

## Ken Schneider Vice President, Fellow Symantec Corporation

Ken Schneider serves as Vice President of Technology Innovation where his focus is on innovation, strategic investment and incubation. His prior role was VP Technology Strategy where he drove an integrated business and technology strategy across Symantec. He was previously Chief Technology Officer of the Enterprise Security, and Security and Data Management Groups where he was responsible for architecture, integration, business development, and business operations. Schneider is a Symantec Fellow.

Prior to joining Symantec, Schneider served as CTO and VP of Operations for Brightmail, the leading anti-spam software company that was successfully acquired by Symantec. Before Brightmail, Schneider founded South Beach Software, a software and consulting company that developed products for the professional video market.

Previously, Schneider was an independent software consultant for clients such as Sun Microsystems and Digital Equipment Corporation. He has also held engineering positions at Integrated Systems and at the John Hopkins Applied Physics Laboratory. Schneider received a master of science in mechanical engineering from University of California Berkeley and a bachelor of science in engineering from Swarthmore College.
