

**M. Granger Morgan** is Hamerschlag University Professor of Engineering at Carnegie Mellon University where he holds academic appointments in the Department of Engineering and Public Policy, in the Department of Electrical and Computer Engineering and in the H. John Heinz III College of Policy and Management. His research addresses problems in science, technology and public policy with a particular focus on energy, environmental systems and risk analysis and decision-making. Much of his work has involved the development and demonstration of methods to characterize and treat uncertainty in quantitative policy analysis. At Carnegie Mellon, Morgan co-directs the Electricity Industry Center and the Center for Climate and Energy Decision Making. He is a Member of the National Academy of Sciences. At the National Academies he has chaired or been a member of a variety of committees. He served as chair of the “Committee on Enhancing the Robustness of Future Electrical Transmission and Distribution in the United States to Terrorist Attack.” He currently co-chairs the Resilient America Round Table and is a member of the Report Review Committee. Morgan is a member of the DOE's Electricity Advisory Committee and of the Energy Advisory Committee of Pacific Northwest National Laboratory. He is a member of the Advisory Board for the E.ON Energy Research Center at RWTH Aachen, in Germany and serves as Chair of the Scientific and Technical Council for the International Risk Governance Council. In the past, he served as a member and as Chair of the Advisory Council of the Electric Power Research Institute and as a member and as Chair of the Science Advisory Board of the U.S. Environmental Protection Agency. He is a Fellow of the AAAS, the IEEE, and the Society for Risk Analysis. He holds a BA from Harvard College (1963) where he concentrated in Physics, an MS in Astronomy and Space Science from Cornell (1965) and a Ph.D. from the Department of Applied Physics and Information Sciences at the University of California at San Diego (1969).
