

Jordan F Vaughn MD

Jordan Vaughn is a physician and clinical researcher based in Birmingham, Alabama. He received his BS in Biological and Chemical Engineering from the University of Alabama, his medical degree from UAB School of Medicine and completed his residency in Internal Medicine at UAB Hospital.

As owner and CEO of MedHelp Clinics, Dr. Vaughn has directed his organization to the leading edge of early outpatient treatment of COVID-19 for his patients and the greater Birmingham community. He uses his knowledge of spike protein pathology and microvascular and clotting dysfunction to treat vaccine-injured patients or those experiencing Long COVID.

Dr. Vaughn's treatment protocols are driven by an understanding of the spike protein's ability to cause endothelial damage and clotting in the microcapillaries. He also uses immunofluorescent microscopy to diagnose the presence of amyloid fibrin aggregates in the plasma. Dr. Vaughn is the founder and president of the Microvascular Research Foundation and is a clinical collaborator alongside Dr. Jaco Laubscher, Prof. Ethersia Pretorius, and Professor Douglas Kell.

Dr. Vaughn has treated over 2,000 Long COVID and Vaccine Injured patients.
