AFFIDAVIT

To be filled out by women who have had an abortion

The State of New Jersey

County of Monmouth

BEFORE ME, the undersigned authority, on this day personally appeared Teresa Dzialow (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: Hackensack Medical Cntr August 4, 1988
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? No If not, explain: I told them I did not want an abortion and was treated like a pariah by the doctor hospital and f.o.baby. They wouldn't talk to me - only the baby's father (he was paying) The doctor told me "it was no big deal - you'll get over it"
- 3) Were you adequately informed of the consequences of abortion? No I was told there was none of course by my boyfriend + society, but also by a well-respected doctor and hospital.
- 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No I had a benign lump removed from my breast in 1998.
- 5) Did anyone pressure you into having an abortion? Yes If so, who? Stephen G. Donegan, the father of my baby and Dr. Perianne Petras, my ob-gyn
- 6) How has your abortion affected you? It replays in my mind 24 hrs a day. Seeing children, pregnant women hurts. I've lost my best friend because of my child. I don't trust doctors (being a diabetic, that's rough) I don't trust hospitals. I cry every day. I have no forgiveness for myself - I feel that I should have been able to stop them - since telling them to stop didn't matter
- 7) How has your abortion affected others in your life? I don't let other people into my life. Only dogs + cats. I don't trust easily. I don't forgive myself for not fighting harder - it shouldn't be that way.
- 8) Based on your own experiences, what would you tell a woman considering abortion? That it's a child that's being terminated, not a pregnancy. That there are alternatives to having an abortion, and that a man's rights should never outweigh a woman's rights. Pro-abortionists usually have never had to suffer one themselves.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? I was always a firm believer in a woman's rights - until I found out the hard way that pro-choice only means pro-abortion. It should be pro-abortion and anti-abortion, not pro-choice vs. pro-life. No one cared about my choice, no one cared about my rights.

BEFORE ME, the undersigned authority, on this day personally appeared Brenda Hallahan (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: August, 1977 Philadelphia Pa.
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: I went to Planned Parenthood and requested an abortion. I was not given any information except where to go and when to be there. No one even asked if I was sure I wanted to do this.
- 3) Were you adequately informed of the consequences of abortion? No Basically I was told it would be a quick and easy procedure.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____
- 6) How has your abortion affected you? It wasn't until I had children that I realized I had taken a life. I had bought into the lie that this would end a pregnancy, but no life was involved. There's a lot of guilt and sorrow knowing you ended the life of your own child just for your own convenience.
- 7) How has your abortion affected others in your life? Not that I know of.
- 8) Based on your own experiences, what would you tell a woman considering abortion? Don't do it. You will regret it for the rest of your life. Just because you can't see your child, it is alive, it is living and growing. Put your child first and choose life.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? Anyone who thinks someone has the right to take someone else's life just because they have control over the situation is grossly wrong. This is as much a holocaust as what Hitler did to those he determined were unwanted. Women have been lied to for too long. Life is beautiful and our babies are alive and we must stop being selfish and give them life.

- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? It not only kills a child, it can devastate a woman physically - emotionally, psychologically. It makes me very angry that women are told the lie of abortion

AFFIDAVIT

To be filled out by women who have had an abortion.

The State of New Jersey
County of Atlantic

BEFORE ME, the undersigned authority, on this day personally appeared M [redacted] P. K [redacted] (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Atlantic City NJ Jan '76, June '79 - Paoli, PA.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I knew the procedures being done - what they were. I was not informed of the consequences of abortion either times.
- 3) Were you informed of any link between abortion and breast cancer? no Have you had breast cancer? no
- 4) Did anyone pressure you into having an abortion? no If so, who? _____

5) How has your abortion affected you? I still have feelings of shame + guilt. It wasn't until recently that I confided in a woman at our church who volunteers at a crisis pregnancy center + told her story at National Right to Life Day during a church service. None of my family members know of my abortions, except my husband who was the father of both babies. I know God has forgiven me, but I don't think I've forgiven myself.

6) How has your abortion affected others in your life? My husband + I rarely speak of them. I feel he too carries guilt, but he was not as affected by them as I was. He has read through a father's healing Bible study book, maybe that helped him also.

7) Based on your own experiences, what would you tell a woman considering an abortion? Not to have it. There are other options that are life giving - not life taking! To have to live with the fact that I have murdered 2 babies weighs heavy on my soul, especially to teenagers, I say. It's NOT the answer! It's not the solution! It's death!

8) Based on your own experience, what would you tell a court that believes abortion should be legal? Ask the mother who has had a miscarriage what she lost - A baby or just tissue? Ask the woman who is infertile what she longs for; to feel the life growing within her or an empty womb? Ask the woman who has had an abortion what she feels like after her baby's life has been torn from her womb, and you will clearly see that abortion is not the answer - it's just a cover-up - a quick fix - a lie straight from hell that destroys lives - Those of the baby, the mother, the father + the family.

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? NO If so, who? _____
- 5) How has your abortion affected you? I had to overcome feelings of Guilt, shame, FEAR. When I walked out of the abortion clinic a piece of me was missing. I was very angry. Afraid of being rejected so I wouldn't let people get close to me. Trouble with intimacy with my husband who was the father of the baby. I kept people at arms length even my 3 children. I became pregnant again August of 1976 and had a daughter MAY 31, 1977. It took me 15 years to begin to deal with the fact that I murdered my child.
- 6) How has your abortion affected others in your life? I have kept back a part of me from my family. Just this year Jan. 21, 2003 I sold my 3 children. My daughter cried for 1 hour. We haven't talked much about it.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? It's not going to erase your pregnancy. The choice has consequences for life. Everything God created you for as far as nurturing and protecting life is damaged. You will have times of extreme depression, anger suicidal thoughts.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Legalizing a procedure that says murder is lawful is wrong. This procedure affects the mother of the unborn child the father and both their families. People of our nation are so broken and hurting because of abortion. Families are missing or more members because of abortion. There is so much anger bitterness and strife in people because of abortion. Stop the killing of the innocent.

AFFIDAVIT

BEFORE ME, the undersigned authority, on this day personally appeared Deborah Ann Ocasio (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: _____
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: NO
3. Were you adequately informed of the consequences of abortion? NO
4. Were you informed of any link between abortion and breast cancer? NO
Have you had breast cancer? NO
5. Did anyone pressure you into having an abortion? not really, the fact that the father didn't seem to care one way or the other and neither did I care about much more than myself.
If so, who? the father and me and the "rights" of the feminist movement I embraced.
6. How has your abortion affected you? I will never forget it. I was bitter and angry for many years and my self and family suffered for it. I was unable to forgive and held a grudge against the father (my husband), unable to be intimate with him and developed addictive behaviors.
7. How has your abortion affected others in your life? I am not able to be a loving mother to my born children at a time when bonding should have been happening. My gram and now is unable to trust and form commitments. Relationships were not sincere on my part.
8. Based on your experiences, what would you tell a woman considering an abortion? That aborting their child is not the answer to their problems (including using it as birth control), it is the beginning of problem after problem. Choosing abortion goes against our very "womanhood" and some measure of closing our hearts and suppressing our thoughts will occur to help ourselves deal with killing our own children.
9. Based on your own experience, what would you tell a court that believes abortion should be legal? That abortion is not and never has been about caring about me, but really about making money off of my crisis and natural inclination to self (ishness). Also, so much information is withheld from women and even covered up, making it seem conspiratorial. No information about risks, no information about any affects, and my fears were discounted as most women's are.

- 6) How has abortion affected you? I cried non-stop for 2 years - anything would set me off + slept for months - straightening my closet for 15 minutes each day but sleeping the rest of the time. I felt I had no right to do or have anything because I had killed my child. I am an elementary school teacher. I would not bear the sight of other children. I forced myself to work with teens but was suicidal on the anniversary of the baby's death for 10 years my pastor pulled me off the walls with focus on the Lord. I DID NOT SEE A DOCTOR FOR 10 YEARS. I AM DIVORCED WITH NO ALIMONY SINCE 1988. RECEIVED FOOD FOR 10 YEARS. FOOD STAMPS SINCE 1994. UNEMPLOYED. PRAYERFUL + PRO-LIFE SINCE 1979. WAS TOLD FLA BOARD OF ED DOESN'T HIRE PRO-LIFERS
- 7) How has your abortion affected others in your life? HUSBAND HAD UTERECTOMY 2 WKS AFTER ABORTION SO THERE WOULD BE NO MORE ABORTIONS. COUNSELOR SAID HE BLAMED ME, THOUGH HIS STATEMENT THAT I HAD NOT ASKED HUSBAND'S
- 8) Based upon your experience, what would you tell a woman considering abortion? YOU ARE BETTER OFF FALLING OFF A CLIFF AND DYING THAN HAVING AN ABORTION AND LIVING WITHOUT THE JOYS AND SORROWS YOUR CHILD WOULD HAVE BEEN.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? ABORTION IS A KIDNAP + RAPE THAT KILLS A CHILD. THAT YOU PAY FOR. A MAN ENTERING A WOMAN'S WOMB WITH ILL INTENT HAS JUST RAPED HER. A DOCTOR DOING TO A PATIENT WITHOUT KNOWLEDGE + CONSENT IS KIDNAP. HIPPOCRATIC OATH EXPRESSLY FORBIDS ABORTION. ONLY MISFIT DOCTOR WOULD DO AN ABORTION ON ANYONE.

- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? not yet.
- 4) Did anyone pressure you into having an abortion? YES If so, who? My friend said to do something about it.
- 5) How has your abortion affected you? WAYS I would never have thought. The emptiness in my heart. The emotional withdrawal - I cannot have children now. - If I had known then the loss is irreplaceable, painful. I would have kept my fear of cancer - about my health. I suffered depression - about my health.
- 6) How has your abortion affected others in your life? they don't know - yet.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? NO - I'd try to talk her out of it and show her other alternatives, so she wouldn't feel trapped, such as adoption.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? this was never God's plan - it benefits no one. BEFORE ME, the undersigned authority, on this day appeared Thelma A. Barreto, who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- 1) When and where did your abortion occur? 1989 - Englewood, N.J.
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No If no, explain: Just explained that a "mass" (of tissue) would be removed.
- 3) Were you adequately informed of the consequences of abortion? Absolutely Not.
- 4) Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- 5) Did anyone pressure you into having an abortion? Yes No If yes, who? _____
- 6) How has abortion affected you? Emotionally abortion was very very difficult to handle. The waves of guilt would follow me for weeks and years of which I could turn back time and not had one. It is made to sound like nothing more than a medical procedure to remove tissue. Truthfully, however abortion is the abrupt killing of a life before the baby reaches full term and delivery. Once the egg and sperm meet life is formed - not a mass of tissue! That baby is formed and alive at the earliest of days.
- 7) How has your abortion affected others in your life? Caused deep grief to my ex-husband and others that knew.
- 8) Based upon your experience, what would you tell a woman considering abortion? To consider adoption before abortion. Abortion interferes with the natural order of procreation. It is not intended to help - it hurts and goes on "killing" (emotional + physical at times) long after.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell the court that abortion is the equivalent of murder, therefore, why consider it to be legal! There are innocent lives that cannot defend themselves. Someone has to cry out on their behalf!

This is what came to me when I was praying about whether I should accept the opportunity to do this testimonial...

- Pride will be one of my hardest struggles. As I learn more about the meaning of "pride" I'm realizing that it's not self pity or saying you're not worthy. It's anytime I am more concerned with myself than with God. Remind myself to be humble and not to seek the praise, approval, pity or any emotion from my fellow man. This testimonial is not about me, it's about showing the glory of God with my life.

I started to list out my life before Christ, and I realized that a detailed list of the past won't adequately describe anything. So I've decided to show a glimpse of the person I was with some excerpts from my old journal. Bear with me....I know some of you have heard some of these already. This is Thelma BC...

- There's this overwhelming deadness in me sometimes which I can only describe as human pain. All of my organs are twisted and drop to the pit of my stomach. My heart is hollow. I see no beauty in myself.
- I actually thought of killing myself. I know it's wrong, I know what's right, yet I can't achieve it. Everyone says that no one can really love you until you love yourself. Well someone convince that girl inside of me of that fact because she's still sitting inside waiting to be saved by someone. She can't feel herself unless she's loved by another. She doesn't know her worth unless someone tells her. She should know, but she doesn't and she can't grasp that concept. Why am I so useless?
- What do I want? I want to be enveloped in the soft folds of my guardian angel's wings. The melodic words "Everything will be okay" whispered in the breeze. The warmth of my angel's love penetrates every particle of my being and at last I feel healed. I feel peace. I feel secure in my own skin. Protected forever and always from the darkness of human nature.
- I'm getting that feeling again...that feeling I've tried over and over again to explain and express but am never successful. All of my internal organs collapse and fall to the pit of my stomach as the rest of my body cringes in nervous pain. Tension is everywhere and I feel like someone has instantaneously tied me up into a million knots. I can't breathe. It felt like this when he was on top. I thought he'd never finish, it would never end. ~~I began to pray and beg for it to kill me, instead I had to smile and pretend I was enjoying it. But I had to be careful because if I acted like I enjoyed it to much an accusation would immediately follow.~~ Why did it bring him so much satisfaction to hurt me? Constant need of approval and always looking for ways to prove my love for him. Begging for affection like a worthless animal. No other form of humiliation could be worse. Why do such atrocities exist in human nature? How could the creator of endless remarkable wondrous things also create monsters of the dark? I guess if there were no hell then there would be no heaven. Even so, please show me the way out of this hell and into my heaven. I want to just fall into a cloud and never surface again.
- Each time since has been a self masochistic way of reliving it, reliving the pain, degradation, and torture. I'm torturing myself by turning any relationship I have into an abusive one towards myself. Hoping that the next person who hurts me

will hurt me enough to push me over the edge and finally give me enough hate to end it all. Help me...all I want is to drink myself into oblivion and pass out so that my brain and body would cease to function. How many pills would it take to leave this world in the least amount of pain?

- Here is my own personal definition of the term "love": the gift of unconditional caring and giving, unselfish, true, honest, never-ending trust embodied in one unspeakable emotion which (when real) is felt in every given moment much more than it is ever said. This is my humble opinion. By this definition I don't think I've had the privilege to experience such an emotion at this point in my life. Though I loved the child I killed. My baby will forever be with me, living inside of me, sharing my heart. I don't care if it was only a month, it lived in me. Sometimes I imagine what my life would be like today if my choice were different: I wouldn't finish school, I would have left him for the sake of my child, I would endure shame from others but that would not compare with the shame I feel at this very moment. I would be working and trying to support my child. My freedom will be gone, but I live in my own prison today of guilt and emotional turmoil. There was no reason good enough for me to kill my baby. I murdered for the worst reasons...selfish, pride, and I was weak, too weak to stand up for my child's life. I killed my love and I don't deserve anyone else's.

This is the kind of entry I write nowadays...

- Psalm (50-51) The Lord has no need for any physical sacrifices or offerings for He is the creator of all and everything of this world belongs to Him. By offering to the Lord we are strengthening our faith and trust in Him. Each time we sacrifice an earthly desire we are removing a shackle that keeps us attached to this material world and we come one step closer to Him. How can I sacrifice to God today? This is my sacrifice; I offer to Him my broken spirit, my broken heart, my sins. I hand over to Him...myself. Trusting that He will rebuild and heal me and all I need from this day forth is to draw from Him and His love, to see myself through His eyes.
- Matthew (15) What goes into our mouths, what we eat, see, touch, these do not matter, do not make us unclean. Including what has been done to us, our past, and our experiences. It's what comes out of us, what we choose to learn to keep from these experiences that will determine whether we are unclean or clean. Make sure that everything we teach, speak, and absorb from our walks throughout life be clean.
- John (3:10-15) Why is it so hard for people to believe in God, His miracles, His teachings? We believe so easily in other things we cannot see, hear, touch, or see. We believe in science and our teachers. Is it because men are born of a sinful nature and it's always easier for us to fall into sin than to climb the mountain of righteousness? But to fall is to fall into nothing but darkness and the reward of climbing the highest mountain is unparalleled beauty.

I am undeserving and I am unworthy of His love, but it has been given to me. That's how great He is, and I will not forsake Him and His love. I will be grateful and cherish it, for He has cherished me and saved me not just once but three times. Once when He protected me in my mother's womb and moved her to give birth to me, once when He

would not let me take my own life, and once when He touched me with His spirit so that I may follow Him the rest of eternity and never be lost again. Thank You Jesus. Thank You God. I Love You.

The first time I was brought to TCC, I remember the person who brought me asked me "so who's Thelma? I never got to know you, tell me about yourself" or something along those lines. Of course I went into the whole explanation of myself, the whole list of facts and events that I spared all of you from hearing today. I don't know if he remembers this part but he rudely interrupted me and said rather loudly "Thelma! You don't *know* everything. You have no idea." A part of me for the most part was really insulted and irritated although I didn't show it, and another part of me was stirred because I knew it was absolutely true. I was full of BS and I had formulated this perception and idea of who I was with the lies that surrounded me, what had been done to me, the mistakes that I've made, and the people around me. Thank you for showing me otherwise. I am eternally grateful for that and for everything I learned and will continue to learn from everyone around me, most importantly God.

I am so grateful, humbled, appreciative of everything now...every moment that I have in this life. Included the past because God was with me the whole time and He knew that all that happened to me would help me today with my understanding. Within this last month alone I have been blessed and graced with a lifetime, to have felt Him and be at complete peace for even one brief moment is enough for me to seek Him for the rest of eternity no matter what hardships, grief, or pain I will be dealt in this life. Some people have asked me what its like or why and my answer is that it was like living in house where the only light available was artificial light...light bulbs that could burn out at any moment and you are left in fear and darkness again. God is sunlight, real light that will never fail and is constant, warm, joy, life. Day after day it will be there...some days it may be hard to see or feel...but you know that its there. The amazing thing is that all anybody needs to do is to open the door and walk out of your house. I was at the camp for a day in Ojai and I asked, "What is it? Is it a conscious leap of faith or is it an undeniable rude awakening?" Honestly I still don't have a complete answer and no one can ever have a complete answer because we are human and full of folly and whatever my interpretation of what knowledge I receive from God, its still only my interpretation. Seek Him, seek life and you will find an answer. From my minimal understanding and my experience, for me it was a perfect combination of both. And it's a never-ending process. Each time I freely and willingly take a step further to seek Him, I receive immeasurable amounts of "undeniable rude-awakenings". He awes me and fuels me to seek Him further. In God I have found my floor, light, air, life.

KeeGee: I found my floor.

Mommie: You don't have to worry about me anymore. I finally know how to love myself and everyone else. I'm so thankful to you and daddy. I'm so thankful to the Lord for blessing me with being born to you.

I've had two abortions in the 1980's. The children were conceived with love but destroyed on the basis, of not knowing more what shall be done for them and me. I've always thought getting pregnant was impossible. Until the year 2000 in which I conceived my first child. During the five years my emotions was so confusing, thinking I have post-partum Depression

I can "get rid of the memories, one can see what about, the ones in your head"

The mental break down occurred 1980-1982. In which I conceived two children with love. But aborted the two with the input of the babies father and my mother. Then 1983-1988 endured three years of College at Rutgers-21 University.

②

Meet the father of the kids in
1979-1980. Built a relationship from
then until 6-1983. Then departed
because I did not want to have
sex. Just finish having my second
abortion, which then had two
abortions in the year of 1979-1983.

Felt as though we both was
not financially ready. I was not
working neither was he. Both still
living with parents. Also wanted
to further my education. He just
came from down south, Georgia
to Newk NJ. Not sure what his
goals were. He just ed hated
his mother. That was a no
no in my world. Believe sister
~~she~~ introduced him to his wife.

His Brother ~~she~~ informed me
the summer or fall of 1983, that He
~~and his sister~~ was pregnant. Then my
sister ~~she~~ same year informed
me that he was getting married.

Meet ^{his} brother ~~she~~
across town one day, these brothers
are the aborted father family members.

3

Then meet again at my sister's house ~~where~~ the aborted father and his brother at the time I had my two year old daughter with me.

This has been the first time I've ~~met~~ meet the aborted father, from 1983 until 2000 then again in 2002.

I would like to know can I contest a marriage on the grounds of not knowing the individual longer than a year or 4 years.

The parties knew one another for only 3 to 4 months which inspired a seed.

Before the parties meet only one was involved in a four year relationship.

Also one party had just agreed to a woman having two abortions.

Can it also be that the ~~B~~ older party entrapped the younger party because of the seed, child.

I would like to pursue charges of filling a law suit against the aborted children's father.

Since ~~he~~ he was able to ~~conceive~~ conceive another child after my second abortion. He was able to get married, keep a job and enjoy his life with his new family.

Myself was going through torment every year. I would like to sue him for the pain and suffering I've endured for ~~20~~ twenty years and more.

He was not there for me during or after the abortions. Still today he wants to have sex. Please explain this logic, of this type of actions from a man.

The opinions of www.makingabortionrare.com is the right type of knowledge that needs to be taught to our future mothers and fathers of the future. Please lets live ~~and~~ ^{and} grow

1970 Roe vs. Wade
Abortion is legal

In the 1980-1982 years I became pregnant. With the consent of my mother and the children's father, I've aborted the kids. The two never asked me to carry the children full term.

This episode in my life have been tearing me up inside. Every day I try to live for my aborted children. I do miss my kids. Never stop longing or loving them.

To this day, I do not know what happened to my children. Once the procedure was over, the hospital Nur Beth Israel, just let me go. No conversation about the procedure or what I should do next. They did not offer birth control help or psychological or physical help.

went home like nothing happened to me. came to the hospital with child left with no child or counseling.

Here in 2005, I still want and miss my children, ~~when~~ within the years of me dealing with not having sex with the father. He engaged with sex to another, conceived with the other and married. This occur one to two years after my abortions.

He or my mother ~~re~~ never talked to me about what I went through. My mother bore five children her self. She since has deceased.

From 1982 until 2000, the idea of getting pregnant was something I thought was impossible because of the abortions.

would like to see them both if possible.

"Fa an" pressured me into my decision.

5) How has your abortion affected you?

I HAVE MUCH REGRET, & I ALSO HAVE IRREGULAR MENSTRUAL CYCLES. I HAVE GUILT & NOW REALIZE IT IS MURDER. I KNOW IT WAS THE WORST DECISION I HAVE EVER MADE IN MY LIFE.

6) How has your abortion affected others in your

life? THERE IS REGRET & BROKENNESS IN HEARTS. SEPARATION IN BOYFRIEND RELATIONSHIP. MUCH DEPRESSION ON BOTH SIDES OF MOTHER & FATHER OF UNBORN CHILD.

7) Based on your own experiences, what would you tell a woman considering an

abortion? THERE ARE POSITIVE OPTIONS INSTEAD OF MURDER. EVERY CHILD IS A GIFT & THE CHILD IS INNOCENT & WAS KNIT TOGETHER IN THE WOMB BY THE CREATOR HIMSELF. THERE ARE PEOPLE WHO CAN HELP & COUNSEL YOU. NO ONE HAS A RIGHT TO TAKE A LIFE.

8) Based on your own experience, what would you tell a court that believes abortion should be

legal? THEY SHALL NOT MURDER! EVERY LIFE CREATED SHOULD BE ALLOWED TO LIVE & NOT BE TAKEN AWAY BY A PERSON'S DECISION. IN MY SITUATION, I WAS NEVER INFORMED WHAT A UNBORN GOES THROUGH, MY EMOTIONS LED TO ABORTION, FEAR & PAIN. MANY MILLIONS OF MURDERS ARE COMMITTED BY MY SAME EXPERIENCE. IT IS WRONG! THE LAW SHOULD PROTECT INNOCENT BABIES, SO THEY NOT GET THE DEATH PENALTY!

"I have read the above and foregoing statement and the same is true and correct."

BEFORE ME, the undersigned authority, on this day personally appeared Jackie Clark (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: Planned Parenthood - El Paso, TX (1985)
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No, long term effects were most definitely not addressed - nor the fact that it was more than the removal of tissue.
- 3) Were you adequately informed of the consequences of abortion? No. Information received was more on procedure and the importance of BCs.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No; no
- 5) Did anyone pressure you into having an abortion? If so, who? No

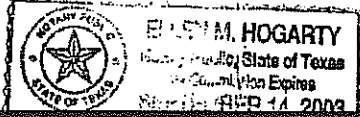

- 6) How has your abortion affected you? Emotionally/psychologically. It really affected my self-esteem; level of trust; relationship with spouse (father of baby) that later ended in divorce. Relationships w/ others especially males.
- 7) How has your abortion affected others in your life? Marriage ended in divorce; therefore, spouse, daughters, and self are having to deal with emotional issues of the family, breaking up ex-husband is having to deal with lots of deep-seated anger.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? If she cannot support the child to give it up for adoption (1) that "tissue" is truly a baby from the moment of conception, (2) the affects of abortion are emotional, physical; spiritual, (3) affects on family - every member, (4) importance of counseling, (5) now this one decision will affect her life (6) importance of prayer, (7) empathy.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Absolutely not, young, immature girls/boys tend to base their decisions on pride, fear, or other irrational factors. They need good counseling and support services. This is human life we are dealing with. The effects of abortion are long-term and those involved are looking for a quick fix. Abortion is not the answer. I would elaborate on the long-term effects and the importance of educating sex ed in schools needs to be carefully scrutinized, modified.

*most are not mature enough to make such a grave decision.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 1976 Santa Fe, NM
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. I was not informed of stages of a babies development. My baby was treated as a growth to be removed. I was not aware of potential dangers.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? NO If so, who? _____

5) How has your abortion affected you? Once I was married, I became pregnant and had overwhelming guilt. I was sure I'd loose my baby as a punishment for aborting my first baby. Even now I am ashamed and angry that I was not fully informed. I don't believe my parents were fully informed either. I often wonder if it was a boy or girl.

6) How has your abortion affected others in your life? No one else knows. I deprived my children of another brother or sister.

7) Based on your own experiences, what would you tell a woman considering an abortion? To research what she's doing. It is a dangerous surgical procedure for her that can lead to an increased risk in breast cancer. She needs to look at ultrasounds of developing babies. They are humans with human baby attributes. At some point you will feel guilty of murder.

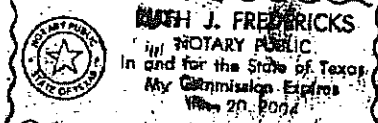

8) Based on your own experience, what would you tell a court that believes abortion should be legal? That it's murder. It's the destruction of a human life. In ancient Roman history the unwanted babies in jars to die + leave them outside. It's a horrid time in our history. How are we any different? We leave our unwanted babies in buckets + dumpsters. It's still infanticide. I'm a nurse and I have to have informed consent for procedures. I know young girls are not giving informed consent.

who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell approximately when and where your abortion occurred: 1979 ABQ NM / 1982 Durango CO / 1984 Houston TX / 1985 Houston TX / 1986 Houston TX / 1989 ABQ NM

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Not long term emotional consequences but some health risks were given to me. I watched a video but I was bent on doing it so I was oblivious.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No & No

4) Did anyone pressure you into having an abortion? If so, who? No

5) How has your abortion affected you?
A long 25+ years of depression and immoral lifestyle. I've had migraine headaches, sleeplessness, too much sleep, rage, shame, anger and low self esteem to name a few affects. I have herpes from the lifestyle I chose.

6) How has your abortion affected others in your life?
Inability to have a long term love relationship because I believed I wasn't worth loving. Anger & fits of rage directed at my son for no apparent reasons. Years later I'm somewhat better with medication & God in my life.

7) Based on your own experiences, what would you tell a woman considering an abortion?
Your making a huge, monumental mistake. Consider the emotional physical & spiritual consequences. God loves you & your baby and he wants you to make the right choices based on eternity not the right now.

8) Based on your own experience, what would you tell a court that believes abortion should be legal?
Part of the downfall of morals in our country I believe is directly related to women choosing to have abortions during their crisis and continuing to spiral downwards morally as a result of the emotional, physical & spiritual consequences. Women are not usually in their right frame of mind when faced with a decision such as this. I wasn't and then I was so low and hated myself that I didn't think I was deserving of being a parent.

My name is Jenna Hill, and about ~~seventeen~~ years ago I had an abortion. I was not born in a wheelchair, I had an accident when I was 16 years old. I'm 32 now. I totally regret it now. The abortion changed my life. I am a different person now. I'm a total different person now. A better person. I don't want my abortion to be in vain. I know I could have given my baby a good life. The guy involved couldn't help me but his mom could have. My mom couldn't help me. My dad and stepmom wouldn't help. At least I could have put him up for adoption but no I had to be a baby killer. I regret it so much. I guess I had a late term abortion. I just didn't want to deal with it. I thought I would have morning sickness and I wasn't so I thought no way could I be pregnant, but I was. I was angry at myself, I was confused, what am I going to do. I felt desperate, I felt worthless very worthless. But through it all I found the Lord. It's too bad God had to put me through such hard times to make me rest in his word but I was very stubborn. Thank you

- 1) Tell approximately when and where your abortion occurred: Dec 15, 1997 in Albuquerque, New Mexico
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? The doctors make it seem like a piece of nothing, that they're going to take out. It's like they almost forgot it's a human. They talk like if nothing will ever be wrong later with you or your body.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? Yes/no If so, who? The Father
- 6) How has your abortion affected you? Two weeks after the abortion my emotions went crazy. I started having dreams about the baby calling me mom. I felt like a loser because I took my baby's life. I wanted to die because I felt like why should I be alive, if I took an innocent life that didn't ask to be born or killed. My uterus has never been the same after the abortion. I Thank God that I can still have children. The abortion clinic never said it can lead to breast cancer or my uterus could be effected. At the abortion clinic's there a bunch of liars.
- 7) How has your abortion affected others in your life? It has effected my family by seeing me in emotionally in pain, thinking if I ever would be able to have children
- 8) Based on your own experiences, what would you tell a woman considering an abortion? You're killing a baby, that didn't ask to be born. I would let her know how it's effect me emotionally, physically, and mentally. How it might not hit you for a while but when it dose your in for a life time change. when you realize what you really done.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? There's no diffent's in killing a six-year-old and an unborn baby! You're still taking a life. No matter how old they are. The baby grows up to be that six-year-old child one day.

1) Tell approximately when and where your abortion

occurred: June 1985, Albuquerque NM

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?

Only that there would be some pain during the procedure.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer?

I was not informed. I have been fighting breast cancer on and off for the last 7 years and most recently finished chemo and radiation in Aug '02 for my third recurrence.

4) Did anyone pressure you into having an abortion? If so, who?

No, it was my own choice, although the doctors, two different ones, encouraged it because I was single.

5) How has your abortion affected you?

18 years of guilt and regret. One miscarriage and the breast cancer. I would give anything to go back and undo the abortion and make things right for the child and for me.

6) How has your abortion affected others in your life?

I cannot say about "the father". I would say it has affected my relationship with my husband who was not known to me at the time of the abortion.

7) Based on your own experiences, what would you tell a woman considering an abortion?

Do NOT have an abortion. The risks and consequences are too great. The blessings of a child are too numerous to count even if it is not you but an adopted family that enjoys those blessings.

8) Based on your own experience, what would you tell a court that believes abortion should be legal?

Abortion is a mistake, a great deception that has been perpetrated against women and innocent children for 30 years. There are great risks and emotional damage that lasts for years.

"I have read the above and foregoing statement and the same is true and correct."

After I gave birth to my two living children, things went really bad, and that's when I sought help. My life has been impacted in a way that cannot be erased. Now, my desire is to help other women find healing after a abortion, and to tell the truth whenever I can, that yes, abortion hurts women, and that God wants to restore each one to wholeness. Moreover, if we can help others avoid the same tragic error, our children will not have the same + hurt I carried, and make it difficult for me to be a good mom.
- 7) How has your abortion affected others in your life? It has caused pressure in my marriage, due to the shame + hurt I carried, and made it difficult for me to be a good mom.
- 8) Based upon your experience, what would you tell a woman considering abortion? I would tell her that she would probably spend the rest of her life regretting the abortion, that it's just not worth it, and that there is so much help available to her!
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell them that they'd better do some research and learn about the long-term consequences, AND that if they're going to allow abortion, that, by law, women must be COMPLETELY INFORMED ahead of time of what will probably happen to them. You cannot take the life of your own "I have read the above and foregoing statement and the same is true and correct." child + walk away free.

To be filled out by women who have had an abortion.

The State of New York

County of Chautauque

BEFORE ME, the undersigned authority, on this day personally appeared Lorrie Ann Beaver (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: November 1989 at a Clinic in Buffalo, NY
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? NO If so, who? _____
- 5) How has your abortion affected you? Believing that I was not able to raise a child nor was the party involved, I felt I had no other choice. I was filled with guilt later on in my life when I came to know the procedure of an abortion is how it actually takes a child apart. And that in fact the fetus is a human being. It is only by my faith in Christ that I am ok emotionally after dealing with the guilt.
- 6) How has your abortion affected others in your life? Very few people know. It was done quietly & I have kept it to myself. I was just 17 yrs old at the time.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Just that she needs to know all the facts & the details of an abortion, what the procedures are, that there are other alternatives, that in fact she does hold another life in her hand, that she needs to consider the emotional consequences.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell the court that they need to look at the scientific facts not those that they are put in a position to protect. The purpose of law is to protect life and to protect the innocent.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: March 1, 2000 at Planned Parenthood
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I was informed w/ pamphlets, but I was only informed about what it does (which I knew that's why I was here) and you can still become pregnant even if procedure done.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? _____
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____
- 6) How has your abortion affected you? Once I realized what I had done months and even years later it has had a huge impact on my life, both negative and positive. It has given me a greater respect for life. It has made me realize that we should not be able to end life because of our irresponsibility. It was very depressing in the first months, but I put it behind all of the other things on my mind and neglected any feelings toward the abortion.
- 7) How has your abortion affected others in your life? It really hasn't affected any because it's not an open topic. They don't know. But if any, this person feels that he may never be able to have children because of these abortions.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Everyone has fears when having a child. Even people who plan have fears. Abortion may seem to be fast, but as fast as you may think it solves the problem, it is an open wound.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? If abortion is legal, how is it different from child abuse or neglect? If abortion is legal, how is it different from a serial killer of problems at home.

BEFORE ME, the undersigned authority, on this 11 day personally appeared Christine A. Suriano (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: February 1976, Schenectady, NY
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No. I went to Planned Parenthood and had a pregnancy test. Upon finding it positive, the counselor simply asked me what I wanted to do. The doctor who performed the abortion did not give me any information aside from the time procedure would take.
- 3) Were you adequately informed of the consequences of abortion? No. No one spoke to me about any of the possible consequences. It was handled just as if I were having my tonsils removed.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No. I was not informed about the link between breast cancer and abortion. While I have not had breast cancer myself, both my aunt & my Mother having, increasing my risk even more so.
- 5) Did anyone pressure you into having an abortion? If so, who? Yes, my boyfriend and my Father. The counselor at Planned Parenthood also thought I had made a wise decision.
- 6) How has your abortion affected you? I am so ashamed of myself. I find it appalling that I murdered my own child because it was the "easier" path to take.
- 7) How has your abortion affected others in your life? My children were told by someone that I had an abortion at the age of 18 and they lost respect for me as their mother.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? I would tell her that she is taking the life of her own child and she will have to live with that for the rest of her life.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell the court that they are guilty of sanctioning the murder of millions of children. I would tell them that nothing will ever change the fact that an abortion is taking the life of an innocent person and no one should have the right to do that.

1. Tell approximately when and where your abortion occurred: New York Hospital, NYC, Nov. 1986
2. Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I was not aware of the emotional consequences. I was not told of any physical consequences.
3. Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
4. Did anyone pressure you into having an abortion? yes If so, who? my ex husband
5. How has your abortion affected you? Initially, it caused a deep depression, which eventually became chronic. It has caused me to develop an eating disorder. Whenever I thought about the abortion, which was often, I would become depressed, suicidal and self-destructive. The guilt and shame and self-hatred is at times unbearable. I need counseling for this issue. ~~no~~ yes later it still causes tremendous pain. I still haven't forgiven myself.
6. How has your abortion affected others in your life? I am over-protective and overly mothering with my children, ages 16 and 11. I do things for them that they should do. I believe it is out of guilt.
7. Based on your own experiences, what would you tell a woman considering an abortion? I would share my story with her and I believe that would be more information than she would receive at a clinic or by a doctor. No one tells you how you will feel, how you have to live with what you did every day.
8. Based on your own experience, what would you tell a court that believes abortion should be legal? Legal or not, the woman knows its murder. If it against the law to murder, abortion should be illegal. If it were not a murderous act, women would not suffer as they do after an abortion.

I knew what was at the root of my sadness - truly realizing what I had done, altho I knew the moment I aborted that it was wrong, I went to confession in 1975. It was until the late 1980s that I found out what a saline abortion truly was and this set me back again. I also found out that my baby was a girl, from doctors records I had acquired. I will never forget reading those words, "...slightly macerated female fetus with superficial necrosis"

The abortion has affected me in so many ways - too numerous for this affidavit. But what I can say is you never know how or when ~~the~~ the abortion may arise again in your mind. 4) Did anyone pressure you into having an abortion? Yes. If so, who? The first time it was my boyfriend. I was very much in love with him. He got me pregnant, and told me he did not want, and was not ready for a baby. He was very helpful. He came up with the money, and took me to have the abortion. When he took me home, back to my mother's house, he dropped me off on the doorstep and told me he did not love me anymore, and did not want to see me again. That was the last time I had seen him. I was totally devastated. This was my first experience with love & abortion and I was so badly let down & hurt.

I met my husband on my 20th Birthday. We dated for 2 1/2 years before we got married. The night I met him I said I was going to marry him. A few months before we were to be married I was faced with that painful situation once again. I was pregnant. I went to my husband to be, and told him of the situation. He told me he was not ready for the responsibility of being

a father. He was very adamant about that. Although "he already was" after all I was "pregnant" It really broke my heart. I don't know when I was unable to say no, that I would not have an abortion. I think maybe I was afraid I would lose him, because of what happened after my first abortion, which he knew about. So I gave in and had the abortion.

Up to this point Glenn & I were inseparable. It was a fairy tale relationship. He would stop by where I worked and drop me off love notes or food. ^{ENTRANATE THINGS.} You would never see us together when we were not holding hands or just touching each other. A match made in heaven.

After that day, of which I really remember nothing, I couldn't even tell you where he took me. I have totally blocked it out of my mind. It devastated me. A part of me died with that child. I've had feelings of suicide. My life has become a total mess.

Right after that day, I don't

know exactly how long, but I had no self worth and I became promiscuous. I tried to tell my mom before I got married what I was going through, but was not able to.

As the years passed I tried to forget about things but was not able to. Little things that he would do, that most people would laugh off, would make me angry. I guess after the 23 years, my feelings had finally surfaced. Through Project Kadel and Project Grace I realized I was not alone. My ~~buried~~ buried feelings were alive and real.

I have never been a vindictive person. Through all that has happened I have always told everyone not to be judgemental on my husband. I have told my girls to respect their father. I understand his hurt and anger. I too have been hurt and angry. But I have still treated him with respect.

Now comes the painful part. He has been hurt, because I was promiscuous. He has been to. It is ok for him, "so he says" because there were no feelings involved. He has my children thinking that I am a liar. He has stopped paying bills that have my name on them.

We are getting a divorce and, he is trying to win my girls over. He buys them anything they want, and lets them do anything they want.

I dislike him more & more every day. He is not the person I met 26 years ago.

I wish I had the power to go back 23 years and, change the decision that has crippled my happiness and his. I would give anything for him to understand I and just be friends.

I will go on and carry the cross that has become my life. I want my girls to know I love them more than life itself.

The controversy over abortion laws has been raging for years, yet I had paid little attention to it -- until Halloween morning in 1984.

My period was 10 days overdue; unusual, but in my heart I didn't really believe I could be pregnant. Just to "rule it out" I had brought home one of those do-it-yourself drugstore kits. The "ring" I saw - indicating "positive" - stunned me. At the age of 41 I was pregnant. My breathing was rapid, nearing hyperventilation. I braced myself on the dresser to keep from dropping to the floor, then slowly moved to the bed, where I slumped in total disbelief. After a while I got in the car and began driving around, in a hazy daze, thinking what it would be like to have a baby around again, to turn the clock back 17 years and start all over with diapers, Halloween costumes, Sesame Street and wiping runny noses. Our son and daughter were both in high school, one just a year away from college. Both were dearly wanted and "planned" pregnancies. All the years of birth control afterward had brought no surprises - until that Wednesday morning.

My husband took the news calmly and said merely: "Will your doctor do it," certain in his mind that we should look upon this "egg" as no different from all the others we had chosen not to fertilize in our 18 years of marriage. His male mind saw "termination" as no worse than contraception. I have no religious affiliation, and had favored laws giving women the freedom to choose, yet his suggestion hit me with a tremendous jolt. While the idea of starting over after 17 years was not what I would have chosen, "terminating" the tiny life begun (however inadvertently) inside me just didn't seem right.

The other alternative, of course, meant carrying a baby to term. Thinking about this brought vivid memories of my son's birth 17 years earlier. The 28 hours of labor, in a room by myself, with a nurse occasionally stopping by, had been a source of many years of nightmares. My doctor at the time was near retirement age. Suffice it to say that he came to my room the morning after delivery and apologized for his handling of my "case," which he told me had been discussed at a hospital committee meeting, where the recommendation had been made that he drop "obstetrics" and confine his practice in the future to "gynecology."

ck

It took several years for me to summon enough courage to attempt another pregnancy, but I didn't want my son to be an only child, and was hopeful that a different doctor would mean a better delivery experience. While the second labor was an improvement, the feeling of joy that we had both the son and daughter we had hoped for, was joined by enormous relief at the thought I would never have to "do this" again. Contemplating it at age 41 brought sheer terror.

