

Joseph Boardman

President and Chief Executive Officer
National Railroad Passenger Corporation (Amtrak)

Joseph H. Boardman was appointed president and chief executive officer (CEO) of Amtrak by its board of directors in November 2008.

As president and CEO, Mr. Boardman oversees the management of America's Railroad which carried 31.6 million passengers in FY 2013, an all-time record. Amtrak operates over 300 passenger trains each day—at speeds up to 150 mph (241 kph)—connecting more than 500 destinations in 46 states, the District of Columbia and three Canadian Provinces. In addition, an average of more than 862,000 people every weekday depend on commuter rail services that use Amtrak-owned infrastructure, dispatching, or rode commuter trains operated by Amtrak under contracts with local or regional agencies.

Under his leadership, Amtrak has improved its operating and financial performance, and is building the equipment, infrastructure and organization needed to ensure its strong growth continues. The company is investing in projects critical for enhancing the passenger experience and essential for supporting its national network of intercity and high-speed rail services. In addition, Amtrak's next-generation high-speed rail vision will provide a global competitive advantage for the United States.

Before joining Amtrak, Mr. Boardman was the administrator of the Federal Railroad Administration (FRA), an agency under the U.S. Department of Transportation, and also served as a member of the Amtrak board of directors. Prior to his position at FRA, Mr. Boardman was the longest serving commissioner of the New York State Department of Transportation.

Mr. Boardman has been involved with the transportation industry for more than 40 years with experience on the local, state and federal levels and his own transportation management company. In addition, he is a former chairman of both the executive committee of the Transportation Research Board (TRB) and the American Association of State Highway and Transportation Officials (AASHTO) Standing Committee on Rail Transportation (SCORT).

In 1966, he volunteered for military service in the United States Air Force and later received a Bachelor of Science degree in agriculture economics from Cornell University and a Master of Science degree in management science from the State University of New York at Binghamton.
