## **Primary Work Activities**

Mr. Byrd is actively involved in developing the IBT's safety and health related policies and represents the International Union during various safety and health policy related legislative and regulatory activities. He is also responsible for managing a staff of technical professionals who provide technical and regulatory support to rank-and-file Teamster members, IBT Trade Divisions, and Local Union Affiliates on issues including but not limited to, transportation safety, occupational safety and health, drug and alcohol testing, and worker safety and health training. In addition, Mr. Byrd works closely with IBT Trade Division leadership during collective bargaining and various organizational initiatives.

He also serves as the Principal Investigator for the IBT Safety and Health worker training program. Mr. Byrd also works closely with various research institutions to identify potential study cohorts within the International Union and facilitate access to those groups by researchers.
