

Dr. Adam Daigneault is the E.L. Giddings Associate Professor of Forest Policy and Economics in the University of Maine's School of Forest Resources. He has spent the past two decades developing quantitative models to assess the impacts of environmental and land use policy on the natural resource sectors. His research focuses on a wide range of issues, including sustainable timber supply, climate change mitigation and adaptation, and valuing ecosystem services. He is currently a member of the Maine Climate Council's Science and Technology Subcommittee and the Maine Governor's Forest Carbon Task Force. Prior to UMaine, he was a Senior Economist at Landcare Research New Zealand and an Economist for the U.S. Environmental Protection Agency. While in both roles, Dr. Daigneault worked extensively on policy analysis relating to climate change, biofuels, and land use change.
