

Marvin Ammori heads public policy for Protocol Labs, a company focused on improving the internet and computing generally. Its projects include IPFS, a content-addressing protocol, Filecoin, a cryptocurrency token, and CoinList, a platform for SEC-compliant token sales. Ammori is a founding board member and officer of the Blockchain Association, the industry's leading trade association. He advised HBO's *Silicon Valley* on its final season.

Ammori is the former general counsel of Virgin Hyperloop One, where he helped the company raise over \$220 million over 18 months. Previously, he headed his own law firm and represented companies including Apple and Google on their most difficult public policy challenges – including serving as the leading net neutrality lawyer in the nation.

For his work in shaping the nation's most significant technology laws, he has been named among *Fast Company's* 100 Most Creative in Business, among *Politico's* 50 visionaries changing politics, and a *Washingtonian* "Tech Titan."

Ammori earned a B.A. in literature from the University of Michigan and a J.D. from Harvard Law School.
