

Dr. Daniel Evans is the head of research strategy and security for NASA's Science Mission Directorate. An astrophysicist with a Ph.D. from the University of Bristol and postdoctoral fellowships at Harvard and MIT, he is also a veteran of White House space policy, having directed civil space strategy at the National Space Council and served at the White House Office of Management and Budget. In his current role, he oversees the quality, integrity and security of NASA's scientific research enterprise.
