

Thomas Cavett is Vice President of Government Affairs and Strategy at Tomorrow.io, a leading American weather technology company. Mr. Cavett leads government strategy and business development across North America, where he works closely with federal agencies including the NOAA, NASA and the Department of Defense to advance innovative weather capabilities and strengthen weather resilience.

With a distinguished background spanning technology, national security, and infrastructure resilience, Mr. Cavett brings more than a decade of experience at the intersection of public service and private-sector innovation. Mr. Cavett serves as a member of the Department of Commerce's Environmental Technologies Trade Advisory Committee, where he supports efforts to expand U.S. leadership in environmental innovation and exports. He is the founder of the Commercial Weather Alliance, an informal coalition of U.S. commercial weather companies dedicated to strengthening collaboration and public-private partnership between the U.S. Federal weather enterprise and the domestic weather industry. He also serves as a strategic advisor and venture partner to New Vista Capital, a venture firm investing in advanced aerospace and defense innovations aimed at reinforcing America's industrial resilience and defense readiness.

He previously served in the U.S. Army Special Forces as a Green Beret and worked at McKinsey & Company advising clients on technology, operations, and strategy. He holds dual graduate degrees from the Wharton School of Business and the Lauder Institute at the University of Pennsylvania, and has contributed to global humanitarian missions in multiple conflict zones and has been instrumental in shaping emerging weather and space policy.

Mr. Cavett's testimony today reflects his leadership in fostering public-private partnerships to deliver next-generation weather intelligence and his perspective on the future of commercial weather data in enhancing national resilience and security.