My mind reeled and I thought day and sleepless night about the "options" given by my doctor: immediate "termination" - with or without tubal ligation, was his recommendation. I asked him if he had no moral reservations about such a suggestion, and he laughed and waved his arm, saying a woman my age shouldn't be having babies anyway. The alternatives raced through my mind constantly, one minute thinking we should "terminate" immediately and get on with our lives, and the next minute wondering how I could bring myself to let them destroy it. I can see with hindsight that I was enveloped in a state of shock and should, at that point, have sought some outside counsel. I spoke to no one but the nurse at my doctor's office, who said "If you do it now, there 's nothing there!" She said to do "what's right" for the family I already have. I knew the more time I agonized over it, the more difficult it would be to bring myself to "terminate", so I signed the paper and she booked me into the hospital for the next morning. It is strange how no one uses the word "abortion" - just "termination of pregnancy", and "product of conception" or "cluster of cells", as though use of the words "abortion" and baby might make a woman stop and contemplate her action more thoroughly. I was not offered counseling, and on Friday November 9 at 6 AM, just a week after that home pregnancy test, I was hospitalized for the "termination/tubal ligation." For all I had been told, that was supposed to end my "problem."

In the hospital I felt absolutely nothing, as though my mind was drifting in a vacuum. It was as though I wasn't in my own body, but on the outside seeing this person sign these papers and be subjected to a "medical procedure"; mentally I was totally numb. They sent me down for a pre-op X-ray, and the sign said: "Be sure to tell technician if you are pregnant." I stared straight at the sign, but said nothing, for I

hadn't fully acknowledged to myself that I really was pregnant, much less that I was there to allow an abortion to be performed. A staff doctor stopped by the bed and asked: "Is this your third pregnancy?" I nodded yes, but thought, what an odd question, I'm not really pregnant. I felt totally "blank" - as though all emotion had been erased from me. There was no physical pain or awareness that anything was happening. A slight pinch of the anesthesiologist's needle in my hand registered at the start, but there was no pain, or even a cramp afterward, and virtually no bleeding either.

It wasn't until a few days after coming home, as my mind began to emerge from the vacuum which had paralyzed it, that I began screaming, crying and reacting to what I had endured. My nights were filled with dreams (and nightmares) about babies, and people bringing me babies in my sleep. It penetrated my emotional core, and I began to realize that this was something I was going to have to "live with" for the rest of my life. My thoughts were constantly on the child who would have known life, had I not interfered with nature. I watched a news segment on the famine in Ethiopia and felt myself reacting strangely unsympathetically to the plight of the starving: do those children have more of a right to live than my baby? There were pregnant women and babies everywhere I went, and seeing them only increased the level of my agony and feelings of intense envy. I wanted to tell someone, but didn't know where to turn. Days drifted one into the other, and I tried to keep the usual family activities going, but there was no change in the distressing preoccupation of my mind. At family dinner, I ate something out of habit, but had no appetite, and ate nothing the rest of the day. What I did eat had no taste; in fact everything tasted like straw. Quickly I lost 5 pounds, then 5 more. My co-worker marveled that I could be so "strong" and "diet" at Christmas time. She noticed I was thinner, but how could I tell her the loss of appetite had nothing to do with diet! If only she knew how the constant lump in my throat made eating impossible. For months on end, all my private moments were spent crying. I'm surprised no one at work noticed my swollen and red eyes. They were often so full that it was impossible to read what I was typing. I felt an increasing need to discuss all the feelings engulfing me and did try to call the nurse at my doctor's office. She tried to be sympathetic, but the

conversation didn't last long as I couldn't keep from breaking down and complete a coherent sentence.

On the 31st day after surgery I awoke to a heavy flow of blood - proof positive that there really was no more baby. Until that moment, in my overwhelming anguish, I had fooled myself into thinking: maybe I really haven't done this -- after all, there were no memories of any physical pain. The realization that tubal ligation meant "permanent" was more than I could bear. My husband and I talked throughout the night, as I began to finally share with him all the emotions I had been struggling with. I don't think he realized the depth of my feelings until that conversation. The same day brought a bill from the hospital pathologist. My mind focused on what he was being paid to study: the remains of my never-born child -- and my rage and anguish totally overtook me.

I knew then I would have to seek some counseling, and began to search the "pregnancy counseling" ads - something I should have done before it was too late. My teenaged daughter happily played Christmas music on the piano, and I had to run from the room so she wouldn't see the rush of tears, for all I could think of was the child who would never play that piano, or hear it played, or know Christmas, or feel life. I thought back and wondered how we could have rationally discussed "reasons" for "not having" another child. Couldn't we - and shouldn't we - have made room in our home and our lives for this mid-life miracle? Yes, our lives would have changed quite drastically, but living with those changes would have been much less difficult than coping with the emotional turmoil and grief that have engulfed me since. Would the physical childbearing pain I was dreading really have been as intense as the very real pain I have had to suffer instead?

In the following year I spent weekly sessions with a compassionate counselor. She helped me sort out my feelings of grief, anger, pain and loss. For several months I continued to feel "phantom" signals emanating from my womb; as long as I didn't have my period at the moment, I believed I was still pregnant. Each monthly flow renewed my regret and anger, and made me feel my baby was dying all over again. Just as soon as it was over, I went right back into denial for another 28 days, until the cycle repeated itself again. Seeing pregnant women in the stores

filled me with so much jealousy that I bought another pregnancy test kit 3 months after the abortion, for I desperately wanted to see some proof that my baby couldn't be dead.

I visited several libraries and read every book I could get my hands on that touched on abortion, miscarriage, bereavement and loss. I attended meetings of "Reach-Out to the parents of an unknown child" - a caring group of people, all of whom have lost a child through miscarriage, stillbirth, or early infant death. On the first anniversary of the abortion, I placed a memorial ad in the local paper: "Mid-life surprise - precious gift - taken from me so abruptly the outside world does not recognize you ever existed - missed and cherished forever in my broken heart." I was surprised that most of the people attending the Reach-Out meeting had seen my ad. They were supportive and understanding, for they too had experienced that grief. I have also become active in a support group called "Women Exploited By Abortion." Some people have said to me: "exploited" is such a strong word! And I answer: yes, but it's not the wrong word. In a society that makes abortion so easily available, we equate what's legal with what is right. I have met many women who made an abortion decision, as I did, because it was offered to them in a moment of crisis as an "easy way out of a problem." They were not counseled about the devastating emotional after-effects. We, the aborted mothers, are the second victims of abortion. Society must provide some safeguards for women. An unplanned pregnancy shocks the body and psyche. Counseling must be made mandatory. Such counseling must include information on prenatal life. How many women are aware that at the moment they discover a pregnancy, their miniature unborn child already has a beating heart and measurable brain waves? There should also be a waiting period of at least 24 hours (and preferably longer) between the signing of any papers and an actual abortion procedure.

I very much want something good to come out of all my pain. While I surrendered my baby physically, there will always be a special place in my heart for my missing child. From the beginning, I have felt that it was a girl, and I have named her Barbara Louise. I think of her every single day, and my arms ache from wanting to hold and nurture her. I get angry at people who tell me she was just a "blob" who might have grown into a person - but only given a great deal more time, and regret that in

my state of shock I didn't see how wrong they were, and allowed someone so precious to be taken away from me.

If sharing my story will help another pregnant woman reject abortion, then the brief life of my Barbara Louise will not have been totally in vain.

EPILOGUE

My husband had been unwilling to read my manuscript until it was published, nearly five years after it was written. When he finally read it, he said "now I understand".

He suffered a fatal stroke seven months later. I grieve for him, and for my child, for I believe they are both victims who have unnecessarily left this world too soon.

Now approaching the twenty-first anniversary of my abortion, I continue to mourn for my missing child, and if I could be given a chance to do just one thing over in life, I would never have permitted my unborn child to be taken from me.

I have read the above and foregoing statement and the same is true and correct.

AFFIDAVIT

THE STATE OF NEW YORK

COUNTY OF WESTCHESTER

Before me, the undersigned authority, on this day personally appeared D [REDACTED] S [REDACTED], (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

My name is D [REDACTED] S [REDACTED] (Print Name).

I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

I became pregnant for the first time when I was 19. A friend made the appointment for my abortion with a physician she'd used. The appointment was made under a false name and since I was paying in cash, I wasn't asked for identification or insurance information. I wasn't counseled but was told what to expect after the procedure.

At one point during the abortion, the doctor pulled out the vacuum and began wiping it onto something out of my view. I saw the nurse glance at it and ask quietly, "Is that it?" The doctor nodded, reinserted the vacuum and continued with the procedure. I suddenly realized they were referring to my baby! I was very confused and remember thinking, "how can they tell, isn't it still just a blood clot?" Nevertheless, when it was done, I was relieved and put the whole experience behind me.

As luck would have it, less than a year later I found that I was once again pregnant. Having gone through it before, I now felt confident enough to make my own appointment in a clinic that I'd driven a friend to years earlier. The day of the abortion, I was prepped and waiting when the

doctor entered the room and quickly examined me for the procedure. He asked how far along I was. I repeated what I'd told the receptionist - that I was 3 months pregnant. The doctor looked puzzled and, after further examining concluded that I was, in reality, 5 months pregnant.

I began to cry uncontrollably. I was assured that I needn't panic - I could still have an abortion. It was simply a different procedure at that stage. But I refused. For some reason, which I realize is ridiculous now but somehow made sense to me then, I believed that the fetus was just a blood clot up until 4 or 5 months, and then somehow transformed into a baby. After all, I'd always heard it referred to as "the product of conception." That doesn't sound like a baby. Since I'd read of women giving birth at 5 and 6 months, I concluded that it had to become a baby at some point near then.

I kept insisting that I couldn't go through with the abortion because it was now a baby. They told me to get dressed and brought me in to see what I believe was a counselor. This was the first and only time that I was counseled. She asked what I wanted to do and reassured me that I could still have an abortion. I continued crying and repeating that it was a baby, but she didn't seem to understand my resistance. I then asked her, "Is it a baby?" Reluctantly, she agreed. So, I walked out.

That baby I was carrying is now a handsome and intelligent 14-year-old. But if I hadn't refused the abortion that day, he wouldn't be alive today.

Years later, I returned to school to study ultrasound and became a technician. I slowly learned the unforgiving reality that a baby is a human life from the moment of conception and is, in essence, a tiny, fully formed person by the time millions of women have abortions. I performed countless sonograms on women at all stages of pregnancy. I measured the heart rates of embryos barely larger than my thumbnail. I watched, in utter amazement, the tiny limbs of 9-week-old fetuses wriggling around in a sea of amniotic fluid. I witnessed hundreds of unborn babies stretch, suck, blink and smile - and even respond with a kick as I pressed down with the transducer. I also handed delighted mothers crystal clear ultrasound images of their unborn babies' perfect little faces.

With every heartbeat, kick and stretch, I knew that each one was a beautiful child. Each one was complete and perfect. Each one filled with life! It also brought me closer and closer to the truth I'd been trying to

DS

deny for so long. That terrible day, years earlier, I hadn't aborted a blood clot. I aborted a baby - my baby!

I now have 3 boys that I adore. I have so much to be thankful for today but an irreparable mistake I made 15 years ago has robbed me of peace. Regrettably, every wonderful milestone my children reach, every goal they achieve, every marvelous dream they confide to me, I cannot fully enjoy. Because each time I look at their faces, there's always a painful reminder of how I cheated my first child of all hopes and pleasures, small and large.

My beautiful boys fill me with love and pride every waking day. However, that joy is always fleeting. A familiar, aching void always reemerges. One child is forever missing. I believe it's probably the same anguish that women who have lost children later on must feel. The inescapable difference is that I'm responsible for my child's death and suffering. A mother is expected to protect and comfort her children. Instead, I voluntarily chose a brutal end to my baby's life. Abortion granted me initial relief, but a lifetime of grief as the reality of what I did slowly crept in years after.

I keep this unrelenting heartache to myself each day. Abortion is such an acceptable evil today that no one understands my shame and remorse. It's difficult for others to comprehend mourning a child I never held in my arms. I gain some comfort in knowing that God has forgiven me; I pray that my baby has too. But, I will never, in my lifetime, forgive myself.

1) Tell approximately when and where your abortion occurred: Lehigh Valley, Pennsylvania (Allentown or Bethlehem, PA)
approx year 1981

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Best to my recollection, NO I was not adequately informed at all to any consequences physically or emotionally. I was never ever given other options + the process was rushed along w/o any proper counseling. After abortion there was

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? NO followup. No information was given to me and I thank God I do not have breast cancer & pray I won't either

4) Did anyone pressure you into having an abortion? If so, who? yes, friends, boyfriend & parents did not try to stop me. I had absolutely no support to keep the baby or chose to give him up for abortion. I was told I would embarrass myself or shd me family if

5) How has your abortion affected you? I ~~lost~~ the baby. My abortion in short just ~~lost~~ to have about ruined my life and if I hadn't sought help & from a Christian counselor I would be continuing to suffer. I faced suicide thoughts, insecurity, promiscuity to the point of being embarrassed for actions I felt I couldn't control

6) How has your abortion affected others in your most importantly I ~~wrote~~ it ashamed to ask life? Yes, my husband, my children who at some point I will have to tell them that they have a ~~step~~ brother in Heaven. My biological family who aren't Christian believers & refuse one because of my emotional struggles + especially my mother who doesn't

7) Based on your own experiences, what would you tell a woman considering an abortion? She needs to know that no matter what month she is in in her pregnancy that she is carrying a child of God + aborting the baby will only leave her feeling void, depressed & a hole that hurts for

8) Based on your own experiences, what would you tell a court that believes abortion should be legal? Aren't they glad their mother didn't abort them! I would share with them my emotional + physical affects from PAS + the 20 year journey of healing that I struggled with so that I can now feel good again about being me. I would strongly stress how Planned Parenthood didn't give me other options + I was just another 'procedure' to them. I would also mention that I think the medical studies are 'incorrect' + have no validity to how women are truly struggling.

There is some more...

If not, explain: NO, when my pregnancy test came back positive, the receptionist asked if I would like an abortion. No one explained the consequences. I don't remember if anyone ever said that it was a termination of pregnancy.

- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? NO
NO I have never had breast cancer
- 5) Did anyone pressure you into having an abortion? If so, who? The babies father offered to pay for the abortion. I asked him only once if we could get married and have the baby, but he refused. I did not insist - I was young and selfish.
- 6) How has your abortion affected you? Not a day goes by that I do not think about that baby and regret the abortion. If it were not for my faith in God and His Divine mercy I think I would despair.
- 7) How has your abortion affected others in your life? People in my family get upset with me because I am adamantly pro-life. They do not understand my strong convictions that abortion is murder and should never be a choice.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? That legalized murder should not be a choice. It is a selfish choice that causes grief and despair. That I wish with all my heart it had never been legalized. That life without her baby would be much harder than if she gives it life. I would tell her it takes years of prayer before you can ever forgive your self.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I wish I had never had a choice to kill my baby. That with every child you bring into the world you are reminded of the horrible crime you committed against your own flesh and blood. That legalized murder should not be a choice, and it is only a way for people to make money. They do not care how you will feel afterwards.

BEFORE ME, the undersigned authority, on this day personally appeared Tammy Craven (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: June 1992, Greensboro, NC
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain:
Planned Parenthood gave me a list of abortion clinics and phone numbers. The woman at the clinic took my money and stuck me in a room with about 50 other women. There was never any explanation.
- 3) Were you adequately informed of the consequences of abortion? NO
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____
- 6) How has your abortion affected you? Its been over 10 years since my baby's due date and not a day goes by that I don't think of him. For a long time I was bitter and angry toward everyone in my life. I blocked out a lot of what really happened until about the last year and a half.
- 7) How has your abortion affected others in your life? My husband knows and he tries to be understanding. He's doing a great job of it. The rest of my family knows nothing. I'm afraid it would crush them.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? My abortion was ~~aborted~~ over ten years ago and I have thought about it every day since. You think it's an easy way out but you have to live with the "what ifs" the rest of your life. I took a life. I am no better than the woman who killed her 5 children. The only difference is my way was legal.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? If the courts really wanted to help women, abortion would be illegal. There is no other medical procedure with such poor cleanliness standards ~~with~~ the physical and emotional side effects of abortion. And it's wrong.

"I have read the above and foregoing statement and the same is true and correct."

BEFORE ME, the undersigned authority, on this day personally appeared Cheryl A. Derstine (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: 1981 I was 16 yrs. old. The abortion occurred at a Women's clinic in Allentown Pennsylvania.
 2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No, the actual physical procedure was explained but there was no discussion on the mental, emotional, & spiritual effects.
 3. Were you adequately informed of the consequences of abortion? No
 4. Were you informed of any link between abortion and breast cancer? No
Have you had breast cancer? No
 5. Did anyone pressure you into having an abortion? No
If so, who? _____
 6. How has your abortion affected you? I became physically ill shortly after my abortion with severe back & abdominal pain, high fever & seizures. Emotionally & Spiritually it destroyed my life and took 51 years for me to be emotionally & spiritually healed.
 7. How has your abortion affected others in your life? From my perspective it caused me to put walls up emotionally so closeness wasn't obtained & anger arose in some personal family relationships.
 8. Based on your experiences, what would you tell a woman considering an abortion? Please don't have an abortion. Abortion is the exact opposite of what women were & are created to do. Motherhood is not a curse but living in untorgiderness & pain from aborting your own baby IS.
 9. Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion IS Murder. Somehow along the way we've been told at conception & the early weeks its not really life - not really a baby - That simply not true. At conception THERE IS LIFE. PRO CHOICE IS PRO DEATH. Murder is not accepted in a court room - Murder is an act of a criminal, so, abortion needs to be outlawed.

- 1) Tell approximately when and where your abortion occurred: Charlotte, NC February, 1975
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. I did not know what abortion was
- 3) Were you informed of any link between abortion and breast cancer? no Have you had breast cancer? no
- 4) Did anyone pressure you into having an abortion? yes If so, who? my husband (at that time)
We were having serious marital problems
- 5) How has your abortion affected you? If I thought the abortion could save our marriage (and I believe I did), I was wrong. We were divorced shortly after the abortion and I did not remarry. I have no children. I have struggled with guilt loss and depression. Through Christian counseling and Bible study, the guilt and depression have diminished, but I still deeply regret having an abortion.
- 6) How has your abortion affected others in your life? I may have influenced my sister to have an abortion a few years later. Ironically, she had tried to persuade me not to have an abortion - earlier.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would advise her not to have an abortion, would tell her my experience, and would tell her to go to a Crisis Pregnancy Center.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? When I had my abortion in 1975, there was no pro-life movement or Crisis Pregnancy Center (that I know of) but I believed that the laws of our land were good. I thought, "If it's legal, it must be moral." When Roe v. Wade is overturned, morality will return in this arena.

1. Tell when and where your abortion occurred: Broomville SC, 1984

2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No, all I remember is them telling me about birth control pill, which I knew about.

3. Were you adequately informed of the consequences of abortion? No

4. Were you informed of any link between abortion and breast cancer? No
Have you had breast cancer? No

5. Did anyone pressure you into having an abortion? Yes

6. How has your abortion affected you? It has taken me years to forgive myself. I still think about it. Only by the grace of God can I deal with what I did.

7. How has your abortion affected others in your life? 2 months after the abortion, I got pregnant again. My baby was born at 24 weeks weighing 19 oz. They could not find a problem but I knew when I saw it. Book limit said one of the reasons for prematurity could be abortion too soon before pregnancy.

8. Based on your experiences, what would you tell a woman considering an abortion? Make an informed choice! Give all sides a chance. Let me tell you what I've gone through!

9. Based on your own experience, what would you tell a court that believes abortion should be legal? It is murder. BEFORE ME, the undersigned authority, on this day appeared Katherine Hearn, who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- 1) When and where did your abortion occur? Raleigh, NC
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No If no, explain: I was told basically nothing about the truth of what was being done. They told me that I was very early in the pregnancy and the blob of tissue had not attached to my body. I remember being told more about the method of payment that would be acceptable than about any aspect of the procedure. I was not told of any alternatives nor was I told what to expect after the abortion.
- 3) Were you adequately informed of the consequences of abortion? I was not informed of any consequences of my abortion. I never even went back for my follow up visit. I was devastated. I could not understand why I felt the way I did. My life really changed at that moment. It took almost 30 years before I ever realized that many, many post abortive women and men have been left feeling much the same way.
- 4) Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- 5) Did anyone pressure you into having an abortion? Yes No If yes, who? _____
- 6) How has abortion affected you? A better question would be, how has the abortion NOT affected you. Truthfully, my life changed at the moment I had the abortion. I began to live a lie. Since I had told only the father and the girl that let me use her car to go to the clinic, I tried to just act like the loss of my baby never happened. My relationships became much more superficial since I was basically hiding the truth of what I had done and the truth of who I was from everyone around me. Looking back, I now see the many ways I changed and the poor decisions that I continued to make following the abortion. After many years, through the restoration and healing of Jesus Christ I have finally been set free from this horrible decision. To think that something this devastating is legal, is appalling. No person should ever be lead to think that abortion is a viable solution to a pregnancy. They should be told the truth: that abortion will harden their heart, kill their child, and leave them with guilt. After my abortion, while trying to have a baby, I had a miscarriage. It was also a devastating experience. However, it did not compare with the anguish I faced over the abortion. As mothers, we are not supposed to kill our children. Every mother knows this; the moral law written on our hearts attests to it.
- 7) How has your abortion affected others in your life? The abortion has effected my daughter, now 19. When she learned that I had aborted her brother, she wrote a poem. Although it was painful for me to read, I realized how devastating it was to her to realize that she had an older brother that only wanted a chance to live. Today, I realize that it has also affected the relationship with my parents. Anytime there are secrets in relationships, they are affected. It has also affected my husband of 29 years, the father of our aborted son. The affects have been devastating to every generation within our family.
- 8) Based upon your experience, what would you tell a woman considering abortion? Do Not Do It. There are people who will love you, help you, care for you and your child. Every child is a wanted child, created by God for His purpose. Each child has a name. The decision to have an abortion is the decision to murder your child. The consequences are devastating.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? No. It should be repealed.

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No, never. I felt no more concerned than if I were having a tooth extracted. I was informed that it was nothing - insignificant "issue".
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____
- 6) How has your abortion affected you? God is merciful! I was born again before I saw the poster on a hospital wall of fetal development and realize I had killed my children! I had dreams for many years that I had either forgotten where I put my baby or had forgotten to feed it for long periods of time. I was so overly protective of my children that I had that these dreams were very painful until I started thanking Satan for reminding me of the loving, forgiving and merciful God I served.
- 7) How has your abortion affected others in your life? Again, I am one of the fortunate ones; my family is okay. They are also born again. We are very close. I have 4 children - 3 boys - 1 girl.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? That it is a choice with irreversible consequences that she will live with for a lifetime; that abortion is not an answer to a problem; it is what it is - taking the life of an innocent human being.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would simply say that the Judicial System has no right to decide whether or not a life should be allowed to live or die. Yes, God gives us the right to choose, but LIFE is not one of our choices.

- 1) Tell approximately when and where your abortion occurred: APRIL 21, 2001 IN CHARLOTTE, NC
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO. THE ONLY "SO CALLED" COUNSELING I WAS OFFERED WAS A QUESTION, "ARE YOU SURE YOU WANT TO DO THIS?" NEVER EXPLAINING EXACTLY WHAT IT WAS I WAS DOING OR ABOUT TO DO.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? YES If so, who? THE DEVIL DECEIVED ME AND I BOUGHT INTO HIS LIES. NO ONE THAT I KNOW PERSONALLY.
- 5) How has your abortion affected you? IT HAS DEFINITELY TAKEN A TOLL ON MY LIFE AND CURRENT RELATIONSHIP. IMMEDIATELY AFTER THE PROCEDURE I FELT LIKE MY WHOLE LIFE WAS TURNED UPSIDE DOWN. I STOPPED GOING TO CHURCH, ASHAMED OF WHAT I HAD DONE AND SAW MYSELF DRIFTING FROM GOD. I WAS DEPRESSED A LOT. I TRIED TO ISOLATE MYSELF AND WAS NOT CONCERNED WITH MY APPEARANCE. I FELT LIKE I DID NOT DESERVE TO LIVE AND REGRETING MY DECISION MADE ME WANT TO JOIN MY CHILD. I WAS BITTER!
- 6) How has your abortion affected others in your life? I REALIZE NOW THAT I WAS NOT ALONE IN MY HURT. MY BOYFRIEND AND MY PARENTS AND MY NEW BOYFRIEND GRIEVED FOR THE LOSS AS WELL. MY CHILD'S FATHER
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I WOULD REFER HER TO THE TRUTH - THE WORD. ALLOWING GOD TO REVEAL TO HER HIS VIEW OF WHERE LIFE BEGINS. ISAIAH 46:3, JEREMIAH 1:4-6, PSALM 139:13-16 & LUKE 1:41-44. I WOULD TRY TO EDUCATE THEM ON THE ROLE OF A WOMAN AS THE NURTURER. ALLOWING THEM TO PROCESS THE ROLE OF THEIR MOM OR GRANDMOM.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I WOULD INFORM THEM THAT MURDER IS WRONG! REGARDLESS OF WHERE SOMEONE IS IN THE DEVELOPMENTAL PROCESS (i.e. FETUS, CHILD, ADOLESCENT, ADULT) THEY HAVE RIGHTS AS A HUMAN BEING. LIFE BEGINS IN THE WOMAN! ONCE AN EGG HAS BEEN FERTILIZED FORMATION BEGINS AND TO TERMINATE THAT CHILD/ HUMAN LIFE IS WRONG. SHEDDING INNOCENT BLOOD IS AGAINST GOD'S PLAN.

I got pregnant at age 17 & 19 - 2 abortions. I developed an eating disorder & started to drink wine. I've been in 1 abusive marriage, a few other unhealthy relationships. - 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: absolutely not. I was told verbatim "I need \$750 cash. If you change your mind we don't give refunds. When you leave here forget about it. Never think of this day again. You're too early for yours to be anything but a cluster of cells anyway." (What a lie)

- 5) Did anyone pressure you into having an abortion? If so, who? boyfriend, abortion clinic
- 6) How has your abortion affected you? it's robbed me of peace, joy in the blessings of my life, my self-esteem has been shot to pieces.
- 7) How has your abortion affected others in your life? by my days of depression when they don't understand why because of the shame and guilt I have felt.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? it's a permanent solution for a temporary problem - too permanent. The pain of giving a child for adoption doesn't come close to the pain of realizing what you've done.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? All they would need to see is the pain, sorrow and grief that I carry with me for the rest of my life! We save whales, trees and so many other things in this country, yet we slaughter innocent, precious children

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 1985- Raleigh, NC
2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No

3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No

4) Did anyone pressure you into having an abortion? → If so, who? I was pressured by my family's standards, rules, etc. My mom and dad didn't even know about the pregnancy. I was only 17.

5) How has your abortion affected you? I struggle emotionally with having the abortion - especially since having children of my own. Having to live with the knowledge of killing my innocent baby is really hard. I know God has forgiven me, but it is very difficult for me to forgive myself.

6) How has your abortion affected others in your life? My husband ~~was~~ was the father of the aborted baby (pre-marriage) and he, too, struggles with our decision.

7) Based on your own experiences, what would you tell a woman considering an abortion? It looks like the "easy way out" but it isn't. You deal with it every day of your life. That baby inside of you is a life - you are committing murder if you have an abortion. That baby would be a blessing to you or some other family. Please don't make the same decision I did - it's wrong and makes a right.

8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would say that if a woman delivered a baby & killed it, she would be charged for a felony. If she has a late term abortion when the baby could live outside of the womb, there's no consequence. I'd also say that pro-choice is really pro-abortion because no one sits down and truly explains your choices.

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? The emotional consequences were not addressed.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? yes If so, who? my 1st husband told me he would leave my son and myself if I had another child, I would deprive our son of his father.
- 5) How has your abortion affected you?
Abortion made me mad. Anger grew inside of me - in fact my son suffered the most from my rage. He became a distant person who was guilt-ridden - full of shame. I'm not out for anyone, I feel I have other things to focus on. I thought about suicides, after all it was decided. I wouldn't hurt - or would I - I wouldn't have you here, quite get over it.
- 6) How has your abortion affected others in your life? My son lives with a mother filled with anger - My mom slapped me with hopes of bringing me to my senses. I was a friend, mother, daughter or wife.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Abortion is not a right, it is a sin - your baby needs a right to live.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal?
Abortion is murder. The intentional killing of one human being by another. An abortion was not legal, my baby would be alive today. Laws are to protect the weak. I was very weak and my baby was helpless.

BEFORE ME, the undersigned authority, on this day personally appeared Yvette Wilson (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Charlotte NC clinic, 1991
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Not really, they basically told me that I'll just be a little cramped after the procedure.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? No If so, who? _____

5) How has your abortion affected you? After the procedure I pretty much just blocked it out of my mind. Even today it is quite cloudy about things. I remember going through a time when every time I saw a baby I would get depressed & feel guilty. I also went through a time of uncontrollable crying about what I did. Even today I think about it and what if I had kept the child and what will he or she be like.

6) How has your abortion affected others in your life? I told my children about it and they were very disappointed in me. He became very distant for years and they are so against abortion.

7) Based on your own experiences, what would you tell a woman considering an abortion? Don't do it. It's physically and emotionally nerve wrecking. Not only do you affect your body but it kills your mind. The thought of what you go through is not 1/2 as much as what that child goes through.

8) Based on your own experience, what would you tell a court that believes abortion should be legal? If they are willing to make abortion legal then they should be willing to make child abuse and murder legal. That's all it is! Not only is the woman's life effected but also that unborn child. I don't care how far along a woman is in her pregnancy. As soon as you find out that you're pregnant that is a living human being.

- 1) Tell approximately when and where your abortion occurred: Nov. 1986 Doctor's home Hayesville, NC.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO! No one professional sat me down to tell me anything about how this abortion would affect me physically or psychologically.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? not yet
- 5) Did anyone pressure you into having an abortion? yes If so, who? Baby's father
- 6) How has your abortion affected you? It put me on a path of self-destruction. I was 24 yrs old when I had the abortion. For a while after I was OK but slowly, but surely, I started a downward spiral into self-hate, self-rejection, and self-judgment. Depression (clinical) quickly ensued. I have panic anxiety disorders, Chronic Fatigue Syndrome, Fibromyalgia. I am 40 yrs old now. The past two yrs I have walked through emotional hell trying to deal with my past. I have hurt emotional in an under statement. It has affected me for 16 yrs. I was a mother, a God given privilege, and I gave that up for convenience.
- 7) How has your abortion affected others in your life? No one knew until recently. But no one could understand why I was so sick, so depressed and so angry. I know they felt helpless, even giving up on me.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Don't do it! It is not a "right" it is murder in the first degree! Sooner or later, deep down in your soul, you will have to face the fact you are a murderer - of your own child. And if you don't you'll end up like me, physical and emotional wreck!
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell them yes, a woman has a right to her own body to do what she pleases, healthy or not. But she has no right to take another "body's" life. No human life, no matter how it is conceived, is a mistake or inconvenience.

AFFIDAVIT

To be filled out by women who have had an abortion.

The State of North Carolina

County of Davidson

BEFORE ME, the undersigned authority, on this day personally appeared Teresa Renee Zell (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

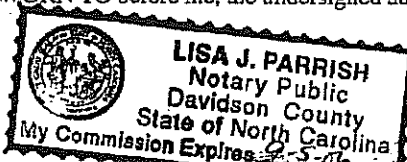

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: Dec 15, 1990; Winston-Salem, N.C.; clinic - 3000 Maplewood Ave -
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? No If not, explain: It was explained like having a period - heavy bleeding, blood clots, some tissue. I would arrive, pay \$300. Go back, put on a gown, take pill. Wait my turn. It would take a few minutes. I would relax for 15-30 minutes afterwards & go home. (like having a tooth pulled) they also said the doctor would talk to me before he started to be sure of my decision - just in case.
- 3) Were you adequately informed of the consequences of abortion? No
- 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No, not yet. He did this!
I have had to have a biopsy, I was okay.
- 5) Did anyone pressure you into having an abortion? Yes If so, who? My friend - he said that if I did not abort he would have my other children taken from me and he would take my baby after it was born and I would never see my baby. His preacher said it was better that the baby never be born.
- 6) How has your abortion affected you? depression; nightmares; hospitalizations; suicidal thoughts & actions; guilty; anger at myself and those who forced the abortion; fear; eating disorder; alcoholism; low self-esteem; anxiety; stress. I used to have thoughts of finding the father and killing him slowly and painfully and making him hurt like I hurt. If I thought I could win I would sue him for the pain & mental suffering he has caused me!!! Abortion made my bipolar disorder worse!
- 7) How has your abortion affected others in your life? I have not been the productive mom, person I could have been. My children have been affected the most.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Please, do not have an abortion. Talk to 20 women who have done this. It is not a quick fix. Get the facts. When you are 3 weeks pregnant your baby has a heartbeat. The abortion will haunt you the rest of your life and it will affect your judgement in all areas of your life forever.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is murder. Like suicide, it is a permanent solution to a temporary problem or situation. The damage cannot be reversed for the mother or the baby that dies. Because abortion is legal parents are forcing teens to have abortions and society has to eventually deal with the effects the abortion has on these teens later in their lives. Teens run away to keep from having abortions and end up on the streets & because people like me cannot take them in legally. I have read the above and foregoing statement and the same is true and correct. "I have read the above and foregoing statement and the same is true and correct."

AFFIDAVIT

THE STATE OF NORTH CAROLINA
COUNTY OF CABARRUS

Before me, the undersigned authority, on this day personally appeared Desmond Flynn, who, being by me duly sworn, upon oath, stated the following facts:

My name is Desmond Flynn.

[REDACTED] I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

"I sincerely don't know where to begin. I'm not a writer or public speaker. Not a salesperson or figurehead in the community. I'm just a middle-aged mother who prefers to serve the Lord Jesus Christ from behind the scenes where it's safe. It's becoming apparent to me lately, however, that God doesn't always leave us in places where we are the most secure and comfortable. It's taken Him several weeks of gentle, but consistent urging to convince me to leave my comfort zone and deliver a message for Him, reminding me that I am His hands and feet until my journey home. So, out of obedience to my Savior, armed with His strength, secure in His promise, and with a heart full of love for my children, I go.

I'm a volunteer at a local Crisis Pregnancy Center. My service in that ministry began a couple of years ago when the Lord lead me there to find comfort and healing. You see, twenty years ago I was in a crisis pregnancy. I was divorced and financially struggling raising two very small children. Terrified, sick, and confused, I found myself a few weeks later sitting in an abortion clinic, emotionally numb and being prepped for surgery. I wasn't given any information; the environment was clinical and impersonal. It was just a piece of tissue, I thought. I never dreamed that I was about to kill a baby. I thought I was just preventing the continuance of something that would *later* become a baby. I can't escape the vivid memories of the hour that followed. I was awake during the procedure and remember the physical pain of having my cervix forcefully dilated and uterus suctioned, the distinct sounds as the vacuum made contact with my baby (later learning that it had ripped her apart as she felt pain), and the consuming emptiness that engulfed me after it was all over. I remember lying there, alone, crying, looking around the room after the doctor and nurse had left. It was obvious by the blood that something terrible had just happened in there. Something terrible had. My sweet, innocent baby had died.

I managed to push every memory of my abortion down into the deepest, darkest depths of my mind and heart, locked away forever, never to talk about it or tell anyone, especially not my other two children, ever. The denial was so intense that I believe I had convinced myself that it had never happened. I later remarried and my husband and I tried to have more children. All of

our pregnancies ended in miscarriages. Finally the time came when we were no longer able to conceive. Ten years of infertility passed and we sadly accepted the fact that we were not going to share the blessing of having children together. We walked through some pretty dark valleys for two years after that. But God, in his wonderful patience and faithfulness, blanketed us in His wonderful Grace, and the deep, painful wounds in our marriage and lives began to heal. A year later, in God's own perfect time, my husband and I celebrated an unexpected pregnancy! Classified as "high risk," the doctors prepared me for a closely supervised nine months. My first ultrasound was at 7 weeks following conception. That was the first time I had seen a baby at that stage of development...so small and delicate, his little heart beating so strongly. My husband and I giggled and cheered in awe at every tiny movement we saw him make while we watched the screen. I felt some associations and realizations stirring even then, but I refused to dwell on them. We made it through an uneventful, full-term pregnancy, and our beautiful son, Addam, was born on April 22, the day after my 40th birthday. I remember holding Addam in my arms just moments after his birth and marveling at God's precious miracle.

Addam was nearly a year old when the Lord decided that the time had come for me to unlock the door and walk with Him as we faced the horror and sorrow of my abortion together. I could no longer hold down the memories. The grief, by then, was coming up in waves, despite my desperate attempts to suppress it. I didn't know about post abortion syndrome or about Christian ministries who helped women work through abortion trauma. I was led by God to the Center through a Shepherd's Guide directory that just happened to flip open to a Charlotte Pregnancy Care Center ad as I picked it up while leaving a Christian book store. I called the Center, spoke with several loving Christian women, and was enrolled in a soon-to-start PATH (post abortion) bible study group. Chris, a staff person who led the group and who had, herself, experienced abortion many years prior, was a wonderful, loving lay counselor. For weeks the four of us in the group studied God's word, God's will, and shared our abortion experiences and feelings. A lot of tears fell as the emotions were finally allowed to surface. It was a time of tremendous depression, sorrow, and later, release, as I mourned for the first time the baby that I had swept away. In my need to know more, God revealed to me that my baby was a girl, whom I named Mary Grace. My sweet, unborn baby finally had an identity. It seemed at the time that the only possible remedy to the tears would be if God, in his mercy, would put my baby back into my womb so that I could hold and cuddle her someday. I prayed that He would somehow undo my mistake and take away my grief and guilt. I was crying for a child I had never known, but loved with all of my heart.

With the Lord's help and the love and support of my Christian sisters in the group, I was finally able, by the end of the bible study, to face the realities that my precious baby was gone, that she had died by my hand, and that I was forgiven. God created woman to be a nurturer and protector of her children. One baby never replaces another in her heart. Even if I had been blessed with ten children, I would have loved each one totally and completely, and still would have loved and longed for the ones I had lost. I knew the Lord had forgiven me, but self-forgiveness was the hardest part of healing. I didn't feel deserving. I didn't want to feel

Page Three

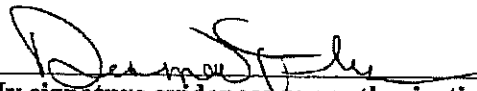

deserving. It took time to finally accept complete forgiveness. I know that Mary Grace is safe with Jesus in Heaven now and that I will be reunited with her again someday, but I still miss her and cry when I think about her. *Abortion shatters lives.*

These signs and pins, which I am making myself at home, represent everything I feel in my heart for Mary Grace, for all of the babies who will be lost to abortion, and for their mothers who will later feel the grief and regret that I feel. The abortion clinics won't warn those women of post abortion syndrom, and they certainly won't leave pictures like these laying around on waiting room tables in an attempt to change minds. If I had only seen these pictures when I was pregnant and confused, I know, without a doubt, that my unborn child would not have died."

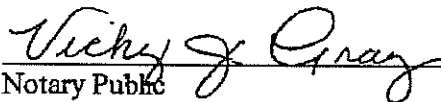

I have read the above and foregoing statement and the same is true and correct.

I'm here today to tell you a story, but first I read somewhere (and I know
this to be true)

That faith is deaf to doubt, dumb to discouragement, and blind to
impossibilities.

Faith also allows Christ to do for us and with us what we could never do
alone.

I could not be up here without that faith, trusting that God is with me and is
my strength.

This is a true story and it's titled "Unbound"

Read POEM page 3

What I hope you will take from this story is the redemptive power of God ...
how great His love is...and how He can bring good out of something evil.
The GOOD is that through God's love and forgiveness I found a Savior and
a Friend and He has gathered another lost lamb into His fold..

Unfortunately, it took me 9 years to really understand God's forgiveness.

The unworthiness I felt affected every aspect of my life and I was in
bondage. Satan loves it when we constantly replay our sins and feel guilty.

We spiritually incarcerate ourselves despite the fact that no place in the
Bible does God say He has forgiven us of all our sins "EXCEPT". ... **Jesus
paid it all.** ..God's gift of grace is unmerited, undeserved, and comes to us
pre-paid ... but this is a difficult concept for some of us to grasp because so
much of our lives is based on performance.

When I was finally able to receive that gift from God ,it was like walking
out of a prison into freedom...into a new life.

. Still, I did not speak about the abortion for 35 years. This is only the
second time I've spoken of what happened . I've believed for many years
that God will somehow use my experience to help others (and I believe He
wants to do this with all of us) The trials we go through are meant to
strengthen us and empower us to do His will and not bring us down.

There is a great hindrance called post abortion syndrome that keeps those
who have had an abortion from becoming the people God wants us to be and
until this is dealt with we are of very little use to Him or anyone else. First
of all sin must be recognized, and repented of . God never denies a sincere
heart. His greatest desire is to live in our hearts, but when our hearts are

filled with guilt and anger , resentment and despair there is little room for Him.

