

## Richard H. Moss

Dr. Richard Moss is a senior research scientist with the Pacific Northwest National Laboratory's Joint Global Change Research Institute at the University of Maryland. His research focuses on the interactions of human and natural systems and he has published on scenarios, climate change adaptation, and decision support. Moss has held several public service positions including as director of the office of the U.S. Global Change Research Program. He has chaired or been a member of several National Academy Boards and Federal Advisory Committees and has been active in the Intergovernmental Panel on Climate Change. He is co-leading work to establish the Science for Climate Action Network, a network of individuals and organizations committed to improving the use of science to identify and implement effective responses to climate change. He received his Ph.D. from Princeton University in Public and International Affairs.
