

Charles Wetherington
President
BTE Technologies, LLC

Chuck has served as President of BTE since 2001. Under his leadership, BTE has grown to be an international leader in providing advanced medical devices for physical therapy, sports medicine, and industrial rehabilitation. He and his team proudly manufacture their equipment in Maryland and export to over 40 countries around the world. Their customer list is a who's who of leading hospitals, sports teams, and Fortune 500 manufacturers. In addition, their testing equipment has been used for post-offer physical demands assessments for over half a million new hires for manufacturing and distribution jobs in the US and Canada, helping employees and employers avoid workplace injuries and occupational health issues.

Previously, Chuck served in various general management and operations management positions within General Electric and Black & Decker. He has a bachelor's degree from the University of Illinois and a master's from Vanderbilt, both in engineering. Chuck is also a graduate of GE's world-renowned management and business development programs as well as their Edison Engineering Program.

Mr. Wetherington is a member of Maryland's Governor's Workforce Development Board and has served on several non-profit and university advisory boards. Previously, he served on the board of the American Physical Therapy Association. He is the immediate past chair of the Small and Medium Manufacturers for the National Association of Manufacturers, where he has been a board member since 2007 and is on the Executive Committee.