You won't hear this from pro choice advocates but post abortion syndrome occurs with most abortions and when the realization of what the woman has done becomes real to her, it is, believe me, something you don't want to experience. And, normally this doesn't happen until several years later. Many times it ends in suicide or it can last a lifetime. These women are the ones who do not know God's love and power and they suffer in silence because they are too ashamed to discuss their past. Chances are they don't want to embarrass friends or shame families ...or they don't have a caring pastor or an Open Arms to go to for help. One more thing ... the fact is most women have an abortion because they feel they have no choice, because of work , school, other responsibilities, cannot afford a child, or are having problems with a husband or partner. They panic and react without thinking of the child or the consequences of an abortion. At Open Arms there are trained counselors to deal with all these problems... but most importantly they need to know they have a loving heavenly Father who loves them, regardless of their sin, and they do have worth in His eyes, and He is ready and willing to take them in His arms to comfort them and give them peace.

Psalm 29:6&7

Praise be to the Lord, for He has heard my cry for mercy. The Lord is my strength and my shield: my heart trusts in Him and I am helped. My heart leaps for joy and I will give thanks to Him in song.

UNBOUND

This is the story about a young girl
Whose parents were loving and kind,
And they brought up their children in a Godly way
With values well defined.

Though she loved her home and family
She always had a dream :
To explore the world from end to end
And, at seventeen she was ready, it seemed.

She was excited and eager to be on her own
To discover what life was about.
Confident her dancing would pave the way
She allowed no room for doubt.

Along the gilded road she traveled,
Intrigued by the glamour and lights-
Blinded by the attention of wealth and fame
She could no longer see what was right.

Bedazzled by glitter and temptation
She yielded to the savor of sin
And unbeknownst to her at this time
The devil chalked up a win.

Pregnant, and seeing no other way,
She chose what she *felt* to be right...
Abortion was her answer
To escape this horrible plight.

But her life would never be the same
For the consequences of sin never fail.
Lonely, despondent, tormented with guilt,
She felt she was living in hell.

How could she have made this decision,
She thought, as her mind began to clear-
But she *knew* it was selfish ambition
And she shuddered with shame and fear.

"How can this child, or God, forgive me?
How can I forgive myself?
How can I ever forget what I've done?
Is it possible to just sit it on a shelf?"

Years of suffering took their toll
Until one day she found
That God still loved her after-all
And chains of guilt were, at last, unbound.

Only the power of a sovereign God
Could set her spirit free
And I know this Truth with my heart and soul,
For the girl in this story is me.

AFFIDAVIT

(Questions for WOMEN Who Have Undergone Abortion)

The State of North Carolina

County of CASWELL

BEFORE ME, the undersigned authority, on this day personally appeared Leslie Holmes Gvdos, who, being duly sworn, upon oath, stated the following facts.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell when and where your abortion occurred:

My abortion occurred in the early spring of 1996 (I cannot remember the specific date) It was at a clinic called Women's Pavilion on Elm St. in Greensboro, North Carolina.

2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain:

No, I was not adequately informed. I was shown the instrument that they would use to suck the baby out and a brief explanation of the mechanics of the procedure. I was not informed of the excruciating pain that would occur, during the procedure as I was given no painkiller or anesthetic of any sort. I do recall that they gave me some type of pill that would help my blood coagulate so I would not bleed excessively.

3) Were you adequately informed of the consequences of abortion?

No, I was not informed of any negative consequences of abortion. No one ever told me about the years of physical and psychological and emotional pain that I would suffer. And no one told me about the years of infertility I would suffer. No one told me that it would effect my personal relationships.

4) Were you informed of any link between abortion and breast cancer? Have you ever had breast cancer?

No, I was not informed of any link between abortion and breast cancer. No, thankfully I have not and will not have breast cancer.

5) Did anyone pressure you into having an abortion? If so, who?

Yes, the father, my boyfriend's immediate reaction to my pregnancy was to get an abortion. He did not want the responsibility of having a baby and he did not want to marry me. I also believe the clinic workers subtly coerced

me into it also, even though I told them I was extremely conflicted and unsure that I wanted to go through with it. In my mind I thought I was going there for a consultation or to learn more, but once inside the clinic, my boyfriend really made me feel that abortion was my only reasonable choice. I know the clinic workers were just as interested in me going through with it because I asked one clinic worker if I could see the sonogram and they said no.

6) How has your abortion affected you?

It is hard to enumerate all the ways it has affected me in a short space. As a result of it, I have endured much guilt, remorse, shame, and physical and emotional pain. For weeks after the abortion, I felt suicidal. I have had continuous abdominal pain for six years since the abortion. Since the abortion, I have had bleeding between periods and irregular menstruation. I have also tried to get pregnant without success. It has affected my relationships with my husband, mother, and other family members. I have missed having a child who would be six years old by now. It was a totally devastating experience, like being in a war, where the battleground was my own body. It was a horrible experience that I would never wish on any woman. It did however bring me to a point where I cried out to God and now I have forgiveness, salvation, and a personal relationship with Jesus Christ.

7) How has your abortion affected others in your life?

It definitely has not brought the joy that a child would have brought. Others in my life have had no concept of the horror I went through in the abortion clinic. I grew up believing that "pro-choice" was the right belief. Some of my family members still believe that is true. Others in my life cannot really relate to me like they did before. My mother has been affected by the loss of a grandchild and my grandmother missed out on her great-grandchild. It seems the loss was not as devastating to others as it was to me. It has also been hard to find others to share and talk with about this, because of the shame involved. I believe many women never talk about the abortion(s) they went through and therefore are walking wounded. They never get a chance to heal and their lives are affected in ways they themselves don't understand.

8) Based on your own experience, what would you tell a woman thinking of having an abortion?

In a moment of crisis abortion may seem like a viable option but it is truly a short-term gain, with a long-term loss. It was the most horrible experience I have ever gone through. I now know that it is murder. You are killing a baby not a mass of cells. God began knitting that child together in your

womb from the moment of conception. That baby is depending on you to do care for it and give it the life it was meant to have. You are its only ally, don't kill your baby. Your baby will love you and you will be happy you kept your baby, despite any hardships you may experience. You may have gotten pregnant out of wedlock or other bad circumstances but two wrongs do not make a right. Adoption is always a possibility and there is help for you if you decide to keep your baby.

9) Based on your own experience, what would you tell a court that believes abortion should be legal?

Abortion is murder and murder is sin. Sin always has bad consequences. Our judicial system should not allow us as citizens of the United States to murder people (including unborn people) for convenience; it should be against the law. The court cannot condone mass-murder under the euphemism "abortion". The unborn baby deserves it's right to the life it was intended by its Creator to have. If the court goes against God's law and condones murdering unborn babies, the innocent blood of those babies will be on the court's hands. I have endured the horror of abortion and now I know the truth about it. It is murder of a fully unique human person made by God. Abortion snuffs out the life of a person who cannot speak for itself about whether on not it wishes to live or die. The court has a responsibility to speak for those who cannot speak for themselves. Abortion devalues human life of all types and it kills human life in utero. Abortion is a serious moral depravity in our society and if not stopped, legalized abortion will ultimately lead to judgment on us all by the Creator of us all.

BEFORE ME, the undersigned authority, on this day personally appeared [redacted] (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell approximately when and where your abortion occurred:

1979, 1980 - Great Clinic, Jacksonville, NC, 1983? Wilmington, NC

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?

I do not wish to put the blame of my decision on anyone else. However, abortion was presented as a "quick fix" to the situation I found myself in. There were no crisis pregnancy centers in my area then. On the emotional, physical, or spiritual implications were never disclosed. Abortion was mentioned slightly.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer?

No.

No.

There was no discussion about the baby of the actual abortion process it self.

4) Did anyone pressure you into having an abortion? If so, who?

off I felt that neither my parents or my church would understand. I know I was strongly encouraged by the "father" and they said for the abortion. At the Government said, all I had to do was fill out some forms. The fact that it was legal, made the decision to have an abortion much easier. It seemed less wrong somehow.

5) How has your abortion affected you?

much easier. It seemed less wrong somehow.

for a while, I managed to blot it out. I can still not remember all the details. I could find a long time to have a very low self-esteem. However, I kept in good physical shape. I believe my physical health is stable. One day I found at least 1000 of my subconscious guilt. One thing I still haven't revealed everything to my husband, family, or my church. I feel as if I am the largest of...

6) How has your abortion affected others in your life?

It took me a long time to tell my husband. He was more understanding and he said he was getting that I told I couldn't trust him enough to tell him sooner. I told him I had more than one. He said he'd rather not hear anymore. My parents only know one. They have expressed their sorrow for possible contributing which I no more forgive each other. I know I will probably have to tell my children one day (they are 11 + 12 yrs old) I don't know if they'll be able to handle it or not. I'm afraid they'll hate me. I'm praying always that they will not make the same mistakes I have made. But I'm trying to raise them so that if anything like this ever happens to them, they will feel that they can come to me for help & understanding and love. (Also, I have had two miscarriages and I'm afraid my abortions may have contributed somehow to this.) Dad will forgive you. It is forgiving yourself that is so hard to do.

Your decision to have an abortion will haunt you for the rest of your life. You will regret having the abortion. You will not regret having the baby.

7) Based on your own experiences, what would you tell a woman considering an abortion?

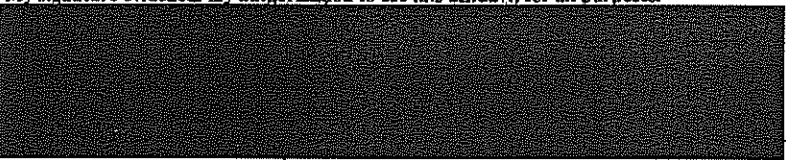

Think & pray for as long as possible before making your decision. Explore all the options available. Visit at least 3 agencies in Texas where they will tell you all the facts & listen to you without judging you. There is no one to be considered that just the present time. Think about how you will feel about yourself and your baby in the future. You know as a baby you just need someone to help you.

8) Based on your own experience, what would you tell a court that believes abortion should be legal?

Please, take into account, just a fact that this unborn baby could easily be a disabled child. Your child or your grandchild will be born disabled. It is wrong to kill our human beings. I think about how many lives could be saved if the consequences of legality were removed. Many lives would take disabled pregnancy & pay until we are no longer. The possibility of God, 3rd, 4th, etc. abortions would probably be reduced drastically.

Look around at the depression, low self-esteem, quiet, shamed country productivity. Boston has produced in those who have taken part in it. Also, think of the increase in the number of temporary, productive citizens. Had abortion not been legalized, slavery, but most important, think of what you will say when you stand face to face with Almighty God & have to give an answer for why you would let keep abortion legal.

1) Tell approximately when and where your abortion

occurred: 1985, Orlando, FL

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I do not believe so.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? Absolutely not. No, I do not have breast cancer

4) Did anyone pressure you into having an abortion? If so,

who? Yes. My boyfriend. Several months later he became my husband.

I became pregnant again & refused to have another abortion.

We then got divorced.

5) How has your abortion affected you?

I am so sad that I murdered my child. I know that God has forgiven me, but sometimes I wonder if I'll ever forgive myself.

I remember the sounds & the pain of the death of my child.

It's horrid. I remember the voices of the people outside the clinic calling me a baby killer. As a Christian now, I hope to never be that judge of anyone.

6) How has your abortion affected others in your

life? I have kept this to myself for 20 years, ashamed of what

I've done. My ex-husband has never felt any remorse.

My daughter (15) does not know.

7) Based on your own experiences, what would you tell a woman considering an

abortion? I would tell her that it's easy to go into the clinic -

but the "procedure" is painful - spiritually + emotionally.

It's wrong, it's death + that child cries out - don't mommy.

I tried to back out but was semi-conscious

& couldn't - the "procedure" had already begun.

8) Based on your own experience, what would you tell a court that believes abortion should be

legal? NO way should this be legal!!

That is a living human being! It's murder. Just

as much as murdering a 1-year child. ~~It's not birth control!~~ The child

I know that child feels pain.

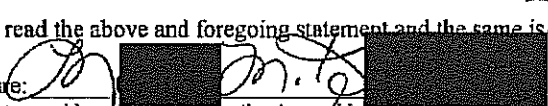

It is not birth control!

Yes, women should have control of their own bodies.

However, that child has it's own body + no voice

to speak out at this point.

To Be Filled Out by Women who Have Had an Abortion:

The State of North Carolina

AFFIDAVIT

County of Catawba

BEFORE ME, the undersigned authority, on this day personally appeared Saundra Murphy (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: I can't remember exactly when - April or May of 1981 or 1982 somewhere in Dallas, Texas. I have always tried to suppress it and only thru the healing I am receiving from God - do I remember more & more.
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No. I was told that it was a simple procedure that would not take long and it would be done and over with and I would forget all about it. I would be given some medicine that would put me 'out of it' but I felt a lot of pain.
3. Were you adequately informed of the consequences of abortion? No. I wasn't told of any - I was told there wasn't any besides feeling a bit nauseous from the medicine they were giving me. Besides that I wasn't suppose to have any problem whatsoever.
4. Were you informed of any link between abortion and breast cancer? No
Have you had breast cancer? No - not yet
5. Did anyone pressure you into having an abortion? Yes.
If so, who? A Nurse at the health department - my sister, and the nurse at the clinic; when I wanted to leave.
6. How has your abortion affected your: Depression worsened, eating disorder, drug and alcohol addiction, increased - heightened, sleeplessness, nightmares, problems with relationships, uncontrolled crying spells, suppressed anger - pain - bitterness, sterility, withdrawal, suicide.
7. How has your abortion affected others in your life? I have been distant, angry, untrusting of others, closed out family & friends. My mother received a lot of pain because of me subconsciously blaming her for wanting to hurt her.
8. Based on your experiences, what would you tell a woman considering an abortion? It is murdering your child and it will effect you & others around you; physically, mentally, emotionally, and spiritually. It may leave you unable to have children as it has me and at a very young age. I wanted to grow up, get married, & have children. It effects everything.
9. Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is murder and should not be allowed to happen. It only adds to the drug, alcohol, suicide, and relationship problems. I wanted to leave the clinic but was told if I waited even another week it would be too late - pregnant means you are carrying a child and that child has a right to live, my child was fully developed - I was further along than they claimed.

I was in a lot of pain, something fell on the floor - an instrument he was using. I tried to get up but they strapped me down. I saw my child's arm and I screamed. The doctor just sort of laughed, picked it up, and continued to pull pieces of my baby out of me as I cried. I was carrying a child not just some tissue blob. My story is probably more heinous than others but it doesn't change the fact that every woman I've ever met that has had an abortion; has mentally, physical, & emotional problems. And there procedures were, mostly, more "professional" and "routine". There is even more to my story than this but I am already writing on the back and I don't know if that's okay or not but I felt I needed to put more than was on the front. There are consequences to abortion - none of them are good or moral. No wonder our generation of kids are killing each other - we allowed it to be legal to kill our children.

Before me, the undersigned authority, on this day personally appeared Karen Portela, (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

My name is Karen Portela (Print Name) My address is

[REDACTED ADDRESS]

over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

In June of 1992 I got pregnant. I was not the kind of person that something like this happened to. I had a wonderful family and was very popular and outgoing. I thought there was no way I could go through with a pregnancy. Not only would it hurt my family, but I had plans. I had to finish college. I went to a Planned Parenthood where I was told my options, but I left with a handful of abortion information. So at 9:00am at a clinic in Chapel Hill, North Carolina, I had an abortion. At first I felt relieved. I thought my problems were over and that I could get on with college. Exactly two weeks after the abortion, however, I found myself drunk, lying in a fetal position, crying "I didn't want to kill my baby". That night was the beginning of alcohol abuse that lasted well over a year. When the abuse finally ended I began to realize how much I had changed. I was no longer outgoing. In fact I had very few real friends because anytime people came into my life I pushed them away. I spent my life feeling empty and afraid. I went through periods of depression when I could not make myself wake up, much less get out of bed. The only emotion I seemed to feel was anger, and it was consuming me.

Please return to: Texas Justice Foundation, 8122 Datapoint, Suite 812, San Antonio, TX 78229

I sought professional counseling and thought I was better, but my life continued to spiral downward. I found myself pregnant again. During this pregnancy I gave my life to Jesus Christ. I have been through individual counseling and was involved with a support group at a Crisis Pregnancy Center. Though it was a very long, hard process, in February of 1998 I accepted that though I had an abortion and it was wrong, I am forgiven and can move on with my life. I am finally at peace.

BEFORE ME, the undersigned authority, on this day personally appeared DIANE A. BAILEY (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: April 26, 1975 at THE Cleveland Clinic
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? THERE WAS NO COUNSELING WHATSOEVER, ONLY THE EXCHANGE OF MONEY.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? YES If so, who? my THEN boyfriend Marc either I was to get an abortion or he would leave me, I was scared to death.
- 5) How has your abortion affected you? Afterwards I tried to escape the agony of guilt & shame thru drugs & alcohol & considered suicide frequently as well. On at least 2 occasions I would get a knife and begin to slide the blade across my wrists ~ never having the nerve to proceed further but always hoping I would die. I sought counseling but nothing ever took the guilt away. Now I am a Christian & know I am forgiven but I cannot shake the guilt & shame around for years.
- 6) How has your abortion affected others in your life? Some are stand-off-ish. Others don't want to talk about it. My niece named her 2nd daughter after my daughter I aborted.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Abortion straight up is indeed murder and once you've made that horrendous decision you don't only become a woman who has had an abortion, but you are now the mother of a dead child.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Please consider the Extreme consequences. Murder is murder. You can not conceal that simple & plain truth. There are thousands of shattered lives, both male & female that are held in bondage to this guilt & shame that comes with that life-changing 'choice'. NO one wins when abortion is thought to be the better choice.

- 1) Tell when and where your abortion occurred: 7/78, CLEVELAND, OH
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: I WAS NOT TOLD THAT IT TEARS THE BABY APART PIECE BY PIECE, THAT THE BABY WOULD FEEL PAIN. I WAS NOT TOLD ABOUT THE YEARS OF EMOTIONAL TORMENT I WOULD EXPERIENCE
- 3) Were you adequately informed of the consequences of abortion? NO. I MAY HAVE BEEN INFORMED ABOUT THE PHYSICAL RISKS, BUT NO ONE EVEN BEGAN TO TELL ME ABOUT THE EMOTIONAL & PSYCHOLOGICAL CONSEQUENCES.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? If so, who? YES. BY THE MAN WHO I WAS PREGNANT BY.
- 6) How has your abortion affected you? IT HAS AFFECTED ME EMOTIONALLY. I WAS UNABLE TO BOND WITH ANYONE. I HAVE SUFFERED DEPRESSION. IT CAUSED YEARS OF SELF-DESTRUCTIVE BEHAVIOR.
- 7) How has your abortion affected others in your life? FOR YEARS I WAS UNABLE TO NURTURE MY DAUGHTER. I WOULD NOT ALLOW MYSELF TO
- 8) Based on your own experiences, what would you tell a woman considering an abortion? I WOULD TELL HER, EVEN PLEAD WITH HER TO RECONSIDER. SHE MAY NOT EXHIBIT ANY PHYSICAL SCARS, BUT THE HURT AND LOSS WILL EXHIBIT ITSELF PSYCHOLOGICALLY. HER BABY IS A PERSON; NOT A "FETUS". IT WILL FEEL PAIN. IT WILL SUFFER.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? JUST BECAUSE A "FETUS" DOESN'T HAVE A NAME DOESN'T MEAN IT'S NOT A PERSON. AT 28 DAYS ITS HEART BEATS; DOES THAT CONSTITUTE LIFE? IT IS THE MOST UNNATURAL ACT OF THE "CIVILIZED" WORLD FOR A MOTHER TO KILL HER OWN BABY

BEFORE ME, the undersigned authority, on this day personally appeared Karen Berger-Manga (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 6/11/85 513 West Market St. - Akron OHIO
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No, I was lied to and told my baby wouldn't feel a thing & I was not told that there may be problems with infertility & the cancer risks involved.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? I have fibrocystic
- 4) Did anyone pressure you into having an abortion? Yes If so, who? The baby's father was (great disease) very immature (along with myself at that time). He said it was "the baby or me" (so couldn't have them both)
- 5) How has your abortion affected you? The abortion haunts me to this day. I know now that God has forgiven me thru Jesus' death on the cross that my debt is paid. But as a mother of 2 children now - I can't forget & often wonder how our lives would differ with the life of my deceased baby/child. Emotionally, it has been difficult to let your guard down, to trust and to believe that you are worth anything. I still remember (as if yesterday) the Dr. who did the abortion looking down into the container the afterbirth was in & shaking his head. I wonder why, but of course - unsure.
- 6) How has your abortion affected others in your life? Makes trusting others difficult. It tends to make one be more "self sufficient" which is not what Christ wants us to be. It also makes you feel unworthy of anything good.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would tell her my story and then tell her about how a child is a gift from God & thru His grace & mercy, she'd be much better off carrying her baby to term. God will then help her make the right choice if she then is uncertain about keeping her child... there are so many wonderful loving people who would love to adopt.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would say that "How can they feel that abortion should be legal when there are laws against killing animals/harming animals - especially if pregnant... are animal lives more important than human lives?" I would tell them maybe they should experience first hand the pain and suffering having an abortion caused so many women... how the injection forcing the uterus to dilate thru the insertion of the suction catheter literally sucking life right out of you. Then the foreorn feeling that people would reject "I have read the above and foregoing statement and the same is true and correct." you if they knew what you had done.

May 03, 1978

- 1) Tell when and where your abortion occurred: Founders Womens Clinic Broadstreet Columbus Ohio
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: I was asked under "valium" (Why are you here?) That was the extent until "AFTER" the abortion. When we were herded into a conference room and given condoms and a quick "what to do if..." pep talk
- 3) Were you adequately informed of the consequences of abortion? NO I was damaged, hemorrhaged, infection, problems for years after, never another "normal" period, resulting in severe endometriosis and complete hysterectomy
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO - I do have Fibro cystic Breast Disease
- 5) Did anyone pressure you into having an abortion? me! If so, who? Fear of being found out. it was not my live in boyfriends. (sin begets sin)
- 6) How has your abortion affected you? I am 44 yrs old and childless, I desperately miss what could have been. I know in years past I drank, did drugs and many other self-abusive behaviors to bury my grief and pain. I know this led to bulimia, which led to diabetes! My hysterectomy led to osteoporosis. Would you like to read what I have written over the years?
- 7) How has your abortion affected others in your life? My mother grieves for me, my loss and her dead grandchild.
- 8) Based on your own experiences, what would you tell a woman considering abortion? DO NOT DO IT! There are alternatives. you cannot fathom the long term consequences when the reality sets in and you realize you are not just unpregnant you ARE the mother of a dead baby. That pain doesn't go away.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? life begins at conception God says thou shall not kill anyone including babies created in his image. By legalizing abortion every "judge" carries the blood of the innocent on their hands. Every judge is as responsible as I am for the outcome of my choice, though their guilt

- 1) Tell approximately when and where your abortion occurred: 08/95 in Columbus, OH. (Planned Parenthood)
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I was informed of the two part process to terminate my pregnancy. I don't believe anyone could have adequately informed me of what I was doing: the consequences of my actions.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? Yes If so, who? I believe as a scared 16 year old teenage girl there were alot of people who pressured me into doing what I did. I wish I had been stronger. I wish abortion wasn't an option.
- 5) How has your abortion affected you? At the time of my abortion I did not think that it would affect me at all, but it didn't take long to turn my life upside down. I would sit and cry for hours, I would write letters to my unborn baby apologizing for what I had done. My grades slipped by itself. I suffered and I was depressed for a long time. I didn't think I ever deserved children and I turned away from the Lord because I didn't think I could ever be forgiven. Every relationship I started
- 6) How has your abortion affected others in your life? years later the father had a really hard time coping and dealing with what he had advised me to do. His relationship to her church for counseling. My parents and sisters were horrified by my actions.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? To never ever kill her unborn child, go through the pregnancy and then decide. Ask family for help or put the child up for adoption. There are so many families who want babies and don't have the option. **PRAY!**
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Why is murder legal? If my child were 1 min. old and I killed it would that be ok? NO! So why can I destroy this tiny life growing inside of me with absolutely no consequence from our justice system? Aren't we supposed to protect the weak and the helpless?

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- 1) When and where did your abortion occur? July 21, 1988 Columbus, OH
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No If no, explain: I was never given information regarding child development.
- 3) Were you adequately informed of the consequences of abortion? Never given information regarding physical, emotional and/or mental side effects.
- 4) Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- 5) Did anyone pressure you into having an abortion? Yes No If yes, who? _____
- 6) How has abortion affected you? I have felt guilty, angry, pain, sadness; I've tried to numb this by drinking and taking drugs; I have suffered from low self-esteem, sleep disturbances, eating disorders, sexual dysfunction and anniversary reactions causing great depression and physical sickness every year around the anniversary of this tragic event. I am an extremely over-protective mother and have had a hard time learning how to parent without anxiety, or as much anxiety as I cause myself with this over-protectiveness.
- 7) How has your abortion affected others in your life? The abortion has negatively affected my parenting skills, my relationship with my husband, friendships, and family members due to depression & personality since.
- 8) Based upon your experience, what would you tell a woman considering abortion? To know everything about procedure, location, doctor, after affects (not just given by facility). I would NEVER recommend anyone having abortion. This decision will affect your entire life; it is not something that goes away; you never forget.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? That a child is being murdered. A child develops at the time the egg meets the sperm - a chain reaction happens telling the woman's entire body that she is pregnant. It affects a woman physically when a pregnancy is terminated by a reason other than natural.

AFFIDAVIT

To be filled out by women who have had an abortion.

The State of Ohio

County of Montgomery

BEFORE ME, the undersigned authority, on this day personally appeared Pamela L. Dayer (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: October 6, 1995 - Westerville, OH.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Yes I was - However, I was unaware of the specific link between abortion and breast cancer.
- 3) Were you informed of any link between abortion and breast cancer? not Have you had breast cancer? no
- 4) Did anyone pressure you into having an abortion? Yes If so, who? The father of my baby.
I was not married to him - he had also been my first love several years earlier. I did not want to lose our relationship a second time.
- 5) How has your abortion affected you? It has totally changed my life. I have actually always been pro-life. I went against the very core of my beliefs when I aborted my precious baby. The anguish I have experienced has been overwhelming - to the point that at times I wanted to "jump out of my skin". I wish I could go back in time and reverse my selfish choice. Through my most regrettable time in my life, even though I ~~did~~ felt I did not deserve it.
- 6) How has your abortion affected others in your life? God has greatly taught me about his unconditional love, mercy and grace. I have been blessed with a very supportive husband and two precious children since my abortion. My experience has grieved my husband as well.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? First and foremost - Do not have an abortion. Consider life-affirming alternatives - ie adoption. The concern regarding the procedure does not even compare with the lifetime of anguish associated with having an abortion.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? They are focusing too much on the right to choose and are losing sight of the horrible act that follows a choice of "yes" to abortion. Life begins at conception - and abortion kills this precious life. There are countless women and men who struggle everyday with their past decisions to choose abortion. What many view as a right to choose is in reality, a sentence to living with extremely deep anguish and regret. What about the baby's rights? I have read the above and foregoing statement and the same is true and correct.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 1977 Texas - 1979² Indiana *Hard to remember actual dates*
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO - my parents took me to both clinics, I was 14 yrs & 16 yrs old. I don't believe they were properly informed.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO/ YET
- 4) Did anyone pressure you into having an abortion? Yes If so, who? My parents made the decision - I felt like an innocent bystander.
- 5) How has your abortion affected you? There isn't near enough room here to adequately explain it. I felt alone, afraid, in trouble (persecuted), with a few years & having never discussed it I dealt with a lot of depression, failed relationships (even with my own children). I have since found Jesus and am able to help others considering that dreadful alternative. - Devastating
- 6) How has your abortion affected others in your life? distort, disappointment. But now it is a learning tool for them. My children now knowing my story & want to help me to help others.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? There is more to it than anyone will ever tell you at an abortion clinic. They don't tell you how much pain you will be in - in your soul. What does that say about it?
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? There's no such thing as Pro-Choice - you are either Pro-life, or Pro-death! Most women who've had abortions will tell you they felt they had NO-Choice!

BEFORE ME, the undersigned authority, on this day personally appeared Jeanette Elwell-Cossin (Print Name), who, being by me duly sworn, upon oath, stated the following facts: J, Elwell-Cossin

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell approximately when and where your abortion occurred: BUFFALO NY NOV 1990 I was 20yr
2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? and had 1 daughter
No

4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No

5) Did anyone pressure you into having an abortion? No If so, who? because I was rejected by loved ones and had no friends
I made a secret decision. No one pressured me or told me Not to.

6) How has your abortion affected you? Adversely; horribly, deathly influenced me to. I said "No"
I know when I finally let the truth out but miscarried 2 months later)

I felt a little free. I waver from fear of rejection, guilty that innocent blood on my hands. Don't hate myself as much. I use to push myself love/hate and hit myself not knowing why I had so much rage in me. Wanted to be close to my children and attempt all these spiritual teachings with them and feel disconnected when doing it. I am finding forgiveness that frees me from anger and helps me to say I love you to me and children. I have learned to say Yes to life. I still have wounds of despair, loss.

7) How has your abortion affected others in your life? My daughter Christina age 12 said, "I never get to see my sibling or hug them. I had visions that I had a brother or sister my age all these years" before I asked my mom if she ever had an abortion" Jeanette told my mom just this year she said,

8) Based on your own experiences, what would you tell a woman considering an abortion? "We all make "mistakes" It is better + best to give life, because death hopefully I can set past breads death You will live with the truth you must the past."
face + knew the truth to be set free. Abortion brings lies, secrets, + chains of pain

9) Based on your own experience, what would you tell a court that believes abortion should be legal? One bad decision is the beginning of a long road to many more bad decisions which adversely affects, me, my children, my family, work, city, communities and this Nation, as evidenced in my life and continued use of 44 million abortions and it has now included last trimester abortions, and any others deemed unworthy.

"I have read the above and foregoing statement and the same is true and correct." I am glad I accepted God's salvation in my life. I want to live. I am glad my unborn mom had me

I would tell them that abortion is a self-inflicted torture that women choose, because they don't know all the truth about its effects. - 6) How has your abortion affected others in your life? It affected my family relationships and friendships very negatively.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Not to do it, because there are other alternatives that are less dangerous and will not leave you emotionally scared or feeling like an outcast. Plus the life inside you is real!
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would say that the life inside a woman is real and we should not kill it, because it kills a part of us. When we do it, the death it brings to the child, an emotional death it brings to the woman and irreversible. This is not a legal act, it is an illegal liberty we have used against the innocent.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- 1) When and where did your abortion occur? New York City, New York 1991
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No If no, explain: I was given misinformation re. death rates by my Planned Parenthood counselor encouraged ~~not~~ to speak with my family, friends, Church, or the child's father, told to make my decision quickly because my life was at risk.
- 3) Were you adequately informed of the consequences of abortion? No. In fact I was told that other than some heavy bleeding + cramping for a couple days there were none.
- 4) Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- 5) Did anyone pressure you into having an abortion? Yes No If yes, who? Planned Parenthood Counselor.
- 6) How has abortion affected you? Guilt - especially had in 1973 when I looked at abortion in connection to my faith, distrust to drive off bridges occurring sporadically beginning 1975 - 2001 inability to hold babies without my breasts hurting (1975-1997), distrust of men (it took 3 years of dating to marry my husband), Abn shame, hidden anger, various fears in decision-making, Grieving Ronnie's loss began in 2001. Prior to that dealt only procedure. Contrary to Planned Parenthood's counsel each person I consulted have confided in, with whom I had been concerned would desert me as a pregnant 21-year old, hugged me in spite of my abortion + mourned with me.
- 7) How has your abortion affected others in your life? Parents - pain bc lost grandchild. Adopted children - Pain of lost elder brother. Had to grow up under a strict parent. His Dad a divorcee.
- 8) Based upon your experience, what would you tell a woman considering abortion? No circumstance (all of which may seem overwhelming in the first 2 weeks of an unplanned pregnancy) is worth the agony of an abortion + the years of regret. Trust your family/friends. If
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion should be considered a crime against both women and children. Psychologically you wouldn't give your child to adoptive parents if you're the easiest to deal with a dead one. Organizations that promote them are very concerned re! abortion sales - not about abortion alternatives. They do not encourage potential consumers to come to terms with how the abortion will affect them in their individual social contexts.

BEFORE ME, the undersigned authority, on this day personally appeared Nancy Heston (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 2 Abortions, Late 1970's Akron, Ohio
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I WAS NOT informed. The nurse said that they were going to kill a tiny baby. They never said I might very well regret what I was doing
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? NO If so, who? _____
- 5) How has your abortion affected you? I have had a lot of guilt for over 25 years. I didn't care about my hygiene for several years + I was permissive sexually for lots of years. I didn't value myself + knew what I had done was horrible. I couldn't have healthy relationships with guys, wanting to manipulate them with sex.
- 6) How has your abortion affected others in your life? It has been difficult for my children to have a warm relationship with me.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would tell them to never, ever get an abortion. It is always wrong. It is always murder. I would tell them to keep looking for someone who will help them save their baby's life. We must honor God with all human life He creates.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Murder is never legal. Abortion is the worse form of child abuse. AMA 1859 - Abortion is "slaughter of countless children" such unwarrantable destruction of human life" 1871 Abortion is "work of destruction, the wholesale destruction of unborn infants." Human life begins at conception. No new DNA is added only stages of development proceed. Life is a continuum from the point of conception. No one has the right to enter a womb to destroy the smallest of human life.

BEFORE ME, the undersigned authority, on this day appeared [Redacted], who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- When and where did your abortion occur? Columbus OHIO 1985, 1986
- Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No If no, explain: There was no counseling on what abortion would do to my mind, my heart, my soul.
- Were you adequately informed of the consequences of abortion? absolutely NOT!
- Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- Did anyone pressure you into having an abortion? Yes No If yes, who? _____
- How has abortion affected you? When I had my abortions, I resolved to never touch that part of my heart again. I pushed it down so far, I totally denied I ever had one. The guilt and shame were so horrendous, my next option was O. I lived in the "prison" for 16 years before I finally "told my story" Even after I was saved, I still kept it deep inside. I felt like the worst sinner in the world, no one would want to hear what I had done. I had built a wall around my heart and no one was gonna get it. My precious Lord's Savior, tore down the walls and sent me to POHC where I got healed from my pain and torture. PRAISE GOD for CRISIS Pregnancy Centers!!!
- How has your abortion affected others in your life? it put a rift between my older children and I. I felt like such a horrible mother.
- Based upon your experience, what would you tell a woman considering abortion? God has a plan for every life. If you don't want this baby, there is someone who will accept it into a loving home and care for it as their own.
- Based on your own experience, what would you tell a court that believes abortion should be legal? There is no amount of counsel that can prepare you for the after effects of abortion. The guilt and shame are crippling to the mother. This QUICK FIX brings a lifelong set of problems in itself.

BEFORE ME, the undersigned authority, on this day personally appeared S [redacted] J [redacted] (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell when and where your abortion occurred: April 1983, Jackson, Michigan

2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No. I really don't remember much of any kind of conversation with the clinic. I knew what was going to happen to the baby but had no idea of how it would affect me long term or of any details

3) Were you adequately informed of the consequences of abortion? No. Not informed on anything really.

4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No - No

5) Did anyone pressure you into having an abortion? If so, who? No

6) How has your abortion affected you? It effected me emotionally & in a lot more ways than I ever realized. Have had bouts of depression & for 17 years spiritual separation from God.

7) How has your abortion affected others in your life? They've had to deal with me & my emotional problems & depression.

8) Based on your own experiences, what would you tell a woman thinking of having an abortion? They need to know all the facts of how this is going to effect them. I would tell them not to do it & if she does not want to keep the baby adoption would provide her with the same solution only may better. She can go on with her life & also give the baby life.

9) Based on your own experience, what would you tell a court that believes abortion should be legal? I can see very few circumstances where abortion is the solution for the mother or the child. It should be illegal except for rape, incest or to save the life of the mother. Abortion ruins people emotionally & spiritually & in many other ways.

The State of Ohio

BEFORE ME, the undersigned authority, on this day personally appeared [Redacted] B.L. [Redacted] (Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true: (S)

- 1) Tell approximately when and where your abortion occurred: New York City, N.Y. 1973
 - 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. Not ~~at~~ at all. No one along the way spoke of these things. No one call me a mother or the baby (any thing). No one encouraged me to reconsider or wait.
 - 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
 - 4) Did anyone pressure you into having an abortion? YES If so, who? The father of the baby.
-
- 5) How has your abortion affected you? It brought deep depression and fear. Eleven years later I came to know the truth stated in Scripture. "Come unto me, all ye that labour and are heavy laden, and I will give you rest." (Matt. 11:28). It was a tremendous relief to have forgiveness from God in Christ Jesus. By then I had become sterile from PID, suffered a breakdown of my basic health, and felt the family dog was more worthy of common courtesy than I. God has forgiven me. I must follow His lead. A total hysterectomy has followed. I fight an overcoming sense of danger in the ordinary situations of daily life.
 - 6) How has your abortion affected others in your life? I have built up walls to stay away from them; to protect both me and them from the hurt.
 - 7) Based on your own experiences, what would you tell a woman considering an abortion? Many things we do that look like a solution (to a perceived problem) in reality prove to be far worse than the ^{initial} dilemma. If you choose abortion, you will live out this reality all the days of your life.
 - 8) Based on your own experience, what would you tell a court that believes abortion should be legal? No - it is irreversible. It breaks the heart of the mother; breaks the back (strength & personhood) of the father; and is no less barbaric than beheading of the baby. It lays a three-fold burden of guilt, shame and despair on our society.

BEFORE ME, the undersigned authority, on this day personally appeared M. L. (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Dayton Ohio - Summer - 1975
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Absolutely Not
No one told me my baby's heart was beating or that he had 8 ribs even!
No one mentioned emotionally consequences
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? Yes If so, who? Fear of reproach from parents
Actually, no one knew. I guess the fear of telling my family
I was pregnant - out of wedlock did pressure me into the abortion
- 5) How has your abortion affected you?
I believe my abortion was the beginning of my devaluing human life - even my own. Twenty-five years later, I'm still struggling with low self-esteem. I talk to the post-abortion breast group at the Crisis Pregnancy Center - I believe in Christ & have. I finally 25 yrs. later, forgiven myself - Time does not heal all wounds
- 6) How has your abortion affected others in your life? I believe it has, because it was the first step in my devaluing human life - But also I now work at a Crisis Pregnancy Center & counsel with others the consequences of their abortion
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would first give her information on the development of her baby - ultrasound an - give a testimony
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? uninformed
I feel those that want to keep information from the women are driven by money & self-interest. What right does this society have to hide information about psychological effects of abortion - I feel now like I was a sheep being led to slaughter. At the very least, if a court says a woman has a right to "choice" "I have read the above and foregoing statement and the same is true and correct." have a right to know "all the facts!"

1. Tell when and where your abortion occurred: OSU hospital, Columbus, Ohio, Oct. 1997
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: NO, all that was said was "you know what your doing, right" and right before "no turning back now"
3. Were you adequately informed of the consequences of abortion? NO, nothing at all was even suggested about the after effects or consequences
4. Were you informed of any link between abortion and breast cancer? NO
Have you had breast cancer? NO
5. Did anyone pressure you into having an abortion? NO
If so, who? _____
6. How has your abortion affected you? totally life changing, knowing that I killed my own child.
7. How has your abortion affected others in your life? yes, my husband, my kids
8. Based on your experiences, what would you tell a woman considering an abortion? you don't realize what you're doing now, but when that reality hits you, you will not be able to handle it, it will be totally unbearable! Please don't do it. You're a mother now, no matter what happens!
9. Based on your own experience, what would you tell a court that believes abortion should be legal? When a woman is pregnant it is no longer her body, she shares it with another human life. This is recognized by the court if a woman is pregnant & in a car accident & the baby is killed, someone could be charged with murder. Why is the mother and her dr. allowed to be murderers?

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 7-3-76 Michigan
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?
I really don't recall. I believe that I was just in such a state of mind to just get it over and go on, that I just went through motions, nothing they said sunk in. I don't remember any faces that I saw.
- 4) Were you informed of any link between abortion and breast cancer? I don't know Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____

6) How has your abortion affected you? I really didn't dwell on it. It, the killing of my child, wasn't as much of a matter then as it is now. Then I wasn't a christian, so I could just bury the thoughts. Now my child is much more of my life, then at the time. I can successfully touch hearts of the saved and unsaved with my witness. I was a sinner who did something very very wrong, but even though I did something so horrible, Christ still loved me and wanted me to be one of His. So no matter what others have done, He can do the same for them. And that's how I deal with it emotionally, I gave it to God, and my child is being cared for in the eternal world, where I'm going to see him.

7) How has your abortion affected others in your life? I have shared the death of my child with my 2 children as they became adults and I'm not sure how they feel. I never shared it with the child's father or my parents

8) Based on your own experiences, what would you tell a woman considering an abortion? "I can't stop you, but I've had one, would you have time to listen to my story?"

9) Based on your own experience, what would you tell a court that believes abortion should be legal? I learned years after that it's murder. The blood that is shed is not the mother's. The mother's blood never enters the baby's blood system. They (the court) needs to have a touch from the father and have their eyes opened and their hearts to feel the pain of death

I deeply regret 1) having premarital sex and 2) having an abortion. I have to live with the guilt of this poor decision for the rest of my life. It doesn't go away. I am thankful for God's grace in forgiving me for this sin, because I have repented - But I will always remember that very poor choice I made.

6) How has your abortion affected others in your life? if hard

7) Based on your own experiences, what would you tell a woman considering an abortion? please don't! First & foremost I would discourage having premarital sex. Second, if you do get pregnant & can't care for the baby - please give it up for adoption!

