SCHOLARSHIP ACCOMPLISHMENTS:

For purposes of this CV, first author generally indicates the principal author, and final author generally indicates the principal PI author. In some cases, authorship is alphabetical by disciplinary convention. In cases of multiple PI authors, authorship nearer to the end of the list generally indicates increased degrees of leadership of the paper. However, this is not always the case given that my research includes collaborations across many disciplines including architecture, interior design, engineering, biology, computer science, and others, and these sometimes have their own conventions. Therefore, to facilitate interpretation for externally funded projects, student authors are indicated with **(S)**, and tenure related PI and Co-I authors are indicated with **(PI)** or **(Co-I)** accordingly.
