

Jane Carlisle Maxwell, Ph.D., is a Senior Research Scientist in the Social Work School at the University of Texas at Austin and is also an adjunct professor at the Centre for Accident Research and Road Safety – Queensland (CARRS-Q) in Australia. She has been a member of the Substance Abuse and Mental Health Services National Advisory Council and is a consultant to the Food and Drug Administration's Center for Drug Evaluation and Research. She has been a Fulbright Senior Specialist and has been a member of the National Institute on Drug Abuse's Community Epidemiology Work Group for 25 years. Her research specialties include trends and patterns of substance abuse in Texas, nationally, and internationally, with special interest in methadone mortality, the US-Mexico border, and patterns of use and abuse of methamphetamine, party drugs, heroin, and prescription drugs, and the relationship of substance abuse and HIV/AIDS. A recent research focus is on impaired drivers and especially drugged driving. She is principal investigator on a grant from NIDA to study patterns of methamphetamine use in the central Texas area and she is also the principal investigator on a contract with the Texas Department of State Health Services to provide training and technical assistance for instructors teaching courses for impaired driving offenders.
