

Kristie L. Ebi is director of the Center for Health and the Global Environment (CHanGE), and Rohm and Haas Endowed Professor in Public Health Sciences at the University of Washington. She has been conducting research and practice on the health risks of climate variability and change for more than twenty years, including on extreme events, thermal stress, foodborne safety and security, and vectorborne diseases. She focuses on understanding sources of vulnerability; estimating current and future health risks of climate change; designing and implementing adaptation policies and measures to reduce the risks of climate change in multi-stressor environments; and on estimating the health co-benefits of mitigation policies and technologies. She has supported multiple countries in Central America, Europe, Africa, Asia, and the Pacific in assessing their vulnerability and implementing adaptation measures. She co-chairs the International Committee On New Integrated Climate change assessment Scenarios (ICONICS), facilitating development of new climate change scenarios; chairs the National Academies Board on Environmental Change and Society; and co-chairs the National Academies Committee to Advise the U.S. Global Change Research Program. Dr. Ebi's scientific training includes an M.S. in toxicology and a Ph.D. and a Masters of Public Health in epidemiology, and two years of postgraduate research at the London School of Hygiene and Tropical Medicine. She has edited five books on aspects of climate change and has more than 200 publications.
