

Neil James

Vice President, Operations, Maintenance, and Monitoring

Neil brings 38 years of experience in Electrical Utilities, Alternative Energy and High Voltage Operations to Apex Clean Energy. Neil was previously with BP Wind where he led the operations team managing 16 wind farms generating 1800 megawatts of wind energy. Prior to BP, Neil supported construction of NextEra's 227 mile 345kV transmission line then led the operations team managing the transfer of 1000 MW's of wind energy from Abilene to San Antonio. Neil also held the position of General Manager at NextEra managing 600 MW's of wind generation throughout Texas. Prior to Next Era he worked for Texas New Mexico Power Company holding various leadership positions responsible for the construction and operation of the Western Division Transmission and Distribution systems including High Voltage substations. As a Certified High Angle Rope Rescue and Fire Fighter Instructor for Texas A&M Fireman Training Center (TEEX), Neil brings a unique safety capability to Apex Clean Energy.
