

BIOGRAPHY

Dr. Noelle F Metting is a Radiation Biologist, currently working for the Department of Energy Office of Environment, Health, Safety and Security within the Office of Public Radiation Protection (DOE/EHSS/AU-22). Formerly, she worked in DOE's Office of Science, Office of Biological and Environmental Research (DOE/SC/BER), where, from the year 2001 until December of 2014, she managed DOE's Low Dose Radiation Research Program. For the previous 20 years, she worked at Pacific Northwest National Laboratory as a laboratory research scientist. Dr. Metting earned a Master of Science in Radiological Sciences from the University of Washington, and a Doctor of Science in Cancer Biology from Harvard University, with a doctoral dissertation entitled *Studies of Radiation-Induced Mutagenesis and Cell Cycle Perturbation*.
