

It is about time this work is being done on behalf of our indigenous brothers and sisters from all over the United States. As a former boarding school student I would like to add that I was molested at Wrangell Institute back in F/Y 1970/71 school. All through the year, I DID NOT want to see the person who had done this, but it was nearly impossible because the person was there daily and we had no place to run and hide. Those folks we told, were not believing us about what was happening and we were lied to about our situation, It's been 52 years and EVERY time I hear kids being abused and/or molested it brings me back to my own dreadful situation. I would be more than willing to share more as I need more healing.
