal religion, tradition, and culture. Since time immemorial, native people have come to Oak Flat to participate in ceremonies, to pray, to gather medicines and ceremonial items, and to seek and obtain peace and personal cleansing.

Tribal leaders and allies have been working for over 18 years to protect the Oak Flat area from foreign mining conglomerates – Rio Tinto and BHP Billiton – who, through their joint venture Resolution Copper Mining, LLC, seek to develop the largest and deepest copper mine in North America. As part of a closed-door, backroom deal during the last days of a lame-duck Congress in December 2014, the Southeast Arizona Land Exchange (land exchange) was included as Section 3003 of the FY15 NDAA, P.L. 113-291. The land exchange transfers 2,422 acres of TNF land, including the sacred Oak Flat area, to Resolution Copper in exchange for Resolution Copper-owned parcels that will go to the Department of the Interior and the U.S. Forest Service.

As part of the legislation, the land exchange is subject to NEPA (Sec. 3003 (c)(9)) as well as appraisals of the lands to be exchanged and public review of the appraisals (Sec. 3003(c)(4)). However, TNF, under the Trump Administration, failed to comply with NEPA and other applicable federal laws, and they failed to complete the required appraisals of the lands to be exchanged. Instead, TNF rushed to publish the Final EIS on Jan. 15, 2021, to artificially start a 60-day clock under Section 3003(c)(10) to give away sacred Oak Flat to Resolution Copper to pave the way for its mine that will destroy Oak Flat, large swaths of TNF, and other surrounding areas with no simultaneous commensurate conveyances of Resolution Copper-owned land to the federal government. On February 11, the Advisory Council on Historic Preservation (ACHP) declined to sign the Programmatic Agreement under the National Historic Preservation Act (NHPA) Section 106 process preventing its execution, stating “[i]t is clear that the proposed undertaking would destroy significant historic properties, including the highly significant Oak Flat, and the measures in the PA are not sufficient to adequately resolve those adverse effects.”

On March 1, 2021, USDA directed the Forest Service to withdraw the Notice of Availability and rescind the Final EIS and draft Record of Decision. USDA noted that rescinding the Final EIS will ensure the Forest Service complies with “the environmental, cultural, and archaeological analyses required” and concluded that “additional time is necessary to fully understand concerns raised by Tribes and the public and the project’s impacts to these important resources and ensure the agency’s compliance with federal law.” Importantly, USDA noted that because the

land exchange was directed under the FY15 NDAA that “long term protection of the site will likely require an act of Congress.”

Although flawed, the withdrawn Final EIS acknowledged that Resolution Copper’s proposed mining activities will directly, adversely, and permanently affect numerous sacred springs, traditional areas, burial locations, and other cultural places and experiences of high spiritual and cultural value. The massive mine will also cause irreversible destruction to thousands of acres of public lands and contaminate already scarce water sources. The block-cave mining technique will create a 1.8-mile wide crater over a thousand feet deep. The mine will consume more than 637,000 acre-feet of water and require over 40 miles of pipeline through large parts of the TNF to slurry out toxic waste and ore concentrate. It will also require the construction of massive utility and road corridors that could span 500 feet in width. This mine will deplete and contaminate precious water resources in the region and result in a toxic waste dump that will be taller than the Washington Monument and potentially span over 15,000 acres.

The Save Oak Flat Act will repeal Section 3003 and withdraw the Oak Flat area from mining laws to protect this sacred area forever. On behalf of our people and future generations that will feel the lasting impacts of this mine, we respectfully request that you cosponsor the Save Oak Flat Act. Protecting tribal sacred sites and precious natural resources is essential to upholding the federal trust responsibility and ensuring the wellbeing of all Arizonans.

Sincerely,

A handwritten signature in black ink, reading "Bernadine Burnette". The signature is written in a cursive, flowing style.

Bernadine Burnette, President
Fort McDowell Yavapai Nation
