

MEMORANDUM

TO: Committee on Science, Space, and Technology Members and Staff
FROM: Science, Space, and Technology Committee Staff
DATE: June 2, 2017
RE: Full Committee Markup

The Committee on Science, Space, and Technology will meet on **Thursday, June 8, 2017, at 1:30 p.m.** in Room 2318 of the Rayburn House Office Building to consider the following:

H.R. _____, the “American Space Commerce Free Enterprise Act of 2017” which will be introduced by the Chairman on June 6, 2017. The bill provides a transparent U.S. authorization and supervision certification process for non-governmental space activities that generates certainty for stakeholders and complies with Outer Space Treaty obligations and national security concerns in the least burdensome manner possible. This will improve the international competitiveness of the United States by reforming the burdensome and inefficient space-based remote sensing regulatory system.

For questions about this markup, please contact Ashley Callen of the majority staff at 225-6371.