BEFORE ME, the undersigned authority, on this day personally appeared TERESA J. PUTTS (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: ONE MAY 1978, 2nd MAY 1983 IN Columbus, OH
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO, there was no mention of psychological or spiritual effects. The physical effects were glossed over. I was even told that the 2nd abortion would not increase my risk physically in terms of bearing children.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO, NOT YET
- 4) Did anyone pressure you into having an abortion? NO If so, who? I was very alone. ESTRANGED relationship with parents. I was on my own with NO MEDICAL coverage and preparing to start college (with first one). Boyfriends did not try to talk
- 5) How has your abortion affected you? ME OUT OF IT. I tried to put it behind me - forgot it - not think about it. Since I have found healing, I realize I had an aversion to children. I did not delight in them. I was afraid to have them for fear I'd hurt them. (I grew up in an abusive environment). I buried myself in work and kept myself busy. I was very pro-choice for many years until I came to the realization I had killed human life.
- 6) How has your abortion affected others in your life? Unfortunately, I encouraged and helped other women have abortions (at least a couple). That's my biggest regret. I also had difficulty in relationships and how I interacted with others. I needed to find healing in that area.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Consider alternatives that give life. You will have to live with any decision for the rest of your life, and killing your unborn child is a very difficult decision to live with. The procedure is not once and done, there are ramifications that you will live with. Need to find women need all the facts. The facts about the unborn child being a human being, the facts about how long it is for the procedure to go wrong, creating great physical complications, the facts about that abortion syndrome, the facts related to breast cancer. Additionally, the legalization of abortion has put many women under duress to abort (by parents, boyfriends, etc), because it is the "easy way out". They do not understand the ramifications either.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? See item 7.

- 1) Tell when and where your abortion occurred: error 1986 1987 Feb or March in Germany while I was in the Army.
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: I think so. Not by the clinic, but I already knew what it was. I didn't think of it as, "destroying life", and knew one suggested that idea either.
- 3) Were you adequately informed of the consequences of abortion? NO. Not any of the emotional effects or possible physical long term effects. I was only told about possible cramping up to 48 hrs after. Nothing else.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? If so, who? Not a pressure, but an encouragement. Every body I had to talk to about it thought it a good "responsible" idea since I was a Soldier with responsibilities.
- 6) How has your abortion affected you? I became emotionally "turned off" numb. to all emotions & obsessed with getting pregnant again. To this day I regret having it every day.
- 7) How has your abortion affected others in your life? My husband at the time, was deprived of affection. We are divorced later. My husband now has had to support me in my moods & in coping. At My son some how has missed not having an older sibling.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? Don't do it! you regret it for the rest of your life. You may not feel that way now, but it will come back to haunt you. A conscience can't take another life without consequence.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? you have to take in effect the emotional involvement of a pregnancy & the emotional consequence to the woman after an Abortion. It is taking a life! What about the rights of the unborn child? Unwanted children can be adopted out to families who can't have children.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 1973 Washington DC
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No
They told me nothing until it was over. Then they said I could miscarry any subsequent child and gave me birth control pills.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer?
- 4) Did anyone pressure you into having an abortion? Yes If so, who? The father of the baby.
No one else ever knew I was pregnant.
- 5) How has your abortion affected you? Within the first year of the abortion, I used to sit in the chair and cry for hours, I decided to kill myself by sitting in the garage with the car running. Just before I was almost to walk to work, I crawled back into the house and cried. I did not get pregnant again and almost miscarried. I've spent most of my life depressed and have had nightmares regularly. I used to trust no one until I finally found counseling and forgiveness. I would give my own life to bring back the child I aborted.
- 6) How has your abortion affected others in your life? My children think I'm very protective. I have been a secret until 2 years ago but I divorced the father of the baby aborted and our last child, my children do not know of the abortion.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? NEVER, NEVER, NEVER even consider it. The pain and guilt are really unbearable. The thought of what that child could have been, what he looked like, what his personality would have been, will never leave you. You'll always miss him or her.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? It is God's decision to allow a woman to become pregnant under any circumstances. He has a plan for that child and that woman if she'll turned to Him. He never makes mistakes. Everyone should know now due to modern technology that the fetus is alive at conception. Who really wants to kill a baby? The mother will NEVER forget what she has done. It WILL Affect her forever!!!

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: 12/19/83 at the office of my OB-Gyn Dr. V. Kramer
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: Not in my opinion. Fetal development risks of procedure were not discussed by the doctor.
3. Were you adequately informed of the consequences of abortion? No. Emotional consequences were not discussed. There was absolutely no consultation or counseling before the procedure.
4. Were you informed of any link between abortion and breast cancer? No.
Have you had breast cancer? no.
5. Did anyone pressure you into having an abortion? Not outwardly or forceably, but it was suggested. My boyfriend didn't want the baby.
If so, who? my boyfriend - he paid for it.
6. How has your abortion affected you? My choice changed my life forever. I experienced shame, guilt, anxiety, depression, nightmares, panic attacks, self-harming, an overwhelming desire to die, thoughts of suicide, low self-esteem.
7. How has your abortion affected others in your life? It affected my relationship with my husband. I repressed all my anger toward him and his part in the decision + it caused depression in me which affected my children as they were growing up.
8. Based on your experiences, what would you tell a woman considering an abortion? Abortion hurt me. Physically, emotionally + spiritually. People tell you its the easy way out + all your problems will be solved. That day began a downward spiral of depression + anxiety + self-hatred in my life. It's not worth it.
9. Based on your own experience, what would you tell a court that believes abortion should be legal? Every child is a wanted child. They are wanted by someone. I wish I would have chose adoption or kept my baby. So many couples long to adopt. I was selfish + let my circumstance decide for me. I regret that decision + always will.

7. How has your abortion affected others in your life? My husband & I have suffered in our intimate relations due to my abortion.
8. Based on your experiences, what would you tell a woman considering an abortion? I am in a unique position because I have also put a child up for adoption. So I could explain to her the fact that I have felt much less guilt & anger towards the adoption as opposed to the abortion.

A fetus is truly a living being at the moment of conception - And down deep we all know this, this is why women + men suffer so spiritually & emotionally from having this awful procedure done to so many of their babies.

BEFORE ME, the undersigned authority, on this day personally appeared

C. A. A. (Print Name),

who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell approximately when and where your abortion occurred: I had an abortion on approximately February 8th, 1985; at the Northwest Women's Clinic in Columbus Ohio. The clinic at that time was located at the corner of E.N. Broadway and High Streets, on an upper floor of the building there.

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. There were ten women (myself included) who sat in a room together. We were each taken out, one by one, first for this supposed "counseling" session. Some lady who never even looked at me said "Why are you here?" I replied "Daddy is a drunk." She wrote something down and said "OK, you can go back to the room." She did not refer me to something like Al-Anon, mental health counseling, or anything that actually might have benefited me. (I did, in August of 1986, begin going to Al-Anon and my husband also got sober in AA by the grace of God.) I have since had the feeling that taking your body to an abortion clinic to see if you need an abortion is like a female taking her car to a transmission shop to see if you need a new transmission: Of course you're not going to get out the door without paying them money.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No; no.

4) Did anyone pressure you into having an abortion? If so, who?

I would say mostly myself—my husband (who was my boyfriend at the time) felt it was the only thing to do. I did not want the abortion, but I was a single mother living with my parents and was too afraid of their reaction to tell them I was pregnant. I often find myself wishing that I had run into a sidewalk counselor or someone who could have just helped me through that difficult time.

5) How has your abortion affected you? The worst way has been emotional. I cannot add up the tears I have cried or the pain of the regret I have felt. I had a suicide attempt in 1986 in which I drank spot remover in order to kill myself, and other suicide attempts and thoughts in 1987 (sitting by the Olentangy river and considering throwing myself in it, etc.) I spent years hating myself, and about four years in which I even "forgot" I had an abortion. In 1989, I had a stillborn baby girl (that's when I remembered my abortion and named the aborted baby Jamie). In 1999, I had a miscarriage.

6) How has your abortion affected others in your life? I think it has been very hard on my husband, who knows very intimately how I have grieved over Jamie. He does not know how to handle my talking about it, that has been very difficult. Also, I think that the years of depression I have had have affected my only living daughter, [redacted] who was born in 1979. She had problems with drugs which, thank God, are now over with. There's some deep-seated stuff there that I can't even get into, but it is hard for me to hug her and be affectionate towards her. I have undergone some counseling, and one of the things I've had to work on is my bitterness towards my parents, that I felt I couldn't talk to them. (Although I take responsibility for the abortion, I find myself blaming them and then fighting that blame.)

7) Based on your own experiences, what would you tell a woman considering an abortion? (I already have said this to a young woman considering abortion, my daughter): *Don't* do this to yourself. You are playing roulette with regret, an evil form of regret that is a living hell. Forget all that "feminist talk," nobody lives with this except you. You can pretend that the baby is not alive or is not a real

child, and you can pretend that there is some "moral" aspect to abortion that makes it okay But you can't keep pretending all your life, and that is what abortion affects: *all your life*. I would tell any woman considering abortion that truth can be denied, and truth can be challenged, but the truth that there really is a baby who will tug at your heartstrings cannot be changed.

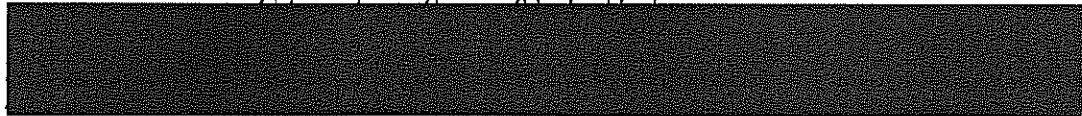

8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would like the court to know that they're *not* doing women any favors by making abortion legal. I remember thinking even as I drove into the parking lot of the abortion clinic that, surely if this were immoral, the Supreme Court would not have ruled that it was okay. Many tears and heartaches later, I know now that the Supreme Court made an evil decision in 1973. Roe v. Wade helped me to pretend that what I did was okay.

Well, I also remember watching something on C-SPAN where one of the Supreme Court justices was talking with young people, and a young woman said that individuals should be free to make choices, even ones that may hurt them. I remember thinking at the time that, while the courts should always protect our freedoms, none of us should have the "freedom" or "choice" to harm others. I don't have (and certainly don't want) the freedom to beat a child with a baseball bat in the privacy of my bedroom, why should I have the freedom to pay someone \$300 to vacuum away a child in my womb? I have lived the proof that abortion is evil because of the way I've felt over the years. If the courts were to compile accurate statistics regarding abortion: the psychological harm it causes to people, the exploitation it encourages (I would say that women have gained very little from abortion, and are looked at even more so today as sexual objects only), the physical harm it does to women (like not being able to carry babies afterwards), etc., the conclusion could only be that this is the devil's industry.

"I have read the above and foregoing statement and the same is true and correct."

6. How has your abortion affected you? I believe this unresolved, unforgiven, unspoken act directly affected our marriage which ended in divorce. Due to guilt and shame, I did not talk about it for 7 years. Some 10 years later, God used it to bring me to the end of myself when I admitted my responsibility and sin and received Christ's forgiveness and subsequent healing.

7. How has your abortion affected others in your life? I believe it was a barrier to intimacy - emotionally, physically and spiritually - with my second, and current husband for many years. I was an over-protective mother to our daughter and co-dependent with her to some degree. I now work at a Pregnancy Care Center and share my experience openly with others.

8. Based on your experiences, what would you tell a woman considering an abortion? Abortion seems like a quick and easy solution at the time due to our fears, but in the end, it turns on you, as you come to the realization that you gave permission for another to take your own flesh and blood. You are then left with the fact that your child is dead, your heart is broken, and you are living a life of denial and dysfunction. I would take her to a Pregnancy Care Center where she could talk things through, get all the correct information, feel loved and cared about. I'd tell her this crisis can be turned into God's opportunity to grow and find strength she never knew. Because of going the hard way, she will meet other crisis decisions with faith and courage. Most of all, she will know the JOY of giving LIFE to her child without any regrets.

9. Based on your experience, what would you tell a court that believes abortion should be legal? My abortion was illegal, so I knew it was wrong. How can something legally wrong for so many years, suddenly become legally right? Deep inside the consciousness of a woman, she knows what she did...she allowed her baby to be killed...and she knows what she deserves. My motive was selfishness...I wanted to please my husband and not lose him. Strangely (but not really), is the fact that most women still hide their abortions. And I know why. Because deep in their hearts they know it is still wrong...and terribly unnatural for a mother. They know, or will come to know, a baby's heart beats at 18-21 days...that brain waves can be measured at 6 weeks, and at 11 weeks all the baby's organs are complete and functioning. But most of all they know what would have been had they not permitted the abortion. And they always wonder...what would he/she have looked like?...what would they have become?...and most importantly, what

would our relationship have been like? And that is what will haunt them to their dying day. Though they suppress and deny it, it is there. So how does this help women I ask you?

THE STATE OF Ohio

Before me, the undersigned authority, on this day personally appeared Helen Mannea, (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

My name is Helen Louise Mannea

_____. I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

Please check the applicable boxes:

I want to tell my story.

I understand that someone will contact me.

You may use my full name.

1) Tell approximately when and where your abortion occurred; Cincinnati (Clifton) Ohio (clinic on Auburn Ave. affiliated w/ Planned Parenthood and referred to by private medical obgyn at corner of MacMillan and Auburn. given abortions on or about 8/1980 and 8/1981 by Dr. Lumpkin who was also a physician at Christ Hospital.

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I went to an obgyn recommended by a co-worker after a positive at home pregnancy test. The doctor confirmed the pregnancy and I was excited, but not sure of what next. I told him I didn't know much about being pregnant and having babies and voiced my concern about my husband's blindness. He then said that I should decide if I wanted the baby or not, and referred me to a clinic down the street affiliated with Planned Parenthood where he said they would explain what was involved and the options to me. At this point I had not even considered not having the baby. Although I felt ilprepared and uncertain about what was involved. The

clinic told me that they would talk to me about abortion, but that I had to make up my own mind about the pregnancy. I went to the clinic, hoping to glean some information about pregnancy and having a baby. They told me that abortion was a safer option than going through with a pregnancy and that it didn't preclude any future pregnancies. I still knew basically nothing about being pregnant and having a baby – even at my age at the time (in my twenties).

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? I was definitely not informed about any possible side effects of any sort. But I have not had breast cancer either. I was given a lot of statistics about the success rate and ease of abortions, how any considerations of past generations about complications etc. had been handled by the new technologies and procedures, and then given a few days window in which I needed to know if I were going to accept the procedure. I was told that abortions did not effect future pregnancies. They had said that many women had come to them in a similar position as myself and had successful abortions, and later had successful pregnancies. I was given simple logistics about the pessary insertion (point of no return), the waiting period, the date of the abortion etc. and the dire consequences of not following through with the abortion once the plug was inserted. Any questions regarding pregnancy childbirth etc. were not answered as they didn't deal with that there. Nothing whatsoever was discussed concerning the developing life within me. It was rather discussed as a logistical risky problem that they could help me out of. At the time they recommended the abortion because my husband was legally blind. Since the abortions, many years later, I have given birth to two healthy normal girls with no hereditary vision problems. What I had really sought and couldn't find either at the original obgyn, or at the clinic was support in going through the doubts and fears of pregnancy and birth and what I was headed for.

4) Did anyone pressure you into having an abortion? If so, who? Whereas I don't remember anyone pressuring me to have the abortion. Everything moved forward avoiding any questions about the option of keeping the child and where I could go to get help with that learning. This is where I think we now need the most effort to be placed in order to avoid abortion. I was told that 8-12 week abortions were safer than childbirth. I felt for some reason I wasn't supposed to have a child and that I was somehow incapable or unworthy, and that it was a dangerous risk. My husband's vision problem was a concern as I was the only one working at the time and feared not being able to handle a family full of blindness. I had not known the support that God provides in our lives, if we turn things over to him. Subsequent to the abortion, my periods were excruciatingly painful and I feared I had endometriosis. I consulted an obgyn in Tampa Florida concerning this and he explained how the female body was designed to work and said that I didn't have endometriosis. He said that often, he found that after a normal full term pregnancy, the cramping would no longer be a problem. He took time to talk to me about pregnancy and my fears, and gave me the support to feel more comfortable. And then said that if I chose to become pregnant his exam showed that I was fertile. I did become pregnant a year later, and not being high risk, I then had to seek out another obgyn in Tampa to follow through with the prenatal care and birthing. I went to a birthing center in North Tampa where I prepaid for the prenatal care and birthing etc. When I got close to the 7th month of pregnancy, I showed a slight increase in blood pressure. That doctor told me I had to take Phenobarbital to get the blood pressure down, OR to go into the hospital for monitoring. One of the nurses on staff discretely mentioned she had to do that and her child was born addicted. I read the side effects of Phenobarbital that the pharmacist gave me and chose not to take the medication. It indicated in no

uncertain terms in the written material the pharmacist gave me about the drug; that it should not be taken in the third trimester (right where I was), or there would be a high likelihood of birth defects. It said nothing about lowering blood pressure. So the next time I saw the doctor he told me that I could no longer use his birthing center as he considered me high risk but that he would still be my doctor, if I went to Tampa General Hospital for monitoring, and that I had to take the Phenobarbital or lose the baby. After all I had gone through in the first pregnancy, I was devastated. I filled the prescription but didn't take any and went into the hospital for monitoring as he had convinced me that my baby and I were about to die if I chose otherwise. I spent two days on an IV of magnesium "something", and was hooked up to a blood pressure monitor, fetal monitor, and had a catheter inserted. I had to lie flat on my back (bad news for circulation to the fetus as I had read elsewhere.) for two days, and was given blood and urine and bp tests every hour for two days. My arms looked as if I were a junkie from the hourly blood tests he ordered, and of course I was unable to sleep for the entire time. Finally they unhooked me and said that I had to stay upstairs another night. Then another doctor, the urologist, came in and said that he couldn't advise me as my own physician, but that I had no signs of any kidney problems, toxemia, or excessive high blood pressure, and that I was healthy, and all readings from the fetal monitor were normal. Up to this point my doctor had me believing that I and my baby were about to die if I didn't do as he instructed and the nurses brought me the 4x/day doses of Phenobarbital per my doctor's prescription, (which I actually did not take, knowing the serious possible consequences of this action, except once when the nurse stood there to watch me.) I disposed of them in the toilet, and slept as close to 24 hours a day as I could so they wouldn't try to sedate me and risk my baby's health further. The doctor from the birthing center came in again after the urologist left; and said that since my baby was 35 weeks old that he thought the lungs were mature enough that I should let him deliver the baby then and there rather than risk the effects of toxemia, which the other doctor said I definitely didn't have. I was able to get a release from the hospital. My cousin, who was out of state, called and I told her what was going on. Her brother and sister in law were also living in Tampa at the time, and they prayed for me and took me to see their obgyn. At that point, things began to proceed normally. The new obgyn was part of a group of doctors in North Tampa, and they conferred and said that I did not show any signs of toxemia, and that the scare the first doctor had put me under had probably precipitated a rise in the blood pressure as my blood pressure was not consistently high. But we watched closely just to be safe. In the end my baby was delivered naturally without any intervention or anesthesia at Tampa Women's Hospital. One other side note is that when I went in to get my records to transfer to my new physician; there was a list of deliveries on the desk beside me where I was waiting for them to fish up my records which seemed to have been "misplaced". On that record the doctor from the birthing center had listed several babies delivered that week at birthweights of 3.5, 4, 2.5 lbs. Two had stillbirths. I felt a shot of fear run thru my body as I knew that I was so very close to having had the same thing happen to me. And after the first abortion, I was very emotional about such things. I am so thankful for my cousins call and prayerful support. I now have two healthy babies both delivered successfully and naturally. The second, delivered in Cincinnati at Bethesda Hospital by Dr. Brunsman. By this time I was much wiser to know what I was going to go through and what I was up against. It helped me to choose a supportive and caring doctor. We need to reach out and support young pregnant mothers to help them understand what is happening to them so they can make wise decisions and not cause the loss of needless lives and the consequent pain that accompanies that. Every day I praise God for the lives of my beautiful and "perfect" young girls. And pray that God will lead me in a way that I can give help to those

young mothers who are so lost and confused in the medical world and jargon and just need to know who they were created to be.

5) How has your abortion affected you? My abortions were born out of several fallacies, and complete misinformation. I honestly haven't allowed myself to think or feel much about what happened. But, I do have an inner sense of darkness that something about me is not right. And there is no doubt whatsoever at the moment that baby is sucked out of your body that your body and very soul is in the midst of a deep struggle not to let that life go. Even without having been aware of the fact that that baby was actually "alive" in me at that time, clearly on the deepest of levels my body and soul knew absolutely. I know that if I were to dwell on it a great inner pain is hidden deep inside myself. But it doesn't serve life, so I don't listen to those feelings except to direct me away from such dangers in the future. I do know that everything to the very pit of my soul resisted it. And my entire body repulsed against taking this life from me. The abortion left me in such a disconnected void. But you are too physically weak at the time to deal with what happened in any real way. And then all the concern of the people around you is getting you to drink a soda and get healthy enough to get up and walk away from it. And all I wanted to do was to laydown and cry the deepest most painful tears of my life. I often have wished that I would have had the courage, knowledge, and support to have said no. One never forgets a horrible emotional experience, but you go on by putting aside the pain so you can deal with your dally life. The people at the abortion clinic were kind and supportive before and after the abortion. But there was definitely no space for considering how to handle a pregnancy and a child's birth. Nor was there any awareness of the painful experience a mother has when her baby dies. Even if your mind doesn't know your heart and your body do.

6) How has your abortion affected others in your life? I really do not know, as after the abortion, my husband and I haven't discussed this nor have I had any reason to share this with others. My parents never knew. It is a part of myself that I do not readily accept and reveal to others, some undefined darkness that lingers inside me.

7) Based on your own experiences, what would you tell a woman considering an abortion? I would offer support to her in overcoming her fears in her ability to adjust her life to support a baby. And help her to understand love, life, birth and God's abundance when we turn to him. I would share my experience leading me to do what I had done and offer her support as she discovered her worthiness and completeness in God's eyes. Then I would share with her my two successful births and the beautiful children whom I bore in natural childbirth and love and who transformed my life.

8) Based on your own experience, what would you tell a court that believes abortion should be legal? I wish not only that abortion were not an option presented to pregnant mothers, but that the facts about childbearing and support were available to them so they could find their way through the medical jungle to understanding the conception and birth of a life. I also would like to see that birth control were not so available to teens; because it was the readily available birth control without consequences attitude that I was presented with at Planned Parenthood in Cincinnati that sent me down the path of relating to sexuality without consequence. Very few teens understand the beautiful way that we were created to function. Had they not presented sex as an inconsequential and matter of fact act, I would not have been so willing to submit my body to the needs of the males who approached me or sought approval and comfort thru pre-marital sex. I feel that the damage began way back where the whole context of sexuality was set; totally unrelated to marriage, family

and procreation. We need to set up an easily accessible forum where those who know can stand up and speak the truth to young females, (and males too), before they too find themselves on the medical conveyor belt due to lack of understanding, so they can make truly informed choices not based on partial and biased truths. I feel that there is no female who would want that option if they knew the truth of what happens and how it tears your very soul apart. And if they had a supportive way of dealing with sexuality and pregnancy in the bigger context of who they are and not just as a coin toss choice to solve an immediate problem. Mentioning the truth to women is not enough. We need a forum to work through what we find ourselves going through without knowing what it means to be sexually active. And what it means to become pregnant and give birth as God has planned.

I would tell the court that there is no question that abortion of any sort is wrong and that if our legal system is to reinforce our social agreement that life is valuable, then to allow abortions to be legal is a hideous contradictio. I believe that once we cease to value life with both our actions and our laws, we are all vulnerable to the consequences of such a choices of violence and are on the path of self-destruction. Even if I were to site the many many reasons that abortion is so very damaging; there are also many other implications that we do not yet understand as to the effect that this has on ourselves, and the lives of those around us. Do I think that having had the abortion in any way made the quality or even the ease of my life any better? Absolutely not. It did make me a different person. And for that I am deeply remorseful. For the sake of my two beautiful daughters, I would beg the court to disallow this option to even be a consideration available to confuse them.

"I have read the above and foregoing statement and the same is true and correct."

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- 1) When and where did your abortion occur? 1983 - Tulsa, OK abortion facility
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No If no, explain: I was asked to give \$250, fill out a form, take a blood test, & wait for a nurse to call me into the room where the abortion would be done. That was it.
- 3) Were you adequately informed of the consequences of abortion? NO - Not at all
- 4) Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- 5) Did anyone pressure you into having an abortion? Yes No If yes, who? _____
- 6) How has abortion affected you? During the many years of denial of the abortion, I experienced horrendous bouts of anger, depression, panic attacks, thoughts of death (my death), fears. I was constantly at the doctor's office, trying to find a physical reason for my disordered life. I drank alcohol secretly, I avoided anything to do with babies. Five years after my abortion, I married and gave birth to my son. It was during that pregnancy I realized I had destroyed a life through abortion. My downward spiral began. I was an overprotective mother. I "overdid" everything -- to compensate for what I had done.
- 7) How has your abortion affected others in your life? I had trouble maintaining good relationships. I could not let anyone get close to me -- to know my secret.
- 8) Based upon your experience, what would you tell a woman considering abortion? Her baby is a valued life. She will deeply regret the abortion. She will experience emotional, physical + spiritual trauma. She can choose to adopt - out her child, to give it life.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Life is valuable. Babies cannot speak for themselves -- for their life. We must protect the innocent lives that do not have a voice. Women who have aborted are devastated. The pain is real. We must stop playing God. The fallout from abortion is traumatic.

My name is Beth Abercrombie (Print Name). My address is

I am over

the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

When I was in my 20's, I had 2 abortions. One in Indianapolis, Indiana and one in Long Beach, California.

The 1st one, in Indiana, I was treated with care - however no information of the life I was carrying or alternatives to abortion were given.

The 2nd abortion, in California, I remember the harsh words of the doctor saying, "Shut her up!" when I was on the cold table feeling the pain of suctioning. The nurses treated me rudely because the doctor seemed mad at them, too. I feel like one of the many "cattle" being processed that day. One number, not person, in a very busy business.

The main affect was I grew more and more afraid and indifferent to children. I had very sad dreams - and woke up sobbing.

Abortion is murder. I know that from the depth of my heart. It should never have been legalized.

What I have never forgotten is the shame, anger & sadness that gripped my life because of my abortion. I could not have healthy relationships with men, and to this day my sexual relationship with my husband suffers. I will always regret falling for the mistaken social belief that abortion was a quick + painless resolution to my unplanned pregnancy. Every time I fill out a new patient form at a doctor's office I am reminded that I killed my child.
- 7) How has your abortion affected others in your life? My relationship with my mother suffers because of it. My trust of the medical community suffers also. My relationships with others are in many ways shallow on my part.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Please don't ~~trust~~ believe the "Quick fix" lie. We pay a heavy price for a lifetime by spending a couple hours in an abortion clinic.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? A generation of women are suffering because of a lie that became a Law! Two small letters that changed the word "LIE" into "LAW"!

- 1) Tell approximately when and where your abortion occurred: JUNE 1975, NORMAN, OK
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I WAS INFORMED OF THE DANGERS TO ME BUT I DO NOT REMEMBER BEING TOLD THAT WHAT WOULD BE DONE TO MY BABY (SUCKED APART LIMB BY LIMB?)
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? NO If so, who? _____

5) How has your abortion affected you? FOR THE FIRST TWENTY YEARS AFTER I CHOSE TO KILL MY OWN CHILD I SUFFERED TERRIBLY WITH GUILT AND SHAME FROM THE DECISION THAT I MADE. AFTER TWENTY YEARS OF CARRYING THIS SELF-INFLICTED BURDEN I PARTICIPATED IN A BIBLICALLY-BASED POST-ABORTION HEALING PROGRAM. THROUGH THIS PROGRAM, I WAS FINALLY ABLE TO ACCEPT THAT GOD HAD FORGIVEN ME FOR THIS HORRIFIC ACTION AND THAT BY HIS GRACE AND HIS MERCY, HE COULD RESTORE MY LIFE AND USE MY LIFE FOR HIS GLORY!

6) How has your abortion affected others in your life? MY MOTHER IS DECEASED NOW SO I CAN'T ASK HER, BUT I BELIEVE SHE CARRIED GUILT FOR HELPING ME HAVE THE ABORTION. ^{BECAUSE OF} HAVING AN ABORTION, IT MADE IT SEEM OK FOR TWO OTHER FRIENDS OF MINE TO HAVE ABORTIONS.

7) Based on your own experiences, what would you tell a woman considering an abortion? I WOULD ENCOURAGE HER TO GET THE MEDICAL DESCRIPTION OF WHAT WILL BE DONE TO HER CHILD DURING THE ABORTION. I WOULD ENCOURAGE HER TO GO TO A CHRISTIAN CRISIS PREGNANCY CENTER FOR COUNSELING BEFORE SHE MAKES HER DECISION. I WOULD ENCOURAGE HER TO CHOOSE "LIFE" FOR HER CHILD AND PLACE THE BABY FOR ADOPTION IF SHE CANNOT.

8) Based on your own experience, what would you tell a court that believes abortion should be legal? AS FREDERICA HATTEWES-GREEN SAID, "FOR THE QUESTION REMAINS DO WOMEN WANT ABORTION? NOT LIKE SHE WANTS A PORSCHE OR AN ICE CREAM CONE. LIKE AN ANIMAL CAUGHT IN A TRAP TRYING TO GNAW OFF ITS OWN LEG. A WOMAN WHO SEEKS ABORTION IS TRYING TO ESCAPE A DESPERATE SITUATION BY AN ACT OF VIOLENCE AND SELF-LOSS. ABORTION IS NOT A SIGN THAT WOMEN ARE FREE, BUT A SIGN THAT THEY ARE DESPERATE." BEFORE ME, the undersigned authority, on this day personally appeared Anita R. Jones (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: I had 3 abortions. My father took me for the 1st one when I was 20, I had one at 22 and one at 25.
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: I was not informed. I did not think of the fetus as a baby but as a mass of tissue.
- 3) Were you adequately informed of the consequences of abortion? Absolutely not.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? I have not, but know now that the risk is high.
- 5) Did anyone pressure you into having an abortion? If so, who? My father pretty much took over when he found out I was pregnant and took me to the abortionist. A boyfriend took me for the 2nd. I went for the 3rd.
- 6) How has your abortion affected you? The abortions increased my self-destructive behavior. I didn't realize the truth until about 15 years later - the fact that I had killed my children.
- 7) How has your abortion affected others in your life? I think it has affected my children. I think they wonder how I could have done this.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Get help - there are people wanting to help & wanting to adopt your baby. The guilt you will eventually feel for participating in the death of your baby is almost unbearable - God's forgiveness brings a certain amount of peace but the memories are always there!
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is murder of the innocent. We have laws forbidding murder of people outside their mother's womb, we should also forbid murdering preborn people.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

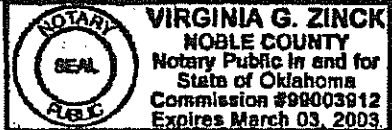

- 1) Tell approximately when and where your abortion occurred: July 1972 - San Diego, Calif.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No - I suffered from mental anguish as well as hurting physically. I was only told basically where to go + what time to be there.
- 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 5) Did anyone pressure you into having an abortion? No If so, who? _____
- 6) How has your abortion affected you? The next day after, I went into a deep, dark, depression for over a year. I cried almost every day and for some time I turned to alcohol to ease the pain of the horrible guilt I felt. My life before then had been normal and mostly happy. I had always made straight "A's" and was an honor society student. I was not prone to drinking alcohol or anything similar in high school. I had the abortion because I was afraid and insecure. IT was the worst choice I ever made in my entire life. I deeply regret it!
- 7) How has your abortion affected others in your life? I did not tell very many people. The ones who know were sad and disappointed about it.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Don't do it! Anything you have to go through to have the baby will not be nearly as bad as going the rest of your life wondering about that baby and how it did not have a choice.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? When I was young, I used to think that everything that was legal was also ethical. Afterwards, I found that to be totally untrue. By making abortion legal you give others like I was a very misleading idea. The government is an authority with responsibility to do what is right - that is "I have read the above and foregoing statement and the same is true and correct."

- 2) Were you adequately informed of the nature of abortion, what it is, what it does? No If not, explain: I was not informed of fetal development. I was told about the procedure in terms I was not familiar with.
- 3) Were you adequately informed of the consequences of abortion? No No body told me of the emotional consequences of abortion. The physical consequences were read to me but I was told that didn't happen. They just had to tell me for legal.
- 4) Were you informed of any link between abortion and breast cancer? no Have you had breast cancer? no
- 5) Did anyone pressure you into having an abortion? yes If so, who? My mother and family doctor.
- 6) How has your abortion affected you? I spent years in a depression, unable to cope well with everyday life. It has hindered my bonding with my children. I lost all desire to do anything productive. I could not concentrate on school, eventually I flunked out. I became suicidal because of the guilt. I could not be around babies.
- 7) How has your abortion affected others in your life? My husband has had to deal with the hurt of my past abortion. My mother refuses to talk about her role in the abortion. She doesn't spend any time with babies.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? An abortion does not fix the problem of an unplanned pregnancy. I spent years feeling guilty for having an abortion wondering what my life would have been like. I feel I sacrificed my child for my family's acceptance, and they still don't accept me.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is taking the life of another human being. It hurts women and tells women that there is no hope. Women are lied to in the name of choice. My choice wasn't even considered.

3) Were you informed of any link between abortion and breast cancer? not sure Have you had breast cancer? No
4) Did anyone pressure you into having an abortion? Yes ... If so, who? my baby's father (My boyfriend) at that time when I was younger

5) How has your abortion affected you?
Because I had a lack of spiritual knowledge of what God says about abortions I had become very sad, I had regret and was unsure. I would say what if I had kept the baby?

6) How has your abortion affected others in your life? One of my friends had an abortion when she was young as well

7) Based on your own experiences, what would you tell a woman considering an abortion? Abortion is not of God, its murder and its selfish to have an abortion, because a pregnant mother is making the decision out of what they can accomplish when the child is gone and they are not giving the child a chance to speak for him or herself.

8) Based on your own experience, what would you tell a court that believes abortion should be legal?
All hands that participate in killing life in the womb should be judged the same for all hands that participate in killing life outside the womb. Abortion and all the extra worries, sadness, regret, only adds to the problems that the mother may already have.

- 1) Tell when and where your abortion occurred: October 1990, Family Planning Clinic, Wichita, KS.
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? no If not, explain: The clinic did not give me any detailed information on my other options, or the specifics of the procedure.
- 3) Were you adequately informed of the consequences of abortion? NO, not at all. I had my pregnancy test done at Planned Parenthood and they did not tell me anything. They said I could have a "discount" if I used a certain abortion clinic.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? The pressure was self-inflicted. I knew everyone would be disappointed in me if they found out I was pregnant.
- 6) How has your abortion affected you? The guilt has been overwhelming until I found forgiveness from God and learned to forgive myself. I would have physical symptoms anytime the word "abortion" was mentioned. I have been "emotionally numb" in alot of situations in my life.
- 7) How has your abortion affected others in your life? I was a senior in HS. when I had the abortion and I told almost no one. The person it has affected the most besides me is my husband. It has handicapped our relationship at times.
- 8) Based on your own experiences, what would you tell a woman considering abortion? It is true - the baby will physically "go away". But he/she will always be with you. The emotional scars aren't worth it. There are other options out there. I wish I would have taken them.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? Girls these days are panicking when they find out they're in an unwanted pregnancy. You must not let them make a life-changing decision in a crisis situation that takes a human life from the baby. It also takes the heart out of the mother.

BEFORE ME, the undersigned authority, on this day personally appeared Leslie A. Patterson (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: 5/83 in a Tulsa clinic
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No, I was not informed at all of the nature of abortion. I was told that I needed to be cleaned out, the procedure was called a D+C, that it (the baby) was a glob of tissue, not referring to any human life.
3. Were you adequately informed of the consequences of abortion? Not at all
4. Were you informed of any link between abortion and breast cancer? No
Have you had breast cancer? No
5. Did anyone pressure you into having an abortion? No
If so, who? _____
6. How has your abortion affected you? Grieved for loss of baby, eating problems, depression, didn't feel good about myself, shame & guilt.
7. How has your abortion affected others in your life? My parents
A human life, a baby that is forming inside us
8. Based on your experiences, what would you tell a woman considering an abortion? That an abortion is terminating a human life, a baby that is forming inside of your womb, God's creation, and you will suffer and can suffer from emotional & physical scars if you choose to have an abortion.
9. Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is murder. Do we not convict murders and send them to prison by terminating a life? Early ultra sound show that a baby is forming and there is a heart beating. Just because some women want to have the right to choose to terminate this life, does not mean that it should be legal knowing the full facts surrounding an abortion.

"I have read the above and foregoing statement and the same is true and correct."

- 1) Tell approximately when and where your abortion occurred: Spring 1971
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No - I was told to contact a minister and he would arrange it in NYC as it was illegal in Pennsylvania at that time.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? Yes If so, who? Boyfriend

- 5) How has your abortion affected you? I was profoundly affected by it. I became promiscuous and more involved with drugs. I was suicidal at various times over the next 9 years. I was married in 1974 and was a mother of a 2 1/2 yr old by 1980. That year I was extremely depressed and emotionally troubled, almost to the point of suicide or divorce. But that year, by the marvelous grace of a gracious God, I began reading the Bible on my own, and within a few months became a Christian. That experience of forgiveness turned my life and my marriage around completely.
- 6) How has your abortion affected others in your life? I helped a friend obtain an abortion a few years after my own. It has also affected my entire family in less obvious but no less profound ways. It has affected my mothering, my relationship with my husband, etc.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would beg her to reconsider, and encourage her to take these nine months of her life and do the right thing so that she can recover the rest of her life and not set it on a course of destruction.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell them that it has been illegal throughout all history until 1973, and thus to make the killing of an unborn child a legal right is to make a mockery of every law of this land.

Question 6

I have prayed for forgiveness and know I have received that for which I have prayed. For 27 years, I have not been able to forgive myself. The guilt is too heavy a burden. I cannot see a baby without seeing mine. I cannot hear a baby cry without hearing mine. My own grandchildren remind me of my own actions.

Question 7

My husband feels the same guilt as I. It was a decision made by both of us. The pregnancy occurred even while using birth control pills and was not expected at that time in our lives.

Question 8

Care for your own child. There are many agencies to assist you. Adoption is an option. There are many loving families that would welcome a new life. Humans should not be disposable. Cloning is now possible and appears senseless to us when the world is disposing of human life every day by way of abortions. Face your own actions and act responsibly--not run away. Future guilt is a very high price to pay.

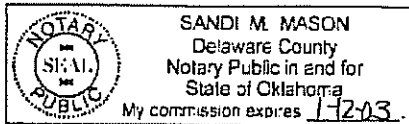

Question 9

- A. There are many methods of birth control--abortion should not be used as one of those methods.
- B. A fetus--baby--is viewed as part of a womans body but is an attachment to her body.
- C. A woman is not allowed to govern her own body--ie--prostitution, surgery, self-mutilation, attempted suicide.
- D. Why are the fathers not allowed any legal standing? Since the man contributes the sperm, the baby is half his and also half his responsibility. The woman does not get pregnant alone.
- E. One living egg plus one living sperm equals one living being, not just a bunch of cells. No death involved from even before fertilization so no need to know when life begins.
- F. Science can now detect life at 12 weeks.
- G. A generation of descendants is being destroyed and this will negatively effect future financial contributions (soc sec and medicare) and production of items necessary for society to function.
- H. We have developed cloning while terminating the product of natural human fertilization.
- I. Many are opposed to the death penalty as inhumane punishment for certain crimes but impose the death penalty (abortion) on innocent babies.

Before me, the undersigned authority, on this day personally appeared Veronica L. Lewis, (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

My name is VERONICA L. LEWIS (Print Name). My address is [REDACTED]
My telephone number and e-mail address is [REDACTED] I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

I have had 4 ABORTIONS. I NOW KNOW THAT I MADE A GRAVE ERROR IN JUDGEMENT. I WOULD ASK THAT ANY ONE CONSIDERING IT see their PASTOR OR SOMEONE WHO CAN give them the true STORY ON ABORTION.

I have PRAYED AND REPENTED OF MY PARTICIPATION of those acts.

Please return to: Texas Justice Foundation, 8122 Datapoint, Suite 812, San Antonio, TX 78229

I am writing this letter in hopes that my story will help persuade the decision makers regarding the overturn of the Roe vs. Wade decision.

My name is Lee Ann Monty and at 20 years old I made the decision (with the "help" of others) to abort my child. This has proved to be an awful "choice", one that has had far worse consequences than I ever imagined possible. I sincerely hope this "choice" is no longer available to anyone.

My abortion experience was very traumatic and even writing about it now over 10 years later is very difficult and uncomfortable. Only with the help of God will be able to tell my story.

