

Charlotte Bertrand is Senior Director of Chemical Management, Regulatory Policy and Strategy at the American Chemistry Council (ACC), bringing more than 30 years of experience in environmental policy and management. A former Federal executive, Ms. Bertrand spent nearly 28 years in Federal service and has a deep understanding of government regulatory processes and the implementation of major environmental statutes. At ACC, Ms. Bertrand leads efforts focused on the effective and science-based implementation of the Toxic Substances Control Act, with particular emphasis on risk management and regulatory strategy.

Prior to joining ACC, Ms. Bertrand served as Director of NASA's Environmental Management Division, where she provided agency-wide leadership on environmental policy and compliance across all NASA Centers and component facilities. Her portfolio included environmental planning, restoration, and energy and water conservation. She also oversaw NASA's evaluation of mission risk associated with evolving environmental regulations.

Ms. Bertrand also spent more than 24 years at the U.S. Environmental Protection Agency (EPA), holding several senior leadership roles, including Deputy Assistant Administrator for Policy in the Office of Water; Deputy Assistant Administrator for Programs in the Office of Chemical Safety and Pollution Prevention; and Director of the Office of Federal Facility Restoration and Reuse. She briefly served as Acting Administrator of the EPA on Inauguration Day in January 2021. Her career also includes serving as a Senior Policy Advisor at a private-sector law firm as well as working at Oak Ridge National Laboratory.

Ms. Bertrand holds a Bachelor of Science in Industrial Engineering and a Master of Science in Safety Engineering from Texas A&M University, as well as a Master of Science in Environmental Sciences and Policy from Johns Hopkins University.
