Clinical (Service) Responsibilities

9/16 – present
Specialty: Surgical Critical Care

Role: Attending Intensivist

Time Commitment: I attend in both the SICU (Zayed 9 East) and the WICU (Weinberg 3A) Surgical Intensive Care units for a total of 6 weeks per year. The SICU has a census of approximately 12 patients with an average 3-5 patient daily turnover. The WICU has a census during the week of 16 patients with a turnover of approximately 8-10 patients per day.

9/16 – present

Specialty: Acute Care Surgery (Trauma, Emergency Surgery, Elective General Surgery)

Role: Attending Surgeon

Time Commitment: I practice at the Johns Hopkins East Baltimore Campus (Johns Hopkins Hospital) and periodically at the Johns Hopkins Bayview Campus. The Division of Acute Care Surgery provides 100% of the adult trauma coverage and 100% of the non-direct referred emergency general surgery coverage (with 24 hours in-house attending level coverage). We also cover 100% of new general surgery Hopkins Access Line consult/transfers. Our inpatients are admitted to Halsted surgical service, which combines all trauma and emergency general surgery patients, an impatient consult list, and the admitted elective operative patients of the division's attending surgeons. I am the service attending approximately 14 weeks per year. Average daily inpatient census is approximately 30 patients with another 8 active consult patients per day. The trauma service admits approximately 1000 major trauma per year with an additional 200-300 consults over the course of the year. We see an average of 5 new general surgical consults per day. In addition to the service weeks of coverage, I take an average of 5-6 (minimum of 4) in-house, 24-hour call days for trauma and emergency surgery coverage each month. On service, the trauma attending of the week is responsible for trauma clinic on Fridays. Additionally, I have a half-day of clinic each Thursday morning and see approximately 10 new patients each session, which helps maintain my additional elective general surgery practice.

9/16 – present

Specialty: Johns Hopkins Hospital Difficult Airway Response Team (DART)

Role: Attending Surgeon

Time Commitment: When on call, the Acute Care Surgery attending responds as the senior surgeon in-house to Difficult Airway Response Team codes. At night, we often are called upon to supervise the safe and appropriate management of airway emergencies throughout Johns Hopkins Hospital and, at time, supervise placements of emergent surgical airways.

9/16 – present

Specialty: Percutaneous Tracheostomy Service

Role: Attending Surgeon

Time Commitment: When on service for general surgery, the Acute Care Surgery attending staffs requests for placement of tracheostomies in the two general surgical intensive care units (SICU, WICU) and the Cardiac Surgery Intensive Care unit (CSICU). These occur Mondays, Wednesdays and Fridays. We also place percutaneous gastrostomies if requested. Approximately 150 tracheostomies are performed by the service each the year.