I was unmarried and barely 20 years old when I became pregnant. I was in a very unhealthy relationship that my parents did not approve of. They were supporting me financially as I was still in college. So their opinion carried a great weight in my life at the time. I loved them very much and never wanted to disappoint them in any way. Clearly when I discovered I was pregnant I knew they would be heart broken. I did not know what to do. I just pretended that it wasn't happening and passed from reality into sort of a denial. I continued living as normal as possible for as long as I could. Meanwhile my romantic relationship was getting worse and worse. My boyfriend knew about the pregnancy and wasn't pushing me either way. He had been responsible for 2 other girls' pregnancies, which resulted in abortion. He was casual about the idea of abortion but would have kept the baby if I wanted to. We were both very irresponsible, neither of us having very stable income or educations. I could not imagine (at that time) us becoming parents and successfully raising a child. One more "complication" in this situation is that we were an inter-racial couple and my parents "feared" for what the

child's life would be like. Having us for parents and being bi-racial didn't seem quite fair. I would like to add here that I think a bi-racial baby or any other baby is valuable, important, and precious. All babies are 100% worthy of life. After all God is the creator and giver of life. We are just stewards of his "little blessings".

Finally, it started becoming obvious something was going on with me. My parents became suspicious and the time came when I had to tell them my secret. Hiding this from my friends and family had taken its toll on me. I was reluctant to reveal the secret I had kept for so long. I was unknowingly becoming attached and protective of my unborn child.

I wanted only to tell my mom but when both my parents approached me together, I had no choice but to tell them both at the same time. They did not yell at me like I expected them to. They asked me what I was planning to do. I said I didn't know what to do. They instructed me to first find out how far along I was. Now I know why they needed to know that. My dad had already decided how to handle this "unfortunate" situation. We would just get rid of it. I was to have an abortion and that was final. Then life could just resume back to normal. Let me just say that did not happen, it never does for anyone that has an abortion. There are always consequences.

They made an appointment at some clinic for me to be examined. I refused to let either of them go back in the exam room with me. I did not inform the examining physician that abortion was even being contemplated. I don't know how far along I was that day but when he put the Doppler on my uterus, there was a distinct "noise". He excitedly said the sound I was asking about was the heartbeat and that I was carrying a healthy baby. I will never forget his words or the sound of my baby's heartbeat. From

hardly move. My mom slept in the same room with me at night, they were worried I would run away or maybe hurt myself. My parents tried to cheer me up and convince me this was a good idea. I really do believe my parents had what they thought was in my best interest at heart. My dad said to me one day before my appointment that this was necessary because he wanted my life to be perfect. He said, "I know you love this baby and want to protect it, but you are my baby and I love you and intent to protect you".

Unfortunately, the day I was dreading came, we got up very early for the drive. I had a 9 o'clock appointment. I do not believe I uttered a word for the 3-hour drive to the city where the clinic was located. I was too sad and confused, I could not believe this was happening to me, this just could not be my life, but it was happening and all too fast.

Before I knew it, we were parked and I was sitting in the waiting room. After the money was paid and the paperwork filled out, my name was called. My mom stood up first and helped me rise to my feet. I walked cautiously thru the door leading back to the "death chamber". We were seated before a lady who asked me some questions. Some of them my mom helped me answer. I started crying and she asked if I wanted to do this. I had so many questions but could not think. My mom answered her saying that I was just very emotional and this was defiantly best. She then asked if I wanted to be awake or asleep during the procedure. I said I did not under any circumstances want to be awake. I did not want to see, feel or remember anything.

She said "Ok, You will be asleep before they started". We were then escorted back to the waiting room. This time I paid attention. There were about 30 people sitting in various positions. Young and scared looking girls accompanied by either a parent or a boyfriend it appeared. As names were called and girls rose one by one disappearing

behind the door, others would emerge from the same door. They were in visible pain, their posture and face told. I began to squirm. I wanted out of there. Just then my name was called and I got up, then began to walk slowly to the lady who had called me from the open door.

As I followed her down the hall I noticed very distasteful art. Pencil like drawings of women's genitals hanging on the wall. She led me to a room where I was instructed to undress and put on the gown that was provided. She said the doctor would be in soon. As I got undressed I mentally noted everything about the room. It was cold, and scary, I was alone with my baby and I knew our time was short. I watched as the second hand slowly went around on the clock above the door. My hands rested on the little mound formed on my abdomen. I started to get very nervous and I began thinking of ways to get out of there. It was now or never. Never arrived.

My thoughts were interrupted when the door swung open and a tall man in white lab coat entered the room. Closely followed by two heavysset women. I wanted to speak; I had so many questions, "Like what is that thing?" What's that covered by the gray plastic bag?" But not really wanting to know. Even so, I was not allowed to speak. The doctor ordered me be quiet and listen to his demands. He said, "Scoot your butt down to the end of the table and lay back." I said that I would like to slow down, I was not sure I wanted to do this; I added this was my first opportunity to tell somebody. He then barked out, "Scoot down and lay back." I protested and said, Let's wait a minute, I don't want to...." Then the nurse pushed me back and the other nurse to the right grabbed my arm and started to place the IV into my arm. I began panicking and crying, I pleaded, "No!" I then heard a load noise start and felt the most excruciating pain. I began screaming that

they were hurting me and to get away from me. I had changed my mind, but they would not stop.

The nurse on my left then pinned my arm down between her and the table and was lying on my chest and covering my mouth with her ungloved hands. She said, "Stop screaming, you will scare the other girls!" I said, "No! Please stop. I want them to be scared." But it was too late. The pain I felt was the suctioning which was pulling my little one out of my body. Within a few more moments it was over. The anesthesia had taken effect but too late for my comfort, I saw, heard, and felt everything. Even more painful, I remember everything. It was a horrible, traumatic experience.

I was put in a "recovery" room, what a joke. When they put me in there, I was just waking up from the anesthesia. When I became conscious I started screaming again. The nurse who wheeled me in there told me to be quiet. She went and got my mother from the waiting room. My mom helped me lay down in a recliner. A few second later a girl rolled off her gurney and fell on the hard cold floor. My mom jumped up and hurried over to help her, as she now lied crying on the floor. I begin to look around and grasp what was around me. The only people in the room besides the ones who just underwent an abortion were my mom and one other mother. The room was wall to wall with gurneys and reclining chairs. Each one of them was occupied by girls, most of them laying in the fetal position; those that weren't, were balled up and rocking back and forth. Everyone was experiencing the same feelings: pain, nausea, heavy bleeding, and cramping. There were no nurses to attend to us. We were not treated as patients and even if we were to be, they did not have enough staff to accommodate post abortion women. While my mom was helping the other girl I started vomiting. The other mother rushed to the sink to get

paper towels or anything to help comfort me. She returned with a wet washcloth and a bedpan. She sat with me and as she held my hand she patted my forehead with the cool towel. My mom came back and thanked her. I would have thanked her, if I had had the strength.

The next hour or so was spent watching girls hobble out of the room and watching others be wheeled in just as I was. We re told to stay until the bleeding had slowed down. When you thought you were ready go, you had to find one of the few nurses who scurried from room to room, you could leave after showing her you bloody pad. If the nurse approved of the looks of the pad after asking how long you had been wearing it you were released to go.

Once I could muster up enough strength to walk again then I was able to leave that horrible place. I could not have walked out without assistance. I was escorted out with the help of my parents, my mom one side and my dad on the other. I limped out almost completely doubled over in pain. I have never spoken of this event with my parents. We never talked about what it was like as if I was ok with it. It is like it never happened. Almost like one Saturday that didn't exist. But I know it existed and I think in their minds somewhere they know it existed too.

That day was the beginning of many days of mental anguish. I was diagnosed with post-dramatic stress disorder and anxiety disorder. I have suffered many, many panic attacks. Experienced numerous unusual fears that are connected to the trauma I suffered as a result of the abortion. I have been through five years of professional counseling and to this day I am still on medication for anxiety and depression.

If I could give advice to anyone considering an abortion, which I have, I would say please, please, don't do it. Not only is it cruel and horrific for the baby, it is horrific for the mother as well. Abortion claims two victims every time. I still experience sadness and always will until I am united with my "lost" baby. God's mercy and forgiveness will allow me to hold him or her. Because I believe Jesus lives, I also believe my baby lives too.

I will beg the court to please make abortion illegal. Stop this unnecessary pain, torture, and murder. Maybe we don't have a cure for cancer or aids because the one who was destined to discover the cure was aborted. Just a thought...

Thank you for your time and consideration. I am hoping and praying you will make the right decision for life.

"I have read the above and foregoing statement and the same is true and correct."

I was afraid my husband would never even consider taking me back if I was pregnant by someone else.

I finally decided "babies come from God so I will just send it back to Him." I reasoned and justified that it was okay because no one should bring more babies into this horrible world anyway.

So I called an abortion agency - they made an appointment for that same weekend.

A guy I barely knew as an acquaintance - who assisted strippers in paying their bills - took me to the clinic.

He paid for everything. I never saw the exchange of money. I have no paperwork. I signed my name and gave permission for him to do it all.

I went back to an office. The man asked if I was ready. He asked if I had other children. I was pretty numb at this point. It all happened so fast.

I changed into a gown - they took me in - gave me anesthesia - then it felt like only minutes. I was

told it was over and to go rest in a room for a few minutes. I remember thinking - is that it - that quick. Then emotions I had not dealt with

surfaced - I kept hearing in my mind that I had murdered my baby. Before it was abortion - now it was murder - Guilt like I had never felt before

hit me. When I got home, I sat in my bathtub
streaming and crying, rocking back & forth that I
had murdered my baby. I felt like I was
dying inside. Like I was being ripped inside
out. I literally wanted to die. The pain
emotionally was severely intense.

About a week later the adoption agency called
back - I lied and told them I had a miscarriage.
I kept going to the emergency room and telling them
I was bleeding too much - I was seeking emotional
help - They kept saying I was fine - I did not
know how to tell them I was emotionally dying.

A couple days later - I received counsel and
prayer from two very godly women. The Lord
Jesus spoke to my heart and reassured me of His
love. It has been a healing process ever since
then. I rely on His grace alone.

I could have a beautiful 3 yr old son today -
but I made a "Choice" to murder - to be
selfish.

BEFORE ME, the undersigned authority, on this day personally appeared Lori Ann Smith
(Print Name),
who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1) Tell approximately when and where your abortion occurred:

I had 2 abortions. One in Tulsa in 1981 and another in Tulsa in 1983

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?

I was told about the nature of abortion but not the long term consequences. I also didn't know at the time that a babies heart was already beating

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer?

I have not and I have not had breast cancer

4) Did anyone pressure you into having an abortion? If so, who?

Yes I was pressured by my husband both times. I was not pressured by the P.P. clinic but I was not given any other options.

5) How has your abortion affected you?

I have regretted both abortions. If the subject of abortion comes up I hurt and begin to cry. When I was told that abortion is murder I was distraught. I truly believe I committed murder 2 times.

6) How has your abortion affected others in your life?

My husband also regrets me having the abortions. I have only told a handful of people.

7) Based on your own experiences, what would you tell a woman considering an abortion?

I have told my niece not to do it because she will regret it the rest of her life. I begged her to consider adoption instead. She ended up not being pregnant.

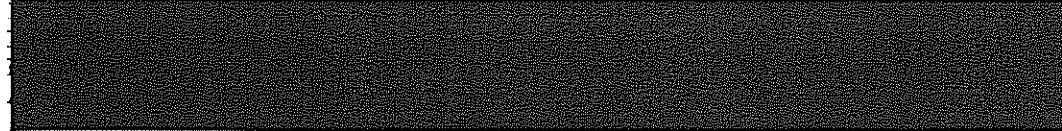

8) Based on your own experience, what would you tell a court that believes abortion should be legal?

I would say that it should not be a choice because the baby doesn't get to make it a choice. I would say it's not safe because the baby dies 100% of the time.

"I have read the above and foregoing statement and the same is true and correct."

AFFIDAVIT

To be filled out by women who have had an abortion

**The State of Oklahoma
County of Texas**

BEFORE ME, the undersigned authority, on this day personally appeared S. W.
(Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

1. **Tell approximately when and where your abortion occurred:** November, 1980 and April, 1984 – both in Lubbock, Texas
2. **Were you adequately informed of the nature and consequences of abortion, what it is, what it does?** I was not adequately informed of the risks. I was given a Valium before the procedure, and they told me briefly what they would do; that they would numb the area, and then there would be a loud sound and pressure while a vacuum removed the tissue. I would have some bleeding comparable to a period afterwards, and then I would be fine. I was treated like I was in a herd of cattle headed for slaughter. It was very impersonal, and I was made to feel sub-human and dirty. No one told me what the abortion would actually do to the baby or the risk to me emotionally and physically.
3. **Were you informed of any link between abortion and breast cancer?** No. **Have you had breast cancer?** No.
4. **Did anyone pressure you into having an abortion?** Yes. **If so, who?** My mother, being uninformed herself, said I had no choice – that was what I had to do, no questions asked. The second time I became pregnant, a doctor told me that due to a car accident I had been in after I had conceived and the x-rays, surgery, and various drugs given to me, that the baby would probably be deformed, and he advised me to terminate my pregnancy. I, to this day, doubt what he told me. He just knew what I wanted to hear.
5. **How has your abortion affected you?** How have my abortions not affected me? Emotionally and physically I have since never been the same. A month after my first abortion, I started hemorrhaging, and I lost a lot of blood and was hospitalized for several days. In the months and years afterwards, I felt worthless and had zero self esteem. I was in a downward spiral and became very sexually promiscuous. I became pregnant again a little over three years later and the obvious choice seemed to be to have another abortion. I believe, without a doubt, that my abortions caused me to have an incompetent cervix. After I was married and after many years of trying to conceive (another common thread among women who have had abortions), I endured fertility treatments and finally became pregnant again, but I lost my three babies because of my damaged cervix. The clinic never told me that when they forced open my cervix to get their instruments in that it could damage my cervix and cause me not to be able to carry a pregnancy to term. With the two children I have had since, I had to have my cervix sewn shut and be on bed rest part of the time to keep from losing them also. The emotional scars are intense. It is impossible to forgive myself for choosing to kill my own children. My God has forgiven me, and I know I will see them both some day. I pray that they have forgiven me too. I now have five children in heaven all because this horrible procedure is legal and so readily available. I carry the guilt and shame of what I've done with me every day.

6. **How has your abortion affected others in your life?** My mother shares my emotional scars because she insisted on my having it done. She drove me there, paid for it, and wiped my tears away after it was over. It wasn't until God opened our eyes, and we looked at my darling little ones born premature at 20 weeks that we both realized the horrible mistake we had made. It is not a blob of tissue like you're told – it is a baby! It has also affected my husband, and I am sure the fathers of the children I aborted.

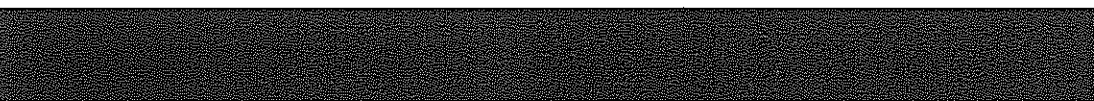

7. **Based on your own experiences, what would you tell a woman considering an abortion?** Please don't do it. You'll regret it the rest of your life. This pregnancy will undoubtedly change your life forever no matter what you decide, but let it have a happier ending instead of a tragic one. This is your child growing inside of you. It is not just tissue; it is a baby that doesn't deserve to die because it is an inconvenience to you. If you can't love and raise this child yourself, you can place it with someone who can. That is the most unselfish gift in the world. I would give anything if I could go back and change what I did. I can't, but it's not too late for you. Please don't kill your own child.

8. **Based on your own experience, what would you tell a court that believes abortion should be legal?** Abortion killed two of my children. I have to live with that fact for the rest of my life. I cannot fathom how our nation has become so blind as to say it's okay to rip a child apart or suck its brains out. Those of you making the decision to keep abortion legal cannot possibly have first-hand knowledge of how abortion affects a woman, let alone what it does to an innocent child. If you did, you would prevent it. This is such a black and white issue. My aborted children were separate human beings; they were not like an infected appendix that needed to be removed or blobs of tissue that had no feeling. In many cases, these babies feel every bit of the torture it takes to kill them. If I were now to neglect one of my children, and it died, you would go after me for murder; but blind as I was, I twice chose to kill the child in my womb, and you call it choice. Abortion stopped the beating hearts of my children in the most barbaric, heinous way. I would do anything to undo what I did. I know I can't bring them back, but I will do everything in my power to prevent this from happening to another baby and to its mother. If you won't consider the babies, please consider the women abortion affects. Abortion does not help women; it hurts them tremendously. The abortion industry takes advantage of hurting women, and it makes outrageous profits by victimizing these same women. You will find the majority of women who have had abortions are now on the other side fighting to stop it. Please know there must be a reason why. The pain and grief lasts forever, not to mention the physical damage it causes. I pray that God will open your eyes, and you will help to stop this lie that hurts so many.

- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: It was explained to me the process of the D/D, what would happen but not the impact mentally, physically (after the 1st few days), emotionally, psychologically. Not the guilt, the pain, the sorrow or the broken heart and life. It was not given Alternative to abortion.
- 3) Were you adequately informed of the consequences of abortion? no the health care worker called it a termination of pregnancy - I knew what that meant. But the full impact didn't hit until after wards - mentally & emotionally (guilt wise) no - physically (short term) - yes
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
Thank God!
- 5) Did anyone pressure you into having an abortion? yes If so, who? my mother - "you'd go on welfare" "we won't help" - "our relationship will end" The father didn't want me to do it - or his parents - But he moved to S. Cal. where they were -
- 6) How has your abortion affected you? 20 yrs of misery - emotionally & psychologically in bad shape - no help offered. I slept around a lot for 10 yrs got married late 30's. Then the quiet regret pain depression intense - I tried knowing that that child was my only chance to have a child. My husband 10 yrs older had raised a family, had had a vasectomy & didn't want to adopt. This couldn't go on long because I held a loaded gun to my head in 1996. I've had counseling, anti-depressants & committed my life to Christ since! 2-3 yrs ago I went through 12 week healing.

I) no connection with the father of our baby. a disconnect from my parents & brothers. Because of my hot & cold behavior trouble with step kids, grand kids & husband
- 8) Based on your own experiences, what would you tell a woman considering an abortion? I can't make that decision for her or her baby. But looking back the abortion almost ruined my life - my choice for my convenience! It caused me alot of pain & misery & will affect her for the rest of her life, as it has mine & thousands of other women.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? That the consequence of that one act nearly ended my life - of my own doing. That the consequence of abortion is devastating & painful life changing in the negative way for obviously the unborn baby, but for the mother to be true. I plead that you hear my cry - my pain, my guilt, my sorrow. Please change your belief that it's better for both to keep abortion legal.

- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? No/Yes? If so, who? My second abortion was with my present day husband. It has affected our relationship from Day One. He did pressure me into having the abortion and I did submit to his coercion & threats.
- 6) How has your abortion affected you? Without realizing it, I suffered from what is called "anniversary grief" and depression. The ^{other} post abortion syndrome symptoms I experienced (and to a certain degree still experience even though I've gone through intensive therapy) are: ① self abusive behavior (smoking & drug use started immediately after both abortions) & suicidal thoughts ② recurring "baby" dreams ③ Guilt & anxiety ④ Overly protective of my children ⑤ Resentment toward spouse.
- 7) How has your abortion affected others in your life? Of course - all the things I listed in Question 6 have affected my marriage and my children in many ways - both obvious as well as subtle (consciously and subconsciously)
- 8) Based on your own experiences, what would you tell a woman considering abortion? Reconsider & look at all the alternatives. "Don't do it - you will always regret it!" A part of you and your identity as a woman will always be injured regardless of how much intensive therapy and healing you experience.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? In the very "core" of every woman is the desire to bear children and the need to protect them at ALL costs. When a woman "chooses" to have an abortion (for ANY reason), she violates (and (unknowingly chooses to) destroy) herself as well as her child.

- 1) Tell when and where your abortion occurred: Fall of 1979, Medford, OR
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: Yes, to the extent of what happens physically. But not at all emotionally.
- 3) Were you adequately informed of the consequences of abortion? No
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No and No
- 5) Did anyone pressure you into having an abortion? If so, who? Yes, the babies father and my parents. Also, I pressured myself. At that time I didn't see any other answer.
- 6) How has your abortion affected you? It caused shame, loss of a part of me, a precious human being, sadness and wonder what would he have been like.
- 7) How has your abortion affected others in your life? I believe so. I still struggle with intimacy to an extent.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? The baby is person from conception. There are alternatives that are healing. The pain doesn't completely go away and there would be loss in your life. Most of all you are taking another's life. Only God has that right.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? They are allowing murder to go on. The baby has the right to live just as they do. They are not doing wrong a favor to allow these murders to go on. In fact just

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: Lovejoy Clinic, Portland OR - 1988
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: The woman I spoke with at lovejoy was very cold. I wasn't informed of any consequences, side effects, nothing. I felt like a piece of meat in a butcher shop.
- 3) Were you adequately informed of the consequences of abortion? NO, I was simply told it's a blob of tissue that needed to be removed. I was told nothing.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? Yes If so, who? My mother & the lady at Lovejoy.
- 6) How has your abortion affected you? I constantly think of the baby that I could have had. I grieve on a continual basis the same way a mother grieves for the child that was killed.
- 7) How has your abortion affected others in your life? It's a topic I'm only able to discuss with my husband. The rest of my family considers it a dark hidden secret never to be discussed.
- 8) Based on your own experiences, what would you tell a woman considering abortion? It's a decision she will have the rest of her life to think about. The very moment a baby is conceived, it is a human with a soul. Abortion is nothing more than a fancy name for murder.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? Abortion is nothing more than a temporary fix to a life long consequence. What a 9 month pregnancy does to a woman giving up her child for adoption is nothing compared to the mental torment of what abortion does to the mind.

- 7) How has your abortion affected others in your life? My husband lost a child, my sons lost a sibling, my family should have another teenager at the table. My husband and I had to work through so much pain as the consequences set in.
- 8) Based on your own experiences, what would you tell a woman considering abortion? You think this is a good solution to your problem, but the consequences will be with you all your life, creating worse problems. Why is it legal for a mother to kill her child because it's inconvenient, unwanted, a problem? Why is her body more important, her choice more important than a living child? BEFORE ME, the undersigned authority, on this day personally appeared Cherri Van Syoc (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: Jan. 28, 1970
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: My Dr. had set up an apt. for me to talk to someone at a Planned Parenthood Clinic, there was no explanation of any kind. No one told me of the needles into my stomach or going through labor to have the baby come out.
- 3) Were you adequately informed of the consequences of abortion? No, I had never even dreamed of the consequences of aborting the only baby I would ever have.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? no
- 5) Did anyone pressure you into having an abortion? yes If so, who? My boyfriend - we were 17 years old - He had heard of a friend's girlfriend who had had an abortion and we went from there.
- 6) How has your abortion affected you? It really didn't hit me for 10 years - Then it hit me, the guilt that wouldn't leave + depression that had a stronghold over me. When I finally laid it down before the Lord he removed my guilt + shame - But the scars still remain.
- 7) How has your abortion affected others in your life? I have shared with others - sometimes they have listened and other times not, but if there is a way to save one child it is all worth it.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? I have been in your same position and although right now it seems overwhelming know and believe God does not make mistakes - If you couldn't raise it, know that adoption is always an option. The Lord will take care of you.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? That human life should not be ended because someone chooses to do so. The woman had her choice before she got pregnant, to have an abortion is to murder a real live human being, if you don't believe so leave it there and see what happens.

My husband thought if I had an abortion, I would not be able to handle that. He felt it would emotionally break me.

I counseled with a nurse at the hospital. She used my emotional instability to tell me I should not bring another child into the world. My heart wanted to keep the baby, but my mind told me I couldn't.

She directed me to the hospital psychiatrist. He told me I was at a bridge and was afraid to cross over. He convinced me I should get the abortion. He said I had to make the decision quickly. This enhanced my fear.

I was too young, afraid and confused to make my own decision. My husband was going to support my decision. I knew he did not want me to do this, but I was afraid of "going crazy" if I didn't.

We went to the hospital. I still felt reluctant. They gave me anesthesia. I remember seeing in my mind, a shadow of the embryo. I remember feeling like I wanted to keep seeing it and then in a moment it was gone. It's almost like I heard my mind snap.

I awoke crying and hearing the nurse say, wake up Sharon, you're just fine. How could I be fine if this made me cry? How could I be fine, if I didn't wake up feeling better?

I remember sitting in my chair the next day with the thought, I wish I could have felt like keeping the baby. I knew it was a baby. I had two. Again, I feared I couldn't handle it.

Right after that thought, I heard a still, small voice say, everything is going to be okay. Was that God? I couldn't think into it any more. I had no religious belief, except I have always felt like there had to be a God.

All I know is, the voice I heard stayed with me and it helped me to focus on each day. I knew in my heart what I did was not right. The event was always with me. The feeling of regret was ongoing. I did not even realize until years later, looking back, that I had much deeper problems with depression, my sexual relationship and multiple health problems that I believe were directly related from this choice.

SEB

It was not until 1982 that I found a true relationship with the Lord. In 1986 I saw one of the first Crisis Pregnancy Centers to open in Renton, Washington. I was curious and went to the open house. In my mind, I wasn't thinking, oh, I had an abortion so I can help people or that I needed healing. I have always loved helping people and knew you could take volunteer training.

Little did I know what I was getting myself into. At the training, they did some role playing. I felt insecure about this. Then I thought, I would use my own experience and wouldn't have to make one up. The others would never know. As I told my story, I felt some emotions rising up in me and it took all I had to not let them out. I would go home and feel sick, like something was brewing inside my soul that I couldn't control.

Then during a viewing session of a film, the truth was made known to me. There was one other girl and myself. This video had a girl, lying on a table, under anesthesia. She was having an abortion. All of a sudden my eyes saw the truth of what happened on that day.

You see, maybe I had two babies, but I had never had an abortion. No one gave me the information on what actually happens. I didn't know to ask questions because my trust was in the information given, which was limited.

Now here I was, years later, witnessing what happened to me. I wanted to run out as I saw this girl's body shake uncontrollably, the sound of the vacuum and most of all, she was **crying while under anesthesia**.

I couldn't wait to get out of there. I held my own, got in my car and raced home. I curled up on the couch, comforted myself with a blanket and rocked. I felt like throwing up and my eyes filled with tears.

My husband came home from work. He took one glance at me and said, what's wrong! I said, I know now what I did. He instantly knew this day would come. We held each other and cried. It was the beginning of our healing.

I was led to this CPC for my own healing. Yet, God allowed my gift of counsel to be used during this process.

SEB

I remember Him impressing on my heart, I would be doing a drama on post-abortion, to help minister to others how women need healing. I recall saying no, I don't want to do that because it is such a controversial subject.

My husband and I moved to Alaska. I had seen the center in Eagle River where I lived. I was curious to go by and say hello, but didn't want to get involved again. I was very ill with Chronic Fatigue Syndrome.

One day I went by to get a book for a friend who was in a crisis pregnancy situation. I told them I used to volunteer in Washington. They wanted me to get involved again and I said I would have to pray about it because of my illness.

I was lying down, not feeling well and the Director called. I was feeling like I wanted to be involved, but was too ill. I expressed that to her and we hung up. Afterwards, I cried and I knew in my heart, I had to take a step of faith and trust God. So I did.

At this time, God brought to my remembrance, the post-abortion drama. I wrote a poem about the post-abortive woman. I was listening to the "Song of India." I saw the drama choreographed in my mind and the poem spoken to it. I knew this is what God wanted me to do. I remember feeling, I could only do this if God truly directed me.

The Post-Abortion Facilitator encouraged me to do the Bible Study, "Forgiven and Set Free." I didn't think I needed to since I was healed, but I chose to do it. I was being prepared for much more.

An area of anger rose up within me. I was feeling like I wish my husband could have convinced me not to have chosen the abortion. I went to him with my feelings. He admitted he wasn't strong enough back then to take a stand and we both cried and had another time of healing. This only came about because of doing the study.

I volunteered for about a year. I eventually became Director of Client Services and the Post-Abortion Facilitator. I had my days when I was in much pain, with my illness, yet this was one of the best times of my life to grow in helping women be set free. Truly, the very regret in my life, God turned into a wonderful blessing of freedom for me, my husband and freedom for others.

The post-abortion drama was performed at a Mother Daughter Tea of 500 people (mostly women), a Sanctity of Human Life Sunday Service and for the Ministerial Association with Pastors from several denominations. I had the opportunity to take the post abortion Bible Study into the local women's prison in Eagle River and to speak at Aglow International meetings. Many times when I flew out of Anchorage, I would sit beside men or women in the airplane who were post-abortive and would end up telling me their story.

If I had not stepped through the doors of CPC in Washington, I would not have had the opportunity to be healed. If I had not stepped back into the doors of CPC in Alaska, I would not have received the fullness of my healing and my husband's. But because I did, I had the wonderful God given opportunity to lead others down the path to freedom and the beautiful cycle goes on.

Why are we helping women to find healing from this act, if it is truly not a right choice?

Enclosed is a copy of an Anchorage News Article I wrote with a comment for the State Representative. Also, a poem to share that was written after I finished the Post-Abortion Bible Study.

I wonder what would happen if those who have fought to pass Roe Vs. Wade, would think after witnessing the act of abortion? Or to sit and listen to the woman who was bleeding profusely while riding home on the bus after an abortion. Or watching the wrenching face of a girl who allowed her 4 month old baby to be taken out of the womb prematurely?

Maybe then the truth would compel them to overturn this law and take a stand for humanity.

They have listened to the womens' cry wanting the right to abortion, it is now time to listen to the cry of the women who have had abortions!

Sincerely,

Rev. Sharon Barney

Abortion violates woman, child

It is true that abortion is legal in this country just because something is legal does not make it right. Legally, if someone is about to take his or her own life through suicide, we are to intervene and seek help for him or her. Yet, society demands the right to choose to take the life of the unborn, even up to the ninth month of pregnancy.

When someone's so-called right to choose violates another person, it is no longer a right, it is a wrong. Abortion violates the woman and her growing child. The legal right to choose abortion has given our young people the belief they can also choose to terminate their child after birth. How many stories have we heard about babies found in dumpsters, bathrooms and motels?

This is why parents who care about their children fight for laws to protect their loved ones. If we do not take a stand and fight to protect our heritage, who will? It was stated recently that a woman is responsible for the growth, life and health of another being, yet in the same sentence saying they have the right to choose what happens to her body. Her right to choose abortion violates the growth, life and health of that human being. The baby has its own identity, separate heartbeat and blood supply. It is not just her body.

I am a post-abortion counselor. We help women and men through the grieving process of losing a child through abortion. Along with many other counselors throughout the United States and Canada, we meet daily with those who suffer the aftereffects of abortion emotionally and/or physically.

Freedom to choose does not come without responsibility for your actions and accountability. Man can make a law to satisfy the cry of woman's so-called right to choose, but to choose life or death for someone is not our right. Why are we here sitting on the other side, counseling the wounded, if abortion is a healthy, right choice?

"Precious Child"

(A song written for my child)

My precious child of long ago
I have a song for you
About the love that's in my heart
It's so long overdue

I never got to know you
I miss you just the same
I never got to hold you
Or give your precious name

I think of you in heaven
In the arms of Christ
The one who offers forgiveness
Who's blood was sacrificed

He helped me to forgive myself
For that deceitful day
He offered to me healing
When my heart cried out to pray

I always will regret the lie
That drove me to that choice
I won't let it control me
In God's love I can rejoice

I long to meet you honey
So we can hug and touch
To be close together
I love you, Oh so much

As I end this song love
There's one thing I desire
To name the one I never knew
My precious, Jacob Josiah

THE STATE OF OREGON
COUNTY OF GRANT

Before me, the undersigned authority, on this day personally appeared RHONDA L. COATS who, being by me duly sworn, upon oath, stated the following facts:

My name is RHONDA L. COATS (Print Name).

I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

I had just turned 15 years old in 1975, and I was looking forward to my sophomore year in high school with classmates that I had known since Kindergarten. Although kids talked a lot about sex; who was, who wasn't, etc., there had never really been any helpful information sent our way. I knew the birth control pill existed, but in such a small, rural town, I had no idea how to get it without getting caught. I also believed that I wouldn't need it. Like most teenagers, I believed that kind of thing happened to "other" girls, the ones who had low morals, bad families, etc. It didn't occur to me that I was in that category until I became pregnant within weeks of losing my virginity.

Technically I had been sexually active since I was about 4 years old when my older brother and his friend tried to force me to perform oral sex on them. It was only a couple of years later that my father began using me for his sexual satisfaction. With those experiences I learned the only thing I was ever going to be good for, and that I was ever going to get attention for, was through sex. I was proud of myself for waiting until I was 15 to have intercourse. I was devastated when I found out I was pregnant.

My mother was not a gentle, caring, nurturing woman, and I was more afraid of her than I was of being pregnant. The thought of keeping the baby never crossed my mind. The last thing on earth I wanted was bring a baby into my home where he or she would grow up in such a cold, heartless atmosphere. I told my boyfriend, who had a good job, but no money to help me. In desperation I asked my grandfather for the funds - \$250.00. He told my mother. She paid for the procedure, forbid me to see my boyfriend again, and told me that no matter how much pain I might be in I wasn't getting out of school the next day. She slapped my face when I told her it might not have happened if she had been home and cared about me. The experience was never spoken about again.

I carried the shame and guilt for the next 25 years, like a bundle of bricks upon my back. There was never a time when I ever truly experienced real joy, love, or happiness. I would

come close, but never quite get there. By December of 2000, I had made so many similar and equally devastating choices that the only choice I had left myself was to give my shattered, torn life to Jesus. I was almost instantly aware of the sensation of having been forgiven for killing my first child, for divorcing 4 husbands, for leading my 4 children through the nightmare of watching their mother try to fill the void in her heart with the unsatisfying love of men, and the chaos that was a constant in our lives.

The freedom from guilt and shame can only come from Jesus Christ, and the acceptance of that gift has changed my life and the lives of my children in every way.

Don't tell me that there are no lasting effects from having an abortion. Don't tell me that it's a choice – the choice is to be responsible in the first place. The choice is to stop using abortion as birth control. In 1975 there was shame in becoming pregnant at the age of 15, today it's accepted and almost expected. And don't tell me that the women who have submitted to the 4.5 million abortions since Roe vs. Wade didn't feel anything after their baby was torn out of their bodies. That singular act will stay with them and haunt them every day of their lives until and unless they accept the grace and forgiveness of Jesus Christ. I know I will meet my baby someday, and I am looking forward to the time when I can hold her and finally ask her to forgive me too.

Tamara Mattson (Print Name),
who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: May 25th 1994 @ our local hospital in Williams Lake, British Columbia Canada. I was 17 years old - junior in high school.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. I was told because of my age - it was the best choice for me. That it was a clump of cells. I was not shown fetal development or explained the emotional scars that I would feel for years after.
- 3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No and No.
- 4) Did anyone pressure you into having an abortion? If so, who? Most of my pressure came from my boyfriend. My friends that knew told me they would support whatever decision I made.
- 5) How has your abortion affected you? I suffered severely for 5 years from Post Abortion Stress. Hiding behind a mask of "happiness" - I was a depressed, insecure, person searching for people and things to fill the void left from my aborted baby.
- 6) How has your abortion affected others in your life? My life following the abortion was full of empty relationships and the imaginary walls that go up when you dislike yourself and the things that you've done. I suppose my hurts - in turn hurt others - with a negative attitude and hard heart.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? In order to make an informed decision - you must first have the facts. The truth about abortion is that it is an easy way out. It is a decision you can never go back on. Not a day goes by that I don't think about my loss. Every child deserves a chance at life.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion changed my life forever. If I knew then what I know now I would have never chose to end the life of my child.

BEFORE ME, the undersigned authority, on this day personally appeared KATHLEEN MCGEE, who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

Tell when and where your abortion occurred: In Los Angeles approximately 25 years ago

Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No, I was given information about where I could have the abortion done and an appointment was made for me.

Were you adequately informed of the consequences of abortion? No.

Were you adequately informed of the nature of abortion, what it is, what it does? No.
If not, explain:

Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No. No.

Did anyone pressure you into having an abortion? If so, who? No.

How has your abortion affected you? It has created a lot of sorrow. I was not happy for a long time. Until I became a Christian I was not able to overcome the sadness. I suffered with depression and still do on occasions. I think about how my child would have been had I let the child live. It caused me to have a "no care" attitude. I remember after the procedure was done, I felt very nervous and I tried leaving the clinic without checking out. I was going down the stairs but one of the clinic workers said I had to return and check out. I just wanted to get out of there.

How has your abortion affected others in your life? It caused me to have a detached attitude toward my other children and people in general. My selfishness continued until I became a Christian. I was not able to really understand how it affected them until I became a Christian and saw myself for what I was and realized what I had done to my first child. My son has gotten in trouble since he was 13 years old and is still not doing well. My oldest daughter and younger daughter have become Christians and are doing very well.

Based on your own experiences, what would you tell a woman thinking of having an abortion? I would say, "No, don't do that! It is the image of God and it is a gift of God. The child will be more of a blessing than a burden. God will help you take care of the child."

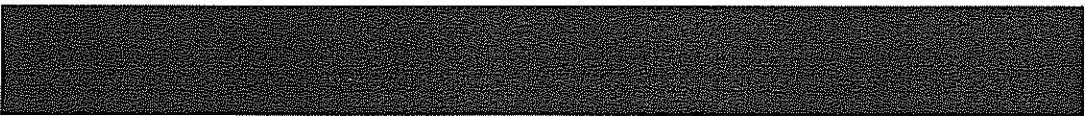

Based on your own experience, what would you tell a court that believes abortion should be legal? I would say, "You can make a law that it is OK, but in a woman's life it will not be OK. It will not be OK in her mind, in her emotions. This is a forever thing that will be with her in her mind. She will never forget the child she killed. The sadness will never go away. Every year I think of how old the child would be now it I wasn't so selfish."

Before me, the undersigned authority, on this day personally appeared K [REDACTED] F. L [REDACTED], (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

My name is K [REDACTED] L [REDACTED]

I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

It was 1975, I was unmarried and unsaved. I did not consider myself promiscuous even though I took the birth control pill; I had been with each of my partners for an extended period of time and was "in love" with my current one. I was attending college with the plan of becoming a teacher for exceptional children.

I had been experiencing problems with my menstrual cycle, the flow was less and less, when I saw a doctor it was brushed off. On one such appointment I was informed I was pregnant. I sought out several instructors and other individuals for counsel, though I admit I had already considered abortion as my option, all those whom I questioned were of the same culture and mindset. I didn't want the boy to feel obligated to marry me, a naive and old fashioned idea, and I couldn't in vision myself raising a child alone; all the time retaining the message that it was just a bit of tissue and not a baby. The boy, later to become my husband, agreed to the procedure but later told me he had wanted to stop me. This caused turmoil in our marriage for quite sometime. In what I now consider a twist of irony my abortion was performed at the Lovejoy Clinic, as I later realized there was no love and no joy.

I had all too easily obtained a government subsidy to cover the cost of the abortion, no requirement for showing health risk only low-income inability to pay for myself. So with a minimal description of what was to be done I forged ahead. The grief, remorse, guilt and feelings of shame began about a month later and continued for over 12 years; ending only when I became saved.

One year after my procedure I was diagnosed with uterine cancer and though I obtained a second professional opinion that confirmed the diagnosis and then had to have a hysterectomy, five years later I was told no cancer had really been found. I had lost my ability to ever have a child again, I was devastated and my marriage suffered again. My career choice of teaching was given up, I had difficulty being around children and when someone brought a baby around work or family members had children, I silently went off to cry sometimes for hours or days.

My husband and I had spoke of adoption after my hysterectomy, but marital problems and financial difficulties delayed it till my husband lost interest and was content to be without children, I cried for three days when this realization was made.

I am now in my fourth year of recovery from breast cancer. In another odd twist as I was praying for the abolishment of abortion I realized that breast cancer was probably a judgment and consequence of the sin of abortion.

KCB

KFL

This has recently been confirmed by news that those who have abortions are at a greater risk for breast cancer.

In closing I hope that the truth about abortion will be made clear. Sonograms and ultra-sound confirm when the heartbeat starts, when bones and body parts form, why do we perpetuate the myth that it is not life, or not a baby.

As long as our nation continues in the culture of death, sorrows grief and death will be multiplied for All. I made a choice I wish I had never been given. Laws covering the patient being informed of risks and facts of what is to be done are in place, these should apply to abortion; or in actuality there should Not be a right to kill the unborn simply because they are a perceived inconvenience.

Due to family members who could be affected by my story I wish only my Initials to be used. I pray my story may help end the silence, the pain, the death.

A Need for Compassion

I need your compassion, as do many other women like me. I am a post-abortion woman. At the age of 54, I am finally confronting the damage that three abortions have done to me. I was one of the lucky ones: I did not suffer any physical damage to my cervix or womb. But the extent of the emotional, mental and spiritual damage in my life is quite overwhelming to me. Here is a bit of my story – my history, my recovery and my healing.

At 18 in the 60's, I was sexually active and terrified that my parents would find out how I was living my life. I got pregnant and the father was long gone. I didn't even know his last name. Now what was I supposed to do? Like many young women at the time I did two things. I got drunk, and I had an abortion. That seemed to be the answer in those days. That answer (that choice) scarred me for life. It changed me forever.

Unbeknownst to me, I spent the next six years running from the anguish going on inside. My drinking and my promiscuity increased dramatically; I discovered some of those wonderful hippie drugs we all loved; I started a deadly relationship with food and yo-yo dieting, and I fell in love a dozen times and couldn't make one of the relationships work. During this time, I did meet the man of my dreams. He was perfect – well, almost. He had one flaw – he was married. So in 1974 when we wound up pregnant, there was only one easy choice – another abortion. I was so drunk the day of that abortion that I do not remember any of the details. That day is a fog to me except for one feeling that has remained – a deep pain.

