

Questions for the Record from Rep. Kevin Kiley for Mr. Christopher Mohr and Mr. Harvey
Mason Jr.

“Artificial Intelligence and Intellectual Property: Part II – Identity in the Age of AI”
February 2, 2024

1. We have seen new technologies used to address AI copyright concerns, one of them being Verify, a blockchain protocol that is a distributed internet database of content that is cryptographically signed to establish the content's origin and history. Have you heard of this tool or any similar ones, and if so, do you believe it would be an effective guardrail in the AI conversation?
