

## **The Honorable Brian Baird**

Congressman Brian Baird served six terms – twelve years – in the United States House of Representatives. He holds a Doctorate in Clinical Psychology from the University of Wyoming, practiced clinically for twenty years, taught graduate courses on research and statistics, has written three books, served as a University President, and was an advisor to the National Academy of Sciences, Engineering and Medicine.

In Congress, Baird chaired the Science and Technology subcommittees on Energy and the Environment, and the Research, Technology and Education subcommittee. He also served on the House Budget; Transportation and Infrastructure; and Small Business Committees. He was the primary author of the STOCK Act and of the Federal Ocean Acidification Research and Monitoring Act.

Dr. Baird has traveled extensively and is fluent in Spanish. As founder of 4Pir2 Communication, Baird currently advises leading law firms, businesses leaders, patient advocacy organizations, and political campaigns on communication strategy, public policy, and ethics. Baird now chairs a non-profit organization working to establish the National Museum and Center for Service near the National Mall in DC. The NMCFS is dedicated to honoring and telling the inspiring story of the millions of individual Americans and organizations who serve in countless ways at home and around the world.