For the next 11 years of my life, my coping tools all got worse – the drinking, the promiscuity, the food problems, and two marriages falling apart. Then, several things happened that began my long, slow journey of recovery and healing. God blessed me with a son in 1981, and in 1985, God gave me the gift of sobriety. My sobriety eventually led me back to my Catholic faith, which I had abandoned in my college days.

But my return to my faith did not occur until after I had one more abortion. In 1991, my married friend and I were pregnant again. This time I was sober. This time I wanted to keep the baby. I was given a choice – the baby or him. I was angry and hurt. But after so many years of craziness and foggy thinking, I caved in and had my third abortion.

For 36 years I was an ardent pro-choice advocate until circumstances of one fall day in 2003 again changed me and the course of my life. Neither of my vehicles was available to me, so I couldn't go to my regular church for Sunday Mass. I went to a church closer to home, and after Mass picked up a church bulletin. There was a small box ad about Rachel's Vineyard post-abortion Retreats that gave a web site address (www.rachelsvineyard.org). Being the good computer junkie that I am, I jumped online to the web site. I sat there reading through the site sobbing, with tears streaming down my cheeks. I knew in my gut that it was time for me to deal with my abortions.

I finally attended my Rachel's Vineyard Retreat in April 2004. There are no words to describe this profound experience. What I write about it is fairly superficial detail. Thirty-six years of denial, shame, guilt, pain, sadness, and anger came to an end. I was shown how to look at the abortions through new eyes. I shared my experiences with 10 other post-abortion women. This was the first time I had ever told anyone about

this part of my life. The acceptance and love and forgiveness offered to me began my healing. I faced my three children, named them and asked for their forgiveness. Through the miracles of this weekend retreat I know that God has forgiven me, and I am on my way to forgiving myself.

Like all good 60's kids, I wanted a "quick fix", although I knew one weekend was not going to fix 36 years of torment. My healing is a process, a journey just begun. I made my dead children a promise, which I quote in full "I promise you that I will no longer be silent about you. I will not hide in shame or guilt. I commit to turning our pain and sorrow into something good and positive. I will find a way to honor your existence and your deaths. I will let Jesus guide me in memory of you."

I am discovering many ways of keeping this promise. I shared my story with my family. They were all unbelievably caring, loving and supportive. Again I am blessed. Not all post-abortion women get such positive, compassionate responses. Some have families who do not want to hear their stories, who cut them out of their lives, who get angry and mean. That is not what we need for our healing. I pray that all families try to understand the depth of the pain of the post-abortion woman and find compassion.

One of the joys of my retreat was the discovery that I can use my God-given talents for writing and speaking to keep my promise and to, perhaps, help others understand the difficulties of the post-abortion journey. So I am writing letters to editors and articles such as this. I am speaking out when appropriate. I walked in a Memorial Day parade this year in memory of Luke, Grace and Benjamin. I proudly wore a T-shirt that says "Women Regret Abortion". I will share my story openly and freely. I will not hide in silence, guilt or shame any longer.

Forgiven & Free

In April 2004, I attended a Rachel's Vineyard retreat weekend for post-abortion healing. These are some reflections about the six months since my retreat. I am a changed person. I am different today than I was in March 2004. I am forgiven and free today. How has this happened? What is different in me today – how do I know I've changed?

A metaphor for the process I'm going through dawned on me today during my morning prayers. When I arrived at my RV retreat, I was like a shattered mirror. At 18, I was a whole, beautiful mirror. My glass was totally shattered into millions of pieces when I had the first of my three abortions.

I brought all those broken pieces of glass to my retreat – the painful shards wounding me spiritually, emotionally & physically. The brokenness had been ripping me apart for 36 years. The very action of going to the retreat acknowledged how broken I was.

The retreat process helped me to lay all my brokenness at the feet of Christ. I was able to ask Christ and my children for forgiveness. The mercy and love of Christ helped me to name and claim my wounds. Christ gave me a frame for the broken pieces of glass. At the retreat, I began to put the pieces of my broken mirror back together inside that frame.

The early part of the process was really painful. I had to pull all those broken pieces of glass out of my soul and look at them. This is hard and painful work. With Christ's love all around me, comforting me and guiding me, I was able to do this work.

I returned home from the retreat with my broken glass pieces and the frame of Christ's love. Since then, I have been laying those broken pieces in their proper place inside the frame. This is slow work. Sometimes I get a piece in the wrong place, and have to work on it some more to find where it belongs. Christ's forgiveness and mercy hold all those pieces in place. And the rewards for the work are splendid. Each piece that is put into its right place looks beautiful and makes the rest of the growing mirror that much closer to whole again.

Sunday, April 08, 2001

Dear Sir/Madam,

Thank-you for trying to do something to change our countries laws concerning abortion. We, the women who have abortions, grieve silently for many years. If anything can be done to prevent future generations from thinking that abortion is nothing but a simple surgical procedure with no consequences, please find a way.

God has called you to a great task. Do not be discouraged in any way. Know that simply taking a stand and being heard has a powerful effect in the hearts and minds of those who think very little of God's gift of life. Thank-you for seeing the potential our country has through President Bush's administration to turn and value life. No matter what you are able to accomplish, it is pleasing in God's eyes and will bring you great reward. Thank-you for fighting for us, the ones who treated the lives of others without love.

By God's Grace,

B. A. A.

- 1) Tell when and where your abortion occurred: Bridgeport, PA, Jan. 1978 + March 1979 (approximate dates)
2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No. I was not informed to what would happen - to my knowledge I knew that the fetus would be suctioned out but didn't realize that the fetus was a baby w/ a soul.
3) Were you adequately informed of the consequences of abortion? No. I was told of the bleeding + need for rest. Nothing of the psychological effects.
4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No
5) Did anyone pressure you into having an abortion? If so, who? Boyfriends - fear of telling parents, no support.
6) How has your abortion affected you? I spent years going from relationship to relationship + I became more sexually active, alienated from family, problems in school, old friends became distant.
7) How has your abortion affected others in your life? I drew others in eg roommate gave me the money against her better judgement. We spent years not talking to one another.
8) Based on your own experiences, what would you tell a woman considering an abortion? It is a self-destructing decision that pulls you into a downward spiral. Every aspect of your life is affected. You eventually feel tremendous guilt which you try to cover + compensate for and never can.
9) Based on your own experience, what would you tell a court that believes abortion should be legal? It seems like an answer to a difficult situation. As with most quick fixes, it creates tremendous psychological + emotional difficulties that overflow + stay hidden for years. In most cases continues into following generations if not addressed. God is the only answer at that point.

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? The only negative consequence I remember was being told that repeat abortions could cause difficulty in carrying future pregnancies to term.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? No If so, who? _____
- 5) How has your abortion affected you? Until recently I have been able to keep the fact that I have had 2 abortions hidden. But I have ~~carried~~ intense grief and shame that has manifested primarily in an inability to ~~get~~ form close relationships with anyone but my husband, who was the father. Though unproven, I believe the buried pain I carried figured in a clinical depression in 1988 with panic attacks and ongoing difficulties with responding sexually to my husband. ~~Until~~ I revealed my secret to my church and am now on the path to healing.
- 6) How has your abortion affected others in your life? When I told our 3 grown children, our 2nd son said he now understood why his dad & I fought & why I was so protective.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Don't do it! The burden of shame & grief & regret that will break through one day is not worth the "quick fix" to your current problem. Also the dangers to herself are well documented & it is not a blob of tissue being removed. It's a baby!
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? The court needs to listen to women who have experienced abortion and will always regret ~~the~~ the choice she made. Look at the volume of medical data now available. Remember that in America we have a right to life for everyone, including those who can not speak for themselves.

2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: The center never explained what kind of complications I would have. They never told me I would never be able to have children again.

4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No, I was not informed of the ABC link. I do not have breast cancer.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: June of 1989. Women's Health Clinic in Buffalo, NY.
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: The explanation of physical pain was greatly understated. The pain was so horrible, I had hoped to pass out to get away from it. It was awful.
3. Were you adequately informed of the consequences of abortion? Some of the possible physical risks. I was in no way prepared for the emotional spiral downward that resulted. The loss & emotional pain was unbearable.
4. Were you informed of any link between abortion and breast cancer? No
Have you had breast cancer? No
5. Did anyone pressure you into having an abortion? Boyfriend left relationship. He was not a part of the decision. I was alone and panic hit.
If so, who? _____
6. How has your abortion affected you? Initially, it was the cause of much depression, grief, loss, guilt, self loathing, crying and anger. After much counseling & research, I am now able to counsel other women to seek recovery & healing.
7. How has your abortion affected others in your life? It brought support & counsel. It has been used to help others have a better understanding of post-abortion women. Initially my family was upset for not carrying.
8. Based on your experiences, what would you tell a woman considering an abortion? Do not underestimate the emotional consequences you feel. Abortion does NOT mean you weren't pregnant - it just means your not pregnant now, and sooner or later you'll have to deal with that.
9. Based on your own experience, what would you tell a court that believes abortion should be legal? It is not a political issue, it is a personal experience. If we want to empower women, it should not be by legalizing something that takes a physical life and an emotional one. Someone needs to have the courage to take a stand and call abortion what it really is.

- 8) Based upon your experience, what would you tell a woman considering abortion? This is not something you decide to do spontaneously - Think it through - It will affect your life in one decision or another, will you be able to handle that decision?
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? How do you justify [later?] abortion when you punish murderers. It is murder. You are taking a life God created.

(Questions For WOMEN Who Have Undergone Abortion)

The State of PA

County of Monroe

BEFORE ME, the undersigned authority, on this day personally appeared Deborah Kerby (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: Spring 1987, Camden County NJ
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: No. I was told that the baby would not feel any pain. I was never informed that women, as well as men, often suffer grief and emotional distress after abortions are performed.
- 3) Were you adequately informed of the consequences of abortion? No. I was not informed of the possible side effects of abortion.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No and No
- 5) Did anyone pressure you into having an abortion? If so, who? No one pressured me. At the time, I was working in a bar and could not keep my job pregnant. The baby's father said he did not want the child, so I erroneously thought I had no choice. I had another child to support at the time.
- 6) How has your abortion affected you? For the rest of my life, I have to live with the knowledge that I murdered my child, and took away his/her chance to grow up and have a life of their own.
- 7) How has your abortion affected others in your life? Yes. The baby's father feels the same grief, sorrow and shame as I do.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? I would tell her what nobody told me - that there is another way. That there are people and organizations that will help you.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? The fact is that abortion is murder, and therefore should not be legal. I know some don't believe that an "embryo" is a baby - but if not, then what is it? Is it a fish or a bird? Can a pig become a human? No. It is a human child, and "I have read the above and foregoing statement and the same is true and correct." deserves protection under the law.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Aug. 1974, Polyclinic Hosp, HBG, PA
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No one can prepare you for the sense of loss and the shame and guilt involved with killing your child, even when it is referred to as a fetus
- 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 5) Did anyone pressure you into having an abortion? yes If so, who? the father of my baby did not want the responsibility of a child and informed me that I was on my own if I chose to have it.
- 6) How has your abortion affected you? I have 4 children who I gave birth to after my abortion. I finally realized that 4 million children would never replace that child whose life was vacuumed out of me. I would never have had an abortion if it was illegal, I fed into the lie that this was okay because it was legal. Abortion is not okay. It is murder and I truly regret that decision which ended my child's life.
- 7) How has your abortion affected others in your life? Shame, guilt and unforgiveness is caustic and surely not an environment to grow love and solid relationships
- 8) Based on your own experiences, what would you tell a woman considering an abortion? On paper it all looks good and legal, but this is a heart issue. Your heart will always hurt, and you will always regret that decision
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is murder - the murder of a baby. You can call it a fetus, but it is a baby. And because abortion was legal - I legally killed my child. My prison sentence has been a life of shame and remorse. Thanks!

my husband, experienced psychological consequences such as sadness, much remorse
- 8) Based on your own experiences, what would you tell a woman considering an abortion? I would explain that
abortion is murder and a sin, it is killing a living human being. I would help her or

4. Were you informed of any link between abortion and breast cancer? No
Have you had breast cancer? No
5. Did anyone pressure you into having an abortion? I felt pressured because I was asked if so, who? A question and not given the option to think about it and get back to Planned Parenthood w/ my decision
6. How has your abortion affected you? Is it not obvious that the trauma has not allowed me to remember many of the details surrounding the abortion
7. How has your abortion affected others in your life? I'm not sure
8. Based on your experiences, what would you tell a woman considering an abortion? I would give her the facts as the development of a fetus and I would share my personal bias if she wanted to hear it. Including the hemorrhaging that took place for 5 months not realizing baby parts were left behind
9. Based on your own experiences, what would you tell a court that believes abortion should be legal? Look at the facts abortion is killing. Listen to the stories from those who have had an abortion. - 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 5) Did anyone pressure you into having an abortion? Yes If so, who? the father of my baby + my friend.
- 6) How has your abortion affected you? I became very depressed for years. I didn't enjoy life. I would always cry when I heard a baby cry. I blocked the abortion out for 13 years. When the world brought what I did to light I was in a lot of pain. I couldn't even believe that I had done this. I had a pain in my heart I cannot explain. For years I was afraid of everything. I was never able to enjoy any pregnancy until I dealt with my abortion. I received counseling at a pregnancy care center and now I want to share my story so no woman will ever have to suffer the
- 7) How has your abortion affected others in your life? My parents missed out on another grandchild. My children lost a sibling. Our lives will never be complete. pain I had.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? I would tell this woman that this quick fix will bring eternal pain emotionally. This baby is a precious gift from God and she could consider adoption. Relationships will be affected. Her life will change forever.

Women do not realize what they will have to deal with after an abortion. We should support a woman to deliver her child + help her to raise her child, not to give her the right to kill her child.

- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: I was informed that my pregnancy was just a 'blob of tissue' and that the procedure was 'no big deal'. Never was counseling offered except to offer birth control. No one ever explained the emotional pain to come
- 3) Were you adequately informed of the consequences of abortion? As stated above (no-!) No one ever told me of the life time of pain, emotionally + physically. That everyday there would be an empty place in my life. + that part of my soul would be torn out.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? yes If so, who? My boy friend - the father of my aborted children
- 6) How has your abortion affected you? There is an emptiness deep in my heart. I suffer from flashbacks of the abortions themselves seeing the bloody tissue in the toilet bowl knowing that was part of my baby flushed down the toilet. I don't trust doctors - especially OB-GYN'S - unable to do for examines - I yearn to know my lost children + wonder about them often
- 7) How has your abortion affected others in your life? Broken trust in my relationship with the father of the children, + doctors.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? DON'T DO IT! That they are carrying life and there are other alternatives, adoption parenting help - ... - 9) Based on your own experience, what would you tell a court that believes abortion should be legal? The court nor society has the right to decided who lives or dies - Abortion is the death of innocent lives not only the unborn child but also the soul of the mother. That they as the court needs to be informed of the emotional devastation that occurs from Abortion + only one who has gone through can know. The killings must stop. - 1) Tell approximately when and where your abortion occurred: May 1982 Hillcrest Abortion Clinic Harrisburg, PA
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No, I never really thought of it as murder because it was legal, plus I had no idea it would affect my emotional well being so traumatically.
- 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 5) Did anyone pressure you into having an abortion? No If so, who? _____
- 6) How has your abortion affected you? My abortion has contributed to 4 psychiatric hospitalizations. I had such guilt and shame that I couldn't share with others because it was my dirty secret. It affected my marriage two years later to my aborted child's father. It was an unspoken loss & sin between us that eventually helped ruin our marriage which broke up after 12 years. It has also affected my relationship with my son because I now know that I murdered his sibling through having an abortion. It was the biggest mistake of my life.
- 7) How has your abortion affected others in your life? It has left my son without a live sibling because he/she was aborted.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Please don't do it. Abortion does not fix things it makes even more problems and can ruin your emotional/spiritual health.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? By making abortion legal it makes it appear that killing your unborn child is perfect alright and thus deceives people.

No. I was told I was pregnant by my Dr. he gave me 3 options & the phone # of Lutheran Womens Hosp. in Wth. all matter of factly. I didn't "feel" pregnant & it seem to me. It wasn't until months later that the whole prestatking experience sunk in.

Let's say the last 32 years were filled with pain emotionally, low self-esteem, poor relationship with family & friends never married & childless, distant myself to children, awake of what I did each "likely birth date, Oct. 9. Feeling worthless & not being able to forgive myself. To this day makes learning to love myself very hard and I know I am loved. The physical aspects are it had abortions that have my membranes & uterus glued together & numerous infections. At age 20 I can't say that abortion was responsible for my downward spiral of destructive life style that I am only now @ 53 putting back together.
- 7) How has your abortion affected others in your life? My family relationships w/ sister, brother & parents was strained for decades and still being worked on.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Please take time to realize this decision will affect the rest of your life. There are alternatives that will give more positive results in your life. You are not alone & you are loved. Don't do it!!!
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Killing children has caused our country to destroy itself. No life is respected in this country. We have killed our economic structure by killing our little citizens who grew up. Abortion kills Nations!

- 2) Were you adequately informed of the nature of abortion, what it is, what it does? No If not, explain: AT THE TIME, ALL I HAD WAS CLINICAL INFORMATION. THERE WERE NO DISCUSSIONS ABOUT OPTIONS, TIME TO THINK ABOUT, THE GUILT, REMORSE AND GRIEF I WOULD EXPERIENCE.
- 3) Were you adequately informed of the consequences of abortion? ABSOLUTELY NOT. ONLY RAMIFICATIONS DISCUSSED WERE PHYSICAL. NOTHING ELSE. "IT WOULD ALL BE OVER IN A FEW MINUTES."
THAT BLEEDING WE EXPERIENCED WAS LONGER THAN 3-5 DAYS: I BLEED FOR 22 YEARS OVER THAT DECISION.
- 4) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 5) Did anyone pressure you into having an abortion? Yes, who? MY BOYFRIEND, TONY, AT THE TIME I BECAME PREGNANT, WHEN WE DISCUSSED THIS, WE BELIEVED THIS TO BE THE ONLY OPTION AVAILABLE.
- 6) How has your abortion affected you? I "SHUT DOWN" EMOTIONALLY, REVERSED ANY SERIOUS RELATIONSHIPS BECAUSE I KNEW WHERE IT WOULD LEAD, DID NOT WANT CHILDREN, AND ERECTED "A WALL" AROUND MYSELF TO PROTECT MYSELF FROM ANY AND ALL KIND OF INTIMACY. I ALSO BECAME "A RUNNER," NOT ONLY PHYSICALLY, BUT EMOTIONALLY. I HAVE FLASH-BACKS OF MY OLD BOYFRIEND WHEN I'M WITH MY HUSBAND.
- 7) How has your abortion affected others in your life? THERE WAS A WALL BETWEEN MY HUSBAND & I THE FIRST 8 YEARS OF MARRIAGE. SEX AND INTIMACY WAS VERY DIFFICULT & UNCOMFORTABLE.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? DON'T EVEN CONSIDER IT! I SUFFERED FEELINGS OF DEPRESSION & SUICIDAL THOUGHTS, AND SUFFERED FOR 22 YEARS FROM THE EFFECTS OF MY ABORTION. I HAVE ONLY RECENTLY HAD A BREAKTHROUGH TOTALLY FROM MY PERSONAL RELATIONSHIP WITH JESUS CHRIST.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? THERE IS A BIGGER PICTURE AT STAKE, A BIGGER PRICE TO PAY THAN WE COULD EVER HAVE IMAGINED. IT TIME TO STOP SHEDDING INNOCENT BLOOD AT THE EXPENSE OF OUR SELFISH, "IF IT FEELS GOOD, DO IT" MENTALLY. - 1) Tell approximately when and where your abortion occurred: HARRISBURG, PA 1976? 75
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO, nothing informational, very vague terminology mostly about the procedure
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? X If so, who? not really pressure, just the information that was available and 'out there' that suggests that this was an 'easy' answer without repercussion - just a procedure! very deceitful!
- 6) How has your abortion affected you? a mental and emotional curse. when you gain the truth that you've taken a life, it's not easy to live with - it haunts me at the strangest of times. even though i know i have forgiveness, my thoughts of my child being lost is a very empty feeling, and the thought of it being my choice is even worse. in the process of "trying" to forget, i feel that my memory in all things has been impaired. one thing i've noticed is that in time, the feelings have not grown faint, but stronger, the opposite of what you'd expect. the affects of an abortion are not immediately felt i've learned, but they creep up on you as you mature and realize what you've done, much like a cancer, and the weeping does not last a nighttime, but a lifetime.
- 7) How has your abortion affected others in your life? i fully believe that my husband looks at me differently, i look at me differently and the only other (2) people who know i'd guess look at me differently... as probably i would if the shoe was on the other foot.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? not an answer under any circumstances. God is in control and he knows what he's doing. period - ...and even if he weren't, what this does to you physically, emotionally, mentally, and spiritually is devastating and i don't think we've even tapped into how deep!
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? all the above, where's your research? how many people who've been through this are pushing for its legality? i can only imagine that the only way to describe the feeling would be to ask someone what it feels like who has had their child kidnapped... never to return.

- 1) Tell when and where your abortion occurred: August 14, 1996 in New Jersey
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? no If not, explain: I didn't talk to any nurse or doctor or anyone at the clinic before the procedure was performed.
- 3) Were you adequately informed of the consequences of abortion? no. No one spoke to me at all about the physical or emotional consequences of the abortion before or after the abortion was performed.
- 4) Were you informed of any link between abortion and breast cancer? no Have you had breast cancer? no
- 5) Did anyone pressure you into having an abortion? no If so, who? _____
- 6) How has your abortion affected you? For several years after the abortion, the guilt and shame of what I did was overwhelming. Not a day goes by where I think of the child I would have and regret making the decision to have an abortion. I felt so ashamed and didn't think I could explain why because no one talks about the after-effects abortion has on women.
- 7) How has your abortion affected others in your life? my parents hurt for me knowing the pain I go through because of the abortion.
- 8) Based on your own experiences, what would you tell a woman considering abortion? I would tell her about the pain she is going to feel - the loss, the regret, the denial and would encourage her to not abort her child because it's a decision you can't take back later. The permanence of this decision is haunting.
- 9) Based on your own experiences, what would you tell a court that believes abortion should be legal? I would plead for more information to be given to women who want abortions. If they knew about the physical and emotional consequences, the court might not be so inclined towards the legality of abortion - it does so much more than end a baby's life.

AFFIDAVIT

THE STATE OF Pennsylvania §
COUNTY OF Dauphin §

Before me, the undersigned authority, on this day personally appeared Jody B. Diehl, (Print Name) who, being by me duly sworn, upon oath, stated the following facts:

My name is Jody B. Diehl (Print Name). My address is

 I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

August 11, 2003

My name is Jody B. Diehl. I found myself in a crisis pregnancy in September, 1971, at the age of 21. Abortion was not legal in 1971, so there were no Crisis Pregnancy Centers and neither were there any abortion clinics. I found out through a friend that I could have an abortion in a hospital. I do not offer any reason why the mutual decision was made for me to have an abortion. The truth is, no reason on earth justifies taking the life of an unborn child.

I can't remember how long it was before guilt began to set in, but when it did it was tremendous guilt, sometimes over whelming. I spent the next twenty-five years of my life harboring a deep dark secret. I never spoke one word about it to anyone. Twenty-five years of emotional torment, wondering what my family, my friends and eventually my husband and children would think of me if they ever found out that I had had an abortion.

(continued on back)

(continued from front)

In Feb. 1996, I was sitting in a church service. I don't remember what the sermon was about, but I do distinctly remember hearing the pastor say, "If you have had an abortion, you have committed murder." I am very thankful for those words spoken that day because they brought me to the reality of just exactly what I had done — I had taken the life of another human being. I called the pastor that very afternoon and made an appointment for the following day. And for the first time in twenty-five years, I was able to share with one other person that I had had an abortion. It would take another year, however, for me to find healing from my guilt.

One Sunday in February of 1997, one year later, I knelt at the altar and gave my abortion to God and received total and complete healing from my guilt. The pain and sorrow of regret over what I did will follow me throughout the rest of my life, but the guilt that Jesus took so lovingly upon Himself when He died for me on the cross was gone.

It has now been thirty-two years since my abortion and the memory has never faded. I can remember every vivid detail as if it were yesterday. I heard a statistic quoted that three out of every four post-abortive women experience grief. I beg to differ with that statistic. I strongly believe that every woman who ^{has} had an abortion and every man that is involved with an abortion will at some time in their life struggle with grief, regret, sorrow and guilt over taking the life of their unborn child. It may not all be to the same degree, but I believe it will happen.

Thank you for allowing me to share my story. I pray that all the testimonies gathered will help overturn Roe v. Wade. I pray that the holocaust of abortion will be stopped in our life time and that abortion clinics will be forever closed, never to be heard of again.

God bless your mighty efforts for this most worthy cause.

Sincerely,
Jody B. Diehl

In January of 1987 I had an abortion. This is not something I'm comfortable talking about. In fact, I have rarely talked about it. I try not to think about it because it is so painful. I am very ashamed of what I have done. Even after all these years, it brings me to tears when I allow myself to think about it. I have asked God for forgiveness and I know he has. It is a challenge for me to forgive myself.

I was twenty years old, newly married, and working a minimum wage part-time job. My husband did not think we were ready for a child. He asked me to set up an appointment for an abortion. It was a very scary time for me. I felt very alone. I tried to detach myself from what I was doing. I came from a small town so I had to locate a clinic in Pittsburgh, PA. They took down my name and number and scheduled an appointment. I really needed some one to talk to, but I didn't feel I could because in my heart I knew it was wrong.

My husband accompanied me to the appointment. When I arrived they gave me some paperwork to fill out. I was told I would need to speak with a counselor before they would perform the procedure. The session lasted less than ten minutes. The counselor was a nurse. She told me she had an abortion earlier in her life and never regretted it. I believe looking back on it now, that if she had been a qualified counselor, she would have known I was uneasy about my decision. I know that if I had been given any of the risk factors of abortion, I would not have gone through with it. I always wanted children and would never have done anything that might have jeopardized that. As it were, I did have some complications that day. I was sitting in the waiting room waiting to be released when I became very nauseated and had an increase in bleeding. I had to go back in to the Doctor and have my uterus suctioned out again, as if the first time was not traumatic enough. That complication pales in comparison to the mental pain I have suffered since that day.

I have never mentioned my abortion to any of my healthcare professionals. That probably isn't the brightest thing to do, but I cannot bring myself to admit to anyone, that I have done such a terrible thing.

God has blessed me with two beautiful children that I am eternally grateful for. I realize that some women who have had abortions are not so fortunate.

I know the trauma that I have been through as a result of my decision to have an abortion. I cannot even imagine going through it as a teen without the support of my parents. The idea that anyone would perform an abortion on a minor child without her Parents knowledge is very troubling. They require a parent's consent to administer any type of Medical treatment on a minor child. How can they begin to substantiate performing such a procedure on a child without a parent's consent? I know how devastating an abortion is and I would never want my daughter to go through such a life threatening situation without my support.

I have read the above and foregoing statement and the same is true and correct.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, that the following facts are true:

- 1) When and where did your abortion occur? Approximately 21 years ago in Harrisburg Hospital
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? (Check One) Yes No. If no, explain: I tried to ask the abortionist questions, I remember him acting as if this was a waste of time for him. I was young & desperate - I don't know??
- 3) Were you adequately informed of the consequences of abortion? no information at all - even when in the last moments before the abortion
- 4) Were you informed of any link between abortion and breast cancer? Yes No Have you had breast cancer? Yes No
- 5) Did anyone pressure you into having an abortion? Yes No If yes, who? I was not told anything either way
- 6) How has abortion affected you? Before getting help I really thought I was worthless. When I look back the moment I woke up after the abortion it was the closest feeling to being raped. I'm not sure why there was such a physical & emotional realization, it was like there was a loss of nature or primal instinct that had been interrupted. I layed there (hospital room) and cried & cried asking God to take me - there are really no words or a short way to explain what a agony it is. I just know even though I've gotten help I will not recover fully. Abortion is a horrible act that claims the life of two people.
- 7) How has your abortion affected others in your life? My loss of self hurt all my relationships. My children had to deal with my thoughts of suicide, depression
- 8) Based upon your experience, what would you tell a woman considering abortion? I would tell them "choice" means knowing more than one side. I would try and educate her about the reality of a abortion, about the child and herself.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell them that what's going on is a massacre unequal to any thing that's ever happened in our world, show them photos & testimony - they would have to see the mutilated bodies, also scientific evidence, these are facts not emotions

Continuation to:

Question (1)

the states of Maryland and Virginia.

Question (2)

the basic information I recall receiving was the length of time it would take for procedure, that I would receive a local anesthetic, there would be a short period of bleeding and possible cramping and that some slight pain may be involved. No warnings were supplied regarding possible long term physical problems. No warnings of any type were given regarding the emotional damage that abortion had the potential of causing.

Question (3)

I was never told of any link between abortion and breast cancer. This would have most certainly stuck out in my mind seeing that as I aged further into my teen years and began using birth control pills, the main reason I stopped taking the birth control pills was due to the fact that my physician spoke of a link between birth control use and increased risk of breast cancer. My mother has suffered from breast cancer in her early thirties and had a radical mastectomy.

Question (7)

the constant necessity for "swallowing down" the pain, and the nagging anxiety I feel each time I ride with my children and listen to news reports regarding abortion or abortion related issues. In addition, I have carried a great amount of anger toward others involved. I have also dealt with a gripping fear that my children will find out about my abortions before I am ready to tell them. Six children ranging from ages 12-24, I don't know how they will handle it.

Question (8)

It was thirty years ago at age 13, when I had my first abortion. I knew nothing of the procedure. The word was never spoken in my circle of friends and classmates. As I reflect back to that time, I realize that my first abortion preceded a teenage life of drugs, alcohol and subsequent abortions. I'll fast forward to the beginning of 2006 in which I came to work part-time for a human services organization. I "stumbled" upon this position after mentioning to a friend that I was interested in working just a few hours a week to supplement my family's income. The next week, my friend handed me a flyer announcing a position as secretary/bookkeeper, ironically, at a crises pregnancy center. After working for the center for several months, enjoying my interaction with the women who came in for help and feeling a strong urge to pursue volunteer peer counseling, I attended their next scheduled training. I sat through the second day of my initial week of training ashamed, panicky, and angry as I listened to the day's speaker describe in great detail the abortion procedure so that the trainees could understand the trauma experienced by the post-abortive woman and be better equipped to counsel her. None of the five new trainees that I sat with knew that I was post-abortive and I was ashamed to tell them. So after squirming through that day and the next (in which the speaker introduced our post-abortion recovery program) I knew that I desperately needed healing from my own experiences. Another aspect of the training is that you shadow several veteran peer counselors in order to glean additional knowledge. As I sat in on the first meeting, the young woman who appeared to be just a few months along was given the opportunity to choose a video to watch (as part of our prenatal program). The video the client selected showed life in the womb beginning from just a few weeks to nearly full term. By working at the center as regular staff, I had already been exposed to pictures on brochures of developing fetuses. Until that day, I had never viewed any *films* on the subject. As the film began I gasped as I witnessed a fetus approximately 5 weeks old nearly completely formed. I saw arms, fingers, legs and I even saw a beating heart. As the client made various comments about the film, I held back

Question (8-cont'd)

the tears because I could no longer possibly deny what I had done. At my own hand, my children were gone forever. After several minutes passed, the client, visibly amazed at what she was witnessing commented, "That's why I can't see how a woman can have an abortion." My silent response was "If I had only known." You see when I was thirteen, I remember sitting in parent's room, listening to my mom's sobs as she said to me, "Don't you want to know what it looks like, whether it's a boy or a girl (please keep in mind that *they* had made the decision for me to have an abortion)? My father interrupted her and said "it's too early for that. Right now it's just a blob of tissue. It hasn't formed into anything yet." Right or wrong, I believed him. Maybe I wanted to. And except for her tears, my mom was silent on the subject from that point on. I have no idea of whether my father's words had successfully convinced my mother as they did his thirteen year old daughter. So when the session ended with the client it bolstered my resolve to reach these women with the truth in as compassionate and loving ways as possible, but no less the absolute truth about abortion.

When Andrea Yates killed her five children and Susan Smith her two little boys, the public used terms such as horrific, brutal, sick, and even demonic to describe the deeds of these ladies. Yet over one million babies are murdered each year, and yet because we have not seen these children smile, or speak their first words, or come to us for comfort, the terms we use for their murders are a woman's right, pro-choice, tolerance. Please explain to me how a matter of days can devalue the life of a child so much?

Ladies and Gentleman, all I have left of my aborted children are tears, regretful memories, and their certificates of "life" given me during their memorial service. Yes, it was my choice, indeed one I will look back on with great sorrow and regret. But I implore you to carefully consider. I assume that most of you are probably well educated. You received this education through hard work, through study of course materials, through dedication to learning particular facts about your field of study. I can probably also safely assume that most of you have never dedicated an hour of your busy lives to visit a pregnancy care center. If you have done this, I sincerely apologize for my assumption. But for those of you who have not, maybe one day you can visit, sit down with the director or a counselor and ask them what goes on in the mind of post-abortive women who call or come to the center to seek help. I'll tell you this much—she struggles to reconcile in her mind how she could have possibly taken the life of her unborn child. She is a woman whose existence is tormented by the fact that this death of an innocent person was one that she herself could have prevented. And I don't care how many children she has after her abortion(s), they will never replace the child or children she lost. Her arms will always feel a little emptier. No amount of comforting words or passing of time will change this. Unfortunately, I speak as one with first hand experience. And I truly believe I only maintain my sanity because of God's forgiveness.

Thank you for allowing me to speak.

- 1) Tell approximately when and where your abortion occurred: June 1998, Women's Center, Allentown, PA.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?
At the time I thought so. Now I wish other options (adoptions) were presented to me.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? NO If so, who? _____

- 5) How has your abortion affected you? I often feel ashamed + disappointed in myself. At the time of the abortion I fell into deep depression and abused drugs + alcohol to ease the pain. I don't remember much of that year except feeling very dirty. The next year I went to a check up + they found some cancerous cells on my cervix and did a LEEP. I then met my current husband who I had a relationship with 8 years prior to this. He introduced me to the Lord, + taught me many
- 6) How has your abortion affected others in your life? 2 older children watched me in depression + abuse drugs + alcohol they were 7 years + 9 years old at the time they still don't know. I ended the life of their sibling. I feel this is a black in our relationship.
- 7) Based on your own experiences, what would you tell a woman considering an abortion?
You may be able to rid this pregnancy, but you will never get over the depression that comes with ending the life of your baby not just your baby but also God's baby. He created it maybe not for you maybe for someone who can't have their own.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal?
This is murder. The same one who created the earth + everything on earth including us has a purpose for each being. He creates He allows our bodies to conceive the baby. It should not be our choice to destroy His creations. The consequences women suffer as a result of abortion far out weigh giving birth + life to a baby.

just many sex partners. Either way I
believe it was God's way of punishing me.
Our baby is a year old and I'm pregnant
again. It is scary because I worry
about my body's ability to carry the baby.
Almost every day I think about the
baby I never gave the chance of life
to, I will never get over this loss
it will always be a part of my life.
And I am so sorry I made the wrong
decision & no one was there suggesting
something else. God gave me the opportunity
to share my experience with a friend who
was considering an abortion, I cried to her, and
begged her to reconsider, she went through
with it, now I feel some responsibility for
that lost baby too. What do I do about that?

1) Tell approximately when and where your abortion occurred: 1981 Melrose, Mass

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO I was not informed about the procedure what it does or could cause complication in the future if I wanted to have a baby.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No I was not informed about the link with breast cancer and no I have not had breast cancer.

4) Did anyone pressure you into having an abortion? If so, who? NO I was not pressure by anyone to have this abortion.

5) How has your abortion affected you?
I became precaputy with becoming pregnant again. A year later I did become pregnant and had a miscarriage. Is there a link to the adortion and my miscarriage. I do not know. I do know I was never able to conceive again.

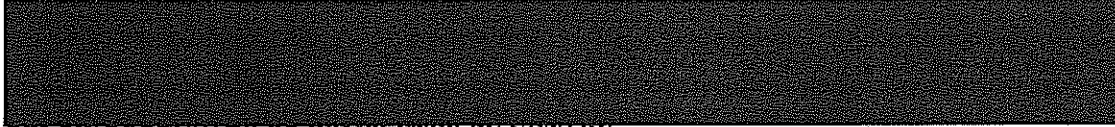

6) How has your abortion affected others in your life? About four months ago I started to tell people what I had done. They were very sad to hear.

7) Based on your own experiences, what would you tell a woman considering an abortion? Abortion is not the way to go. No matter what is going on in your life. Don't kill your baby. Give life to your child. There are so many family that are willing to adopt your baby and give you a good home.

8) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion is wrong. The lost I feel for my baby is over whelming the heart afe. My baby was a life that I killed and I live with that everyday. I will never know the joy my baby could have added to my life. Was my abortion the reason why I could never have any more children you tell me. I will never know.

BEFORE ME, the undersigned authority, on this day personally appeared Shereen H. Carpenter (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: An abortion clinic in Providence in July of 1983
- 2) How has your abortion affected you? It has been 17 yrs and I still cry. I always look for ways to somehow give my baby life, miscarriage, etc... I am psychologically damaged forever. There will always be a void in my heart.
- 3) How has your abortion affected others in your life? It put a major strain on our marriage. For the longest time, I wanted my husband and blamed him. My children have seen me cry and they don't have their brother.
- 4) Were you adequately informed of the consequences of abortion? no, all I was told was that it would be over quick and never had to think about it again.
- 5) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: no, not at all. It was like an assembly line, you pay, have blood work, kill your baby, get birth control and sent on your way. It was cold and heartless. They said nothing.
- 6) Based on your own experiences, what would you tell a woman thinking of having an abortion? I would tell her that if she does it, a little part of her will die too along with her baby. It may take some time but she will grow this loda for the rest of her life.
- 7) Based on your own experience, what would you tell a court that believes abortion should be legal? Having abortion be legal is allowing innocent babies to die and women to suffer from PMS for the rest of their lives. You never truly & fully recover. You are psychologically damaged for the rest of your life, there should be a law to protect you from yourself.
- 8) Did anyone pressure you into having an abortion? If so, who? yes, at the time my boyfriend wanted the abortion because he didn't want his parents to know because they would be disappointed.
- 9) We you informed of any link between abortion and breast cancer? Have you had breast cancer? To this day I didn't know of any link between the two and so I have never had breast cancer.

8. Based on your experiences, what would you tell a woman considering an abortion? that a child is a gift from God and that if we choose to "kill" that gift, we are killing ourself literally and it is not something that will conveniently just go away - it will affect your whole life and possibly your health and ability to later have children

The Bible (The Word of God), and now modern ultrasound machines PROVE that LIFE begins at conception, despite what our modern culture, based on self-abortion, would have us believe.

(Questions For WOMEN Who Have Undergone Abortion)

The State of North Carolina

County of Mecklenburg

BEFORE ME, the undersigned authority, on this day personally appeared Sherri L. Brown (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: March 31, 1989; Volunteer Medical Clinic Inc., Tyson Medical Complex, 313 Concord St., Knoxville, TN 37919
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: I don't believe anyone who has an abortion is "adequately" informed. It was explained to me in such a way that it seemed I was merely removing a growth of tissue; the long-term effects were not discussed at all, and adoption was only mentioned in passing.
- 3) Were you adequately informed of the consequences of abortion? Only the physical aspects of the 1st week post-abortion was discussed. No one mentioned the emotional, mental, spiritual trauma that accompanied the abortion.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No and no.
- 5) Did anyone pressure you into having an abortion? If so, who? No one pressured me into or out of the abortion.
- 6) How has your abortion affected you? See attached pages please.
- 7) How has your abortion affected others in your life? It has changed the way I look at and interact with people, hardened me in some ways, driven out of me thoughts and feelings, reactions I wouldn't have had otherwise.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? I would tell her how it affected me, and offer to adopt her baby. I would tell her to listen to the voice trying to tell her not to do it, telling her it's wrong.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Compared to the number of women who died as a result of "back-alley" illegal abortions years ago, the millions of babies killed and the women who've died, gotten breast cancer, become infertile, suffered mental illnesses, and all the rest of the story to abortion, it is not worth the price of human life.

Question: How has your abortion affected you? What a question. Forgive me for making this so long, but I must say this. I can attest to this issue from two perspectives- both as a non-Christian, and as a Christian. I was not a Christian when I had the abortion, was 19, and single, and had gotten pregnant as a result of an all-night strip poker party at the apartment I shared with a female roommate. Not exactly a love story, to say the least; certainly an accident. When I found out I was pregnant I did not have a job, I no longer had the apartment, and I had absolutely no idea what to do with myself. I was completely lost. I don't remember thinking about being pregnant very much or very often. I just remember panic and depression, shock, utter despair at the thought of an embarrassing pregnancy. The thought that I had a life inside me did not really occur to me, so lost was I in my selfish despair. I didn't want the embarrassment, the inconvenience, the shame of being an unmarried mother. I reasoned that I was too young to have a family, and since I had no source of income, no place to live (long story), and was confused in absolutely every way a person could be, that it was the only logical solution.

I asked the thoughts of two friends; one said she didn't know what I should do, and the other offered to loan me the money for an abortion, a place to live, and a job, as a nanny to her two children. I took her up on it. She and her husband offered me what I thought I needed at the time, and I made the necessary arrangements. It seemed so simple. Little did I know the cost. It was so much greater than the \$300, \$150 of which I had borrowed from friends. The other half came from the "father" of the baby.

