United Arab Emirates

Hyperloop Transportation Technologies (HyperloopTT) is an innovative transportation and technology company focused on realizing the hyperloop, a system that moves people and goods at unprecedented speeds safely, efficiently, and sustainably. Through the use of unique, patented technology and an advanced business model, HyperloopTT is creating and licensing technologies.

HyperloopTT is developing its tech in a completely unique way, by harnessing the cognitive power of a global team of professionals, ranging from NASA scientists, to technology developers, manufacturers, policy makers, enterprise specialists, R&D labs, universities, engineering firms and citizens with ideas. Since its inception in 2013, HyperloopTT has established a network of more than 800 highly skilled individuals and 50 best-in-class partners across five continents, becoming a platform for creating, launching and transforming a new crowd-powered approach to building a business.

N.M. Group

CEO

Oct 2010 - May 2016 (5 years 8 months)

Spanish holding in the alternative energy business with companies in Spain and Chile

In 2010 I left the Hergom group and I created with a financial partner a new group in the alternative energy business. Together we acquire three companies and we create from zero a new factory in Chile and a new factory in Spain. We relocated some production from a Belgium company to Santander

In this period:

- Acquisition of two companies
- Restructured and closed a company in a foreign country
- We built from scratch companies in Chile and in Spain
- Executed commercial and marketing strategy
- Created product lines
- Scaled manufacturing capabilities
