

Henry Liu is the Bruce D. Greenshields Collegiate Professor of Engineering at the University of Michigan, where he serves as Director of the University of Michigan Transportation Research Institute (UMTRI), Mcity, and the USDOT-funded Center for Connected and Automated Transportation. His research bridges traffic systems, vehicle automation, and artificial intelligence, with a focus on real-world deployment. Dr. Liu is widely recognized for pioneering work in autonomous vehicle safety evaluation, connected vehicle, and traffic signal optimization. His research on AV safety validation has been published in *Nature* and featured as a cover story. He currently serves as Managing Editor of the Journal of Intelligent Transportation Systems and a board member of ITS America. Dr. Liu is a Fellow of IEEE.