On March 31, 1989, we (the father and I) went to the clinic in Knoxville. I don't remember walking in, and I don't remember walking out. I do remember going into a room where there were a lot of women who, like me, were looking everywhere except at each other. The "counseling" session lasted about 15 minutes, and consisted of a short video which showed a tiny little mass of cells and explained to us that those cells were not actually living tissue yet, and those cells were not actually considered a fetus, but an embryo, which had no nerve endings and could therefore not feel any pain. The video all but congratulated us on making a mature, responsible decision, and further summarized the simplicity of the arrangement and the serenity that would come with knowing that we did the right thing for us at the time.

On that day I did the single most horrific thing I have ever done in my life. How did it affect my life?

At first, I had to make some choices. I had to decide if I was going to give in to my near madness the night I came back from the clinic and the couple for whom I was a nanny left me with the colicky 3 month old baby girl. Weak and sickened, I had literally crawled up the flight of stairs to my room. I'd laid down on my bed and stared at the ceiling. I was hurting physically, having menstrual-like cramps, and was mentally drained. I don't remember thinking about anything at all. The woman I worked for yelled up the stairs to see if I was okay, and I told her I was fine. Then she told me she and her husband were going to a bar in town because the baby would wake up soon for her nightly 3-4 hour crying colick time, and they "couldn't listen to it tonight." So, I worked my way downstairs and laid down in their bed, next to the bassinet to await the waking of the baby. The three-year old daughter was watching tv.

Sure enough, the baby woke up and began her nightly ritual of inconsolable crying. I sat, holding the screaming infant for three hours until she finally calmed down enough to take a bottle and go back to sleep. I cried silently and went to bed thinking that was what I got for doing what I'd done that day.

Within weeks I'd all but forgotten about the pregnancy. My life moved on, I found work, got a new apartment, and on the surface things had gotten better. However, I'd still not faced the

reality of the "choice" I'd made. I began therapy for depression the next year, and in September of 1991, still in therapy, I came to remember that I'd killed my child. The therapist had me write a letter to the child that I had, "committed to the universe," which I did, and one night I confessed what I'd done to my best-friend-at-the-time, by reading her the letter I'd written to my dead child. She cried with me and held me while I told her I was a monster and unforgivable.

My friend did the best she could to console me, and eventually helped me to calm down, as I was in hysterics by the time I'd finished reading the letter to her. To say that the ugliness of what I'd done hit me would be an understatement. Finally, I was confronting the truth about what I had done. Finally, I was grieving for the loss I'd inflicted on myself and my child. But there still was no relief from the agony I was experiencing. I was restless, agitated, depressed, out-of-sorts. The therapist offered a worldly view of what she considered sound advice for the grieving, and eventually I came to grips with it by reasoning to myself once again that it was the "right thing to do for me, my life being what it was at that time." It worked for a while (again).

I found out I was pregnant in November of 1991. Still single, I was determined to face this and "do the right thing." I was going to keep this baby. No question. I knew in my heart of hearts that there was no way I could endure again what I had been through with the abortion. I knew that no matter what happened, it could not be worse than what I went through because of that.

When my daughter was born, I found a new life in motherhood and the business and chaos it threw me into. It was a hard but blessed, precious time- the time I had with her by myself. While I struggled financially, emotionally, spiritually, and even physically to do everything that I had to do to do my best to bring this child up "right," I was determined to do that best I could. I had peace that I'd at least done the right thing by her. There was no question, no doubt.

I became a Christian on June 19, 1994. Since then I have married a wonderful man, become a stepmother to a daughter, and have been what most people would think of as "successful" in just about every way- financially, emotionally, physically, spiritually. Am I at peace with what I did on March 31, 1989? I don't know that there is ever peace for something like that. But I can look on it in a different light now. I can see that I was a sick person, and that I behaved in a way that is consistent with what society tells women. I believed the lie that is abortion. I believed it because it seemed easy and convenient, it seemed harmless and a one-time solution to a lifetime problem. While I can never say that I am glad I did it, I can say that I have learned from it, and the fact that I have survived it thankfully to God, with my sanity (I think!) and my health. And the experience has taught me how to be more sympathetic and understanding to those who are without a relationship with God. It's a sad, meaningless, lonely place to be. I know, because I was there. While I have experienced God's forgiveness for the murder I committed, albeit a legal murder, I have struggled ever since then to forgive myself. The thought of the child I killed is never far from me. And I have March 31st of every year to dread, and will for the rest of my life. Do I still feel guilty? Yes. I still AM guilty of abortion. I'm forgiven, but still guilty. Some things you can't take back. Life is one of those things.

Did abortion cause all my problems? No. Did abortion solve **ANY** of my problems? A *resounding* NO!

Often in the years since the abortion, I have wondered about the Holocaust. I've wondered about the monument that is a pile of shoes representing the persons killed in the Holocaust. And I've often thought about how tall the pile would be if we were to stack one baby shoe for each person killed by abortion.

I've also been angered more and more by society and the so-called women who preach "choice" "independence," and "reproductive freedom," which are both misnomers for the lies and

destruction that abortion is, and leads to. I label abortion as a lie. It is the most horrible thing we face on this planet today. I believe that with all my heart. To tell women that it is okay, it is legal, it is even EXPECTED and (shamefully) CELEBRATED- that we have the "right" to kill their own unborn children is a horror that should shame every person to tears and action. We are supposed to be the country that leads the "free world," yet we preach to our women, to mothers, that we have the "right" to take the lives of our own children. It is abhorrent, and it incenses me. Not just that it is legal; what makes me most angry is that we women BELIEVE the lie that is abortion. It is shameful, and it absolutely makes me embarrassed to be a woman. Our bill of rights states that all men have the "right to life, liberty, and the pursuit of happiness," and yet we continually, day in and day out, take the lives of those unfortunate enough to be conceived by persons who are too selfish to see what they are doing, and those too ignorant to understand the effects this is having on those of us left to live out the rest of our lives in longing for the ones we've lost.

If abortion had not been legal when I was faced with this "choice," my children would have another sibling. I would have more than my one birth daughter's arms to hold onto, more than her hands to teach to fold in prayer at bedtime, more than her voice and that of my stepdaughter's to say, "I love you, Mom."

No wonder our young people kill each other. Life is nothing to their parents. Why should it matter to them? Nobody talks about abortion because it is shameful and wrong, and everyone knows it. And no one admits to having done it, for those same reasons. People don't want to talk about it for fear of inciting those few loud-mouthed women's libbers who are hell-bent on pushing their agenda at literally any cost, while millions of babies are being flushed, incinerated, and even worse, used in scientific experiments for profit.

How has abortion affected me? It has broken me, taken me to the brink of madness; it has destroyed a part of myself that I will NEVER regain. It has affected every aspect of my life in a negative way. It has been a cruel cancer to me for which there is no cure. Yes, I survived it, but at what cost

God help us all.

I found myself pregnant and unmarried in the Winter of 1970. Our family was very visible in our local church. At this time in history, being an unmarried, pregnant young girl was one of the worst things that could happen to you. My boyfriend would have married me, but my Mother knew that everyone would know why.

I made the choice to terminate the pregnancy. Abortion was not legal in South Carolina at that time, so I called an abortion clinic in New York and scheduled a visit. I borrowed the money to pay for the procedure and plane tickets for my boyfriend and me. No one knew about the situation except me, my mother, my brother and sister, and my boyfriend. My mother did not tell my father and I have never been able to figure out why. He went to his grave never knowing what I did.

I went to a clinic located at White Stone General. That is about all I can remember about where it was. I was not told anything about what the procedure would be like or the risks involved. I was offered a chance to change my mind, but that was about it. No one told me what was being done to me or why. The clinic was a cold, unfriendly place, and the people there made me feel as though I was at their mercy.

I did not have a clue what I was doing. If only someone had taken a few minutes to show me how my baby looked at 12 weeks; that his heart was beating, that he could feel pain, that brain waves could be measured, that he had ten little fingers and ten little toes. I thought that he was just a blob of some kind. There was no counseling about any other alternative, such as adoption. And most important of all, there was nothing said about the risks involved. I could have died at that clinic, left with baby parts still left inside or a perforated uterus. If I had known these things, I would not have taken such a chance with my own life even if I didn't care about the life of the baby.

I left the clinic and returned to South Carolina, telling myself that all was right again; that I could get on with my life because this little problem was taken care of. A year later, I married my boyfriend and I became pregnant right away. Our daughter was born in 1972 and another daughter was born in 1975. I still refused to let myself acknowledge the horrible thing I had done. My husband and I never mentioned it again.

In 1995, an incident happened to me that brought the whole abortion issue back into my mind. I could not put it back deep inside my head where I had safely stored it for 25 years. It became a demon that totally dominated my life. I began to drink very heavily. My life was coming apart a little everyday. I told my husband that I could not live with myself any longer. I was a monster who lived with a secret that I was terrified of someone finding out. I decided that I deserved to die. What right did I have to live when I had so easily murdered my own child? The pain that came from the reality of knowing what I had done was something I cannot describe. I began to plan my suicide, even telling my husband of my intentions.

My husband pleaded with me to seek help by talking with someone. But how could I tell another person and risk that everyone in my small hometown would hear about it? The thought paralyzed me. But I was still sane enough to know that if I did not do something.....there was no happy ending to this scenario. I sought counseling with a wonderful Christian psychologist in a neighboring town. She lovingly worked me through the steps of dealing with the shame, the overwhelming guilt, the hatred for my mom and sister, and the acceptance of responsibility for my choice.

When I look back over my life, I can say without a doubt that having an abortion is the worst mistake I have ever made. I thought since it was legal, surely it must be okay. But I certainly know better now. Women who are considering having an abortion should be given every available fact before they make their choice. The abortion industry is all about money, with no thought about the women and babies whose lives are destroyed. Based on the number of abortions that have been performed in this country, I can understand why the family unit is having a hard time surviving. If every woman that has had an abortion has been through the guilt and depression I have, what else can we expect.

I only pray that I will see Roe v. Wade reversed during my lifetime.

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. It was compared to a miscarriage only. Both were presented as a mild surgery & no consequences. I was sent home same hour & the drive home being 3-400 miles away.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? Yes If so, who? My parents & father of unborn
on first abortion. Father of unborn on second one. Actually
counselor at clinic for second one encouraged me not to have it!
- 5) How has your abortion affected you? There is barely a day that goes by that I don't think about it. I have asked for forgiveness of it from God, but in my heart, I cannot forgive myself. So emotionally I still have an open wound. I drive to work each day by where the first one occurred. I am blessed that I did marry the father of the second one and have 2 children. But that ended in a divorce and I have never had a successful relationship since.
- 6) How has your abortion affected others in your life? My parents & I don't speak of it. The father of the first I don't believe ever had children. The father of the second ended up in an accident to be permanently housed in a nursing home & wouldn't remember this.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? That the fetus is a person. And you don't want to rob that person of life. I am adopted & found my birth mom to find out I was almost aborted in 1962. And I so, so love my boys that I did have.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? #7 what I answered. My sons do not know of my having abortions. But they at an early aged teen, knew this to be murder. And I didn't persuade them. They just knew that life begins at conception. - 1) Tell approximately when and where your abortion occurred: March 1987, Billings, Montana, Planned Parenthood
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? no - I was not told about any consequences - the clinic referred to ~~the~~ the baby as "the pregnancy" not as a child

- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would tell them that what seems like an easy answer will affect them the rest of their life. I would say that they are carrying a life, not a choice & the only right choice is to give their baby life.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would say that laws should exist for the purpose of benefitting society & that legal murder of babies is detrimental to the entire United States - the "right" to choose to end life is a poor argument for allowing this genocide to continue in our country.

OCTOBER 1994 DR. BUCK WILLIAMS OFFICE IN SIOUX FALLS, SD

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?

NO
I WAS ONLY INFORMED OF THE MEDICAL RISKS AND WHAT THE PROCEDURE INVOLVES. I WAS NOT INFORMED OF THE ABILITIES OF MY UNBORN BABY OR THE EMOTIONAL LONG TERM EFFECTS NOT SHOWN AN ULTRASOUND.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer?

I WAS NOT INFORMED OF ANY LINK BETWEEN ABORTION AND BREAST CANCER. I HAVE NOT HAD BREAST CANCER.

4) Did anyone pressure you into having an abortion? If so, who?

YES MY MOTHER AND THE SITUATION I WAS IN. I WAS DIVORCED AND HAD A BABY WHO WAS JUST OVER A YEAR. MY MOTHER CALLED ME A DISGRACE TO THE FAMILY. I FELT THIS WAS MY ONLY OPTION AT THE TIME!

5) How has your abortion affected you?

AT FIRST I EXPERIENCED AN IMMEDIATE FEELING OF RELIEF FOLLOWING MY ABORTION. I THOUGHT IT WAS OVER SINCE THEN I HAVE EXPERIENCED MEMORY REPRESSION FOR ABOUT 10 YRS. LAST OCTOBER 2004 IT ALL CAME TO THE SURFACE AND I HAVE EXPERIENCED A LOT OF GUILT, SADNESS, ANGER, HURT AND WHEN OCTOBER COMES IT MAKES EVERYTHING ESPECIALLY PAINFUL BECAUSE IT IS THE ANNIVERSARY. I HAVE

7) Based on your own experiences, what would you tell a woman considering an abortion?

I WOULD SAY IT IS NOT YOUR ONLY OPTION, EVEN THOUGH IT MAY FEEL LIKE IT. AFTER HAVING TIME TO REFLECT ON THE EXPERIENCE I WOULD SAY THAT ADOPTION IS THE ANSWER. TO GIVE SOMEONE ELSE THE GIFT OF LIFE IS THE MOST LOVING ANSWER AND A WIN WIN OPTION.

8) Based on your own experience, what would you tell a court that believes abortion should be legal?

I WOULD SAY THAT HAVING AN ABORTION HAS LIFETIME EMOTIONAL EFFECTS NOT TO MENTION PHYSICAL EFFECTS. IT CREATES MORE PAIN IS THE MOST HAUNTING HURTFUL DECISION A WOMAN CAN MAKE. ABORTION IS AGAINST WHAT GOD WANTS BECAUSE EVERY HUMAN LIFE IS SPECIAL. I WOULD ALSO SAY I MISS MY SON OR DAUGHTER EVERYDAY OF MY LIFE.

In 1978 I became pregnant and went to my psychologist to seek advice. He told me to go to Rapid City and get an abortion. I was never told that my baby was really a baby, I was never told there would be pain, nor was I told that I would go through years of regret and mental anguish as a result of the abortion.

One day I silently slipped away and had my abortion. It was an easy enough procedure but it was after the abortion that I experienced the nightmare.

It was a few days after the abortion that I experience excruciating pain. I have never experienced such pain. All the muscles in my lower abdomen were agonizingly wrenched. There were no amount of pain meds in my medicine cabinet that would even touch the pain. I managed to call the doctor who preformed the abortion in the middle of the night. It was then that he told me that this could happen. I had told him what meds I had already taken. His advice to me was to take more. I was not concerned about over dosing, because at that point I had to do something and I didn't care!

I got through the night and the pain slowly subsided. I stayed in bed all the next day. I had absolutely no strength, every ounce of had been used. It was days after that I finally began to regain my strength.

I lied to the father of the child, saying I had had a miscarriage because I was so ashamed of what I did. Year after year I kept my secret and year after year I suffered not only the pain of losing my child but the guilt and shame of what I had done.

I cannot tell you the mental anguish that that abortion had on my life. To this day, I have only told a select few. I have had no formal counseling because I am too ashamed. This area is where great danger lies. Women who stuff, who appear to be healed going on with their lives, yet inside still carry the wounds and scars of killing their child. We who have had abortions have chosen to kill our children. We understand, too late, what we have done. I must live with the fact that I chose my reputation and my social appearance over the life of my child. It was my choice and I regret it to this day.

Even though my abortion was in the first few weeks of pregnancy, there was still a connective ness with the baby within me. Whether a physically formed baby is visible or not, it is a real baby and we (mother and baby) were connected.

I often wonder if it was a girl or a boy. I wonder if I would have had other children if this baby would have been allowed to live. My life would have been so different. I could have lived honestly amongst those who love me. However, even after 27 years I hide my secret.

I more than likely will never be able to prevent woman from getting an abortion, due to my concealed shame, however I can help by asking you who are the governing body in South Dakota, to make it mandatory for doctors to tell woman the facts and what they may encounter before the abortion.

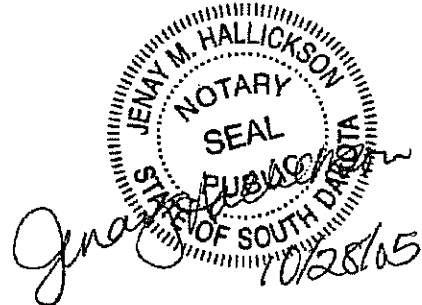

If I had known that my tiny baby was a real living life – I would not have done it.

If I had known of post abortion excruciating pain levels – I would not have done it.

If I had known the mental anguish, guilt, and shame involved – I would not have done it.

If I had known that someday I might have to disclose my terrible secret and be publicly disgraced and humiliated – I would not have done it.

Women have the right to know what will happen to them.

1) Tell approximately when and where your abortion

occurred: 1978 March - Omaha, NE

2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?

Not at all. No literature was giving to me. No explanation of the procedure or any side effects. I was told it was a safe procedure.

3) Were you informed of any link between abortion and breast cancer? Have you had breast cancer?

NO

4) Did anyone pressure you into having an abortion? If so,

who? I felt that I would tar our family name so it was a definite pressure in that arena. I also felt pressure in the relationship that I was in. Also, the pressure to 'succeed' in life did NOT include having a baby.

5) How has your abortion affected you?

I was in a downward spiral for about 6 years afterwards. I was involved in heavy drinking, promiscuous sex. I didn't know how to get out of everything I was doing - I felt trapped.

6) How has your abortion affected others in your

life? My husband has put up with me to a degree where I have a hard time showing my affections, my intimacy. It took a long time into our marriage where I realized he wasn't going to leave me. Because after my 'experiences' all my boyfriends left me.

7) Based on your own experiences, what would you tell a woman considering an

abortion? KNOW THE FACTS, CONSEQUENCES, ALTERNATIVES/OPTIONS. Get an ultrasound! Once a girl is told the "TRUTH" more than likely she chooses to carry to term.

8) Based on your own experience, what would you tell a court that believes abortion should be legal?

Back in 1973 we didn't have the technology such as ultrasound machines, etc. Now that we "see" this baby, moving, heart beating, sucking thumb, how can we as a NATION continue to rule that this is not a life. There is too much evidence to ignore - We must reverse this decision that was made in 1973. With all of the advancement of technology that we have, we simply have no excuse to continue the onslaught of human lives.

5) How has your abortion affected you?

As I have come to my senses with the reality of the decision to have our baby removed from my womb, the affects have ran deep - piercing into my physical, mental, & spiritual being. Dealing with the truth is essential to healing, however, the repercussions unavoidably continue to be experienced.

6) How has your abortion affected others in your life?

Only they alone can answer that - However I have not worked through this for 25 some years as husband & wife, shared this truth with our 3 sons, our families, our best friends & community without knowing the great loss to all involved - knowing how this decision has brought consequences to all.

7) Based on your own experiences, what would you tell a woman considering an abortion?

I have done what you're thinking strongly of doing. Please share with me what's going on inside of you. Would you allow me to share with you the dears of where this seemingly simple and quick solution will lead you?

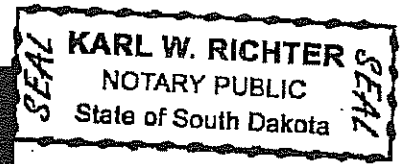

8) Based on your own experience, what would you tell a court that believes abortion should be legal? According to the highest authority of our land (Declaration of Independence, Constitution),

the highest duty of those in delegated positions of authority is to uphold life. It is the unalienable (not transferable ... example - to women) right of every child, of every human being of every developmental stage & race & creed & color. Because those in powerful places of authority put their stamp of approval on women choosing death, I entered a realm which no woman should tread & of which I would never escape - so horrible, so real, so near was the smell of death.

As a member of this court, you are in a powerful position to make a significant difference in redirecting our country and state to just standards. You have an opportunity and a responsibility to lead us down right paths. May you continue to faithfully uphold the right and not seek to compromise it. My Story of Abortion

How can I even begin to put so many emotions on paper? I guess I should start by saying, when I was 21 I had an abortion. Years later I have found out "it" did not only affect my life but also the lives of my parents. I have remained silent about my own feelings because I did not think my family wanted it any other way. Now, I know differently and I am ready to talk.

When I was 20 I was hospitalized with an eating disorder that I had kept a secret for 7 years. I was 5'4", 108lbs. I had lost over 40 lbs in less than eight months. My body was in terrible health and my mental state was not the most stable. I was emotionally immature and very much dependent on my parents. After my stay in the hospital, I was allowed to return to college and my boyfriend. I continued therapy where I lied one after another. I had not changed my behaviors. The following Fall I changed colleges while my boyfriend stayed at my previous school. Two weeks after our last weekend "together", I found out he had been sleeping around on me. Since we did not always use protection and sex was a new thing to me, I went to the school nurse to be tested for any sexually transmitted diseases the next week. Before we even got around to test for STDs, I was given a pregnancy test. The nurse told me I was just pregnant. It was very light on the strip but after blood work it was definite! I was so shocked and afraid! I called my ex-boyfriend and told him he needed to come see me right away. The only way he would come was for me to tell him on the phone. He came and we talked about what we should do. I thought we were certain we'd get married. After having "make-up sex" again that night I asked a stupid question. I asked, "If I had an abortion but you could never see me again or get married what would you choose?" Of course his answer was to never see me again. Once again I was shocked and afraid.

The next morning we woke up and went to my parents home. We told my mother before my father came home. I guess we were hoping she would take the news better. Still thinking we would get married and have a baby, we all went together to his home to tell his parents. His mother insisted I have an abortion because I was NOT going to ruin her son's life! As he and his father sat there not saying a word, my parents grew furious. My father said "let's go" and on the way out Dad told my boyfriend "I hope you grow up to be more of a man than your father." I will never forget the words or the last looks I ever saw on their faces. Once again, I was shocked and afraid.

We went home to a whole new ball game. My parents were willing to support me no matter what. However, it was clear to me after a long conversation at the breakfast table what they wanted. The words that stick out to me most were "THEY will have to be a part of OUR lives forever, your body is in no shape to carry a baby so what if the baby has health problems and having this baby will change ALL OUR lives." The idea of having a baby and giving it up for adoption was not an option for me. I knew if I delivered a child I could never give it up.

The decision was made but I had to wait. I was only three weeks pregnant and I had to be eight weeks to have an abortion. I returned to school to wait. It was a miserable time! "Why did I have to let this "thing" grow so I could kill it???" I just tried to forget about it all. Needless to say my eating disorder got worse. About the time I was eight weeks, I began passing a thick, brown matter which I also experienced after the births of two of my children. I wonder if I had or would have had a miscarriage????

The day came, March 3, 1995, and my mother took me to a clinic in Atlanta to have the procedure. I did not want to go. I was not doing this for myself. I did not want to have an abortion. As I sat in a waiting room with other women who were having an abortion, the feeling grew stronger in me that I did not want to do this. I made up my mind. Forget the papers I signed, not even sure what they were. When they came for me (I was next) I would just tell them I did not want to do it, they would show me to my clothes and I would leave. I could explain to my mother on the way home and it would be fine. Wrong!! They came for me and as they walked me to the room I told the nurse I had changed my mind. She said let's go in and talk to the "Doctor". No sooner did I sit down to "Talk to the "Doctor"" was she sticking me with a needle. When I woke up, I found myself in a different room laying next to the women who were in the

waiting room with me. A new nurse asked me if there was anything she could get for me. I asked if it was done and she simply said, "yes". I told her yes you can get a gun for me. I could not bear to walk out of there and face anyone! I had to. When I was walked out my mother was sitting in the office where we had started out in tears. They had to tell her I had requested a gun.

She took me home and I slept and cried for a few days. Something had to be done for me. The next decision was to put me on a plane to my cousins in Provo, Utah. I had to leave my surroundings and try to find myself or I was convinced I would die there. My parents agreed to help me go, to take time off from school and find myself. They knew I was going to a safe place with people who loved me. It was difficult for all of us. I will never forget the morning we left, I asked to go to one of my best friends home who had just had a baby boy. I am sure she has never figured out why when I held him I began to cry. I would not say I found myself in Utah but I did I begin to laugh and see beauty in the world again. How can you not in Utah! Life continued and I have managed to keep my secret and hide my pain. Every time something has gone wrong in my life since then I believed it was God's punishment for having had an abortion. Every time I see a pro-life sticker, ad, or billboard I am shamefully reminded. Every time I see my friends son who is now 10 years old I am sadly reminded. It never goes away! I would rather be able to look at my child and smile.

I am now 32, I am married and have three wonderful children. Our third child was not planned but is most definitely a gift from the Lord. At my first ultrasound, I was exactly 8 weeks pregnant. I heard the baby's heartbeat and began to cry. These were not tears of joy. I instantly thought that I had killed a heart beat just like that 9 years ago. Of course my husband did not understand but was very supportive. I had a friend who I knew counseled women like myself. I spoke to her about it one day because I began to believe no woman should be allowed to have an abortion without hearing that heartbeat. I know had I heard my first child's heartbeat that baby would be with me and I would not be writing this story. Today my friend has promised to be my strongest support as I begin a long awaited healing process. To me this is another sign that God puts people in your life at certain times for certain reasons ~ Ultimately his own.

I just went home to visit my family over the summer and had the most amazing talk with my Father. We have all come full circle with our faith walk. Dad and I began talking about forgiveness. He said God gives us signs and he had received one. I asked "What do mean". He said it had to do with me and we will probably both cry. He said on his birthday a couple years ago he was sitting in his office crying asking God to show him that he had been forgiven for the part he had played in my having an abortion. At that moment the phone rang. It was my niece, his first born grandchild, calling to wish him a happy birthday. She had never called him in the office and has never since. Dad felt like this was his sign. I did cry! I said, "I wish I had a sign like that". Dad said look behind you. My two youngest children were sweetly asleep in their car seats. It dawned on me. The many problems my children have had with their health and the fact that we had a third child we could not afford were not punishment for what I had done. My children are signs of God's forgiveness.

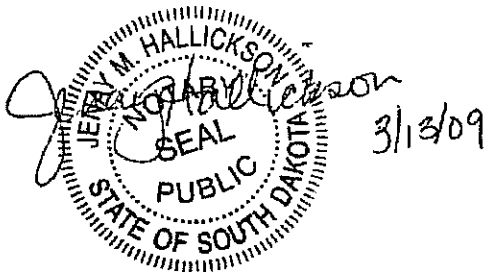

I then told my father that I wanted to do something with my experience that would help other women not make the same mistake I did. I was just worried my mother would not want me to tell anyone and I wanted to show her that respect. He then told me my mother was volunteering and giving large portions of her tithes to a place called the St. Francis House which houses and schools pregnant girls and single women. They also counsel but Mom has not taken them up on that part yet. I am hoping My story on paper will help. Before I left Atlanta I talked to my mother and let her know my plans. We went over the fact that we did what we thought was the best choice at the time. While that may be true it does not take away the pain or the fact that it was the wrong choice.

You see, My being pregnant was going to change all Our lives no matter what I did. I know God has a specific plan for our lives and He is telling me now is the time for me to take what He has given me and bring glory to Him. As hard as it is for me to forgive myself, God has forgiven me. Jesus paid the highest price for me and I am so humbled by His love. I am ashamed, regretful, and saddened by my mistake. However, I know if I kept it my secret I would never truly be able to give my life to glorify God. It is not our right to make such a mistake. If God did not want me to have that child I definitely would have

had the miscarriage my boyfriend wanted me to have. I had no right to make that call for him. Maybe I did or was going to have a miscarriage but I did not give God that chance. God knows what he is doing in everyone of our lives. It says in Malachi 3:3 that God sits like a refiner and purifier of silver. A silversmith must keep his eye on a piece of silver until he can see his reflection in the silver. We have to give God the chance to right wrongs and to be the controller of our lives. How else can he mold us into his image.?

I have had an abortion. I can tell you and my parents can tell you that it is wrong! No matter what decision you make it will never be an easy one. Your life will be change forever! Why not make the right decision. Ask yourself "What Would Jesus Do"? I think we all know the answer. I am so sorry for the choice I made. I know the affect abortion has on a woman and even a family. I would not wish it on anyone!

- 1) Tell approximately when and where your abortion occurred: Halloween 1980 General Hospital
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No

I am now 48 years old and still have not married. I am not in good health for having a baby now. I have only one child - born out of wedlock - who was seven years old when I had the abortion. I am so thankful for the son I have, and now I have a grandbaby. But I wish I had the child I aborted.
- 7) How has your abortion affected others in your life? My son was a only child and had no dad in the home. I had to work a lot. He was lonely. A brother or sister would have been such a blessing to him.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Don't do it. You will regret it the rest of your life.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? If I had not had such an easy choice, I would have two children now instead of one. BEFORE ME, the undersigned authority, on this day personally appeared Lashonda M. Cody (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: August 17, 2002 - Knoxville, TN
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I was informed of physical risks and depression. There is much more to depression than that mere word. You cry as if your mother just died, you want to go back or lift your child up and put her back inside you. It hurts in your soul, something unshakable.
- 4) Were you informed of any link between abortion and breast cancer? Yes Have you had breast cancer? No
- 5) Did anyone pressure you into having an abortion? Yes If so, who? _____
- 6) How has your abortion affected you? Since I had originally planned to keep my daughter, I was used to talking to her everyday. I was so excited to have her, but a friend of mine told me I would be selfish to keep her because I couldn't take care of her financially. He told me to remember the homeless and hungry kids of this world and how my baby could end up being like one of them. I was in the middle of finishing my college career. He said that I wouldn't be able to be a full time mother, got to school part time and work to support the two of us. He also told me that it was better for me financially to pay \$500 now instead of \$500,000 for the rest of my life - I cry everyday, I still talk to her everyday, I miss her so much. I feel like my heart has been ripped out. I gave up my child because I was afraid.
- 7) How has your abortion affected others in your life? _____
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Do not listen to what everyone else is saying nor to yourself if you believe you can't support your child. You can do it! And when you finally see your child, you know you will finish school and obtain a career to support her. You can still get married, your life won't be over, it will be better.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? There is no way to express the way I feel about the decision I made. But imagine it as a young woman killing her child to keep it from starving to death only to receive enough food to feed an army of 1,000,000 men 2 minutes later. Devastation. I loved my child. Fetus = Baby!

- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? Yes If so, who? Boyfriend
- 5) How has your abortion affected you? I have been severely depressed, full of guilt, ashamed, fearful, anxiety attacks, cried all the time, didn't want to live anymore, life didn't feel the same anymore, constantly saw counselors, preachers, & psychologists, had a nervous breakdown in 1999. I stopped living, I only existed going through the motions of everyday life.
- 6) How has your abortion affected others in your life? I seemed to hurt everyone I touched. I can't keep or maintain any relationships with males or females. My colleagues & acquaintances think I am CRAZY.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? Please don't kill your own child because he/she is truly innocent. God loves you and your unborn child and he will take care of both of you if you would trust Him and go to Him in prayer instead of an abortion clinic. You will regret aborting your child emotionally & spiritually. I made the wrong choice!
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion actually kills the unborn child and the mother! It is not the answer to anything. This country was originally built grounded and rooted on God's principles as its foundation... but killing innocent children is an abomination to God who created life. Legalizing abortion was wrong - the mother's emotional state is traumatized. Who can represent the innocent, unborn child?

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: 1989 - Planned Parenthood Nashville, TN
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? 1990 - Dr. Bill Chambers Nashville, TN
I was adequately informed of the actual procedure but I was definitely not adequately informed of the consequences.
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? YES If so, who? My mother, my boyfriend, Planned Parenthood
- 5) How has your abortion affected you? I had 10 years of depression, anxiety, and panic attacks that I had trouble understanding. I did not understand what was causing me to be literally ill. I eventually learned of Post-Abortion Syndrome. I was apprehensive at first but agreed to see a counselor. Through this process I discovered that I was so full of guilt, shame, regret, unforgiveness, and sadness that I was unable to cope with day to day life. Those 10 years of my life were spent in anguish due to a decision that I had made based upon misinformation and untruths.
- 6) How has your abortion affected others in your life? For the 10 years that I spoke about ^{and untruths} my husband and children did not have a whole person as wife and mother. My depression and anxiety absolutely affected them all.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would make sure that she understood the facts of abortion and the procedures used and I would make sure she understood the risks involved physically and mentally. I would make sure she understood that there is such a thing as Post-Abortion Syndrome and what that means for her. I would share my story with her.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell the court what my experience with abortion has been like and explain to them that I made a decision without understanding truth. I would hope that my story would help explain to them what the effects of abortion can do to a person both physically and mentally. Not to mention what it does to an unborn child. It is amazing to me that such a clearly immoral and dangerous procedure could actually be permitted. The well being of so many is in jeopardy everytime a "choice" "I have read the above and foregoing statement and the same is true and correct." is made.

AFFIDAVIT

To be filled out by women who have had an abortion.

The State of Tennessee

County of Williamson

BEFORE ME, the undersigned authority, on this day personally appeared Karen Keitzman (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: April 1969 Windsor, Ontario Canada
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No.
The MD at the MSU Campus Clinic gave no information or referrals to a counselor or adoption agency. He gave me no information on pregnancy or fetal development. He said, "Ten minutes and you won't think about it for the rest of your life." He was wrong.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? Wrong.
- 5) Did anyone pressure you into having an abortion? NO If so, who? Financial pressures. Fear of damaging my good name. I made the choice, because there was no other choice.
- 6) How has your abortion affected you? Physically, immediately after the procedure I developed an infection. I also have not had any more pregnancies. Emotionally, I was in denial of the reality of what happened on the abortion table for fourteen years. I developed defense mechanisms to ~~not~~ deal with life, losing emotional feelings and being numb. After the abortion I was involved with exploitive relationships and had little self worth. Physically, I gained over 140 pounds. I became a hard, cold individual. The abortion affected my relationships with friend, relatives, and others. Fourteen years after the abortion, when a coworker became pregnant, I began to cry for my baby, I finally realized it was a baby. I then began an extensive grief/healing process.
- 7) How has your abortion affected others in your life? Yes. Friendships, relationships, family.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Abortion will not make you un-pregnant. Take time, get lots of information, and talk to others who care about you. Abortion is not an emergency - it is a permanent part of your life history.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Women are exploited by abortion, suffering lifelong physical and emotional consequences. Abortion is not just a medical procedure. Abortion impacts many aspects of that woman's life - and permanently ~~permanently~~ harms and destroys women and those they love.

BEFORE ME, the undersigned authority, on this day personally appeared Tammy M. King (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Abortion Choice Clinic, Elizabethton Tennessee, 1991
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Kind of but not really, I had to watch a video prior to the procedure. No one told me about going into depression or the pain from the procedure, and of course they gave me birth control pills
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____
- 6) How has your abortion affected you? After I had my abortion, I became depressed and suicidal. I have regretted having an abortion. I have been condemned about having an abortion because I have always wanted a child and gave the only opportunity I had to have a child up. I have felt ashamed that I took a babies life. My thoughts in the passed have been I want to be married and have a family but because I had an abortion I will never be able to have kids. If I would have known then what I know now I would have not had an abortion. God will provide.
- 7) How has your abortion affected others in your life? It hasn't because not many people know that I have had a abortion I have been ashamed of the fact. The dad did not know at first.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Not to consider it at all. That God is their provider and he will make a way and that eventually having an abortion will haunt you. That having an abortion can lead to depression.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? That legalizing abortion has opened doors for men that do not want the responsibility of a child to talk women into aborting a child. It also allows women that think they cannot provide for a child an easy way out when adoption is better than the regrets of having an abortion

AFFIDAVIT

To be filled out by women who have had an abortion.

The State of Tennessee

County of: Bradley

BEFORE ME, the undersigned authority, on this day personally appeared M. K. (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

Tell approximately when and where your abortion occurred: 1/20/84 - Chattanooga, Tennessee
 Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. I was only told what would be done in the procedure - eg. anesthesia administered, cervix dilated, extraction (but no mention of what was to be extracted), what I could expect to feel (physically only), bleeding that may occur. No one told me it would kill a baby or that there was even a baby inside me. Nothing was said about any possible consequences - esp. emotionally
 Were you informed of any link between abortion and breast cancer? no Have you had breast cancer? no
 Did anyone pressure you into having an abortion? no If so, who? _____

How has your abortion affected you? Has caused tremendous guilt, shame; emotional trauma when I realized what I had done. I have suffered from depression, bouts of crying, anger, great sorrow & grief. For a number of years I suffered from "Anniversary Syndrome," a type of depression around the time of conception, the date of the abortion & what would have been the estimated due date. I have also suffered from grief around Mother's Day. I have had low self-esteem. I "ran" from myself and from God for a number of years before I began to deal with this. It has affected my ability to relate well w/ others. It has interfered w/ intimacy w/ my husband. The depression, anger & emotional instability resulting from the abortion affected my ability to function properly on the job & almost caused me to lose a job. My first child was breech presentation due, I believe, to the fact that there had been death (murder) in my womb. He was delivered by C-section, which involves its own complications. I had difficulty forgiving myself and others who had any involvement w/ my decision to abort.

How has your abortion affected others in your life? It has caused friendships to be dissolved. Has caused grief, pain for loved ones in my life. It has caused a strain on my marriage. My grief has interfered w/ my ability to relate well to my children. Time spent dealing w/ this & related issues has taken away time from my children, husband

Based on your own experiences, what would you tell a woman considering an abortion? Please Don't!! It will kill your child & change your life forever. You would live to regret it all your life. God allowed your baby to be conceived. No matter the circumstances of how that occurred, He has a plan & a purpose for both your life and that of your unborn baby. Please allow him/her to be born. If pregnancy presents problems for you, killing this baby won't be a quick fix. It will only bring more problems into your life. Possibly physical & definitely spiritual & emotional.

Based on your own experience, what would you tell a court that believes abortion should be legal? Killing babies in the womb doesn't benefit anyone except those who perform or sell abortions. It doesn't solve problems - only creates more. It brings about trauma, emotional, psychological & physical problems that can take years to overcome or that one may have to live with forever. The cost to both the individual and to society are enormous. How many more taxpayers would we have today had over 30 million babies been allowed a chance to live? The elderly today would possibly have more persons to take care of them had these babies been allowed to live. "I have read the above and foregoing statement and the same is true and correct." BEFORE ME, the undersigned authority, on this day personally appeared Deborah Lantz (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: August 1976 in Milan, TN. Milan General Hospital.
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? Yes - But some information was inaccurate.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? Yes If so, who? The doctor and my mother. But I also was given false info to encourage me to go through with it. I got pregnant as a result of rape.
- 5) How has your abortion affected you? It has caused depression, guilt, and a lot of shame and embarrassment.

As I got older it became more and more evident to me that I made a horrible mistake. Now that I'm older I don't believe the fact that the father was on drugs and it would cause the baby to be deformed. I was not on drugs.

- 6) How has your abortion affected others in your life? I'm not sure if the abortion has directly affected others in my life, but probably has affected how I relate to them.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? DO NOT DO IT! A mother is supposed to protect her baby - Not kill it. While it may seem ok at the moment you will regret it later. Think about what exactly you are doing and why.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion should not be made legal for anyone wanting one. My personal feelings are that it should not be done under any circumstances. If it is a situation that the mother will die if she carries the baby, then maybe in this case. But otherwise - It is not fair to sentence an innocent baby to death because the parents decide it is to

"I have read the above and foregoing statement and the same is true and correct" inconvenient to deal with. Call it what you want - It is a baby. The baby did not make the mistake.

3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
4) Did anyone pressure you into having an abortion? NO If so, who? _____

5) How has your abortion affected you? From the moment the procedure began a profound sadness overcame me. If I could have leapt from the table before it was over I would have. It took much longer than I was led to believe and immediately afterward I cried + cried + knowingly at that instant what I had done was wrong. Spiritually it was a devastating experience that still affects me today. I have been blessed with 4 children and having them helps me realize what a huge mistake I made. I regret it above any other decision I have made.

6) How has your abortion affected others in your life? not so much.

7) Based on your own experiences, what would you tell a woman considering an abortion? Do not do it. you will have to live with knowledge that you killed a human being created by our creator. It will haunt you always. childbirth is a gift not a curse or burden - allow it to bless you not curse you.

8) Based on your own experience, what would you tell a court that believes abortion should be legal? who's kidding who here? you can prosecute Scott Peterson for the murder of his unborn son yet it's ok when a woman aborts a child. Science has proven life begins at conception - you are telling yourself Rational lies to make a convenience available to those who do not wish to be inconvenienced and turning your head away from the facts!

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does?
I was given a general description of the process and the immediate physical changes, but no long term information.
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? NO If so, who? _____
- 6) How has your abortion affected you? In the beginning I thought I was literally going to go crazy. I did not sleep or eat and I was in a constant state of depression. Twelve years later I can still remember the horrible feeling. I am only recently realizing that ~~that~~ it is still affecting me now. My self-esteem has been damaged for years. They don't tell you how it affects your mind or your emotions. It was a traumatic experience that left deep scars that I still deal with today.
- 7) How has your abortion affected others in your life? The shame from the decision has caused me not to tell people. I know the father dealt with some of the same emotional issues though.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? I would tell her NOT to do it. There are so many other alternatives. If I could turn back time I would not do it. I wish there had been someone there to tell me the same thing.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion should not be legal. They want to wrap everything in this pretty little package, "A woman has a right to choose". In reality, when the package is opened, it is ugly. Women go ignorantly into this trap and come out broken.

