

GUS BRUNER

PRESIDENT

PROJECT ESTIMATOR / EXECUTIVE

Caliagua Inc.
Engineering Contractors

OBJECTIVE

To provide project management and oversight supervision relative to technical, construction and contract issues. Utilize management and organizational skills to ensure that our projects are performed in accordance with the contract documents and specifications. Establish and maintain the highest levels of safety and quality perform on a timely basis & exceed the expectations of our customers.

MANAGEMENT EXPERIENCE

During high school and college, I learned and studied the water and wastewater industry by working in the field as a laborer with skilled pipefitters, carpenters, laborers, and operating engineers to construct water and wastewater facilities.

Following the above work experience, for approximately one year, I continued my education with a pipeline and mechanical contractor as project engineer, cost accountant, and estimator.

Upon completion, I returned to continue my career in public accounting. I gained valuable work experience for an additional two years. I later transferred to the private sector (for approximately two more years), as a controller for a multi-national industrial painting and coatings contractor.

Following this experience I chose to join Caliagua, Inc., the business my father started in 1978. Since 1986 I have served in several capacities; from mechanical and concrete fieldwork; to accountant, estimator, project manager, with my current position being President and Owner.

Today my duties include Project Management, Estimating, Scheduling, Business Development, and Director of Safety.

WORK EXPERIENCE

MWD & W.A. RASIC, 2007
