

PAUL D. SPUDIS is a Senior Staff Scientist at the Lunar and Planetary Institute in Houston, Texas. He received his education at Arizona State University (B.S., 1976; Ph.D., 1982) and at Brown University (Sc.M., 1977). His research focuses on the geological processes of the terrestrial planets and studies of the requirements for sustainable human presence on the Moon. He was Deputy Leader of the Science Team for the NASA-Department of Defense *Clementine* mission to the Moon in 1994, the Principal Investigator of the Mini-SAR imaging radar experiment on India's Chandrayaan-1 mission in 2008-2009, and a team member of the Mini-RF imaging radar on NASA's Lunar Reconnaissance Orbiter mission (2009-present). He was a member of the White House Synthesis Group in 1990-1991, the President's Commission on the Implementation of U. S. Space Exploration Policy in 2004 and was presented with the NASA Distinguished Public Service Medal that same year. He is the recipient of the 2006 Von Karman Lectureship in Astronautics, awarded by the American Institute for Aeronautics and Astronautics, a 2011 Space Pioneer Award from the National Space Society, and the 2014 Eugene M. Shoemaker Distinguished Lunar Scientist Award presented by the NASA Space Science and Exploration Research Virtual Institute. He is the author or co-author of over 100 scientific papers and seven books, including the forthcoming *The Value of the Moon: How to Explore, Live and Prosper in Space Using the Moon's Resources*, to be published in the Spring of 2016 by the Smithsonian Books, Washington DC.