- 1) Tell approximately when and where your abortion occurred: October 1980, Memphis Center for Reproductive Health
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No, I was not totally informed. I was told the procedure step by step, but I was told it would be performed on a blood tissue, not a baby. I was not made aware of the psychological consequences either
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? Yes If so, who? My Mother did.
- 5) How has your abortion affected you? Since I had my abortion, nothing in my life has gone right. I have suffered from depression, an ongoing sense of shame, and a tremendous amount of anger due to the fact that I allowed myself to be coerced into having this awful procedure performed. It has also affected my ability to be a proper mother to my children.

Later we married, only to have them brought up to my face for 13yrs of marriage. My Ex husband now, used it against me with our son, right after our Divorce. My son looks at me and states "Mom, Dad told me that you are a baby killer."
- 7) How has your abortion affected others in your life? By this it has affected my relationship with my son. He was only 5yrs old at the time his father told him. I confessed to my son, that it was wrong for me to have done what. I pray that this will help to stop the killing.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? After Looking back on all that has occurred, the turmoil having my son look at me as a baby killer, knowing that I'm blessed to have my son, I wonder about my other 2 children I could be blessed with. I would tell them to have the child. That no matter what may come there way God Loves and cares for them.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell not only the court but anyone that would hear the cries of the women, please Dont Let another Child Die. Dont Let another Child look up to his Mother and think of her as a Baby Killer. Dont Let the Devil come to kill steal and Destroy another Womans Life. Especially the unborn life of the child.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: February, 1989, Marina del Rey, California
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: I was told it was 'no big deal' and it would solve my problem without risk to me. They said it was not a baby at that point but only a blob of tissue that needed to be removed before it became a baby.
- 3) Were you adequately informed of the consequences of abortion? No more baby, no more problem. That was about the extent of it.
- 4) Were you informed of any link between abortion and breast cancer? Have you had breast cancer? No. I have been monitored for the past 2 years because of an abnormal exam and mammogram results. So far it seems to be ok.
- 5) Did anyone pressure you into having an abortion? If so, who? Yes. The baby's father. He said that he could not bear to think that he had a child somewhere that he could not be involved with (his decision) and I would be very selfish to do this to him and his family.
- 6) How has your abortion affected you? I feel guilty. I love children but don't really feel that I deserve one. I have been diagnosed with endometriosis (?) and may not be able to have any now anyway. Don't really think I can ever get close enough to anyone to trust them with this shame so I am still single.
- 7) How has your abortion affected others in your life? Of the few who know it's not something we ever talk about. They don't want to so, even if I need to, I don't.
- 8) Based on your own experiences, what would you tell a woman thinking of having an abortion? Get all the facts and get all the options. 9 months of discomfort are nothing compared to the lifetime of guilt and shame you will feel. Not to mention the horror when you realize what you did to your own child. Be very sure you can live with the outcome.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? Legal murder is still murder. We have no right to decide who lives or dies nor should we. If the truth about abortion were made public I cannot imagine any decent human being approving of this horror. We condemned Hitler. How can we not condemn ourselves for allowing this to continue.

- 5) How has your abortion affected you? Years of regret, guilt and am currently being treated for depression. Periods of isolation - feelings of unworthiness - loss of self-esteem. Emotionally a very painful & ~~strong~~ experience.
- 6) How has your abortion affected others in your life? They've had to deal with me & my change - push-pull behavior, dependency and pain. They are I add on the receiving end of my outward display of an inner turmoil.

- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? to use to be very liberal & believed everyone should have a choice until it was given one and I didn't know that a temporary decision that couldn't be undone would have permanent effects on my life.

To be filled out by women who have had an abortion.

The State of TN

County of Shelby

BEFORE ME, the undersigned authority, on this day personally appeared [Redacted] [Redacted] (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: July 1984 in an abortion clinic in Dorien, IL
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? NO If not, explain: I was told nothing before hand. The doctor explained what he was doing during the procedure.
- 3) Were you adequately informed of the consequences of abortion? NO, I was told nothing
- 4) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? yes If so, who? boyfriend When I told him I was pregnant he made all of the arrangements - he set the date & place & paid for it. He even drove me there & took me home.
- 6) How has your abortion affected you? depression & flashbacks. After the abortion I had no self-worth. I turned to drugs & alcohol & relationships with no meaning. After I married & had a miscarriage the guilt was horrible. I blamed myself for the miscarriage because I was a horrible mother to have had an abortion. Having the D+C after my miscarriage brought back horrible memories of the abortion.
- 7) How has your abortion affected others in your life? It mostly affects me by lowering my self-worth & causing depression - although I certainly take out my feelings by yelling or pushing away those close to me.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Don't do it. You will regret it for the rest of your life. The emotional scars will haunt you all the days of your life.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? It should not be legal. Abortion kills babies & hurts women. No woman "chooses" to kill her child - she does so only because she believes she has no other options. Too many women have abortions without fully understanding the implications. Murdering one's baby & hurting oneself. "I have read the above and foregoing statement and the same is true and correct." should not be legal or easy.

The State of Tennessee

County of Shelby

BEFORE ME, the undersigned authority, on this day personally appeared Mitzi M. Turpin (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Sept. 5, 1980 - Bristol, TN (Sullivan Co.)
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO - I was told not to worry, that lots of girls were having abortions, and that it was only a blob of tissue.
- 3) Were you informed of any link between abortion and breast cancer? No Have you had breast cancer? No
- 4) Did anyone pressure you into having an abortion? yes If so, who? the father of the child (my boyfriend)
- 5) How has your abortion affected you? I have suffered for years with the knowledge that I allowed my child to be killed. Guilt plagued me for many years especially on the anniversary of the abortion, and each year around when the baby's birthday would have been (early to mid April). Every time I meet a young person who was born in 1981 I am struck with a deep sadness, knowing that if I had not aborted I would have a child that same age. I am taking medication for depression. God freed me of my guilt when I finally acknowledged my abortion to Him, others in my church, and asked for forgiveness.
- 6) How has your abortion affected others in your life? My husband (not the father of the aborted child) has been a wonderful support for me, but I am sure it is difficult for him to be the shoulder I cry on each year on Sept. 5.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? I would tell her: "Please, please do not have an abortion. What seems to be a quick and tidy answer to a messy problem (unwanted pregnancy) is really a decision that will probably haunt you for the rest of your life. Have your baby, difficult as that may be. Even if you give the baby up, your regret will not be as intense as knowing you killed him or her."
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell them that an unborn child is indeed a human being, possessing unique personhood - the child is NOT part of the mother's body that she can do with as she pleases - the child has his or her own brain, heart and body. Abortion not only kills unborn children, it also mortally wounds the whole of society, cheapening life.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell approximately when and where your abortion occurred: Princeton 1969, NYC 1973
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? No. No! No!
I was only told it would end the pregnancy. I was NOT told that it was murder. On the last level of a life I was not warned about the psychology of some pregnancies.
- 4) Were you informed of any link between abortion and breast cancer? NO. Have you had breast cancer? possibly now -
- 5) Did anyone pressure you into having an abortion? NO If so, who? no medical ins.
*I believed the lies of the liberals. It has cost me 40 years about personally 100 more years.
- 6) How has your abortion affected you? I didn't realize how it affected me until I read David C. Reardon's book, The Jericho Wall and Randy Alcorn's book, Deadline. I have felt guilt, anger, frustration and many depression in my life. It was so hard to believe that God has forgiven me. It affected personal relationships, professional relationships and my family relationships. The only thing that I have, FOUR children. I do not have two ~~children~~ children as to that they were ever a live and affect the relationship I have with my two children who live in my home.
- 7) How has your abortion affected others in your life? It's probably affected my children and how we have bonded. In some ways they see me as someone that controlling and over protective.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? But first it's a crime against God and your child. Jesus will make a way where there is no way.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? They are wrong and they, themselves, will pay a price for a God for not honoring the unborn rights. They must protect the unborn. As they are the poster child for the loss. Mothers simply do not have a right to choose to see their unborn children.

AFFIDAVIT

To be filled out by women who have had an abortion.

The State of Tennessee

County of Shelby

BEFORE ME, the undersigned authority, on this day personally appeared Jenifer B. Whitehead (Print Name), who, being by me duly sworn, upon oath, stated the following facts:

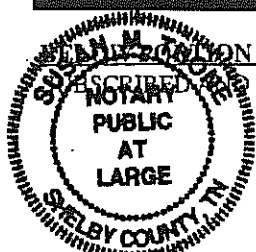

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

- 1) Tell when and where your abortion occurred: November 1988, Memphis Tenn., Planned Parenthood
- 2) Were you adequately informed of the nature of abortion, what it is, what it does? No If not, explain: The entire experience was rushed. I was seeking abortion to due rape by my boyfriend, of whom I was very afraid. But the "Counselor" told me to talk to the father! she said it would be quick, painless, free of complication, and that ultimately it was the best decision - one I'd never regret because of the rape and that it wasn't really a baby yet!
- 3) Were you adequately informed of the consequences of abortion? No. In fact all the things I was told about abortion and what it would "do for me" have been utterly false. Something I was told I'd "never regret" is the single greatest regret of my life! It just made the rape experience worse.
- 4) Were you informed of any link between abortion and breast cancer? No. Have you had breast cancer? No.
- 5) Did anyone pressure you into having an abortion? Yes. If so, who? My boyfriend suspected I was pregnant and beat me up "just in case." I lied to him later and had the abortion on the sly out of fear. My mother, whom I went to for advice, presented it as my only alternative.
- 6) How has your abortion affected you? There was a dead, numb place inside me for a long, long time - 7 or 8 years. It lessened my respect and value for human life, and cheapened the value of my own. It was the catalyst for drug and alcohol abuse, sexual promiscuity, deep depression, shame greater than I'd ever known, suicidal thoughts and utter despair and hopelessness from the guilt. Jesus found me and saved me from all this, or I'd be dead.
- 7) How has your abortion affected others in your life? The pain and consequences from this experience, resulted in family rifts; it affects my children today. The post-traumatic syndrome I suffer when I became pregnant was hard on family and friends. Today, though, there are positive effects because I counsel others.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? Do. NOT. Do. It. Despite what you've heard, despite your fear, despite your situation - it is NOT worth it. In fact, it will only add to your pain and suffering, not reduce it. Also - it's definitely NO convenience - look at my answer to nos. 6 and 7. Nothing "convenient" about any of that. It will destroy your life and your sanity.
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? That its belief is based on lies, propoganda and political/social agenda rather than FACT. All the "pro-choice" arguments supporting abortion, whether legal or moral, are utterly bankrupt. And the biggest lie of all is the term "pro-choice" - because abortion STEALS your choice, and by its very nature makes you the thief of your child's choice. Choosing abortion is no choice at all - it's not good for anyone.

- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? I was informed only of what abortion does in the short term (your "problem" will be solved) but not the long term. Emotional consequences were trivialized.
- 4) Were you informed of any link between abortion and breast cancer? NO! Have you had breast cancer? NO
- 5) Did anyone pressure you into having an abortion? yes if so, who? My mother (first one) & my live in boyfriend (second) - who, incidentally, was the father of both.
- 6) How has your abortion affected you? The first one must've not affected me much as I went and had another 2 yrs. later! After the second, I was sick (mentally & physically) for a long time. I remember extreme nervousness & anxiety with many psychosomatic "illnesses" - I was a miserable wreck. Drugs and promiscuity didn't help, so I left MA & went back to AZ. Basically, I just endured & lived with grinding my teeth all the time. I'm afraid Jesus has to put up with hearing me apologize over & over. I live with deep sorrow.
After the second, I participated in a landmark study by Carol Gilligan & Lawrence Kohlberg - In a Different Voice - no room here to expound on this study & how wrong she is!
- 7) How has your abortion affected others in your life? I can't say - it's been so long and I'm very good at stuffing things down. It probably has a lot to do with why I am so involved in my kids' lives (we homeschool) and am very hands-on - not willing to farm my kids out to anyone.
- 8) Based on your own experiences, what would you tell a woman considering an abortion? DON'T! Have the baby & give him/her to me. If you change your mind later, I'll give the child back, just don't murder him/her. I would too!
- 9) Based on your own experience, what would you tell a court that believes abortion should be legal? I would remind them that they will, one day, be the defendant in the ultimate court - that they should consider what answer they plan to give God. Also, that the Bible, upon which our laws are based and upon which truth is sworn, calls abortion murder, an abomination.

- 1) Tell approximately when and where your abortion occurred: January, 1979 - Little Rock, AR
- 2) Were you adequately informed of the nature and consequences of abortion, what it is, what it does? NO
- 3) Were you informed of any link between abortion and breast cancer? NO Have you had breast cancer? NO
- 4) Did anyone pressure you into having an abortion? YES If so, who? My mother and a close friend.
- 5) How has your abortion affected you? Until Jesus came for me on January 17, 1991, I struggled with an inability to maintain close relationships; anger and bitterness towards my mother, my friends, and the world in general. An absolute abhorrence for pro-life advocates. I drank a lot of alcohol, smoked a lot of marijuana and had a lot of casual relationships with men. At one point I considered suicide.
- 6) How has your abortion affected others in your life? My children suffered through all of the above with me, and only by God's grace are they functioning, productive adults, and only by God's grace do we have good relationships now.
- 7) Based on your own experiences, what would you tell a woman considering an abortion? That the consequences are enormous and the emotional pain is unspeakable.
- 8) Based on your own experience, what would you tell a court that believes abortion should be legal? Abortion hunts women! The courts are always willing to hand down decisions to protect the general populace - except in regards to abortion. This is a procedure that hunts women, kills babies, destroys relationships. This is an issue of "the greater good." Abortion is not for the "greater good."

Attachment to affidavit concerning Roe vs Wade

1983- having been a life long church member and being taught that pregnant means baby, I was shocked and confused when my minister, parents, Planned Parenthood and law said abortion was an option. Did they know something I didn't? At 16 1/2 it was possible. Was it really just a mass of tissue? I had taken my pregnancy test with the help of my minister. I was 6 weeks along. No one spoke against abortion. Actually, it was presented as a quiet way to fix the problem. The doctor just cleans out some tissue, no one has to know, including future doctors. (Information from Planned Parenthood) I get to go on with school and college. When the father of the baby said he would deny me and the child, I put myself in Planned Parenthood's hands. Within 2 days I was sent 1 hour away to sit in a crowded waiting room with other girls 13-20. Some had moms with them like me, some had friends, or were alone. No one made eye contact. I went into a counseling room to be told about the procedure (the cleaning of tissue, some bleeding afterwards, if it's really bad see a doctor, you don't have to tell anyone, no one will ever know.)

Then it was into a changing room, 3-4 girls in a stall, getting into hospital gowns and waiting for their names to be called. (These were done in a clinic, a few floors up, in an office complex.)

Whoever came with us had to wait in the waiting room. It was a very lonely time. Then into the room- no one looked you in your eye, very businesslike, cold, unfriendly. While the procedure went on, I cursed the father, felt like my insides were being ripped out, the sadness was overwhelming. I lay quiet and let the tears flow as inside my head I shouted STOP, I HATE YOU. The ride home was done in silence with the understanding that we were never to talk about it. Inside anger burned into hatred bound by sorrow and a grief that I was led to believe I didn't deserve. Every time I tried to talk about it, to anyone, I was spoken to in cautious ways that shut me up. But why, I did what the world said was ok, why did everyone run from it?

I didn't tell the father until months later when we had a blow out in school and I told him- "I took care of your problem, I hate you, Never talk to me again"

Drinking and being rebellious became my pastime. I drank to dull the emotions and slipped deeper into depression for the guilt of what went on when I drank. On the surface, life was good. I graduated, went on to college, earned a degree, was in church on Sunday. Underneath it all, I was a mess.

My self-abuse took on the form of abusive relationships. I earned my psychology and sociology degrees. Looking back, I see I had enough psychology to know better, enough self-hatred to feel I deserved it. I took exacto knives and carved crosses (of all things) into my arms.

I had anxiety attacks frequently and the ability to "go to my happy place" helped keep me sane (to disassociate myself from any discomfort).

1987- found me in a relationship with a guy who was physically and emotionally abusive, and pregnant. This pregnancy was a "problem" that needed fixed, the father was in jail for assault and battery on another kid. He said he would kill me if I left him. This was a problem. The world offered to fix my problem again. Self-doubt (maybe I am wrong, maybe they know more than me..) I had someone make the appointment, just within the first trimester window.

Same waiting room, same cattle stall dressing room, same cold, shameful attitudes from those that were suppose to be helping me. This time, as I lay on that table, I say to myself "Not again, I will never do this again" In the midst of the procedure, I felt myself begin to slip away. I told the nurse "I'm leaving you. Goodbye" and closed my eyes. Suddenly the doctor is issuing orders, there's a flurry of activity, they give me a shot of something...I sleep into the recovery room. It hurts more this time.

This time I am determined never to find myself in that position. One night, in my dorm room, I am awoken by the sound of a 5 year old boy yelling- "Help me, Mommy, help me" I bolt to the voice, only to come to and see my closet door. My heart knows it is the voice of my first child. I cry.

This path the world says is ok to walk is confusing and painful. I seek Truth and Love.

2 years later, I marry my best friend from high school. He has been by my side through everything.

My parents let me talk a little about it now. Looking back I see where my abortions effected others too. My brother found out through the grapevine about my first one shortly after it happened. He became angry, first at the kid, then me. He quit things that were important to him; football, boys scouts, came up with a "what's the use" attitude, got mixed up in drugs, alcohol, stealing, quit school half way through his senior year! His girlfriend became pregnant about the time I was in 1987. She had the baby. He wanted to father it. She kept him away. He married another and got divorced. Now he lives with his girlfriend, has a good job, but won't commit to any one and has a quick fuse.

My husband and I had a miscarriage the first year we were married. The doctor asked alot of questions, turns out they do need to know, and they can tell if you have had surgery. They need the information so you can have a healthy pregnancy. I was preoccupied with getting pregnant as soon as we were married.

We have two kids. For the first year of both, I had my husband check them in the morning to make sure they were alive. I was afraid they would die of SIDS. I was always afraid something was going to happen to them. I still am but not as intense. I didn't bond with them like I could have. Fear becomes a distached barrier.

I overreact if I see or hear something in them that could lead them down the wrong path- I am quick to sit them down and tell them how to do things. Also, I overreact if anyone jokes about my kids-"what if I pick up Bekah and she just stays with us?"

My periods are extremely heavy and painful. My emotions are haywire within my cycle. We had trouble conceiving the second time. The doctor wanted to put me on fertility pills. We chose not to. I have very lumpy breasts and had them checked when my son was three because they leaked fluid one month and hurt. (I nursed the first 6 months.) I have periods of grieving.

My parents overcompensate by buying my kids lots- LOTS -of gifts. They love them, dote on them, spoil them.

8) I would tell her what I tell everyone that comes into our center, what I told my church, the youth group and my kids- abortion is murder. We have been lied to and the lies have consequences. The "problem" resolved through abortion brings relief at first. The pregnancy brought to an end brings grief that has to be dealt with. The child has to be killed, then expelled. You are a mother. It is painful. It leads to depression, anger, abuse, cancer- because the body is developing all this new tissue to help you carry and deliver a baby- abortion stops this process in midstream. The body doesn't understand why suddenly the tissue has no place to go, no function to do- so it attacks the tissue as a foreign body. There are people to help you. This is a turning point, not a brick wall. We are here if you need to talk , no matter the choice.

9) What is the unborn? When does life begin? Why is homicide charged when a preborn baby dies in a car wreck but abortion is not? God tells us the unborn is a child. Science confirms that life begins at conception. Murder is murder. Pregnancy is not a disease or a problem to quickly wipe under the rug and do away with. An UNPLANNED pregnancy is the consequence of sexual behavior that we have come to accept- but it brings heartache outside of marriage. Every pregnancy is wanted= every baby is wanted. Either by the birth parents or the 40/1 parents looking to adopt because, for whatever reason, they can't have a child.

Abortion- if you haven't walked in the shoes of one who has- you don't know what you are talking about. Generations have been lied to; " it was an easy fix to a problem", It's a mass of tissue, not a baby', Isn't murder a crime?" Why would a group of people make a sinful crime a LAW? Acceptable, easy, ok to do? Deep in the soul the woman feels the tie to the baby, whether she is conscience of it or not. That is why there is a grieving process to walk through But we are told there is nothing to think about, we aren't parents, the problem's solved so forget it, which leads to a nation of grieving moms (and dads) who aren't allowed to grieve which leads to high rates of depression, suicide, abusive relationships, divorce (can't commit), shame, guilt, neurosis, detached parenting into a pot of confusion and pain. Then their bodies rebel against the abortion- cancer, extreme bleeding, problems with reproducing, psychosis....what?! Why would there be physical problems & emotional problems if this was a quiet resolution to a problem. BECAUSE IT'S NOT.

The body has to adjust, the mother has to grieve, but why? Because it was a baby!!!! A part of her, ripped out of her womb because she put her trust in the hands of her parents, minister, teachers, doctors, lawmakers - all these professionals saying this "choice" would benefit her and not hurt her. DECEPTION.

I will continue to speak out the TRUTH to keep as many kids as possible out of the abortionists hands. I will lead them to the healing they deserve and away from the wicked, perverse leaders that were suppose to uphold the Constitution and look after the well-being of our nation and our people- our children. When your lies come out- I will be shouting the Truth. You have let us down. You have brought undue pain and suffering, loss, grief, upon the children of this land- the living and the dead.

My family grieves now for the children that are not here. My children grieve for the siblings they never had a chance to know.

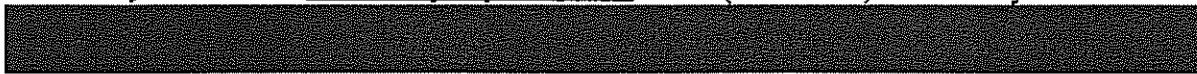

Abortion. 19 years of pain and grieving. Only God can heal. Praise be to God- the Creator of Life and the Lord of my healing. In Him, life finally makes sense.

Before me, the undersigned authority, on this day personally appeared Marilyn Lynn,
(Print Name) who, being by me duly sworn, upon oath, stated the following facts.

My name is Marilyn Lynn (Print Name). My address is

I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:

I was raised in a Christian home but I just didn't "buy into it" at the time. I had started sneaking around and doing things I shouldn't have been very early. I learned early and, was very good at hiding the things I did. As time went on I made lots of bad choices.

I made it through school, had my own apartment, had survived several failed relationships, had a good job and was seeing a new boyfriend. After only about four weeks I had a positive home pregnancy test. I thought that maybe it was not really accurate so I went to Planned Parenthood for a pregnancy test. It also came back positive. I felt like my world had just caved in around me. Knowing I was upset, the lady at Planned Parenthood gave me a number to call when I got home where they could "help" me with this problem. My boyfriend was very recently divorced and paying child support on two children and certainly wasn't about to take responsibility for yet another child he didn't want. When I told him I was pregnant his response was that I needed to get rid of it. I was very scared and didn't know where to turn. I didn't want to marry him, I hardly knew him, I just wanted him to be supportive. He refused to discuss the pregnancy any further. I felt I couldn't tell my parents, or anyone else, that I was pregnant. I called the number to the abortion clinic and made an appointment. As it got closer I couldn't go through with it so I called to cancel the appointment. They told me I needed to be sure that was what I wanted to do because I may not be able to get in as soon as I would like if I waited and the longer I waited the more it would cost. I wasn't sure what to do but I cancelled the appointment. My boyfriend was not happy and wouldn't even talk to me about the pregnancy anymore and I just wanted the problem to go away. I couldn't see beyond my fear of the pregnancy itself to anything else. I was so scared and confused. After several days I called the clinic back and rescheduled the appointment for the abortion.

Early on a hot Saturday morning in July, my boyfriend's sister picked me up to take me for my appointment. We arrived at the clinic to find a group of protestors out front. My boyfriend's sister drove around the block and let me out on the street behind the clinic. She

said she would pick me up in the same place after it was all over, that she had changed her mind about going in because said she was afraid someone might recognize her. I went in through the back. The waiting room was already filling up. I felt like I was going to fall apart but wondered if maybe I was overreacting since no one else seemed worried. I was so scared. I signed in, took a seat and waited. They finally called my name and I followed a nurse into a little room. She took my name and social security number and then briefly explained the procedure by showing me a little model of a uterus and a little hose, explaining that it was like on a vacuum cleaner, and told me how the doctor would take the hose and insert it into the uterus and suck up the "pregnancy tissue". I asked her if "it" would feel any pain. She assured me that it was still just a bunch of cells with no real form yet and could feel nothing. She did another pregnancy test and it was also positive. She told me that after it was all over that I may feel bad for a few days but it was just my hormones trying to get back to normal because of being pregnant and then suddenly not being pregnant. I never realized there were risks to the procedure. They never mentioned any risks, just told me it was a very "simple procedure." I never dreamed it would interfere with the rest of my life.

I was given a hospital gown and told to put it on and have a seat in another room. I changed clothes and waited with several other girls. I remember talking with one who said there was nothing to be scared of, that it was a breeze, all over before you knew it. This wasn't her first abortion; I can't remember how many she said she had had. Finally, a nurse came, took me to a bed and started an IV. She said it was just a little Demerol to help me. Soon they took me to where the doctor was waiting. Lying there on the table I felt so scared and alone. I just wanted it to all be over. I heard the suction machine as the doctor began the procedure. I started crying and the nurse said to me, "We can stop right now and you can get up and go home if you want to." That made it worse because I knew as well as she did that that wasn't possible now because the doctor had already begun the procedure.

They said I would only feel some pressure and heavy cramping but it wasn't like that at all. It felt like my insides were being ripped from my body. The nurse kept telling me that it wouldn't hurt so much if I would just relax. I wanted it to just be over but it just went on, and on, and on. I couldn't stop crying. I was so scared and it hurt so much.

When it was finally over, I felt relieved but sad and angry. It was like I was somebody else and not really me anymore. I determined in my mind that I was going to forget about this. I refused to think about it and refused to let myself feel anything. I knew I wouldn't survive if I couldn't forget about the abortion. Every time I would begin to think about it, or see, or hear anything that reminded me of it, I would push it away. Over time, and with the constant conscious efforts, I became very successful at not remembering. I had become able to push all memory of it away as soon as it came up without even thinking about it. My boyfriend and I stayed together for less than two months after my abortion. I couldn't stand to be around him any more and finally told him. I moved from one bad relationship to another. My life was a mess but I didn't know what to do about it and I had no idea that the abortion could have any thing to do with my current state of mind. I didn't know why I couldn't seem to pull it together. I began having migraines, was gaining weight, drinking and smoking heavily. Long time friendships deteriorated. I couldn't seem to trust anyone anymore and just didn't want to be around anybody anymore. The only stable thing in my life had become my job, which I poured myself into. I had begun to notice that as I would be driving down the interstate that thoughts would just pop into my head about oncoming trucks and if I waited just the right amount of time and swerved into their lane if I would be killed or just injured.

After about a year, I decided to move to another state. It made no sense, as I had a very good job where I had just been promoted to a managerial position. I simply went in one day and turned in my resignation, rented a truck and moved. Nobody here knew me and maybe I could start over. I pretty much cut all ties. After moving, my life really didn't change and was still a mess. Church was still the last thing on my mind and I rarely attended anywhere. I was soon involved in yet another bad relationship with a guy who had just gotten out of prison.

When my husband and I started dating, I knew he was a Christian and that church was a very big part of his life. I began going to church with him. We married five months later.

A few months after we married, I joined his church. Soon, I was pregnant. This time I was ecstatic. From the beginning there were problems. I was frequently on bed rest due to bleeding and cramping. I was losing weight rapidly, and was hospitalized for hyper-emesis. Time went on; the problems continued. On September 6th another ultrasound was done and everything looked ok. On September 9th I went into labor. Our baby girl was born, dead, at five that morning. I blamed myself. For the first time in a very, very long time, I thought of my abortion. I was sure that God had taken the life of this baby because I had taken the life of my first one.

We tried and tried to have another baby. Finally, after various infertility treatments, a huge debt, and another two and a half years, I was pregnant again. Problem after problem developed but after another very hard, touch-and-go pregnancy, my son was born. He was early, but he was healthy and, he was alive. I began having nightmares about my child drowning.

Since my marriage I had been in church and finally I realized that the only reason I "got saved" when I was twelve was because I wanted everybody to stop trying to push me into it and leave me alone. I didn't really think too much about the fact that I hadn't done it for the right reasons. All I did was say a prayer that I was told to say. It didn't mean anything to me. I now began to realize that the profession of faith I had made when I was twelve was not because the Lord was drawing me but just to get people to leave me alone. At the time I didn't know that the Lord actually had to draw me. I thought all I had to do was say the prayer and it didn't really matter why I said it, just that I said it.

It was now around November of 1999. I don't know what day exactly. I couldn't sleep. I got up and tried to read but couldn't concentrate. I knew the profession of faith I had made at age twelve was not real and I knew I was lost. I wasn't sure what to do about it because now I had been going to church for ten years and everybody thought I was already saved. I had been playing church for ten years now. I knew what I needed to do. I knelt in our living room and poured out my heart to the Lord and asked him to save me.

One evening last winter the Pregnancy Resource Center in our town came to our church to present their ministry. When God removes your denial you have to deal with it. I couldn't eat or sleep. I threw up every time I tried to eat. I was afraid I was losing my mind. I had never told anybody about my abortion. I finally went to my pastor, whom I had come to trust, and tried to tell him about the abortion but I just couldn't. After a few more miserable days I went to him again and was finally able to tell him my deepest, darkest secret. He hooked me up with the Pregnancy Resource Center and their post-abortion coordinator. I began post-abortion counseling. I didn't tell my husband. He didn't know about my abortion. Counseling is the hardest thing I've ever had to do but soon the pieces of life's puzzle began falling into place. The nightmares stopped, I began losing weight as I went back to the pattern of eating I had before the abortion. The migraines stopped and I quit taking the meds. I don't think about pulling out in front of trucks anymore.

My pastor helped me to tell my husband about my abortion. He said he had always known there was something wrong but never could figure out what it was. He had begun to think that there was someone else in my life because I seemed so withdrawn from him. Now he knew the truth and my marriage, which was in trouble, has healed.

The scars remain – painful at times– but I'm forgiven. I'll never be able to see little girl on this earth but if I can let others know what the other side of abortion is like, hopefully it will touch some lives with the truth. I can never take it back. I can never "fix" it. I will always have to live with the consequences of my abortion but when I feel guilty I remember Romans 8:1-2, that there is now no condemnation to them which are in Christ Jesus and Hebrews 10:17, that He'll remember my sins no more.

I have read the above and foregoing statement and the same is true and correct.

#3 In the literature given to me describing possible complications, 10 out of the 11 items listed were worded in a way to downplay any danger. The literature stated that "emotional problems are uncommon, and when they happen they usually go away quickly".¹

They verbally assured me that the abortion would not be painful. They were wrong, it was excruciating.

#6 I was told that an abortion was a surgical procedure to remove unwanted tissue from my body. I have been grieving the death of my child for ten years now; my heart is in pain to this day.

#7 The option of aborting the pregnancy was first entertained by myself. The baby's father did not attempt to sway my decision either for or against the procedure. He accompanied me to each of my appointments to support me in my decision. The staff was reluctant to acknowledge his presence let alone answer his questions. They were extremely reluctant to explain anything to him. He was treated as insignificant, though he was involved just as much as I was in the activity leading to the pregnancy.

#8 Do not have an abortion. The danger to your health, mentally as well as physically, is not worth it. The implied relief the staff told me would be the result never came. After I was released from the recovery room, I went home and cried myself to sleep in the father's arms. I expected my life to be easy, it has not. Abandoning your responsibility as a parent does not result in peace of mind.

#9 It is not in the best interest of the mother to use abortion as a method of birth control. It is surely not in the best interest of the child involved. I expected to move on with my life with no repercussions, no regret, and no grief. Whether a pregnant woman is aware of it or not, her heart is desiring a relationship with her child. Murdering that child is not conducive to that end.

I have written and reviewed the forgoing statement and the same is true and correct.

"I am over the age of eighteen years, and I am of sound mind and competent to make this affidavit. I have personal knowledge of the facts stated in this affidavit, and I do solemnly swear, or affirm, that the following facts are true:"

1. Tell when and where your abortion occurred: December, 1968, Michigan; October, 1972, Michigan
2. Were you adequately informed of the nature of abortion, what it is, what it does? If not, explain: N/A - both were illegal (one performed by physician, one performed by myself)
3. Were you adequately informed of the consequences of abortion? N/A - see #2 above.
4. Were you informed of any link between abortion and breast cancer? N/A - see #2 above
Have you had breast cancer? No
5. Did anyone pressure you into having an abortion? No
If so, who? _____
6. How has your abortion affected you? For many years I was bothered by guilt, regret, shame, remembered the horror of flushing tiny babies down the toilet. Becoming a Christian healed me.
7. How has your abortion affected others in your life? After convincing my parents to help me get the first one by threatening suicide (invalid threat), our relationship was damaged (my fault).
8. Based on your experiences, what would you tell a woman considering an abortion? I would tell her that I did not expect to have such strong emotions (listed in #6) and try to help her realize the importance of letting the baby live, offer to help meet her and her baby's needs.
9. Based on your own experience, what would you tell a court that believes abortion should be legal? I would tell them about my experience hoping they would understand how abortion causes more harm than help. WHO WILL MOURN MY BABIES?

by

Pamela Sanders

Who will mourn my babies, my two sons who died before birth? Aborting them seemed like a practical solution to my problems; but later I experienced sadness, guilt, and regret. I share my story hoping to make women aware of the emotional distress caused by an abortion, enabling them to make wiser decisions.

It all began a few weeks before my eighteenth birthday when I moved into an apartment with Joe. I had dated Joe through high school, though my parents did not approve; but I was rebellious and

eager to be free of their authority.

Joe and I were married after my birthday, but within a month I realized I'd made a mistake. I thought being away from my parents and on my own would be fun; but when marriage didn't measure up to my ideal, I was disappointed and wanted out. I was stubborn and determined. I was also pregnant.

I told my parents I wanted a divorce and an abortion. They agreed to help because they wanted to see me in a better environment with hopes for a better future. Abortions were legal in only a few states in 1968 and Michigan was not one. But we located a doctor who was willing to perform the illegal abortion. My mother and I went to his office one night after office hours. I was nervous and scared and hoped it would be over quickly.

The doctor injected a local anesthetic into my cervix and did a D. and C. It was very uncomfortable and a bit painful. By the time I got home I was vomiting and had severe cramps for several hours before aborting a dead eight-inch baby boy.

It appeared to be perfectly formed, even the fingers and toes. As I looked at the tiny body, I thought of the name he would have been given and how proud Joe would have been. I wondered what it might be like to hold my own live, squirming, crying newborn; but I forced those thoughts from my mind as I reluctantly flushed it away.

For a long time I had bad dreams about what I'd done. I couldn't forget the tiny baby boy and I felt sorry for him. I also felt sad and guilty, feelings I did not expect to have.

When I felt better physically, I went to see Joe. We decided to try to make our marriage work. In an attempt to start the new

commitment on the right basis, I told Joe about the abortion. He'd been raised in a Catholic home, and, though not committed to his church as an adult, he had an ingrained belief in the value of unborn babies. He was appalled to learn that I had done such a thing.

My parents were angry and hurt when I returned to live with Joe. They had compromised their moral standards because of my thoughtless selfishness. I had used them to get something I wanted, or rather to get rid of something I didn't want.

My marriage continued to falter, but the following year I gave birth to a daughter. Joe was abusive to me and the baby. He was also involved in drugs and many scary people visited our home frequently. When our daughter was about eighteen months old, I decided divorce was the only answer.

I was pregnant again, about three months. How could I raise two children alone? Did I dare ask my parents for help again? They might have helped, but I was twenty-one by then and determined to prove something to myself. I didn't want to be under anyone's authority any more. I wanted to make by own decisions, to be my own person. I would be independent and never rely on anyone again. I would perform my own abortion.

The irony of this is that I knew my great-grandmother had died trying the same thing. She left behind a husband and four young sons. My grandfather had terrible memories of the mean woman his father married to be their stepmother.

But knowing that did not stop me. I was confident that if something went wrong, modern medicine would save me. So I proceeded with my plan. I purposefully did not sterilize the instrument I chose

to use; if infection developed, it would help to abort the baby.

One day when Joe and I were out, I started bleeding heavily. By the time we got home the four pads I used were soaked as well as my jeans from my waist to my knees. Alarmed, I called my obstetrician. The next day in his office, he told me I was about to miscarry. That, of course, is what I wanted to hear. A few days later I started to hemorrhage again. Along with the blood was the body of another baby boy. Again I felt sadness at what I had done, but I quickly removed those thought from my mind. Joe was disappointed and sad when he saw the dead baby, and angry. He was angry because he suspected what I had done. However, I insisted that I had done nothing to cause the "miscarriage", and another baby was flushed away.

Over the next week, I became very sick. My obstetrician said I needed to be hospitalized for a D. and C., but no beds were available and I had to wait.

The hemorrhaging started again suddenly one morning. After bleeding steadily for over thirty minutes I fainted. It was then that I realized that something was very wrong. I was admitted to the hospital in serious condition. The hospital admission form stated the diagnosis as "Incomplete Abortion". When Joe saw that, his suspicions were confirmed. He turned to me and shouted, "What's this?!?" The office clerks stared at us as I explained that the term "incomplete abortion" is the medical term for miscarriage. He seemed to accept my explanation, but I felt too sick to care.

Alone in the hospital room, I got into bed and closed my eyes. As I started to doze, I was awakened by someone checking my pulse. It was the anesthesiologist; he had come to explain the anesthesia I

would have during surgery the next day. He said I was so pale he didn't know if I was dead or alive; that's why he'd checked my pulse.

After he left, some nurses came in and started a blood transfusion. It was amazing to watch the palms of my hands and see the pink return. I needed four or five units of blood before surgery could be done. I was also given massive intravenous doses of antibiotic because of the infection that had developed. The D. & C. was done the next day. When I was discharged, I went to my parents' house with my daughter rather than going home with Joe.

The following week I went to my doctor's office for a check-up. He knew it wasn't a miscarriage and insisted that I tell him the details of the abortion. He scolded me severely, saying I'd done a foolish thing and was closer to death than I realized. He also said I could have trouble with future pregnancies because my cervix had been damaged. He spoke sternly to me and I was in tears when I left his office.

My grandparents had come from Florida when they heard how sick I was. My daughter and I went home with them for a three-month visit. The time away from Joe, along with having succeeded with the abortion, helped me to be strong in my decision to get the divorce. He tried to convince me to return to him; but when he realized my determination, he gave up. I think, too, that he suspected what I'd done. He was probably so disgusted with me that he didn't really want me back. How could he ever trust the one who had killed his sons?

During the months following our separation, I had no self-respect and didn't see how anyone could ever care about me if they found out about the abortions. Thoughts of what I had done stayed in the back

of my mind and dominated my thinking, especially while in Florida. Having nothing to do but rest while at my grandparents' home was just what my body needed; but it did nothing to help my emotional state. Back home in Michigan, I did all I could to keep from thinking about the abortions. I kept busy at work during the day, and at night I went out with friends; but nothing I did helped me forget what I'd done.

I soon felt the need to go to church. I had attended church on and off as a child but had never made any genuine commitment. Just after my divorce was final, some friends invited me to a week-long seminar that helped people learn to deal with everyday problems and relationships. I was in tears several times during that week as I was made aware of how wrong I'd been about so many things. As I faced the truth about what God thought about all I had done, feelings of guilt, regret, and sorrow flooded over me - guilt over the abortions, regret over the divorce, and sorrow over the realization of what an evil person I really was. However, I also realized that God loved me. I learned that He had made a way for me to escape the destructive thoughts that were almost more than I could bear. I found comfort, peace, and a new excitement in His forgiveness. At the end of the week I committed my life to Christ. That was June, 1973; I became a new creature!

I began to realize that the Lord had a plan for my life. He had allowed me to go through those difficult things for a special reason: He wants me to use my experiences to help others. It is by His grace that I am alive. I am not proud of what I did; but if it will keep others from making the same mistakes, I am willing to share it.

The physical pain that goes along with having an abortion is slight when compared to the emotional pain. My body healed, and, although there was the possibility that my damaged cervix could not stand another pregnancy, I remarried and gave birth to two sons. However, I will never forget the sadness and guilt I felt at the time. Nor will I ever forget holding those tiny bodies and not wanting to flush them down a toilet, but doing it just the same. I was very selfish in what I did, and I know now that my selfishness was the worst sin of all. I also know that God forgave my sinful selfishness. Because of Him I have no more guilt over my past.

My abortions had far-reaching consequences which involved many people. Abortion includes dishonesty, deceit, and distrust among all who are involved; there is never just one who suffers. An abortion is not an easy way out of an embarrassing or difficult situation, nor should it be used as a method of birth control. An abortion is not simply a visit to a clinic, a day or two of discomfort, then an erased memory. It becomes a nightmare in the back of the mind and is never forgotten. After an abortion a woman is troubled with thoughts of the baby. What would it have been like? Whom would it have resembled? What would it have become? These and many other questions remain forever unanswered. Feelings of regret, sadness, and guilt can be overwhelming. If I can prevent one person from experiencing such grief, God will have accomplished his will through me.

Who will mourn my babies? In Jeremiah 31:13 God says, "I will turn their mourning into joy, and will comfort them, and make them rejoice from their sorrow".
